The master of science in nursing in the field of psychiatric mental health nurse practitioner program offers registered

nurses the opportunity to acquire the knowledge and skills to provide care to individuals, families, and groups with psychiatric/mental health needs. The lifespan curriculum is a synthesis of knowledge derived from nursing science, neuroscience, behavioral change theories, motivational theories, learning theories, and other psychotherapeutic frameworks to provide a holistic perspective from which to assess, diagnose, treat, manage, and evaluate acute and chronic mental illnesses. The program covers neuropsychopharmacology, interprofessional collaborative practice, crisis intervention, trauma-informed care, health policy, family systems theory, psychotherapy, group therapy, care of vulnerable populations, promotion of mental health and prevention of mental illness, substance use and co-occurring disorders, and other mental illnesses across the lifespan.

Upon completion of our program students are eligible to sit for the American Nurses Credentialing Center certification as a Psychiatric/Mental Health Nurse Practitioner (lifespan).

Visit the School of Nursing website (<https://nursing.gwu.edu/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 50 credits, including 9 credits in professional core courses, 6 credits in research, 35 credits in field-specific courses, and completion of 600 clinical hours.

Code	Title	Credits
Required		
Professional Core		
NURS 6202	Concepts in Population Health	
NURS 6203	Nursing Leadership	
NURS 6205	Health Policy, Quality, and Political Process	
Research		
NURS 6207	Evidence-Based Practice for Health Care Researchers	
NURS 6208	Biostatistics for Health Care Research	
NURS 6220	Advanced Physiology and Pathophysiology	
Field-specific		
NURS 6222	Advanced Health Assessment and Diagnostic Reasoning	
NURS 6233	Genetics for Health Care Providers	
NURS 6234	Advanced Pharmacology for Nursing	

NURS 6242	Psychopharmacology
NURS 6243	Addiction and Change
NURS 6244	Psychiatric/Mental Health Nursing with Families and Groups Across the Lifespan
NURS 6245	Psychiatric/Mental Health Diagnostic Assessment Across the Lifespan
NURS 6246	Psychiatric/Mental Health Advanced Practice Nursing with Individuals Across the Lifespan
NURS 6247	Population-Based Psychiatric/Mental Health Advanced Practice Nursing Across the Lifespan
NURS 6248	Integrated Application of Psychiatric/Mental Health Advanced Practice Nursing

DUAL MASTER OF SCIENCE IN NURSING IN THE FIELD OF ADULT-GERONTOLOGY ACUTE CARE NURSE PRACTITIONER AND DOCTOR OF NURSING PRACTICE

The dual master of science in nursing (MSN) in the field of adult-gerontology acute care nurse practitioner (<http://bulletin.gwu.edu/nursing/msn-adult-gerontology-acute-care-nurse-practitioner/>) and doctor of nursing practice (DNP) (p. 1097) degree program allows students to earn the MSN and DNP sequentially with 3 credits shared between programs, thereby decreasing the number of credits normally required for the DNP degree. All requirements for both degrees must be fulfilled.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

DUAL MASTER OF SCIENCE IN NURSING IN THE FIELD OF ADULT-GERONTOLOGY PRIMARY CARE NURSE PRACTITIONER AND DOCTOR OF NURSING PRACTICE

The dual master of science in nursing (MSN) in the field of adult-gerontology primary care nurse practitioner (<http://bulletin.gwu.edu/nursing/msn-adult-gerontology-primary-care-nurse-practitioner/>) and doctor of nursing practice (DNP) (p. 1097) degree program allows students to earn the MSN and DNP sequentially with 3 credits shared between programs, thereby decreasing the number of credits normally

required for the DNP degree. All requirements for both degrees must be fulfilled.

Visit the School of Nursing website (<https://nursing.gwu.edu/>) for additional information.

DUAL MASTER OF SCIENCE IN NURSING IN THE FIELD OF FAMILY NURSE PRACTITIONER AND DOCTOR OF NURSING PRACTICE

The dual master of science in nursing (MSN) in the field of family nurse practitioner (<http://bulletin.gwu.edu/nursing/msn-family-nurse-practitioner/>) and doctor of nursing practice (DNP) (p. 1097) program allows students to earn the MSN and DNP sequentially with 3 credits shared between programs, thereby decreasing the number of credits normally required for the DNP degree. All requirements for both degrees must be fulfilled.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REGISTERED NURSE TO MASTER OF SCIENCE IN NURSING, ADULT-GERONTOLOGY PRIMARY CARE NURSE PRACTITIONER

The online registered nurse (RN) to master of science in nursing (MSN) in adult-gerontology primary care nurse practitioner is appropriate for both recent and experienced nurses with an associate degree. The program leads to the completion of bachelor of science in nursing (BSN) and MSN degrees. Students enter the program with up to 84 credits in advanced standing, allowing them to progress quickly through the BSN program while continuing to work as professional nurses. Up to 15 credits from the completed BSN may be applied toward MSN degree requirements.

Students must become licensed as a registered nurse within the first semester of enrolling into this program and are required to attend three on-campus experiences related to MSN courses (NURS 6222, NURS 6225 and NURS 6229).

Upon completion of the program, students are eligible to sit for the nationally recognized American Association of Nurse Practitioners or American Nurses Credentialing Center certification examination for adult-gerontology primary care nurse practitioner.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

NURS 6234	Advanced Pharmacology for Nursing	
-----------	-----------------------------------	--

Clinical hours

Students must complete 625 clinical hours in the MSN portion of the program.

*Students who chooses to take NURS 4207 in the BSN program must take NURS 6207 in the MSN program to satisfy degree requirements.

REGISTERED NURSE TO MASTER OF SCIENCE IN NURSING, FAMILY NURSE PRACTITIONER

The online registered nurse (RN) to master of science in nursing (MSN), family nurse practitioner degree program is appropriate for both recent and experienced nurses with an associate's degree. The program leads to the completion of bachelor of

science in nursing (BSN) and MSN degrees. Students enter the program with up to 84 credits in advanced standing, allowing them to progress quickly through the BSN program while continuing to work as professional nurses. Up to 15 credits from the completed BSN may be applied toward MSN degree requirements.

Students must become licensed as a registered nurse within the first semester of matriculation in the program and must attend three on-campus experiences related to MSN courses (NURS 6222, NURS 6231, and NURS 6232).

Upon completion of this program, students will be eligible to sit for the nationally recognized American Association of Nurse Practitioners or American Nurses Credentialing Center certification examination for family primary care nurse practitioner.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REGISTERED NURSE TO MASTER OF SCIENCE IN NURSING, NURSE MIDWIFERY

A collaboration between the School of Nursing and Shenandoah University (SU), the online registered nurse (RN) to master of science in nursing (MSN), nurse midwifery program is appropriate for both recent and experienced nurses with an associate's degree. The program leads to the completion of the bachelor science in nursing (BSN), MSN, and post-graduate certificate in nurse-midwifery. Students enter the program with up to 84 credits in advanced standing, allowing them to progress quickly through the BSN program while continuing to work as professional nurses. Up to 15 credits from the completed BSN may be applied toward MSN degree requirements.

Students must become licensed as a registered nurse within the first semester of matriculation in the program. In addition, students attend four on-campus experiences related to MSN courses, one at GW (NURS 6222) and three at SU (NM 610, NM 620, and NM 660). Core requirements for the BSN and MSN are completed through GW, which confers both degrees. Nurse-midwifery didactic and clinical components of the curriculum are fulfilled through SU, which awards the post-graduate certificate in nurse-midwifery.

Upon completion of the program, students are eligible to sit for the nationally recognized American Midwifery Certification Board examination for nurse-midwifery.

Shenandoah University School of Nursing (<https://www.su.edu/nursing/>) is fully accredited by the Accreditation Commission for Midwifery Education.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

Students will complete 700 clinical hours in the certificate portion of the program.

The following requirements are applicable to students who matriculated prior to fall 2018:

Code	Title	Credits
Taken as part of BSN		
NURS 4119	Patient Safety and Health Care Quality (course has an on-campus component)	
NURS 4121	Nursing Advancement Portfolio	

NURS 4417	Community and Public Health Nursing
15 Dual Credits	
NURS 6202	Concepts in Population Health
NURS 6203	Nursing Leadership
NURS 6205	Health Policy, Quality, and Political Process
NURS 6207	Evidence-Based Practice for Health Care Researchers
NURS 6233	Genetics for Health Care Providers

Taken as part of MSN (19 credits dual counted with Shenandoah University)

NURS 6208	Biostatistics for Health Care Research
NURS 6220	Advanced Physiology and Pathophysiology
NURS 6222	Advanced Health Assessment and Diagnostic Reasoning (course has an on-campus component)
NURS 6234	Advanced Pharmacology for Nursing

Taken as part of Nurse-Midwifery certificate

(Courses are taken at Shenandoah University)

NM 610 - Primary Care of Women (3)	
NM 620 - Comprehensive Antepartal Care (3)	
NM 630 - Midwifery Practicum (3)	
NM 640 - Comprehensive Perinatal Care (3)	
NM 651 - Integrated Midwifery Internship (5)	
NM 652 - Evidence Based Practice Project (1)	
NM 660 - Advanced Nurse-Midwifery Role Development (1)	

The following requirements are applicable to students who matriculated fall 2018 and after:

Code	Title	Credits
------	-------	---------

Taken as part of BSN

NURS 4119	Patient Safety and Health Care Quality
NURS 4121	Nursing Advancement Portfolio
NURS 4417	Community and Public Health Nursing
NURS 6207	Evidence-Based Practice for Health Care Researchers *

or NURS 4207 Principles of Nursing Research and Evidence-Based Practice

15 Dual Credits (If including NURS 6207)

NURS 6202	Concepts in Population Health
NURS 6203	Nursing Leadership
NURS 6205	Health Policy, Quality, and Political Process
NURS 6233	Genetics for Health Care Providers

Taken as part of MSN (19 credits dual counted with Shenandoah University)

NURS 6208	Biostatistics for Health Care Research
NURS 6220	Advanced Physiology and Pathophysiology
NURS 6222	Advanced Health Assessment and Diagnostic Reasoning
NURS 6234	Advanced Pharmacology for Nursing

Required for Nurse-Midwifery Certificate (Courses are taken at Shenandoah University) **

NM 610 - Primary Care of Women

NM 620 - Comprehensive Antepartal Care

NM 630 - Midwifery Practicum

NM 640 - Comprehensive Perinatal Care

NM 651 - Integrated Midwifery Internship

NM 652 - Evidence Based Practice Project

NM 660 - Advanced Nurse-Midwifery Role Development

*If the student chooses to take NURS 4207 during the BSN, he/she should take NURS 6207 during the MSN portion of the program. **For more information on Shenandoah University courses, visit the program website (<https://nursing.gwu.edu/msn-nurse-midwifery/>).

DOCTORAL PROGRAMS

Doctoral programs

- Doctor of Nursing Practice in the field of executive leadership (p. 1096)
- Doctor of Nursing Practice in the field of health care quality (p. 1096) (not accepting applications)
- Doctor of Nursing Practice in the field of health policy (p. 1096)
- Doctor of Nursing Practice in the field of nursing practice (p. 1097)
- Doctor of Philosophy in the field of nursing (p. 1097)

Combined programs

- Dual Master of Science in Nursing in the field of adult-gerontology acute care nurse practitioner and Doctor of Nursing Practice (p. 1092)
- Dual Master of Science in Nursing in the field of adult-gerontology primary care nurse practitioner and Doctor of Nursing Practice (p. 1092)
- Dual Master of Science in Nursing in the field of family nurse practitioner and Doctor of Nursing Practice (p. 1092)

DOCTOR OF NURSING PRACTICE IN THE FIELD OF EXECUTIVE LEADERSHIP

An alternative to research-focused doctoral programs, the doctor of nursing practice (DNP) advances professional nursing roles in clinical practice and nursing leadership and management. It is designed to develop leaders in health care at the local and national levels. Graduates can incorporate health policy, knowledge of information technology, evidence-based practice, business principles, collaboration, health systems, and health policy into practice. A clinical research project immerses students in a practice environment that lays the foundation for future scholarship and success in the nursing field. Students may enter either at the post-bachelor's or post-master's level.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 43 credits

All DNP students are expected to complete a minimum of 1,000 post-baccalaureate practice hours as part of their academic program. Most advanced practice RN students will already have completed 500 hours in their master of science in nursing (MSN) program and the remaining 500 hours are included in the curriculum requirements for the DNP.

Code	Title	Credits
Required		
NURS 6181	Creativity and Innovation in Health Care	
NURS 6202	Concepts in Population Health	
NURS 8401	Organizational Concepts in Nursing

NURS 8417	Health Policy and Analysis
NURS 8418	Health Care Economics, Finance, and Reimbursement
NURS 8420	The Health Policy Process
NURS 8421	The Legislative and Judicial Processes and Health Policy
NURS 8422	Health Policy Practicum
NURS 8423	The Regulatory Process and Health Policy
NURS 8490	DNP Project Planning
NURS 8491	DNP Project Implementation
NURS 8492	DNP Project Evaluation and Dissemination

DOCTOR OF NURSING PRACTICE IN THE FIELD OF NURSING PRACTICE

The doctor of nursing in nursing practice (DNP) in the field of nursing practice is designed for nursing professionals interested in improving patient care, affecting health policy, and being nursing leaders. The program emphasizes key nursing competencies and innovation, with options for focusing in areas including clinical practice, policy, and leadership.

Visit the program website (<https://nursing.gwu.edu/nursing-practice-dnp/>) for additional information

REQUIREMENTS

The following requirements must be fulfilled: 43 credits, including 37 credits in required courses and 6 credits in elective courses.

All DNP students are expected to complete a minimum of 1,000 post-baccalaureate practice hours as part of their academic program. Most advanced practice RN students will already have completed 500 hours in their master of science in nursing (MSN) program and the remaining 500 hours are included in the curriculum requirements for the DNP.

Code	Title	Credits
Required

NURS 8418	Health Care Economics, Finance, and Reimbursement	
NURS 8490	DNP Project Planning	
NURS 8491	DNP Project Implementation	
NURS 8492	DNP Project Evaluation and Dissemination	

Electives

6 credits in elective courses selected with the advisor's approval.

DOCTOR OF PHILOSOPHY IN THE FIELD OF NURSING

To meet the demands of a growing health workforce, the nursing profession needs to increase the supply of doctorally prepared faculty and researchers trained to educate the next generation. The national shortage of faculty is reaching critical proportions, resulting in a significant impact on educational programs and their capacity to educate future generations of nursing students.

GW Nursing offers a low-residency PhD in nursing with opportunities to collaborate with faculty on subjects such as nursing education, symptom management, health equity, health services and more. Students will be prepared as nurse scientists and faculty with an emphasis on research. A dissertation and comprehensive exam is required.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

Code	Title	Credits
Core		
NURS 8440	Philosophy of Science and Theories	

NURS 8441	Statistics for Health Care Research I
NURS 8442	Statistics for Health Care Research II
NURS 8443	Research Program Development Seminar I
NURS 8445	Experimental and Quasi-Experimental Research Designs
NURS 8446	Qualitative Research Design
or THS 8123	Qualitative Methods in Translational Health Sciences
NURS 8447	Measurement for Health Care Research

NURS 8449	Non-Experimental Research Design
NURS 8450	Research Rotation
NURS 8451	Research Practicum
NURS 8452	Team Science and Collaboration
or THS 8103	Principles of Collaboration and Team Science
NURS 8453	Leadership and Health Policy
NURS 8454	Proposal Development Seminar
NURS 8455	Dissertation

Electives

Students take a minimum of 6 elective credits in elective course designed to inform their dissertation research. Elective options are available through the DNP program or another GW school if such courses align with the student's research interests. Those options are also listed below.

NURS 6291	Advanced Topics
NURS 8404	Health Services Research and Policy for Nurses
NURS 8405	Health Care Quality Improvement
NURS 8407	Grant Writing
PPPA 8022	Econometrics for Policy Research II
PPPA 8164	Seminar on Program Evaluation
PUBH 8404	Advanced Topics: Health Systems and Health Policy Research
PUBH 8405	Advanced Topics: Health Economics Research
PUBH 8416	Study Design & Evaluation Methods

PUBH 8419	Measurement in Public Health and Health Services
THS 8109	Implementation Science and Innovation Leadership
THS 8212	Teaching Strategies in the Health Professions
THS 8127	Systematic Reviews of Health Care Innovations

CERTIFICATE PROGRAMS

Certificate programs

Post-Master’s Certificates

- Adult-Gerontology Acute Care Nurse Practitioner (p. 1099)
- Adult-Gerontology Primary Care Nurse Practitioner (p. 1100)
- Family Nurse Practitioner (p. 1100)
- Psychiatric Mental Health Nurse Practitioner (p. 1100)

Graduate Certificates

- Health Policy and Media Engagement (p. 1099)
- Nursing Education (p. 1099)

GRADUATE CERTIFICATE IN HEALTH POLICY AND MEDIA ENGAGEMENT

The graduate certificate in health policy and media engagement is available online for health-related professionals from various disciplines, including nursing, public health, medicine, law, business and public administration. Students expand knowledge of media, legislative, executive, judicial and financial reimbursement processes to then analyze issues, propose policy and regulatory solutions, and advocate for policies and their relevant stakeholders.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 15 credits in required courses.

Code	Title	Credits
Required		
NURS 8417	Health Policy and Analysis	
NURS 8418	Health Care Economics, Finance, and Reimbursement	
NURS 8420	The Health Policy Process	
NURS 8421	The Legislative and Judicial Processes and Health Policy	
NURS 8423	The Regulatory Process and Health Policy	

GRADUATE CERTIFICATE IN NURSING EDUCATION

This online, three-semester certificate program prepares students to be competent educators by teaching them to design, develop, deliver and evaluate educational materials and curricula to support the academic preparation or professional development of nurses and other health professionals.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
NURS 6282	Teaching and Learning in Health Care I: Foundations of Instructional Design	
NURS 6283	Teaching and Learning in Health Care II: Learner Engagement	
NURS 6284	Teaching and Learning in Health Care III: Program and Curriculum Development	
NURS 6292	Teaching with Technology in the Health Professions	

POST-MASTER'S CERTIFICATE IN ADULT-GERONTOLOGY ACUTE CARE NURSE PRACTITIONER

The post-master's certificate in adult-gerontology acute care nurse practitioner program prepares registered nurses to be advanced practice leaders and interprofessional team members to provide care for acute and critically ill patients and their families in settings such as urgent care centers, critical care units, and inpatient medical-surgical or specialty units. Offered on a part-time basis, the certificate can be completed in three semesters.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 20 credits in required courses. Students complete 650 clinical hours in clinical settings in DC, MD, and/or VA.

Code	Title	Credits
Required		
NURS 6235	Adult-Gerontology Acute Care Nurse Practitioner I: Introduction to Practice	
NURS 6236	Adult-Gerontology Acute Care Nurse Practitioner II: Complex and Acute Illness	
NURS 6237	Adult-Gerontology Acute Care Nurse Practitioner III: Complex and Chronic Disease Mgt Adolesc/Elderly	

POST-MASTER'S CERTIFICATE IN ADULT-GERONTOLOGY PRIMARY CARE NURSE PRACTITIONER

The post-master's certificate in adult-gerontology primary care nurse practitioner is designed for advanced practice nurses who wish to expand their scope of practice. Coursework includes didactic and clinical experiences that focus on the primary care needs of patients, families, and communities from adolescence through adulthood.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
Required		
NURS 6220	Advanced Physiology and Pathophysiology	
NURS 6222	Advanced Health Assessment and Diagnostic Reasoning	
NURS 6224	Adult/Gerontology Primary Care Nurse Practitioner I: Practice Introduction	
NURS 6225	Adult/Gerontology Primary Care Nurse Practitioner II: Adolescent and Adult	
NURS 6229	Adult/Gerontology Primary Care Nurse Practitioner III: Adult, Older/Frail	
NURS 6234	Advanced Pharmacology for Nursing	

POST-MASTER'S CERTIFICATE IN FAMILY NURSE PRACTITIONER

The post-master's certificate in family nurse practitioner is for advanced nurse practitioners interested in expanding their

practice to work with communities, families, and individuals across the lifespan. The credential is broadly applicable to a variety of employment options.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 17 credits in required courses and 500 clinical hours.

Code	Title	Credits
Required		
NURS 6227	Family Nurse Practitioner Clinical Practicum	
NURS 6250	Family Nurse Practitioner I for Nurse Practitioners: Adult Primary Care Diagnosis Management	
NURS 6251	Family Nurse Practitioner II for Nurse Practitioners: Lifespan Primary Care Diagnosis Management	
NURS 6252	Family Nurse Practitioner III for Nurse Practitioners: Lifespan Primary Care Diagnosis Management	

POST-MASTER'S CERTIFICATE IN PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONER

The post-master's certificate in psychiatric mental health nurse practitioner is a part-time, online program designed to give advanced practice registered nurses the opportunity to expand their scope of practice to include the care of individuals, families, and groups with psychiatric and mental health needs.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

Up to 10 credits in advanced standing may be granted for graduate-level coursework taken within five years of application to the program. Eligible courses must demonstrate content addressing patients across the lifespan and must have been earned with a minimum grade of *B*.

The following requirements must be fulfilled: 22 credits in required courses and 600 clinical hours.

Code	Title	Credits
Required		
NURS 6242	Psychopharmacology	
NURS 6244	Psychiatric/Mental Health Nursing with Families and Groups Across the Lifespan	
NURS 6243	Addiction and Change	
NURS 6245	Psychiatric/Mental Health Diagnostic Assessment Across the Lifespan	
NURS 6246	Psychiatric/Mental Health Advanced Practice Nursing with Individuals Across the Lifespan	
NURS 6247	Population-Based Psychiatric/Mental Health Advanced Practice Nursing Across the Lifespan	
NURS 6248	Integrated Application of Psychiatric/Mental Health Advanced Practice Nursing	
Clinical hours		
Students must complete 600 clinical hours.		

COLLEGE OF PROFESSIONAL STUDIES

Dean C. Deering (Interim)

Associate Deans A. Ashkar, J. Prostko, K. Cyrus
Homayounpour

Assistant Dean M. Feuer

The College of Professional Studies (CPS) offers an expanding range of degree programs leading to associate's, bachelor's, and master's degrees in professional studies, along with a variety of certificate programs.

CPS's innovative programs are typically co-developed through collaboration among University content specialists and outside partners—government agencies, professional associations, consulting organizations, and business and industry leaders.

Programs draw from multiple academic disciplines and are delivered in flexible formats: face-to-face on campus, through distance learning, or a blend of both.

By combining University faculty experts with accomplished practitioners, CPS is a catalyst for academic innovation, constructing credentials for the workforce that uphold the University's rigorous standards of academic excellence and respond to the needs of a wide variety of professionals. Professional studies degree and certificate programs are also offered to organizational clients under contract and can be presented in flexible formats, including series of short classroom-based modules and distance learning.

New programs not included in this bulletin may be found at the College of Professional Studies website (<https://cps.gwu.edu>).

CPS manages facilities and services for off-campus programs offered by other schools of the University. The staff of instruction includes members of the full-time faculty of the University and academically qualified adjunct faculty from the professional community. All University off-campus offerings in Maryland are approved by the Maryland State Board for Higher Education; those in Virginia are certified by the State Council of Higher Education for Virginia.

REGULATIONS

- Enrollment Status (p. 1102)
- Time Limits (p. 1102)
- Scholarship Requirements (p. 1102)
- Grade of F (p. 1103)
- Incompletes (p. 1103)
- Transfer Credits (p. 1103)
- Provisional Admission (p. 1103)

- Readmission (p. 1103)
- Withdrawing From a Course (p. 1104)
- Academic Integrity (p. 1104)

Enrollment Status

Once a student begins a degree or certificate program they are expected to be enrolled continuously and actively engaged in fulfilling the requirements for the degree each semester of the academic year until the degree is conferred or certificate completed. For the fall and spring semesters, students must register for one or more credits to maintain enrollment status. A student who must interrupt active pursuit of the degree or certificate may petition the Dean, through the Program Director, for a leave of absence for a specified period of time, generally limited to one calendar year. If the petition is approved, the student must register for Leave of Absence in each fall and spring semester, following regular registration procedures. Students not wishing to enroll in courses for a summer session must notify the Program Director and Office for Student Engagement of such intent prior to the beginning of that summer session. Students who discontinue their studies without being granted a leave of absence and students granted leaves who do not return to active study at the close of the period of approved absence must apply for readmission and are subject to the regulations and requirements then in force.

Time Limits

A full-time student is allowed a maximum of three calendar years from the date of the first registration as a degree student (excluding time spent enrolled exclusively in English for Academic Purposes courses) to complete all degree requirements; a part-time student is allowed a maximum of five calendar years. The time limit does not include any period of registration as a non-degree student before admission to degree candidacy or any period spent on approved leave of absence. Students who do not complete degree requirements within the time allowed will have their degree candidate status terminated; such students may be readmitted to degree candidate status under conditions specified by the Program Director and approved by the Dean.

Scholarship Requirements

Undergraduate students must maintain a minimum cumulative grade-point average of 2.0. and graduate students must maintain a minimum grade-point average of 3.0. If a student's GPA falls below the required minimum, they are placed on academic probation and allowed one semester in which to raise the GPA to the required minimum; any such student who does not raise their GPA to the required minimum in one semester will be dismissed from the program. If it is mathematically impossible for the student's GPA to reach the required minimum in one semester, they are dismissed from the program without a probationary period.

See Grades under University Regulations (p. 27) for undergraduate and graduate grading systems.

Grade of F

A student who receives a grade of *F* is subject to dismissal from the program. If the student wishes to remain enrolled, they must present cause for consideration by the Program Director and to the Dean as to why continued study should be permitted. A student who receives a grade of *F*, if permitted to remain in the program, must repeat the course in which the failing grade was received and achieve a passing grade as well as maintain the minimum required GPA. Once a grade of *F* has been received it remains a part of the student's permanent record and is calculated into the grade-point average. Students may be granted permission to repeat a failed course only one time. Failure to receive permission to remain in the program and retake the failed course or to achieve a passing grade after having been permitted to repeat a failed course will result in dismissal from the program.

Incompletes

The symbol *I* (Incomplete) indicates that a satisfactory explanation has been given to the instructor for the student's inability to complete the required coursework during the semester in which the course was taken. At the discretion of the instructor, the symbol *I* may be recorded if a student, for reasons beyond the student's control, is unable to complete the work of the course, and if the instructor is informed of, and approves, such reasons before the date when grades must be reported. This symbol may be used only if the student's prior performance and class attendance in the course have been satisfactory. The instructor and student must sign an Incomplete Agreement, available through the Office of the Dean, which sets forth the requirements and due dates for successful completion of the course. The coursework must be completed within the designated time period agreed upon by the instructor and student in the Incomplete Agreement, but no more than one calendar year from the end of the semester in which the course was taken. All students who receive an Incomplete must remain continuously during the semester(s) in which the coursework is being completed. If not registered in other courses during this period, the student must register for Continuous Enrollment.

When work for the course is completed, the instructor completes a grade change form and submits it to the Office of the Registrar. The final grade replaces the symbol of *I*. If work for the course is not completed within the designated time period, the grade is converted to a grade of *F*, Failure, 0 quality points, and the grade-point average is recalculated and academic standing reassessed.

Transfer Credits

Transfer credit that is accepted and applied to a student's GW academic record counts toward the number of credits completed only. The grades from these courses are not used in calculating a student's GW grade-point average. Once

enrolled in the College of Professional Studies, students are not permitted to transfer coursework taken outside the University, except under extraordinary circumstances, and permission must be obtained in advance from the Dean. The College of Professional Studies reserves the right to determine course equivalency and degree applicability.

Undergraduate students

Subject to individual program requirements, transfer credit may be awarded for coursework completed at other accredited institutions provided minimum grade requirements have been met and the coursework is appropriate to the degree. No more than 60 credits from a regionally accredited institution may be accepted for transfer. Coursework completed at another institution must have received a grade of *C* or above to be accepted for transfer credit.

Graduate students

A maximum of one-quarter of the credits required for the degree may be approved for transfer to a graduate program in the College of Professional Studies from credit earned while enrolled as a non-degree student at GW or from another degree-granting school of this University or another accredited college or university. For transfer credit to be approved, all of the following conditions must be met: the coursework must be from an accredited institution and must have been taken within the two years prior to matriculation; it must be approved as part of the student's program of studies; it must not have been applied to the completion of requirements for another degree; it must be post-baccalaureate graduate-level coursework; and the student must have received a minimum grade of *B* in each course for which transfer credit is requested. Requests for transfer credit must be submitted in writing and approved by the Program Director and the Dean during the student's first year in the program. An official transcript of the coursework must be on file before the request can be considered.

Provisional Admission

Applicants with credentials that do not meet the minimum standards for the program of study, but who nonetheless show promise of successful work, are occasionally granted provisional admission by the Program Director/admissions committee. During the period of provisional status, students must meet the requirements set forth in their admission letter. Students who do not meet these requirements are dismissed from the program.

Readmission

The College of Professional Studies does not review any application for readmission to a program by a student who was dismissed from the same or any other program at the College or course of study at the University until at least one year after the student was dismissed. Students unable to achieve the required minimum GPA in one semester are not considered for readmission to the program.

Withdrawing From a Course

Undergraduate Students

Undergraduate students in the College of Professional Studies may withdraw from any or all undergraduate courses in the College through the last day of scheduled classes in a specific course. In order to withdraw from a course the student must submit a Registration Transaction Form (https://registrar.gwu.edu/sites/registrar.gwu.edu/files/downloads/reg_transaction_form.pdf) (RTF) to the Office for Student Engagement, but no supporting documentation is required. The Office for Student Engagement will process the RTF unless dropping the course would result in the student taking fewer credits that they are required to take. A course from which a student successfully withdraws will be assigned a notation of *W* (Authorized Withdrawal). Failure to withdraw by the stated deadlines can result in an extended financial obligation and the recording of a grade of *F* (Failure) or a notation of *Z* (Unauthorized Withdrawal).

Graduate Students

After the end of the eighth week of classes in a fifteen-week semester, or after the end of the third week of classes in a course scheduled over eight or fewer weeks, graduate students who wish to withdraw from a course must obtain the written permission of the Program Director and the Dean by submitting a petition for academic exception. A course from which a student successfully withdraws will be assigned a notation of *W* (Authorized Withdrawal). Failure to withdraw by the stated deadlines can result in an extended financial obligation and the recording of a grade of *F* (Failure) or a notation of *Z* (Unauthorized Withdrawal).

See Adding, Dropping, and Withdrawing from Courses under [University Regulations](http://bulletin.gwu.edu/university-regulations/) (<http://bulletin.gwu.edu/university-regulations/>) for additional information governing all CPS students.

Academic Integrity

The University community, in order to fulfill its purposes, must establish and maintain guidelines of academic behavior. All members of the community are expected to exhibit honesty and competence in their academic work. Incoming students have a special responsibility to acquaint themselves with, and make use of, all proper procedures for doing research, writing papers, and taking examinations. Members of the community are presumed to be familiar with the proper academic procedures and held responsible for applying them. Deliberate failure to act in accordance with such procedures will be considered academic dishonesty. Acts of academic dishonesty are a legal, moral, and intellectual offense against the community and will be prosecuted through the proper University channels, possibly resulting in dismissal from the program together with other University sanctions. The University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) can be found at the Office of Academic Integrity (<http://studentconduct.gwu.edu/>).

UNDERGRADUATE

Bachelor's completion programs

- Bachelor of Professional Studies with a major in cybersecurity (p. 1106)
- Bachelor of Professional Studies with a major in integrated information science and technology (p. 1107)
- Bachelor of Professional Studies with a major in police and security studies (p. 1107)

Combined programs

- Dual Bachelor of Arts with a major in political communication and Master of Professional Studies in the field of political management (p. 1109)
- Dual Bachelor of Arts with a major in political science and Master of Professional Studies in the field of legislative affairs (p. 383)
- Dual Bachelor of Arts with a major in political science and Master of Professional Studies in the field of political management (p. 383)
- Dual Bachelor of Professional Studies with a major in integrated information science and technology and Master of Science in the field of information systems technology (p. 515)

GRADUATE

Master's programs

Admission Requirements

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Applicants should have a strong academic background, normally with a grade-point average of *B* or above (3.0 GPA on a 4.0 scale).

- Master of Professional Studies in the field of cybersecurity strategy and information management (p. 1110)
- Master of Professional Studies in the field of homeland security (p. 1113)
- Master of Professional Studies in the field of law firm management (p. 1115)
- Master of Professional Studies in the field of paralegal studies (p. 1117)
- Master of Professional Studies in the field of publishing (p. 1125)
- Master of Professional Studies in the field of sustainable urban planning (p. 1129)

The Graduate School of Political Management, through the College of Professional Studies, offers the following:

- Master of Professional Studies in the field of legislative affairs (p. 1116)

- Master of Professional Studies in the field of political management (p. 1119)
- Master of Professional Studies in the field of political communication and governance ((p. 1119)*Offered in Spanish only*)
- Master of Professional Studies in the field of strategic public relations (p. 1127)

CERTIFICATES

Graduate certificates

The College of Professional Studies offers the following graduate certificates. In addition to those listed, graduate certificates in political management and strategic governance and in strategic communications campaigns are offered in Spanish to closed cohorts of students in Latin America and in Spain.

- California paralegal studies (p. 1133)
- Community advocacy (p. 1133)
- Digital communications (p. 1133)
- Digital politics (p. 1134)
- Global public relations (p. 1134)
- Health care corporate compliance (p. 1135)
- PACs and political management (p. 1135)
- Paralegal studies (p. 1135)
- Sustainable urban planning (p. 1136)

Additional information is available on the College of Professional Studies website (<https://cps.gwu.edu>).

FACULTY

Program Directors A.N. Ashkar, T. Belt, S. Billet, J. Delinski, S. Hooshangi, R. Izurieta, E. Lammert, C. Leonard, T.E. Marsh, L. Matos, L. Parnell, J. Thorpe, C.P. Uthoff, J. Warren, S. White, S. Whitehead

Professors C.J. Deering, T. Belt

Associate Professors A.N. Ashkar, S.E. Billet, L.M. Brown, M. Cornfield, M. J. Dallek, S. Hooshangi, E. Lammert, T.E. Marsh, L.J. Parnell, J. Warren, S. White, S.L. Wiley

Visiting Associate Professor S. Whitehead

Assistant Professors J. Delinski, N. Dinello, N.K. Houghtby-Haddon, C. Leonard, E. Rule, C.P. Uthoff

Associate Research Professors R. Izurieta, L.R. Matos

Assistant Research Professors W. Helgemo

Instructor J.L. Robinson

- Dual Bachelor of Professional Studies with a major in integrated information science and technology and Master of Science in the field of information systems technology (p. 515)

BACHELOR OF PROFESSIONAL STUDIES WITH A MAJOR IN CYBERSECURITY

The bachelor of professional studies with a major in cybersecurity program is intended for students with associate's or non-technical bachelor's degrees who are looking for entry-level positions and advancement in the field of cybersecurity.

The cybersecurity program provides students with skills and knowledge necessary to be successful in the IT security industry. The program's core curriculum includes courses related primarily to specialty areas identified by the National Institute of Standards and Technology (NIST) and the National Initiative for Cybersecurity Education (NICE).

Upon completion of the program, students are able to understand and implement cybersecurity requirements to protect computers, applications, and networks from unauthorized and malicious users or software. In addition, the curriculum covers cryptography, cyber forensics, and network security. The program will also address supporting concepts of information system security which are integral parts of cybersecurity.

Visit the program website (<https://cps.gwu.edu/cybersecurity-bachelors/>) for more information.

REQUIREMENTS

Students completing this program will have satisfied GW's university-wide general education requirement, which includes 22 credits in the following areas:

1. Mathematics or statistics (3 credits)
2. Natural or physical science with lab (4 credits)
3. Humanities (3 credits)
4. Social and behavioral sciences (6 credits)
5. Written communication or composition (6 credits)

In addition, students take a minimum of 60 credits at GW, comprising 15 required courses.

Code	Title	Credits
Required		
PSCS 2301	Cyber Investigation	
PSCS 2302	Digital Forensics	
PSCS 2303	Compliance and Risk Management	
PSCS 2304	Incident Response	
PSCS 3100	Principles of Cybersecurity	
PSCS 3103	Ethics, Law, and Policy	
PSCS 3107	IP Security and VPN Technology	
PSCS 3109	Network Security	
PSCS 3111	Information Technology Security System Audits	
PSCS 3113	Topics in IT Security Defense Countermeasures	
PSCS 3117	Project Management in Information Technology	
PSCS 4102	Intrusion Detection and Vulnerability Management	
PSCS 4103	Securing Operating Systems	
PSCS 4110	Data Communication and Networking Technologies	
PSCS 4202	Cyber Attack Tools and Techniques	

FACULTY

Director: S. White

BACHELOR OF PROFESSIONAL STUDIES WITH A MAJOR IN INTEGRATED INFORMATION, SCIENCE, AND TECHNOLOGY

The bachelor of professional studies in integrated information, science, and technology (IIST) is an innovative and interdisciplinary program designed for community college graduates and working professionals who are seeking to complete their bachelor's degree in a technology-related field. The program can be completed within two academic years (four semesters and one summer session). The IIST program provides graduates with a solid foundation in problem solving, analytical thinking, written communication, and technical knowledge in information technology and computing. The knowledge acquired in the program is relevant to a number of fields, such as information technology, technology management and consulting, network administration and network security, health IT, and data analytics.

See the program website (<http://cps.gwu.edu/bachelors-completion/>) for additional information.

REQUIREMENTS

The BPS in integrated information, science, and technology is a degree completion program that requires successful completion of 120 credits, 60 of which must be completed at GW. Up to 60 credits can be transferred from coursework taken at other regionally accredited institutions of higher education. The program is designed for individuals who currently hold an associate's degree or have earned at least 60 credits towards their undergraduate degree.

Students completing this program will have satisfied GW's university-wide general education requirement, which includes 22 credits in the following areas:

- Mathematics or statistics (3 credits)
- Natural or physical science with lab (4 credits)
- Humanities (3 credits)
- Social and behavioral sciences (6 credits)
- Written communication or composition (6 credits)

Code	Title	Credits
Foundation requirements		
PSIS 2101	Writing and Communication in the IT Field I	
PSIS 2102	Writing and Communication in the IT Field II	
PSIS 2103	Statistical Sciences and Data Analysis I	
PSIS 2104	Statistical Sciences and Data Analysis II	

PSIS 2105	Programming and Computing Foundations I
PSIS 2106	Programming and Computing Foundations II
PSIS 3122	Ethics in Science and Technology
PSIS 4142	Relational Databases and Their Design
PSIS 4191	Capstone Project and Senior Thesis I
PSIS 4192	Capstone Project and Senior Thesis II
Core requirements *	
Six courses selected from the following:	
PSIS 4137	Alternative Energy Sources
PSIS 4138	Introduction to Health Information Technology
PSIS 4141	Computer and Telecommunication Networks
PSIS 4144	Information and Network Security
PSIS 4145	Software Systems Development Processes
PSIS 4152	Entrepreneurship and Technology Venture Creation
PSIS 4161	Data Visualization
PSIS 4195	Undergraduate Research
PSIS 4199	Special Topics

*Not all core courses are offered each year. Please see department for course availability.

FACULTY

Director S. Hooshangi

BACHELOR OF PROFESSIONAL STUDIES WITH A MAJOR IN POLICE AND SECURITY STUDIES

The bachelor of professional studies with a major in police and security studies degree program helps students acquire the knowledge and skills needed to work more effectively as police professionals. Developed by faculty in consultation with metropolitan area law enforcement and police specialists, the core coursework is designed to develop three central areas of competency: intelligence and criminal analysis; forensic science; and leadership and management. Elective courses

are offered in a variety of disciplines, including sociology, leadership, public health, and international affairs.

Visit the program website (<http://cps.gwu.edu/police-security-studies/>) for admissions and additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 120 credits, including 30 credits in general education courses, 60 credits in required courses, and 30 credits in elective courses.

Code	Title	Credits
General Education*		
6 credits of English composition or UW 1020 University Writing plus 2 credits of independent research with a focus on the application of the principles learned in UW 1020		
6 credits of quantitative and logical reasoning		
6 credits of social and behavioral sciences		
6 credits of natural sciences		
6 credits of arts and humanities		
Required		
Intelligence and Criminal Analysis		
CPS 2103	Particular Forms of Crime (Intelligence and Criminal Analysis)	
CPS 2107	Models of Policing	
CPS 2108	Criminal Intelligence	
CPS 2109	Criminal Analysis (Forensic Science)	
CPS 2110	Predictive Policing	
Forensic Science		
CPS 2130	Introduction to Forensic Science	
CPS 2131	Crime Scene Investigation	
CPS 2132	Computer Crime Investigation	
CPS 2133	Incident Management	
CPS 2171	The Criminal Mind	
Leadership and Management		
CPS 2102	Resource Management	
CPS 2104	Leading Teams	
CPS 2106	Strategic Planning	

CPS 2134	Ethical Dilemmas in Policing
CPS 4192	Capstone Simulation

*General education and elective courses may be completed at any regionally accredited institution. A minimum grade of C is required for transfer credit to be approved. General education and elective coursework may be completed before, during, or within five years of completing the other requirements for the bachelor's degree.

FACULTY

Director J. Delinski

For faculty information visit the program website (<https://cps.gwu.edu/police-security-studies-bachelors-degree-completion-program/>).

DUAL BACHELOR OF ARTS IN POLITICAL SCIENCE AND MASTER OF PROFESSIONAL STUDIES IN LEGISLATIVE AFFAIRS

The Department of Political Science and the Graduate School of Political Management work in cooperation to offer a dual bachelor of arts with a major in political science (p. 375) and master of professional studies in the field of legislative affairs (p. 1116) degree program. The program allows students to take 9 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year . Visit the program website (<https://gspm.gwu.edu/dual-degree-programs/>) for additional information.

DUAL BACHELOR OF ARTS IN POLITICAL SCIENCE AND MASTER OF PROFESSIONAL STUDIES IN POLITICAL MANAGEMENT

The Department of Political Science and the Graduate School of Political Management work in cooperation to offer a dual bachelor of arts with a major in political science (p. 375) and master of professional studies in political management (p. 1119) degree program. The program allows students to take 9 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early

in their junior year. Visit the program website (<https://politicalscience.columbian.gwu.edu/dual-degree-political-science-political-management/>) for additional information.

DUAL BACHELOR OF ARTS WITH A MAJOR IN POLITICAL COMMUNICATION AND MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF POLITICAL MANAGEMENT

OVERVIEW

The School of Media and Public Affairs (<https://smpa.gwu.edu/>) (SMPA) and the Graduate School of Political Management (<https://gspm.gwu.edu/>) (GSPM) offer a combined BA/MPS degree program for undergraduate students who are interested in careers in the field of political management. The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby allowing both degrees to be earned more quickly and at a lower cost. Students pursuing the combined program must meet all requirements of their respective SMPA program. To meet the requirements of the combined program, students take 6 credits in graduate-level courses as part of their BA program of study.

Consult the School of Media and Public Affairs (<https://smpa.gwu.edu/>) for admissions requirements and more details.

DUAL BACHELOR OF PROFESSIONAL STUDIES WITH A MAJOR IN INTEGRATED INFORMATION, SCIENCE, AND TECHNOLOGY AND A MASTER OF SCIENCE IN THE FIELD OF INFORMATION SYSTEMS TECHNOLOGY

The College of Professional Studies and GW School of Business offer a dual bachelor of professional studies in integrated information, science, and technology (p. 1107) and master of science in information systems technology (p. 524) degree program. The program allows students to take 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the graduate adviser early in their junior year.

GRADUATE PROGRAMS

Master's programs

Admission Requirements

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Applicants should have a strong academic background, normally with a grade-point average of *B* or above (3.0 GPA on a 4.0 scale).

- Master of Professional Studies in the field of cybersecurity strategy and information management (p. 1110)
- Master of Professional Studies in the field of homeland security (p. 1113)
- Master of Professional Studies in the field of law firm management (p. 1115)
- Master of Professional Studies in the field of paralegal studies (p. 1117)
- Master of Professional Studies in the field of publishing (p. 1125)
- Master of Professional Studies in the field of sustainable urban planning (p. 1129)

The Graduate School of Political Management, through the College of Professional Studies, offers the following:

- Master of Professional Studies in the field of legislative affairs (p. 1116)
- Master of Professional Studies in the field of political management (p. 1119)
- Master of Professional Studies in the field of political communication and governance (p. 1119) *Offered in Spanish only*
- Master of Professional Studies in the field of strategic public relations (p. 1127)

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF CYBERSECURITY STRATEGY AND INFORMATION MANAGEMENT

The MPS in the field of cybersecurity strategy and information management degree program is for working professionals from the military, homeland security, and private sectors who wish to gain the expertise to address current and emerging challenges in information technology security. Students learn strategies and practices that empower them to manage critical information in the fight against hackers, terrorists, and cyber criminals. The program also enhances the skills of current homeland security and criminal justice professionals, preparing leaders to secure the country's digital infrastructure.

Visit the program website (<https://cps.gwu.edu/masters-cybersecurity-strategy-information-management/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits in required courses.

Code	Title	Credits
Required:		
PSCS 6244	Information Systems Protection	
PSCS 6245	Cybersecurity Law and Policy	
PSCS 6246	Cyber Intelligence and Strategic Analysis	
PSCS 6247	Cyber Defense Strategy	
PSCS 6248	Introduction to Cyber Conflict	
PSCS 6255	Information Management for Justice and Public Safety Professionals	
PSCS 6256	Application of Technology to Data Analytics	
PSCS 6257	Enterprise Architecture and Standards	
PSCS 6258	Information Sharing and Safeguarding	
PSCS 6259	Strategic Information Technology Investment and Performance Management

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work

- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSCS 2101. Writing and Communication in a Technical Field. 4 Credits.

The fundamentals of reading and writing with a clear sense of purpose and audience. How academic writing in virtually any subject area and on virtually any topic represents a formal engagement with larger scholarly debates. The writing process, including prewriting, drafting, and revision as well as basic research methods. Making clear oral presentations. (Same as PSIS 2101).

PSCS 2102. Fundamentals of Information Technology and Computing. 4 Credits.

Basic concepts of programming including elementary data types (numeric types, strings, lists, and files), control flow, functions, objects, loops, and methods are covered. Designing, maintaining, and implementing programs in a modern programming language. (Same as PSIS 2105).

PSCS 2301. Cyber Investigation. 4 Credits.

The investigative framework and tools needed for the investigation of cyber crime. Crimes that involve computer technology; procedural and tactical issues associated with the prosecution of cyber crime.

PSCS 2302. Digital Forensics. 4 Credits.

An introduction to digital forensic science and the systematic process of acquiring, authenticating, and analyzing digital evidence. Forensic methods and laboratories; tools, techniques, and methods used to perform computer forensics and investigation; and emerging technologies. Theoretical and practical experience using forensic equipment and software.

PSCS 2303. Compliance and Risk Management. 4 Credits.

Data protection from a risk management perspective. Data retention; security and protection technologies; technology requirements for compliance, governance, and data security; the importance of e-discovery for civil litigation; the impact of third-party services in conjunction with data protection; and data processing facets, such as the role of tiering and server and storage virtualization.

PSCS 2304. Incident Response. 4 Credits.

Principles and techniques for detecting and responding to current and emerging computer security threats. Data breaches, advanced malware, and targeted attacks. Law and policy related to incident response.

PSCS 2305. Practicum: Incident Response Techniques. 2 Credits.

Students integrate and apply acquired knowledge and technical skills in computer laboratory settings with a focus on cyber investigation and incident response techniques.

PSCS 3100. Principles of Cybersecurity. 4 Credits.

Basic principles and concepts in information security and information assurance; technical, operational, and organizational issues of securing information systems.

PSCS 3103. Ethics, Law, and Policy. 4 Credits.

Overview of ethical, legal and policy issues related to the impact of modern technology on society; ethical theories and decision making, professional responsibility and codes of ethics, copyright and intellectual property, information accountability, freedom of information and privacy, the Internet and considerations associated with information sharing and social networking.

PSCS 3107. IP Security and VPN Technology. 4 Credits.

Risks associated with an organization's network being connected to the public Internet; defensive technologies, types of encryption, enterprise firewalls, intrusion detection/prevention, and access control technologies; active threat agents and exploitation techniques used to compromise the digital infrastructure.

PSCS 3109. Network Security. 4 Credits.

Security aspects of networks and network technology; intrusion detection, virtual private networks (VPN), and firewalls; types of security threats, security policy design and management; and security technologies, products, and solutions.

PSCS 3111. Information Technology Security System Audits. 4 Credits.

Theory, methodology, and procedures related to IT system audits; proper audit procedures for discovering system vulnerabilities; documenting findings according to the standards of compliance based auditing.

PSCS 3113. Topics in IT Security Defense Countermeasures. 4 Credits.

Theory, methodology, and practical experience relating to IT defense countermeasures; system vulnerabilities and how adversaries can exploit them. Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details.

PSCS 3117. Project Management in Information Technology. 4 Credits.

Concepts and basic functions of the project management body of knowledge, including scope, quality, time, cost, risk, procurement, human resource, and communication management and integration of these functions into a project management system; roles and responsibilities of various project staff.

PSCS 4102. Intrusion Detection and Vulnerability Management. 4 Credits.

The use of intrusion detection systems (IDS) as part of an organization's overall security mechanisms; implementation and testing of IDS security plans, security monitoring, intrusion detection, alarm management, analysis of events and trends, and vulnerability management.

PSCS 4103. Securing Operating Systems. 4 Credits.

The security techniques and technologies integrated into Microsoft operating systems, which are a frequent target of attacks; primary threats and protection mechanisms developed by Microsoft and others; tools used to defend against known risks and vulnerabilities; client and server operating systems, OS hardening, application security, and Active Directory.

PSCS 4104. Securing Network Devices. 4 Credits.

Key network components and devices that need to be secured in order to protect networks from attack; practical and theoretical perspectives on network protection technologies; weaknesses and vulnerabilities; mitigation strategies; viruses, worms and other threats.

PSCS 4105. Cyber Defense Techniques Practicum. 2 Credits.

Working with cybersecurity experts and other qualified computer laboratory personnel, students integrate, apply, and strengthen acquired knowledge and technical skills in laboratory settings.

PSCS 4110. Data Communication and Networking Technologies. 4 Credits.

Overview of the networking technologies deployed by modern enterprises. Hardware and software used to transfer information from source to destination, including switches, routers, firewalls, Ethernet, and the TCP/IP protocols suite. (Same as PSIS 4141).

PSCS 4190. Capstone Project. 4 Credits.

Students use the knowledge and skills acquired throughout the program to conduct significant, independent research or work on a real-life project relevant to their interest in the security field. (Same as PSIS 4190).

PSCS 420. Computer Network Attack and Exploitation. 4 Credits.**PSCS 4201. Cyber Threats and Exploitations Analysis. 4 Credits.**

This course will focus on identifying, managing and mitigating cyber threats that an organization could face at any given time. Current and emerging cyber threats will be discussed and examples from real cyber attacks will be analyzed. Students will use various threat modeling tools and cyber intelligence techniques to simulate real counter-threat designs.

PSCS 4202. Cyber Attack Tools and Techniques. 4 Credits.

Linux-based introduction to traditional and contemporary attack tools and technologies used by threat actors. Constructing an effective computer network defense.

PSCS 4203. Analysis of the Intelligence Cycle. 4 Credits.

The intelligence cycle and sources. Target modeling and organizational analysis; quantitative and predictive techniques. The role of intelligence collectors, consumers, and analysts in developing a conceptual model of the intelligence target.

PSCS 4204. Computer Network Attack and Exploitation. 4 Credits.

Cyber attacks orchestrated by computer networks to distract, deny, degrade, or destroy other computer networks or information within large computer systems. Developing standardized attack scenarios to be used against specific targets and providing operational planning to conduct network attacks.

PSCS 4205. Practicum: Cyber Attack Techniques. 2 Credits.

Students integrate and apply acquired knowledge and technical skills in computer laboratory settings. Various cyber attack tools and techniques, including penetration testing and ethical hacking.

PSCS 6244. Information Systems Protection. 3 Credits.

Major areas of information security, including risk management, cybercrime, cyber conflict, and the technologies involved in both cyber attacks and information systems protection; root causes of insecurity in information systems and the processes involved in creating, implementing, and maintaining an information security program. Restricted to students in the MPS in CSIM program or with the permission of the instructor.

PSCS 6245. Cybersecurity Law and Policy. 3 Credits.

Law and policy perspectives on the federal government's response to cyber threats; legal concepts relating to investigation and enforcement activities; application of traditional laws of armed conflict in cyberspace; and national security concerns. Restricted to students in the MPS in CSIM program or with the permission of the instructor.

PSCS 6246. Cyber Intelligence and Strategic Analysis. 3 Credits.

National and international cyber strategies, law, and policy as they relate to cyber intelligence efforts with a review of current cyber threats to national security; identification of strategic, operational, and tactical cyber intelligence efforts, the cyber threat landscape, and intelligence-led policing relative to cyber enforcement and investigation. Restricted to students in the MPS in CSIM program or with the permission of the instructor.

PSCS 6247. Cyber Defense Strategy. 3 Credits.

The fundamentals of cyber defense strategy; understanding the organization's threatscape and building a threat matrix to prioritize and monetize cyber security defense needs; creating a sound cyber defense strategy through efficient use of known security management practices and establishing a management program to implement the defense strategy. Restricted to students in the MPS in CSIM program or with the permission of the instructor. Prerequisite: None.

PSCS 6248. Introduction to Cyber Conflict. 3 Credits.

The emerging concept of cyber conflict, its history over the last 25 years, and its integration into government and military strategies; technical, tactical, and strategic use of information technology between state and non-state actors; cyber conflict as an evolving phenomenon. Restricted to students in the MPS in CSIM program or with the permission of the instructor.

PSCS 6255. Information Management for Justice and Public Safety Professionals. 3 Credits.

Application of information management techniques to justice and public safety fields; governance structure, emerging modes of communication within and outside organizations, and processes that enable managers to make timely decisions. Restricted to students in the MPS in CSIM program or with the permission of the instructor.

PSCS 6256. Application of Technology to Data Analytics. 3 Credits.

Strategic application of technology to data analysis; introduction to leading edge software, including predictive and spatial analytics; principles of data visualization and application of analytics and visualization to solving justice and public safety problems; data collection, analysis, and production of usable information output. Restricted to students in the MPS in cybersecurity strategy and information management program.

PSCS 6257. Enterprise Architecture and Standards. 3 Credits.

Current and emerging trends in enterprise architecture domains; technology environments, including software, hardware, networks, applications, data, communications, and other relevant architecture disciplines; service-oriented architecture and similar innovations; conventions, principles, and practices for creating enterprise architectures; contemporary standards-based architectures for system development; industry guidelines and standards. Restricted to students in the MPS in CSIM program or with the permission of the instructor.

PSCS 6258. Information Sharing and Safeguarding. 3 Credits.

Key principles of privacy and safeguarding of information; how information is shared among government agencies, outside the federal government, and between the government and the private sector. Restricted to students in the MPS in CSIM program or with the permission of the instructor.

PSCS 6259. Strategic Information Technology Investment and Performance Management. 3 Credits.

The effective use of information technology within organizations; integration of IT in business processes, performance measurement, cost benefits analysis, and program evaluation; cross-disciplinary and comprehensive with examples from federal, justice and public safety, and industry organizations. Restricted to students in the MPS in CSIM program or with the permission of the instructor.

PSCS 6260. Methods of Analysis in Security. 3 Credits.

Methods and problems of data collection in security fields with a focus on cybersecurity related issues and readings; analytical design, instrument utilization, sampling, and measurement; data analysis techniques. Restricted to students in the MPS in CSIM program.

PSCS 6270. Capstone Project. 3 Credits.

Designed to help participants refine their conception of leadership in and knowledge of the cybersecurity field. Students must have completed the MPS in CSIM program curriculum before enrolling in this course. Restricted to students in the MPS in CSIM program.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF HOMELAND SECURITY

The master of professional studies in the field of homeland security is a 36-credit program designed for industry professionals—including those in the military—who wish to develop leadership skills as well as an in-depth understanding of current and emerging homeland security issues. The program provides a pioneering education on counter-terrorism, intelligence analysis, emerging security threats, and relevant legislation, enhancing the implementation of security practices in both public and private sectors.

Visit the program website (<https://cps.gwu.edu/homelandsecurity/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits in required courses.

Code	Title	Credits
Required		
PSHS 6240	Political Violence and Terrorism	
PSHS 6241	Globalization of Threats and International Security	
PSHS 6242	Security and Civil Liberties	
PSHS 6243	Intelligence and Strategic Analysis	
PSHS 6244	Information Systems Protection	
PSHS 6250	Strategic Planning and Budgeting	
PSHS 6251	Inter-Agency Cooperation	
PSHS 6252	Emergency Management and Crisis Communication	
PSHS 6253	Managing the Politics of Leadership	
PSHS 6254	Strategic Change Management	
PSHS 6260	Methods of Analysis in Security	
PSHS 6270	Capstone Project	

FACULTY

Director E. Lammert

For faculty information visit the program website (<https://cps.gwu.edu/homeland-security-master-professional-studies/>).

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSHS 6240. Political Violence and Terrorism. 3 Credits.

The evolution of terrorism and politically motivated violence; causes and origins in regional, national, and international terrorist and insurgent groups and so-called terrorist states; trends in terrorist modus operandi, including asymmetric attacks; formulating effective counterterrorist strategies. Restricted to students in the MPS in homeland security program.

PSHS 6241. Globalization of Threats and International Security. 3 Credits.

The intersection of globalization and national and international security; how globalization may create new threats while amplifying existing threats; the relationship of specific forms of globalized threat to globalization; responses of states and non-state actors to such threats; the role of international organizations. Restricted to students in the MPS in homeland security program.

PSHS 6242. Security and Civil Liberties. 3 Credits.

Examination of U.S. government activities designed to protect the security of American citizens while balancing those interests against citizens' civil liberties; limitations placed on government activities by the First and Fourth Amendments of the Constitution; complexities associated with the characterization of criminals and terrorists. Restricted to students in the MPS in homeland security program.

PSHS 6243. Intelligence and Strategic Analysis. 3 Credits.

The structure and components of the national intelligence community and law enforcement communities; international intelligence comparison; analysis of intelligence policies and strategies at the international, national, and regional levels. Restricted to students in the MPS in homeland security program.

PSHS 6244. Information Systems Protection. 3 Credits.

Exploration of the major areas of information security including risk management, cybercrime, cyberconflict, and the technologies involved in both cyberattacks and information systems protection; creating, implementing, and maintaining an information security program; root causes of insecurity in information systems.

PSHS 6250. Strategic Planning and Budgeting. 3 Credits.

The adaptation of strategic planning and performance measures beyond budgeting by government agencies dealing with long-term security issues; integrative approach to strategic planning and management, focusing on the implementation, evaluation, and oversight of strategy and policy; development of budgets, accountability plans, and risk management to ensure compliance with stated goals; analytical tools and techniques that inform organizational strategies and actions. Restricted to students in the MPS in homeland security program.

PSHS 6251. Inter-Agency Cooperation. 3 Credits.

In-depth study of interagency cooperation issues relevant to the U.S. Department of Homeland Security's organizational structure; cooperative initiatives through mutual assistance agreements and regional, national, and international structures; technology interoperability, legal, and interorganizational challenges. Restricted to students in the MPS in homeland security program.

PSHS 6252. Emergency Management and Crisis Communication. 3 Credits.

The role of crisis communications in the overall management of emergency operations; critical communications tasks, functions, and operations of the emergency operations center, incident command, and associated emergency personnel; strategies and tactics to enhance and promote effective crisis communications among government emergency managers. Restricted to students in the MPS in homeland security program.

PSHS 6253. Managing the Politics of Leadership. 3 Credits.

The role of power and influence in organizations; complexity and challenges of developing political strategies and mobilizing the political support and resources needed to implement objectives. Restricted to students in the MPS in homeland security program.

PSHS 6254. Strategic Change Management. 3 Credits.

The challenges, techniques, burdens, and successes associated with initiating and implementing major change within organizations; the process of organizational change from multiple theoretical perspectives. Restricted to students in the MPS in homeland security program.

PSHS 6260. Methods of Analysis in Security. 3 Credits.

Methods and problems of data collection in security fields; analytical design, instrument utilization, sampling, and measurement; data analysis techniques. Restricted to students in the MPS in homeland security program.

PSHS 6270. Capstone Project. 3 Credits.

Students refine their conception of leadership and knowledge of the homeland security field. Participants experience leadership in action and enhance independent learning while working in both small and large group dynamics. Restricted to students enrolled in the PSHS cohort. Prerequisites: All the curriculum in the PSHS must be completed before registering for this course.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF LAW FIRM MANAGEMENT

This program is not accepting applications at this time.

The master of professional studies in law firm management degree program responds to the need for highly skilled and adaptable leadership in law firms and companies providing services to law firms. This unique, flexible program provides law firm professionals with the business and leadership knowledge they need to succeed in the law firm industry. The program consists of 30 credits and can be completed in 18 months. The program, which begins in June each year, is specially designed for those working full-time, with a combination of distance learning and short-term residencies at GW's Alexandria Graduate Education Center.

Visit the program website (<https://cps.gwu.edu/law-firm-management/>) for additional information.

REQUIREMENTS

This program is not accepting applications at this time.

The following requirements must be fulfilled: 30 credits in required courses.

Code	Title	Credits
PSLM 6201	Theories, Principles, and Practices of Law Firm Management	
PSLM 6202	Applying Strategic and Business Planning	
PSLM 6203	Practical Applications of Law Firm Management	
PSLM 6204	Principles of Leadership	
PSLM 6205	Application of Leadership Frameworks	
PSLM 6206	Strategic Leadership for Sustainability and Change	
PSLM 6207	Process Improvement in Law Firms	
PSLM 6208	Legal Technology and Knowledge Management	

See CPS regulations (p. 1102) for additional information regarding enrollment status and time limits.

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSLM 6201. Theories, Principles, and Practices of Law Firm Management. 6 Credits.

PSLM 6202. Applying Strategic and Business Planning. 3 Credits.

Team projects using a simulated law firm case study, including practice group and office profitability analysis, market assessments, creation of strategic plans, and merger analyses. Prerequisite: PSLM 6201.

PSLM 6203. Practical Applications of Law Firm Management. 3 Credits.

Presentation of strategic plans, analyses, and recommendations developed in PSLM 6202 before a panel of faculty, managing partners, and law firm professionals. Prerequisite: PSLM 6202.

PSLM 6204. Principles of Leadership. 6 Credits.

An intensive course focused on theories and principles of leadership within firms, including leading organizational change. Prerequisite: PSLM 6203.

PSLM 6205. Application of Leadership Frameworks. 3 Credits.

Concepts and frameworks that highlight leadership roles in firms. Prerequisite: PSLM 6204.

PSLM 6206. Strategic Leadership for Sustainability and Change. 3 Credits.

Integration of the content of PSLM 6204 and PSLM 6205 through a focus on strategic leadership. Prerequisite: PSLM 6205.

PSLM 6207. Process Improvement in Law Firms. 3 Credits.

Development of charters for major projects in law firms, applying skills pertaining to managing change and conflict. Prerequisite: PSLM 6206.

PSLM 6208. Legal Technology and Knowledge Management. 3 Credits.

Key elements of knowledge management, including development of a knowledge management strategy. Prerequisite: PSLM 6207.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF LEGISLATIVE AFFAIRS

The master of professional studies in the field of legislative affairs degree program centers on the study of applied politics in the legislative arena, offering students the perspective of both political scholars and working professionals. The curriculum focuses on how Congress operates, how legislative procedures shape outcomes, and how entities like the executive branch, lobbyists, and constituents influence the work of the legislature.

The program is designed for both working professionals and full-time students, with classes meeting Monday through Thursday evenings in the Washington, DC, metro area. The required 33 credits can be completed in as little as one year; however, the usual pace is two courses per semester completed in two years.

Visit the program website (<http://gspm.gwu.edu/legislative-affairs/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 12 credits in required courses; at least 6 credits in courses in each of two elective areas; either 6 credits in thesis or 6 additional credits in one or both of the two elective areas; and successful completion of a master's comprehensive examination.

Code	Title	Credits
Required		
LGAF 6201	Politics and Public Policy	
LGAF 6202	Legislative Politics	
LGAF 6203	Executive-Legislative Relations	
LGAF 6204	Research Methods for Legislative Affairs Specialists	
Elective areas		
American Political Process		
At least two courses from the following:		
LGAF 6217	Budgetary Politics	

LGAF 6218	Judicial Politics
LGAF 6219	American Presidency
LGAF 6222	Parties and Elections
LGAF 6223	Public Opinion and Political Socialization
LGAF 6224	Interest Group Politics
LGAF 6228	Media and Congressional Politics
LGAF 6233	Comparative Legislatures
LGAF 6234	PACs and Congress
Public Policy Analysis	
At least two courses from the following:	
LGAF 6246	Congress and Foreign Policy
LGAF 6249	Congress and National Security Policy
LGAF 6251	Budgetary Policy
LGAF 6260	Special Topics: Domestic Policy
LGAF 6270	Special Topics: Congress and Foreign Policy

Thesis option

LGAF 6998	Thesis
LGAF 6999	Thesis

Non-thesis option

Six additional credits in one or both of the elective areas, above.

*With prior approval of the academic advisor, students may take up to three of the required number of elective courses in related disciplines.

Successful completion of a master's comprehensive examination is required.

See CPS regulations for additional information regarding enrollment status and time limits.

FACULTY

Director S. Billet

Associate Professors S. Billet, S. Wiley

Professorial Lecturers R. Carr, G. Fisher, R. Whitlock

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

LGAF 6201. Politics and Public Policy. 3 Credits.

Examination of political processes that influence policy formulation, policy implementation, and the uses of policy analysis. Topics include political and policy decision making, actors, and process.

LGAF 6202. Legislative Politics. 3 Credits.

Theory, structure, and process of the U.S. Congress, with emphasis on member-constituency relations, individual and collective decision making, party and committee activities, executive-legislative relations, and interest-group activities.

LGAF 6203. Executive-Legislative Relations. 3 Credits.

Political and institutional relationships between the executive and legislative branches of the federal government.

LGAF 6204. Research Methods for Legislative Affairs Specialists. 3 Credits.

Approaches to political analysis. Construction of research designs and problems of measurement.

LGAF 6210. Legislative Procedure. 3 Credits.

LGAF 6211. Congressional Leadership. 3 Credits.

LGAF 6212. Congressional Committees. 3 Credits.

LGAF 6217. Budgetary Politics. 3 Credits.

Examination of federal budget policymaking and politics.

LGAF 6218. Judicial Politics. 3 Credits.

Role of the judiciary in policy formulation; emphasis on Congress and the Supreme Court.

LGAF 6219. American Presidency. 3 Credits.

Personalized and institutionalized aspects of the presidency, with emphasis on the politics of contemporary policymaking.

LGAF 6221. Executive Branch Decision Making. 3 Credits.

.

LGAF 6222. Parties and Elections. 3 Credits.

Nature and functions of American political parties: organizational status, nominating and electoral politics, and role in governing.

LGAF 6223. Public Opinion and Political Socialization. 3 Credits.

Sources and dynamics of public opinion and political socialization.

LGAF 6224. Interest Group Politics. 3 Credits.

Theory, structure, and activities of interest groups in American politics.

LGAF 6228. Media and Congressional Politics. 3 Credits.

Role of the media in American politics, with emphasis on news coverage, political debates, and political advertising, with their impact on the electorate.

LGAF 6233. Comparative Legislatures. 3 Credits.

Selected problems of legislative theory and behavior from a comparative perspective, with particular reference to the parliamentary systems of Germany, France, and Britain.

LGAF 6234. PACs and Congress. 3 Credits.

Examination of the structure and function of political action committees in the United States in the context of wider arenas of campaign finance, elections, and issue management.

LGAF 6240. Special Topics in Legislative Affairs. 3 Credits.

In-depth coverage of significant theoretical and empirical issues in American politics, including such topics as political behavior, electoral politics, and race and politics.

LGAF 6246. Congress and Foreign Policy. 3 Credits.

The role of Congress in setting foreign policy.

LGAF 6249. Congress and National Security Policy. 3 Credits.

The role of Congress in setting defense policy.

LGAF 6251. Budgetary Policy. 3 Credits.

Analysis of U.S. monetary and fiscal policy.

LGAF 6260. Special Topics: Domestic Policy. 3 Credits.

Analysis of U.S. policy on selected domestic problems.

LGAF 6270. Special Topics: Congress and Foreign Policy. 3 Credits.

Analysis of U.S. policy on selected issues, challenges, or world regions.

LGAF 6290. Independent Study. 1-3 Credits.

Directed readings in a topic related to Congress and public policymaking. Limited to Legislative Affairs degree candidates. Written permission of program director required.

LGAF 6299. Thesis. 3 Credits.

LGAF 6300. Thesis. 3 Credits.

LGAF 6998. Thesis. 3 Credits.

LGAF 6999. Thesis. 3 Credits.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF PARALEGAL STUDIES

The master of professional studies in the field of paralegal studies is an advanced credential for those who wish to lead the profession in a variety of settings such as law, finance, insurance, consulting, and health care. The program curriculum balances a focus on analysis and critical thinking with the applied skills that employers seek: written and oral

communication, research, and managing complex tasks and teams. Students complete the 32-credit master's program in four semesters. GW's College of Professional Studies also offers a graduate certificate in paralegal studies (p. 1135) and graduate certificate in California paralegal studies (p. 1133). Credits earned in both certificate programs may be applied toward master's degree requirements.

Visit the program website (<https://cps.gwu.edu/paralegal-studies-master-professional-studies/>) for more information.

REQUIREMENTS

The following requirements must be fulfilled: 32 credits, including 20 credits in required courses and 12 credits in courses from one track.

Code	Title	Credits
Required		
PSLX 6210	American Jurisprudence	
PSLX 6211	Legal Research and Writing	
PSLX 6212	Litigation	
PSLX 6223	Contracts	
PSLX 6224	Advanced Legal Writing	
PSLX 6225	Business Entities	
PSLX 6294	Independent Research in Legal Studies	
PSLX 6298	Paralegal Practicum	
All courses from one track:		
Legal Practice Track		
PSLX 6214	Administrative Law	
PSLX 6215	Government Contracts Law	
PSLX 6226	International Law	
PSLX 6227	Intellectual Property Law	
Health Care Corporate Compliance Track		
PSHC 6201	Introduction to Health Care Corporate Compliance	
PSHC 6202	Compliance with Laws and Regulations I	
PSHC 6204	Compliance with Laws and Regulations II	
PSHC 6206	Case Studies in Health Care Corporate Compliance	

See CPS regulations for additional information regarding enrollment status and time limits.

FACULTY

Director T. Marsh

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSLX 6210. American Jurisprudence. 3 Credits.

An introduction to the foundations, theories, history, and applications of the American legal system; local, state, and federal courts and sources of law; and ethics and professionalism issues of especial importance to paralegals.

PSLX 6211. Legal Research and Writing. 3 Credits.

Fundamentals of legal research using print and online tools.

PSLX 6212. Litigation. 3 Credits.

Legal technology and the rules of court, procedure, and evidence; technical and substantive skills necessary for effective litigation support.

PSLX 6213. Corporations and Contracts Law. 3 Credits.

PSLX 6214. Administrative Law. 3 Credits.

An introduction to administrative and regulatory law; history and development of administrative law; agency, due process, agency actions, administrative investigation and hearings, and judicial review.

PSLX 6215. Government Contracts Law. 3 Credits.

The law of procuring, forming, and executing government contracts, including drafting and litigation; competition requirements, contract changes, and contract terminations; researching and drafting documents common to a government contracts practice.

PSLX 6216. Elements of Intellectual Property Law. 3 Credits.

PSLX 6217. Prosecution and Litigation in Intellectual Law Practice. 3 Credits.

PSLX 6218. International Trade and Finance. 3 Credits.

PSLX 6219. International Litigation. 3 Credits.

PSLX 6221. Tanzanian Legal System. 3 Credits.

PSLX 6222. Tanzanian Community Law. 3 Credits.

PSLX 6223. Contracts. 3 Credits.

Contract elements, their attendant legal ramifications, and the processes necessary to make such determinations. Development of legal reasoning skills in evaluating issues arising from contract law.

PSLX 6224. Advanced Legal Writing. 3 Credits.

Advanced legal writing techniques and drafting for legal practice. Legal writing in plain English; strategies for effective writing; emphasis on legal memoranda, legal correspondence, and preparing and drafting legal pleadings and documents for court. Refines and advances skills in written legal analysis and legal citation.

PSLX 6225. Business Entities. 3 Credits.

Overview of business organizations, including partnerships, limited liability companies, and corporations. Key concepts applicable to business organizations, including regulation, business formation, document preparation. Application of legal analysis within the context of business entities and other topics applicable to paralegals in all disciplines.

PSLX 6226. International Law. 3 Credits.

Introduction and survey of international law, including international trade law and litigation. Rules and principles governing relations among sovereign states, international organizations, and sources of international law. Analysis of the rules and customs for handling international trade. International courts and tribunals; overview of the treaties, customary principles, and institutional structures governing international human rights law.

PSLX 6227. Intellectual Property Law. 3 Credits.

Introduction to the legal structure of an intellectual property practice. Trademarks, copyrights, and patents and the supporting practice concomitant to each element. Analysis of the processes, supporting documentation, laws, and rules regarding patent prosecution and litigation. This course complements and builds upon the legal issues and analysis introduced in the courses on contracts, business entities, and litigation.

PSLX 6228. California Law and Practice. 3 Credits.

Overview of the state of California's government and court structures, rules of court, litigation support procedures and technology, and professional ethics. May be used to satisfy the California paralegal continuing legal education requirement.

PSLX 6294. Independent Research in Legal Studies. 2 Credits.

Guided, independent research to demonstrate the higher level of competency in research, analysis, writing, and oral presentation. Restricted to students in the MPS in paralegal studies programs.

PSLX 6298. Paralegal Practicum. 0-3 Credits.

Students work in legal environments while completing their studies, taking active roles to obtain, manage, and maximize the value of their positions. Restricted to students in the MPS in paralegal studies program.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF POLITICAL COMMUNICATION AND GOVERNANCE (OFFERED IN SPANISH ONLY)

GW's Graduate School of Political Management offers the master of professional studies in the field of political communication and governance to closed cohorts of students in Latin America and Spain. The program combines several subjects divided into two modules: political communication and election campaign and political management and governance. The opportunity to pursue an individualized master's research project is also available. Program courses are offered in Spanish only.

Visit the program website (<https://online.gwu.edu/master-professional-studies-political-communications-governance/>) for additional information.

See CPS regulations (p. 1102) for additional information regarding enrollment status and time limits.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF POLITICAL MANAGEMENT

The master of professional studies in the field of political management degree program teaches students how to win campaigns, advocate effectively on issues, and formulate sophisticated communication strategies for candidates, causes, and corporations. Instructors are political and communications professionals who are passionate about educating students in their areas of expertise. Graduates of the program are prepared to assume decision-making positions as communications directors, digital directors, campaign managers, media consultants, chiefs of staff, and office-holders.

Concentration in Global Politics

Students who choose the concentration in global politics develop an understanding of the complexities of language, culture, politics, and economics involved in promoting and defending companies, countries, causes, and candidates.

The concentration allows students to learn to assess a region or nation--state political environment, develop a strategy to achieve specified goals within that environment, and act to carry out that strategy through a campaign.

Visit the [program website \(https://gspm.gwu.edu/political-management/\)](https://gspm.gwu.edu/political-management/) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 12 credits in required courses, 18 credits in elective courses and 6 credits in the thesis, non-thesis, or distance learning option.

Code	Title	Credits
Required		
PMGT 6401	Fundamentals of Political Management	
PMGT 6402	Applied Political Communications	
PMGT 6403	Political Data and Analytics	
PMGT 6404	Principled Political Leadership	
Electives		
Six courses from the following:		
PMGT 6410	Grassroots Engagement	
PMGT 6412	Issues Management	
PMGT 6422	State and Intergovernmental Politics	
PMGT 6430	Campaign Strategy	
PMGT 6432	Managing Campaigns	
PMGT 6434	Running for Office	
PMGT 6436	National Campaign Dynamics	
PMGT 6438	State and Local Campaigns	
PMGT 6440	Targeting and Voter Contact	
PMGT 6442	Campaigns Around the World	
PMGT 6450	Rules, Laws, and Strategy	
PMGT 6452	Digital Strategy	
PMGT 6454	Fundraising and Budgeting	
PMGT 6456	Speechcraft	
PMGT 6458	Crisis Management	
PMGT 6460	Audience Research	
PMGT 6462	Opposition Research	

PMGT 6464 Influencing the Media

PMGT 6466 Political Advertising

PMGT 6468 Digital Advertising and Action

PMGT 6470 Digital Content Creation

PMGT 6472 Maximizing Social Media

PMGT 6474 Stereotypes and Political Strategy

PMGT 6476 Political Consulting

PMGT 6490 Special Topics

PMGT 6496 Independent Study

PMGT 6497 Graduate Internship

Non-thesis option

Students who select the non-thesis option take the capstone course, PMGT 6495, and one additional elective in either their penultimate or final semester.

PMGT 6495 Political Power and Practice

Thesis option

Students who select the thesis option take PMGT 6498 and PMGT 6499 over the course of their final two terms.

PMGT 6498 Thesis I

PMGT 6499 Thesis II

Distance learning

Distance learning students take PMGT 6480 or PMGT 6482 as part of their program of study.

PMGT 6480 Washington Residency

PMGT 6482 Applied Research Project

FACULTY

Director T. Belt

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PMGT 1000. Dean's Seminar. 3 Credits.

PMGT 4101. Electoral and Legislative Processes. 3,4 Credits.

.

PMGT 4107. Practicum in Political Management. 3,4 Credits.

.

PMGT 4187. Professional Internship. 3-4 Credits.

PMGT 4192. Tutorial in American Electoral and Political Movements. 3-4 Credits.

.

PMGT 6401. Fundamentals of Political Management. 3 Credits.

Main concepts, arenas, developments, roles, and practices in the field of political management. Assess rhetorical situations, write strategy memos, create and critique campaign messages, and engage citizens, professional colleagues and decision-makers. Taken in first semester of program. (Professors M. Cornfield and TBD.).

PMGT 6402. Applied Political Communications. 3 Credits.

Models and methods by which professionals plan, produce, and adjust strategic communication messages in democratic politics. Use a variety of communication forms and media, such as, fact sheets, blog posts, video releases, and public addresses, under typical constraints of time, money, information, reputation, talent, audience attentiveness, and institutional procedure. Students to enroll by their sixth course in the program. Core requirement. Must be completed before a student reaches 18 credits.

PMGT 6403. Political Data and Analytics. 3 Credits.

Introduction to the uses of quantitative data and statistics in politics. Learn to evaluate research designs, statistical associations, causal reasoning, methods for hypothesis testing, multivariate regression analyses, and data analytics. Consume and critique data and statistics for strategic purposes. Students to enroll by their sixth course in the program. Core requirement. Must be completed before a student reaches 18 credits.

PMGT 6404. Principled Political Leadership. 3 Credits.

Theory and practice of ethically grounded political leadership. Consideration of the recurrent dilemmas, philosophical principles, management techniques, codes of conduct, and professional norms in the political management field. Application through self-assessment exercises, case study analysis, and individual and group simulations. Students to enroll by their sixth course in the program. Core requirement. Must be completed before a student reaches 18 credits.

PMGT 6410. Grassroots Engagement. 3 Credits.

Strategies and techniques to build advocacy support among and across general civic populations. Identification of potential supporters through database targeting and individual outreach. Motivation and training of interested supporters for grassroots action in campaigns, at public forums, and before decision-makers. Coalition and protest options; analytics of ongoing efforts. (Professors E. Grefe, S. Gagen).

PMGT 6412. Issues Management. 3 Credits.

Track, influence, and alter politically significant issue-related discourses and policy developments. Legislative, executive, and judicial venues and processes for policymaking; state referendum, initiative, and recall ballot opportunities; organizational structures, including digital procedures, for issue management. (Professors M. Edwards, E. Grefe).

PMGT 6414. Lobbying. 3 Credits.

Survey of and training for lobbying in the U.S. federal system. Students design a detailed lobbying plan for implementation and practice a variety of influence techniques, including those associated with digital media and communications technologies. Legal compliance, organizational and public accountability, professional standards and practices. (Professor J. Hobson).

PMGT 6416. International Lobbying. 3 Credits.

Survey of international lobbying practices, analysis of strategic models and best practices in a variety of different countries and political systems (e.g., EU, China, Brazil, and Turkey). Trends and innovations in lobbying techniques and communications technologies. Investigation and application of appropriate research to improve practice. (Professor TBD by AGE program) (Same as PSAD 6240).

PMGT 6418. Budget Politics. 3 Credits.

Politics of the budget process, including formal and informal mechanisms of appropriating U.S. federal funds. Lobbying strategies and tactics employed by private and public organizations seeking to influence budgetary agenda-setting in the White House; decision-making in Congress; and funding negotiations within and between executive agencies. (Professor M. Edwards).

PMGT 6420. Corporate Public Affairs. 3 Credits.

Exploration of major functional areas in corporate public affairs with a focus on the political and policy dynamics operating in the United States and other democracies. Development and deployment of appropriate strategies, research, and tactics for corporations managing the complexities related to a global economy and shifting political alliances.

PMGT 6422. State and Intergovernmental Politics. 3 Credits.

Examination of the electoral pressures on state and local legislators. Methods and techniques for advocacy in various state capitals. The governing responsibilities of constitutionally-delegated to states and the ever-changing historical relationship between states and the federal government. (Professors C. Shank).

PMGT 6424. Comparative Political Management Environments. 3 Credits.

The operating rules, customs, and processes by which laws are enacted and regulations written in countries around the world; governance systems and the realm of influencers; systems within which legislators, administrators, bureaucracies, and stakeholder's work. Restricted to graduate students.

PMGT 6428. Cultural Aspects of Global Engagement. 3 Credits.

Understanding multicultural communities and diverse institutions, customs, and practices; effective and ethical public engagement on behalf of global organizations; communicating issues and commitments to diverse audiences and the general market; engagement strategies and techniques. Restricted to graduate Students.

PMGT 6430. Campaign Strategy. 3 Credits.

Orientation to the basic systems and technologies that must be created and managed to produce electoral victory. The campaign plan and campaign budget as the foundation for management of campaigns. Focus on development of a campaign plan. (Professor M. Meissner).

PMGT 6432. Managing Campaigns. 3 Credits.

Understanding the role of a campaign manager in staffing and running a campaign, while executing the campaign plan. Candidate handling, fundraising, website and technology, geographic and demographic targeting, field organization, canvassing, get-out-the-vote, press operations, budget control, and liaison with the party and interest groups. (Professors TBD) Prerequisites: PMGT 6430.

PMGT 6434. Running for Office. 3 Credits.

Electoral politics from the perspective of the candidate, strategic and personal factors involved in the decision to run and the consequences of victory or defeat. (Professor R. Faucheux).

PMGT 6436. National Campaign Dynamics. 3 Credits.

Examination of the historical and systematic patterns in national elections. Differences between presidential and midterm elections; House and Senate contests; party nomination races and general elections; primaries and caucuses; Democratic and Republican party delegate selection rules; causes for "wave" elections; effect of the economy on election outcomes; and standard vice presidential selection models. The political and partisan structural conditions that exist before any of the candidates or the campaigns get involved.

PMGT 6438. State and Local Campaigns. 3 Credits.

Application of campaign strategy and management principles to electoral races at the state and local levels. Staffing, budgeting, and strategic challenges for what are typically lower-visibility contests that involve state and local candidates. Coordinated campaigns and the impact of the national party's reputation on these down-ballot races. (Professor TBD).

PMGT 6440. Targeting and Voter Contact. 3 Credits.

How to find voters for electoral and advocacy campaigns and tailor communications to them. Database analytics, list management, questionnaire design, target weighting, predictive modeling. Review of randomized and natural experiments in light of theoretic principles and findings from public opinion research. Skill development in use of spreadsheets and basic statistical packages. Lab fee. (Professors B. Russell, A. Strauss) Prerequisites: PMGT 6403.

PMGT 6442. Campaigns Around the World. 3 Credits.

Comparative examination of national-level campaigns in democratic countries outside of the United States. Strategies, techniques, and practices used in multi-party and/or parliamentary systems. Professional conduct, consulting rules and norms.

PMGT 6450. Rules, Laws, and Strategy. 3 Credits.

U.S. federal and state laws and regulations governing recognition of political parties and political organizations, campaign finance, political broadcasting and cablecasting, lobbying registration. Ballot access and voter registration. Ethical and strategic considerations (opportunities and constraints; benefits and drawbacks) related to rule construction. (Professor M. Braden).

PMGT 6452. Digital Strategy. 3 Credits.

Development of an integrated digital strategy for use in advocacy and electoral campaigns. Introduction to the theoretical concepts, distinctive technologies, applied skills, and managerial challenges associated with digital campaigning. Search engine optimization, GPS, online payment systems, customizing back- and front-end systems to meet strategic goals and budget parameters, working with IT vendors and distance volunteers, legal and cultural considerations in US and other regimes, site rollout and scaling, security and privacy. (Professor TBD).

PMGT 6454. Fundraising and Budgeting. 3 Credits.

Raising and spending money in political campaigns, referenda contests, issue advocacy, and lobbying efforts. Budgeting process, standard controls to check expenditures, accounting procedures, and general strategies for use in effective fundraising. (Professor N. Bocskor).

PMGT 6456. Speechcraft. 3 Credits.

Analysis and techniques used in speechwriting and presentations for public officials and candidates. Managing the political optics and understanding a speech's visual context and non-verbal communication capabilities (Rose Garden, Oval Office, campaign stump speech, ceremonial occasion, congressional testimony). Modulating speaker style, tone, and pacing, and staging the speech for effect. (Professors D. McGroarty, R. Lehrman).

PMGT 6458. Crisis Management. 3 Credits.

Management of crisis situations and defining moments in electoral, legislative, and public policy campaigns. Exploration of the causes and consequences of political scandals. Professional responsibilities and ethical considerations of crisis management and rapid response decisions. (Professor M. Edwards).

PMGT 6460. Audience Research. 3 Credits.

Processes by which citizens acquire political information and make decisions in politics. Survey research uses in electoral campaigns and issue advocacy. Designing and drawing samples, constructing and pretesting questionnaires, modes of interviewing, financial implications, practical problems in selecting and monitoring polling organizations, and interpretation of data. Focus groups and small-sample interviews; relationship between qualitative and quantitative research; reliability and validity. (Professors R. Johnson, D. Cantor, B. Tringali, M. Ward) Prerequisites: PMGT 6403.

PMGT 6462. Opposition Research. 3 Credits.

Practices and techniques associated with investigative opposition research. Public document and website searches, candidate tracking, and methods for information dissemination. Changes in practice as a result of technological innovations and a changing media environment. Professional responsibilities and ethics expected from opposition researchers.

PMGT 6464. Influencing the Media. 3 Credits.

Organization, practices, and norms of the major media; media coverage of public officials, political campaigns, legislative battles, interest groups, and issues of public policy. Formulation of strategies for getting favorable news coverage for the issue or candidate and for ending a media crisis. (Professor L. Ellenbogen).

PMGT 6466. Political Advertising. 3 Credits.

Strategies and techniques for using the various media (print, radio, television, cable, Internet) in political and advocacy campaigns, with emphasis on the use of television. Impact and uses of paid advertising; development of campaign messages; production, timing, and placement of television advertising; explanation of media markets. Students design print ads and brochures and produce a 30-second television spot. (Professor P. Fenn).

PMGT 6468. Digital Advertising and Action. 3 Credits.

Strategies and techniques for developing and leveraging digital advertising for mobilization. Manage an effective online ad campaign from initial concept to creation and from targeting to measuring the results. Prepare, design, and launch a variety of online ad types, including search, social, display, and video. Analyze success or failure based on analytics and benchmarking. Prerequisite: PMGT 6452.

PMGT 6470. Digital Content Creation. 3 Credits.

Developing and creating effective digital content that promotes campaign narratives and furthers strategic messages. Construct portfolios of original and aggregated digital media content. Skill development in infographics, video, GPS, photo collage, page and site architecture, and texts from 140 characters to blog posts and file attachments. Versioning for different communities, functionalities, and channels including mobile applications. Prerequisite: PMGT 6452.

PMGT 6472. Maximizing Social Media. 3 Credits.

Creating and integrating owned digital platforms and social media assets for political persuasion and action. Cultivation of online political communities, moderating and curating outside-generated content, integration and alignment with campaign message; event, reputation and crisis management. Review of constraints and potentials intrinsic to specific social media sites (e.g. Facebook, Google, LinkedIn, Twitter). Prerequisite: PMGT 6452.

PMGT 6474. Stereotypes and Political Strategy. 3 Credits.

Accounting for psychological constructs, social stereotypes, media framing, and the impression formation process in developing a political strategy. Review of empirical research; investigation of effective techniques or postures for overcoming biases; self-assessment of perceptual assumptions.

PMGT 6476. Political Consulting. 3 Credits.

Management principles, technical procedures, and legal requirements for starting and running a political consulting business. Effective practices for gaining a positive reputation, sustaining profitability across the variable political environment, and engaging on the international front. Start-up funding, mergers and acquisitions, exit strategies. (Professors G. Nordlinger, L. Purpuro, M. Meissner).

PMGT 6478. Strategic Government Consulting. 3 Credits.

How government agencies are organized and funded, how they support national strategies set by the president and Congress, and how expert consultants work with government leaders to operate and organize agencies to adapt to changing requirements and administrations.

PMGT 6480. Washington Residency. 3 Credits.

Capstone experience equivalent to PMGT 6495 for students in the online political management program. Exposure to and interaction with political consultants, advocacy specialists, elected officials, and applied researchers in Washington, DC. Integration of program curriculum toward an understanding of the federal political ecosystem and development of a robust political network. Restricted to PMGT online students in their last or penultimate term, or students with permission of the instructor.

PMGT 6482. Applied Research Project. 3 Credits.

A research option for students in the online Political Management program. Development of a campaign-relevant research report and related communications on behalf of a mock political client. The report describes the status quo of a political situation, analyze the factors and actors sustaining that status quo, identify what and who is potentially moveable in the direction the client seeks to go, and outline practical first steps a campaign can take in that direction. Restricted to PMGT online students in their last or penultimate term in the program.

PMGT 6490. Special Topics. 3 Credits.

Topic to be announced in the Schedule of Classes.

PMGT 6495. Political Power and Practice. 3 Credits.

Capstone seminar that develops and integrates knowledge of political strategies, tactics, and situational considerations, and applies that knowledge to advanced political problems. Topics include: gaining and wielding power, the complexity associated with making democracy work, conflict resolution, negotiation and bargaining skills, grappling with the consequences of winning and losing. Students to enroll during their last or penultimate term. (Professor L. Brown).

PMGT 6496. Independent Study. 0-3 Credits.

Independent research with a Political Management faculty member. Registration must be approved in advance by the supervising faculty member and the director of the political management program.

PMGT 6497. Graduate Internship. 0 Credits.

Experience at an organization focused on applied politics. Restricted to students in the MPS in political management program.

PMGT 6498. Thesis I. 3 Credits.

Master's degree candidates must apply to the program committee for thesis approval and have completed 24 credits with a 3.3 GPA.

PMGT 6499. Thesis II. 3 Credits.

Master's degree candidates must apply to the program committee for thesis approval and have completed 24 credits with a 3.3 GPA. Prerequisite: PMGT 6498.

PMGT 6501. Politics and Public Policy. 3 Credits.

Examination of political processes that influence policy formulation, policy implementation, and the uses of policy analysis. Topics include political and policy decision making, actors, and process.

PMGT 6502. ConfrontManag&AllianceBldg. 3 Credits.**PMGT 6503. Communication Strategy. 3 Credits.**

Formulation of political communications strategies. Elements necessary to create, introduce, and maintain an effective political profile in issue advocacy campaigns, candidate elections, and legislative advocacy campaigns. Application of principles of research, advertising, and marketing to the political landscape.

PMGT 6504. Political Management and Strategic Governance. 3 Credits.**PMGT 6505. Politica de bases. 3 Credits.**

Use of microtargeting and database-layering technology to identify potential advocates. Motivational techniques to mobilize volunteers for political campaigns, lobbying efforts, and community advocacy. Techniques used by grassroots organizers to help corporations, unions, civic and nonprofit organizations, and special interest groups achieve strategic goals.

PMGT 6506. Practicum. 3 Credits.**PMGT 6507. Democracia y elecciones en LA. 3 Credits.**

This course focuses on the recent history of Latin America, underscoring the struggle to establish and consolidate democracy and the preeminence of elections as the legitimate process to select and replace authorities at the national, regional and local levels. The course provides the student with concepts to understand the different types of democratic settings that exist in the region, that is the coexistence of fairly established and solid democracies, with low intensity democracies, and semi-authoritarian regimes, all of which utilize electoral processes to select public authorities. The main message of this course is that campaign designers need to understand and take a strategic advantage of the political context and the rules governing the political competition in order to obtain the most effective results.

PMGT 6508. Estrategia de campana LA. 3 Credits.

Organization of political campaigns. Strategic decisionmaking. Formulation of political communications strategies. Aspects necessary to introduce and maintain an effective political profile in the electoral campaigns in Latin America, including the specialized forms of communication which political professionals use to win support for their candidates. This course is taught entirely in Spanish.

PMGT 6509. Las encuestas-America Latina. 3 Credits.

The use of survey research in campaigns. Quantitative and qualitative survey research for political management in Latin America. The proper use of polls; methodology and survey design; reviewing poll results; drawing conclusions and recommendations from polls; and the practical problems of administering and interpreting survey data of public opinion in Latin America. PMGT 6509 is taught entirely in Spanish.

PMGT 6510. Organizacion y ejecucion-LA. 3 Credits.

Organizational choices facing campaign management teams in Latin America as they attempt to combine the resources and activities of a modern campaign into a winning effort.

PMGT 6511. Propoganda politica, La campan. 3 Credits.

The strategies, techniques, design and impact of paid political communications directed toward target audiences in Latin America, focusing upon the role of political advertising in a campaign, including radio, direct mail, print and internet, but with specific emphasis on television commercials.

PMGT 6512. Los medios, la politica-LA. 3 Credits.

The role of the media in the politics of Latin America. Who the media are, how they make their decisions, and how they influence outcomes in campaigns and other political situations. Strategic planning in dealing with the media as well as the particular dynamics that surround electronic, print, and the new media. Effective practices of media engagement. This course is taught entirely in Spanish.

PMGT 6513. Comunicacion Politica,Gobernon. 3 Credits.

The course builds upon the Practicum course of the Certificate in Governance and integrates the two processes of politics: campaigning and governing. PMGT 6513 is taught entirely in Spanish.

PMGT 6514. Manejo de Crisis. 3 Credits.

Manejo de Crisis. Management of crisis situations and defining moments in electoral, legislative, and public policy campaigns. Exploration of the causes and consequences of political scandals. Professional responsibilities and ethical considerations of crisis management and rapid response decisions.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF PUBLISHING

The master of professional studies in the field of publishing is designed for current and aspiring professionals. The 30-credit program is offered on a part-time basis; students finish the course of study in two years. Classroom instruction and distance learning options are available.

Core coursework provides a foundation in current industry practices, while advanced courses provide preparation for the future of publishing through in-depth study in the areas of editorial management, technology and design, or business and marketing.

Visit the program website (<http://cps.gwu.edu/publishing/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 16 credits in required courses and 14 credits in elective courses.

Code	Title	Credits
Required		
PSPB 6201	Book and Journal Publishing	
PSPB 6203	Business of Publishing	
PSPB 6205	Copyright Law in Print and Cyberspace	
PSPB 6207	Marketing Strategies	

PSPB 6232	Production Management
PSPB 6251	Fundamentals of Electronic Publishing
PSPB 6281	Ethics in Publishing

At least one course in each of the following groups:

Editorial group	
PSPB 6261	Editorial Content, Rights, and Permissions
PSPB 6262	Editing for Books, Journals, and Electronic Products
PSPB 6265	Managing Editorial Staff
Business and marketing group	
PSPB 6221	Publishing Management, Organization, and Strategy
PSPB 6222	Accounting and Finance for Publishers
PSPB 6271	Sales Management, Strategy, and Positioning
PSPB 6272	Book Publicity and Promotion
Technology and design group	
PSPB 6213	Book Design
PSPB 6253	Electronic Publishing Theory & Practice
PSPB 6257	Designing for E-Publishing Success
PSPB 6256	E-Publishing Technologies And Standards
PSPB 6259	E-Publishing Tools

Electives

Credits beyond those for all required courses are taken as electives; at least one elective must be taken in each group.

FACULTY

Director J. Warren

For faculty information visit the program website (<https://cps.gwu.edu/publishing-master-professional-studies/>).

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses

- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSPB 6201. Book and Journal Publishing. 3 Credits.

Overview of the book and journal publishing industry and the opportunities and challenges it presents. Major functions of a publishing house and stages of publishing, including editorial, design, production, sales, marketing, and distribution. Publishing house finances.

PSPB 6203. Business of Publishing. 2 Credits.

PSPB 6205. Copyright Law in Print and Cyberspace. 3 Credits.

Foundation is U.S. copyright law as it applies to both print and electronic media; the importance of copyright to the publishing field; history and development of copyright law; key concepts including exclusive rights of copyright, fair use, and remedies for infringement.

PSPB 6207. Marketing Strategies. 2 Credits.

Strategies used in print and digital book and journal publishing to bring products to market and sell them; product types, revenue models, market overviews, and distribution options; legal and advocacy issues facing publishers; threats to traditional sales and monetization models.

PSPB 6213. Book Design. 2 Credits.

The book design process and its relationship to editorial, production, and marketing departments; book design components, including typography, composition, page layout, illustrations, photo editing, and printing.

PSPB 6221. Publishing Management, Organization, and Strategy. 2 Credits.

Organizational and management structures; planning, innovative thinking, and leadership applied within an organization to maximize competitive advantage; short-range operational and long-range strategic issues relevant to book, journal, magazine, newspaper, and online publishers.

PSPB 6222. Accounting and Finance for Publishers. 2 Credits.

Fundamentals of accounting from a publisher's perspective; accounting and financial reporting for a publisher's operating results and what these results mean in terms of financial success and viability.

PSPB 6224. Budgeting, Fulfillment, and Distribution. 2 Credits.

PSPB 6232. Production Management. 3 Credits.

Managing the production process from initial design and editing to a final printed and distributed publication. Aspects of traditional production, including printing basics, manufacturing savings, prepress and composition, paper, postage, and best practices. Emerging trends in digital products and delivery.

PSPB 6251. Fundamentals of Electronic Publishing. 2 Credits.

Overview of e-publishing; the digital transformation in publishing its reshaping of the industry; evolving publishing business models, publishing standards and technology, and the social and ethical context of e-publishing.

PSPB 6253. Electronic Publishing Practice. 2 Credits.

Pragmatic, economic, and ethical aspects of electronic publishing for responsible decision making. Prerequisite: PSPB 6251.

PSPB 6255. Electronic Publishing: Infrastructure and Architecture. 3 Credits.

Emerging content technologies, including software and hardware components of a typical publishing system, the enabling standards, and an introduction to publishing systems architecture. Prerequisite: PSPB 6251.

PSPB 6256. E-Publishing Technologies And Standards. 2 Credits.

Overview of current and emerging content technologies; software and hardware components of a typical publishing system, the enabling standards, and publishing systems architecture. Restricted to students in the MPS in publishing program. Prerequisite: PSPB 6251.

PSPB 6257. Designing for E-Publishing Success. 2 Credits.

Principles of digital design: usability testing, search engine optimization, iterative design, and multiple presentational models. Prerequisite: PSPB 6251.

PSPB 6258. User-Centric Design for Print and Electronic Publications. 2 Credits.

PSPB 6259. E-Publishing Tools. 2 Credits.

Practical experience with popular e-publishing tools. Builds upon material covered in PSPB 6255 and assumes basic knowledge of HTML, CSS, and XML. Prerequisites: PSPB 6251; and PSPB 6255 or PSPB 6256.

PSPB 6261. Editorial Content, Rights, and Permissions. 2 Credits.

The meaning of rights in the publishing world; what editors need to know in order to negotiate terms for rights that they wish to acquire; how the emerging electronic and digital marketplace affects permissions and rights.

PSPB 6262. Editing for Books, Journals, and Electronic Products. 2 Credits.

An overview of the editorial roles, functions, and workflows used in creating publications for print and electronic formats; peer review and online tools for manuscript submission and tracking.

PSPB 6265. Managing Editorial Staff. 2 Credits.

An overview of the roles and responsibilities within a typical editorial office and how these roles may vary from office to office; emphasis on the scientific, technical, and medical (STM) journal publishing sector.

PSPB 6271. Sales Management, Strategy, and Positioning. 2 Credits.

Essentials of sales strategy and marketing for books, magazines, and e-content products.

PSPB 6272. Book Publicity and Promotion. 2 Credits.

Overview of marketing strategies, objectives, and tactics helpful in promoting and publicizing new books and monographs.

PSPB 6273. Managing the Marketing Portfolio. 2 Credits.

PSPB 6280. Applied Ethics in Publishing. 1 Credit.

Students work with publishers, advocacy groups, or community groups on a project that applies ethical theories to real-world publishing situations.

PSPB 6281. Ethics in Publishing. 1 Credit.

Ethical issues in contemporary publishing; analysis and proposed resolution of ethical problems. Restricted to second-year students in the MPS in publishing program.

PSPB 6298. Digital Publishing Practicum. 2 Credits.

Application of theory and practice acquired in prior courses to a real-world problem. Each semester the topic reflects a selected area of current importance in digital publishing. Restricted to students in the MPS in publishing program in their final semester of study.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF STRATEGIC PUBLIC RELATIONS

The master of professional studies in the field of strategic public relations prepares its graduates to work at major public relations firms or in communication roles with nonprofits, corporations, on Capitol Hill, or in the executive branch. The 30-credit program is offered at GW's Alexandria Education Center as well as via distance learning.

Visit the program website (<http://gspm.gwu.edu/strategic-public-relations/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 18 to 21 credits in required courses and 9 to 12 credits in elective courses.

Code	Title	Credits
Required		
PSPR 6201	Strategic Public Relations: Principles and Practice	
PSPR 6202	Advanced Writing for Public Relations Professionals (see note below)	
PSPR 6203	Research Methods for Public Relations and Public Affairs Managers	
PSPR 6204	Media Relations in a Digital World	
PSPR 6205	Fundamentals of Business and Management for Public Relations and Public Affairs	
PSPR 6206	Ethical Standards in Public Relations and Public Affairs	
CPS 6300	Capstone Research Project	

Electives

9 to 12 credits in elective courses chosen in consultation with the program director.

Note: Students may place out of PSPR 6202 based on review of their transcript and required writing samples. Such students take an additional elective course.

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSPR 6201. Strategic Public Relations: Principles and Practice. 3 Credits.

Basic rules and strategies in public relations. Major trends, major firms, and types of business and expertise. Digital media and integrated media communications.

PSPR 6202. Advanced Writing for Public Relations Professionals. 3 Credits.

PSPR 6203. Research Methods for Public Relations and Public Affairs Managers. 3 Credits.

PSPR 6204. Media Relations in a Digital World. 3 Credits.

Media relations from the perspective of public relations and public affairs; the state of contemporary media, both on- and offline, and its impact on commerce, politics, and the social contract; key factors influencing reportorial and editorial coverage of business, government, and nonprofit interests.

PSPR 6205. Fundamentals of Business and Management for Public Relations and Public Affairs. 3 Credits.

PSPR 6206. Ethical Standards in Public Relations and Public Affairs. 3 Credits.

PSPR 6207. Sustainability Communications Methods and Practices. 3 Credits.

PSPR 6208. Integrated Marketing Communications. 3 Credits.

The evolution of integrated marketing communications as a means by which for-profit and nonprofit enterprises extend the reach and influence of public relations and public affairs; traditional and non-traditional communications approaches and technologies. Recommended background: degree candidacy in the MPS in the Field of Strategic Public Relations program and/or graduate status in the School of Business or School of Media and Public Affairs.

PSPR 6210. Special Topics in Public Relations. 3 Credits.

.

PSPR 6211. Strategy and Practice for Nonprofit and Association Communications. 3 Credits.

This course is designed to help communicators currently working # or hoping to work # in trade associations and nonprofit organizations become more effective in the planning and execution of their programs. By its very nature, this course will be practical and reality#based, with guest speakers drawn from many organizations and communications backgrounds. In the context of this class, effective communications means understanding the goals, environments, structures, constraints, opportunities and challenges facing associations and nonprofit organizations, and developing and implementing communication plans to achieve those goals. Effective also means working within the limitations communicators often face, such as (but by no means limited to): dwindling budgets, divided membership, fragmented boards and hesitant leadership, the decline of traditional news media, the rise of blogs, the surge of social media and more. In short, "effective" means being strategic, proactive, and smart. But while these attributes are necessary, they are not sufficient. Effective communicators must understand the roles communications play – internal as well as external – for their organizations. They must know the organization's stakeholders and understand their "care and feeding." In short, they must understand their institutional roles – and the expectations of their internal and external stakeholders and audiences. Restricted to students in the MPS strategic public relations degree program; permission of the program director may be substituted. Prerequisites: PSPR 6201, PSPR 6202, PSPR 6203, PSPR 6204, PSPR 6205 and PSPR 6206.

PSPR 6221. Consumer Behavior. 3 Credits.

PSPR 6222. Multicultural Marketing. 3 Credits.

PSPR 6223. Public Opinion and Political Socialization. 3 Credits.

The process by which people become engaged in public debates and politics; how they acquire and maintain attitudes, biases, and beliefs, and the decisions they make as a result. Discussion centers on the forces that influence public opinion and political socialization, including the power of the press and its impact on our major institutions. Prerequisites: PSPR 6201 and PSPR 6202.

PSPR 6224. Global Public Relations and Public Affairs: Strategy and Practice. 3 Credits.

How global public relations strategies are developed and implemented to support advocacy efforts; communications theories that enable insight into challenges arising from differences in language, culture, politics, and economics worldwide.

PSPR 6225. Nonprofit and Association Communications Strategies. 3 Credits.

How communicators working in trade associations, nonprofit organizations, and labor unions become more effective in the planning and execution of their programs to achieve organizational goals.

PSPR 6226. Digital Communication Platforms and Strategies. 3 Credits.

Theories and approach to digital communications and review of major digital platforms used by companies, government agencies, nonprofits and associations to accomplish strategic communications goals and objectives.

PSPR 6227. Applied Digital Communications for Public Relations and Public Affairs Professionals. 3 Credits.

In-depth and holistic study of digital communications using case studies and collaborative exercises; how to blend creative writing with graphics production, social media management with audience segmentation, and digital advertising channels with analytics.

PSPR 6230. Crisis and Issues Management. 3 Credits.

The intersection of communications and policy disciplines, including environmental scanning, public policy analysis, public policy advocacy, strategic communications, media relations, grassroots mobilization, coalition management and corporate reputation management. How these issues work together to further the broad strategic goals of organizations.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF SUSTAINABLE URBAN PLANNING

The master of professional studies (MPS) in sustainable urban planning degree program is dedicated to helping students acquire the skills they need to face the challenges of modern urbanization, both in the United States and around the globe. The program offers an array of high-level theoretical, philosophical, and historical courses in planning, urban issues, and new technological approaches that aim to prepare new planning professionals for success in the burgeoning field. Above all, the program gives students the ability to use their ideas to help forge better cities.

The complete sequence of classes required for the master’s degree is offered each calendar year, including the summer session, and students may enroll on a full- or part-time basis.

The program also offers a graduate certificate in sustainable urban planning (p. 1136), which is designed for students who are not in need of a complete master’s degree. If a student who successfully completes the certificate program wishes to continue their studies, all credits earned for the certificate may be applied toward degree requirements for the MPS.

The Sustainable Urban Planning Master’s Degree is accredited by the Planning Accreditation Board (PAB). (<https://www.planningaccreditationboard.org/index.php?id=30/>) This is a high academic standard that recognizes professional planning programs in North America on the basis of performance, integrity, and quality. Successful completion of this program may reduce the time required to become certified through the American Institute of Certified Planners.

Visit the program website (<http://cps.gwu.edu/master-professional-studies-sustainable-urban-planning-0/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 33 credits in required courses and 15 credits in elective courses.

Code	Title	Credits
Required		
PSUS 6201	Principles of Sustainable Urban and Regional Planning	
PSUS 6202	Urban and Environmental Economics	
PSUS 6203	Research Methods: Geospatial and Econometric Analysis	
PSUS 6204	Land Use Law	
PSUS 6210	Transportation Planning in City Systems	
PSUS 6211	Regional Development and Agricultural Economics	
PSUS 6212	Sustainable Communities I: Housing and Design	
PSUS 6220	Planning Resilient and Low-Carbon Cities	
PSUS 6221	The Scientific Basis of Climate Change	
PSUS 6230	Sustainable Community Design Studio	
PSUS 6233	Capstone in Sustainable Urban Planning	
Electives		
15 credits in elective courses selected from the following:		
FINA 6290	Special Topics	
PSUS 6213	Advanced Research Methods Individual Mentoring	
PSUS 6214	Food and Cities	
PSUS 6215	Urban Health Impact Assessment	
PSUS 6216	Megacities in a Globalized World	
PSUS 6218	Urban Growth and Affordable Housing	
PSUS 6223	Sustainable Communities II Tools for Assessment and Transformation	
PSUS 6224	Sustainable Energy for Cities and the Environment	

PSUS 6225	Sustainable Building: Energy Demand, Efficiency, and Supply
PSUS 6231	Practicum: Climate Change Management and Policy
PSUS 6235	Advanced Topics in Urban Sustainability
PSUS 6236	International Studio in Sustainable Urban Planning
PSUS 6260	Introduction to Sustainable Design
PSUS 6261	Ecology of the Built Environment
PSUS 6262	Tools for Sustainable Design
PSUS 6264	Native Plants I
PSUS 6265	Native Plants II
PSUS 6266	Ecological Restoration
PSUS 6268	Sustainable Design Methods

FACULTY

Director S. Whitehead

For faculty information visit the program website (<https://cps.gwu.edu/sustainable-urban-planning-master-professional-studies/>).

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSUS 6201. Principles of Sustainable Urban and Regional Planning. 3 Credits.

The environmental, social, and economic elements of sustainability. Present and future challenges, including environmental management, energy policy, financial crises, global warming, inequality, public education, third and first world slums, the success and failure of nations, urban agriculture, urban economics, and more. The implications of sustainable development and conducting research based on evidenced-based policy. Students focus on the work of researchers outside of the planning field as they write a series of research essays containing reviews of relevant scientific literature.

PSUS 6202. Urban and Environmental Economics. 3 Credits.

The application of neoclassical economics to problems faced by practitioners of the field of sustainable urban and regional planning. Key economic concepts including supply and demand, consumption and production, markets and market failure, and measurement of environmental and other non-market commodities. An economist's perspective on the principals and methods for understanding urban and environmental challenges and solutions, urban growth, environmental quality, public policy, and other issues fundamental to contemporary development.

PSUS 6203. Research Methods: Geospatial and Econometric Analysis. 3 Credits.

Developing proficiency in geographic information systems (GIS) and econometric analysis; building and analyzing spatial datasets using ArcGIS and Stata statistical software.

PSUS 6204. Land Use Law. 3 Credits.

Understanding the legal context of land use planning as it applies to contemporary issues. The role of land use law in shaping the urban context and its implications for policy and practice.

PSUS 6210. Transportation Planning in City Systems. 3 Credits.

Transportation planning with long-run goals in mind, including reducing greenhouse gas emissions. The role of planning at local and regional scales within the broader framework of transportation engineering.

PSUS 6211. Regional Development and Agricultural Economics. 3 Credits.

The economics of land use patterns and development processes in the United States and elsewhere in the world. Introduction to the field of agricultural economics and examination of food deserts and other food-related problems relevant to the field of sustainable urban planning.

PSUS 6212. Sustainable Communities I: Housing and Design. 3 Credits.

Community development with a focus on policy and the various sectors of interest that affect contemporary urbanization. How policies, planning techniques, and implementation strategies form the core work of planning practitioners. Topics include water supply, food deserts, public health, and urban resilience. Pathways to more sustainable communities are explored through the policy arenas in which key decisions are made; key sectors that make up the fabric of communities; and special topics that have emerged as critical challenges for sustainable community development.

PSUS 6213. Advanced Research Methods Individual Mentoring. 3 Credits.

Builds on research skills learned in PSUS 6203. Students in the sustainable urban planning program work one-on-one with a faculty member of their choice on a project of joint design. Prerequisite: PSUS 6203.

PSUS 6214. Food and Cities. 3 Credits.

Examines agricultural systems, food production, consumption, and trade, and their links to urbanization, city growth, and public health, through lenses of history, technology, economic theory, geography, and public policy. The course explores the roles that food plays in the lives of urban inhabitants, and in shaping the urban landscape, and the role of cities in determining the geography, sustainability, and business of agriculture.

PSUS 6215. Urban Health Impact Assessment. 3 Credits.

Examines the relationship between the allied fields of urban planning and public health. Addresses the link between the built environment and various health outcomes and the value added incorporating health concerns into the planning and design processes.

PSUS 6216. Megacities in a Globalized World. 3 Credits.

Research-oriented course in which students identify, analyze, and recommend ways of addressing land use change and economic development within one of the world's megacities.

PSUS 6218. Urban Growth and Affordable Housing. 3 Credits.

Real estate economics, with an emphasis on urban growth and affordable housing; the process and outcome of economic development and the relationship between economic development and sustainable urban planning.

PSUS 6220. Planning Resilient and Low-Carbon Cities. 3 Credits.

International perspectives on urban planning, taking into consideration increased global temperatures resulting from greenhouse gas emissions-induced climate change. The course is taught with reference to the findings of the Intergovernmental Panel on Climate Change (IPCC) and considers how urbanization around the world must adapt to the reality of global warming and its consequences.

PSUS 6221. The Scientific Basis of Climate Change. 3 Credits.

The science underlying climate change policy and decision making. Earth systems, climate change projections, the need for mitigation, and impact assessment. Designed for non-scientists.

PSUS 6222. Climate Change Economics. 3 Credits.

Energy use in built environments with an emphasis on fundamental drivers of energy demand, strategies to promote energy efficiency, and essential features of energy supply; the relationship between energy demand and supply in development.; how advances in construction technology can help counter greenhouse gas emissions.

PSUS 6223. Sustainable Communities II: Tools for Assessment and Transformation. 3 Credits.

Builds on PSUS 6212 by further detailing the theory and tools relevant to the assessment and transformation of neighborhood and communities. Geospatial analysis explore the fundamental drivers of urban form, advanced transportation systems, theories of change, and various impact assessment tools used to inform policy implementation.

PSUS 6224. Sustainable Energy for Cities and the Environment. 3 Credits.

Resource management and renewable energy technologies. Vulnerabilities of existing urban structures, particularly the energy grid. Implications of and solutions to energy-related problems likely to arise in present and future cities.

PSUS 6230. Sustainable Community Design Studio. 3 Credits.

Students gain practical experience by applying research skills and creativity to analyze and resolve a real-world urban issue.

PSUS 6231. Practicum:ClimateChangeMgt&Pol. 3 Credits.

PSUS 6233. Capstone in Sustainable Urban Planning. 3 Credits.

The SUP Capstone is a self-paced project specific to individual students, conducted under the supervision of a faculty member/s of the student's choice. The capstone is a significant piece of research that ties the student's broader experience in the Sustainable Urban Planning Program together – and brings their cumulative learning to bear on a research question / topic / project of their choice and definition. The capstone is intended to be a piece of exemplary work that the student can use to help them get to the "next level." That is, the capstone is a project that demonstrates the students capabilities and ability to work independently – it might be used, for example, as a sample of work in the job application process. Capstone projects may take the form of academic research papers; applied policy briefs; posters; executive training courses; and more. The capstone is no less (and no more) than a full semester's worth of intensive work on a particular project; it is NOT a thesis, as defined by the George Washington University. Ideally, the capstone project is of sufficient quality that it is worth of being presented at a meeting of the American Planning Association (local chapter or national meeting) or other relevant professional context.

PSUS 6235. Advanced Topics in Urban Sustainability. 3 Credits.

PSUS 6236. International Studio in Sustainable Urban Planning. 3 Credits.

International immersion designed to promote an international exchange of research and scholarship on sustainable urban development and provide instruction on operating in a foreign setting.

PSUS 6260. Introduction to Sustainable Design. 2 Credits.

PSUS 6261. Ecology of the Built Environment. 2 Credits.

PSUS 6262. Tools for Sustainable Design. 3 Credits.

PSUS 6264. Native Plants I. 2 Credits.

PSUS 6265. Native Plants II. 1 Credit.

PSUS 6266. Ecological Restoration. 1 Credit.

PSUS 6268. Sustainable Design Methods. 2 Credits.

PSUS 6269. Sustenance and the Landscape. 2 Credits.

PSUS 6270. Sustainable Design Charrette. 3 Credits.

Preparation of a final project that demonstrates students' understanding of how to select and use sustainable site principles in a landscape design. Building and expanding upon techniques learned in previous coursework, students show comprehension of how their project site has boundaries within its surrounding ecosystem, but is still part of a larger life cycle. Students work in a concentrated charrette format to develop a site design that is fully sustainable and buildable.

CERTIFICATE PROGRAMS

Graduate certificates

The College of Professional Studies offers the following graduate certificates. In addition to those listed, graduate certificates in political management and strategic governance and in strategic communications campaigns are offered in Spanish to closed cohorts of students in Latin America and in Spain.

- California paralegal studies (p. 1133)
- Community advocacy (p. 1133)
- Digital communications (p. 1133)
- Digital politics (p. 1134)
- Global public relations (p. 1134)
- Health care corporate compliance (p. 1135)
- PACs and political management (p. 1135)
- Paralegal studies (p. 1135)
- Sustainable urban planning (p. 1136)

Additional information is available on the College of Professional Studies website (<https://cps.gwu.edu>).

GRADUATE CERTIFICATE IN CALIFORNIA PARALEGAL STUDIES

The graduate certificate in California paralegal studies is a 24-credit credential that complies with the law mandating that paralegals practicing in California must possess certain credentials. This certificate includes a highly recommended course on California law, practice, and ethics.

Visit the program website (<https://cps.gwu.edu/paralegal-studies-graduate-certificates/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 24 credits, including 18 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
PSLX 6210	American Jurisprudence	
PSLX 6211	Legal Research and Writing	
PSLX 6212	Litigation	
PSLX 6223	Contracts	
PSLX 6224	Advanced Legal Writing	
PSLX 6225	Business Entities	

Two courses from the following:	
PSLX 6214	Administrative Law
PSLX 6215	Government Contracts Law
PSLX 6226	International Law
PSLX 6227	Intellectual Property Law
PSLX 6228	California Law and Practice

FACULTY

Director T. Marsh
For faculty information visit the program website (<https://cps.gwu.edu/paralegal-studies-graduate-certificates/>).

GRADUATE CERTIFICATE IN COMMUNITY ADVOCACY

The graduate certificate in community advocacy program is designed for public affairs and advocacy professionals interested in updating their digital communications and grassroots organizing skills. Students in the program learn to understand and employ grassroots techniques to mobilize citizens to seek policy outcomes at the state and local levels. They also learn how to generate digital content and create social media campaigns on behalf of their professional affiliation or organization.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
PMGT 6402	Applied Political Communications	
PMGT 6410	Grassroots Engagement	
PMGT 6470	Digital Content Creation	
PMGT 6472	Maximizing Social Media	

GRADUATE CERTIFICATE IN DIGITAL COMMUNICATIONS

The graduate certificate in digital communications program is designed for public relations professionals interested in updating their digital communications skills. Students in the program learn to apply digital and social media platforms to the fields of strategic public relations and advocacy; create and implement complex multiplatform and multimedia strategic communications programs in a digital environment; integrate

digital communications into a comprehensive communications strategy; and evaluate digital communications.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
PSPR 6201	Strategic Public Relations: Principles and Practice	
PSPR 6204	Media Relations in a Digital World	
PSPR 6226	Digital Communication Platforms and Strategies	
PSPR 6227	Applied Digital Communications for Public Relations and Public Affairs Professionals	

GRADUATE CERTIFICATE IN DIGITAL POLITICS

Digital platforms and high-tech tools that assist with political fundraising, grassroots organizing, and policy issue advocacy have become central to success in politics, and especially in electoral campaigns. The graduate certificate in digital politics teaches students how to master the world of online communications, advertising, social media networking, and fundraising. In the rapidly changing world of politics, this certificate targets students seeking to gain expertise in the most current tools and tactics.

Visit the program website (<https://gspm.gwu.edu/digital-politics/>) for additional information

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 9 credits in required courses and 9 credits in elective courses

Code	Title	Credits
Required		
PMGT 6402	Applied Political Communications	
PMGT 6403	Political Data and Analytics	
PMGT 6452	Digital Strategy	
Electives		
9 credits from the following:		

PMGT 6440 Targeting and Voter Contact

PMGT 6468 Digital Advertising and Action

PMGT 6470 Digital Content Creation

PMGT 6472 Maximizing Social Media

Visit the program website (<https://gspm.gwu.edu/digital-politics/>) for additional information.

GRADUATE CERTIFICATE IN GLOBAL PUBLIC RELATIONS

Designed for working professionals, the global public relations graduate certificate program provides students with the strategic and tactical skills needed to excel in the challenging world of global public relations. The six-course, 18-credit program includes a global perspective residency. Coursework completed in the certificate program can be applied to the master of professional studies in the field of strategic public relations or in the field of political management (p. 1127)

Visit the program website (<https://gspm.gwu.edu/global-public-relations/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses; or, with the advisor's approval, 12 credits in required courses and one 3-credit elective.

Code	Title	Credits
Required		
PMGT 6402	Applied Political Communications	
PMGT 6403	Political Data and Analytics	
PSPR 6204	Media Relations in a Digital World	
PSAD 6270	International Public Relations and Global Advocacy	
PSAD 6200	Global Perspective Residencies	
Electives		
In lieu of one required course, students may take, with the program director's approval, a 3-credit elective selected from the curricula of the graduate certificate in strategic public relations, legislative affairs, or political management programs or from another GW school or college.		

GRADUATE CERTIFICATE IN HEALTH CARE CORPORATE COMPLIANCE

Designed for professionals working in the field of health care compliance or who aspire to work in the field, the 12-credit graduate certificate program provides students with a uniquely comprehensive view of health care corporate compliance. Drawing from GW's Department of Health Policy in the Milken Institute School of Public Health and a leading health care law firm in Washington, DC, the program offers education in health care laws and regulations as well as tools and strategies for creating effective corporate compliance programs. As the center of federal health care policy and enforcement, the District provides the ideal backdrop for study, allowing unparalleled access to experts in the field, including current and former regulators and policymakers, and other compliance professionals.

Visit the program website (<https://cps.gwu.edu/healthcare-compliance/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
PSHC 6201	Introduction to Health Care Corporate Compliance	
PSHC 6202	Compliance with Laws and Regulations I	
PSHC 6204	Compliance with Laws and Regulations II	
PSHC 6206	Case Studies in Health Care Corporate Compliance	

See CPS regulations (p. 1102) for additional information regarding enrollment status, grade-point average requirements, and time limits.

FACULTY

Director J. Thorpe

For faculty information visit the program website (<https://cps.gwu.edu/healthcare-corporate-compliance/>).

GRADUATE CERTIFICATE IN PACS AND POLITICAL MANAGEMENT

This unique graduate certificate teaches the fundamentals required to effectively run an organization's Political Action

Committee (PAC). The challenges of coordinated political action and campaign finance uncertainty make it more important than ever that professionally trained and savvy leaders manage PACs. The program is designed to give PAC managers the skills necessary to successfully tackle the daunting realities of political finance and action.

Visit the program website (<https://gspm.gwu.edu/pacs-and-political-management/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 15 credits, including 3 credits in a required course and 12 credits in elective courses.

Code	Title	Credits
Required		
LGAF 6234	PACs and Congress	
Electives		
Two political management courses selected from the following:		
PMGT 6410	Grassroots Engagement	
PMGT 6412	Issues Management	
PMGT 6450	Rules, Laws, and Strategy	
PMGT 6454	Fundraising and Budgeting	
PMGT 6472	Maximizing Social Media	
Two legislative affairs courses selected from the following:		
LGAF 6202	Legislative Politics	
LGAF 6222	Parties and Elections	
LGAF 6224	Interest Group Politics	
LGAF 6260	Special Topics: Domestic Policy	

See CPS regulations (p. 1102) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN PARALEGAL STUDIES

The graduate certificate in paralegal studies is designed for students who wish to enter the paralegal profession; the certificate is universally recognized as the standard entry-level credential. GW's approach is academic and practical, emphasizing leadership and teamwork, written and oral communication skills, ethics, and time management in addition to substantive law and legal technology skills.

Visit the program website (<https://cps.gwu.edu/paralegal-studies-graduate-certificates/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
PSLX 6210	American Jurisprudence	
PSLX 6211	Legal Research and Writing	
PSLX 6212	Litigation	
PSLX 6223	Contracts	
PSLX 6224	Advanced Legal Writing	
PSLX 6225	Business Entities	

See CPS regulations (p. 1102) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN SUSTAINABLE URBAN PLANNING

The graduate certificate in sustainable urban planning is tailored to students seeking a credential in the field, but who are not in need of a complete master's degree. If a student wishes to continue their studies, all credits earned for this certificate may be applied toward degree requirements for the master of professional studies in the field of sustainable urban planning. (p. 1129)

Visit the program website (<https://cps.gwu.edu/sustainable-urban-planning/graduate-certificate-sustainable-urban-planning/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 12 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
PSUS 6201	Principles of Sustainable Urban and Regional Planning	
PSUS 6202	Urban and Environmental Economics	
PSUS 6210	Transportation Planning in City Systems	

PSUS 6211

Regional Development and Agricultural Economics

Electives

6 credits in elective Professional Studies Urban Sustainability (PSUS) courses

See CPS regulations (p. 1102) for additional information regarding enrollment status and time limits.

GRADUATE SCHOOL OF POLITICAL MANAGEMENT

The Graduate School of Political Management, through the College of Professional Studies, offers the master of professional studies in the fields of political management, legislative affairs, and strategic public relations. Each program has a prerequisite of a bachelor's degree with a minimum *B* grade-point average from an accredited college or university and is subject to the CPS regulations (<https://cps.gwu.edu>) that appear under the respective programs. In addition, graduate certificate programs are offered in digital politics, public relations, PACs and political management, and global public relations. The master of professional studies in political communication and governance; and graduate certificates in both political management and strategic governance, and strategic communications and campaigns are offered in Spanish to closed cohorts of students in Latin America and in Spain.

GRADUATE

Master's programs

- Master of Professional Studies in the field of legislative affairs (p. 1116)
- Master of Professional Studies in the field of political management (p. 1119)
- Master of Professional Studies in the field of political communication and governance (offered only in Spanish) (p. 1119)
- Master of Professional Studies in the field of strategic public relations (p. 1127)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Political Management (PMGT) (p. 1705)
- Legislative Affairs (LGAF) (p. 1627)
- Professional Studies Public Relations (PSPR) (p. 1739)

MILKEN INSTITUTE SCHOOL OF PUBLIC HEALTH

Dean *L.R. Goldman*

Senior Associate Dean *A. Hyder, J.H. Thorpe*

Associate Deans *L. Abrams, G. Gray, E. Migliaccio*

Assistant Deans *E. Beck, H. Renault, M. Partsch, S. Wilensky*

Executive Deans *S. DiLorenzo*

Executive Associate Dean *N. Kazeem*

The Milken Institute School of Public Health (GWSPH) was formally established on July 1, 1997, as the first school of public health in Washington, DC. Located on the Foggy Bottom campus of the George Washington University, it remains the only public health school in the nation's capital. When the GWSPH opened its doors, it brought together a number of academic programs from across the University, including the signature master of public health (MPH) degree, which was then offered in the School of Medicine and Health Sciences. The founding of the GWSPH was an opportunity to integrate these disparate public health programs and build a preeminent school whose purpose is to educate future public health leaders and practitioners. The vigor and enthusiasm that created the vision for the school has been rekindled as the institution solidifies its place as a world-renowned hub for science, learning, research, community engagement, and applied practice.

GWSPH faculty and students are tackling some of public health's biggest problems through groundbreaking research. Whether by studying vectors and microbiomes to prevent infectious outbreaks and antimicrobial resistance in state-of-the-science laboratories and genomic core, or by working with government and community partners to end the HIV epidemic in the District of Columbia, or by using big data and environmental surveillance to study the impact of climate change, GWSPH is changing the world through the research it does, the students it educates, and the practice and policies it transforms.

GWSPH enrolls more than 2,000 students, who come from nearly every U.S. state and many other nations to pursue undergraduate, graduate, and doctoral-level degrees in public health. Seven departments form the school: Biostatistics and Bioinformatics, Environmental and Occupational Health, Epidemiology, Exercise and Nutrition Sciences, Global Health, Health Policy and Management, and Prevention and Community Health.

Mission

GWSPH advances population health, wellbeing, and social justice locally, nationally, and globally by:

- Applying public health knowledge to enhance policy, practice, and management;
- Conducting rigorous, basic, applied, and translational research; and,

- Educating the next generation of public health leaders, policymakers, practitioners, scientists, advocates, and managers.

Vision

Healthier and safer communities powered by public health.

Values

GWSPH shares the following core values:

- Achieving excellence in all endeavors;
- Promoting a culture of service that respects the contributions of all members of its community;
- Embracing social justice and diversity as we work to realize health equity for all individuals and communities, however they are identified;
- Aspiring to innovative, ethical and evidence-based policy, research, practice, management, and pedagogy; and
- Engaging in sustainable practices that promote healthy environments

Accreditation

The public health programs of the Milken Institute School of Public Health (GWSPH) are fully accredited by the Council on Education for Public Health (CEPH). In 2016, GWSPH was awarded a seven-year accreditation through July 1, 2023. The program in health administration is fully accredited by the Commission on Accreditation of Healthcare Management Education (CAHME). GWSPH is a member of the Association of Schools and Programs of Public Health (ASPPH).

- Independent Study Course Requirements (p. 1143)
- Graduation (p. 1143)

Undergraduate Regulations

Graduation Requirements

Depending on the Milken Institute SPH degree program, students must complete 120 to 124 credits to earn their degrees. Students in the BS in exercise science and nutrition science degree programs must have a minimum cumulative GPA of 2.5 in courses in the exercise science or nutrition science core respectively; those in the BS in public health program must have a minimum overall cumulative GPA of 2.5. The University General Education Requirements are listed under each program's requirements tab in this Bulletin.

While degrees are awarded at the end of each semester, formal commencement ceremonies occur only in May. Students are eligible to graduate only after they have completed all degree requirements and have no financial obligations to the University. Students may include degree designations (BS, MS, MPH, MHA, DrPh, or PhD) after their name only when they have completed all degree requirements.

Enrollment Status

Once entered in an undergraduate degree program, students are expected to be registered continuously during all fall and spring semesters and to be engaged actively in fulfilling the requirements for their degree.

- During the summer session, students do not have to be enrolled unless they are graduating during the summer; in this case, they should register for Continuous Enrollment.
- Some additional activities, such as study abroad programs, qualify as continuous enrollment.

Degree students who need to interrupt active pursuit of the degree may petition to take a leave of absence for a period of no more than one calendar year during their program. Students who discontinue active enrollment in degree studies without being granted a leave of absence, or students who are

granted a leave but do not return to active study at the close of the period of approved absence, are no longer in status and must apply for readmission and be subject to the regulations and program requirements then in effect. Readmission to any program is a competitive process and not guaranteed.

Advising

Students are responsible for building a support system to help ensure their own academic success. Each student is assigned an professional academic advisor who may assist not only with academic counseling, but also in areas ranging from understanding University requirements to finding campus resources to help individual students connect with the GW the community. Faculty mentors, tutors, and/or counselors also should be part of the support system. The Center for Career Services and The Writing Center offer walk-in and by-appointment assistance. Personal counseling and other individualized services are available through Mental Health Services, Disability Support Services, Multicultural Student Services Center, and International Services Office.

Milken Institute SPH students may pursue a double major, either within the Milken Institute SPH or across the University.

Students in the exercise science and nutrition science majors who earn a grade of *D+* or below in the first course of a sequence (such as EXNS 1110 or EXNS 2111) **may not** take the second course in the sequence in the following semester. Students must earn a *C-* or above in the first course before taking the second course in the sequence. Please see your advisor for more information.

Timely Progress Toward the Degree

Students who fail to make adequate and timely progress toward the degree, through repeated leaves of absence or repeated failure to complete an appropriate number of credits per semester, may be dismissed from the University (see Right to Dismiss Students under University Regulations). Students dismissed on these grounds may apply for readmission after supplying sufficient evidence of academic promise. Additionally, students must attain grades no lower than *C-* in required major field courses. If a student receives a grade of *D+*, *D*, or *D-* in a course specifically required for the major, the student is required to repeat the course until a satisfactory grade (*C-* or above) is earned. For the BS in public health program, this requirement applies to all courses that apply to the major, including required courses, pre-requisites for required courses, and elective coursework. Once the student has completed the course with a satisfactory grade, credits earned the first time the course was taken count toward the minimum number of credits required for the major. Credits earned toward the repetition do not count toward the degree.

Incompletes

Conditions under which the symbol *I*, Incomplete, may be assigned are described under **University Regulations**. In the Milken Institute SPH, the conditions for granting a notation

of / must be documented in a **written contract** between the faculty member and the student, to be submitted prior to the last day of the term. The incomplete work must be completed as specified in the contract but no later than six months from the end of the semester in which the course was taken. If work for the course is not completed within the designated time, the grade is converted automatically to a grade of *F*. In cases of well-documented extenuating circumstances, an instructor and a student may jointly petition the dean for additional time in which to complete the work of the course.

Pass/No Pass Option

Junior or senior students in good standing may, with the permission of the instructor and program director, take one course each semester for a grade of *P*, Pass, or *NP*, No Pass. No student is allowed to take more than a total of four courses on a *P/NP* basis under this regulation. Students may, however, also receive grades of *P/NP* in courses that are graded only on that basis. Courses required for the University General Education Requirement or in the student's major or minor field (including those courses required for the major that are offered by other departments) may not be taken on the *P/NP* basis. A transfer student may not choose this option until the second semester of enrollment in the University. Under no circumstances may a student change from *P/NP* status to graded status, or vice versa, after the end of the eighth week of class. The Milken Institute SPH and the University do not allow LSPA courses to be counted toward the degree.

Academic Workload

To encourage academic performance of high quality, the Milken Institute SPH limits the number of credits an undergraduate student may register for in a given semester to 17. However, after freshman year, students who wish to request approval for a course overload may do so. Requests are reviewed based on prior academic performance. Students must be in good academic standing and have no pending incomplete grades, or grades of *F*, *W*, or *Z* from the previous semester. Permission to take a workload of 18+ credits requires the written approval of the faculty advisor. Permission to take a workload of 18+ credits may be granted for full-time students who, during the immediately preceding semester, have received no grades below *B-* and have earned grades of *A* or *A-* in three courses totaling at least 9 credits with the written approval of a dean. Undergraduates taking more than 18 credits per semester are charged at the rate of 1 credit for each credit exceeding that limit.

Applying for Readmission to a Program

Undergraduate students who previously were registered in a SPH program but who did not register during the immediately preceding semester (summer sessions excluded) are out of status and must apply for readmission by completing an admissions petition. Filing the petition does not guarantee that the student will be readmitted. Milken Institute SPH departments are responsible for readmitting students and can do so only if the student is not in violation of other

Milken Institute SPH or University policies. Students who have attended one or more academic institutions while absent from this University must have complete, official transcripts from each institution sent directly to the Milken Institute SPH Office of Admissions. Applicants for readmission are considered on the basis of policies and program requirements currently in effect and if readmitted, are subject to the policies and program requirements then in effect.

International Students--Less than Full-Time Status

International students on an F-1 or J-1 Visa are responsible for enrolling as a full-time student (minimum 12 credits for undergraduate students) for spring and fall semesters according to U.S. Immigration and Naturalization rules governing registration requirements. In certain circumstances, a reduced workload may be allowed; students should contact the International Services Office (<http://internationalservices.gwu.edu/>) to request approval for this exception.

Special Honors

In addition to meeting the general requirements stated under University Regulations, a candidate for graduation with Special Honors in exercise science and nutrition science must have a minimum GPA of 3.5 in required courses in the major and a minimum overall GPA of 3.25. The candidate must submit an honors paper and give a presentation on the findings. The student is recommended for graduation with special honors only if a committee of at least two faculty members approves the final products. Students interested in pursuing special honors should contact their academic advisor and program director early in the program to ensure that all requirements for special honors are met in a timely manner.

Independent Study Course Requirements

Independent study is designed to provide the student with an opportunity to gain or enhance public health knowledge and to explore an area of interest related to public health research or the delivery and/or administration of health services. Forms and instructions for registration are available online (<http://publichealth.gwu.edu/academics/forms/>). Independent study projects may not be used as a substitute for an available required or elective course and may not cover substantially the same subject matter that is available in a required or elective course.

Preparation for Medical School

A student who plans to apply to medical school fulfills the general requirements of their program. The pre-health advisors in the Columbian College Office of Undergraduate Studies (prehealth@gwu.edu) provide advice about academic preparation for medical school. For admission to most medical schools, the student must earn a bachelor's degree that includes the following coursework: Biology—8 credits of introductory biology, including laboratory. Students

who receive credit for AP biology must complete 8 credits of upper-level biology coursework, including laboratory; chemistry—8 credits of general inorganic chemistry, including laboratory; organic Chemistry—8 credits, including laboratory; biochemistry—3 credits; physics—8 credits, including laboratory; and English—6 credits in introductory English composition courses (fulfilled by the University Writing Program). Many medical schools have additional entrance requirements, which may include courses in biochemistry, genetics, and mathematics; even when such courses are not required, they are strongly recommended. With the exception of the specified requirements, applicants are urged to follow their personal interests in developing their course of study.

Preparation for Law School

A broad liberal arts education is the best undergraduate preparation for law school. Students are encouraged to use elective credit to increase the breadth of their program of study. Advice about academic preparation for law school is provided by the pre-law advisor in the Columbian College Office of Undergraduate Studies (<https://advising.columbian.gwu.edu/>).

Other Regulations

Other regulations applicable to undergraduate students of the University can be found under University Regulations (<http://bulletin.gwu.edu/university-regulations/>).

Graduate Regulations

The Milken Institute SPH provides an online Graduate Student Handbook (<http://publichealth.gwu.edu/pdf/Handbook.pdf>), which contains additional updated information on policies, regulations, and other matters of concern to enrolled or admitted students. It is the responsibility of the student to be aware of the information contained in both this Bulletin and the Handbook. Students should also consult departmental handbooks and guidelines.

Enrollment Status

Once entered in a graduate degree program, students are expected to be registered continuously during all fall and spring semesters and engaged actively in fulfilling the requirements for the degree.

During the summer session, students do not have to be enrolled unless they are graduating during the summer; in this case, they should register for Continuous Enrollment.

- Some additional activities, such as Master's International, qualify as continuous enrollment.

Degree students who need to interrupt active pursuit of the degree may petition to take a Leave of Absence for a period of no more than one calendar year during the their program. Students who discontinue active enrollment in degree studies without being granted a leave of absence, or students who

granted a leave but does not return to active study at the close of the period of approved absence, are no longer in status and must apply for readmission and be subject to the regulations and program requirements then in effect. Readmission to any program is a competitive process and not guaranteed.

Advising

Students are responsible for building a support system to help ensure their own academic success. Each student is assigned a faculty advisor who may assist not only with academic counseling, but also in areas ranging from understanding University requirements to finding campus resources to help individual students connect with the GW the community. Other members of the faculty, professional advisors, tutors, and/or counselors also should be part of the support system. The University Career Center (<http://publichealth.gwu.edu/services/career-center/>) and Writing Center (<http://www.gwu.edu/%7Egwriter/>) offer walk-in and by-appointment assistance. Personal counseling is available through the office of the Dean of Student Affairs (<http://students.gwu.edu/>), Mental Health Services (<http://counselingcenter.gwu.edu/>), Disability Support Services (<https://disabilitysupport.gwu.edu/>), the Multicultural Student Services Center (<https://mssc.gwu.edu/>), and the International Services Office (<https://internationalservices.gwu.edu/>).

Academic Standing

Graduate students who are not suspended, on academic probation, or under extended provisional admission status are considered to be in good standing. Maintenance of a minimum GPA of 3.0 is required for the degree. All courses taken for graduate credit after matriculation as a degree candidate—including those the Milken Institute SPH transferred in from non-degree status, but excluding those audited or taken for the grade of CR/NC—are used to calculate the GPA.

Transfer Credits

Graduate students may be eligible to transfer up to 12 graduate credits from an accredited university if they have not been applied to a previous graduate degree. External credits must have been earned within the last 3 years with a grade of B (3.0) or better in each transferred course. SPH graduate certificate students may be eligible to transfer as many credits as meet program requirements—up to 18 credits—to a master's degree. SPH graduate certificate students wishing to transfer to a degree program may apply to do so via the online change of concentration petition after completion of 3 or more courses and a cumulative GPA of 3.0 or above, however only courses earning a B or better are eligible to be transferred.

Provisional Admission

Graduate program applicants with credentials that are weaker than expected for graduate study, but who nonetheless show promise of successful graduate work, occasionally are granted provisional admission by the Milken Institute SPH Admissions Committee. While on provisional admission status, students are required to see their advisors each semester prior to

registration. Provisionally admitted graduate students must demonstrate their ability to maintain a minimum GPA of 3.0 in the first 9 credits of coursework attempted, and during this time are not allowed to receive an Incomplete or a grade lower than a B; provisionally admitted students who meet these requirements are granted good standing. Provisionally admitted students who do not meet these requirements are subject to suspension.

Semester Warning

Graduate students whose cumulative GPA is below 3.0 after attempting a minimum of 1 credit and a maximum of 8 credits are issued a warning at the end of the semester and are required to take corrective measures, such as meeting with their academic advisor to outline steps to raise the GPA.

Probation

Graduate students whose cumulative GPA falls below 3.0 at any point after completing 9 credits are placed on probation. This probation extends through the period in which the student next attempts up to 12 credits of work, including prescribed courses. A student's program may be restricted by the program director if deemed necessary. During this period, the student's performance is monitored to determine suitability for continued study. A student who fails to raise the cumulative GPA to 3.0 or above during the period of probation is subject to suspension. Incompletes and grades of B- or below are not permitted during the probationary period and are grounds for automatic suspension. A student who is subject to probation for a second time at any point during their degree program may be suspended automatically.

Grade of F

Graduate students who receive a grade of F are subject to suspension. If such students wish to remain enrolled, they must present cause, for consideration by the dean and the director of their degree program, as to why continued study should be permitted. Once a grade of F is earned in a core, required, or elective course, it remains a part of the student's permanent record and is calculated into the GPA. A graduate student who receives the grade of F in a core or other required course and is permitted to continue in graduate studies must repeat the course and achieve a minimum grade of B. The repetition does not, however, expunge the grade of F, which remains part of the student's record. If the student receives a grade below B in the repeated course, they are suspended from the degree program.

Suspension

Graduate student who receive an F or do not meet the conditions of probation are subject to suspension. Suspended students may not register for or complete any courses at The George Washington University. The dean, in consultation with the student's academic advisor, may continue a student on probation (in lieu of suspension) if satisfactory progress is demonstrated during the probationary period, and sufficient evidence of academic promise, by way of a statement of

appeal, is offered by the student. A student who is suspended or withdraws under these conditions may apply for readmission after one semester. To be readmitted, the student must submit evidence that suggests the probability of academic success. A student who is readmitted continues on academic probation and must achieve a minimum GPA of 3.5 in the next 12 credits of graduate study. Should the student fail to achieve this GPA, he or she is suspended and will not be readmitted.

Timely Progress Toward the Degree

A graduate student who fails to make adequate and timely progress toward the degree, through repeated leaves of absence or repeated failure to complete an appropriate number of credits per semester, may be suspended. Students suspended on these grounds may apply for readmission after supplying sufficient evidence of academic promise.

Summary of Academic Standing Policies for Graduate Students

- **Provisional Admission**—A student who receives a grade of I or of B- or below while on provisional admission status is subject to suspension.
- **Semester Warning**—A student with a cumulative GPA below 3.0 (with fewer than 9 credits completed) must take corrective action.
- **Academic Probation**—A student with a cumulative GPA below 3.0 (with 9 or more credits completed) is placed on academic probation. A student on academic probation who receives an unacceptable grade (B-, C, F, I, Z) or fails to raise the cumulative GPA to 3.0 within the next 12 credits taken is subject to suspension.
- **Grade of F**—A student who receives a grade of F is subject to suspension. If a student wishes to remain enrolled they must present cause as to why continued study should be permitted. If permitted to continue in graduate studies, the student must repeat the course (if core or required) and achieve a minimum grade of B.
- **Suspension**—A student who is suspended may not register for or complete any courses at GW. A student who is suspended or withdraws under these conditions may apply for readmission after one semester.

Incompletes

Incompletes - Conditions under which the symbol I, Incomplete, may be assigned are described under University Regulations (<http://bulletin.gwu.edu/university-regulations/>). In the Milken Institute SPH, the conditions for granting a notation of I must be documented in a written contract (<https://publichealth.gwu.edu/content/incomplete-course-grade-contract/>) between the faculty member and the student, to be submitted prior to the last day of the term. The incomplete work must be completed as specified in the contract but no later than six months from the end of the semester in which the course was taken. If work for the course is not completed within the designated time, the grade is converted automatically to a grade of F. In cases of well-documented

extenuating circumstances, an instructor and a student may jointly petition the dean for additional time in which to complete the work of the course.

In Progress (IP)

The notation In Progress (*IPG*) is assigned for all thesis, residency, advanced reading, independent study, culminating experience, practicum, and dissertation research courses until the coursework is completed. Upon the satisfactory completion, the grade replaces the notation *IPG* on the transcript. An *IPG* may not be assigned to regular, semester-length courses.

Applying for Readmission to a Program

Students Who Have Taken Classes Within the Past Year:

Milken Institute SPH graduate degree or certificate students who were previously registered in the university but did not register during the immediate preceding semester/module (excluding summer sessions) are out of status and must apply for readmission by completing an admissions petition. (<http://publichealth.gwu.edu/academics/forms/>)

Students Who Have Not Taken Classes in More Than a Year:

Students who have not taken any courses at GW in more than one year must apply for readmission using SOPHAS Express (<https://sophasexpress.liaisoncas.com>).

Students Who Have Been Suspended:

Students who were suspended from the Milken Institute SPH must apply for readmission through SOPHAS Express (<https://sophasexpress.liaisoncas.com>). Students may only apply for readmission after at least one academic year has passed. Students should consult with the advisor concerning readmission requirements.

International Students---Less than Full-Time Status

International students on an F-1 or J-1 Visa are responsible for enrolling as full-time student (minimum 9 credits for graduate students) for the spring and fall semesters according to the U.S. Immigration and Naturalization rules governing registration requirements. Under certain circumstances, a reduced workload may be allowed. To request approval for a course reduction, students should submit the F-1/J-1 Request for Reduced Course Load Form (<https://internationalservices.gwu.edu/forms-handouts/>). More information is available by calling the ISO at (202) 994-4477.

Independent Study Course Requirements

Independent study is designed to provide students with an opportunity to gain or enhance public health knowledge and to explore an area of interest related to public health research or the delivery and/or administration of health services. Instructions and forms required for registration (<http://publichealth.gwu.edu/academics/forms/>) are available. Independent study projects may not be used as a substitute for an available required or elective course and may not cover

substantially the same subject matter that is available in a required or elective course.

Graduation

While degrees are awarded at the end of each semester, formal commencement ceremonies occur only in May. Students are eligible to graduate only after they have completed all degree requirements and have no financial obligations to the University. Students may include degree designation (BS, MS, MPH, MHA, DrPh, or PhD) after their name only when they have completed all degree requirements.

Other Regulations

Other regulations applicable to graduate students of the University can be found under University Regulations. (<http://bulletin.gwu.edu/university-regulations/>)

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in exercise science (p. 1146)
- Bachelor of Science with a major in exercise science, pre-athletic training/sports medicine concentration (p. 1149)
- Bachelor of Science with a major in exercise science, pre-medical professional concentration (p. 1152)
- Bachelor of Science with a major in exercise science, pre-physical therapy concentration (p. 1155)
- Bachelor of Science with a major in nutrition science (p. 1158)
- Bachelor of Science with a major in public health (p. 1160)

Combined program

- Dual Bachelor of Science in public health and Master of Public Health

Minors

- Minor in bioinformatics (p. 1165)
- Minor in exercise science (p. 1165)
- Minor in nutrition science
- Minor in public health

MASTER'S

Master of Public Health

- Master of Public Health in the field of biostatistics (p. 1171)
- Master of Public Health in the field of community oriented primary care (p. 1173)
- Master of Public Health in the field of environmental health science and policy (p. 1175)
- Master of Public Health in the field of epidemiology (p. 1177)
- Master of Public Health in the field of global environmental health (p. 1178)

- Master of Public Health in the field of global health program design, monitoring, and evaluation (p. 1184)
- Master of Public Health in the field of global health policy (p. 1181)
- Master of Public Health in the field of global health epidemiology and disease control (p. 1180)
- Master of Public Health in the field of health policy (p. 1185)
- Master of Public Health in the field of health promotion (p. 1187)
- Master of Public Health in the field of humanitarian health (p. 1188)
- Master of Public Health in the field of maternal and child health (p. 1190)
- Master of Public Health in the field of physical activity in public health (p. 1192)
- Master of Public Health in the field of public health communication and marketing (p. 1194)
- Master of Public Health in the field of public health nutrition (p. 1195)
- Master of Public Health (MPH@GW) (p. 1197)

Master of Science

- Master of Science in the field of biostatistics (p. 461)
- Master of Science in the field of epidemiology (p. 1200)
- Master of Science in the field of exercise science with a concentration in strength and conditioning (p. 1201)
- Master of Science in the field of public health microbiology and emerging infectious diseases (p. 1203)
- Master of Science in the field of management of health informatics and analytics (p. 1202)

Master of Health Administration

- Master of Health Administration (p. 1168)
- Master of Health Administration (MHA@GW) (p. 1170)

Specialist program

- Health Services Administration Specialist (p. 1215)

Combined programs

- Dual Doctor of Medicine and Master of Public Health (p. 1204)
- Dual Master of Arts in any Elliott School graduate program and Master of Public Health (p. 998)
- Dual Master of Health Administration and graduate certificate in health care corporate compliance (p. 1206)
- Dual Master of Public Health in the field of health policy and graduate certificate in health care corporate compliance (p. 1206)

- Dual Master of Science in Health Policy and graduate certificate in health care corporate compliance (p. 1207)
- Joint Master of Science in Health Sciences in the field of physicians assistant and Master of Public Health (p. 1207)
- Joint Juris Doctor or Master of Laws and Master of Public Health or SPH graduate certificate (p. 1214)

DOCTORAL

Doctoral programs

- Doctor of Philosophy in the field biostatistics (p. 1217)
- Doctor of Philosophy in the field of epidemiology (p. 1219)
- Doctor of Philosophy in the field of health policy (p. 1222)
- Doctor of Philosophy in the field of social and behavioral sciences in public health (p. 1223)
- Doctor of Public Health in the field of environmental and occupational health (p. 1224)
- Doctor of Public Health in the field of global health (p. 1226)
- Doctor of Public Health in the field of health behavior (p. 1227)
- Doctor of Public Health in the field of health policy (p. 1229)

Combined programs

- Dual Doctor of Medicine and Graduate Certificate in Public Health (p. 1230)
- Dual Doctor of Medicine and Master of Public Health (p. 1204)
- Joint Juris Doctor or Master of Laws and Master of Public Health or SPH graduate certificate (p. 1214)

CERTIFICATES

Certificate Programs

- Graduate certificate in health administration generalist (p. 1231)
- Graduate certificate in health policy (p. 1232)
- Graduate certificate in public health (p. 1232)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

The letters and range of numbers below indicate the department in which the course is offered.

- PUBH 6000 - 6099: MPH Core & MPH@GW Program-Specific Courses
- PUBH 6100 - 6199: Environmental and Occupational Health Courses
- PUBH 6200 - 6299: Epidemiology and Biostatistics Courses
- PUBH 6300 - 6399: Health Policy Courses
- PUBH 6400 - 6499: Global Health Courses
- PUBH 6500 - 6599: Prevention and Community Health Courses
- PUBH 6600 - 6699: Public Health Nutrition and Miscellaneous Courses
- PUBH 8000 - 8999: Doctoral Level Courses
- EXNS 6000 - 6999: Exercise Science Courses
- HSML 6200 - 6299: Health Services Management and Leadership Courses

- Exercise and Nutrition Sciences (EXNS) (p. 1522)
- Health and Wellness (HLWL) (p. 1561)
- Health Services Management and Leadership (HSML) (p. 1570)
- Lifestyle, Sports, and Physical Activity (LSPA) (p. 1628)
- Public Health (PUBH) (p. 1754)

UNDERGRADUATE PROGRAMS

Bachelor's programs

- Bachelor of Science with a major in exercise science (p. 1146)
- Bachelor of Science with a major in exercise science, pre-athletic training/sports medicine concentration (p. 1149)
- Bachelor of Science with a major in exercise science, pre-medical professional concentration (p. 1152)
- Bachelor of Science with a major in exercise science, pre-physical therapy concentration (p. 1155)
- Bachelor of Science with a major in nutrition science (p. 1158)
- Bachelor of Science with a major in public health (p. 1160)

Combined program

- Dual Bachelor of Science in public health and Master of Public Health

Minors

- Minor in bioinformatics (p. 1165)
- Minor in exercise science (p. 1165)
- Minor in nutrition science
- Minor in public health

BACHELOR OF SCIENCE WITH A MAJOR IN EXERCISE SCIENCE

Program Director B. Westerman

The bachelor of science with a major in exercise science degree program prepares individuals for careers in medicine and other health related professions including athletic training/sports medicine, physical therapy, physician's assistant or nursing, exercise physiology and rehabilitation, sport psychology as well as fitness and health promotion.

Students in the exercise science major may select the pre-medical professional concentration (for those planning to enter a medical, physician assistant, or nursing program upon graduation), the pre-physical therapy concentration, or the pre-athletic training/sports medicine concentration. The exercise science major also may be taken without a concentration.

REQUIREMENTS

The following requirements must be fulfilled:

124 credits and maintenance of a minimum grade point average of 2.5 in the exercise science core requirements.

University General Education Requirement*

Code	Title	Credits
------	-------	---------

University General Education Requirement (26 credits)

UW 1020	University Writing
or HONR 1015	Honors Seminar: UW 1020: Origins and Evolution of Modern Thought

Two writing in the disciplines (WID) courses (may also be counted in another category).

One critical or creative analysis in the humanities course.

One quantitative reasoning course. For exercise science and nutrition science majors, must be satisfied with STAT 1051 or STAT 1053 or STAT 1127 .

One scientific reasoning course with laboratory experience. For exercise science and nutrition science majors, must be satisfied with either BISC 1111 or BISC 1115 and BISC 1125.

Two critical, creative, or quantitative analysis in the social sciences courses. For exercise science and nutrition science majors, must be satisfied with ANTH 1002 or ANTH 1003 or ANTH 1004; and COMM 1040 or COMM 1041 .

A list of approved courses can be found on the University General Education Requirements (p. 43) page.

BACHELOR OF SCIENCE WITH A MAJOR IN EXERCISE SCIENCE, PRE-ATHLETIC TRAINING/SPORTS MEDICINE

Program Director B. Westerman

The bachelor of science with a major in exercise science degree program prepares individuals for careers in medicine and other health related professions including athletic training/ sports medicine, physical therapy, physician’s assistant or nursing, exercise physiology and rehabilitation, sport psychology as well as fitness and health promotion.

Students in the exercise science major may select the pre-medical professional concentration (for those planning to enter a medical, physician assistant, or nursing program upon graduation), the pre-physical therapy concentration, or the pre-athletic training/sports medicine concentration. The exercise science major may also be taken without a concentration.

REQUIREMENTS

The following requirements must be fulfilled:

124 credits and maintenance of a minimum grade point average of 2.5 in the exercise science core requirements.

University General Education Requirement*

BACHELOR OF SCIENCE WITH A MAJOR IN NUTRITION SCIENCE

Program Director A. Sylvetsky Meni

Nutrition science is the study of how nutrients and food components influence growth, metabolism, health, and disease and also includes human behavior as it relates to food choices. It is a multi-faceted and cross-disciplinary field, encompassing chemistry, biology, physiology, and public health. Nutrition scientists work to develop, extend, and apply all aspects of nutrition through research to improve clinical practice and public health.

The mission of the bachelor of science with a major in nutrition science program is to provide undergraduate students with an in-depth understanding of the scientific aspects of food and nutrition. The program also aims to lay the groundwork for integrating nutrition science across disciplines and provides students with the foundation required to apply nutrition to the health sciences.

REQUIREMENTS

The following requirements must be fulfilled: 124 credits and maintenance of a minimum grade point average of 2.5 in the nutrition science core requirements.

Code	Title	Credits
University General Education Requirement (26 credits)		
UW 1020	University Writing	
or HONR 1015	Honors Seminar: UW 1020: Origins and Evolution of Modern Thought	
Two writing in the disciplines (WID) courses (may also be counted in another category).		
One critical or creative analysis in the humanities course.		
One quantitative reasoning course. For exercise science and nutrition science majors, must be satisfied with STAT 1051 or STAT 1053 or STAT 1127 .		
One scientific reasoning course with laboratory experience. For exercise science and nutrition science majors, must be satisfied with either BISC 1111 or BISC 1115 and BISC 1125.		
Two critical, creative, or quantitative analysis in the social sciences courses. For exercise science and nutrition science majors, must be satisfied with ANTH 1002 or ANTH 1003 or ANTH 1004; and COMM 1040 or COMM 1041 .		
A list of approved courses can be found on the University General Education Requirements (p. 43) page.		

Code	Title	Credits
Core courses		
Basic math and science (38 credits)		
BISC 1111	Introductory Biology: Cells and Molecules	
or BISC 1115 & BISC 1125	Introductory Biology: Cells and Molecules and Introduction to Cells and Molecules Laboratory	
BISC 1112	Introductory Biology: The Biology of Organisms	
or BISC 1116 & BISC 1126	Introductory Biology: The Biology of Organisms and Introduction to Organisms Laboratory

*The courses included in the guided electives list have been identified as highly relevant to the BS in nutrition science curriculum; students must take 16 credits in courses from this list. General electives (18 credits) also may be selected from the guided electives list, or any other undergraduate course at the University except LSPA courses.

BACHELOR OF SCIENCE WITH A MAJOR IN PUBLIC HEALTH

Program Director S. Wilensky

The bachelor of science with a major in public health degree program is intended to convey to students technical detail and analytic skills with a liberal arts philosophical base. It has the educational objectives of nurturing critical thinking, analysis, and synthesis of information, and recognizing the historical and societal associations of current trends in public health and health care delivery. While nurturing students' capacity to think analytically and creatively, the program strives to deepen students' commitment to improving the public's health.

Students who began their academic career at GW become eligible to apply to the public health major in the fall semester of their sophomore year. Applicants must have a minimum grade-point average of 3.0.

Visit the program website (<http://publichealth.gwu.edu/programs/public-health-bs/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 120 credits, including 19 credits in University General Education requirements, 30 credits in core public health courses; 3 credits in public health research methods courses, 12 credits in approved public health elective courses, and 56 credits in additional electives.

Code	Title	Credits
Prerequisites		
One of the following prerequisites to PUBH 2110:		
BISC 1005	The Biology of Nutrition and Health	
BISC 1006	The Ecology and Evolution of Organisms	
BISC 1007	Food, Nutrition, and Service	
BISC 1008	Understanding Organisms through Service Learning	

BISC 1111	Introductory Biology: Cells and Molecules		PUBH 2112	Principles of Health Education and Health Promotion	
or BISC 1115 & BISC 1125	Introductory Biology: Cells and Molecules and Introduction to Cells and Molecules Laboratory		PUBH 3130	Health Services Management and Economics	
BISC 1112	Introductory Biology: The Biology of Organisms		PUBH 3131	Epidemiology: Measuring Health and Disease	
or BISC 1116 & BISC 1126	Introductory Biology: The Biology of Organisms and Introduction to Organisms Laboratory		PUBH 3132	Health and Environment	
HONR 1033	Honors Seminar: Scientific Reasoning and Discovery (Biology Only)		PUBH 3133	Global Health and Development	
As a prerequisite to PUBH 2112 and PUBH 3135W:			PUBH 3135W	Health Policy	
PUBH 1101	Introduction to Public Health and Health Services		PUBH 4140W	Senior Seminar	
As a prerequisite to PUBH 3130:			or PUBH 4141	Senior Seminar Community Needs Assessment	
ECON 1011	Principles of Economics I		3-credits in a research methods selective from the following:		
As a prerequisite to PUBH 3131, one semester of statistics (STAT 1127 preferred):			PUBH 3152	Qualitative Research Methods in Public Health	
STAT 1051	Introduction to Business and Economic Statistics		EXNS 3111	Nutrition Science Research Methods	
STAT 1053	Introduction to Statistics in Social Science		ANTH 3531	Methods in Sociocultural Anthropology	
STAT 1111	Business and Economic Statistics I		EHS 2107	Theory and Practice of Research in a Clinical Setting	
STAT 1127	Statistics for the Biological Sciences		PSC 2101	Scope and Methods of Political Science	
As a prerequisite to PUBH 4140W or PUBH 4141, must have taken the research methods selective and the following courses:			PSYC 2101	Research Methods in Psychology	
PUBH 3130	Health Services Management and Economics		SOC 2101	Social Research Methods	
PUBH 3135W	Health Policy		Electives		
Code	Title	Credits	12 credits in approved elective courses from the following:		
Required for the major			(No more than 9 credits may be taken through study abroad programs and/or domestic non-GW courses.)		
Public health core (30 credits)			AMST 3950	Special Topics (Narrative Medicine in American History only)	
PUBH 1101	Introduction to Public Health and Health Services		ANTH 3504	Illness, Healing, and Culture	
PUBH 1102	History of Public Health		ANTH 3513	Anthropology of Human Rights	
PUBH 2110	Public Health Biology		ANTH 6302	Issues in Development	
			BADM 4101	Business Ethics and the Legal Environment	
			BIOC 3560	Diet, Health, and Longevity	
			BISC 3450	Evolutionary Medicine	
			or BISC 3450W	Evolutionary Medicine	

EHS 2107	Theory and Practice of Research in a Clinical Setting
EXNS 1114	Community Nutrition
EXNS 2119	Introduction to Nutrition Science
EXNS 2122	Food Systems in Public Health
EXNS 2123	Nutrition and Chronic Disease
GEOG 1003	Society and Environment
GEOG 2104	Introduction to Cartography and GIS
GEOG 2127	Population Geography
GEOG 2137	Environmental Hazards
HIST 3363	Race, Medicine, and Public Health
HLWL 1106	Drug Awareness
HLWL 1109	Human Sexuality
HONR 2047	Self and Society Seminar (Medicine and Society only)
HONR 2047	Self and Society Seminar (Gender, Race, and Science only)
HSCI 2101	Psychosocial Aspects of Health and Illness (Residential delivery only)
HSCI 2105	Current Issues in Bioethics (Residential delivery only)
IAFF 2190W	Special Topics (Science, Policy, and Technology only)
PHIL 2124	Philosophies of Disability
PHIL 2281	Philosophy of the Environment
PSYC 3128	Health Psychology
PSYC 3199	Current Topics in Psychology (Substance Abuse and Addictions only)
PSYC 4202W	Research Lab in Applied Social Psychology (Discrimination and Health only)
PUBH 2113	Impact of Culture upon Health
PUBH 2114	Environment, Health, and Development
PUBH 2117	Service Learning in Public Health
PUBH 3115	Global Health and Human Rights
PUBH 3116	Global Health Systems Performance

PUBH 3136	Health Law
PUBH 3137	Global Public Health Nutrition
PUBH 3150	Sustainable Energy and Environmental Health
PUBH 3151	Current Issues in Bioethics
or PUBH 3151W	Current Issues in Bioethics
PUBH 3199	Topics in Public Health
PUBH 3201	Introduction to Bioinformatics
PUBH 4201	Practical Computing
PUBH 4202	Bioinformatics Algorithms and Data Structures
STAT 2118	Regression Analysis
STAT 2183	Intermediate Statistics Lab/Packages
or STAT 2183W	Intermediate Statistical Laboratory: Statistical Computing Packages

Students must take all required courses at GW unless an exception is granted by the GWSPH Dean of Undergraduate Programs. Permission is granted only if there are strong extenuating circumstances that call for such an exception.

Students must comply with policies and procedures as outlined in University and SPH regulations. Students should pay particular attention to SPH requirements for completing human research training, completing 8 hours of professional enhancement activities, and passing the academic integrity quiz.

DUAL BACHELOR OF SCIENCE IN PUBLIC HEALTH AND MASTER OF PUBLIC HEALTH

Program Director S. Wilensky

Program Advisor K. Pinto

The Milken Institute School of Public Health accepts a small number of outstanding students who demonstrate academic excellence and a strong commitment to public health into its dual bachelor of science in public health (p. 1160) and master of public health (p. 1143) (BS/MPH) degree program each year. The program is designed to help students become public health leaders who are committed to lifelong learning and improving the health and well-being of local, national, and international communities.

The BS/MPH program allows students to take up to 9 graduate credits as part of their undergraduate degree, thereby decreasing the number of credits normally required for

the master's degree. The program is appropriate for pre-professional students who are interested in public health issues. Current public health undergraduate students may apply to the program after their sophomore or junior academic year. Interested students may apply to any of the MPH programs.

Visit the program website (<http://publichealth.gwu.edu/programs/public-health-bsmph/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 155 credits, including 19 credits in University General Education requirements; 34 credits in public health core courses including 10 graduate crossover credits; 9 credits in undergraduate public health electives; 58 credits in additional electives; and 35 credits in selected program-specific and graduate electives.

Credit Distribution

Code	Title	Credits
Public health core requirements and graduate substitutions		
Undergraduate public health core courses (21 credits):		
PUBH 1101	Introduction to Public Health and Health Services

or STAT 2183W Intermediate Statistical Laboratory: Statistical Computing Packages

Code	Title	Credits
------	-------	---------

Additional MPH core required courses (11 credits):

(beyond crossover noted above)

PUBH 6002	Biostatistical Applications for Public Health
-----------	---

PUBH 6009	Fundamentals of Public Health Program Evaluation
-----------	--

PUBH 6021	Essentials of Public Health Practice and Leadership I
-----------	---

PUBH 6022	Essentials of Public Health Practice and Leadership II
-----------	--

PUBH 6023	Interprofessional Education Experience
-----------	--

PUBH 6015	Culminating Experience (or other CE or Capstone for specific MPH program)
-----------	---

Refer to the program guide for the BS,Public Health-MPH joint program for specific rules about substitutions that may be applicable and course scheduling issues. Also, the relevant MPH program guide is the best source of information for program-specific graduation requirements. The Undergraduate Advisors are available to support individual curriculum planning.

Graduation requirements:

1. Total credits requirement: 155 undergraduate and graduate credits.
2. Course requirements: Successful completion of the undergraduate degree, graduate core courses, and program-specific courses.
3. An overall 3.0 (*B*) grade-point average in graduate-level coursework is required.
4. Time limit requirement: Degrees must be completed within seven years of the date accepted to the program.
5. Transfer credit policy: In accordance with undergraduate and graduate established policies- see student handbooks.
6. Students must comply with all policies and procedures outlined in University Regulations (p. 27), SPH regulations and the SPH Undergraduate Handbook.

MINOR IN BIOINFORMATICS

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 12 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required

MINOR IN EXERCISE SCIENCE

REQUIREMENTS

The following requirements must be fulfilled: 13 credits in required courses plus two elective courses to total 18 to 21 credits.

Code	Title	Credits
Required (13 credits)		
EXNS 1103	Professional Foundations in Exercise Science	
EXNS 1110	Applied Anatomy and Physiology I	
EXNS 1111	Applied Anatomy and Physiology II	
EXNS 2111	Exercise Physiology I	
Electives		
Two courses from the following (minimum 5 credits):		
EXNS 1118	Sport and Nutrition	
EXNS 2110	Injury Prevention and Control	
EXNS 2112	Exercise Physiology II	
EXNS 2113	Kinesiology	
EXNS 2116	Exercise and Health Psychology	
EXNS 2119	Introduction to Nutrition Science	
EXNS 3110	Field Experience - Exercise and Nutrition Sciences	

Note: Students in the BS in exercise science program (all tracks) are not eligible to declare a minor in exercise science.

MINOR IN NUTRITION SCIENCE

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 9 credits in required courses and 9 credits in elective courses.

Code	Title	Credits
Required (9 credits)		
EXNS 2114	Nutrition Sciences I	
EXNS 2115	Nutrition Sciences II	
EXNS 2124	Lifecycle Nutrition	
Electives (9 credits)		
Three courses from the following, at least two of which must be at the 2000 level or above:		
EXNS 1114	Community Nutrition	
EXNS 1118	Sport and Nutrition	
EXNS 2120	Assessment of Nutritional Status	
EXNS 2122	Food Systems in Public Health	
EXNS 2123	Nutrition and Chronic Disease	
EXNS 3111	Nutrition Science Research Methods	
GEOG 2133	People, Land, and Food	
PUBH 3137	Global Public Health Nutrition	

MINOR IN PUBLIC HEALTH

Program Director S. Wilensky

The following requirements must be fulfilled: 18 credits, including 9 credits in required courses and 9 credits in elective courses.

Code	Title	Credits
Required (9 credits)		
PUBH 1101	Introduction to Public Health and Health Services	
PUBH 3131	Epidemiology: Measuring Health and Disease (one semester of STAT prerequisite- STAT 1127 preferred)	
PUBH 3133	Global Health and Development *	
Electives (9 credits)		

Any PUBH course (excluding PUBH 4140W and PUBH 4141) or any course from the School of Public Health's approved PUBH elective course list from the bachelor of science in public health program. In addition, students may take up to 3 elective credits from the SPH approved study abroad or non-GW course lists.*

AMST 3950	Special Topics (Narrative Medicine in American History only)
ANTH 3504	Illness, Healing, and Culture
ANTH 3513	Anthropology of Human Rights
ANTH 6302	Issues in Development
BADM 4101	Business Ethics and the Legal Environment
BIOC 3560	Diet, Health, and Longevity
BISC 3450	Evolutionary Medicine
or BISC 3450W	Evolutionary Medicine
EHS 2107	Theory and Practice of Research in a Clinical Setting
EXNS 1114	Community Nutrition
EXNS 1199	Topics in Exercise and Nutrition Sciences (Nutrition and Disease only)
EXNS 2119	Introduction to Nutrition Science
EXNS 2122	Food Systems in Public Health
EXNS 2123	Nutrition and Chronic Disease
GEOG 1003	Society and Environment
GEOG 2104	Introduction to Cartography and GIS
GEOG 2127	Population Geography
GEOG 2137	Environmental Hazards
HIST 3363	Race, Medicine, and Public Health
HLWL 1106	Drug Awareness
HLWL 1109	Human Sexuality
HONR 2047	Self and Society Seminar (Medicine and Society or Gender, Race and Science only)
HSCI 2101	Psychosocial Aspects of Health and Illness
HSCI 2105	Current Issues in Bioethics (Residential delivery only)

IAFF 2190W	Special Topics (Science, Policy and Tech only)
PHIL 2124	Philosophies of Disability
PHIL 2281	Philosophy of the Environment
PSYC 3128	Health Psychology
PSYC 3199	Current Topics in Psychology (Substance Abuse and Addictions only)
PSYC 4202W	Research Lab in Applied Social Psychology (Discrimination and Health only)
PUBH 2113	Impact of Culture upon Health
PUBH 2114	Environment, Health, and Development
PUBH 2117	Service Learning in Public Health
PUBH 3115	Global Health and Human Rights
PUBH 3116	Global Health Systems Performance
PUBH 3136	Health Law
PUBH 3137	Global Public Health Nutrition
PUBH 3150	Sustainable Energy and Environmental Health
PUBH 3151W	Current Issues in Bioethics
PUBH 3152	Qualitative Research Methods in Public Health
PUBH 3199	Topics in Public Health
PUBH 3201	Introduction to Bioinformatics
PUBH 4201	Practical Computing
PUBH 4202	Bioinformatics Algorithms and Data Structures
STAT 2118	Regression Analysis
STAT 2183	Intermediate Statistics Lab/Packages
or STAT 2183W	Intermediate Statistical Laboratory: Statistical Computing Packages

*Advising documents are maintained by and available from the SPH Undergraduate Advisors.

Note: Public Health minors may only double count one course across their minor and their majors(s) or another minor.

MASTER'S PROGRAMS

Master of Public Health

- Master of Public Health in the field of biostatistics (p. 1171)
- Master of Public Health in the field of community oriented primary care (p. 1173)
- Master of Public Health in the field of environmental health science and policy (p. 1175)
- Master of Public Health in the field of epidemiology (p. 1177)
- Master of Public Health in the field of global environmental health (p. 1178)
- Master of Public Health in the field of global health program design, monitoring, and evaluation (p. 1184)
- Master of Public Health in the field of global health policy (p. 1181)
- Master of Public Health in the field of global health epidemiology and disease control (p. 1180)
- Master of Public Health in the field of health policy (p. 1185)
- Master of Public Health in the field of health promotion (p. 1187)
- Master of Public Health in the field of humanitarian health (p. 1188)
- Master of Public Health in the field of maternal and child health (p. 1190)
- Master of Public Health in the field of physical activity in public health (p. 1192)
- Master of Public Health in the field of public health communication and marketing (p. 1194)
- Master of Public Health in the field of public health nutrition (p. 1195)
- Master of Public Health (MPH@GW) (p. 1197)

Master of Science

- Master of Science in the field of biostatistics (p. 461)
- Master of Science in the field of epidemiology (p. 1200)
- Master of Science in the field of exercise science with a concentration in strength and conditioning (p. 1201)
- Master of Science in the field of public health microbiology and emerging infectious diseases (p. 1203)
- Master of Science in the field of management of health informatics and analytics (p. 1202)

Master of Health Administration

- Master of Health Administration (p. 1168)
- Master of Health Administration (MHA@GW) (p. 1170)

Specialist program

- Health Services Administration Specialist (p. 1215)

Combined programs

- Dual Doctor of Medicine and Master of Public Health (p. 1204)
- Dual Master of Arts in any Elliott School graduate program and Master of Public Health (p. 998)
- Dual Master of Health Administration and graduate certificate in health care corporate compliance (p. 1206)
- Dual Master of Public Health in the field of health policy and graduate certificate in health care corporate compliance (p. 1206)
- Dual Master of Science in Health Policy and graduate certificate in health care corporate compliance (p. 1207)
- Joint Master of Science in Health Sciences in the field of physicians assistant and Master of Public Health (p. 1207)
- Joint Juris Doctor or Master of Laws and Master of Public Health or SPH graduate certificate (p. 1214)

MASTER OF HEALTH ADMINISTRATION

Program Director R. Bonar

Mission

The master of health administration degree program develops leaders who possess the values, knowledge, and skills to achieve optimal delivery of health care.

Overview

Since its founding in 1959, the master of health administration program (MHA) has offered education in health services administration to help meet the growing need for skilled executives to manage health-related organizations and programs. Because it recognizes and responds to the fast-paced, dynamic changes occurring in the industry today, the program is well-positioned to prepare not only health care managers, but the health care leaders of tomorrow. An MHA degree from the Department of Health Policy and Management incorporates business and medical informatics training, knowledge of health care systems, management theory, ethics, law, and policy, critical values in decision making, and much more.

The program's special strengths include an emphasis on experiential learning and community service, distinguished faculty, research collaborations, and relationships with policymaking and health care organizations in Washington, DC. Active alumni (<http://publichealth.gwu.edu/services/alumni/HSML-alumni/>) and student (<http://publichealth.gwu.edu/projects/hsml-student-association/>) associations foster mentoring, networking, and other professional development opportunities.

The curriculum focuses on leadership and strategic management trends, quality and performance improvement, leadership skills, community health planning and advocacy, organizational theory, finance, and health law. The program also offers residency and internship opportunities that allow students to apply their classroom knowledge in health care settings. Numerous seminar, conference, and networking opportunities are made possible through relationships with professional organizations and associations.

Goals

Graduates of the program are able to:

- Effectively manage organizational change and promote organizational and clinical excellence.
- Manage health services organizations under alternative financing mechanisms.
- Lead and manage human resources in diverse organizational environments.
- Manage information resources to assist in effective decision making and clinical management.
- Use statistical, quantitative, and economic analyses in decision making.
- Have the skills to improve both business and clinical outcomes of health services organizations.

Visit the program website (<https://publichealth.gwu.edu/programs/health-administration-mha/>) for additional program information.

REQUIREMENTS

Prerequisites for admission into the MHA program include an undergraduate course in financial accounting and an introductory course in statistics earned with a minimum grade of B.

The following requirements must be fulfilled: 50 credits, including 31 credits in core courses, a 2-credit health policy selective course, 11 to 14 credits in elective courses, and 3 to 6 credits in field experience.

Students select one of five focus areas. The following two focus areas require 6 credits in a residency to fulfill the field experience requirements: acute and ambulatory care management and post-acute care management (including long-term care). The following three focus areas require 3 credits in an internship to fulfill the field experience requirement: information systems and financial management; operations management; and strategic management and policy.

Code	Title	Credits
Required		
Core		

HSML 6202	Introduction to Health Services Delivery
HSML 6203	Introduction to Health Management
HSML 6204	Quality and Performance Improvement
HSML 6206	QuantMethods&Epid/HealthServices
HSML 6207	Health Services Information Applications
HSML 6208	Medical Informatics
HSML 6209	Health Services Finance
HSML 6210	Health Services Financial Applications
HSML 6211	Health Economics
HSML 6212	Community Health Management and Advocacy
HSML 6213	Health Services, Marketing, and Planning
HSML 6215	Health Law for Managers
HSML 6216	Human Resources Management and Organizational Behavior
HSML 6218	Seminar: Health Services Management and Leadership
HSML 6254	Seminar: Ethics in Health Services Management
PUBH 6080	Pathways to Public Health

Health policy selectives

One health policy course from the following:

PUBH 6315	Introduction to Health Policy Analysis
PUBH 6325	Federal Policymaking and Policy Advocacy
PUBH 6356	State Health Policy
PUBH 6370	Medicare/Medicaid Law and Policy
PUBH 6374	Pharmaceutical Policy
PUBH 6378	HIV Policy in the US
PUBH 6380	Bridging Health Policy and Health Information Technology

Electives

Students whose focus area requires a residency select 11 credits in courses from the following list; students whose focus area requires an internship select 14 credits in courses:

HSML 6231	Management of Acute Care Hospitals
HSML 6236	Aging and Disability: Needs and Services
HSML 6237	Managing the Skilled Nursing Facility
HSML 6238	Ambulatory Care Management
HSML 6244	Supply Chain Management in Health Services
HSML 6245	Disaster Management for Health Care Organizations
HSML 6246	Service Line and Project Management
HSML 6247	Consulting in Health Care
HSML 6263	Advanced Health Financial Applications
HSML 6270	Research in Health Services Administration (Independent Study)
HSML 6285 & HSML 6286	Readings in Health Services Management and Readings in Health Services Management
HSML 6299	Topics in HSML

Field experience

Students select either the residency or internship focus area.

Residency:

Students pursuing the residency focus area in acute and ambulatory care management or post-acute care management (including long-term care) take the following two courses for a total of 6 credits:

HSML 6274	Residency
-----------	-----------

HSML 6275	Residency
-----------	-----------

Internship:

Students pursuing an internship in information systems and financial management, operations management, or strategic management and policy take the following 3-credit course:

HSML 6271	Field Problem Studies
-----------	-----------------------

Graduation Requirements

1. Graduate Credit Requirement: 50 graduate credits are required.
2. Grade Point Requirement: A 3.0 (B average) overall grade-point average is required.
3. Time Limit Requirement: The degree must be completed within five years.

4. Transfer Credit Policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the MHA, upon approval. Credits must have been earned from a CAHME accredited institution in the last three years with a grade-point average of 3.0 or above.
5. Transfer to Degree Program Policy: Up to 18 credits may be transferred to the MHA from the Health Administration Generalist Certificate. Students wishing to transfer to a degree program may apply to do so via the online change of concentration petition after completion of three or more courses and a cumulative GPA of 3.0 or above. A grade of B or above is required for a course to be eligible for transfer. Students interested in applying to an MHA degree program should meet with the program director regarding program-specific admission requirements. Transfer credits must have been completed within the past three years.
6. Residency or Internship Requirement: Successful completion of a 6 credit residency or 3-credit internship.

MASTER OF HEALTH ADMINISTRATION (MHA@GWU)

Program Director L. Friedman

Mission

The Master of Health Administration (MHA@GW) degree program develops transformational leaders who possess the values, knowledge, and skills to advance health and healthcare options.

Overview

The online MHA@GW curriculum focuses on developing the leadership and ethical skills needed for persons who seek to create highly effective health care organizations. The MHA@GW program from the Department of Health Policy and Management incorporates business and medical informatics training, knowledge of health care systems, law, and policy, critical values in decision making, and much more.

The Department's special strengths include an emphasis on experiential learning and community service, distinguished faculty, research collaborations, and relationships with policy making and health care organizations in Washington, DC. Active alumni (<http://smhs.gwu.edu/alumni/>) and student (<http://publichealth.gwu.edu/projects/hsml-student-association/>) associations foster mentoring, networking, and other professional development opportunities.

Building on our 55 years of experience preparing health care leaders and our recent success in e-learning, the MHA@GW degree is designed for adult learners who possess either clinical or administrative experience in health care delivery. The MHA@GW is designed to be completed in two years but can be completed in five years. Classes are taught in a hybrid model combining online classes (ten weeks in length) and on-site, intensive, immersion classes.

The MHA@GW curriculum focuses on two main themes. The first is developing the leadership and ethical skills needed for persons who seek to create highly effective health care organizations. Leadership and ethics are taught throughout the curriculum. Eight online, integrated learning modules include: management and strategy; informatics and decision-science; finance; community and public health; economics and quantitative methods; quality improvement; law and policy; and a capstone seminar. The culminating activities for the MHA@GW are a field-based research project and completion of a leadership portfolio.

Students entering the program are expected to have undergraduate courses in financial accounting and statistics with a grade of B or above.

Goals

Graduates of the program are expected to:

- Manage organizational change and promote organizational and clinical excellence.
- Manage health services organizations under alternative financing mechanisms.
- Lead and manage human resources in diverse organizational environments.
- Manage information resources to assist in effective decision making and clinical management.
- Use statistical, quantitative, and economic analyses in decision making.
- Identify ways to improve both business and clinical outcomes of health services organizations.
- Implement and enforce ethical decision making practices.

Visit the program website (<https://publichealth.gwu.edu/programs/online-masters-health-administration-mha/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 50 credits in required courses, including 9 credits in immersion experiences.

Code	Title	Credits
Core online course requirements		
HSML 6264	Health Care Management and Strategy	
HSML 6265	Medical Informatics and Decision Management	
HSML 6266	Health Care Financial Management	
HSML 6267	Community Engagement	
HSML 6268	Health Economics and Quantitative Methods	

HSML 6269	Quality and Performance Improvement
HSML 6280	Health Law and Policy
HSML 6281	Systems Thinking and Learning
HSML 6282	Organizational Research Project 1
HSML 6283	Organization Research Project 2
PUBH 6080	Pathways to Public Health *
On-site immersion requirements	
HSML 6255	Leadership and Ethics I
HSML 6256	Leadership and Ethics II
HSML 6258	Health System Analysis
HSML 6259	Organization Research Project and Portfolio Presentation

*PUBH 6080 is required only for students who do not have an MPH degree.

Graduation Requirements

1. Graduate Credit Requirement: 50 graduate credits are required.
2. Grade Point Requirement: A 3.0 (B average) overall grade-point average is required.
3. Time Limit Requirement: The degree must be completed within five years.
4. ePortfolio: All MHA@GW students must complete a comprehensive leadership portfolio

MASTER OF PUBLIC HEALTH IN THE FIELD OF BIOSTATISTICS

Program Director H. Hoffman

Mission

The mission of the master of public health in the field of biostatistics degree program is to educate students in the methodological and quantitative skills needed to apply statistical methods to the biological, biomedical, and health services sciences. In addition to enhancing students' capacity to think critically and creatively, the program deepens their commitment to improving the public's health and to engaging in and promoting public service—qualities essential to biostatisticians and public health practitioners.

Goals

The goals of the biostatistics program are to ensure that graduates:

- Understand and adhere to high scientific standards for research.
- Understand how to apply statistical methods to biological/ biomedical sciences and health services.
- Understand and follow guidelines for ethical treatment of research participants.
- Communicate research findings to a lay audience.
- Respect cultural diversity throughout all of the above.

Visit the program website (<https://publichealth.gwu.edu/programs/biostatistics-mph/>) for additional program information.

REQUIREMENTS

To be considered for admission, students must have completed two semesters of college-level calculus through calculus II with a grade of *B* or above.

The following requirements must be fulfilled: 45 credits, including 17 credits in core courses, 19 credits in program-specific courses, 7 credits in elective courses, and a 2-credit culminating experience.

Code	Title	Credits
Required		
Core courses		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health	
PUBH 6009	Fundamentals of Public Health Program Evaluation	
PUBH 6011	Environmental and Biological Foundations of Public Health	
PUBH 6012	Fundamentals of Health Policy	
PUBH 6021	Essentials of Public Health Practice and Leadership I	
PUBH 6022	Essentials of Public Health Practice and Leadership II (Includes Practicum)	
PUBH 6023	Interprofessional Education Experience	
Departmental/program-specific courses		
PUBH 6247	Design of Health Studies	
PUBH 6249	Use of Statistical Packages: Data Management and Data Analysis	

PUBH 6252 Advanced Epidemiology Methods

PUBH 6258 Advanced Topics in Biostatistical Consulting

PUBH 6260 Advanced Data Analysis for Public Health

PUBH 6264 Quantitative Methods

PUBH 6266 Biostatistical Methods

Culminating experience

PUBH 6015 Culminating Experience

Electives

7 credits in any graduate-level SPH courses.

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.
7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate degree may be transferred to the master of public health program. External credits must have been earned from an accredited institution in the last three years with a minimum grade of 3.0 (B) in each course. Students in SPH graduate certificate programs can transfer as many credits earned toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.
8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0 via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.
9. CITI Training requirement: All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington

University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login?destination=node/193/>). within their first semester of study.

11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF COMMUNITY ORIENTED PRIMARY CARE

Program Director C. Rodriguez-Diaz

Mission Statement

The mission of the master of public health (MPH) community-oriented primary care (COPC) program is to train students to become health professionals and public health practitioners in the field of community health. Program graduates partner with the community to create and evaluate evidence-based interventions to improve public health, clinical care outcomes and the patient experience. These reforms contribute to lower health care costs and decreases health disparities.

COPC

The COPC program trains future health care innovators in the methods of COPC which provide skills to conceptualize, implement, evaluate, and disseminate interventions that bridge public health and clinical medicine. COPC begins by teaching practitioners methods to fully understand the needs of communities, health care providers and policy makers. Concurrently, skills are developed to read and interpret literature to inform future intervention design. With this in-depth understanding, COPC practitioners learn to work with stakeholders to prioritize interventions that have a high likelihood of improving health outcomes and patient experience while lowering health care costs and decreasing health disparities. COPC practitioners learn to conduct in-depth assessments, which help to shape intervention design and serve as baseline data to evaluate intervention impact. Acquired Intervention skills include implementation of social marketing campaigns, advocacy campaigns, mobile health interventions, individual brief behavioral interventions, peer interventions, quality improvement projects using data from electronic health records, structural interventions to impact health behaviors, and health system innovations to improve the ability of community based organizations to educate, test, and link to care patients with preventable and chronic health conditions. Evaluation skills are acquired that include analysis of qualitative, quantitative, and cost data. Dissemination skills are acquired to take best practices to scale. Through experiential learning COPC practitioners develop the skills necessary to lead health improvement projects in community, health department, academic, and clinical settings.

Goals

The following are goals of this educational program:

- Provide the knowledge and skills necessary to implement a COPC program.
- Provide an analytical framework for evaluating community-based interventions using the principles and methods of COPC as a reference.
- Provide opportunities for COPC practice, especially within vulnerable communities.
- Create health and public health practitioners with skills necessary to excel in the following positions:
 - Clinic Quality Improvement Specialist (clinic setting)
 - Patient Centered Medical Home team leader (clinic setting)
 - Supervisor of patient care coordination (clinic or MCO setting)
 - Community health specialist (community, clinic or public health setting)
 - Health promotion specialist (community or clinic setting)
 - Supervisor of Community Health Worker program (community or clinic setting)
 - Community Health Research coordinator (academic, clinic or community setting)
 - Director of community clinic or community health organization (With dual health and MPH degree)

Background

COPC provides the bridge between clinical medicine and public health, in which the community is the focal point in the delivery of health care. It provides a conceptual and methodological framework to rationalize, organize, and adapt available resources to the delivery of health services. The methods are essential to the organized delivery of health care in community based practices, organizations engaged in managed care, and responsive governmental health systems.

The basic concepts of COPC were initially implemented in South Africa during the early 1940's by Sidney and Emily Kark with the creation of community health centers. These centers promoted a reorientation of health services at the community level through a unique linkage between individual clinical care and public health. They served as a laboratory for teaching and training health professionals.

Since that time, COPC has been taught and practiced in a number of settings around the world. Significantly, it has been an important element in the Community Health Center movement, the Indian Health Service, and a number of urban health departments in the United States as well as a variety of public health and primary care systems around the world. Developments in computer-based information management, mobile health, geographic information systems, and qualitative information gathering techniques have proved important assets to COPC practice.

The Concept of COPC

The essence of COPC is the planning and delivery of health care to a defined community in response to the defined needs of that community. To do this successfully requires the planned integration of the classical public health roles of health promotion and disease prevention at population levels with the delivery of primary health care, which focuses on the clinical treatment of disease and its sequelae. COPC recognizes that, in line with the World Health Organization definition of health as being far more than the absence of disease, a clinical practice should be responsive to the broad health needs of the community and should be flexible enough to respond to changes in those needs. COPC can be defined as a continuous process by which primary care is provided to a defined community on the basis of its assessed health needs through the planned integration of public health with clinical practice. The COPC program curriculum teaches a six-step process as follows:

1. Community definition
2. Community characterization
3. Problem prioritization
4. Detailed assessment
5. Intervention
6. Evaluation

The overall curriculum is designed to give the learner the necessary public health tools to apply the principles of COPC in the context of community health practice and to be well educated in the disciplines of applied public health.

Visit the program website (<https://publichealth.gwu.edu/programs/community-oriented-primary-care-mph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 6 credits in departmental core courses, 14 credits in program-specific courses, 8 credits in elective courses, and a 2-credit culminating experience.

Code	Title	Credits
Required		
Core courses		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health	

PUBH 6011	Environmental and Biological Foundations of Public Health
PUBH 6012	Fundamentals of Health Policy
PUBH 6021	Essentials of Public Health Practice and Leadership I
PUBH 6022	Essentials of Public Health Practice and Leadership II
PUBH 6023	Interprofessional Education Experience
Departmental courses	
PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6501	Program Evaluation
Program-specific courses	
PUBH 6504	Social and Behavioral Science Research Methods
PUBH 6510	Community-Oriented Primary Care Principles and Practice
PUBH 6512	Community-Oriented Primary Care Policy and Issues
PUBH 6513	Community Health Management
PUBH 6514	Preventing Health Disparities
PUBH 6516	Community Health Information Resources

Electives

8 credits from the following list of recommended courses or any other graduate-level PUBH courses:

HSML 6204	Quality and Performance Improvement
PUBH 6249	Use of Statistical Packages: Data Management and Data Analysis
PUBH 6262	Introduction to Geographic Information Systems
PUBH 6503	Introduction to Public Health Communication and Marketing
PUBH 6530	Qualitative Methods in Health Promotion
PUBH 6531	Health Promotion in Health Care Settings
PUBH 6532	Community Organization, Development, and Advocacy

Culminating experience

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.
7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate degree may be transferred to the master of public health program. External credits must have been earned from an accredited institution in the last three years with a minimum grade of 3.0 (B) in each course. Students in SPH graduate certificate programs can transfer as many credits earned toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.
8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0 via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.
9. CITI Training requirement: All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login?destination=node/193/>). within their first semester of study.
11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF ENVIRONMENTAL HEALTH SCIENCE AND POLICY

Program Director K. Applebaum

Mission

The mission of the master of public health (MPH) in the field of environmental health science and policy degree program is to educate individuals who are committed to improving public health through reducing risks posed by environmental and occupational hazards. In this program, students learn to apply critical and analytic skills to better understand how environmental and occupational exposures impact human health. Graduates bring these skills into the world in order to develop, implement, and evaluate environmental health practices and policies.

Program graduates possess a multidisciplinary knowledge base and skill set that provides them a framework for addressing environmental and occupational health (EOH) issues. They understand three distinct scientific foundations of environmental health in order to:

- Assess and control environmental and occupational exposures;
- Understand the effects of these exposures on human health;
- Interpret epidemiological and other research findings related to environmental risks;
- Analyze policy implications and participate in policy development, implementation, and evaluation; and
- Assess and manage environmental and occupational risks.

Visit the program website (<https://publichealth.gwu.edu/programs/environmental-health-science-and-policy-mph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 17 credits in core courses, 22 credits in program-specific courses, 4 credits in elective courses, a 2-credit culminating experience.

Code	Title	Credits
Required		
Core courses		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	

PUBH 6007	Social and Behavioral Approaches to Public Health
PUBH 6009	Fundamentals of Public Health Program Evaluation
PUBH 6011	Environmental and Biological Foundations of Public Health
PUBH 6012	Fundamentals of Health Policy
PUBH 6021	Essentials of Public Health Practice and Leadership I
PUBH 6022	Essentials of Public Health Practice and Leadership II
PUBH 6023	Interprofessional Education Experience
Program-specific courses	
PUBH 6121	Environmental and Occupational Epidemiology
PUBH 6122	Protecting Public Health and the Environment: Policies, Politics, and Programs
PUBH 6123	Toxicology: Applications for Public Health Policy
PUBH 6124	Risk Management and Communication
PUBH 6126	Assessment and Control of Environmental Hazards
PUBH 6131	Applied Data Analysis in Environmental and Occupational Health

Program-specific electives

A minimum of 4 credits from the following program-specific elective courses:

PUBH 6127	Introduction to Environmental Health Microbiology
PUBH 6128	Global Environmental and Occupational Health
PUBH 6130	Sustainable Energy and the Environment
PUBH 6133	Social Dimensions in Climate Change and Health
PUBH 6135	Researching Climate Change and Human Health
PUBH 6199	Topics in EOH

Additional electives

4 credits in any graduate-level SPH courses. If more than 4 credits in program-specific elective courses are taken, the number of credits required in this category is reduced accordingly.

Culminating experience

PUBH 6137 & PUBH 6138	Environmental and Occupational Health Culminating Experience I and Environmental and Occupational Health Culminating Experience II
-----------------------	--

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.
7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate degree may be transferred to the master of public health program. External credits must have been earned from an accredited institution in the last three years with a minimum grade of 3.0 (B) in each course. Students in SPH graduate certificate programs can transfer as many credits earned toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.
8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0 via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.
9. CITI Training requirement: All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login?destination=node/193/>). within their first semester of study.

11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF EPIDEMIOLOGY

Program Co-Directors M. Magnus, H. Young

Mission

The mission of the master of public health in the field of epidemiology degree program is to help students develop the necessary methodological and quantitative skills to work successfully in the field. While nurturing students' capacity to think critically and creatively, students are encouraged to deepen their commitment to improving the public's health and to engaging in and promoting public service qualities essential for future epidemiologists and public health practitioners.

Goals

The goals of the program are to ensure that graduates:

- Understand and adhere to high scientific standards for research;
- Understand and follow guidelines for ethical treatment of research participants;
- Can communicate research findings to a lay audience; and
- Respect cultural diversity throughout all of the above.

Visit the program website (<https://publichealth.gwu.edu/programs/epidemiology-mph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 17 credits in core courses, 20 credits in program-specific courses, 6 credits in elective courses, and a 2-credit culminating experience.

Code	Title	Credits
Required		
Core courses		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health	

PUBH 6009	Fundamentals of Public Health Program Evaluation
PUBH 6011	Environmental and Biological Foundations of Public Health
PUBH 6012	Fundamentals of Health Policy
PUBH 6021	Essentials of Public Health Practice and Leadership I
PUBH 6022	Essentials of Public Health Practice and Leadership II (Includes Practicum)
PUBH 6023	Interprofessional Education Experience
Departmental courses	
PUBH 6247	Design of Health Studies
PUBH 6249	Use of Statistical Packages: Data Management and Data Analysis
PUBH 6252	Advanced Epidemiology Methods
PUBH 6260	Advanced Data Analysis for Public Health
Program-specific epidemiology foundational courses	
At least two courses (4 credits) from the following:	
PUBH 6237	Chronic Disease Epidemiology
PUBH 6241	Nutritional Epidemiology
PUBH 6242	Clinical Epidemiology and Public Health: Reading the Research
PUBH 6244	Cancer Epidemiology
PUBH 6245	Infectious Disease Epidemiology
PUBH 6248	Epidemiology of Aging
PUBH 6250	Epidemiology of HIV/AIDS
PUBH 6259	Epidemiology Surveillance in Public Health

Program-specific electives

4 credits in Epidemiology/Biostatistics department courses or from following list:

PUBH 6299	Topics in Epidemiology and Biostatistics (Behavioral Epidemiology)
PUBH 6121	Environmental and Occupational Epidemiology
PUBH 6127	Introduction to Environmental Health Microbiology

PUBH 6455	Global Vaccinology
PUBH 6484	Prevention and Control of Vector Borne Diseases
PUBH 6486	Global Health Programs and Approaches to the Control of Infectious Diseases
PUBH 6492	Global Health Programs and Approaches to the Control of Chronic Diseases
EXNS 6208	Physical Activity: Physiology and Epidemiology

Additional electives

6 credits in any graduate-level SPH courses.

Culminating experience

PUBH 6015	Culminating Experience (taken for 2 credits)

11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL ENVIRONMENTAL HEALTH

Program Director Susan Anenberg

Mission

The mission of the global environmental health MPH program – a joint program between the departments of global health and environmental and occupational health – is to prepare professionals to address environmental health risks of global importance, including issues of broad global scale (e.g. affecting public health across national boundaries), as well as traditional public health hazards in resource poor settings.

Visit the program website (<https://publichealth.gwu.edu/programs/global-environmental-health-mp/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 17 credits in core courses, 17 credits in program-specific courses, 9 credits in elective courses, and a 2-credit culminating experience.

Code	Title	Credits
Required		
Core courses		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health	
PUBH 6009	Fundamentals of Public Health Program Evaluation	

PUBH 6011	Environmental and Biological Foundations of Public Health
PUBH 6012	Fundamentals of Health Policy
PUBH 6021	Essentials of Public Health Practice and Leadership I
PUBH 6022	Essentials of Public Health Practice and Leadership II
PUBH 6023	Interprofessional Education Experience
Program-specific environmental and occupational health courses	
PUBH 6121	Environmental and Occupational Epidemiology
PUBH 6126	Assessment and Control of Environmental Hazards
PUBH 6128	Global Environmental and Occupational Health
PUBH 6131	Applied Data Analysis in Environmental and Occupational Health
Program-specific global health courses	
PUBH 6400	Global Health Frameworks
PUBH 6411	Global Health Qualitative Research Methods
PUBH 6435	Global Health Program Development and Implementation

Electives

9 credits in environmental health courses from the following sample list or any graduate-level PUBH course:

PUBH 6123	Toxicology: Applications for Public Health Policy
PUBH 6127	Introduction to Environmental Health Microbiology
PUBH 6130	Sustainable Energy and the Environment
PUBH 6132	Water, Sanitation, and Hygiene (WASH) in Low-Income Countries
PUBH 6133	Social Dimensions in Climate Change and Health
PUBH 6135	Researching Climate Change and Human Health
PUBH 6262	Introduction to Geographic Information Systems

PUBH 6271	Disaster Epidemiology
PUBH 6441	Global Health Organizations and Regulations
PUBH 6480	Public Health in Humanitarian Settings
PUBH 6199	Topics in EOH
Culminating experience	
PUBH 6137	Environmental and Occupational Health Culminating Experience I
PUBH 6138	Environmental and Occupational Health Culminating Experience II

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.
7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate degree may be transferred to the master of public health program. External credits must have been earned from an accredited institution in the last three years with a minimum grade of 3.0 (B) in each course. Students in SPH graduate certificate programs can transfer as many credits earned toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.
8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0 via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.
9. CITI Training requirement: All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH

Source (<https://source.publichealth.gwu.edu/user/login?destination=node/193/>). within their first semester of study.

11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH EPIDEMIOLOGY AND DISEASE CONTROL

Program Director J. Tielsch

Mission

The mission of the Global Health Epidemiology and Disease Control Program is to prepare global health professionals to develop and rigorously appraise programs for the control of infectious and chronic diseases as well as injuries. Students acquire the skills needed to improve program performance, thereby helping to ensure optimum investment of scarce resources in low and middle income countries and in underserved communities around the world.

Goals

The goals of the Global Health Epidemiology and Disease Control Program are to prepare students to be applied epidemiologists in public health program implementation and evaluation to:

- Use common epidemiological tools to generate evidence on interventions targeted to infectious and chronic disease control.
- Work within real-world settings to strengthen methodological rigor of program priority setting and evaluation.
- Generate and use data for assessing burden of disease, determining efficacy and effectiveness of interventions for infectious and chronic diseases.
- Translate evidence to support program and health systems improvements and policy recommendations.
- Communicate the results of research to a broad set of constituents.

Visit the program website (<https://publichealth.gwu.edu/programs/global-health-epidemiologyand-disease-control-mph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 17 credits in core courses, 16 credits in program-specific courses, 10 credits in elective courses, and a 2-credit culminating experience.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH POLICY

Program Director C. Santos-Burgoa

Overview:

master of public health in the field of global health policy (GHP) addresses health challenges of interdependent nations, regions and sectors with multiple cultures, development, capacities and coexistent values. GHP is the area of public health concerned with decisions that translate evidence and political will into authoritative public agreement and intervention. GHP focuses on global and national health systems, including medical care and the public health services. GHP is concerned with the allocation of resources across countries and organizations, and on implementation of programs for solutions to achieve health goals. It considers institutions, authority, organizations, roles of people within such structures, and service arrangements within diverse national and local health systems.

Mission

The mission of the global health policy program is to prepare professionals to assist in public health decision making related to national, regional and worldwide interventions and institutions; to support policy analysis and utilize diverse analytic tools including epidemiology and international comparative policy methods paying particular attention to culture and equity.

These leaders integrate scientific knowledge and global evidence to advise decision making and action by diverse global health systems and other sectors and to provide insight on policies and processes that impact population health all with an emphasis on underserved populations and development.

Goals

The goals of the Global Health Policy Program are to prepare students to be policy analysts, designers and implementers who know how to:

- Assess the burden and determinants of health problems, their social distribution and inequities, and the interdependence of countries.
- Apply common economic, epidemiological, and comparative policy analysis methods and tools for evidence to assess burden of disease, determining efficacy and effectiveness of interventions for global infectious and chronic disease control.
- Use global evidence for local action using systematic reviews and local facts to drive well informed health policy decisions. Translate evidence to support program and health systems policy recommendations.
- Work with other disciplines and with sectors beyond health to develop innovative policy options.
- Develop strong cultural sensitivity and intercultural competency within diverse health and political systems
- Act in global health diplomacy in policy-shaping and negotiations to improve health while strengthening relations among nations.
- Assume leadership roles in the global health policy development process.
- Work with methodological rigor in international policy design, program priority setting and negotiation.
- Communicate the results of research to a culturally broad set of constituents.

Visit the program website (<https://publichealth.gwu.edu/programs/global-health-policy-mpmh/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 17 credits in core courses, 19 credits in program-specific courses, 7 credits in selective courses, and a 2-credit culminating experience.

Code	Title	Credits
Required		
Core courses		
PUBH 6002	Biostatistical Applications for Public Health	3

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH PROGRAM DESIGN, MONITORING, AND EVALUATION

Program Director S. Baird

Mission

The mission of the MPH in the field of global health program design, monitoring, and evaluation degree program is to prepare the next generation of global health professionals to implement and evaluate global health programs and initiatives. This program aims to train professionals who use evidence to improve performance of and investments in global health programs that improve the health and well-being of populations in low and middle income settings abroad and within the United States.

Goals

The goals of the MPH in global health program design, monitoring, and evaluation are to prepare students to be skilled evaluators and practitioners who know how to:

- Utilize the full range of evaluation design options to generate the best evidence on how well a program is working, how it is working, and why;
- Work within real-world confines to strengthen methodological rigor of evaluation and program implementation;
- Use theory to ground program design, implementation, and evaluation;
- Generate and use data for management decision-making; and
- Translate evidence into implementation improvements and policy recommendations.

Visit the program website (<https://publichealth.gwu.edu/programs/global-health-program-design-monitoring-and-evaluation-mph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 18 credits in program-specific courses, 10 credits in elective courses, and a 2-credit culminating experience.

Code	Title	Credits
Required		
Core		
PUBH 6002	Biostatistical Applications for Public Health	

PUBH 6003	Principles and Practices of Epidemiology
PUBH 6007	Social and Behavioral Approaches to Public Health
PUBH 6011	Environmental and Biological Foundations of Public Health
PUBH 6012	Fundamentals of Health Policy
PUBH 6021	Essentials of Public Health Practice and Leadership I
PUBH 6022	Essentials of Public Health Practice and Leadership II

Culminating experience	
PUBH 6015	Culminating Experience

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.
7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate degree may be transferred to the master of public health program. External credits must have been earned from an accredited institution in the last three years with a minimum grade of 3.0 (B) in each course. Students in SPH graduate certificate programs can transfer as many credits earned toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.

8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0 via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.
9. CITI Training requirement: All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login?destination=node/193/>). within their first semester of study.
11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF HEALTH POLICY

Program and Practicum Director L. Cartwright-Smith

Mission Statement

The Department of Health Policy and Management of the Milken Institute School of Public Health is an intellectual and practice-oriented community in the nation's capital dedicated to advancing innovative and effective health policy education, research, and service to improve public health and health services domestically and globally.

We are committed to:

- Offering a cutting-edge, multidisciplinary curriculum that provides students with deep content knowledge and the analytic, communication, and professional skills needed to be the next generation of health policy leaders.
- Conducting rigorous multidisciplinary research that addresses significant health challenges, is objective, and is translated to inform and impact health policy and public health practice.
- Being a trusted resource for shaping and advancing health policy options because of our research rigor, the real-world health policy leadership experiences of our faculty and staff, our deep expertise regarding a wide range of policy issues, and our exceptional students.
- Leveraging our unique location which allows for strong collaborations with health policy leaders and practitioners in Washington, DC.
- Improving the health and health care of underserved and vulnerable populations.

- Learning from the diversity among our faculty, staff, and students in terms of background, experience, and thought.

Overview

The Department of Health Policy and Management is home to health policy studies and research at the Milken Institute SPH. The Department focuses on virtually all facets of U.S. health policy related to both public health and health services, and emphasizes preparing students to understand and analyze health policy matters in a broad, cross-cutting, and real-world context. Among schools of public health, the Milken Institute SPH Department of Health Policy and Management is unique, having been created to take maximum advantage of its location in Washington, DC, the nation's health policymaking epicenter. The MPH in health policy is for students who wish to develop in-depth policy analysis skills for use in various practice settings, including both federal and state levels of government, private-sector health policy consulting, and not-for-profit advocacy. Additionally, this program is available to GW law students through joint JD/MPH and LLM/MPH programs (p. 1214), lawyers seeking to develop expertise in all facets of health policy and practice, and to GW medical students through the dual MD/MPH (p. 1204) and PA/MPH (p. 1044) programs who wish to enhance their clinical training with a thorough understanding of health policy.

Visit the program website (<https://publichealth.gwu.edu/programs/health-policy-mph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 17 credits in core courses, 18 credits in program-specific courses, 8 credits in elective courses, and a 2-credit capstone.

Program Requirements

Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login?destination=node/193/>). within their first semester of study.
11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF HEALTH PROMOTION

Program Director B. Bingenheimer

Mission Statement

The mission of the master of public health degree in health promotion degree program is to train students to enhance and protect the health of the public. The program is designed to assist individuals to become responsible and productive public health professionals who are capable of assessing, implementing, managing, and evaluating health promotion and health education programs for the public and for at-risk populations. The required courses as well as the suggested electives are intended to train students in social and behavioral approaches and applications for improving public health using interventions at the individual, group, organizational, and societal level.

Goals

The goals of this educational program are to provide and improve:

- Knowledge of and ability to use social and behavioral theory and behavior change models and strategies that have been shown to be successful in improving health behaviors and practices for a variety of populations.
- Knowledge and skills to assess needs for health interventions for the general public as well as at-risk populations.
- Ability to plan, design, implement, evaluate, and communicate programs and research targeted toward health promotion and/or disease prevention for the public.
- Ability to advocate for improvements in social practices, policy, and law that provide supportive environments for the improvement of public health.
- Use of structures and resources of organizations and governments to create healthy environments that promote health.

Visit the program website (<http://publichealth.gwu.edu/programs/health-promotion-mph/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 6 credits in departmental core courses, 8 credits in program-specific courses, 14 credits in elective courses, and a 2-credit culminating experience.

11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF HUMANITARIAN HEALTH

Co-Program Directors R. Asgary and R. Waldman

Mission

The master of public health in the field of humanitarian health program is designed to train students to be public health practitioners and leaders in design, implementation,

and evaluation of humanitarian programs and policies to prepare a well-versed corps of global health professionals to address health and related issues in humanitarian settings. This program will equip students with necessary knowledge, attitudes and self-efficacy/skill-sets to assess needs, design and implement programs, and contribute to better decision-making, performance efficiency, and sound policy making within aid system and in humanitarian settings.

Goals

- Understand and assess the fundamental causes of humanitarian situations and their public health challenges.
- Understand and analyze the interdependence of health science, sociopolitical science, economics, and global governance in humanitarian situations.
- Identify and apply common healthcare and sociopolitical tools and policies to assess and address the burden of a wide range of health and social conditions in humanitarian situations.
- Produce data and evidence with scientific rigor and assess the efficacy and effectiveness of wide range of social and health care interventions in humanitarian settings.
- Generate and use best local and global level evidence for sound healthcare and sociopolitical policy formulation and program management, and to translate recommendations into actions that support on- the-ground humanitarian programs.
- Develop strong cultural sensitivity and cross- and inter-cultural competencies within diverse health and political systems in humanitarian aid.
- Develop understanding of and assume leadership positions in humanitarian aid industry and related disciplines.
- Work with methodological rigor in and contribute to international-level priority setting, program design, implementation, and evaluation.
- Communicate effectively the results of research and practice to a diverse group of stakeholders in humanitarian settings.

Visit the program website (<https://publichealth.gwu.edu/programs/humanitarian-health-mph/>) for additional program information

MASTER OF PUBLIC HEALTH IN THE FIELD OF MATERNAL AND CHILD HEALTH

Program Director A. Vyas

Mission Statement

The maternal and child health program (MCH) at the Milken Institute School of Public Health (SPH) is a master

of public health (MPH) degree program designed to train individuals to become responsible and productive public health professionals with an emphasis on MCH populations. This program investigates maternal and child health from a multi-disciplinary perspective that integrates the life course, biological, demographic, epidemiological, developmental, environmental, behavioral, and social characteristics that are unique to the health and well-being of women, children, and families.

Goals

The goals of this educational program are to provide and improve:

- Knowledge and skills to assess the health care needs of women, children, and families; and
- Ability to plan, design, implement, evaluate, and communicate programs and research targeted toward health promotion and disease prevention among women, children, and families

Visit the program website (<https://publichealth.gwu.edu/programs/maternal-and-child-health-mph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 6 credits in departmental core courses, 16 credits in program-specific courses, 6 credits in elective courses, and a 2-credit culminating experience.

Begin planning practicum during year 1; complete culminating experience in year 2.

MASTER OF PUBLIC HEALTH IN THE FIELD OF PHYSICAL ACTIVITY IN PUBLIC HEALTH

Program Director and Advisor L. DiPietro

Mission Statement

The sedentary lifestyle and its consequent metabolic and cardiovascular complications now assumes a considerable public health burden in the United States. Indeed, the promotion of physical activity for people of all ages has become a top priority on public health agendas around the world. The mission of the master of public health (MPH) degree program in the Department of Exercise and Nutrition Sciences is to develop and train graduate students to integrate physical activity into the core of public health practice. The program encompasses an ecological perspective to the role of physical activity in the etiology, prevention, and treatment of chronic diseases at the community, national, and global levels. The program is designed to train students as public health scientists and practitioners in order to assist public and private agencies

with program development and evaluation with regard to physical activity, health promotion, and disease prevention.

Goals

The goals of the MPH in the field of physical activity in public health are to ensure that graduates:

- Understand the pathophysiology of selected chronic disease processes.
- Understand exercise physiology and the role of physical activity and exercise in health promotion and disease prevention.
- Develop skills in physical activity assessment using state-of-the-art technology.
- Utilize epidemiological methods to develop and test hypotheses pertaining to physical activity and health and disease outcomes at the population level.
- Develop skills in designing, implementing, and evaluating interventions for improving physical activity at the community level.
- Appreciate the role of public health policy in altering physical activity patterns at the community level.

Visit the program website (<https://publichealth.gwu.edu/programs/physical-activity-public-health-mph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, (varying by track – Option A or B) including 15 to 17 credits in core courses, 19 to 20 credits in program-specific courses, 7 to 8 credits in elective courses, and a 2-credit culminating experience.

Program Requirements

Code	Title	Credits
Prerequisite:		
EXNS 2111	Exercise Physiology I	
Required		
Core courses		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health	
PUBH 6009	Fundamentals of Public Health Program Evaluation (students following Option B track will not take PUBH 6009)	

PUBH 6011	Environmental and Biological Foundations of Public Health
PUBH 6012	Fundamentals of Health Policy
PUBH 6021	Essentials of Public Health Practice and Leadership I
PUBH 6022	Essentials of Public Health Practice and Leadership II

Departmental courses

EXNS 6202	Advanced Exercise Physiology I (Departmental Courses)
EXNS 6203	Advanced Exercise Physiology II
EXNS 6208	Physical Activity: Physiology and Epidemiology
PUBH 6620	Designing Healthy Communities

Program-specific courses: All courses in either Option A or Option B:

Option A: Epidemiology option

PUBH 6247	Design of Health Studies
PUBH 6249	Use of Statistical Packages: Data Management and Data Analysis
PUBH 6252	Advanced Epidemiology Methods

Option B: Program design and evaluation option

PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6501	Program Evaluation
PUBH 6503	Introduction to Public Health Communication and Marketing
PUBH 6621	Applied Data Analysis in Exercise and Nutrition Sciences

Electives

7 to 8 credits in any GW graduate-level courses. Sample electives include:

EXNS 6212	Exercise in Selected Chronic Diseases
EXNS 6242	Nutrition Throughout the Life Cycle

PUBH 6260	Advanced Data Analysis for Public Health
PUBH 6262	Introduction to Geographic Information Systems
PUBH 6502	Practical Data Analysis for Prevention and Community Health
PUBH 6536	Workplace Health Promotion
PUBH 6556	Maternal and Child Nutrition

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.
7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate degree may be transferred to the master of public health program. External credits must have been earned from an accredited institution in the last three years with a minimum grade of 3.0 (B) in each course. Students in SPH graduate certificate programs can transfer as many credits earned toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.
8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0 via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.
9. CITI Training requirement: All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login?destination=node/193/>). within their first semester of study.

11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF PUBLIC HEALTH COMMUNICATION AND MARKETING

Program Director L. Abroms

Mission

Based on an ecological model of health, the mission of the master of public health in the field of public health communication and marketing program is to educate public health professionals to use communication and marketing as strategic tools to influence people, places, and environmental conditions in ways that advance public health objectives.

Goals

Graduates will possess the skills necessary to become highly effective public health practitioners and leaders. Their specific expertise in the strategic use of communication and marketing tools will enable them to work collaboratively with a broad range of other public health experts to plan high-impact health enhancement initiatives, and to implement or supervise the implementation of the communication and marketing components of public health initiatives.

Specifically, students will become proficient at developing, implementing, and evaluating:

- Communication programs that help people make sound health decisions and effectively manage their health behaviors.
- Marketing programs that improve the health capacity of communities by enhancing the competitiveness of the healthful (versus unhealthful) products and services offered to community members.
- Communication programs that promote the adoption of policies--in the public and private sector--which enhance health.

Visit the program website (<https://publichealth.gwu.edu/programs/public-health-communication-and-marketing-mph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 6 credits in departmental core courses, 22 credits in program-specific courses and electives, and a 2-credit culminating experience.

Code	Title	Credits
Required		
Core		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health	
PUBH 6011	Environmental and Biological Foundations of Public Health	
PUBH 6012	Fundamentals of Health Policy	
PUBH 6021	Essentials of Public Health Practice and Leadership I	
PUBH 6022	Essentials of Public Health Practice and Leadership II	
PUBH 6023	Interprofessional Education Experience	
Departmental		
PUBH 6500	Planning and Implementing Health Promotion Programs	
PUBH 6501	Program Evaluation	
Program-specific		
PUBH 6503	Introduction to Public Health Communication and Marketing	
PUBH 6504	Social and Behavioral Science Research Methods	
PUBH 6570	Advanced Public Health Communication: Theory and Practice	
PUBH 6571	Social Marketing: Theory and Practice	
Program-specific electives		
8 credits from the following:		
HSML 6293	The Internet of Medical Things	
PUBH 6099	Topics in Public Health (Social Impact Design Thinking only)	
PUBH 6133	Social Dimensions in Climate Change and Health	
PUBH 6249	Use of Statistical Packages: Data Management and Data Analysis	

PUBH 6262	Introduction to Geographic Information Systems
PUBH 6263	Advanced GIS
PUBH 6452	Social and Behavior Change Communication in Middle- to Low-Income Countries
PUBH 6516	Community Health Information Resources
PUBH 6530	Qualitative Methods in Health Promotion
PUBH 6532	Community Organization, Development, and Advocacy
or PUBH 6573	Media Advocacy for Public Health
PUBH 6572	Marketing Research for Public Health
PUBH 6574	Public Health Branding: Theory and Practice

Or select other SPH course(s) with the advisor's advance approval.

Culminating experience

PUBH 6015	Culminating Experience
-----------	------------------------

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.
7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate degree may be transferred to the master of public health program. External credits must have been earned from an accredited institution in the last three years with a minimum grade of 3.0 (B) in each course. Students in SPH graduate certificate programs can transfer as many credits earned toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.
8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0

via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.

9. CITI Training requirement: All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login?destination=node/193/>). within their first semester of study.
11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF PUBLIC HEALTH NUTRITION

Program Director and Advisor K. Robien

Mission

The mission of the master of public health (MPH) degree program in the field of public health nutrition is to develop and train graduate students to integrate nutrition into the core of public health practice. The program encompasses a social ecological perspective on the role of nutrition in the etiology, prevention, and treatment of both acute and chronic disease at the individual, community, national, and global levels. This program is designed to train students as public health scientists and practitioners in order to assist public and private agencies with program development, implementation, and evaluation with regard to nutrition in health promotion and disease prevention.

Goals

The goals of this MPH program in the field of public health nutrition are to ensure that graduates:

- Understand the pathophysiology of common acute and chronic disease processes and the role that nutrition may play in the development of these diseases.
- Understand the factors impacting the accessibility, availability, adequacy, and safety of the food and water systems serving a community, and the relationship between community food and water systems and health outcomes.
- Develop skills in nutrition assessment of both individuals and communities.
- Utilize appropriate epidemiologic methods for developing and testing hypotheses relating to nutrition and health outcomes at the population level.

- Develop skills in designing, implementing, and evaluating nutrition interventions to improve the health of communities.
- Appreciate the role of public health policy in altering the food environment at the community level.

Visit the program website (<https://publichealth.gwu.edu/programs/public-health-nutrition-mph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 17 credits in core courses, 13 credits in program-specific courses, 7 credits in research methods courses, 6 credits in elective courses, and a 2-credit culminating experience.

Prerequisites: Introductory Nutrition and either Advanced Nutrition or Nutritional Biochemistry

Code	Title	Credits
Required Core		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health

PUBH 6620 Designing Healthy Communities

Research methods

PUBH 6241 Nutritional Epidemiology

PUBH 6621 Applied Data Analysis in Exercise and Nutrition Sciences

And 4 credits selected from the following approved research methods courses:

PUBH 6236 Systematic Review of Public Health Literature

PUBH 6247 Design of Health Studies

PUBH 6249 Use of Statistical Packages: Data Management and Data Analysis

PUBH 6260 Advanced Data Analysis for Public Health

PUBH 6262 Introduction to Geographic Information Systems

PUBH 6263 Advanced GIS

PUBH 6268 Advanced SAS

PUBH 6273 Ethnographic Methods

PUBH 6281 Analysis of Complex Surveys Using SAS and Stata

PUBH 6299 Topics in Epidemiology and Biostatistics (ONLY: Dissemination & Implementation Research in Health)

PUBH 6310 Statistical Analysis in Health Policy

PUBH 6410 Global Health Study Design

PUBH 6411 Global Health Qualitative Research Methods

PUBH 6412 Global Health Quantitative Research Methods

PUBH 6437 Global Health Program Evaluation

PUBH 6488 Cost-effectiveness Analysis in Public Health and Health Care

PUBH 6489 Evaluation of Food and Nutrition Programs and Policies

PUBH 6504 Social and Behavioral Science Research Methods

PUBH 6530	Qualitative Methods in Health Promotion
PUBH 6533	Design and Conduct of Community Health Surveys
PUBH 6534	Community-Based Participatory Research
PUBH 6572	Marketing Research for Public Health
PUBH 6599	Topics in Prevention and Community Health (ONLY: Economic Evaluation for Health Promotion)

Electives

6 credits in graduate-level elective courses selected in consultation with the advisor.

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.
7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate degree may be transferred to the master of public health program. External credits must have been earned from an accredited institution in the last three years with a minimum grade of 3.0 (B) in each course. Students in SPH graduate certificate programs can transfer as many credits earned toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.
8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0 via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.
9. CITI Training requirement: All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington

University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login?destination=node/193/>). within their first semester of study.

11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH: MPH@GW

Program Description

This distance education track for the master of public health (MPH) degree emphasizes local, national, and global health practice. The program emphasizes interdisciplinary teaching, and focuses on core competencies/skills and uses cases/other materials from both the U.S. and abroad. The pedagogy allows students to tailor their education to community level, national, or global interests in the U.S. and countries around the world, emphasizing interdisciplinary public health competencies, including biostatistics and epidemiology; cultural competency; health communication; leadership; professionalism; planning, implementation and evaluation methods; public health biology; and systems thinking.

The MPH@GW track is taught in 10-week quarters across the calendar year (4 quarters per year).

Mission

Provide a practice-oriented MPH curriculum that enables graduates to be leaders in the design of population and community health programs in the US and globally.

Visit the program website (<http://publichealthonline.gwu.edu>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 17 credits in core courses, 10 credits in program-specific courses, 16 credits in elective courses, and a 2-credit culminating experience.

Code	Title	Credits
Required		
Core		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health	

PUBH 6009	Fundamentals of Public Health Program Evaluation
PUBH 6011	Environmental and Biological Foundations of Public Health
PUBH 6012	Fundamentals of Health Policy
PUBH 6021	Essentials of Public Health Practice and Leadership I
PUBH 6022	Essentials of Public Health Practice and Leadership II
PUBH 6023	Interprofessional Education Experience
Program-specific	
PUBH 6052	Practical Data Management and Analysis for Public Health
PUBH 6442	Comparative Global Health Systems
PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6503	Introduction to Public Health Communication and Marketing
Culminating experience	
PUBH 6060	MPH@GW Culminating Experience I
PUBH 6061	MPH@GW Culminating Experience II
Electives	

16 credits in any graduate-level SPH courses.

Visit the MPH@GW website (<https://publichealthonline.gwu.edu/academics/one-year-mph-program/>) for an updated list of elective options.

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.
7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate

degree may be transferred to the master of public health program. External credits must have been earned from an accredited institution in the last three years with a minimum grade of 3.0 (B) in each course. Students in SPH graduate certificate programs can transfer as many credits earned toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.

8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0 via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.
9. CITI Training requirement: All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login?destination=node/193/>). within their first semester of study.
11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF SCIENCE IN THE FIELD OF BIOSTATISTICS

Program Director and Academic Advisor A. F. Elmi

The master of science (MS) degree program in biostatistics is jointly administered by the Department of Statistics in the Columbian College of Arts and Sciences (CCAS) and the Department of Epidemiology and Biostatistics in the Milken Institute School of Public Health (SPH) and its associated research facility, The Biostatistics Center. This degree program is accredited by the Middle States Commission on Higher Education through the CCAS and by the Council on Education for Public Health through the SPH Regulations, and requirements for this graduate degree have been designed to be compatible with policies and scholarship requirements of both CCAS and SPH. The degree is conferred by Columbian College.

Visit the program website (<http://publichealth.gwu.edu/programs/biostatistics-ms/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 18 credits in core statistics courses, 7 credits in core

public health courses, 6 credits in elective courses, and 2 credits in consulting.

Admission Considerations

The courses listed below (or course equivalents) are prerequisites for admission consideration and must appear on the student's transcript. Students may apply to the program only after they have fulfilled this requirement:

Code	Title	Credits
MATH 1231	Single-Variable Calculus I	
MATH 1232	Single-Variable Calculus II	
STAT 2118	Regression Analysis	

Applicants lacking the courses listed below (or course equivalents) are considered for admission; however, if admitted, the student is required to complete these courses within two semesters of matriculation in the program. Credit earned in these courses does not count toward the 33 credits required for the degree and grades earned are not reflected in the overall grade-point average.

Code	Title	Credits
MATH 2184	Linear Algebra I	
MATH 2233	Multivariable Calculus	
One of the following:		
PUBH 6249	Use of Statistical Packages: Data Management and Data Analysis	
STAT 2183	Intermediate Statistics Lab/Packages	

Degree Requirements

Code	Title	Credits
Required statistics courses		
STAT 6201	Mathematical Statistics I	
STAT 6202	Mathematical Statistics II	
STAT 6210	Data Analysis	
STAT 6227	Survival Analysis	
PUBH 6265	Design of Medical Studies	
PUBH 6266	Biostatistical Methods (Basis for Master's Comprehensive Examination)	
Required public health courses		
PUBH 6003	Principles and Practices of Epidemiology	

PUBH 6299	Topics in Epidemiology and Biostatistics (2 credits)
-----------	--

Two courses selected from the following:

PUBH 6262	Introduction to Geographic Information Systems
PUBH 6262	Introduction to Geographic Information Systems
PUBH 6268	Advanced SAS
PUBH 6282	Introduction to R Programming

Approved Electives

6 credits in elective courses selected from the following:

PUBH 6121	Environmental and Occupational Epidemiology
PUBH 6242	Clinical Epidemiology and Public Health: Reading the Research
PUBH 6244	Cancer Epidemiology
PUBH 6245	Infectious Disease Epidemiology
PUBH 6250	Epidemiology of HIV/AIDS
PUBH 6252	Advanced Epidemiology Methods
PUBH 6281	Analysis of Complex Surveys Using SAS and Stata
STAT 3187	Introduction to Sampling
STAT 4181	Applied Time Series Analysis
STAT 4188	Nonparametric Statistics Inference
STAT 6197	Fundamentals of SAS Programming for Data Management
STAT 6215	Applied Multivariate Analysis I
STAT 6216	Applied Multivariate Analysis II
STAT 6217	Design of Experiments
STAT 6223	Bayesian Statistics: Theory and Applications
STAT 6231	Categorical Data Analysis
STAT 6242	Modern Regression Analysis
STAT 6287	Sample Surveys
STAT 8226	Advanced Biostatistical Methods
STAT 8265	Multivariate Analysis

STAT 8273	Stochastic Processes I
STAT 8281	Advanced Time Series Analysis
STAT 8288	Topics in Sample Surveys
Consulting	
PUBH 6258	Advanced Topics in Biostatistical Consulting
PUBH 6283	Biostatistics Consulting Practicum

The Master's Comprehensive Examination

The master's comprehensive examination is a written exam in the field of biostatistics and is based on the content covered in PUBH 6266 Biostatistical Methods. It is administered by the faculty of the Department of Epidemiology and Biostatistics in the Milken Institute School of Public Health.

The following requirements must be fulfilled: 33 credits, including 18 credits in core statistics courses, 7 credits in core public health courses, 6 credits in elective courses, and 2 credits in consulting.

MASTER OF SCIENCE IN THE FIELD OF EPIDEMIOLOGY

Program Director S.D. Cleary

The Department of Epidemiology and Biostatistics offers the master of science (MS) in the field of epidemiology degree program. The goals of the program are to prepare students for careers in industry or academia and for continued study in a doctoral program. The program includes coursework that focuses on theoretical and applied epidemiological and statistical methods.

Students may apply for admission to the doctorate of philosophy (PhD) in the field of epidemiology degree program (<https://next.bulletin.gwu.edu/public-health/epidemiology-biostatistics/phd-epidemiology/>) prior to completing the MS degree. A maximum of 24 credits from the MS degree may be applied toward the PhD. The student must take a minimum additional 27 credits of coursework. The distribution of these courses between epidemiology and statistics depends on the nature of the master's degree and whether credits from that program are used to defray epidemiology and statistics coursework.

Applicants must have completed 6 credits in calculus I and II and 8 credits in human biology prior to beginning the program. Prior completion of 3 credits of linear algebra and 3 credits of SAS are strongly recommended.

Visit the program website (<http://publichealth.gwu.edu/programs/epidemiology-ms/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 13 credits in public health core courses, 6 credits in statistics core courses, 2 credits in program-specific courses, 9 credits in elective courses, and 3 credits consulting and thesis.

Preparatory requirements

The courses listed below (or equivalents) are prerequisites for admission consideration, and must appear on the student's transcript.

Code	Title	Credits
BISC 1115	Introductory Biology: Cells and Molecules	
BISC 1116	Introductory Biology: The Biology of Organisms	
MATH 1231	Single-Variable Calculus I	
MATH 1232	Single-Variable Calculus II	

Additional course requirements

Applicants who have not already completed one of the courses listed below (or equivalents to these GW courses) are considered for admission, but are eligible for conditional admission only. In such cases, students are expected to satisfactorily complete one of the courses within two semesters from matriculation in the program.

Code	Title	Credits
PUBH 6249	Use of Statistical Packages: Data Management and Data Analysis	
or STAT 2183	Intermediate Statistics Lab/Packages	

Program requirements

The following requirements must be fulfilled: 33 credits, including 19 credits in core public health, 2 credits in an epidemiology program-specific selective, 9 credits of elective courses, and 3 credits in consulting and thesis. In addition, all students must successfully complete a master's comprehensive examination.

Code	Title	Credits
Required core courses		
Public health		
PUBH 6003	Principles and Practices of Epidemiology ¹	3
PUBH 6247	Design of Health Studies ¹	3
PUBH 6252	Advanced Epidemiology Methods ¹	3

PUBH 6080	Pathways to Public Health (required of students without an MPH degree only)	0
And 4 credits in any graduate-level EXNS or PUBH courses.		
Statistics		
STAT 4157 & STAT 4158	Introduction to Mathematical Statistics I and Introduction to Mathematical Statistics II	3
or		
STAT 6201 & STAT 6202	Mathematical Statistics I and Mathematical Statistics II	6
Program-specific courses		
One of the following 2-credit courses. Others may be taken as electives.		
PUBH 6242	Clinical Epidemiology and Public Health: Reading the Research	2,3
PUBH 6244	Cancer Epidemiology	2
PUBH 6245	Infectious Disease Epidemiology	2
PUBH 6250	Epidemiology of HIV/AIDS	2
PUBH 6259	Epidemiology Surveillance in Public Health	2
Electives		9
9 credits in any graduate-level EXNS (public health), HSML, or STAT courses. Possible electives include:		
PUBH 6121	Environmental and Occupational Epidemiology	3
PUBH 6123	Toxicology: Applications for Public Health Policy	3
PUBH 6124	Risk Management and Communication	3
PUBH 6243	Topics in Clinical Epidemiology and Public Health: Reading the Research	1
PUBH 6260	Advanced Data Analysis for Public Health	3
PUBH 6262	Introduction to Geographic Information Systems	1
PUBH 6263	Advanced GIS	1
PUBH 6283	Biostatistics Consulting Practicum	1
PUBH 6299	Topics in Epidemiology and Biostatistics	1-3
STAT 2118	Regression Analysis ³	3

STAT 3187	Introduction to Sampling ³	3
STAT 4181	Applied Time Series Analysis ³	3

Consulting and thesis

PUBH 6258	Advanced Topics in Biostatistical Consulting	1
PUBH 6999	Master of Science in Epidemiology Thesis	2

¹ Basis for master's general comprehensive examination.

² In lieu of STAT 4157 and STAT 4158, students interested in applying to the PhD program in epidemiology may take STAT 6201 and STAT 6202 with the advisor's approval.

³ Undergraduate-level courses approved to be taken for graduate credit with additional work assigned.

The following requirements must be fulfilled: 33 credits, including 13 credits in public health core courses, 6 credits in statistics core courses, 2 credits in program-specific courses, 9 credits in elective courses, and 3 credits consulting and thesis.

MASTER OF SCIENCE IN THE FIELD OF EXERCISE SCIENCE WITH A CONCENTRATION IN STRENGTH AND CONDITIONING

Program Director T.A. Miller

Mission Statement

The mission of the program is to provide formal graduate level academic instruction in the science and theory of resistance training, as well as to promote student production of research that directly relates to the neuromuscular adaptations involved with resistance training.

Goals

The goals of this program in the Department of Exercise and Nutrition Sciences are to:

- Establish scientific basis for the value of anaerobic exercise, and to provide internal and external programs that promote health behaviors across the lifespan;
- Meet an increasing demand for well-educated professionals capable of delivering a broad range of exercise-based preventive, technical, educational, and rehabilitative services;
- Gain insight into strategies for the prevention and treatment of sarcopenia, osteoporosis, and childhood obesity;
- Provide advanced training in exercise physiology as it relates specifically to resistance training for the purpose of increasing athletic performance and the prevention or treatment of inactivity-related health disorders; and

- Prepare students with knowledge and skills to take the Certified Strength and Conditioning Specialist (CSCS) exam offered through the NSCA, and the level one weightlifting coaching course offered through United States Weightlifting (USAW).

This program is primarily delivered online. Contact the Program Director for additional information.

Visit the program website (<https://publichealth.gwu.edu/programs/strength-and-conditioning-ms/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 17 credits in core courses, 10 credits in program-specific courses, 3 credits in elective courses, and a 6-credit internship.

Code	Title	Credits
Prerequisites		
An undergraduate course in exercise physiology must be completed, with a minimum grade of B, prior to beginning the program.		
Core		
EXNS 6202	Advanced Exercise Physiology I	
EXNS 6203	Advanced Exercise Physiology II	
EXNS 6207	Psychological Aspects of Sport and Exercise	
EXNS 6208	Physical Activity: Physiology and Epidemiology	
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6619	Fundamentals of Nutrition Science	
PUBH 6080	Pathways to Public Health	
Program-specific		
EXNS 6220	Power Training for Sports Performance	
EXNS 6221	Science and Theory of Training	
EXNS 6222	Current Topics in Strength and Conditioning	
EXNS 6223	Biomechanical Analysis	
Electives		
3 credits in course(s) approved by the program director.		

Culminating experience

EXNS 6233 Graduate Internship

Comprehensive examination

Successful completion of a comprehensive examination is required.

Graduation requirements

1. Graduate credit requirement: 36 graduate credits
2. Course requirements: successful completion of core and program specific courses
3. Examination requirement: pass the American College of Sports Medicine Clinical Exercise Specialist® certification examination (clinical exercise physiology only)
4. Grade point requirement: 3.0 (*B* average) overall grade-point average
5. Time limit requirement: the degree must be completed within five years
6. Transfer credit policy: up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the MSES Courses need to have been taken within the past three years from an accredited institution with a grade of *B* or above

MASTER OF SCIENCE IN THE FIELD OF MANAGEMENT OF HEALTH INFORMATICS AND ANALYTICS

Program Director P. MacTaggart

The goal of the master of science in management of health informatics and analytics (MHIA) degree program is to develop leaders who possess the knowledge and skills to achieve optimal delivery of health care through the use of information to make sound decisions.

An informatics-related degree from the Department of Health Policy and Management incorporates business and medical informatics training, knowledge of health care systems, law and policy, critical values in decision making, and much more. The MHIA is designed for adult students who possess either clinical or administrative experience in health care delivery. Classes are taught in a hybrid model, combining ten-week distance learning modules and executive format, face-to-face immersion classes.

The MHIA curriculum focuses on developing the skills and values needed for persons who seek to create highly effective health care organizations and utilize technology to make better health care decisions. Culminating activities for MHIA students include a capstone course that gives students the opportunity

to develop a practical solution for a major health care problem that can be solved using Informatics.

Visit the program website (<https://publichealthonline.gwu.edu/form-mhi/>)for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits in required courses, including 3 credits in immersion experiences.

Code	Title	Credits
Required		
HSML 6264	Health Care Management and Strategy	5
HSML 6265	Medical Informatics and Decision Management	5
HSML 6280	Health Law and Policy	5

HSML 6291	Population and Community Health Analytics	5
HSML 6293	The Internet of Medical Things	3
HSML 6294	Research Analytics	3
HSML 6295	Predictive Analytics	3
HSML 6296	Health Innovations and Entrepreneurship	5
PUBH 6080	Pathways to Public Health	0
Immersion experiences		
HSML 6255	Leadership and Ethics I	1.5
HSML 6297	Health Informatics Simulation	1.5
Other requirements		
Students take a 3-credit course in business intelligence offered through the Consortium of Universities of the Washington Metropolitan Area.		

MASTER OF SCIENCE IN THE FIELD OF PUBLIC HEALTH MICROBIOLOGY AND EMERGING INFECTIOUS DISEASES

Program Co-Directors M. Ghosh and I. Kuo

Mission

The mission of the master of science (MS) in the field of public health microbiology and emerging infectious diseases degree program is to provide training to a new generation of public health professionals to expand knowledge and expertise in the areas of disease mechanisms, with an emphasis on microbial pathogens, the use and application of modern biotechnologies, and in epidemiologic skills relevant to the prevention and control of problems in the community arising from infectious diseases.

Graduates of the MS program have an in-depth understanding of the major laboratory, clinical, and public health aspects of humankind’s microbial pathogens, and acquire epidemiologic skills relevant to the prevention and control of problems arising from infectious diseases and modern biotechnologies. Areas of emphasis include the design and analysis of epidemiologic data; emerging infections; tropical diseases; and applications of genomics, proteomics, and bioinformatics. MS graduates are employed in academic and industrial research laboratories, international health agencies, NGOs, and private consulting groups. In addition, they may work in federal, state, and local public health agencies or state and local public health laboratories where their technical expertise and population-based perspective are extremely useful. Students earning this degree help meet a national demand that has reached critical proportions for a trained workforce in biodefense and emerging infections, and an international demand for training in diseases that affect the developing countries.

Goals

The goals of the MS program in the field of public health microbiology and emerging infectious diseases are to ensure that graduates:

- Identify the biological complexities of microbial pathogens and the diseases they cause
- Recognize the major epidemiologic and clinical features of microbial disease
- Identify how new biotechnologies (including genomics, proteomics, and bioinformatics) can be applied to the study and control of microbial pathogens
- Develop an in-depth understanding of epidemiologic principles and practice
- Apply the principles of epidemiology, microbiology, and public health practice toward the detection, surveillance, investigation, and control of microbial diseases

Visit the program website (<https://publichealth.gwu.edu/programs/public-health-microbiology-and-emerging-infectious-diseases-ms/>)for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 10 credits in foundational core courses, 23 credits in

program-specific courses, 8 credits in elective courses, and 4 credits in field/laboratory experience and final project.

Code	Title	Credits
Required		
Foundation courses		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health	
PUBH 6275	Essential Public Health Laboratory Skills	
PUBH 6080	Pathways to Public Health	
Program-specific courses		
PUBH 6245	Infectious Disease Epidemiology	
PUBH 6247	Design of Health Studies	
PUBH 6249	Use of Statistical Packages: Data Management and Data Analysis	
PUBH 6259	Epidemiology Surveillance in Public Health	
PUBH 6262	Introduction to Geographic Information Systems	
PUBH 6276	Public Health Microbiology	
PUBH 6277	Public Health Genomics	
PUBH 6278	Public Health Virology	
MICR 8210	Infection and Immunity	
Electives		
8 credits in program-specific elective courses from list below or others with the advance approval of the advisor:		
PUBH 6011	Environmental and Biological Foundations of Public Health	
PUBH 6127	Introduction to Environmental Health Microbiology	
PUBH 6132	Water, Sanitation, and Hygiene (WASH) in Low-Income Countries	
PUBH 6239	Epidemiology of Foodborne and Waterborne Diseases	

PUBH 6242	Clinical Epidemiology and Public Health: Reading the Research
PUBH 6243	Topics in Clinical Epidemiology and Public Health: Reading the Research
PUBH 6250	Epidemiology of HIV/AIDS
PUBH 6252	Advanced Epidemiology Methods
PUBH 6253	Issues in HIV Care and Treatment
PUBH 6263	Advanced GIS
PUBH 6271	Disaster Epidemiology
PUBH 6299	Topics in Epidemiology and Biostatistics
PUBH 6358	Vaccine Policy
PUBH 6399	Topics in Health Policy (i.e.- Homeland Security and Public Health)
PUBH 6455	Global Vaccinology
PUBH 6484	Prevention and Control of Vector Borne Diseases
PUBH 6486	Global Health Programs and Approaches to the Control of Infectious Diseases
PUBH 6487	Emerging Zoonotic Diseases and Global Food Production
MICR 6292	Tropical Infectious Diseases
MICR 8230	Molecular and Cellular Immunology
Field/laboratory experience and final project	
PUBH 6016	Field/Laboratory Experience
PUBH 6280	MEID Final Project

DUAL DOCTOR OF MEDICINE AND MASTER OF PUBLIC HEALTH

Program Director K. Bartholomew

The goal of the School of Medicine and Health Sciences (SMHS) is to graduate clinician-citizens who are prepared to deliver excellent patient care while pursuing scholarly inquiry, serving as leaders and advocates to address population-level issues that have an impact on individual health, and engaging with communities to improve health at the local, national, and global levels. To further these goals, SMHS and the Milken Institute School of Public Health (SPH) provide a dual medicine-public health program (MD/MPH) for medical students.

MD/MPH students may pursue any of the following residential MPH programs:

- Community oriented primary care
- Environmental health science and policy
- Epidemiology
- Global environmental health
- Global health policy
- Global health program design, monitoring, and evaluation
- Global health epidemiology and disease control
- Health policy
- Health promotion
- Maternal and child health
- Public health communication and marketing

Program scheduling

Students in the five-year dual program receive up to 15 SPH credits for medical school curriculum, and complete a minimum of 30 credits at SPH. Students may begin SPH coursework during the summer following either Year 1 or Year 3 of the MD program. All MD/MPH students are granted a one-year leave of absence to complete the MPH coursework. In addition, SPH coursework is credited as four elective weeks during Year 4 of the MD program.

MPH requirements for the dual MD/MPH program

The MD degree is the primary degree in the dual program. Students in the program receive the MD degree upon successful completion of all MD program requirements, but must successfully complete all requirements for both the MD and the MPH to receive the MPH degree.

Completion of 45 credits is required for the stand-alone MPH program. In the dual MD/MPH program, MD students complete 30 credits (minimum) in coursework from the MPH. Up to 15 credits are cross-credited with MD program courses. The required curriculum for the MPH is adjusted to meet requirements for the dual program as follows:

MPH core courses (15 credits for the stand-alone MPH; 10 credits for the MD/MPH)

- MD/MPH students take 10 credits of MPH core courses and receive 5 credits for PUBH 6001 Biological Concepts in Public Health (2 credits) and PUBH 6006 Management and Policy Approaches to Public Health (3 credits) through cross-crediting of IDIS 8101 in the MD program.

MPH Practicum and Culminating Experience (total 4 credits for the stand-alone MPH)

- MD/MPH students satisfy 4 credits of MPH requirements –PUBH 6014 Practicum (2 credits) and PUBH 6015 Culminating Experience (2 credits)–through cross-crediting of IDIS 8334.

MPH elective requirement

- Up to 6 credits of MPH electives are cross-credited with MD coursework. The number of credits varies by MPH program.

MPH program-specific requirements

- MD/MPH students must complete all program-specific MPH coursework, which totals 17 to 22 credits, depending on the MPH program.

Cross-counting MPH credits for MD Year 4 electives

- 4 credits from the MPH program–PUBH 6004 Environmental and Occupational Health in a Sustainable World (2 credits) and PUBH 6007 Social and Behavioral Approaches to Public Health (2 credits)–are cross-counted as four weeks of MD Year 4 electives.

Application information and program time lines

Applications are due in the SMHS Admissions Office (<https://smhs.gwu.edu/academics/md-program/admissions/>) in December for eligible cohorts. MD students who wish to pursue the dual degree may apply in one of two application periods:

- Pathway 1: MD students may apply in December of the fall semester of Year 1 to begin the MPH program by taking two core MPH courses in the summer session between MD Years 1 and 2. Such students complete the remaining MPH program requirements during a fourth Academic Year after completing MD Year 3. The final year of MD curriculum is completed in Academic Year 5.
- Pathway 2: MD students may apply in December in the fall semester of Year 3. Such students complete all MPH program requirements during a fourth Academic Year after completing MD Year 3. The final year of MD curriculum is completed in Academic Year 5.

DUAL MASTER OF ARTS IN ELLIOTT SCHOOL PROGRAMS AND MASTER OF PUBLIC HEALTH

The Elliott School for International Affairs and the Milken Institute School of Public Health cooperate to offer a dual master of arts (MA) and master of public health (p. 1197) (MPH) degree program. Students must be admitted separately to both schools. Application for the dual degree program can be made after matriculation in either program but prior to completion of the initial degree.

The following MA/MPH areas of combined study are available:

Milken Institute School of Public Health

Master of Public Health in the following programs:

- Global health epidemiology and disease control
- Global health policy
- Global health program design, monitoring and evaluation

Elliott School of International Affairs

- Master of Arts (any program)

The Elliott School accepts up to 12 credits in MPH coursework toward requirements for the MA and the School of Public Health accepts up to 6 credits in Elliott School MA coursework towards requirements for the MPH.

All requirements for both programs must be fulfilled. Students completing the requirements for one program may apply to graduate with that degree prior to completing the second degree. Students also may request to withdraw from either program at any time to pursue a single degree. All degree requirements must be completed within five years of the student's date of matriculation in either program.

Visit the Elliott School (<https://elliott.gwu.edu/joint-and-dual-degrees/>) and School of Public Health (<https://publichealth.gwu.edu/programs/joint-degree-ma-mph/>) websites for additional information.

DUAL MASTER OF HEALTH ADMINISTRATION AND GRADUATE CERTIFICATE IN HEALTH CARE CORPORATE COMPLIANCE

The Milken Institute School of Public Health and the College of Professional Studies (CPS) offer a dual master of health administration (p. 1168) and graduate certificate program in corporate compliance (<https://cps.gwu.edu/healthcare-compliance/>) program. The 12 credits earned in CPS's graduate certificate program may be applied toward the MHA program elective requirements. All requirements for both programs must be fulfilled.

Visit the MHA program (p. 1168) and CPS graduate certificate program (<http://cps.gwu.edu/healthcare-compliance/>) websites for additional information.

DUAL MASTER OF PUBLIC HEALTH IN THE FIELD OF HEALTH POLICY AND GRADUATE CERTIFICATE IN HEALTH CARE CORPORATE COMPLIANCE

Program Director J. H. Thorpe

Given the dramatic changes in health care policy and regulation over the past decade, the role of compliance professionals has become increasingly important in the health care industry. No other position can have so profound an impact on your health care organization's success—or failure. Legislation such as the Health Insurance Portability and Accountability Act (HIPAA) and the federal Anti-Kickback and Stark Laws have created the need for university-based

credentials for this increasingly specialized—and increasingly complicated—field.

The College of Professional Studies (CPS) offers a unique 12-credit graduate certificate program providing a comprehensive health care corporate compliance education. Drawing faculty and expertise from both the Department of Health Policy and Management in the Milken Institute School of Public Health and a leading health care law firm in Washington, DC, the program offers education in health care laws and regulations as well as tools and strategies for creating effective corporate compliance programs.

Visit the program website (<https://publichealth.gwu.edu/programs/joint-degree-healthcare-corporate-compliance-certificate/>) for additional information.

REQUIREMENTS

Program Requirements

Designed for working professionals, the 12-credit graduate certificate in health care corporate compliance (GW HCC Program or Program) provides students with a uniquely comprehensive education in health care corporate compliance. The Program is designed for current or aspiring corporate compliance officers and other working in compliance-related fields. The course of study, offered in just over seven months, is divided into three segments: five-day, in-classroom residency at the Graduate Education Center in Alexandria, VA (3 credits); six-month, online distance learning segment (6 credits); and three-day, in-classroom capstone back in Alexandria, VA (3 credits).

The graduate certificate in health care corporate compliance can be awarded in conjunction with a Master of Public Health in the field of health policy. The 12 credits earned through the graduate certificate in health care corporate compliance may be applied toward this MPH.

All other degree requirements for the MPH program must be fulfilled as noted on the MPH in the field of health policy program page (p. 1185).

College of Professional Studies

The graduate certificate in health care corporate compliance is awarded through the College of Professional Studies. Visit the CPS website (<http://cps.gwu.edu/healthcare-compliance/>) for more information.

DUAL MASTER OF SCIENCE IN THE FIELD OF HEALTH POLICY AND GRADUATE CERTIFICATE IN HEALTH CARE CORPORATE COMPLIANCE

Program Director J. H. Thorpe

The College of Professional Studies offers a 12-credit graduate certificate program in corporate compliance (<https://cps.gwu.edu/healthcare-compliance/>) that draws faculty and expertise from the Milken Institute School of Public Health's Department of Health Policy and Management and a leading health care law firm in Washington, DC. The program focuses on health care laws and regulations as well as the tools and strategies for creating effective corporate compliance programs.

Students who successfully complete the requirements for the certificate program may apply those credits as electives in the master of science (MS) in health policy degree program. All other degree requirements for the MS program (p. 1185) must be fulfilled.

Visit the program website (<http://publichealth.gwu.edu/programs/health-policy-ms/>) for additional information.

REQUIREMENTS

Program Requirements

Designed for working professionals, the 12-credit graduate certificate in health care corporate compliance (GW HCC Program or Program) provides students with a uniquely comprehensive education in health care corporate compliance. The Program is designed for current or aspiring corporate compliance officers and other working in compliance-related fields. The course of study, offered in just over seven months, is divided into three segments: five-day, in-classroom residency at the Graduate Education Center in Alexandria, VA (3 credits); six-month, online distance learning segment (6 credits); and three-day, in-classroom capstone back in Alexandria, VA (3 credits).

The graduate certificate in health care corporate compliance can be awarded in conjunction with a Master of Science in the field of health policy. The 12 credits earned through the graduate certificate in health care corporate compliance may be applied as electives in this program.

All other degree requirements for the Master of Science in the field of health policy program must be fulfilled as noted on the MS in the field of health policy program page (<http://bulletin.gwu.edu/public-health/health-policy-management/ms/>).

College of Professional Studies

JOINT MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF PHYSICIAN ASSISTANT AND MASTER OF PUBLIC HEALTH

Program Director H. Straker

Mission Statement

As the U.S. health care system continues to evolve, market forces and changing personnel requirements create new and expanding roles for health care professionals. The joint physician assistant-master of science in health sciences/master of public health PA-MSHS/MPH program strives to fill the need for a new type of health care professional: one who has both the depth of medical knowledge and the range of leadership and policy skills to meet the challenges of future practice. Based in both the Milken Institute School of Public Health (SPH) Department of Prevention and Community Health, and the School of Medicine and Health Sciences (SMHS), the PA-MSHS/MPH program presents a graduate curriculum that blends two important traditional paradigms of health care—the biomedical and the preventive. Health care professionals in the future U.S. health system must be prepared as competent and caring clinicians, as well as bring a broad view of population health and prevention to their work. Graduates of the GW PA/MPH program are leaders in clinical practice in primary care and preventive medicine and have the preparation to assume high level positions in education, research, and policy.

Goals

The PA-MSHS/MPH provides the opportunity for students to obtain the competencies necessary to succeed in the rapidly evolving American and global health systems.

The major goals of GW's PA-MSHS/MPH program are to:

- Recruit diverse and intellectually curious students and develop in them a strong clinical medical and prevention knowledge base necessary to deliver the highest quality patient-centered health care in a variety of clinical settings worldwide;
- Educate future health care professionals who are competent clinicians who can bring a population health orientation to their practice setting;
- Develop practitioners for the future who integrate concepts of prevention, community-oriented primary care, and population health;

- Graduate collaborative clinicians who serve the health care needs of a worldwide community with intelligence, compassion, and integrity;
- Foster analytic thinking skills such that graduates are able to perform a wide range of clinical tasks working with physicians, as well as assessing community health problems and addressing population health needs;
- Nurture a sensitivity and respect for the cultural and personal beliefs of all patients and an understanding of how social, economic, and other system forces can impact health and health care and how these impact patient morbidity and mortality;
- Encourage graduates to be responsive to the needs of patients and society and advocate for quality patient care regardless of patient population;
- Graduate practitioners who will have the information technology and research skills necessary to access and interpret the medical literature and support their ongoing professional development; and
- Expect graduates to practice collaboratively, professionally, legally, ethically, and with integrity.

The PA-MSHS/MPH program draws from a faculty in both the School of Medicine and Health Sciences and the Milken Institute SPH to provide instruction in a wide range of subjects in medicine, public health, and professional leadership.

The purpose of the PA-MSHS/MPH program is to provide future clinicians with a wide range of skills in leadership, policy development, and community and preventive medicine. Students in the program prepare as clinicians fulfilling all of the requirements for national certification as a physician assistant (PA) in the GW Physician Assistant program. In addition, public health coursework provides an orientation to population and community health. For example, in the Community Oriented Primary Care (COPC) track, students acquire skills in community health assessment, community based interventions, and the application of COPC principles in community based practice settings. GW's SPH coursework in health care administration, management, and health care economics prepares students to be leaders in a wide variety of clinical settings, office practices, outpatient clinics, community-based health centers, and health care institutions. Students are also exposed to the formulation of health policy.

Set in the center of the health policy in the nation, the PA-MSHS/MPH program affords students the chance to interact with individuals in both the public and private sector who are involved in policy research, practice, and legislation.

Visit the MPH program website (<http://publichealth.gwu.edu/academics/graduate/masters-programs/>) for additional information.

Visit the PA program website (<https://smhs.gwu.edu/physician-assistant/pa-program/>) for additional information.

Admissions Requirements

Prospective students interested in the joint PA/MPH program receive correspondence from both the School of Medicine and Health Sciences (for the PA-MSHS) and the Milken Institute SPH and School of Medicine and Health Services (for the MPH) regarding the completion of their application and admissions decisions. Should the applicant be accepted to one degree program and not the other, they may accept the admissions offer from the program to which they were accepted, as the decisions are made separately.

1. Submit the PA application (CASPA and PA secondary application) according to instructions. (<http://smhs.gwu.edu/pas/program/prospective-students/admissions/>)
2. Submit the PA secondary application within two weeks of submitting the CASPA.
3. October 1 is the deadline for complete applications to include GRE score receipt.

To save the applicant time and application fees, the School of Medicine and Health Services provides a copy of application materials to the Milken Institute SPH admissions office. Applicants should not complete SOPHAS application or the SPH secondary application, as this delays the processing of the application and results in increased application fees.

COMMUNITY-ORIENTED PRIMARY CARE

Community-Oriented Primary Care Track

The following requirements must be fulfilled: 136 credits, including 100 credits in physician assistant courses, 13 credits in public health core courses, 10 credits in prevention and community health courses, and 13 credits in community oriented primary care track courses.

PUBH 6137	Environmental and Occupational Health Culminating Experience I
PUBH 6138	Environmental and Occupational Health Culminating Experience II
PUBH 6591	PA/MPH Clinical Leadership Seminar

Electives

1 credit in PUBH courses selected with the advisor's approval.

Up to 15 credits may be taken online in the MPH@GWU program.

* PA 6104 Integration into Clinical Concepts I may be cross-credited for PA 6268 Elective Clinical Practicum I with advanced approval by Practicum Director.

HEALTH POLICY

The following requirements must be fulfilled: 138 credits, including 100 credits in physician assistant courses, 10 credits in public health core courses, 25 credits in health policy track courses, and 3 credits in elective courses.

JOINT MASTER OF PUBLIC HEALTH AND JURIS DOCTOR OR MASTER OF LAWS DEGREE PROGRAMS AND JOINT GRADUATE PUBLIC HEALTH CERTIFICATE AND JURIS DOCTOR OR MASTER OF LAW PROGRAMS

Program Contact J. Teitelbaum

The Milken Institute of School of Public Health (SPH), through its Hirsh Health Law and Policy Program, cooperates with the Law School to offer public health and law students multiple programs that foster an interdisciplinary approach to the study of health policy, health law, public health, and health care. Available joint programs include the master of public health (p. 1143) (MPH) and juris doctor (<https://www.law.gwu.edu/juris-doctor/>) (JD); MPH and master of laws (<https://www.law.gwu.edu/master-of-laws/>) (LLM); and JD or LLM and SPH certificate in offered various subject areas. LLM students may be enrolled in either the general or environmental law program at the Law School.

Application of credits between programs

For the JD/MPH, 8 JD credits are applied toward the MPH and up to 12 MPH credits may be applied toward the JD. For the LLM/MPH, 8 LLM credits are applied toward the MPH and up to 6 MPH credits may be applied toward the LLM. For the JD or LLM/SPH certificate programs, each school allows 6 credits to be applied toward the other's program.

Admission

Applicants to joint programs may apply for admission to SPH at the same time they apply to the Law School or after admission to the Law School. JD candidates who do not apply to both schools simultaneously are encouraged to apply for the MPH degree or certificate program by the end of March of their first year of law school. LLM candidates are encouraged to apply to SPH when they apply to the Law School or during their first semester of study.

Applicants to a joint program must complete the application processes for both the Law School (JD or LLM degree) and for the School of Public Health (MPH degree or certificate).

Admission to the joint degree program requires admission to both schools. However, because admission to each school is separate and distinct, applicants who are accepted by one school but not the other are free to enroll in the school to which they have been accepted.

SPH (<http://publichealth.gwu.edu/admissions/graduate-admissions/>) and Law School (<http://www.law.gwu.edu/Admissions/Pages/Default.aspx>) applicants may apply online. Applicants must complete the SOPHAS application as indicated

PUBH 6002	Biostatistical Applications for Public Health
PUBH 6003	Principles and Practices of Epidemiology
PUBH 6007	Social and Behavioral Approaches to Public Health
PUBH 6009	Fundamentals of Public Health Program Evaluation

PUBH 6335	Public Health and Law
or PUBH 6330	Health Services and Law
PUBH 6340	Health Economics and Finance
PUBH 6350	Health Policy Capstone
PUBH 6591	PA/MPH Clinical Leadership Seminar (I)

Electives

3 credits in graduate-level Public Health courses.

at the SPH admissions site, whether applying simultaneously to both schools or as a current GW Law student.

Program Costs

SPH coursework taken while enrolled as a full- or part-time law student is charged at the Law School tuition rate. The SPH tuition rate and fees are charged for semesters when no Law School courses are taken, including summer sessions.

Visit the Hirsh Program website (<http://publichealth.gwu.edu/programs/joint-jdlm-mphcertificate/>) for additional information.

REQUIREMENTS

MPH Requirements

The course of study for the MPH degree consists of 45 credits in one of several focus areas (<http://publichealth.gwu.edu/node/766/>), including a supervised practicum. Because the Milken Institute SPH accepts 8 Law School credits toward completion of the MPH degree, juris doctor (JD) and master of laws (LLM) students need only complete 37 credits of coursework through SPH to obtain an MPH degree.

Depending upon the focus area in which a JD student chooses to study, the joint degree can be earned, as a general rule, in three-and-a-half or four years of full-time study, including summer enrollment. JD candidates selecting joint degree studies in one of the more science-oriented areas, such as epidemiology or biostatistics, should anticipate a four-year course of study. Candidates selecting a less scientific area, such as health policy or health management, can expect to complete their joint degrees in three-and-a-half years. Full-time LLM/MPH candidates should anticipate completing the joint degree in approximately two years. Part-time JD and LLM candidates pursuing joint degrees, of course, have longer courses of study.

Certificate Requirements

The course of study for the graduate certificate consists of 18 credits in one of several focus areas (<http://publichealth.gwu.edu/node/768/>). However, because the Milken Institute SPH accepts 6 Law School credits toward completion of the certificate program, JD and LLM students need only complete 12 credits of coursework through the SPH to obtain a graduate certificate in public health. Upon an individual's subsequent acceptance to the MPH degree program, credits from the graduate certificate may be transferred to the MPH degree program. Full-time JD candidates can complete a graduate certificate during their regular course of study in the Law School. Full-time LLM/certificate candidates typically complete the program in one-and-a-half years.

HEALTH SERVICES ADMINISTRATION SPECIALIST

Program Director L. Friedman

Mission

The health services administration specialist degree program helps students become leaders who possess the values, knowledge, and skills to achieve optimal delivery of health care. The program is designed for individuals who have earned a post-baccalaureate degree and wish to either change careers by gaining knowledge and skills in health services administration or to upgrade their formal knowledge and skills in health care administration to include the latest advancements in the field.

Applicants must hold a post-baccalaureate degree from an accredited college or university.

Visit the program website (<https://publichealth.gwu.edu/programs/health-services-administration-specialist/>) for additional program information.

REQUIREMENTS

Course Requirements

All Health Services Administration Specialist degree candidates complete 30 graduate credits of approved coursework.

1. Thirty graduate credits are required. The Specialist has one required course: HSML 6270 Research in Health Services Administration (Independent Study). All other courses are chosen in consultation with the program director.
2. The program director must pre-approve all course selections and sequencing by developing a "program of study" with the student prior to initial registration. Specialist candidates must meet with the program director each semester before registration; all changes to the program of study must be approved.
3. The program director may approve up to eight graduate credits that have not been applied to a previous graduate degree as transfer credit into the Specialist degree program. Course(s) must be relevant to the Specialist degree; credit must have been earned from an accredited institution within the past three years with a grade of B, or better.
4. Grade Point Requirement: A 3.0 (B average) overall grade point average, or better, is required.
5. Time Limit Requirement: The degree must be completed within four years.

Program Requirements

Code	Title	Credits
Required course:		
HSML 6270	Research in Health Services Administration	

HSML courses that may be taken for the specialist:

PUBH 6004	Environmental and Occupational Health in a Sustainable World
HSML 6202	Introduction to Health Services Delivery
HSML 6203	Introduction to Health Management
HSML 6204	Quality and Performance Improvement
HSML 6206	Quantitative Methods and Epidemiology/Health Services
HSML 6207	Health Services Information Applications
HSML 6208	Medical Informatics
HSML 6209	Health Services Finance
HSML 6210	Health Services Financial Applications
HSML 6211	Health Economics
HSML 6212	Community Health Management and Advocacy
HSML 6213	Health Services, Marketing, and Planning
HSML 6215	Health Law for Managers
HSML 6216	Human Resources Management and Organizational Behavior
HSML 6218	Seminar: Health Services Management and Leadership
HSML 6231	Management of Acute Care Hospitals
HSML 6236	Aging and Disability: Needs and Services
HSML 6237	Managing the Skilled Nursing Facility
HSML 6238	Ambulatory Care Management
HSML 6244	Supply Chain Management in Health Services
HSML 6245	Disaster Management for Health Care Organizations
HSML 6246	Service Line and Project Management
HSML 6247	Consulting in Health Care
HSML 6285	Readings in Health Services Management
HSML 6286	Readings in Health Services Management
HSML 6299	Topics in HSML

DOCTORAL PROGRAMS

Doctoral programs

- Doctor of Philosophy in the field biostatistics (p. 1217)
- Doctor of Philosophy in the field of epidemiology (p. 1219)
- Doctor of Philosophy in the field of health policy (p. 1222)
- Doctor of Philosophy in the field of social and behavioral sciences in public health (p. 1223)
- Doctor of Public Health in the field of environmental and occupational health (p. 1224)
- Doctor of Public Health in the field of global health (p. 1226)
- Doctor of Public Health in the field of health behavior (p. 1227)
- Doctor of Public Health in the field of health policy (p. 1229)

Combined programs

- Dual Doctor of Medicine and Graduate Certificate in Public Health (p. 1230)
- Dual Doctor of Medicine and Master of Public Health (p. 1204)
- Joint Juris Doctor or Master of Laws and Master of Public Health or SPH graduate certificate (p. 1214)

DOCTOR OF PHILOSOPHY IN THE FIELD OF BIOSTATISTICS

Program Director and Academic Advisor H. Liang (CCAS)

The PhD degree program in biostatistics provides doctoral training in the theory of probability, statistics focusing on biostatistical methodology. The 72-credit degree program is jointly administered by the Department of Statistics (<https://statistics.columbian.gwu.edu/>) in the Columbian College of Arts and Sciences (CCAS) and the Department of Epidemiology and Biostatistics in the Milken Institute School of Public Health (<http://publichealth.gwu.edu/>) (SPH) and its associated research facility, The Biostatistics Center. The program is accredited by the Middle States Commission on Higher Education through CCAS and by the Council on Education for Public Health through the Milken Institute SPH. Regulations and requirements for the graduate degree are compatible with policies and scholarship requirements of both CCAS and SPH. The degree is conferred by CCAS.

Visit the program website (<https://publichealth.gwu.edu/programs/biostatistics-phd/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (<https://next.bulletin.gwu.edu/arts-sciences/#degreeregulationstext>).

The requirements for the Doctor of Philosophy Program (<https://next.bulletin.gwu.edu/arts-sciences/#doctoraltext>).

Required preparatory courses

Code	Title	Credits
Undergraduate course requirements (or equivalents to these GW courses) for admission consideration:		
MATH 1231	Single-Variable Calculus I	
MATH 1232	Single-Variable Calculus II	
STAT 2118	Regression Analysis	
MATH 2233	Multivariable Calculus	

Code	Title	Credits
Additional course requirements* (or equivalents to these GW courses):		
MATH 2184	Linear Algebra I	
One of the following courses:		
STAT 2183	Intermediate Statistics Lab/Packages	
PUBH 6249	Use of Statistical Packages: Data Management and Data Analysis	

*Applicants lacking these courses (or equivalents to these GW courses) will be considered for admission, but, if admissible, will be admitted conditionally with the expectation that these courses will be satisfactorily completed within two semesters following matriculation in the program. These credits do not count as credit toward the 72-credit graduation requirement nor are grades earned in additional courses reflected in the overall grade-point average.

Doctoral program requirements

The following requirements must be fulfilled: 72 credits, including a minimum of 51 credits in required and elective courses and a minimum of 12 credits in dissertation research; successful completion of the general and final examinations; and completion of the professional enhancement requirement. See below for additional information.

Code	Title	Credits
Required		
Statistics core		
STAT 6201	Mathematical Statistics I	

STAT 6202	Mathematical Statistics II (* Comprehensive Exam)
STAT 6210	Data Analysis
STAT 6213	Intermediate Probability and Stochastic Processes (* Comprehensive Exam)
PUBH 8365	Design of Medical Studies
PUBH 8366	Biostatistical Methods (* Comprehensive Exam)
STAT 8226	Advanced Biostatistical Methods
STAT 6227	Survival Analysis
STAT 8263	Advanced Statistical Theory I
STAT 6218	Linear Models
Public health core	
PUBH 6003	Principles and Practices of Epidemiology

One of the following:

PUBH 6247	Design of Health Studies
PUBH 6299	Topics in Epidemiology and Biostatistics
PUBH 6007	Social and Behavioral Approaches to Public Health
or PUBH 6006	Management and Policy Approaches to Public Health

Electives

9 credits in electives from the following approved lists of STAT and PUBH courses.

Approved statistics electives (at least 3 credits must be selected from among the first three courses below):

STAT 6231	Categorical Data Analysis
STAT 8262	Nonparametric Inference
STAT 6214	Applied Linear Models
STAT 6207	Methods of Statistical Computing I
STAT 6208	Methods of Statistical Computing II
STAT 6215	Applied Multivariate Analysis I
STAT 6216	Applied Multivariate Analysis II
STAT 6217	Design of Experiments

STAT 6223	Bayesian Statistics: Theory and Applications
STAT 6242	Modern Regression Analysis
STAT 6287	Sample Surveys
STAT 6289	Topics in Statistics
STAT 8257	Probability
STAT 8258	Distribution Theory
STAT 8263	Advanced Statistical Theory I
STAT 8264	Advanced Statistical Theory II
STAT 8265	Multivariate Analysis
STAT 8273	Stochastic Processes I
STAT 8274	Stochastic Processes II
STAT 8281	Advanced Time Series Analysis
STAT 8288	Topics in Sample Surveys
BIOS 8998	Advanced Reading and Research (see advisor)

Approved public health electives:

PUBH 6242	Clinical Epidemiology and Public Health: Reading the Research (recommended)
PUBH 6244	Cancer Epidemiology
PUBH 6245	Infectious Disease Epidemiology
PUBH 8419	Measurement in Public Health and Health Services

Consulting

Consulting courses may be waived by the Biostatistics Program Director, based on written documentation of prior equivalent coursework or relevant work experience. Waiver of the consulting course increases the total number of elective to be taken by the number of consulting credits waived.

PUBH 8283	Doctoral Biostatistics Consulting Practicum
PUBH 6258	Advanced Topics in Biostatistical Consulting

Dissertation research

BIOS 8999	Dissertation Research (taken for 6 to 24 credits)
-----------	--

General and final examinations

The general examination is given in two parts:

- Part I is the qualifying exam, a written comprehensive examination based on the course content of STAT 6201, STAT 6202 (administered by faculty of the Department of Statistics), and PUBH 8366 (administered by the faculty of the Department of Epidemiology and Biostatistics).
- The qualifying examination is given over a two-day period in the beginning of the fall semester of every academic year and consists of one four-hour theory exam and one two-hour biostatistical methods/applications exam. Students are expected to take the comprehensive examination within 24 months from the date of enrollment in the program. A student who fails to pass the comprehensive examination may, with the approval of the faculty, repeat the examination the following year. Failure on the second attempt results in termination from the PhD program.
- All examination questions focus on material that a person seeking a PhD in biostatistics is expected to know, regardless of subsequent specialization. The examination encompasses material in core mathematical statistics—STAT 6201 and STAT 6202—and biostatistical methods courses—PUBH 8366—in the PhD program in biostatistics. Specifically,

1. The theory portion of the exam—STAT 6201 and STAT 6202—is based on the first 10 chapters of Casella G and Berger RL (1990). *Statistical Inference*. Second Edition, Duxbury Press.
2. The biostatistical methods portion of the exam—PUBH 8366—is based on chapters 1 to 8 of Lachin J.M. (2010) *Biostatistical Methods: The Assessment of Relative Risks*, 2nd Edition, Wiley.

- Part II, the research proposal, consists of an oral examination based on a written dissertation research proposal. As soon as feasible after successful completion of the comprehensive exam, students are encouraged to identify a dissertation advisor and a topic of research. The written dissertation proposal is then submitted to the student's Dissertation Research Committee, and the student makes an oral presentation of their proposal to the Committee. The Committee determines the student's readiness to pursue and successfully complete the proposed research, in addition to the appropriateness of the specific problem for dissertation-level research.

Upon successful completion of the required coursework and both parts of the general examination, the candidate is generally recommended to the Associate Dean for Graduate Affairs of the Columbian College of Arts and Sciences (CCAS) for promotion to PhD candidacy—the dissertation research. A candidate must file an approved dissertation research plan with CCAS before being admitted to PhD candidacy. Prior to completion of the general examination, a student may register for at most 6 credits of BIOS 8999.

Consult with the Biostatistics Program Director or academic advisor for dissertation guidelines.

Professional enhancement requirement: 8 hours

Professional enhancement activities supplement the academic curriculum and help prepare students to participate actively in the professional community. They enhance practical knowledge and awareness of public health issues – either in general or in a student's specific area of study.

Students can fulfill this requirement by attending workshops, seminars, or other relevant professional meetings, which are often held at the Milken Institute School of Public Health (SPH) and in the metropolitan Washington, DC, area. Examples of conference sponsors include the National Academy for State Health Policy, the Pan American Health Organization, the American Public Health Association, the American College of Healthcare Executives, the Area Health Education Center, the American College of Sports Medicine, and the National Athletic Trainer's Association. Opportunities for professional enhancement are regularly publicized via the SPH Listserv and through the department or the biostatistics academic advisor.

Students must submit documentation of professional enhancement activities to the biostatistics academic advisor, which includes a **prior** approval, a description of the program agenda, and proof of attendance before applying for graduation.

Visit the program website (<http://publichealth.gwu.edu/programs/biostatistics-phd/>) for additional information.

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (<https://next.bulletin.gwu.edu/arts-sciences/#degreeregulationstext>).

The requirements for the Doctor of Philosophy Program (<https://next.bulletin.gwu.edu/arts-sciences/#doctoralstext>).

DOCTOR OF PHILOSOPHY IN THE FIELD OF EPIDEMIOLOGY

Program Director S. Cleary

The purpose of the doctor of philosophy program is to prepare students for a career in epidemiologic research in an academic, government, or industry setting. The PhD graduate is expected to have knowledge across a wide range of epidemiologic theories and methods and specific knowledge of the epidemiology of one of the following areas: chronic disease, infectious disease, environmental and occupational health.

Doctoral students are required to pass a written comprehensive examination and to complete a dissertation.

At the completion of the doctoral program in epidemiology students should be able to:

- Demonstrate understanding of general and specialized epidemiologic concepts;
- Develop a research protocol;
- Conduct and analyze data from a research study; and
- Disseminate research findings.

Admissions Requirements

Applicants must hold an undergraduate degree from an accredited institution of higher learning. Although not required, most admitted students have completed a master's degree prior to admission. Before applying, applicants must provide evidence of the completion of these required prerequisites:

- Calculus I and II- 6 credits
- Human Biology- 8 credits

And, the following courses are highly recommended admission prerequisites:

- Linear Algebra- 3 credits
- SAS- 3 credits

If desired, a student may complete the MS or MPH program prior to admission to the PhD degree program, in which case no more than 24 credits from these degrees may be applied to the PhD coursework requirements. In this instance the student is required to take a minimum of 27 additional credits of coursework plus dissertation research credits. The distribution of these courses between epidemiology and statistics depends on the nature of the master's degree and whether the transferred credits are used to defray epidemiology or statistics coursework. All applications are submitted through SOPHAS.org (<http://sophas.org/>).

Visit the program website (<https://publichealth.gwu.edu/programs/epidemiology-phd/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled:

72 credits, including 16 credits in public health core courses, and all requirements for the Doctor of Philosophy Program (<https://next.bulletin.gwu.edu/arts-sciences/#doctoraltext>); 12 to 15 credits in statistics core courses (depending on which option the student follows); 3 credits in program-specific epidemiology selective courses; a minimum of 14 to 17 credits in elective courses, depending on which option the student follows; 3 credits in consulting courses; and 12 to 21 credits in dissertation research; successful completion of a comprehensive exam.

Two program options are available: Option A is more quantitative and includes advanced statistical coursework in the Department of Statistics. Option B, while also quantitative, allows for courses and electives with a primary focus on public health.

Preparatory Requirements

Code	Title	Credits
Minimum prerequisite courses for admission consideration		
BISC 1115 & BISC 1126	Introductory Biology: Cells and Molecules and Introduction to Organisms Laboratory	
BISC 1116 & BISC 1126	Introductory Biology: The Biology of Organisms and Introduction to Organisms Laboratory	
MATH 1231	Single-Variable Calculus I	
MATH 1232	Single-Variable Calculus II	
MATH 2233	Multivariable Calculus (option A only)	

Additional course requirements for admissions consideration

The courses listed below are additional course preparatory requirements. Applicants lacking these courses (or equivalents to these GW courses) will be considered for admission, but will be admitted conditionally with the expectation that these courses will be completed within two semesters following matriculation in the program. Credit for these courses does not count toward the 72 credits required for the degree and grades earned are not reflected in the overall grade-point average.

MATH 2184	Linear Algebra I	
STAT 2183	Intermediate Statistics Lab/Packages	
or PUBH 6249	Use of Statistical Packages: Data Management and Data Analysis	

Degree Requirements

Code	Title	Credits
Public health core		
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6247	Design of Health Studies	
PUBH 6252	Advanced Epidemiology Methods	

PUBH 8419	Measurement in Public Health and Health Services
PUBH 6080	Pathways to Public Health
Plus 4 credits Public Health elective selected with advisors approval	
Statistics core	
STAT 6210	Data Analysis (OR)
PUBH 8365	Design of Medical Studies
PUBH 8366	Biostatistical Methods (basis for PhD general comprehensive)
Required for Option A	
STAT 6201	Mathematical Statistics I
STAT 6202	Mathematical Statistics II
Required for Option B	
PUBH 8364	Quantitative Methods
Required program-specific courses	
One of the following two-course sets for a total of 3 credits.	
PUBH 6242 & PUBH 8242	Clinical Epidemiology and Public Health: Reading the Research and Advanced Topics in Clinical Epidemiology and Public Health: Reading the Research
or	
PUBH 6244 & PUBH 8244	Cancer Epidemiology and Doctoral Topics: Cancer Epidemiology
or	
PUBH 6245 & PUBH 8245	Infectious Disease Epidemiology and Doctoral Topics: Infectious Disease Epidemiology
or	
PUBH 6250 & PUBH 8250	Epidemiology of HIV/AIDS and Doctoral Topics: Epidemiology of HIV/AIDS
or	
PUBH 6259 & PUBH 8259	Epidemiology Surveillance in Public Health and Doctoral Topics: Epidemiologic Surveillance in Public Health
Electives	

14 to 17 credits (depending on whether Option A or Option B was selected. See above.) in graduate-level elective courses in PUBH, HSML, EXNS, or STAT.* Examples of such courses include:

PUBH 6123	Toxicology: Applications for Public Health Policy
PUBH 6124	Risk Management and Communication
PUBH 6260	Advanced Data Analysis for Public Health
PUBH 6262	Introduction to Geographic Information Systems
PUBH 6263	Advanced GIS
PUBH 6267	Time Series Applications in Public Health
PUBH 6268	Advanced SAS
PUBH 6299	Topics in Epidemiology and Biostatistics

Other electives as approved in advance by the program director.

Statistics electives (for students pursuing Option A)

STAT 6213	Intermediate Probability and Stochastic Processes
STAT 6215	Applied Multivariate Analysis I
STAT 6216	Applied Multivariate Analysis II
STAT 6217	Design of Experiments
STAT 6223	Bayesian Statistics: Theory and Applications
STAT 6227	Survival Analysis
STAT 8226	Advanced Biostatistical Methods

Consulting

3 credits	
PUBH 6258	Advanced Topics in Biostatistical Consulting
PUBH 8283	Doctoral Biostatistics Consulting Practicum

The epidemiology program director may waive the consulting requirement based on written documentation of prior equivalent coursework or relevant work experience. Waiver of the consulting requirement increases the total required number of elective credits proportionally.

Dissertation research

12 to 21 credits of the following:

PUBH 8999	Dissertation Research (taken in units of 3 credits)
-----------	---

*Total required elective credits varies depending on whether the student is following Option A or Option B. This also will be affected if the consulting requirement is waived.

DOCTOR OF PHILOSOPHY IN THE FIELD OF HEALTH POLICY

Co-Program Directors: A. Dor, L. Ku

Mission

The PhD in Health Policy is focused on understanding and critically assessing the political, legal, economic, and social aspects of health policy and management and learning to apply innovative research tools to analyze processes and outcomes in the health care delivery and public health settings to inform policy decision-making. Special emphasis is placed on US health policies, systems, and population health.

Goals

Knowledge acquired in this PhD program will prepare candidates for work in academic, non-academic, and public research institutions, as well as in decision-making capacities in the field.

The objectives of this specialty field are to:

- Equip candidates with the research and analytic methods they need to analyze and evaluate the social, economic, legal and health aspects of public and private policies.
- Provide advanced training in health policy analysis using cutting edge quantitative and qualitative methods
- Gain familiarity on existing data sources and data collection methods pertaining to health programs and behaviors.
- Synthesize information on population health, legislative processes, finance and insurance schemes to motivate policy analysis

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 15 credits in public health fundamentals and advanced health policy courses; 12 credits in methods and advanced statistics; 9 credits minimum in elective courses, 12 credits in dissertation preparation and dissertation research; and successful completion of a comprehensive examination.

Code	Title	Credits
------	-------	---------

Required

Core fundamental courses

PUBH 6340	Health Economics and Finance
PUBH 8401	Foundations in Public Health Leadership and Practice
PUBH 8620	Seminar: Foundations of U.S. Health Policy

PUBH 8610	Statistical Methods for Health Policy
or PUBH 8418	Applied Statistical Analysis

PUBH 8622	Health Care Payments, Systems, and Delivery Models

Core methods courses

PUBH 8404	Advanced Topics: Health Systems and Health Policy Research
-----------	--

PUBH 8405	Advanced Topics: Health Economics Research
-----------	--

PUBH 8417	Qualitative Research Methods and Analysis
-----------	---

PPPA 8022	Econometrics for Policy Research II
-----------	-------------------------------------

Electives

9 credits in elective courses. A recommended list of electives is available in the program guide. Other doctoral-level electives may be approved by the advisor.

Dissertation

PUBH 8422	Advanced Health Care and Public Health Research Design
or PUBH 8435	Dissertation Proposal Development for Social and Behavioral Sciences
PUBH 8999	Dissertation Research

Graduation requirements as follow:

1. Credits: Successful completion of 48 credits.
2. Comprehensive examination: Once the course of study is completed, students are required to pass the comprehensive exam to be officially admitted to the candidacy phase.
3. Dissertation: PUBH 8422 or PUBH 8435 dissertation preparation course plus 10 credits in dissertation research are required. Once the proposal has been successfully

defended and the dissertation research credit requirements has been met, the oral defense may be scheduled.

4. Grade-point average: A minimum overall grade-point average of *B* (3.0).
5. Time limit: The degree must be completed within seven years.

DOCTOR OF PHILOSOPHY IN THE FIELD OF SOCIAL AND BEHAVIORAL SCIENCES IN PUBLIC HEALTH

Program Director M. Napolitano

Mission

The PhD in social and behavioral sciences in public health degree program is designed to develop public health scholars who are at the forefront of social and behavior change. The program trains students to conduct independent research that is theoretically sound and applicable across a variety of contexts in order to prevent diseases and promote health and well-being.

Goals

The goal of the PhD degree program is to train students to conduct rigorous and state-of-the-art independent research to advance understanding of social and behavioral sciences in public health. The program is designed to be four years in duration, with comprehensive exams at the end of the second year, and full dissertation work during the remaining two years.

Visit the program website (<https://publichealth.gwu.edu/programs/social-and-behavioral-sciences-phd/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 12 credits in foundation courses, 9 credits in statistics courses, 9 credits in methods courses, 9 credits minimum in elective courses, and 9 credits in dissertation preparation and dissertation research; successful completion of a comprehensive exam.

Code	Title	Credits
Foundational and research courses		
PUBH 8408	Advanced Topics: Health Behavior Research & Practice Applications	
PUBH 8409	Advanced Topics: Health Communication Research	
PUBH 8416	Study Design & Evaluation Methods	
PUBH 8434	Behavioral Medicine and Public Health	

PUBH 6080	Pathways to Public Health
Statistics	
PUBH 8418	Applied Statistical Analysis
PUBH 8419	Measurement in Public Health and Health Services
And at least 3 additional credits from the following:	
DNSC 6211	Programming for Analytics
DNSC 6215	Social Network Analytics
DNSC 6274	Statistical Modeling and Analysis
DNSC 6275	Advanced Statistical Modeling and Analysis
DNSC 6276	Exploratory and Multivariate Data Analysis
ECON 8375	Econometrics I
EDUC 8144	Discourse Analysis
EDUC 8171	Predictive Designs and Analyses
EDUC 8173	Structural Equation Modeling
FINA 6271	Financial Modeling and Econometrics
MBAD 6221	Judgment, Uncertainty, and Decisions
MBAD 6222	Data Analysis and Decisions
PPPA 8022	Econometrics for Policy Research II
PSYC 8257	Current Topics in Social Psychology (ONLY Structural Equation Modeling)
PUBH 6299	Topics in Epidemiology and Biostatistics (ONLY Applied Meta-Analysis with R)
Methods	
PUBH 8417	Qualitative Research Methods and Analysis
PUBH 6242	Clinical Epidemiology and Public Health: Reading the Research
PUBH 8242	Advanced Topics in Clinical Epidemiology and Public Health: Reading the Research
And at least 3 additional credits from the following:	
EDUC 8122	Qualitative Research Methods
EDUC 8130	Survey Research Methods

EDUC 8131	Case Study Research Methods
EDUC 8140	Ethnographic Research Methods
EDUC 8142	Phenomenological Research Methods
PSYC 8231	Development of Psychometric Instruments
PSYC 8256	Introduction to Survey Research
PSYC 8258	Qualitative Research and Analysis
PUBH 8364	Quantitative Methods
PUBH 8365	Design of Medical Studies

Content area electives

A minimum of 9 credits, including at least one course in each of the following two categories:

Social and Behavioral Sciences

ANTH 6501	Gender and Sexuality
ANTH 6505	Medical Anthropology
EXNS 6242	Nutrition Throughout the Life Cycle
PHIL 6253	Cognitive Science and Public Policy
PSYC 8211	Community Psychology I
PSYC 8212	Community Psychology II
PSYC 8253	Social Cognition
PSYC 8254	Social Influence
PSYC 8255	Attitudes and Attitude Change
PSYC 8275	Women and Health
PSYC 8287	Current Topics in Clinical Psychology (ONLY Structural Equation Modeling)
PUBH 6262	Introduction to Geographic Information Systems
PUBH 6555	Reproductive Health: U.S. and Global Perspectives
PUBH 6561	Maternal and Child Health Policy Analysis
PUBH 6562	Physical Activity and Obesity Interventions: From the Individual to the Environment
PUBH 6571	Social Marketing: Theory and Practice
PUBH 6573	Media Advocacy for Public Health

PUBH 6574	Public Health Branding: Theory and Practice
PUBH 6599	Topics in Prevention and Community Health (ONLY Culture and Health)
PUBH 8405	Advanced Topics: Health Economics Research
Current Issues in Public Health	
HCS 8369	Issues in Health Care
HDEV 8100	Issues and Special Topics in Human Development
PUBH 8401	Foundations in Public Health Leadership and Practice
PSYC 8220	Ethics and Professional Issues
PSYC 8236	Ethnic and Racial Diversity in Psychology

Other elective course options

Elective courses at the 8000-level not listed above do not require approval prior to enrollment. Advance approval of the advisor is required for all other courses.

Dissertation preparation and dissertation

PUBH 8435	Dissertation Proposal Development for Social and Behavioral Sciences
PUBH 8999	Dissertation Research (taken for 7 credits)

DOCTOR OF PUBLIC HEALTH IN THE FIELD OF ENVIRONMENTAL AND OCCUPATIONAL HEALTH

Program Director G. Gray

Mission

The mission of the Department of Environmental and Occupational Health (EOH) is to increase the body of knowledge that addresses the adverse health effects of environmental and occupational exposures; to disseminate knowledge through the education of students and health practitioners; and to apply that knowledge in the clinical, environmental, and workplace settings.

Goal

The goal of the doctor of public health in the field of environmental and occupational health (DrPH) degree program is to prepare students for advanced level professional work in research, policy, and program design and administration.

Program Policies and Procedures

For program policies and procedures, please refer to the Doctor of Public Health Handbook and other resources on the DrPh in the field of Environmental and Occupational Health website. (<http://publichealth.gwu.edu/programs/environmental-occupational-health-drph/>)

Visit the program website (<https://publichealth.gwu.edu/programs/environmental-occupational-health-drph/>)for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 22 credits in required courses, 6 credits in field-specific courses, 7 to 10 credits in elective courses, 2 credits in professional leadership courses, 8 to 11 credits in dissertation preparation and dissertation, and successful completion of a comprehensive examination.

Program requirements

Code	Title	Credits
22 credits of required foundational and research methods courses		
PUBH 8401	Foundations in Public Health Leadership and Practice (Doctoral Seminar)	
PUBH 8402	Leadership and Decision Making: Skills Based Approach	
PUBH 8403	Leadership in Public Health Policy and Practice	
PUBH 8416	Study Design & Evaluation Methods	
PUBH 8417	Qualitative Research Methods and Analysis	
PUBH 8418	Applied Statistical Analysis	
PUBH 8419	Measurement in Public Health and Health Services	
PUBH 8420	Advanced Analysis and Dissemination	
6 credits of required EOH specialty field courses		
PUBH 8411	Advanced Topics: Principles of Human Health Risk Science (Doctoral Seminar)	
PUBH 8412	Advanced Topics: Environmental and Occupational Health Research and Practice	
7 to 10 credits of elective specialty field courses (sample list)		

PUBH 6121	Environmental and Occupational Epidemiology
PUBH 6122	Protecting Public Health and the Environment: Policies, Politics, and Programs
PUBH 6123	Toxicology: Applications for Public Health Policy
PUBH 6124	Risk Management and Communication
PUBH 6126	Assessment and Control of Environmental Hazards
PUBH 6127	Introduction to Environmental Health Microbiology
PUBH 6128	Global Environmental and Occupational Health
PUBH 6130	Sustainable Energy and the Environment
PUBH 6199	Topics in EOH (Microbial Risk Assessment)
PUBH 6199	Topics in EOH (Pesticide Exposures and Cancer)
PUBH 6199	Topics in EOH (Food and the Global Environment)

2 credits of professional leadership

PUBH 8415	Instructional Leadership
PUBH 8413	Research Leadership

Comprehensive examination

8 to 11 credits of dissertation preparation and dissertation

PUBH 8422	Advanced Health Care and Public Health Research Design
PUBH 8423	Dissertation Research

Graduation Requirements

1. Credits: Successful completion of 48 credits.
2. Curriculum: Successful completion of the foundational, research methods, program-specific specialty field, and professional leadership courses.
3. Comprehensive examination: Once the course of study is completed, students are required to pass the comprehensive exam to be officially admitted to the candidacy phase.

4. Dissertation: PUBH 8422 Advanced Health Care and Public Health Research Design plus 6 to 9 credits in dissertation research credits are required. Once the proposal has been successfully defended and the dissertation research credit requirements has been met, the oral defense may be scheduled.
5. Grade-point average: A minimum overall grade-point average of B (3.0).
6. Time limit: The degree must be completed within seven years.

Note: no transfer credits are accepted.

DOCTOR OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH

Program Director A. Roess

Mission

The doctor of public health in the field of global health (DrPH) degree program is the terminal degree in the professional discipline of public health. Consistent with this advanced professional orientation, the DrPH program prepares future public health leaders to apply critical thinking skills and rigorous research methods to the complex practical problems facing practitioners and policy-makers in public health practice. The program is designed to both follow and promote the principles of academic public health practice. As noted in a recent ASPH publication, public health practice is the strategic, organized, and interdisciplinary application of knowledge, skills, and competencies necessary to perform essential public health services and other activities to improve the populations' health. Academic public health practice is the applied, interdisciplinary pursuit of scholarship in the field of public health. Recent events sharply illustrate the need for public health professionals who can provide the leadership to expand and strengthen the US and global public health systems. The DrPH program is designed to prepare professionals with skills to provide this leadership.

From the combination of coursework and the implementation of the knowledge in the context of a thesis project in outstanding international placements, the DrPH degree program in Global Health enables professionals to develop innovative approaches and ability to negotiate the complex interrelationship between health and political, economic, and human development.

Goals

The DrPH graduate is prepared to assume an advanced level of leadership in global health, in the context of health research as well as implementation programs in an international setting.

Program Policies and Procedures

For program policies and procedures, please refer to the Doctor of Public Health Handbook and other resources

located on DrPH in the field of Global Health website (<http://publichealth.gwu.edu/programs/global-health-drph/>).

Visit the program website (<https://publichealth.gwu.edu/programs/global-health-drph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 22 credits in required courses, 6 credits in field-specific courses, 7 to 10 credits in elective courses, 2 credits in professional leadership courses, 8 to 11 credits in dissertation preparation and dissertation, and successful completion of a comprehensive examination.

Program requirements:

6. Time limit: The degree must be completed within seven years.

Note: no transfer credits are accepted.

DOCTOR OF PUBLIC HEALTH IN THE FIELD OF HEALTH BEHAVIOR

Program Director M. Napolitano

Mission

The mission of the Department of Prevention and Community Health is to train professionals to provide leadership in the field of health behavior. The doctor of public health in the field of health behavior degree program is based on the ecological model of health and well-being and is aimed at understanding and having an impact on the health of populations and cultures, with special emphasis on underserved populations. Graduates are prepared to apply their research and analytic skills to a range of implementation, evaluation, and advocacy needs of various cultural and socioeconomic groups and communities.

Visit program website (<https://publichealth.gwu.edu/programs/health-behavior-drph/>) for the Doctor of Public Health Handbook and other resources.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 22 credits in required courses, 6 credits in field-specific courses, 7 to 10 credits in elective courses, 2 credits in professional leadership courses, 8 to 11 credits in dissertation preparation and dissertation, and successful completion of a comprehensive examination.

Note: no transfer credits are accepted.

DOCTOR OF PUBLIC HEALTH IN THE FIELD OF HEALTH POLICY

Program Director A. Markus

Mission

The doctor of public health (DrPH) health policy specialty field degree program focuses on understanding and learning to apply to complex and real world problems the policy framework of public health and health care. Particular emphasis is placed on areas affecting medically underserved and vulnerable populations. The specialty field allows candidates to work at the nexus of health policy, public health practice, and health services research.

Goals

The goal of the health policy specialty field is to create doctoral-level public health professionals who are uniquely equipped to provide real-world leadership at the national and state levels in all phases of public health, health care, and health policy development and implementation. The objectives of this specialty field are to:

- Provide advanced training on cutting edge issues in health policy; and
- Equip candidates with the research and analytic methods to conduct the types of advanced analyses that can make a real difference in health care and public health.

Program Policies and Procedures

For program policies and procedures, please refer to the Doctor of Public Health Handbook and other resources located on the program website (<http://publichealth.gwu.edu/programs/health-policy-drph/>).

Visit the program website (<https://publichealth.gwu.edu/programs/health-policy-drph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 22 credits in required courses, 6 credits in field-specific courses, 7 to 10 credits in elective courses, 2 credits in professional leadership courses, 8 to 11 credits in dissertation preparation and dissertation, and successful completion of a comprehensive examination.

PUBH 8415	Instructional Leadership
8 to 11 credits of dissertation preparation and dissertation	
PUBH 8422	Advanced Health Care and Public Health Research Design
PUBH 8423	Dissertation Research

Graduation Requirements

1. Credits: Successful completion of 48 credits.
2. Curriculum: Successful completion of the foundational, research methods, program-specific specialty field, and professional leadership courses.
3. Comprehensive examination: Once the course of study is completed, students are required to pass the

comprehensive exam to be officially admitted to the candidacy phase.

4. Dissertation: PUBH 8422 Advanced Health Care and Public Health Research Design plus 6 to 9 credits in dissertation research credits are required. Once the proposal has been successfully defended and the dissertation research credit requirements has been met, the oral defense may be scheduled.
5. Grade-point average: A minimum overall grade-point average of B (3.0).
6. Time limit: The degree must be completed within seven years.

Note: no transfer credits are accepted.

DOCTOR OF MEDICINE AND GRADUATE CERTIFICATE IN PUBLIC HEALTH

The School of Medicine and Health Sciences (SMHS) and Milken Institute School of Public Health (GWSPH) jointly offer a dual doctor of medicine (MD) and graduate certificate in public health program. Medical students can complete the 15-credit graduate certificate within the 4-year MD program structure. Students take 10 credits from the required public health certificate program curriculum at GWSPH; the remaining 5 credits are satisfied through coursework cross-credited from the MD program. In addition, 4 credits taken at GWSPH as part of the certificate program, PUBH 6004 Environmental and Occupational Health in a Sustainable World and PUBH 6007 Social and Behavioral Approaches to Public Health, are cross-counted as 4 weeks of MD Year 4 electives.

Students will receive the certificate only upon completion of all graduate certificate and MD program requirements.

All credits successfully completed for the MD/graduate certificate public health program can be applied toward the MD/MPH if students choose to pursue that program within their 4-year MD program.

Cross-credited with IDIS 8101 (5 credits)

*Cross-counted as 4 weeks of MD Year 4 electives

GWSPH cross-credits 5 credits—2 credits for PUBH 6001 Biological Concepts in Public Health and 3 credits for PUBH 6006 Management and Policy Approaches to Public Health—for credits taken under IDIS 8101 Foundations of Medicine in the MD program.

Code	Title	Credits

Required public health courses (10 credits)

PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6004	Environmental and Occupational Health in a Sustainable World *	
PUBH 6007	Social and Behavioral Approaches to Public Health *	

CERTIFICATE PROGRAMS

Certificate Programs

- Graduate certificate in health administration generalist (p. 1231)
- Graduate certificate in health policy (p. 1232)
- Graduate certificate in public health (p. 1232)

GRADUATE CERTIFICATE IN HEALTH ADMINISTRATION GENERALIST

Program Director L. Friedman

The health administration generalist certificate develops health sector leaders, innovators, and managers who are dedicated to advancing the health of local, national, and global communities. Combining the master’s degree in one of the Milken Institute School of Public Health academic departments with this graduate certificate uniquely positions graduates for careers that require breadth and depth of knowledge and skills in health services. This certificate program is open to applicants with a master’s or higher degree who may wish to gain knowledge and skills in health services management. Applicants without a master’s degrees (e.g., public health nursing (RN) may be eligible depending on their professional experience in public health. Students work with an advisor to tailor a program suited to the student's individual professional goals.

Visit the program website (<https://publichealth.gwu.edu/programs/health-administration-generalist-certificate/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses; substitutions may be allowed with the advisor's approval.

Code	Title	Credits
Required		
18 credits from the following (with advisor approval)		
HSML 6202	Introduction to Health Services Delivery	
HSML 6203	Introduction to Health Management	
HSML 6204	Quality and Performance Improvement	
HSML 6206	Quantitative Methods and Epidemiology/Health Services	
HSML 6207	Health Services Information Applications	
HSML 6208	Medical Informatics	

HSML 6209	Health Services Finance
HSML 6210	Health Services Financial Applications
HSML 6211	Health Economics
HSML 6212	Community Health Management and Advocacy
HSML 6213	Health Services, Marketing, and Planning
HSML 6215	Health Law for Managers
HSML 6216	Human Resources Management and Organizational Behavior
HSML 6218	Seminar: Health Services Management and Leadership
PUBH 6004	Environmental and Occupational Health in a Sustainable World
Other courses may be used to fulfill the requirement with advisor approval.	

Graduation Requirements

1. The program director/advisor must pre-approve all course selections and course sequencing by developing a “program of study” prior to the student’s initial registration. Graduate certificate students meet with their advisor each semester before registration. All changes in this program of study must be pre-approved by the program director/advisor.
2. Course Requirements: Since most graduate certificate students are currently enrolled in an MPH program or have previously earned a graduate degree, most course credits are selected from the program-specific course list. Under no circumstances may a certificate student enroll in fewer than 9 credits of program-specific courses.
3. Grade Point Requirement: A 3.0 (B average) overall grade-point average or above is required for the award of the certificate.
4. Time Limit Requirement: The certificate must be completed within two years.
5. Transfer Credit Policy: The program director/advisor may approve up to 4 graduate credits that have not been applied to a previous graduate degree to be transferred to the graduate certificate. The course(s) must be relevant to the graduate certificate. Credits must have been earned in the last three years with a grade of 3.0 or above.
6. Transfer to Degree Program Policy: Students can transfer as many credits as meet program requirements to a Master of Health Administration (MHA) degree program from the Health Administration Generalist Graduate Certificate. Students wishing to transfer to the MHA may apply to do so via the online change of concentration petition after completion of three or more courses and a cumulative GPA

of 3.0 or above. A grade of *B* or above is required for a course to be eligible for transfer. Students interested in applying to the MHA degree program should meet with the program director regarding program-specific admission requirements. Transfer credits must have been completed within the past three years.

GRADUATE CERTIFICATE IN HEALTH POLICY

Program Director L. Cartwright-Smith

For those seeking a solid foundation in the substance of health policy and the skills of health policy analysis, but who do not wish to undertake the full master of public health degree program, the Milken Institute School of Public Health (SPH) Department of Health Policy and Management offers an 18-credit graduate certificate. Designed to provide both basic and advanced-level skills in policy research and analysis, the program curriculum includes elective course offerings; in consultation with their advisor, students use these options to craft a personalized course of study to fit their particular needs and interests.

The graduate certificate in health policy may be taken on its own; as a supplement to a master of public health degree from a different Milken Institute SPH department or as a supplement to a graduate degree from another school. When pursued as a supplement to the master's degree from a different Milken Institute SPH department, 6 credits from the MPH degree may be counted toward the 18 credits required for the certificate, allowing students to complete both the degree and certificate program simultaneously by taking 57 credits.

Visit the program webpage (<http://publichealth.gwu.edu/programs/health-policy-certificate/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 13 credits in required courses and 5 credits in elective courses.

Code	Title	Credits
Required		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6012	Fundamentals of Health Policy	
PUBH 6310	Statistical Analysis in Health Policy	
PUBH 6315	Introduction to Health Policy Analysis	
PUBH 6320	Advanced Health Policy Analysis	

Electives

5 credits in health policy elective courses.

Graduation Requirements

- Graduate credit requirement: 18 graduate credits are required.
- The program director/advisor must pre-approve all course selections and course sequencing by developing a "program of study" prior to the student's initial registration. Graduate certificate students meet with their advisor each semester before registration. All changes in this program of study must be pre-approved by the program director/advisor.
- Successful completion of the required online CITI human subject research training modules.
- Successful completion of 8 Professional Enhancement hours.
- Grade point requirement: A 3.0 (*B* average) overall grade-point average or above is required.
- Time limit requirement: The certificate must be completed within two years.
- Transfer credit policy: The program director/advisor may approve up to 4 graduate credits that have not been applied to a previous graduate degree to be transferred to the graduate certificate. The course(s) must be relevant to the graduate certificate. Credits must have been earned in the last three years with a grade of 3.0 or above.
- Transfer to Degree Program Policy: Students can transfer as many credits as meet program requirements to a Master of Public Health (MPH) degree program from the Public Health Graduate Certificate. Students wishing to transfer to a degree program may apply to do so via the online change of concentration petition after completion of three or more courses and a cumulative GPA of 3.0 or above. A grade of *B* or above is required for a course to be eligible for transfer. Students interested in applying to an MPH degree program should meet with departmental advisors regarding program-specific admission requirements. Transfer credits must have been completed within the past three years.

GRADUATE CERTIFICATE IN PUBLIC HEALTH REQUIREMENTS

Advisor M. Turner

The following requirements must be fulfilled: 15 credits in required courses.

Code	Title	Credits
Required		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health	
PUBH 6009	Fundamentals of Public Health Program Evaluation	
PUBH 6011	Environmental and Biological Foundations of Public Health	
PUBH 6012	Fundamentals of Health Policy	

Course work may be completed through residential or distance modalities. Additional certificate information is available on the SPH website (<http://sphhs.gwu.edu/programs/public-health-generalist-certificate/>).

Requirements for the graduate certificate

1. Graduate credit requirement: 15 graduate credits
2. The Program Director/Advisor must pre-approve all course selections and course sequencing by developing a program of study prior to the student's initial registration. Graduate certificate students meet with their advisor each semester before registration. All changes in this program of study must be pre-approved by the Program Director/Advisor.
3. Grade point requirement: A 3.0 (B) overall grade point average or better.
4. Time limit requirement: The certificate must be completed within 2 years.
5. Transfer to Degree Program Policy: Students can transfer as many credits as meet program requirements to a Master of Public Health (MPH) degree program from the Public Health Graduate Certificate. Students wishing to transfer to a degree program may apply to do so via the online change of concentration petition after completion of 3 or more courses and a cumulative GPA of 3.0 or better. A grade of B or better is required for a course to be eligible for transfer. Students interested in applying to an MPH degree program should meet with Departmental Advisors regarding program-specific admission requirements. Transfer credits must have been completed within the past 3 years.

Visit the program website (<https://publichealth.gwu.edu/programs/public-health-certificate/>) for additional program information.

BIOSTATISTICS AND BIOINFORMATICS

The Department of Biostatistics and Bioinformatics strives to improve public health through excellence in education and teaching in biostatistics and bioinformatics, transformative scientific research, and dedicated service to the university, profession and community. With Department faculty that have received more research funding than any other department at the university, the Department educates the next generation of leaders in biostatistics and bioinformatics by providing opportunities for close interactions with award winning faculty and practical real-world training opportunities in clinical trials, observational studies, diagnostic studies, and bioinformatics and computational biology studies.

UNDERGRADUATE

Undergraduate

- Minor in bioinformatics (p. 1165)

GRADUATE

Master's programs

- Master of Public Health in the field of biostatistics (p. 1171)
- Master of Science in the field of biostatistics (p. 461) (Jointly administered by the Department of Statistics in CCAS and the Department of Epidemiology and Biostatistics in SPH)

Doctoral programs

- Doctor of Philosophy in the field of biostatistics (p. 1217) (Jointly administered by the Department of Statistics in CCAS and the Department of Epidemiology and Biostatistics in SPH)

FACULTY

Professors K. Crandall, S. Evans (*Chair*), J.M. Lachin (*Research*), S.J. Simmens (*Research*), E.A. Thom (*Research*)

Associate Professors I. Bebu (*Research*), K.L. Drews (*Research*), A. Elmi, H.J. Hoffman, Y. Ma, N. Younes (*Research*)

Assistant Professors A. Ciarleglio, A. Ghosh (*Research*), Y. Jiang (*Research*), M. Perez-Losada, M. Temprosa (*Research*), D. Uschner (*Research*)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work

- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 3131. Epidemiology: Measuring Health and Disease. 3 Credits.

Principles of epidemiology applied to disease surveillance, control of infectious and chronic diseases, and health services/health policy. Understanding the basic research designs and their relationship to establishing cause and effect and effectiveness of interventions to prevent and cure disease. Prerequisites: PUBH 1101 and STAT 1127.

PUBH 6002. Biostatistical Applications for Public Health. 3 Credits.

Application of biostatistical principles to critical analysis of retrospective studies, prospective studies, and controlled clinical trials, as well as studies in the health services literature. Selection, basic calculations, and interpretation of statistical methods for detection of significant associations and differences.

PUBH 6003. Principles and Practices of Epidemiology. 3 Credits.

General principles, methods, and applications of epidemiology. Outbreak investigations, measures of disease frequency, standardization of disease rates, study design, measures of association, hypothesis testing, bias, effect modification, causal inference, disease screening, and surveillance. Case studies apply these concepts to a variety of infectious, acute, and chronic health conditions affecting the population.

PUBH 6235. Epidemiology of Obesity. 1 Credit.

Introduction to the epidemiology of obesity; descriptive epidemiology, measurement, consequences, and determinants of obesity; adiposity and body composition; obesity interventions and policy. Prerequisites: PUBH 6003.

PUBH 6236. Systematic Review of Public Health Literature. 1 Credit.

The process of conducting systematic reviews of literature in order to translate research into public health practice recommendations. Recommended for MPH candidates planning to conduct a systematic review of the literature for their culminating experience. Prerequisites: PUBH 6002 or EXNS 6204; and PUBH 6003 or EXNS 6208.

PUBH 6237. Chronic Disease Epidemiology. 2 Credits.

Overview of the epidemiology (descriptive, analytic, and etiologic) of chronic diseases. Emphasis on epidemiologic methods and study design in relation to chronic disease, as well as public health approaches to disease control including surveillance, screening, and interventions. Prerequisites: EXNS 6204 or PUBH 6002; and EXNS 6208 or PUBH 6003.

PUBH 6238. Molecular Epidemiology. 1 Credit.

Concepts, principles, and use of molecular methods in epidemiologic and clinical research. Common molecular measures and their interaction with environmental factors. Development of a framework for interpreting, assessing, and incorporating molecular measures in their area of research. Prerequisite: PUBH 6003.

PUBH 6239. Epidemiology of Foodborne and Waterborne Diseases. 1 Credit.

Foodborne and waterborne toxicants; diseases linked to eating and drinking and their prevention. Topics include transmission of disease and disease processes; microbial toxins, mycotoxins, chemical toxins, bacterial infections (e.g., salmonellosis, shigellosis, vibrio, listeria), virus and parasitic infections; issues in food and water safety. Prerequisite: PUBH 6003.

PUBH 6240. Pediatric HIV/AIDS. 1 Credit.

Comprehensive overview of HIV infection in children, with emphasis on the global pediatric HIV epidemic. Biological, epidemiological, clinical, and psychosocial issues; public health programmatic approaches to prevention, care, and treatment. The national and global experience with scaling up prevention services in the global effort to virtually eliminate HIV/AIDS in children. Prerequisite: PUBH 6003. Recommended background: PUBH 6250 and PUBH 6253.

PUBH 6241. Nutritional Epidemiology. 2 Credits.

Methodological issues related to dietary assessment, nutrition surveillance, and the epidemiology of obesity. Current trends, including the health impacts of vitamin D and sodium. Interpretation of the scientific literature in the field. Examples drawn from the National Health and Nutrition Examination Survey. Prerequisite: PUBH 6003.

PUBH 6242. Clinical Epidemiology and Public Health: Reading the Research. 2 Credits.

Methods for reading epidemiology and public health research including case-control, cohort studies, randomized controlled trials, meta-analysis, testing and screening, prediction rules, decision and cost-effectiveness analysis. Prerequisites: PUBH 6003 or equivalent.

PUBH 6243. Topics in Clinical Epidemiology and Public Health: Reading the Research. 1 Credit.

An evidence-based problem solving applications course utilizing methods taught in PubH 6242 Clinical Epidemiology and Public Health: Reading the Research Prerequisite: PUBH 6003.

PUBH 6244. Cancer Epidemiology. 2 Credits.

Epidemiology of specific cancers, with an emphasis on molecular and genetic epidemiology. Current research in the field. Prerequisites: PUBH 6003.

PUBH 6245. Infectious Disease Epidemiology. 2 Credits.

The role and conduct of laboratory and field investigations in the epidemiology of infectious diseases. Prerequisite: PUBH 6003.

PUBH 6247. Design of Health Studies. 3 Credits.

Epidemiologic concepts and methods applied to specific research questions especially new types of public health problems. Recognition and development of the most appropriate study design for a specific health issue. Ecologic, cross-sectional, case-control, cohort studies and clinical trials. Sampling, measurement, questionnaire design, causality and causal criteria. Development of a research proposal. Corequisite: PUBH 6002. Prerequisite: PUBH 6003.

PUBH 6248. Epidemiology of Aging. 2 Credits.

The demographics, theories, and physiology of aging; descriptive and associative epidemiology of several common age-related diseases and disorders; implications for public health. Prerequisite: PUBH 6003.

PUBH 6249. Use of Statistical Packages: Data Management and Data Analysis. 3 Credits.

This course familiarizes the student with one of the most widely used database management systems and statistical analysis software packages, the SAS System, operating in a Windows environment. Throughout the course, several database management system techniques and data analytical strategies for the appropriate analysis of datasets obtained from a variety of studies are presented. Statistical techniques covered include linear regression, analysis of variance, logistic regression, and survival analysis. Prerequisite: PUBH 6002.

PUBH 6250. Epidemiology of HIV/AIDS. 2 Credits.

Methodological issues central to HIV/AIDS research. Biases peculiar to HIV/AIDS epidemiologic studies (both observational and experimental designs). The natural history of HIV, diagnosis, surveillance, vulnerable subpopulations, behavioral facets, and evaluation of epidemiologic studies with an emphasis on methodological considerations. Prerequisite: PUBH 6003. Recommended background: PUBH 6002.

PUBH 6252. Advanced Epidemiology Methods. 3 Credits.

Advanced quantitative epidemiologic methods, with a focus on basic data analytic techniques, identifying and evaluating bias and adjusting for confounding. Dose-response, trend analysis, and multiple linear and logistic regression models. PUBH 6249 may be taken as a corequisite. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6247 and PUBH 6249.

PUBH 6253. Issues in HIV Care and Treatment. 1 Credit.

This course provides an overview and in depth consideration of some of the major issues in treatment of HIV disease, including the assessment of efficacy and effectiveness, drug resistance, monitoring of drug toxicity, special populations, the interrelationship between treatment and prevention, and quality of care. The course has been designed with an interdisciplinary audience in mind. In discussions and assignments, students are able to emphasize their own area of interest and/or expertise (e.g. epidemiology, policy, etc).

PUBH 6255. Organizational Responses to the Local, National, and Global HIV/AIDS Epidemics. 2 Credits.

This seminar focuses on the rapidly evolving responses of local, national and global governmental and non-governmental organizations to the HIV/AIDS epidemic. Inspirational leaders of selected HIV/AIDS organizations are invited to describe how their organizations contribute to fighting the epidemic; the leadership and management skills that they use in their daily work; and their strategic decision-making processes. Basic principles of epidemiology, leadership and organizational strategy and structure are addressed through didactic presentations and interactive faculty-student dialogue. Lessons learned through the lens of HIV/AIDS organizations are broadly applicable to other public health problems. Students learn about the strengths and challenges of different types of public health organizations as they make career decisions about their own transition to the public health work force. Prerequisites: PUBH 6003, HIV/AIDS experience, or permission of the instructor.

PUBH 6258. Advanced Topics in Biostatistical Consulting. 1 Credit.

Principles and practice of biostatistical consulting in public health and medical research environments.

PUBH 6259. Epidemiology Surveillance in Public Health. 2 Credits.

Focus on foundations of public health surveillance systems for communicable as well as chronic diseases. Outbreak investigation methods are included, as well as surveillance data sources, data management, data analysis, ethical issues, surveillance system evaluation, and use of information for prevention. Surveillance systems for reportable diseases, nosocomial infections, bioterrorism events, cancer, environmental disease, vaccine-related adverse events, bovine spongiform encephalopathy, and military personnel are discussed. Prerequisite: PUBH 6003.

PUBH 6260. Advanced Data Analysis for Public Health. 3 Credits.

Advanced data analysis using the SAS System to expand on the analytic techniques gained in PUBH 6002 and PUBH 6249 and to provide students with the applied statistical skills required to analyze various types of public health datasets. Prerequisites: PUBH 6002 and PUBH 6249.

PUBH 6262. Introduction to Geographic Information Systems. 1 Credit.

Geographic information systems (GIS) for mapping and display of health data. The course makes use of ArcGIS 8.3. The use of spatial statistics for the detection of clusters and patterns in the spread of diseases. Working with geodatabases, shape files, layers, query information from attribute tables, geocode addresses and customizing GIS applications.

PUBH 6263. Advanced GIS. 1 Credit.

Provides mid to advanced level training in GIS for display and analysis of health data. Use software ArcGIS 9.3 and additional extensions such as Spatial Analyst and Geostatistical Analyst. Also uses GeoDa software. Emphasizes benefits of using GIS to do more than simply manage and map data. GIS supports a range of spatial analysis functions that enable researchers to extract additional meaning from manipulating geographic data. Learn to work with raster datasets and geodatabases to build spatial models for analyzing health data and evaluating spatial patterns of health events based on notion of distance. Prerequisite: PUBH 6262.

PUBH 6264. Quantitative Methods. 3 Credits.

Introduces basic concepts in mathematical statistics. Topics include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed are Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: MATH 1231 and MATH 1232; and PUBH 6002 and 6249.

PUBH 6265. Design of Medical Studies. 3 Credits.

Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and sa.

PUBH 6266. Biostatistical Methods. 3 Credits.

Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6201, STAT 6202 and PUBH 6264.

PUBH 6267. Time Series Applications in Public Health. 2 Credits.

Introduce basic concepts for the identification and modeling of time series in the time domain approach. Learn a new set of terminology standards and a different way to analyze these type of data and to forecast future values of a time series and its accuracy. Software used is SAS/ETS and 3 procedures: ARIMA, AUTOREG, FORECAST. New mathematical notation is used. Prerequisite: PUBH 6249.

PUBH 6268. Advanced SAS. 1 Credit.

Intensive in advanced programming using SAS. Expand technical skills to provide advanced SAS tools for data management and graphics. Topics to include Interactive Matrix Language (IML), SAS Macro facility language, and drill-down graphs using SAS/GRAPH. Prerequisites: PUBH 6002 and PUBH 6249; or permission of the instructor.

PUBH 6269. Reproductive Epidemiology. 1 Credit.

Current research, controversial issues, and methodological problems in epidemiology of reproductive and perinatal health. Present reproductive health issues such as conception and infertility; perinatal issues such as complications of pregnancy, infections in pregnancy, adverse pregnancy outcomes, and birth defects. Prerequisite: PUBH 6003.

PUBH 6270. HIV/AIDS Surveillance. 1 Credit.

Overview of surveillance methods used domestically and internationally to monitor HIV/AIDS epidemic. Surveillance systems including sentinel, population based, behavioral, and incidence surveillance are presented and discussed. Strengths and weaknesses of these various systems are discussed in addition to how data from these systems impact and inform HIV/AIDS related policies and programs. Prerequisite: PUBH 6003.

PUBH 6271. Disaster Epidemiology. 1 Credit.

Introduction to disaster epidemiology that elucidates the important role epidemiologists play in assessing the health and psychological effects of natural and man-made disasters and in identifying factors that contribute to these effects. Focus on applications of epidemiologic methods to the study of public health consequences of disasters, case studies from actual disasters used to illustrate various roles of epidemiologist in responding to these events and lessons learned. Highlight key skills that epidemiologists need to be part of a response and recovery. Identify methodological issues for future work. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6272. Epidemiology of Infectious Agents Associated with Human Cancer. 1 Credit.

Describes the role of infectious agents in the etiology of human cancer. Emphasis on differences between specific oncogenic viruses. Other oncogenic agents, bacterial and parasitic, are also discussed. Discuss laboratory approaches to the documentation of their pathogenicity, how behavior affects mode of transmission, and which types of data provide strongest support for documenting oncogenic potential for humans. Prerequisite: PUBH 6003.

PUBH 6273. Ethnographic Methods. 1 Credit.

Use ethnographic field methods in conjunction with epidemiological research. Introduction to specific methods used to examine health phenomena and determinants of disease. Learn specific applied skills that can be modified with socio-cultural modifications to evaluate urban sites and other settings. Basic skills in application of ethnographic methods, including recursive observations, participant observations, and variety of approaches to interviewing such as in-depth, structured and non-structured as well as conversational interviewing. Discuss use of multiple approaches in conjunction with ethnography, including focus groups, archival, document, statistical and secondary data analysis, and survey research methods. Course emphasizes use of ethnographic research methods in community-based health settings and evaluates issues in cultural competency and how to garner stakeholder support to conduct epidemiologic studies. Prerequisite: PUBH 6003.

PUBH 6274. Emerging Infectious Diseases for Public Health Professionals. 2 Credits.

Focus on epidemiology of emerging infectious diseases of public health importance, including factors leading to their development, management of emerging infectious diseases from a public health and laboratory standpoint, including biosafety, and strategies for emergency preparedness from a national and international perspective. Emphasis on the context of emerging infectious diseases and strategic approaches to their containment. Prerequisites: PUBH 6003 or MICR 6292; or permission of the instructor.

PUBH 6275. Essential Public Health Laboratory Skills. 2 Credits.

This course provides public health students with practical laboratory experience. Prerequisites: MICR 6239 or permission of the instructor.

PUBH 6276. Public Health Microbiology. 3 Credits.

Gain in-depth understanding of important non-viral pathogens pertinent to public health microbiology. Learn how to isolate and identify pathogens using critical thinking and problem solving skills.

PUBH 6277. Public Health Genomics. 3 Credits.

Molecular technology and its impact on public health practice and discourse in the post-genomic era; the use of genomics to solve or help alleviate public health challenges. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6278. Public Health Virology. 3 Credits.

In-depth understanding of viral pathogenesis by focusing on current research, controversial issues, and public health relevance. Survey of family of viruses most relevant to today's public health efforts, concentrating on virus-host interactions and therapeutic strategies.

PUBH 6281. Analysis of Complex Surveys Using SAS and Stata. 2 Credits.

Appropriate methods to analyze survey data collected using complex sampling methods are discussed and applied to national survey data to address provocative public health research questions. An equivalent Stata course may be substituted for prerequisite 6249. Prerequisites: PUBH 6003 and PUBH 6249.

PUBH 6282. Introduction to R Programming. 1 Credit.

R is an open source software environment for statistical computing and graphics. Data transfer between SAS and R, data manipulation and visualization within R, programming and debugging, R libraries, and graphics theory. Prerequisite: PUBH 6249. Recommended background: Programming experience in a statistical package such as Stata or in high level language such as C, Python, Perl.

PUBH 6283. Biostatistics Consulting Practicum. 1 Credit.

Supervised experience involving the synthesis of biostatistical skills with client consultation. Students consolidate their skills through an experience-based understanding of how biostatistical skills are utilized in one or more domains of health research. Prerequisites: STAT 6201 and PUBH 6003. Recommended background: PUBH 6249 or PUBH 6210.

PUBH 6299. Topics in Epidemiology and Biostatistics. 1-3 Credits.

In-depth examination of a particular facet of public health. Topics and prerequisites vary.

PUBH 8242. Advanced Topics in Clinical Epidemiology and Public Health: Reading the Research. 1 Credit.

Evidence-based problem-solving approach using methods covered in PUBH 6242. Corequisite: PUBH 6242. Restricted to doctoral students. Prerequisites: PUBH 6003 or equivalent.

PUBH 8244. Doctoral Topics: Cancer Epidemiology. 1 Credit.

Course focuses on critical review and interpretation of cancer epidemiology literature as well as issues in research design in the field. Corequisite: PUBH 6244. Prerequisites: PUBH 6001 and PUBH 6003.

PUBH 8245. Doctoral Topics: Infectious Disease Epidemiology. 1 Credit.

Provides doctoral level material on the content of infectious disease epidemiology. The course focuses on critical review and interpretation of infectious disease literature as well as issues preparing an analytic research paper on an emerging infectious disease and the application of tools used to describe the epidemiology of those diseases. Corequisite: PUBH 6245. Spring Prerequisite: PUBH 6003.

PUBH 8250. Doctoral Topics: Epidemiology of HIV/AIDS. 1 Credit.

Students select specific topic within area of HIV/AIDS epidemiology. Options include responding to a data analysis problem; responding to a methodological problem found within HIV/AIDS research; or another topic approved by instructor. Corequisite: PUBH 6250. Prerequisites: PUBH 6001 and PUBH 6003.

PUBH 8259. Doctoral Topics: Epidemiologic Surveillance in Public Health. 1 Credit.

Course provides doctoral level material on the content of surveillance offered in PUBH 6259. Focus is on critical review and interpretation of surveillance literature as well as issues preparing an analytic research paper. Corequisite: PUBH 6259. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 8283. Doctoral Biostatistics Consulting Practicum. 2 Credits.

Working under supervision, students develop an experience-based understanding of how biostatistical skills are used in one or more areas of health research. Students must have completed at least 6 credits in any combination of general or specialized graduate-level statistics courses, such as PUBH 6202, PUBH 6260, STAT 6201, or STAT 6202, before enrolling in this course. Restricted to PhD students.

PUBH 8364. Quantitative Methods. 3 Credits.

Introduces basic concepts in mathematical statistics. Topics include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed are Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: MATH 1231 and MATH 1232; and PUBH 6002 and PUBH 6249.

PUBH 8366. Biostatistical Methods. 3 Credits.

Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6202 or permission of the instructor.

PUBH 8419. Measurement in Public Health and Health Services. 3 Credits.

Review principles of measurement and assessment as they apply to public health and health services research constructs, review existing state-of-the-art measures of individual and population health status (e.g., morbidity, mortality, functioning and health-related quality of life) and of individual and community health behavior. Explore current measurement issues in health research.

PUBH 8999. Dissertation Research. 1-12 Credits.

Dissertation research.

ENVIRONMENTAL AND OCCUPATIONAL HEALTH

The Department of Environmental and Occupational Health (EOH) works to further the student's understanding of how natural and human-made environments impact human health. The department offers public health programs that challenge students to explore both the underlying science and policy remedies for topics including sustainable cities and food systems, climate change mitigation, workplace safety, and risk management.

Visit the Department of Environmental and Occupational Health website (<https://publichealth.gwu.edu/departments/environmental-and-occupational-health/>) for additional information.

GRADUATE

Master's programs

- Master of Public Health in environmental health science and policy (p. 1175)
- Master of Public Health in global environmental health (p. 1178)

Doctoral program

- Doctor of Public Health in environmental and occupational health (p. 1224)

FACULTY

Professors G.M. Gray, L.R. Goldman, D. Michaels, M.J. Perry (*Chair*), L.B. Price

Associate Professors S. Anenberg, K.M. Applebaum, P.T. LaPuma, C. Liu, S. McCormick, M. Attene Ramos, A.R. Zota

Assistant Professors A.L. Northcross

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 2114. Environment, Health, and Development. 3 Credits.

Survey of the relationship between health and development and environmental trends. Topics include deforestation, urban contamination, and desertification.

PUBH 3150. Sustainable Energy and Environmental Health. 3 Credits.

Sustainability issues from the perspective of environmental health. Technical, social, and health implications of specific energy sources. Energy conservation and efficiency in the context of population growth, food and water resources, and maintenance of a healthy environment for future generations.

PUBH 6004. Environmental and Occupational Health in a Sustainable World. 2 Credits.

Examination of the connection between population health and exposures to chemical, physical, and biological agents in the environment. Problem-solving frameworks familiarize students with data sources, methodologies, and policy approaches being used to address the public health impacts of environmental and occupational health hazards, including the consequences of climate change, natural resource degradation, and industrial chemicals. Integration of key concepts of environmental health with principles of sustainability illustrate how public policies and practices on the local, national, and global level affect population health.

PUBH 6121. Environmental and Occupational Epidemiology. 3 Credits.

Demonstration and application of epidemiologic methods for the study of environmental and occupational health problems; epidemiologic exposure assessment methods and methods relevant to cohort, case-control, cross-sectional, and case cross-over studies; survey design and sources and evaluation of biases and confounding; emphasis on written and oral communication skills. Prerequisites: PUBH 6002 and PUBH 6003; and PUBH 6004 or PUBH 6011.

PUBH 6122. Protecting Public Health and the Environment: Policies, Politics, and Programs. 3 Credits.

The legislative, regulatory, judicial, and political system in the United States developed to protect human health and the environment. National and global public and environmental health agencies, policy development, and current topics. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6123. Toxicology: Applications for Public Health Policy. 3 Credits.

Toxicology as both a scientific discipline and a source of information for public health policy with respect to the regulation of foods, pesticides, drugs (pharmaceuticals), environmental chemical pollutants, and other chemicals that may affect human and environmental health. How chemicals interact with biological systems to produce adverse effects. The ways in which toxicologic information is developed and applied to regulatory decision making and the use of toxicology in regulatory risk assessment. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6124. Problem Solving in EOH. 3 Credits.

This culminating course uses problem-based learning methods to examine a variety of real-world EOH issues in depth. Cases stimulate students to integrate their cumulative knowledge across all required courses and demonstrate their professional competencies. Students to conduct activities characteristic of EOH practice: evaluating a variety of technical, public, and media, reports; integrating and interpreting environmental, exposure, and health information effectively; designing analytic and communication strategies; presenting in writing and orally relevant materials to address EOH issues; and, making appropriate policy and/or program decisions and recommendations. Prerequisites: PUBH 6121, PUBH 6123 and PUBH 6126.

PUBH 6126. Assessment and Control of Environmental Hazards. 3 Credits.

Introduces the anticipation, recognition, assessment, and control of hazards in the workplace and the ambient environment. It emphasizes an understanding of the characteristic features of specific hazards, which may be chemical, biological, or physical/ergonomic.

PUBH 6127. Introduction to Environmental Health Microbiology. 2 Credits.

Basics of public health microbiology as it relates to the environment, food, water, and bioterrorism. Examines from an environmental health perspective how the principles of microbiology are applied to current and emerging public health issues, whether from intentional or unintentional contamination of the environment. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6128. Global Environmental and Occupational Health. 2 Credits.

Examination of the global environmental and occupational health factors that contribute significantly to the global burden of disease, focusing primarily on low- and middle-income countries; principles from behavioral sciences, development economics, risk assessment, and epidemiology are included; potential solutions to environmental health problems, metrics used to measure impacts, and areas for future research. Prerequisite: PUBH 6004.

PUBH 6130. Sustainable Energy and the Environment. 2 Credits.

The sustainability of various energy strategies, including energy conservation, green building principles, renewable energy, and mitigation and adaption policies for climate change. Emphasis on the life cycle framework. Topics include natural resource depletion, water and energy consumption, and air, water, and solid waste pollutant emissions. Prerequisite: PUBH 6004.

PUBH 6131. Applied Data Analysis in Environmental and Occupational Health. 3 Credits.

Application of biostatistical and epidemiologic concepts and methods to analysis of environmental and occupational health (EOH) data. Students manage datasets, conduct data analyses, present data graphically, and interpret data for relevance to EOH research, policy, and practice. Development and practice of skills needed for analyzing complex exposures and communicating environmental and occupational research findings. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6011.

PUBH 6132. Water, Sanitation, and Hygiene (WASH) in Low-Income Countries. 2 Credits.

Introduction to working in both disaster and development settings in countries where contaminated water, inadequate sanitation, and poor hygiene (WASH) cause serious health problems. Students gain practical experience applying WASH methods in the field. Prerequisite: PUBH 6011.

PUBH 6133. Social Dimensions in Climate Change and Health. 3 Credits.

The drivers of climate change and outcomes with particular focus on health dimensions; obstacles, vulnerabilities, inequality, and adaptation as well as technical and social solutions.

PUBH 6199. Topics in EOH. 0-3 Credits.

In-depth examination of a particular facet of public health. Topics and prerequisites vary.

EPIDEMIOLOGY

The Department of Epidemiology integrates diverse educational programs with a rapidly growing research portfolio. Graduate students have the opportunity to study and participate in faculty research projects in a variety of academic disciplines, including infectious disease, cancer, nutritional and disaster epidemiology, and public health laboratory science. In their practicum, students work closely with scientists at local health departments, the NIH and other federal agencies, academic institutions, and international health organizations. By exploring the core quantitative sciences of public health and taking advantage of opportunities to learn by doing, students are prepared to become the next generation of public health leaders and practitioners.

GRADUATE

Master's programs

- Master of Public Health in the field of epidemiology (p. 1177)
- Master of Science in the field of epidemiology (p. 1200)
- Master of Science in the field of public health microbiology and emerging infectious diseases (p. 1203)

Doctoral programs

- Doctor of Philosophy in the field of epidemiology (p. 1219)

FACULTY

Professors A.D. Castel, A.E. Greenberg (*Chair*), L. Guay (*Research*), J. Jordan, M. Magnus, R.K. Riegelman, D.A. Verme, H.A. Young

Associate Professors D. Bernat, B. Braffett (*Research*), S.D. Cleary, R.G. Clifton (*Research*), M. Ghosh, K. Jablonski (*Research*), I. Kuo (*Research*), A. Monroe (*Research*), M.M. Rice (*Research*)

Assistant Professors R. Doshi (*Research*), C. MacPherson (*Research*), H. Muse, J. Peterson (*Research*), M. Power, S. Quinlan (*Teaching*), M. Ulfers (*Teaching*)

Adjunct Professor C. Ogden

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 3131. Epidemiology: Measuring Health and Disease. 3 Credits.

Principles of epidemiology applied to disease surveillance, control of infectious and chronic diseases, and health services/health policy. Understanding the basic research designs and their relationship to establishing cause and effect and effectiveness of interventions to prevent and cure disease. Prerequisites: PUBH 1101 and STAT 1127.

PUBH 6002. Biostatistical Applications for Public Health. 3 Credits.

Application of biostatistical principles to critical analysis of retrospective studies, prospective studies, and controlled clinical trials, as well as studies in the health services literature. Selection, basic calculations, and interpretation of statistical methods for detection of significant associations and differences.

PUBH 6003. Principles and Practices of Epidemiology. 3 Credits.

General principles, methods, and applications of epidemiology. Outbreak investigations, measures of disease frequency, standardization of disease rates, study design, measures of association, hypothesis testing, bias, effect modification, causal inference, disease screening, and surveillance. Case studies apply these concepts to a variety of infectious, acute, and chronic health conditions affecting the population.

PUBH 6235. Epidemiology of Obesity. 1 Credit.

Introduction to the epidemiology of obesity; descriptive epidemiology, measurement, consequences, and determinants of obesity; adiposity and body composition; obesity interventions and policy. Prerequisites: PUBH 6003.

PUBH 6236. Systematic Review of Public Health Literature. 1 Credit.

The process of conducting systematic reviews of literature in order to translate research into public health practice recommendations. Recommended for MPH candidates planning to conduct a systematic review of the literature for their culminating experience. Prerequisites: PUBH 6002 or EXNS 6204; and PUBH 6003 or EXNS 6208.

PUBH 6237. Chronic Disease Epidemiology. 2 Credits.

Overview of the epidemiology (descriptive, analytic, and etiologic) of chronic diseases. Emphasis on epidemiologic methods and study design in relation to chronic disease, as well as public health approaches to disease control including surveillance, screening, and interventions. Prerequisites: EXNS 6204 or PUBH 6002; and EXNS 6208 or PUBH 6003.

PUBH 6238. Molecular Epidemiology. 1 Credit.

Concepts, principles, and use of molecular methods in epidemiologic and clinical research. Common molecular measures and their interaction with environmental factors. Development of a framework for interpreting, assessing, and incorporating molecular measures in their area of research. Prerequisite: PUBH 6003.

PUBH 6239. Epidemiology of Foodborne and Waterborne Diseases. 1 Credit.

Foodborne and waterborne toxicants; diseases linked to eating and drinking and their prevention. Topics include transmission of disease and disease processes; microbial toxins, mycotoxins, chemical toxins, bacterial infections (e.g., salmonellosis, shigellosis, vibrio, listeria), virus and parasitic infections; issues in food and water safety. Prerequisite: PUBH 6003.

PUBH 6240. Pediatric HIV/AIDS. 1 Credit.

Comprehensive overview of HIV infection in children, with emphasis on the global pediatric HIV epidemic. Biological, epidemiological, clinical, and psychosocial issues; public health programmatic approaches to prevention, care, and treatment. The national and global experience with scaling up prevention services in the global effort to virtually eliminate HIV/AIDS in children. Prerequisite: PUBH 6003. Recommended background: PUBH 6250 and PUBH 6253.

PUBH 6241. Nutritional Epidemiology. 2 Credits.

Methodological issues related to dietary assessment, nutrition surveillance, and the epidemiology of obesity. Current trends, including the health impacts of vitamin D and sodium. Interpretation of the scientific literature in the field. Examples drawn from the National Health and Nutrition Examination Survey. Prerequisite: PUBH 6003.

PUBH 6242. Clinical Epidemiology and Public Health: Reading the Research. 2 Credits.

Methods for reading epidemiology and public health research including case-control, cohort studies, randomized controlled trials, meta-analysis, testing and screening, prediction rules, decision and cost-effectiveness analysis. Prerequisites: PUBH 6003 or equivalent.

PUBH 6243. Topics in Clinical Epidemiology and Public Health: Reading the Research. 1 Credit.

An evidence-based problem solving applications course utilizing methods taught in PubH 6242 Clinical Epidemiology and Public Health: Reading the Research Prerequisite: PUBH 6003.

PUBH 6244. Cancer Epidemiology. 2 Credits.

Epidemiology of specific cancers, with an emphasis on molecular and genetic epidemiology. Current research in the field. Prerequisites: PUBH 6003.

PUBH 6245. Infectious Disease Epidemiology. 2 Credits.

The role and conduct of laboratory and field investigations in the epidemiology of infectious diseases. Prerequisite: PUBH 6003.

PUBH 6247. Design of Health Studies. 3 Credits.

Epidemiologic concepts and methods applied to specific research questions especially new types of public health problems. Recognition and development of the most appropriate study design for a specific health issue. Ecologic, cross-sectional, case-control, cohort studies and clinical trials. Sampling, measurement, questionnaire design, causality and causal criteria. Development of a research proposal. Corequisite: PUBH 6002. Prerequisite: PUBH 6003.

PUBH 6248. Epidemiology of Aging. 2 Credits.

The demographics, theories, and physiology of aging; descriptive and associative epidemiology of several common age-related diseases and disorders; implications for public health. Prerequisite: PUBH 6003.

PUBH 6249. Use of Statistical Packages: Data Management and Data Analysis. 3 Credits.

This course familiarizes the student with one of the most widely used database management systems and statistical analysis software packages, the SAS System, operating in a Windows environment. Throughout the course, several database management system techniques and data analytical strategies for the appropriate analysis of datasets obtained from a variety of studies are presented. Statistical techniques covered include linear regression, analysis of variance, logistic regression, and survival analysis. Prerequisite: PUBH 6002.

PUBH 6250. Epidemiology of HIV/AIDS. 2 Credits.

Methodological issues central to HIV/AIDS research. Biases peculiar to HIV/AIDS epidemiologic studies (both observational and experimental designs). The natural history of HIV, diagnosis, surveillance, vulnerable subpopulations, behavioral facets, and evaluation of epidemiologic studies with an emphasis on methodological considerations. Prerequisite: PUBH 6003. Recommended background: PUBH 6002.

PUBH 6252. Advanced Epidemiology Methods. 3 Credits.

Advanced quantitative epidemiologic methods, with a focus on basic data analytic techniques, identifying and evaluating bias and adjusting for confounding. Dose-response, trend analysis, and multiple linear and logistic regression models. PUBH 6249 may be taken as a corequisite. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6247 and PUBH 6249.

PUBH 6253. Issues in HIV Care and Treatment. 1 Credit.

This course provides an overview and in depth consideration of some of the major issues in treatment of HIV disease, including the assessment of efficacy and effectiveness, drug resistance, monitoring of drug toxicity, special populations, the interrelationship between treatment and prevention, and quality of care. The course has been designed with an interdisciplinary audience in mind. In discussions and assignments, students are able to emphasize their own area of interest and/or expertise (e.g. epidemiology, policy, etc).

PUBH 6255. Organizational Responses to the Local, National, and Global HIV/AIDS Epidemics. 2 Credits.

This seminar focuses on the rapidly evolving responses of local, national and global governmental and non-governmental organizations to the HIV/AIDS epidemic. Inspirational leaders of selected HIV/AIDS organizations are invited to describe how their organizations contribute to fighting the epidemic; the leadership and management skills that they use in their daily work; and their strategic decision-making processes. Basic principles of epidemiology, leadership and organizational strategy and structure are addressed through didactic presentations and interactive faculty-student dialogue. Lessons learned through the lens of HIV/AIDS organizations are broadly applicable to other public health problems. Students learn about the strengths and challenges of different types of public health organizations as they make career decisions about their own transition to the public health work force. Prerequisites: PUBH 6003, HIV/AIDS experience, or permission of the instructor.

PUBH 6258. Advanced Topics in Biostatistical Consulting. 1 Credit.

Principles and practice of biostatistical consulting in public health and medical research environments.

PUBH 6259. Epidemiology Surveillance in Public Health. 2 Credits.

Focus on foundations of public health surveillance systems for communicable as well as chronic diseases. Outbreak investigation methods are included, as well as surveillance data sources, data management, data analysis, ethical issues, surveillance system evaluation, and use of information for prevention. Surveillance systems for reportable diseases, nosocomial infections, bioterrorism events, cancer, environmental disease, vaccine-related adverse events, bovine spongiform encephalopathy, and military personnel are discussed. Prerequisite: PUBH 6003.

PUBH 6260. Advanced Data Analysis for Public Health. 3 Credits.

Advanced data analysis using the SAS System to expand on the analytic techniques gained in PUBH 6002 and PUBH 6249 and to provide students with the applied statistical skills required to analyze various types of public health datasets. Prerequisites: PUBH 6002 and PUBH 6249.

PUBH 6262. Introduction to Geographic Information Systems. 1 Credit.

Geographic information systems (GIS) for mapping and display of health data. The course makes use of ArcGIS 8.3. The use of spatial statistics for the detection of clusters and patterns in the spread of diseases. Working with geodatabases, shape files, layers, query information from attribute tables, geocode addresses and customizing GIS applications.

PUBH 6263. Advanced GIS. 1 Credit.

Provides mid to advanced level training in GIS for display and analysis of health data. Use software ArcGIS 9.3 and additional extensions such as Spatial Analyst and Geostatistical Analyst. Also uses GeoDa software. Emphasizes benefits of using GIS to do more than simply manage and map data. GIS supports a range of spatial analysis functions that enable researchers to extract additional meaning from manipulating geographic data. Learn to work with raster datasets and geodatabases to build spatial models for analyzing health data and evaluating spatial patterns of health events based on notion of distance. Prerequisite: PUBH 6262.

PUBH 6264. Quantitative Methods. 3 Credits.

Introduces basic concepts in mathematical statistics. Topics include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed are Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: MATH 1231 and MATH 1232; and PUBH 6002 and 6249.

PUBH 6265. Design of Medical Studies. 3 Credits.

Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and sa.

PUBH 6266. Biostatistical Methods. 3 Credits.

Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6201, STAT 6202 and PUBH 6264.

PUBH 6267. Time Series Applications in Public Health. 2 Credits.

Introduce basic concepts for the identification and modeling of time series in the time domain approach. Learn a new set of terminology standards and a different way to analyze these type of data and to forecast future values of a time series and its accuracy. Software used is SAS/ETS and 3 procedures: ARIMA, AUTOREG, FORECAST. New mathematical notation is used. Prerequisite: PUBH 6249.

PUBH 6268. Advanced SAS. 1 Credit.

Intensive in advanced programming using SAS. Expand technical skills to provide advanced SAS tools for data management and graphics. Topics to include Interactive Matrix Language (IML), SAS Macro facility language, and drill-down graphs using SAS/GRAPH. Prerequisites: PUBH 6002 and PUBH 6249; or permission of the instructor.

PUBH 6269. Reproductive Epidemiology. 1 Credit.

Current research, controversial issues, and methodological problems in epidemiology of reproductive and perinatal health. Present reproductive health issues such as conception and infertility; perinatal issues such as complications of pregnancy, infections in pregnancy, adverse pregnancy outcomes, and birth defects. Prerequisite: PUBH 6003.

PUBH 6270. HIV/AIDS Surveillance. 1 Credit.

Overview of surveillance methods used domestically and internationally to monitor HIV/AIDS epidemic. Surveillance systems including sentinel, population based, behavioral, and incidence surveillance are presented and discussed. Strengths and weaknesses of these various systems are discussed in addition to how data from these systems impact and inform HIV/AIDS related policies and programs. Prerequisite: PUBH 6003.

PUBH 6271. Disaster Epidemiology. 1 Credit.

Introduction to disaster epidemiology that elucidates the important role epidemiologists play in assessing the health and psychological effects of natural and man-made disasters and in identifying factors that contribute to these effects. Focus on applications of epidemiologic methods to the study of public health consequences of disasters, case studies from actual disasters used to illustrate various roles of epidemiologist in responding to these events and lessons learned. Highlight key skills that epidemiologists need to be part of a response and recovery. Identify methodological issues for future work. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6272. Epidemiology of Infectious Agents Associated with Human Cancer. 1 Credit.

Describes the role of infectious agents in the etiology of human cancer. Emphasis on differences between specific oncogenic viruses. Other oncogenic agents, bacterial and parasitic, are also discussed. Discuss laboratory approaches to the documentation of their pathogenicity, how behavior affects mode of transmission, and which types of data provide strongest support for documenting oncogenic potential for humans. Prerequisite: PUBH 6003.

PUBH 6273. Ethnographic Methods. 1 Credit.

Use ethnographic field methods in conjunction with epidemiological research. Introduction to specific methods used to examine health phenomena and determinants of disease. Learn specific applied skills that can be modified with socio-cultural modifications to evaluate urban sites and other settings. Basic skills in application of ethnographic methods, including recursive observations, participant observations, and variety of approaches to interviewing such as in-depth, structured and non-structured as well as conversational interviewing. Discuss use of multiple approaches in conjunction with ethnography, including focus groups, archival, document, statistical and secondary data analysis, and survey research methods. Course emphasizes use of ethnographic research methods in community-based health settings and evaluates issues in cultural competency and how to garner stakeholder support to conduct epidemiologic studies. Prerequisite: PUBH 6003.

PUBH 6274. Emerging Infectious Diseases for Public Health Professionals. 2 Credits.

Focus on epidemiology of emerging infectious diseases of public health importance, including factors leading to their development, management of emerging infectious diseases from a public health and laboratory standpoint, including biosafety, and strategies for emergency preparedness from a national and international perspective. Emphasis on the context of emerging infectious diseases and strategic approaches to their containment. Prerequisites: PUBH 6003 or MICR 6292; or permission of the instructor.

PUBH 6275. Essential Public Health Laboratory Skills. 2 Credits.

This course provides public health students with practical laboratory experience. Prerequisites: MICR 6239 or permission of the instructor.

PUBH 6276. Public Health Microbiology. 3 Credits.

Gain in-depth understanding of important non-viral pathogens pertinent to public health microbiology. Learn how to isolate and identify pathogens using critical thinking and problem solving skills.

PUBH 6277. Public Health Genomics. 3 Credits.

Molecular technology and its impact on public health practice and discourse in the post-genomic era; the use of genomics to solve or help alleviate public health challenges. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6278. Public Health Virology. 3 Credits.

In-depth understanding of viral pathogenesis by focusing on current research, controversial issues, and public health relevance. Survey of family of viruses most relevant to today's public health efforts, concentrating on virus-host interactions and therapeutic strategies.

PUBH 6281. Analysis of Complex Surveys Using SAS and Stata. 2 Credits.

Appropriate methods to analyze survey data collected using complex sampling methods are discussed and applied to national survey data to address provocative public health research questions. An equivalent Stata course may be substituted for prerequisite 6249. Prerequisites: PUBH 6003 and PUBH 6249.

PUBH 6282. Introduction to R Programming. 1 Credit.

R is an open source software environment for statistical computing and graphics. Data transfer between SAS and R, data manipulation and visualization within R, programming and debugging, R libraries, and graphics theory. Prerequisite: PUBH 6249. Recommended background: Programming experience in a statistical package such as Stata or in high level language such as C, Python, Perl.

PUBH 6283. Biostatistics Consulting Practicum. 1 Credit.

Supervised experience involving the synthesis of biostatistical skills with client consultation. Students consolidate their skills through an experience-based understanding of how biostatistical skills are utilized in one or more domains of health research. Prerequisites: STAT 6201 and PUBH 6003. Recommended background: PUBH 6249 or PUBH 6210.

PUBH 6299. Topics in Epidemiology and Biostatistics. 1-3 Credits.

In-depth examination of a particular facet of public health. Topics and prerequisites vary.

PUBH 8242. Advanced Topics in Clinical Epidemiology and Public Health: Reading the Research. 1 Credit.

Evidence-based problem-solving approach using methods covered in PUBH 6242. Corequisite: PUBH 6242. Restricted to doctoral students. Prerequisites: PUBH 6003 or equivalent.

PUBH 8244. Doctoral Topics: Cancer Epidemiology. 1 Credit.

Course focuses on critical review and interpretation of cancer epidemiology literature as well as issues in research design in the field. Corequisite: PUBH 6244. Prerequisites: PUBH 6001 and PUBH 6003.

PUBH 8245. Doctoral Topics: Infectious Disease Epidemiology. 1 Credit.

Provides doctoral level material on the content of infectious disease epidemiology. The course focuses on critical review and interpretation of infectious disease literature as well as issues preparing an analytic research paper on an emerging infectious disease and the application of tools used to describe the epidemiology of those diseases. Corequisite: PUBH 6245. Spring Prerequisite: PUBH 6003.

PUBH 8250. Doctoral Topics: Epidemiology of HIV/AIDS. 1 Credit.

Students select specific topic within area of HIV/AIDS epidemiology. Options include responding to a data analysis problem; responding to a methodological problem found within HIV/AIDS research; or another topic approved by instructor. Corequisite: PUBH 6250. Prerequisites: PUBH 6001 and PUBH 6003.

PUBH 8259. Doctoral Topics: Epidemiologic Surveillance in Public Health. 1 Credit.

Course provides doctoral level material on the content of surveillance offered in PUBH 6259. Focus is on critical review and interpretation of surveillance literature as well as issues preparing an analytic research paper. Corequisite: PUBH 6259. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 8283. Doctoral Biostatistics Consulting Practicum. 2 Credits.

Working under supervision, students develop an experience-based understanding of how biostatistical skills are used in one or more areas of health research. Students must have completed at least 6 credits in any combination of general or specialized graduate-level statistics courses, such as PUBH 6202, PUBH 6260, STAT 6201, or STAT 6202, before enrolling in this course. Restricted to PhD students.

PUBH 8364. Quantitative Methods. 3 Credits.

Introduces basic concepts in mathematical statistics. Topics include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed are Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: MATH 1231 and MATH 1232; and PUBH 6002 and PUBH 6249.

PUBH 8366. Biostatistical Methods. 3 Credits.

Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6202 or permission of the instructor.

PUBH 8419. Measurement in Public Health and Health Services. 3 Credits.

Review principles of measurement and assessment as they apply to public health and health services research constructs, review existing state-of-the-art measures of individual and population health status (e.g., morbidity, mortality, functioning and health-related quality of life) and of individual and community health behavior. Explore current measurement issues in health research.

PUBH 8999. Dissertation Research. 1-12 Credits.

Dissertation research.

EXERCISE AND NUTRITION SCIENCES

The Department of Exercise and Nutrition Sciences is uniquely positioned within the only school of public health in the nation's capital while also offering programs that integrate the complimentary sciences of nutrition and exercise. The curriculum provides students with the opportunity to learn not only how exercise, physical activity, and nutrition affect the individual, but also how these factors affect the health and function of communities at large. Students within the Department engage in research and applied learning experiences in settings as diverse as the National Institutes of Health, professional sports teams, the U.S. Department of Agriculture, the Pentagon, and the DC public school system.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in exercise science (p. 1146)
- Bachelor of Science with a major in exercise science, pre-athletic training/sports medicine concentration (p. 1149)
- Bachelor of Science with a major in exercise science, pre-medical professional concentration (p. 1152)
- Bachelor of Science with a major in exercise science, pre-physical therapy concentration (p. 1155)
- Bachelor of Science with a major in nutrition science (p. 1158)

Minors

- Minor in exercise science (p. 1165)
- Minor in nutrition (p. 1166) science (p. 1166)

GRADUATE

Master's programs

- Master of Public Health in the field of physical activity in public health (p. 1192)
- Master of Public Health in the field of public health nutrition (p. 1195)
- Master of Science in the field of exercise science with a concentration in strength and conditioning (p. 1201)

FACULTY

Professors L. DiPietro, J. Sacheck-Ward (*Chair*), B.J. Westerman

Associate Professors M. Barron, T.A. Miller, K. Robien, S.A. Talegawker, A. Visek,

Assistant Professors A. Meni, M. Barberio, K. Levers, K. Lora (*Teaching*)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Exercise and Nutrition Sciences (EXNS) (p. 1522)
- Health and Wellness (HLWL) (p. 1561)
- Lifestyle, Sport, and Physical Activity (LSPA) (p. 1628)

GLOBAL HEALTH

The Department of Global Health offers diverse programs of study that prepare students to make a difference in the health of individuals and communities around the world. With three fields of study, several joint programs within the School of Public Health, several joint degree programs with other GW schools, a doctoral program, and more than 20 international practicum partnerships, students have a wealth of opportunities to examine global health concepts and conduct interdisciplinary research.

GRADUATE

Master's programs

- Master of Public Health (MPH@GW) (p. 1197)
- Master of Public Health in the field of global environmental health (<http://bulletin.gwu.edu/public-health/global-health/mpg-global-environmental-health/>)
- Master of Public Health in the field of global health epidemiology and disease control (p. 1180)
- Master of Public Health in the field of global health policy (p. 1181)
- Master of Public Health in the field of global health program design, monitoring, and evaluation (p. 1184)
- Master of Public Health in the field of humanitarian health (p. 1188)

Doctoral program

- Doctor of Public Health in the field of global health (p. 1226)

FACULTY

Professors J. Andrus (*Adjunct*), M.C. Ellsberg, A. Hyder, N. Kumar, C. Mores, W. Munar, C. Santos-Burgoa, J.M. Tielsch (*Chair*), R.J. Waldman

Associate Professors R. Asgary, S. Baird, U. Colon-Ramos, S. Frehywot (*Teaching*), C. Huang, J.F. Sandberg

Assistant Professors S. Lahm (*Research*), S. Mookherji (*Teaching*), J. Muz, K. Ndiaye, N. Paichadze (*Research*), A. Roess

Adjunct Professors E.A. Migliaccio

Adjunct Instructors K. Gamble-Payne

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work

- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 2115. Health, Human Rights, and Displaced Persons. 3 Credits.

Concepts of health as a human right, ethics, and the participation of the international community in moving toward health for all. Civil and international conflict in the generation of displaced populations.

PUBH 2116. Global Delivery of Health Systems. 3 Credits.

Introduction to health systems and the basic concepts of health systems administration and financing and health care reform with examples from advanced, middle income, and poor countries.

PUBH 3133. Global Health and Development. 3 Credits.

Political, social, and economic determinants of health; how health status is measured with an emphasis on low-income countries, the health of the poor, and inequity and inequality; burden of diseases that impact development and their basic epidemiological characteristics, including who they affect, when they occur, and where risk is greatest.

PUBH 6400. Global Health Frameworks. 2 Credits.

Overview of current issues in global public health with particular emphasis on low and middle-income countries. Serves as both an introductory course for students entering the field of global health, as well as an update on current technical and policy issues for advanced students who may have considerable experience.

PUBH 6410. Global Health Study Design. 1,2 Credit.

Tools necessary for designing and understanding the research that goes into developing good public health programs; basic elements for the planning and design phase of a research project. Prerequisite or corequisite: PUBH 6009 or PUBH 6501. Prerequisite: PUBH 6003.

PUBH 6411. Global Health Qualitative Research Methods. 2 Credits.

An introduction to qualitative data collection and analysis in global health settings. Methodologies include survey design, interviews, focus groups, and participant observation. Archival research and clinical trial research are also addressed. The set of methods most commonly used to collect qualitative data in global health settings. Students are enabled to prepare interview guides, conduct in-depth interviews, and analyze and document the results from a qualitative field project. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6412. Global Health Quantitative Research Methods. 3 Credits.

Continuation of the series of global health methods courses. Examination of the fundamental concepts of empirical analysis and qualitative analysis, including open and axial coding, the basis of grounded theory, and regression analysis. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6430. Theories for Global Health Communication Interventions. 2 Credits.

Use of communication theory and methods in health promotion. Integration of multidisciplinary approaches to public health communication. Prerequisites: PUBH 6007 and PUBH 6400.

PUBH 6431. Global Health Communication Strategies and Skills. 3 Credits.

Students conduct qualitative research to evaluate health communication programs, assess readability level and suitability of written health education materials, conduct content analyses, and review/critique current health communication literature. Prerequisites: PUBH 6430 or permission of the instructor; and PUBH 6007.

PUBH 6435. Global Health Program Development and Implementation. 2 Credits.

Basic concepts and principles of program development and implementation including data collection methods, decision making, and problem-solving techniques. Application of program development techniques to specific interventions. Prerequisite: PUBH 6400.

PUBH 6436. Global Health Program Management and Leadership. 2 Credits.

Essential tools for successful project, personnel, and program management. Leadership and management theory; key issues in managing global health programs and projects; leadership and management skills development; use of data in management decision making; and importance of quality, supply chain, and resource management. Restricted to students in the MPH in global health program design, monitoring, and evaluation program. Prerequisites: PUBH 6400 and PUBH 6435.

PUBH 6437. Global Health Program Evaluation. 3 Credits.

Fundamentals of program monitoring and evaluation; developing and using program theory in evaluation; impact evaluation and mixed-methods approaches; qualitative methods and statistical analysis for program evaluation. Prerequisites: PUBH 6002.

PUBH 6440. Global Health Economics and Finance. 2 Credits.

Examination of economics and finance principles as they apply to global health. Organization, delivery, and financing of health care in developing countries. Tools for analyzing issues related to global health economics and finance and application of those tools to a variety of a global health issues, including demand for health care, health care financing, social insurance, pharmaceuticals, and HIV/AIDS. Prerequisite: PUBH 6400.

PUBH 6441. Global Health Organizations and Regulations. 3 Credits.

The functions, capacities, and governance of international health organizations; the normative power of some international health organizations for regulatory processes; and evidence-based development of public health policies with attention to issues of global trade as it shapes worldwide and national health. Prerequisite: PUBH 6400.

PUBH 6442. Comparative Global Health Systems. 2 Credits.

Examination of national health systems, how they differ, and how they are performing. Health systems analyzed through four different lenses: health care organizations, health workforce development, health care financing, and health policy development. Comparison of health systems and health reforms in seven regions of the world and assessment of how health system performance might be improved. Course fee may apply. Prerequisite: PUBH 6400.

PUBH 6443. Global Health Agreements and Conventions. 2 Credits.

Explores the impact of regulations, trade and human rights on health by examining the relevant international declarations, agreements and conventions. This course examines a variety of topics including the impact of international trade agreements on health, the International Health Regulations and other regulations affecting global health, and the relationship between health and human rights. Prerequisite: PUBH 6400.

PUBH 6480. Public Health in Humanitarian Settings. 2 Credits.

Technical aspects of high-priority public health interventions; consideration of how and why sound public health interventions should be implemented in both emergency and chronic humanitarian settings; the roles of diverse humanitarian actors.

PUBH 6481. Global Mental Health. 2 Credits.

Focus on global mental health knowledge and public health policy implementation skills regarding the integration of mental health, public health, and primary care in diverse health systems and challenging cultural contexts. Prerequisite: PUBH 6400.

PUBH 6482. International Food and Nutrition Policy. 2 Credits.

Major global food and nutrition issues, their determinants, and the strategies that in place to address them. Students identify major nutrition and food challenges in a country or region as well as the policies and programs that have proven successful in addressing those challenges. Prerequisite: PUBH 6400.

PUBH 6484. Prevention and Control of Vector Borne Diseases. 2 Credits.

Study of insects and other vectors responsible for transmission of diseases in developing countries, including plague, malaria, dengue fever, onchocerciasis (river blindness), and chikungunya virus. Special focus on developing countries, particularly in the Middle East, Africa, Asia, and Latin America. Diseases such as West Nile Virus and Lyme disease in the United States and elsewhere are also addressed. New methods for effective management and control.

PUBH 6499. Topics in Global Health. 0-3 Credits.

Examination of a particular facet of public health. Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details.

HEALTH POLICY AND MANAGEMENT

In early 2015, the Department of Health Policy and the Department of Health Services Management and Leadership consolidated to create a larger, integrated department that is even better prepared to lead education, research, and practice efforts related to public health policy, health care policy, and health services management. This positive evolution creates new and dynamic synergies for faculty, staff, students, and alumni, and maximizes our education and research potential.

The mission of the Department of Health Policy and Management—a practice-oriented academic community in Washington, DC—is to improve health and health systems locally, nationally, and globally through: excellence in education; innovative scholarship; applied research that is translated into practice and policy; and the promotion of transformational leadership that advances health policy and health services management.

We are committed to:

- Preparing graduates to be innovative and effective leaders in public health and health policy, health services delivery, and health system transformation.
- Conducting rigorous multidisciplinary research that addresses significant health challenges, is objective, and is translated to inform and affect health policy, health care management, and public health practice.
- Being a trusted resource for shaping and advancing health policy and management practices because of our research integrity and rigor, the real-world leadership experiences of our faculty and staff, and our exceptional students.
- Leveraging our unique location in Washington, DC, which allows for strong collaborations with health policy and management leaders and practitioners.
- Improving the health and health care of under-served and vulnerable populations.
- Promoting and learning from the diversity among our faculty, staff, students, and alumni in terms of background, experience, and thought.

Visit the Department of Health Policy and Management website (<https://publichealth.gwu.edu/departments/health-policy-and-management/>) for additional information.

GRADUATE

Master's programs

- Master of Health Administration (p. 1168)
- Master of Health Administration (MHA@GW (p. 1170))
- Master of Public Health in the field of health policy (p. 1185)

- Master of Science in the field of management of health informatics analytics (p. 1202)

Specialist program

- Health Services Administration Specialist (p. 1215)

Doctoral programs

- Doctor of Philosophy in the field of health policy (p. 1222)
- Doctor of Public Health in the field of health policy (p. 1229)

CERTIFICATE

- Graduate certificate in health administration generalist (p. 1231)
- Graduate certificate in health policy (p. 1232)

FACULTY

University Professor V.N. Gamble

Professors R. Bonar, A. Dor, L.H. Friedman, J. Heinrich (*Research*), D. Hughes (*Research*), K. Horton (*Research*), L. Ku, J.W. Levi, M. McCarthy, F.S. Mullan, P. Pittman, M.J. Regenstein, S. Rosenbaum

Associate Professors D. Anderson (*Teaching*), L. Cartwright-Smith, C. Chen, M.M. Goldstein (*Teaching*), L. Helmchen, L. Isaac (*Research*), M. Lillie-Blanton (*Research*), A.R. Markus, N. Seiler, P.W. Shin, J.B. Teitelbaum, J.H. Thorpe (*Interim Chair*), P.D. Vigilance

Assistant Professors K. Henderson (*Teaching*), L. Masselink, A. Moghtaderi, J. Phoenix (*Research*), W. Psek, A. Vichare

Teaching Instructors P. MacTaggart, J. Volarich

Adjunct Professor Z. Beckerman

Special Services S. Wilensky

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Health Services Management and Leadership (HSML) (p. 1570)
- Public Health (PUBH) (p. 1754)

PREVENTION AND COMMUNITY HEALTH

The Department of Prevention and Community Health is concerned with social and behavioral change for the health and well-being of people around the world. Its degree programs focus on prevention and the promotion of health and well-being with the active participation of individuals and communities, and are appropriate for students who are interested in putting into practice the latest public health research, or making significant scholarly contributions to the evidence base of public health. Master of public health students study four interrelated fields—community-oriented primary care; health promotion; maternal and child health; and public health communication and marketing. Doctoral students develop innovations in the science of health behavior.

GRADUATE

Master's programs

- Master of Public Health in the field of community oriented primary care (p. 1173)
- Master of Public Health in the field of health promotion (p. 1187)
- Master of Public Health in the field of maternal and child health (p. 1190)
- Master of Public Health in the field of public health communication and marketing (p. 1194)

Doctoral program

- Doctor of Philosophy in the field of social and behavioral sciences in public health (p. 1223)
- Doctor of Public Health in the field of health behavior (p. 1227)

FACULTY

Professors L.C. Abroms, W. Dietz, W.D. Evans, M.A. Napolitano, R.N. Rimal (*Chair*)

Associate Professors J. Bingenheimer, M.C. Edberg, D. Huebner, K.A. McDonnell, O.A. Price, K.M. Roche, C. Rodriguez-Diaz, M. Ruiz, A.N. Vyas

Assistant Professors E.L. Andrade, T. Henry (*Teaching*), C. Heminger (*Teaching*), S. Hull, M.W. Long, T. Taggart

Adjunct Professor Y. Hancock, A. Hinzey

Adjunct Instructor A. Franz

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses

- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 0920. Continuing Research - Master's. 1 Credit.

Continuing Research Credit- Master's Level.

PUBH 0940. Continuing Research - Doctoral. 1 Credit.

Continuing Research Credit- Doctoral.

PUBH 1101. Introduction to Public Health and Health Services. 3 Credits.

Introduction to aspects of public health and health services, including health services administration and policy, maternal and child health, environmental health, and health promotion.

PUBH 1102. History of Public Health. 3 Credits.

Historical and philosophical development of public health and its contributions to understanding, preventing, and controlling disease and disabilities.

PUBH 1102W. History of Public Health. 3 Credits.

Social history of public health from the late nineteenth century to the present; historical context for contemporary public health problems. Includes a significant engagement in writing as a form critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: UW 1020.

PUBH 1299. Undergraduate Public Health Study Abroad. 1-6 Credits.

May be repeated for credit when multiple courses with distinct subject matter are taken as part of a study abroad program.

PUBH 2110. Public Health Biology. 3 Credits.

Basic scientific mechanisms, concepts, and principles in health and the pathogenesis of diseases; a foundation for applications to public health. Prerequisites: BISC 1005; or BISC 1111 or BISC 1115 and BISC 1125.

PUBH 2112. Principles of Health Education and Health Promotion. 3 Credits.

Social and behavioral theories underlying health promotion program development and evaluation. Practical applications in a variety of domestic and global public health settings. PUBH 1101 may be taken as a corequisite. Prerequisite: PUBH 1101.

PUBH 2113. Impact of Culture upon Health. 3 Credits.

Relationships between cultural values and the development of modern health systems based on Western models of health care practice. Reliance upon traditional forms of health care. Examples of successful incorporation of traditional practices into evolving health care systems.

PUBH 2114. Environment, Health, and Development. 3 Credits.

Survey of the relationship between health and development and environmental trends. Topics include deforestation, urban contamination, and desertification.

PUBH 2115. Health, Human Rights, and Displaced Persons. 3 Credits.

Concepts of health as a human right, ethics, and the participation of the international community in moving toward health for all. Civil and international conflict in the generation of displaced populations.

PUBH 2116. Global Delivery of Health Systems. 3 Credits.

Introduction to health systems and the basic concepts of health systems administration and financing and health care reform with examples from advanced, middle income, and poor countries.

PUBH 2117. Service Learning in Public Health. 3 Credits.

A service-learning course that combines classroom instruction with practical learning. Students are responsible for securing an approved service site before the beginning of the semester; the instructor is available to assist with this placement.

PUBH 3115. Global Health and Human Rights. 3 Credits.

Concepts of health as a human right and the impact of ethical violations on the mental and physical health of individuals; the efforts of the international community in addressing health consequences of vulnerable populations.

PUBH 3116. Global Health Systems Performance. 3 Credits.

Introduction to the U.S. and international health systems, both public and private, and the WHO Health Systems Framework; how environmental, ethical, cultural, and political actions shape health systems in different parts of the world. Restricted to juniors and seniors.

PUBH 3130. Health Services Management and Economics. 3 Credits.

Basics of management theory, finance, and economics as applied to managing in the public health and health services field. Prerequisite: ECON 1011.

PUBH 3131. Epidemiology: Measuring Health and Disease. 3 Credits.

Principles of epidemiology applied to disease surveillance, control of infectious and chronic diseases, and health services/health policy. Understanding the basic research designs and their relationship to establishing cause and effect and effectiveness of interventions to prevent and cure disease. Prerequisites: PUBH 1101 and STAT 1127.

PUBH 3132. Health and Environment. 3 Credits.

Introduction to environmental and occupational health and implications for individual and population health. Issues of clean water, environmental toxins, air pollution, and the environmental impact on infectious diseases.

PUBH 3133. Global Health and Development. 3 Credits.

Political, social, and economic determinants of health; how health status is measured with an emphasis on low-income countries, the health of the poor, and inequity and inequality; burden of diseases that impact development and their basic epidemiological characteristics, including who they affect, when they occur, and where risk is greatest.

PUBH 3135W. Health Policy. 3 Credits.

An introduction to the fundamentals of the health care system in the United States and strategies available to policymakers when addressing problems relating to access, financing, and delivery of health care. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: PUBH 1101.

PUBH 3136. Health Law. 3 Credits.

Legal concepts related to individual health care and public health systems in the United States. Health care law, public health law, and bioethics.

PUBH 3137. Global Public Health Nutrition. 3 Credits.

Consideration of hunger and other nutrition issues globally, including food insecurity, under/over nutrition, and micronutrient deficiencies. Application of UNICEF malnutrition framework to describe vulnerable groups, critique program strategies, and identify multisectorial strategies to reduce hunger and malnutrition. Prerequisite: PUBH 3133.

PUBH 3150. Sustainable Energy and Environmental Health. 3 Credits.

Sustainability issues from the perspective of environmental health. Technical, social, and health implications of specific energy sources. Energy conservation and efficiency in the context of population growth, food and water resources, and maintenance of a healthy environment for future generations.

PUBH 3151. Current Issues in Bioethics. 3 Credits.

General and specific ethical questions and ethical decision making from both personal and organizational perspectives; right to health care, research with human subjects, reproductive technology, genetics, professional and student roles and responsibilities, and end-of-life issues.

PUBH 3151W. Current Issues in Bioethics. 3 Credits.

General and specific ethical questions and ethical decision making from both personal and organizational perspectives; right to health care, research with human subjects, reproductive technology, genetics, professional and student roles and responsibilities, and end-of-life issues. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

PUBH 3152. Qualitative Research Methods in Public Health. 3 Credits.

Introduction to characteristics and methods relevant to the design and conduct of qualitative research in public health investigations; data collection methods, coding, data analysis, and reporting results.

PUBH 3199. Topics in Public Health. 1-5 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

PUBH 3201. Introduction to Bioinformatics. 3 Credits.

Introduction to bioinformatics, including biological concepts of molecular biology, genome organization, and evolution; computational concepts of alignment, database searching, phylogeny, and structural bioinformatics; and programming concepts in Unix and Python including the Unix environment, the shell, scripting, databases, regular expressions, and pipeline development. Prerequisites: BISC 1112 or BISC 1116 and BISC 1126; and STAT 1127.

PUBH 3202. Introduction to Genomics. 3 Credits.

Principles of genomics; genome projects, including the human genome, molecular techniques, analytical approaches, computational tools for genome research, and genomic data generation and analysis. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; or BISC 1112 or BISC 1116 and BISC 1126.

PUBH 3299. Undergraduate Public Health Study Abroad. 1-6 Credits.

May be repeated for credit when multiple courses with distinct subject matter are taken as part of a study abroad program.

PUBH 4140W. Senior Seminar. 3 Credits.

Students develop a public health intervention incorporating various domains of the discipline of public health. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to public health majors in their senior year. Prerequisite: PUBH 3130.

PUBH 4141. Senior Seminar Community Needs Assessment. 3 Credits.

Culminating experience for students in undergraduate public health programs. Restricted to seniors in the BS in public health program and students in the minor in public health.

PUBH 4199. Independent Study. 3 Credits.

Outline of intended project must be approved prior to registration by instructor and dean's office. Restricted to public health majors.

PUBH 4201. Practical Computing. 3 Credits.

Basic concepts of computer programming in biomedical sciences and health informatics; foundations of R and Python languages; best programming practices in health applications. Prerequisites: BISC 1111 and BISC 1115; or BISC 1112 and BISC 1116.

PUBH 4202. Bioinformatics Algorithms and Data Structures. 3 Credits.

Algorithmic foundations of bioinformatics, ranging from generic algorithmic techniques to specific algorithms used in various areas of bioinformatics. Prerequisite: PUBH 4201.

PUBH 6001. Biological Concepts in Public Health. 2 Credits.

An overview of current knowledge about biological mechanisms of major diseases causing death and disability in the United States and globally; understanding and interpreting the reciprocal relationships of genetic, environmental, and behavioral determinants of health and disease in an ecologic context; analyzing, discussing, and communicating biologic principles of disease from a public health perspective.

PUBH 6002. Biostatistical Applications for Public Health. 3 Credits.

Application of biostatistical principles to critical analysis of retrospective studies, prospective studies, and controlled clinical trials, as well as studies in the health services literature. Selection, basic calculations, and interpretation of statistical methods for detection of significant associations and differences.

PUBH 6003. Principles and Practices of Epidemiology. 3 Credits.

General principles, methods, and applications of epidemiology. Outbreak investigations, measures of disease frequency, standardization of disease rates, study design, measures of association, hypothesis testing, bias, effect modification, causal inference, disease screening, and surveillance. Case studies apply these concepts to a variety of infectious, acute, and chronic health conditions affecting the population.

PUBH 6004. Environmental and Occupational Health in a Sustainable World. 2 Credits.

Examination of the connection between population health and exposures to chemical, physical, and biological agents in the environment. Problem-solving frameworks familiarize students with data sources, methodologies, and policy approaches being used to address the public health impacts of environmental and occupational health hazards, including the consequences of climate change, natural resource degradation, and industrial chemicals. Integration of key concepts of environmental health with principles of sustainability illustrate how public policies and practices on the local, national, and global level affect population health.

PUBH 6006. Management and Policy Approaches to Public Health. 3 Credits.

Introduction to the basic principles, concepts, and skills related to public health management and policy. Management and policy approaches to public health at the system, organization, and group and individual levels. The interrelated nature of management and policy.

PUBH 6007. Social and Behavioral Approaches to Public Health. 2 Credits.

Social and behavioral science theories, models, and concepts that can be applied to public health problems and interventions. The role of social and community factors, including race, ethnicity, and culture, in both the onset and solution of public health problems; the interrelationship between the social and behavioral sciences.

PUBH 6009. Fundamentals of Public Health Program Evaluation. 2 Credits.

Introduction to the fundamentals of program evaluation; selection of appropriate designs for program evaluation studies that produce and interpret evidence informing improvements in public health; options for evaluation study design and evidence generation, including qualitative data collection and analysis methods.

PUBH 6010. Independent Study. 1-6 Credits.

Designed to provide the student with an opportunity to gain or enhance public health knowledge and to explore an area of interest related to public health research or the delivery and/or administration of health services. Permission of the instructor or advisor required prior to enrollment.

PUBH 6011. Environmental and Biological Foundations of Public Health. 3 Credits.

The connection between population health and exposures to chemical, physical, and biological agents in the environment; interconnection between dimensions of environmental systems and all living things; biological sciences as they relate to environmental impacts.

PUBH 6012. Fundamentals of Health Policy. 2 Credits.

Comparative study of the structure, financing, and delivery of public health and health care in the United States and abroad; core elements of policy analysis are used to develop skills in analyzing a public health problem and presenting possible solutions both orally and in writing.

PUBH 6013. Master's Thesis. 3 Credits.

See Advisor.

PUBH 6014. Practicum. 1-3 Credits.

This course provides the opportunity for MPH students to apply the knowledge and skills acquired through their programs of study. A planned, supervised and evaluated practice experience that is relevant to the student's program is an essential component of a public health professional degree program. These opportunities can take place in a variety of agencies or organizations. Each program customizes Practicum requirements to meet students' needs. (Credit/No Credit) [For 45-credit MPH students who started Summer 06 or after.].

PUBH 6015. Culminating Experience. 1-3 Credits.

Students synthesize and integrate knowledge acquired in coursework and other learning experiences and apply theory and principles to a situation that approximates some aspect of professional practice. Program faculty evaluate student's mastery of the body of knowledge and ability to demonstrate proficiency in the required competencies. Requirements evaluated are adapted to the degree program.

PUBH 6016. Field/Laboratory Experience. 2 Credits.

The overall purpose of the field/laboratory experience requirement is to introduce students in the MS-PHMEID degree program to a supervised practical experience in a Public Health Laboratory or other qualifying public health entity from the perspective of the actual wet laboratory operations. Students that already have this laboratory experience are introduced to epidemiologic research, particularly surveillance, and its tie-in with laboratories either in the United States or in an international setting.

PUBH 6021. Essentials of Public Health Practice and Leadership I. 1 Credit.

The skills necessary for being an effective practitioner and leader; optimizing self-management and contributions in teams as public health professionals.

PUBH 6022. Essentials of Public Health Practice and Leadership II. 1 Credit.

The development of organizations and systems in public health; organizational management tools and collaborative, outcome-oriented advocacy techniques. PUBH 6021 may be taken as a corequisite. Prerequisite: PUBH 6021.

PUBH 6023. Interprofessional Education Experience. 0 Credits.

Completion of an interprofessional education experience (IPE) is required for all MPH students. Maximizes the student's capacity for collaboration with others to better address public health and health care challenges. A variety of options are available for students to complete this requirement before graduation. Restricted to MPH students.

PUBH 6050. Introduction to Health Services Delivery. 2 Credits.

Introduction to the U.S. health services financing and delivery system with a focus on the major components of the system, the interaction of elements of the system, and the history of the development of today's system. Addresses the national context and history of health services, population health and health care spending in the US, employment-based health insurance, Medicaid and the uninsured, Medicare, international health care systems, managed care, hospitals and facilities, physicians and health workforce, long-term care and prescription drugs, and health care reform. (Same as HSML 6202).

PUBH 6052. Practical Data Management and Analysis for Public Health. 2 Credits.

Practical aspects of dataset creation, data management, rudimentary statistical analysis, and tabular and graphical presentation of results. Tasks covered include creating codebooks, entering and cleaning data, deriving new variables from existing ones, choosing and implementing appropriate analytical techniques, graphing and tabulating results, and documenting and protecting work.

PUBH 6054. Community Engagement and Advocacy. 2 Credits.

Tools and strategies for public health practitioners to understand, respect, organize, and collaborate with community groups and organizations for promotion of healthy behaviors. Development of practical skills to harness available resources in a community to advocate for healthy living and positive health outcomes.

PUBH 6056. Public Health Leadership Seminar. 1 Credit.

Leadership lessons taken from the careers of a diverse group of executives and entrepreneurs from the corporate, government, nonprofit, and art sectors. Leadership theory and styles. Building networks; skills for effectively engaging with peers, potential employers, and business partners.

PUBH 6058. Researching Violence Against Women and Girls. 2 Credits.

The intersection of violence against women and girls (VAWG) and public health; the impact that violence has on the health of the survivor, her current and future children, and communities; methods and best practices for designing applied research on VAWG. Prerequisites: PUBH 6001, PUBH 6002, PUBH 6003, PUBH 6004, PUBH 6006 and PUBH 6007.

PUBH 6060. MPH@GW Culminating Experience I. 1 Credit.

Students integrate and apply the skills, knowledge, theories, principles and methods of public health practice to a public health issue. Corequisites: PUBH 6014 and PUBH 6061. Restricted to MPH@GW students. Prerequisites: PUBH 6001, PUBH 6002, PUBH 6003, PUBH 6004, PUBH 6006 and PUBH 6007.

PUBH 6061. MPH@GW Culminating Experience II. 1 Credit.

Students integrate and apply the skills, knowledge, theories, principles and methods of public health practice to a public health issue. Corequisites: PUBH 6014 and PUBH 6060. Restricted to MPH@GW students. Prerequisites: PUBH 6001, PUBH 6002, PUBH 6003, PUBH 6004, PUBH 6006 and PUBH 6007.

PUBH 6080. Pathways to Public Health. 0 Credits.

Introduces the 12 foundational public health learning objectives to GWSPH students in non-MPH graduate programs. Must be completed before the last day of classes in the student's first semester of matriculation.

PUBH 6090. Practicum/Culminating Experience. 4 Credits.

Individually tailored. Culminating Experience for the MPH program. Permission of the advisor required prior to enrollment.

PUBH 6091. Special Project. 1-4 Credits.

Under faculty supervision, the student undertakes an original project that applies the skills and knowledge gained in the chosen track and/or concentration within the MPH program. Prerequisite: Permission of the instructor. NOTE that credits vary by program; please consult your program plan to register for the appropriate number of credits. [For 36-credit MPH students only].

PUBH 6099. Topics in Public Health. 0-3 Credits.

In-depth examination of a particular facet of public health. Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

PUBH 6121. Environmental and Occupational Epidemiology. 3 Credits.

Demonstration and application of epidemiologic methods for the study of environmental and occupational health problems; epidemiologic exposure assessment methods and methods relevant to cohort, case-control, cross-sectional, and case cross-over studies; survey design and sources and evaluation of biases and confounding; emphasis on written and oral communication skills. Prerequisites: PUBH 6002 and PUBH 6003; and PUBH 6004 or PUBH 6011.

PUBH 6122. Protecting Public Health and the Environment: Policies, Politics, and Programs. 3 Credits.

The legislative, regulatory, judicial, and political system in the United States developed to protect human health and the environment. National and global public and environmental health agencies, policy development, and current topics. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6123. Toxicology: Applications for Public Health Policy. 3 Credits.

Toxicology as both a scientific discipline and a source of information for public health policy with respect to the regulation of foods, pesticides, drugs (pharmaceuticals), environmental chemical pollutants, and other chemicals that may affect human and environmental health. How chemicals interact with biological systems to produce adverse effects. The ways in which toxicologic information is developed and applied to regulatory decision making and the use of toxicology in regulatory risk assessment. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6124. Problem Solving in EOH. 3 Credits.

This culminating course uses problem-based learning methods to examine a variety of real-world EOH issues in depth. Cases stimulate students to integrate their cumulative knowledge across all required courses and demonstrate their professional competencies. Students to conduct activities characteristic of EOH practice: evaluating a variety of technical, public, and media, reports; integrating and interpreting environmental, exposure, and health information effectively; designing analytic and communication strategies; presenting in writing and orally relevant materials to address EOH issues; and, making appropriate policy and/or program decisions and recommendations. Prerequisites: PUBH 6121, PUBH 6123 and PUBH 6126.

PUBH 6126. Assessment and Control of Environmental Hazards. 3 Credits.

Introduces the anticipation, recognition, assessment, and control of hazards in the workplace and the ambient environment. It emphasizes an understanding of the characteristic features of specific hazards, which may be chemical, biological, or physical/ergonomic.

PUBH 6127. Introduction to Environmental Health Microbiology. 2 Credits.

Basics of public health microbiology as it relates to the environment, food, water, and bioterrorism. Examines from an environmental health perspective how the principles of microbiology are applied to current and emerging public health issues, whether from intentional or unintentional contamination of the environment. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6128. Global Environmental and Occupational Health. 2 Credits.

Examination of the global environmental and occupational health factors that contribute significantly to the global burden of disease, focusing primarily on low- and middle-income countries; principles from behavioral sciences, development economics, risk assessment, and epidemiology are included; potential solutions to environmental health problems, metrics used to measure impacts, and areas for future research. Prerequisite: PUBH 6004.

PUBH 6130. Sustainable Energy and the Environment. 2 Credits.

The sustainability of various energy strategies, including energy conservation, green building principles, renewable energy, and mitigation and adaption policies for climate change. Emphasis on the life cycle framework. Topics include natural resource depletion, water and energy consumption, and air, water, and solid waste pollutant emissions. Prerequisite: PUBH 6004.

PUBH 6131. Applied Data Analysis in Environmental and Occupational Health. 3 Credits.

Application of biostatistical and epidemiologic concepts and methods to analysis of environmental and occupational health (EOH) data. Students manage datasets, conduct data analyses, present data graphically, and interpret data for relevance to EOH research, policy, and practice. Development and practice of skills needed for analyzing complex exposures and communicating environmental and occupational research findings. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6011.

PUBH 6132. Water, Sanitation, and Hygiene (WASH) in Low-Income Countries. 2 Credits.

Introduction to working in both disaster and development settings in countries where contaminated water, inadequate sanitation, and poor hygiene (WASH) cause serious health problems. Students gain practical experience applying WASH methods in the field. Prerequisite: PUBH 6011.

PUBH 6133. Social Dimensions in Climate Change and Health. 3 Credits.

The drivers of climate change and outcomes with particular focus on health dimensions; obstacles, vulnerabilities, inequality, and adaptation as well as technical and social solutions.

PUBH 6135. Researching Climate Change and Human Health. 3 Credits.

Study of the effects of climate change on human health using evidence compiled by the National Climate Assessment (NCA); widespread impacts, ecological context, oceans of change, infrastructure, water resources, energy, land use, heat, and air quality. Recommended background: PUBH 6003 and PUBH 6004.

PUBH 6136. Introduction to Environmental and Occupational Epidemiology. 3 Credits.

Epidemiologic research designs; methods for the study of environmental and occupational health problems; exposure assessment methods; design aspects of cross-sectional, case-control, cohort, and case cross-over studies; sources and evaluation of biases and confounding; survey and questionnaire design. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6011.

PUBH 6137. Environmental and Occupational Health Culminating Experience I. 1 Credit.

The first in a two-course sequence. The final, integrative learning experience for the MPH in environmental health science and policy or global environmental health. Students apply the skills and knowledge, theories, and principles learned in the MPH program to practical public health problems. Restricted to MPH students in the Department of Environmental and Occupational Health who have completed all core courses and at least 9 credits in program-specific courses. Prerequisites: PUBH 6002 and PUBH 6003; PUBH 6004 or PUBH 6011; PUBH 6006 or PUBH 6012; and PUBH 6007.

PUBH 6138. Environmental and Occupational Health Culminating Experience II. 1 Credit.

The second in a two-course sequence. The final, integrative learning experience for the MPH in environmental health science and policy or global environmental health. Students apply the skills and knowledge, theories, and principles learned in the MPH program to practical public health problems. Restricted to MPH students in the Department of Environmental and Occupational Health. Prerequisite: PUBH 6137.

PUBH 6199. Topics in EOH. 0-3 Credits.

In-depth examination of a particular facet of public health. Topics and prerequisites vary.

PUBH 6233. Epidemiologic Principles and Practice of Disease Eradication. 2 Credits.

The role of epidemiology, surveillance, research, and information technology in the eradication of vaccine preventable and parasitic human diseases. Prerequisite: PUBH 6003.

PUBH 6234. Epidemiologic Methods in Neglected Tropical Disease Control. 1 Credit.

Introduction to neglected tropical disease epidemiology providing a broad overview of select tropical medicine and public health issues; focus on applications of epidemiologic methods to the study of public health consequences of NTDs. Corequisite: PUBH 6001. Prerequisite: PUBH 6003.

PUBH 6235. Epidemiology of Obesity. 1 Credit.

Introduction to the epidemiology of obesity; descriptive epidemiology, measurement, consequences, and determinants of obesity; adiposity and body composition; obesity interventions and policy. Prerequisites: PUBH 6003.

PUBH 6236. Systematic Review of Public Health Literature. 1 Credit.

The process of conducting systematic reviews of literature in order to translate research into public health practice recommendations. Recommended for MPH candidates planning to conduct a systematic review of the literature for their culminating experience. Prerequisites: PUBH 6002 or EXNS 6204; and PUBH 6003 or EXNS 6208.

PUBH 6237. Chronic Disease Epidemiology. 2 Credits.

Overview of the epidemiology (descriptive, analytic, and etiologic) of chronic diseases. Emphasis on epidemiologic methods and study design in relation to chronic disease, as well as public health approaches to disease control including surveillance, screening, and interventions. Prerequisites: EXNS 6204 or PUBH 6002; and EXNS 6208 or PUBH 6003.

PUBH 6238. Molecular Epidemiology. 1 Credit.

Concepts, principles, and use of molecular methods in epidemiologic and clinical research. Common molecular measures and their interaction with environmental factors. Development of a framework for interpreting, assessing, and incorporating molecular measures in their area of research. Prerequisite: PUBH 6003.

PUBH 6239. Epidemiology of Foodborne and Waterborne Diseases. 1 Credit.

Foodborne and waterborne toxicants; diseases linked to eating and drinking and their prevention. Topics include transmission of disease and disease processes; microbial toxins, mycotoxins, chemical toxins, bacterial infections (e.g., salmonellosis, shigellosis, vibrio, listeria), virus and parasitic infections; issues in food and water safety. Prerequisite: PUBH 6003.

PUBH 6240. Pediatric HIV/AIDS. 1 Credit.

Comprehensive overview of HIV infection in children, with emphasis on the global pediatric HIV epidemic. Biological, epidemiological, clinical, and psychosocial issues; public health programmatic approaches to prevention, care, and treatment. The national and global experience with scaling up prevention services in the global effort to virtually eliminate HIV/AIDS in children. Prerequisite: PUBH 6003. Recommended background: PUBH 6250 and PUBH 6253.

PUBH 6241. Nutritional Epidemiology. 2 Credits.

Methodological issues related to dietary assessment, nutrition surveillance, and the epidemiology of obesity. Current trends, including the health impacts of vitamin D and sodium. Interpretation of the scientific literature in the field. Examples drawn from the National Health and Nutrition Examination Survey. Prerequisite: PUBH 6003.

PUBH 6242. Clinical Epidemiology and Public Health: Reading the Research. 2 Credits.

Methods for reading epidemiology and public health research including case-control, cohort studies, randomized controlled trials, meta-analysis, testing and screening, prediction rules, decision and cost-effectiveness analysis. Prerequisites: PUBH 6003 or equivalent.

PUBH 6243. Topics in Clinical Epidemiology and Public Health: Reading the Research. 1 Credit.

An evidence-based problem solving applications course utilizing methods taught in PubH 6242 Clinical Epidemiology and Public Health: Reading the Research Prerequisite: PUBH 6003.

PUBH 6244. Cancer Epidemiology. 2 Credits.

Epidemiology of specific cancers, with an emphasis on molecular and genetic epidemiology. Current research in the field. Prerequisites: PUBH 6003.

PUBH 6245. Infectious Disease Epidemiology. 2 Credits.

The role and conduct of laboratory and field investigations in the epidemiology of infectious diseases. Prerequisite: PUBH 6003.

PUBH 6247. Design of Health Studies. 3 Credits.

Epidemiologic concepts and methods applied to specific research questions especially new types of public health problems. Recognition and development of the most appropriate study design for a specific health issue. Ecologic, cross-sectional, case-control, cohort studies and clinical trials. Sampling, measurement, questionnaire design, causality and causal criteria. Development of a research proposal. Corequisite: PUBH 6002. Prerequisite: PUBH 6003.

PUBH 6248. Epidemiology of Aging. 2 Credits.

The demographics, theories, and physiology of aging; descriptive and associative epidemiology of several common age-related diseases and disorders; implications for public health. Prerequisite: PUBH 6003.

PUBH 6249. Use of Statistical Packages: Data Management and Data Analysis. 3 Credits.

This course familiarizes the student with one of the most widely used database management systems and statistical analysis software packages, the SAS System, operating in a Windows environment. Throughout the course, several database management system techniques and data analytical strategies for the appropriate analysis of datasets obtained from a variety of studies are presented. Statistical techniques covered include linear regression, analysis of variance, logistic regression, and survival analysis. Prerequisite: PUBH 6002.

PUBH 6250. Epidemiology of HIV/AIDS. 2 Credits.

Methodological issues central to HIV/AIDS research. Biases peculiar to HIV/AIDS epidemiologic studies (both observational and experimental designs). The natural history of HIV, diagnosis, surveillance, vulnerable subpopulations, behavioral facets, and evaluation of epidemiologic studies with an emphasis on methodological considerations. Prerequisite: PUBH 6003. Recommended background: PUBH 6002.

PUBH 6252. Advanced Epidemiology Methods. 3 Credits.

Advanced quantitative epidemiologic methods, with a focus on basic data analytic techniques, identifying and evaluating bias and adjusting for confounding. Dose-response, trend analysis, and multiple linear and logistic regression models. PUBH 6249 may be taken as a corequisite. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6247 and PUBH 6249.

PUBH 6253. Issues in HIV Care and Treatment. 1 Credit.

This course provides an overview and in depth consideration of some of the major issues in treatment of HIV disease, including the assessment of efficacy and effectiveness, drug resistance, monitoring of drug toxicity, special populations, the interrelationship between treatment and prevention, and quality of care. The course has been designed with an interdisciplinary audience in mind. In discussions and assignments, students are able to emphasize their own area of interest and/or expertise (e.g. epidemiology, policy, etc).

PUBH 6255. Organizational Responses to the Local, National, and Global HIV/AIDS Epidemics. 2 Credits.

This seminar focuses on the rapidly evolving responses of local, national and global governmental and non-governmental organizations to the HIV/AIDS epidemic. Inspirational leaders of selected HIV/AIDS organizations are invited to describe how their organizations contribute to fighting the epidemic; the leadership and management skills that they use in their daily work; and their strategic decision-making processes. Basic principles of epidemiology, leadership and organizational strategy and structure are addressed through didactic presentations and interactive faculty-student dialogue. Lessons learned through the lens of HIV/AIDS organizations are broadly applicable to other public health problems. Students learn about the strengths and challenges of different types of public health organizations as they make career decisions about their own transition to the public health work force. Prerequisites: PUBH 6003, HIV/AIDS experience, or permission of the instructor.

PUBH 6258. Advanced Topics in Biostatistical Consulting. 1 Credit.

Principles and practice of biostatistical consulting in public health and medical research environments.

PUBH 6259. Epidemiology Surveillance in Public Health. 2 Credits.

Focus on foundations of public health surveillance systems for communicable as well as chronic diseases. Outbreak investigation methods are included, as well as surveillance data sources, data management, data analysis, ethical issues, surveillance system evaluation, and use of information for prevention. Surveillance systems for reportable diseases, nosocomial infections, bioterrorism events, cancer, environmental disease, vaccine-related adverse events, bovine spongiform encephalopathy, and military personnel are discussed. Prerequisite: PUBH 6003.

PUBH 6260. Advanced Data Analysis for Public Health. 3 Credits.

Advanced data analysis using the SAS System to expand on the analytic techniques gained in PUBH 6002 and PUBH 6249 and to provide students with the applied statistical skills required to analyze various types of public health datasets. Prerequisites: PUBH 6002 and PUBH 6249.

PUBH 6262. Introduction to Geographic Information Systems. 1 Credit.

Geographic information systems (GIS) for mapping and display of health data. The course makes use of ArcGIS 8.3. The use of spatial statistics for the detection of clusters and patterns in the spread of diseases. Working with geodatabases, shape files, layers, query information from attribute tables, geocode addresses and customizing GIS applications.

PUBH 6263. Advanced GIS. 1 Credit.

Provides mid to advanced level training in GIS for display and analysis of health data. Use software ArcGIS 9.3 and additional extensions such as Spatial Analyst and Geostatistical Analyst. Also uses GeoDa software. Emphasizes benefits of using GIS to do more than simply manage and map data. GIS supports a range of spatial analysis functions that enable researchers to extract additional meaning from manipulating geographic data. Learn to work with raster datasets and geodatabases to build spatial models for analyzing health data and evaluating spatial patterns of health events based on notion of distance. Prerequisite: PUBH 6262.

PUBH 6264. Quantitative Methods. 3 Credits.

Introduces basic concepts in mathematical statistics. Topics include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed are Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: MATH 1231 and MATH 1232; and PUBH 6002 and 6249.

PUBH 6265. Design of Medical Studies. 3 Credits.

Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and so.

PUBH 6266. Biostatistical Methods. 3 Credits.

Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6201, STAT 6202 and PUBH 6264.

PUBH 6267. Time Series Applications in Public Health. 2 Credits.

Introduce basic concepts for the identification and modeling of time series in the time domain approach. Learn a new set of terminology standards and a different way to analyze these type of data and to forecast future values of a time series and its accuracy. Software used is SAS/ETS and 3 procedures: ARIMA, AUTOREG, FORECAST. New mathematical notation is used. Prerequisite: PUBH 6249.

PUBH 6268. Advanced SAS. 1 Credit.

Intensive in advanced programming using SAS. Expand technical skills to provide advanced SAS tools for data management and graphics. Topics to include Interactive Matrix Language (IML), SAS Macro facility language, and drill-down graphs using SAS/GRAPH. Prerequisites: PUBH 6002 and PUBH 6249; or permission of the instructor.

PUBH 6269. Reproductive Epidemiology. 1 Credit.

Current research, controversial issues, and methodological problems in epidemiology of reproductive and perinatal health. Present reproductive health issues such as conception and infertility; perinatal issues such as complications of pregnancy, infections in pregnancy, adverse pregnancy outcomes, and birth defects. Prerequisite: PUBH 6003.

PUBH 6270. HIV/AIDS Surveillance. 1 Credit.

Overview of surveillance methods used domestically and internationally to monitor HIV/AIDS epidemic. Surveillance systems including sentinel, population based, behavioral, and incidence surveillance are presented and discussed. Strengths and weaknesses of these various systems are discussed in addition to how data from these systems impact and inform HIV/AIDS related policies and programs. Prerequisite: PUBH 6003.

PUBH 6271. Disaster Epidemiology. 1 Credit.

Introduction to disaster epidemiology that elucidates the important role epidemiologists play in assessing the health and psychological effects of natural and man-made disasters and in identifying factors that contribute to these effects. Focus on applications of epidemiologic methods to the study of public health consequences of disasters, case studies from actual disasters used to illustrate various roles of epidemiologist in responding to these events and lessons learned. Highlight key skills that epidemiologists need to be part of a response and recovery. Identify methodological issues for future work. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6272. Epidemiology of Infectious Agents Associated with Human Cancer. 1 Credit.

Describes the role of infectious agents in the etiology of human cancer. Emphasis on differences between specific oncogenic viruses. Other oncogenic agents, bacterial and parasitic, are also discussed. Discuss laboratory approaches to the documentation of their pathogenicity, how behavior affects mode of transmission, and which types of data provide strongest support for documenting oncogenic potential for humans. Prerequisite: PUBH 6003.

PUBH 6273. Ethnographic Methods. 1 Credit.

Use ethnographic field methods in conjunction with epidemiological research. Introduction to specific methods used to examine health phenomena and determinants of disease. Learn specific applied skills that can be modified with socio-cultural modifications to evaluate urban sites and other settings. Basic skills in application of ethnographic methods, including recursive observations, participant observations, and variety of approaches to interviewing such as in-depth, structured and non-structured as well as conversational interviewing. Discuss use of multiple approaches in conjunction with ethnography, including focus groups, archival, document, statistical and secondary data analysis, and survey research methods. Course emphasizes use of ethnographic research methods in community-based health settings and evaluates issues in cultural competency and how to garner stakeholder support to conduct epidemiologic studies. Prerequisite: PUBH 6003.

PUBH 6274. Emerging Infectious Diseases for Public Health Professionals. 2 Credits.

Focus on epidemiology of emerging infectious diseases of public health importance, including factors leading to their development, management of emerging infectious diseases from a public health and laboratory standpoint, including biosafety, and strategies for emergency preparedness from a national and international perspective. Emphasis on the context of emerging infectious diseases and strategic approaches to their containment. Prerequisites: PUBH 6003 or MICR 6292; or permission of the instructor.

PUBH 6275. Essential Public Health Laboratory Skills. 2 Credits.

This course provides public health students with practical laboratory experience. Prerequisites: MICR 6239 or permission of the instructor.

PUBH 6276. Public Health Microbiology. 3 Credits.

Gain in-depth understanding of important non-viral pathogens pertinent to public health microbiology. Learn how to isolate and identify pathogens using critical thinking and problem solving skills.

PUBH 6277. Public Health Genomics. 3 Credits.

Molecular technology and its impact on public health practice and discourse in the post-genomic era; the use of genomics to solve or help alleviate public health challenges. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6278. Public Health Virology. 3 Credits.

In-depth understanding of viral pathogenesis by focusing on current research, controversial issues, and public health relevance. Survey of family of viruses most relevant to today's public health efforts, concentrating on virus-host interactions and therapeutic strategies.

PUBH 6280. MEID Final Project. 2 Credits.

Focus on the synthesis and summary of data acquired through epidemiologic and/or public health laboratory research. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6292 and PUBH 6245; and biosafety training, CITI training, HIPAA training and permission of the instructor.

PUBH 6281. Analysis of Complex Surveys Using SAS and Stata. 2 Credits.

Appropriate methods to analyze survey data collected using complex sampling methods are discussed and applied to national survey data to address provocative public health research questions. An equivalent Stata course may be substituted for prerequisite 6249. Prerequisites: PUBH 6003 and PUBH 6249.

PUBH 6282. Introduction to R Programming. 1 Credit.

R is an open source software environment for statistical computing and graphics. Data transfer between SAS and R, data manipulation and visualization within R, programming and debugging, R libraries, and graphics theory. Prerequisite: PUBH 6249. Recommended background: Programming experience in a statistical package such as Stata or in high level language such as C, Python, Perl.

PUBH 6283. Biostatistics Consulting Practicum. 1 Credit.

Supervised experience involving the synthesis of biostatistical skills with client consultation. Students consolidate their skills through an experience-based understanding of how biostatistical skills are utilized in one or more domains of health research. Prerequisites: STAT 6201 and PUBH 6003. Recommended background: PUBH 6249 or PUBH 6210.

PUBH 6299. Topics in Epidemiology and Biostatistics. 1-3 Credits.

In-depth examination of a particular facet of public health. Topics and prerequisites vary.

PUBH 6305. Fundamentals for Health Policy: Public Health and Health Care. 2 Credits.

An overview of public health and health care in the United States as an introduction to the study and analysis of health policy. Presents the governmental framework, institutions, financing streams, workforce, constituencies, and interest groups engaged in the health sector to ensure that students begin their policy analytic training with grounding in the political, economic, and social realities of public health and health care.

PUBH 6310. Statistical Analysis in Health Policy. 3 Credits.

Quantitative and statistical methods of data analysis for health policy and health services research. Instruction in conducting data analyses using Stata statistical and data analysis software and application of acquired skills to health policy and health services research. Practical experience in programming and analysis of various health policy-related questions. Entering and importing data; creating, saving, and merging data sets; creating and modifying variables; labeling variables and values; and conducting analysis ranging from univariate to multivariate analyses, including multiple regression and logistic regression. The use of existing data sets to analyze health policy issues and interpret these analyses for policy purposes. Prerequisite: PUBH 6002.

PUBH 6315. Introduction to Health Policy Analysis. 2 Credits.

Core elements of health policy analysis: problem definition, background, the political, economic, and social landscape; development of policy options and recommendations. Written, graphic, and oral presentation skills associated with policy analysis. Summer, Fall, Spring. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6320. Advanced Health Policy Analysis. 3 Credits.

Practical applications of basic quantitative tools in health policy. Problem definition; political, social, and economic assessment of a problem; program evaluation and data analysis; development of policy options; and the written and oral presentation of findings and recommendations. Prerequisites: PUBH 6305 or PUBH 6012; and PUBH 6310 and PUBH 6315.

PUBH 6325. Federal Policymaking and Policy Advocacy. 2 Credits.

The federal health policymaking process, including an overview of the legislative, administrative, and judicial processes that affect policymaking; federal budget, authorization, and appropriation processes; common techniques and strategies used to advance legislative and regulatory policies, including coalition building and the use of policy studies and media relations. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6330. Health Services and Law. 3 Credits.

Examination of the ways in which the law and legal system in the United States influence and are influenced by the health care system. How judicial, statutory, regulatory, and constitutional sources of law embody health policy and affect access to and quality and financing of health care, as well as the regulation of patient rights.

PUBH 6335. Public Health and Law. 3 Credits.

How the law can both promote public health and conflict with the rights of individuals protected under the U.S. Constitution; legal concepts that underlie the public health system and inform public health policymaking; major areas of public health activity; the future of public health.

PUBH 6340. Health Economics and Finance. 3 Credits.

Examination of economic principles as they apply to health policy in the public and private sectors. The basic framework of economics is used to analyze the behavior of consumers, hospitals, physicians, and insurers, as well as pharmaceutical companies and long-term care providers. Overview of Medicare and Medicaid. Economic analyses of current issues in the marketplace, including rising health spending in the context of the national economy and the federal budget, insurance market dynamics, key issues in the long-term care industry, shifting market forces and power within the health care arena, and new payment initiatives and delivery system models. Prerequisites: PUBH 6352 or an undergraduate economics course.

PUBH 6345. Health Policy Research Design. 2 Credits.**PUBH 6350. Health Policy Capstone. 2 Credits.**

Required for MPH graduate students in the health policy concentration in the final semester before graduation. Students synthesize and integrate knowledge across multiple public health disciplines; apply theories, principles, and skills in ways that approximate professional practice in the field of health policy; and demonstrate mastery of the required knowledge and competencies addressed in the curriculum. Prerequisites: PUBH 6012 or PUBH 6305; and PUBH 6320.

PUBH 6352. Basics of Economics for Health Policy. 1 Credit.

An introduction to modern microeconomics -- the study of how consumers, firms, industries, and the public sector make decisions and allocate their resources in the economy. The principles of supply and demand and elasticity in both the private and public sectors are analyzed.

PUBH 6353. Child Health Advocacy. 1 Credit.

Introduction to child health advocacy. Affordable Care Act (ACA), preventive care, school health, environmental issues, and emergency care. The use of data for advocacy.

PUBH 6354. Mental Health/Substance Abuse Policy. 2 Credits.

Provides an overview of the U.S. mental health and substance abuse delivery system, its components, and the policy challenges created by the organization of this system. Considers the behavioral health care system from the perspective of several main "actors" in the system: patients, providers (primarily doctors and hospitals), health plans, and payers (public and private). Prerequisite: PUBH 6305.

PUBH 6355. Comparative Health Policy. 1 Credit.

Introduction to international health systems and world health policy innovations and potential relevance to the United States. The origins and comparative performance of a range of international health care systems and comparative responses to specific health policy challenges. Methodological challenges of international comparisons and theoretical implications. Students design and conduct comparative analysis in the form of a short policy research proposal. Prerequisite: PUBH 6305.

PUBH 6356. State Health Policy. 2 Credits.

Students develop a briefing on health and health care for a new governor and health secretary in order to gain a practical understanding of state health policy and programs. The course is designed to replicate the experience of a newly hired policy staff member learning the requirements for the position in a particular state. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6357. Health Economics and Policy: Cost Containment Strategies. 2 Credits.

Health care cost containment in the context of the current implementation of national health reform. Cost containment strategies; economic underpinnings, anticipated impacts, perspectives of and implications for health care providers and systems, and political considerations. Prerequisite: PUBH 6340.

PUBH 6358. Vaccine Policy. 2 Credits.

The development of U.S. vaccine policy and the growth of various markets targeting routine vaccination of all populations; interactions among business, legal, political, public health, medical, federal/state/local government, and consumer communities that combine to influence vaccine delivery in a broad range of settings. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6359. Reproductive Health Policy. 1 Credit.

Overview of reproductive health policy at the federal and state levels. Balancing the interests of competing stakeholders; the fundamental underlying role of significant disparities in financing for and access to reproductive health services; and how policymaking can alleviate or exacerbate preexisting issues.

PUBH 6360. Advanced Maternal and Child Health Policy. 1 Credit.

In-depth exploration of maternal and child health policy in the U.S., with a particular emphasis on the role of personal and public health services for women, children, youth and their families in the context of health and human services system change. Prerequisite: PUBH 6561.

PUBH 6361. Health Workforce Policy. 2 Credits.

Strategies for the prevention and control of infectious diseases, focusing on low and middle income countries. Goals, strategies, and challenges of major global health intervention programs. Surveillance systems, vaccination programs, chemotherapy as a prevention and treatment tool, nutritional supplementation, environmental approaches, and potential benefits of integrating multiple interventions. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6363. The Health Care Legislative Process. 1 Credit.

How health care legislation is developed in and moves through the U.S. House of Representatives and Senate. The roles of the committees of jurisdiction in each house and how the rules of each house affect legislative outcomes.

PUBH 6364. Federal Budget Process for Health Policy. 1 Credit.

Focuses on how the Congressional budget process shapes the funding and design of federal health care programs, ranging from entitlement programs like Medicare to appropriated programs like community health centers. Discussions cover budget resolutions, appropriations bills, and budget reconciliation legislation, as well as Congressional procedures and committees through which they are considered. Prerequisite: PUBH 6305.

PUBH 6365. Advanced Global Health Security and Diplomacy. 2 Credits.

The development of foreign policy at the nexus of global health and national security; the evolving concept of global health diplomacy. Science and technology policy, biodefense and counter terrorism, weapons of mass destruction nonproliferation, food security, global health challenges, and U.S. diplomacy. Role of government and non-governmental organizations.

PUBH 6366. Health Care Corporate Compliance. 2 Credits.

The federal laws and regulations that affect U.S. health care industry participants, particularly those relating to the prevention of fraud and abuse, and the role of corporate compliance programs. Prerequisites: HSML 6215 or PUBH 6330.

PUBH 6367. Population Health, Public Health, and Health Reform. 2 Credits.

In-depth assessment of how a reforming health care system can be expected to change the policy landscape for population and public health in the United States; direct changes evolving at the state and local level and national payment and health system reforms. Prerequisites: One of the following: HSML 6202, PUBH 6006, PUBH 6012, or PUBH 6305.

PUBH 6368. Law, Medicine, and Ethics. 3 Credits.

Legal, ethical, and policy issues that arise in the biomedical arena; the definitions of life and death, the nature of personal identity, the requirements of justice, and the boundaries of liberty. Prerequisites: PUBH 6330 or PUBH 6335.

PUBH 6370. Medicare/Medicaid Law and Policy. 2 Credits.

Describes current legal and public policy issues in the Medicare and Medicaid programs, including the legal, operational, financial, and organizational rules for the two programs. Prerequisite: PUBH 6315.

PUBH 6372. Minority Health Policy. 2 Credits.

Introduces students to the concept of health disparities and the implications of disparities for health care practice and policy. Students will learn how disparities are defined and measured, as well as emerging approaches in practice and policy to reducing disparities. Fall. Prerequisite: PUBH 6315.

PUBH 6374. Pharmaceutical Policy. 2 Credits.

Legal and regulatory frameworks related to the demand for and supply / quality of pharmaceutical products. Policies specific to drug development, pricing, reimbursement, use, dissemination of information, and post-marketing surveillance. Prerequisite: PUBH 6315.

PUBH 6376. Primary Health Care Policy. 2 Credits.

Politics and policy behind the provision of primary health care in the United States. The rise of the field of primary care and how it is supported and financed; the role of insurers and government in regulation and oversight in the areas of access, cost, and quality. Prerequisite: PUBH 6315.

PUBH 6378. HIV Policy in the US. 2 Credits.

Examines the policy response to the HIV epidemic in the United States and how the epidemic itself has helped to shape U.S. policy. How and why HIV became a national policy issue; circumstances surrounding the discovery of and early response to HIV; and main policy and programmatic developments and key players over time. The role and implications of the Affordable Care Act for individuals with HIV, the future of the Ryan White HIV/AIDS Program, and the impact of new treatment and prevention strategies on the future course of the epidemic.

PUBH 6380. Bridging Health Policy and Health Information Technology. 2 Credits.

Basics of health care informatics policy and core technological components for health services managers, public health professionals, health policy analysts, and health information technology staff. Policy and legal frameworks, governance and financial issues, technological infrastructure, and business and technological operations. Concepts and roles of information and how information technology can support the health care industry in promoting quality improvement.

PUBH 6382. Community Health Center Policy. 2 Credits.**PUBH 6384. Health Care Quality and Health Policy. 2 Credits.**

The role of quality in the U.S. health care delivery system from the perspective of multiple stakeholders, including public and private payers, providers, consumers, and employers. Defining and measuring quality; how quality information is used; and policy implications of quality improvement. Recent changes under health reform legislation. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6386. Public Health Preparedness Policy. 2 Credits.

Issues in public health emergency preparedness and response at the nexus of homeland and national security. The relationship between public health and criminal investigation, forensic epidemiology, and surveillance; biodefense; and the role of the scientific community. Infrastructure, threat themes, and associated preparedness and response policy.

PUBH 6390. Prescription Drugs: Policy and Public Health. 3 Credits.

Key policies and public health programs related to each stage of a prescription drug's life cycle; Congressional funding focused on speeding the development and approval of needed drugs, public and private approaches to increase access to prescription drugs, and exceptions to international laws that allow some countries to violate prescription drug patents to improve the health of impoverished citizens.

PUBH 6399. Topics in Health Policy. 0-3 Credits.

In-depth examination of a particular facet of public health policy. Topics and prerequisites vary.

PUBH 6400. Global Health Frameworks. 2 Credits.

Overview of current issues in global public health with particular emphasis on low and middle-income countries. Serves as both an introductory course for students entering the field of global health, as well as an update on current technical and policy issues for advanced students who may have considerable experience.

PUBH 6410. Global Health Study Design. 1,2 Credit.

Tools necessary for designing and understanding the research that goes into developing good public health programs; basic elements for the planning and design phase of a research project. Prerequisite or corequisite: PUBH 6009 or PUBH 6501. Prerequisite: PUBH 6003.

PUBH 6411. Global Health Qualitative Research Methods. 2 Credits.

An introduction to qualitative data collection and analysis in global health settings. Methodologies include survey design, interviews, focus groups, and participant observation. Archival research and clinical trial research are also addressed. The set of methods most commonly used to collect qualitative data in global health settings. Students are enabled to prepare interview guides, conduct in-depth interviews, and analyze and document the results from a qualitative field project. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6412. Global Health Quantitative Research Methods. 3 Credits.

Continuation of the series of global health methods courses. Examination of the fundamental concepts of empirical analysis and qualitative analysis, including open and axial coding, the basis of grounded theory, and regression analysis. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6416. Ethical and Cultural Issues in Global Health Research and Programs. 1 Credit.

Examine procedures and concerns for protecting communities and human subjects involved in public health programs and research. Consider cultural considerations integral to ethical conduct of public health research and programming in the global context. Discuss history behind rules and regulations that govern ethical principles around conduct of research involving human subjects. Consider contribution that awareness of cultural contexts where we work makes to ethical nature of our work as global health professionals.

PUBH 6417. Cross-Cultural Approaches for Global Health Practice. 1 Credit.

How to communicate, negotiate, and be more effective across cultures; social aspects that affect communication within cultures and how to navigate communication in practical situations including in the work place and in risk and crisis situations. Corequisite: PUBH 6410. Prerequisite: PUBH 6416.

PUBH 6430. Theories for Global Health Communication Interventions. 2 Credits.

Use of communication theory and methods in health promotion. Integration of multidisciplinary approaches to public health communication. Prerequisites: PUBH 6007 and PUBH 6400.

PUBH 6431. Global Health Communication Strategies and Skills. 3 Credits.

Students conduct qualitative research to evaluate health communication programs, assess readability level and suitability of written health education materials, conduct content analyses, and review/critique current health communication literature. Prerequisites: PUBH 6430 or permission of the instructor; and PUBH 6007.

PUBH 6435. Global Health Program Development and Implementation. 2 Credits.

Basic concepts and principles of program development and implementation including data collection methods, decision making, and problem-solving techniques. Application of program development techniques to specific interventions. Prerequisite: PUBH 6400.

PUBH 6436. Global Health Program Management and Leadership. 2 Credits.

Essential tools for successful project, personnel, and program management. Leadership and management theory; key issues in managing global health programs and projects; leadership and management skills development; use of data in management decision making; and importance of quality, supply chain, and resource management. Restricted to students in the MPH in global health program design, monitoring, and evaluation program. Prerequisites: PUBH 6400 and PUBH 6435.

PUBH 6437. Global Health Program Evaluation. 3 Credits.

Fundamentals of program monitoring and evaluation; developing and using program theory in evaluation; impact evaluation and mixed-methods approaches; qualitative methods and statistical analysis for program evaluation. Prerequisites: PUBH 6002.

PUBH 6440. Global Health Economics and Finance. 2 Credits.

Examination of economics and finance principles as they apply to global health. Organization, delivery, and financing of health care in developing countries. Tools for analyzing issues related to global health economics and finance and application of those tools to a variety of a global health issues, including demand for health care, health care financing, social insurance, pharmaceuticals, and HIV/AIDS. Prerequisite: PUBH 6400.

PUBH 6441. Global Health Organizations and Regulations. 3 Credits.

The functions, capacities, and governance of international health organizations; the normative power of some international health organizations for regulatory processes; and evidence-based development of public health policies with attention to issues of global trade as it shapes worldwide and national health. Prerequisite: PUBH 6400.

PUBH 6442. Comparative Global Health Systems. 2 Credits.

Examination of national health systems, how they differ, and how they are performing. Health systems analyzed through four different lenses: health care organizations, health workforce development, health care financing, and health policy development. Comparison of health systems and health reforms in seven regions of the world and assessment of how health system performance might be improved. Course fee may apply. Prerequisite: PUBH 6400.

PUBH 6443. Global Health Agreements and Conventions. 2 Credits.

Explores the impact of regulations, trade and human rights on health by examining the relevant international declarations, agreements and conventions. This course examines a variety of topics including the impact of international trade agreements on health, the International Health Regulations and other regulations affecting global health, and the relationship between health and human rights. Prerequisite: PUBH 6400.

PUBH 6445. Quantitative Methods for Impact Evaluation. 2 Credits.

Learning to use and produce empirical research in the public health field; review of quantitative techniques and research designs used to uncover causal effects of policies and programs, with applications to public health topics. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6412.

PUBH 6450. Global Health Diplomacy. 2 Credits.

Introduction to the concept of global health diplomacy; how diplomacy has been used to advance health agendas and how health issues have been used to improve diplomatic relations between countries; formal health, multi-stakeholder health, and informal health diplomacy; comparative study of how different countries have devised health diplomacy strategies.

PUBH 6451. Monitoring/Evaluation of Sexual/Reproductive Health Programs in Low- and Middle- Income Countries. 2 Credits.

Overview of key sexual and reproductive health challenges in low- and middle-income countries; designing and measuring programs to address those challenges. Taught from the perspective of applied researchers working within an organization that implements sexual and reproductive health programs and services. Prerequisites: PUBH 6437, PUBH 6500 and PUBH 6503.

PUBH 6452. Social and Behavior Change Communication in Middle- to Low-Income Countries. 2 Credits.

The ways in which behavior change and sociocultural theories underpin the development of SBCC programs in politically, culturally, and socially diverse settings. Prerequisites: PUBH 6007 and PUBH 6503.

PUBH 6455. Global Vaccinology. 3 Credits.

Concepts, methods, and tools for making new and existing lifesaving vaccines more accessible to individuals in low- and middle- income country settings. Recommended for second-year MPH students. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6461. Ethics and Accountability in Humanitarian Settings. 1 Credit.

Principles and fundamentals of ethical approaches and accountability processes in the delivery of humanitarian services and possible solutions and interventions to address them. PUBH 6480 may be taken as a corequisite. Prerequisite: PUBH 6480.

PUBH 6462. Nutrition and Food in Large Humanitarian Emergencies. 1 Credit.

Fundamentals of food aid programs and nutritional issues in emergency humanitarian situations and appropriate local and international responses in lower-income countries. Field-based program responses in international, resource-scarce settings, as conducted by NGOs and UN agencies. PUBH 6480 may be taken as a corequisite. Prerequisite: PUBH 6480.

PUBH 6463. Communication Strategies and Planning in Humanitarian Settings. 2 Credits.

Principles of and major challenges in communication planning with wide range of stakeholders in humanitarian settings; solutions and interventions to identify related risks and appropriately respond to and effectively plan communication strategies. PUBH 6480 may be taken as a corequisite. Prerequisites: PUBH 6007 and PUBH 6480.

PUBH 6464. Mental Health in Humanitarian Settings. 1 Credit.

Principles of and fundamental challenges to mental health in humanitarian settings, including potential solutions and interventions; foundational knowledge and skills in mental health and psychosocial support services in such settings. PUBH 6480 may be taken as a corequisite. Restricted to PUBH 6480.

PUBH 6465. Reproductive Health and Gender-Based Violence in Humanitarian Settings. 1 Credit.

Key issues, challenges, policies, and interventions related to sexual and reproductive health and gender-based violence in humanitarian settings for persons affected by armed conflict and natural disasters. PUBH 6480 may be taken as a corequisite. Prerequisite: PUBH 6480.

PUBH 6469. Humanitarian Aid Seminar Series. 1 Credit.

Targeted talks and panel discussions with humanitarian aid workers from a variety of agencies addressing important or controversial contemporary topics in humanitarian settings. Corequisite or prerequisite: PUBH 6480.

PUBH 6480. Public Health in Humanitarian Settings. 2 Credits.

Technical aspects of high-priority public health interventions; consideration of how and why sound public health interventions should be implemented in both emergency and chronic humanitarian settings; the roles of diverse humanitarian actors.

PUBH 6481. Global Mental Health. 2 Credits.

Focus on global mental health knowledge and public health policy implementation skills regarding the integration of mental health, public health, and primary care in diverse health systems and challenging cultural contexts. Prerequisite: PUBH 6400.

PUBH 6482. International Food and Nutrition Policy. 2 Credits.

Major global food and nutrition issues, their determinants, and the strategies that in place to address them. Students identify major nutrition and food challenges in a country or region as well as the policies and programs that have proven successful in addressing those challenges. Prerequisite: PUBH 6400.

PUBH 6484. Prevention and Control of Vector Borne Diseases. 2 Credits.

Study of insects and other vectors responsible for transmission of diseases in developing countries, including plague, malaria, dengue fever, onchocerciasis (river blindness), and chikungunya virus. Special focus on developing countries, particularly in the Middle East, Africa, Asia, and Latin America. Diseases such as West Nile Virus and Lyme disease in the United States and elsewhere are also addressed. New methods for effective management and control.

PUBH 6486. Global Health Programs and Approaches to the Control of Infectious Diseases. 2 Credits.

Strategies for the control of infectious diseases with a focus on low and middle income countries; identifying and critiquing goals, strategies, and challenges of major global health intervention programs designed to prevent and control infectious diseases. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6487. Emerging Zoonotic Diseases and Global Food Production. 1 Credit.

Analysis of trends in emerging zoonotic diseases and their links to global food production. Case studies on the use of surveillance systems and outbreak detection techniques to monitor emerging zoonotic diseases. Development of skills to analyze surveillance systems, policy reports, and literature related to emerging zoonotic diseases and food-borne outbreaks within a global context. Prerequisite: PUBH 6003.

PUBH 6488. Cost-effectiveness Analysis in Public Health and Health Care. 2 Credits.

The application of cost-effectiveness analysis (CEA) to enhance the efficiency of programs and services both in the United States and developing countries. A variety of topics and related analytical tools such as cost benefit analysis, decision analysis, and sensitivity analysis are covered. Students learn to perform cost-benefit and cost-effectiveness analyses and understand the strengths and limitations of these methods and how to apply them to a broad range of health issues.

PUBH 6489. Evaluation of Food and Nutrition Programs and Policies. 1 Credit.

Introduction to major global food and nutrition issues, strategies used to address these problems, and commonly-used program impact theories and evaluation frameworks; application of evaluation methods and approaches to nutrition and food programs and policies. Prerequisite: PUBH 6437.

PUBH 6491. Public Health Leadership Seminar. 1 Credit.

Leadership lessons derived from the careers of a diverse group of successful executives and entrepreneurs from multiple sectors, including corporate, government, nonprofit, and the arts. Development of skills for effective engagement with peers, personal network, potential employers, and business partners. Permission of the faculty member required prior to enrollment.

PUBH 6492. Global Health Programs and Approaches to the Control of Chronic Diseases. 2 Credits.

Concepts, methods, and tools to address chronic non-communicable diseases (NCDs); global public health and development dimension of NCDs, their epidemiology and risks, and health systems approaches for their control with focus on low- and middle-income countries. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6400.

PUBH 6493. Fundamentals of Supply Chain Management in Developing Countries. 2 Credits.

Practical approaches used by government policymakers, essential drugs program managers, NGOs, donors, and others to ensure that high-quality essential drugs are available, affordable and used rationally; existing and potential challenges and workable solutions related to managing the drug supply in developing countries. Restricted to graduate students.

PUBH 6494. Population, Public Health Practice, and Sustainable Development. 2 Credits.

The reciprocal connections between the dynamics of population growth, distribution, and age structure to health, well-being, and socioeconomic development.

PUBH 6495. Field Trial Methods and Application. 2 Credits.

Concepts, methods, and tools necessary to conduct community-based randomized trials in low- and middle-income country settings; the process of running a randomized field trial from selecting a topic, through implementation, to analysis and reporting. Most appropriate for students in their second year of study. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6499. Topics in Global Health. 0-3 Credits.

Examination of a particular facet of public health. Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details.

PUBH 6500. Planning and Implementing Health Promotion Programs. 3 Credits.

Students develop skills to effectively plan, design, and implement programs that address public health problems for defined populations in a variety of settings. Prerequisite: PUBH 6007.

PUBH 6501. Program Evaluation. 3 Credits.

The knowledge, competencies, and skills needed to plan and implement evaluations of public health programs in a variety of settings; types of program evaluation, including needs assessment, process evaluation, quantitative and qualitative monitoring of outputs, outcomes, and impact. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6007; and PUBH 6435 or PUBH 6500.

PUBH 6502. Practical Data Analysis for Prevention and Community Health. 1 Credit.

Practical aspects of dataset creation, data management, rudimentary statistical analysis and tabular/graphical presentation of results in the user-friendly environments of PASW (formerly SPSS) and MS Excel. Students create codebooks, enter and clean data, derive new variables from existing ones, choose appropriate analytical techniques and implement them, graph and tabulate results, and document and protect work. Examples are drawn from commonly-encountered situations in prevention and community health, such as needs assessments and program evaluations. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6500.

PUBH 6503. Introduction to Public Health Communication and Marketing. 3 Credits.

The application of health communication theories, principles and techniques, as well as marketing constructs and concepts, to advancing public health through practitioner-oriented health communication and social marketing campaigns and programs.

PUBH 6504. Social and Behavioral Science Research Methods. 3 Credits.

The processes of study design, data collection, and analysis using SPSS for quantitative research in prevention and community health. All phases of the observational/survey research process considered sequentially, from formulation of research questions to preparation of the final report. Prerequisites: PUBH 6002 and PUBH 6007; or permission of the instructor.

PUBH 6508. Cost-Effectiveness Analysis of Health Promotion Interventions. 3 Credits.

Theoretical basis for and practical skills needed to estimate the effectiveness, population impact, and cost of health promotion interventions; application to policy and cost-effectiveness and cost-utility analyses. Familiarity with basic algebra and statistics is assumed. Prerequisites: PUBH 6002 and PUBH 6003; and PUBH 6006 or PUBH 6012.

PUBH 6510. Community-Oriented Primary Care Principles and Practice. 3 Credits.

Theory and practice of community-oriented primary care, including an extended small group exercise carrying out a COPC project with a simulated community using Web-based data sets.

PUBH 6512. Community-Oriented Primary Care Policy and Issues. 2 Credits.

Advanced work on COPC methods and policy, focusing on issues related to the provision of health care in underserved communities. Prerequisite: PUBH 6510.

PUBH 6513. Community Health Management. 2 Credits.

Management and development of community health services. Builds upon principles for management and community-oriented primary care. Prerequisites: PUBH 6003 and PUBH 6510.

PUBH 6514. Preventing Health Disparities. 2 Credits.

Provides students with an understanding of how social, political, and economic factors contribute to disparities (e.g. racial, ethnic, gender, and geographical) in health and health care and how to use evidence-based approaches to prevent or address health disparities.

PUBH 6515. High Risk and Special Populations. 2 Credits.

Provides students with an overview of the methods to plan, implement and evaluation health promotion and education programs targeted towards high risk and special populations. The course reviews the socioeconomic, political-economic, cultural and psychosocial factors of populations who are considered to be at high risk for specific health problems and efforts that have been addressed in current health promotion programs. Prerequisite: PUBH 6007.

PUBH 6516. Community Health Information Resources. 2 Credits.

COPC and community health promotion require diverse information skills in order to assess community needs and strengths, determine priority health issues, analyze data, plan interventions, and evaluate programs. This course introduces students to the information resources useful in planning and implementing COPC and community health projects that address racism. The selected resources support methods for defining a community, characterizing a community's social and health characteristics, investigating a prioritized problem, and developing programs and solutions. Students learn how to choose resources, search them, and consider bias in information sources.

PUBH 6530. Qualitative Methods in Health Promotion. 2 Credits.

Application of qualitative methods in the development of health promotion interventions, evaluations, and research. Collecting and analyzing qualitative data through participant observation, interviewing, group methods, and case studies. Prerequisite: PUBH 6007.

PUBH 6531. Health Promotion in Health Care Settings. 2 Credits.

Behavioral change counseling and training skills to improve health by changing individuals' behaviors and by developing training materials for use with providers, health professionals and high risk groups. This is an advanced course for second year students. Prerequisites: PUBH 6007 and PUBH 6500.

PUBH 6532. Community Organization, Development, and Advocacy. 3 Credits.

Educates health promotion practitioners in how to organize community groups to promote health. The focus is on learning how to use resources available in the community to advocate change. Prerequisite: PUBH 6007.

PUBH 6533. Design and Conduct of Community Health Surveys. 2 Credits.

This course teaches students how to frame questions in health promotion surveys using sound principles of questionnaire design with emphasis on reliability and validity. Students learn survey design principles and methods and how to analyze survey data.

PUBH 6534. Community-Based Participatory Research. 1 Credit.

Students learn how to conduct community research in collaboration with community leaders and residents. Emphasizes the principles of CBPR for addressing health promotion issues in communities including community needs and administrative and policy changes.

PUBH 6535. Promotion of Mental Health. 2 Credits.

Increases understanding about issues in mental health promotion. The emphasis is on mental health as a public health issue and linkages between individual mental health and the environment. Prerequisite: PUBH 6007.

PUBH 6536. Workplace Health Promotion. 2 Credits.

Planning, management and evaluation of programs designed to serve employees' needs, promotion of employee health and reduction of health care costs in the workplace. Prerequisite: PUBH 6007.

PUBH 6537. Health Promotion and Aging. 2 Credits.

Introduces students to the basic health aspects of the aging process and special health promotion needs for this group. Problems of aging and public health solutions for older Americans are examined. Students are able to define the public health concerns for aging Americans, how aging is affected by a multitude of factors, identify health promotion strategies to assist in reaching out to this population and develop methods of collaboration with agencies and organizations to improve the health of the aging population. Prerequisite: PUBH 6007.

PUBH 6550. Maternal and Child Health I. 3 Credits.

Public health issues affecting the health and well-being of women, children, and families. A multidisciplinary perspective that integrates the biological, demographic, epidemiological, economic, behavioral, social, cultural and environmental aspects.

PUBH 6551. Maternal and Child Health II. 3 Credits.

.

PUBH 6552. Women's Health. 2 Credits.

Issues of women's health through the life cycle. The process of critically evaluating women's health research and issues.

PUBH 6553. Adolescent Health. 2 Credits.

Issues of physical, mental, and social development and their bearing on the health of adolescents, with special emphasis on prevention.

PUBH 6554. Children and Youth with Special Needs. 2 Credits.

In order to place children and youth with special needs into a public health framework, this course presents an introduction to and an overview of children and youth with special needs due to a developmental disability. Many aspects of developmental disability are addressed including 'concept' and definitions of disability, causes, epidemiological considerations, and development of federal legislation. The scope and range of developmental disabilities are reviewed along with classification schemes. Both national and international distributions are considered from a sociopolitical viewpoint.

PUBH 6555. Reproductive Health: U.S. and Global Perspectives. 2 Credits.

Reproductive health from a variety of public health perspectives, from defining reproductive health, past perspectives, needed improvements, and the factors that influence reproductive health.

PUBH 6556. Maternal and Child Nutrition. 2 Credits.

Covers the nutritional needs of women during the child bearing years, infants, children and adolescents. The course emphasizes the life course approach to nutrition and has a special emphasis on the effects of diet during infancy on obesity and degenerative diseases in later life. Students examine the biological basis of nutrition, identify risk factors associated with poor nutrition in individuals and populations and evaluate domestic and international programs. Summer (1 credit) and Spring (2 credits).

PUBH 6557. Child Development and Public Health. 2 Credits.

Examination of the development of children from a public health perspective and provide a detailed examination of the indicators of children's health that are needed to assist public health professionals improve children's health.

PUBH 6558. Women, Gender, and Health. 2 Credits.

Focuses on gender as a social determinant of health. Emphasis placed on examining the frameworks that are used in public health research to understand gender-based issues and how these frameworks affect the types of programs and intervention efforts developed.

PUBH 6559. HIV Prevention: An Interdisciplinary Approach. 2 Credits.

Provides an interdisciplinary overview of HIV prevention research from the behavioral, biological and biomedical perspective. Students are encouraged to approach the assignments and discussions from their own particular expertise and career interests/goals.

PUBH 6560. School Health and Safety. 1,2 Credit.

Examines the history, organization, financing, and politics of school health programs. It provides an overview of the core components of school health as defined by the Center for Disease Control and Prevention: health services, health education, physical education, nutrition services, counseling or mental health, school environmental health, health promotion, and family/community involvement. Summer (1 credit); Spring (2 credits).

PUBH 6561. Maternal and Child Health Policy Analysis. 2 Credits.

Provides instruction in maternal and child health policy in the U.S. with a particular emphasis on policies related to the organization, financing, delivery, and quality oversight of personal health services for mothers and children.

PUBH 6562. Physical Activity and Obesity Interventions: From the Individual to the Environment. 2 Credits.

This course broadly examines the public health issues related to physical activity and obesity, particularly as they relate to solutions for addressing individual factors and the obesogenic environment. Students gain a further understanding of the social, physiological, behavioral, and environmental factors related to both obesity and physical activity. The course focuses on examining multiple levels of solutions, specifically: 1) individual and behavioral interventions; 2) school-based and community-level interventions; 3) environmental interventions; 4) policy-level interventions. Students are expected to critically evaluate the necessary components of interventions, and apply that knowledge to future programmatic efforts.

PUBH 6563. Global Child Health. 2 Credits.

Elements of science, policy, challenges, and successes of global child health; focus on low and middle income countries and children under five years of age. Learn the burden of disease and associated risk factors; cost-effective interventions and tools. Restricted to graduate students.

PUBH 6570. Advanced Public Health Communication: Theory and Practice. 3 Credits.

Focuses on the use of communication to positively influence people's – and population's – understanding of health information, decision-making, and health behavior. Students study, and in a group project apply, a range of theories and techniques germane to effective message design and delivery. Prerequisite: PUBH 6503.

PUBH 6571. Social Marketing: Theory and Practice. 3 Credits.

The use of marketing to change the behavior of people, populations, and policy makers in ways that are in their, and society's, best interests. Students in this skills-based course study and work in teams to apply a range of marketing strategies to a real-world situation. Prerequisite: PUBH 6503.

PUBH 6572. Marketing Research for Public Health. 3 Credits.

The use of marketing research techniques used to better understand customers of public health programs in order to improve program design, implementation, and effectiveness. A range of qualitative and quantitative techniques are studied for their relevance to program planning, development, and continuous improvement.

PUBH 6573. Media Advocacy for Public Health. 3 Credits.

Focuses on the use of communication to positively influence public policy and public opinion. In this skills-based course students study and apply a range of theories and techniques germane to the policy advocacy process. Prerequisite: PUBH 6503.

PUBH 6574. Public Health Branding: Theory and Practice. 2 Credits.

This course focuses on the use of branding in the public health and social sectors. Learning from the commercial sector, we examine how to brand behaviors as well as products and services. We review branding methods, examine research on branding and its effectiveness, and build skills in branding for public health objectives.

PUBH 6575. Communication Skills for Public Health Professionals. 1 Credit.

Helps students develop writing and oral presentation skills through intensive, interactive training, practice, and feedback. Provides participants with a solid foundation for all forms of public health and other scientific and technical written and oral communication.

PUBH 6590. Introduction to Social Entrepreneurship. 2 Credits.

Examine innovative organizations created to improve people's lives and contribute to improved social and economic conditions. Emphasis on how such organizations are started, how they are sustained, and the various business models that are adopted to achieve an organizational mission.

PUBH 6591. PA/MPH Clinical Leadership Seminar. 1 Credit.

For first-year physician assistant and master of public health program students, an orientation to their roles as health professionals. Special emphasis on preventive and community medicine.

PUBH 6599. Topics in Prevention and Community Health. 1-3 Credits.

In-depth examination of a particular facet of prevention and community health. Topics and prerequisites vary.

PUBH 6610. Public Health Nutrition Practice and Leadership. 1 Credit.

This course provides an overview of public health nutrition practice. Students develop communication, management and leadership skills necessary for successful careers. Students also explore potential practicum and culminating experience options, and how to use these experiences to achieve their career goals. This course is designed for first year students in the public health nutrition MPH program.

PUBH 6611. Nutrition Assessment. 2 Credits.

This course examines the anthropometric, biochemical, clinical and dietary methods for assessing nutritional status in individuals. The process of conducting a food and nutrition environment assessments is also addressed.

PUBH 6612. Food Systems in Public Health. 2 Credits.

A systems approach to understanding food systems and associated public health issues. How the current food system evolved, and how issues such as climate change and population growth may affect food systems in the future. The role of public health practitioners in meeting the population's need for safe, sufficient, and nutritious food. Policies, programs, and proposals aimed at creating healthier, more sustainable food systems.

PUBH 6613. U.S. Food Policy and Politics. 2 Credits.

The programs, regulations, and legislation that pertain to food production, food safety, nutrition assistance, and dietary guidance in the United States at the federal, state, and local levels.

PUBH 6619. Fundamentals of Nutrition Science. 3 Credits.

The fundamental scientific principles of human nutrition; improving diet and nutritional status in the broader context of public health; nutrition assessment, study designs in nutrition science research, the role of nutrition in chronic disease, and current topics in nutrition science.

PUBH 6620. Designing Healthy Communities. 2 Credits.

Issues at the intersection of public health and planning; evaluating needs and creating change in communities facing food access, physical activity, and age related challenges; the built environment as a means of improving health and preventing chronic disease.

PUBH 6621. Applied Data Analysis in Exercise and Nutrition Sciences. 1 Credit.

Introduction to data management and data analysis using the SAS System; data analysis procedures for specific research questions and settings within the context of exercise and nutrition sciences. Restricted to students in the MPH in physical activity in public health program, program design and evaluation track, or with the permission of the advisor. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6682. Managing Natural Resources for Food Production. 3 Credits.

The relevance of natural resource conservation for ensuring healthy agricultural, food, and environmental systems; various approaches to achieving sustainable systems. Restricted to students in the graduate certificate in food policy leadership program.

PUBH 6683. Applied Food Policy Immersion Experience. 2 Credits.

Leadership theories and an opportunity to build leadership skills and engage with food policy and agriculture leaders from a variety of sectors. Includes site visits to public and private organizations significant in food policy. Restricted to students in the graduate certificate in food policy leadership program. Prerequisites: PUBH 6680 and PUBH 6682.

PUBH 6699. Topics in Nutrition Sciences. 3 Credits.

Examination of a particular facet of nutrition sciences. Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details.

PUBH 6999. Master of Science in Epidemiology Thesis. 2 Credits.

Thesis research. Restricted to students in the MS in epidemiology program.

PUBH 8242. Advanced Topics in Clinical Epidemiology and Public Health: Reading the Research. 1 Credit.

Evidence-based problem-solving approach using methods covered in PUBH 6242. Corequisite: PUBH 6242. Restricted to doctoral students. Prerequisites: PUBH 6003 or equivalent.

PUBH 8244. Doctoral Topics: Cancer Epidemiology. 1 Credit.

Course focuses on critical review and interpretation of cancer epidemiology literature as well as issues in research design in the field. Corequisite: PUBH 6244. Prerequisites: PUBH 6001 and PUBH 6003.

PUBH 8245. Doctoral Topics: Infectious Disease Epidemiology. 1 Credit.

Provides doctoral level material on the content of infectious disease epidemiology. The course focuses on critical review and interpretation of infectious disease literature as well as issues preparing an analytic research paper on an emerging infectious disease and the application of tools used to describe the epidemiology of those diseases. Corequisite: PUBH 6245. Spring Prerequisite: PUBH 6003.

PUBH 8250. Doctoral Topics: Epidemiology of HIV/AIDS. 1 Credit.

Students select specific topic within area of HIV/AIDS epidemiology. Options include responding to a data analysis problem; responding to a methodological problem found within HIV/AIDS research; or another topic approved by instructor. Corequisite: PUBH 6250. Prerequisites: PUBH 6001 and PUBH 6003.

PUBH 8259. Doctoral Topics: Epidemiologic Surveillance in Public Health. 1 Credit.

Course provides doctoral level material on the content of surveillance offered in PUBH 6259. Focus is on critical review and interpretation of surveillance literature as well as issues preparing an analytic research paper. Corequisite: PUBH 6259. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 8283. Doctoral Biostatistics Consulting Practicum. 2 Credits.

Working under supervision, students develop an experience-based understanding of how biostatistical skills are used in one or more areas of health research. Students must have completed at least 6 credits in any combination of general or specialized graduate-level statistics courses, such as PUBH 6202, PUBH 6260, STAT 6201, or STAT 6202, before enrolling in this course. Restricted to PhD students.

PUBH 8364. Quantitative Methods. 3 Credits.

Introduces basic concepts in mathematical statistics. Topics include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed are Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: MATH 1231 and MATH 1232; and PUBH 6002 and PUBH 6249.

PUBH 8365. Design of Medical Studies. 3 Credits.

Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and sampling. Ethics of clinical trials and the intention-to-treat principle. Prerequisite: PUBH 6002.

PUBH 8366. Biostatistical Methods. 3 Credits.

Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6202 or permission of the instructor.

PUBH 8401. Foundations in Public Health Leadership and Practice. 3 Credits.

Interactive seminar course provides students in the doctor of public health (DrPH) program with a fundamental understanding of the history of and current issues associated with the four principal DrPH program areas: health policy, health behavior, global health and environmental and occupational health.

PUBH 8402. Leadership and Decision Making: Skills Based Approach. 2 Credits.

Using leadership and decision making skills to solve complex health problems and implement successful solutions to improve population health in all communities; decision making, program management, quality and risk management, human resources and budget, governance, and change management.

PUBH 8403. Leadership in Public Health Policy and Practice. 2 Credits.

Students work in teams on projects for clients from public health-related agencies or organizations in the Washington, DC, area that address issues in environmental and occupational health, global health, health behavior, and health policy. Restricted to students in the DrPH program. Prerequisite: PUBH 8402.

PUBH 8404. Advanced Topics: Health Systems and Health Policy Research. 3 Credits.

Examination and assessment of issues related to the intersection of health care systems and health policy, and how health policy and health services research can inform the development and evaluation of health care systems and health policy. Restricted to doctoral candidates. Prerequisite: PUBH 6315.

PUBH 8405. Advanced Topics: Health Economics Research. 3 Credits.

Critical financing issues for U.S. public health and health care services and systems. The role of health services research in understanding the effects of these issues and informing the deliberations and decisions of policymakers.

PUBH 8406. Advanced Topics: Health Research in the Global Arena. 3 Credits.

Alternative field methods adopted from sociology, anthropology, economics, and political sciences for social sciences and policy research. Builds data collection, instruments, measurements, indicators, and data analysis and interpretation skills in specific socio-cultural contexts. Ethical issues in international research.

PUBH 8407. Advanced Topics: Health Leadership in International Settings. 3 Credits.

Doctoral students develop the tools and experiences needed to build capacity for leadership in global health. Prerequisite: PUBH 8406.

PUBH 8408. Advanced Topics: Health Behavior Research & Practice Applications. 3 Credits.

Advanced topics relating theory to practice in areas of health education and behavioral change. Application of qualitative and quantitative research to health related behavior at individual and community levels.

PUBH 8409. Advanced Topics: Health Communication Research. 3 Credits.

Methods of communications research designed to alter health behavior. Emphasis on critical analysis of communications research aimed at the mass public, groups, and interpersonal level.

PUBH 8411. Advanced Topics: Principles of Human Health Risk Science. 3 Credits.

This course provides the doctoral student with a comprehensive orientation to the frameworks, principles and issues involved in assessing, managing and communicating environmental health risks. This fundamental, interdisciplinary course is designed to foster dialogue and insights about contemporary risk science and management issues, including ethical concerns and technical issues that influence policy making. Restricted to students in the environmental and occupational health program, or with permission of the instructor.

PUBH 8412. Advanced Topics: Environmental and Occupational Health Research and Practice. 3 Credits.

This course exposes students to the theory and reality of both research and practice in environmental and occupational health. There is an emphasis on the use of public health science in policy and regulatory decisions. Prerequisites: PUBH 8411 or permission of the instructor.

PUBH 8413. Research Leadership. 1-10 Credits.

Students participate in a range of activities designed to develop and enhance their research methods and analytic skills. These activities include participating in the development and submission of sponsored research proposals; being formally affiliated with a research project, assuming responsibility for completing a real-world research project; engaging in empirical data collection and analysis efforts.

PUBH 8414. Policy and Management Leadership. 1-10 Credits.

Students develop and enhance their management, leadership, and policymaking skills for problem solving in real-world settings; public health departments, community health centers, legislative settings, and public or teaching hospitals.

PUBH 8415. Instructional Leadership. 1-10 Credits.

Students participate in a range of activities designed to develop and enhance their teaching skills. These activities include course development, teaching master's level courses, acting as TA for undergraduate courses, advising students about their class performance, evaluating student performance, and developing remedial programs for students.

PUBH 8416. Study Design & Evaluation Methods. 3 Credits.

Prepares doctoral students to design and conduct program and policy evaluation in public health. Intensive introduction to the principles of study program design and evaluation research emphasizing the ability to synthesize the population-based intervention literature, apply planning and management methods, describe and apply research methods from a range of disciplines, and prepare a program research proposal.

PUBH 8417. Qualitative Research Methods and Analysis. 3 Credits.

Techniques for designing and conducting qualitative research and for analyzing and reporting qualitative data relevant to program development and implementation, community assessment, and policy analysis. Prerequisite: PUBH 8416.

PUBH 8418. Applied Statistical Analysis. 3 Credits.

Intensive course in data management and data analysis using STATA®. Database management system techniques and data analytical strategies for the appropriate analysis of data sets obtained from a variety of studies will be presented. The student will manipulate national data sets from epidemiological studies as well as Demographic and Health Survey (DHS) data. Prereq: PubH 8416.

PUBH 8419. Measurement in Public Health and Health Services. 3 Credits.

Review principles of measurement and assessment as they apply to public health and health services research constructs, review existing state-of-the-art measures of individual and population health status (e.g., morbidity, mortality, functioning and health-related quality of life) and of individual and community health behavior. Explore current measurement issues in health research.

PUBH 8420. Advanced Analysis and Dissemination. 3 Credits.

Advanced multivariate data analyses of complex datasets and programs, including advanced cross-sectional techniques, time-series analysis, and the use of panel data. Evaluation of results, and dissemination of findings to relevant stakeholders. Fall. Prerequisites: PUBH 8417 and PUBH 8418.

PUBH 8422. Advanced Health Care and Public Health Research Design. 2 Credits.

Design of protocol suitable for implementation as part of DrPH dissertation requirement. Permission of the instructor, completion of required coursework, and successful completion of the comprehensive examination required prior to enrollment.

PUBH 8423. Dissertation Research. 1-12 Credits.

Dissertation research for DrPH. Prerequisite: PUBH 8422.

PUBH 8434. Behavioral Medicine and Public Health. 3 Credits.

Investigation into the field of behavioral medicine, which integrates behavioral, psychosocial, and biomedical sciences, with specific applications to public health. Restricted to PhD students in the social and behavioral sciences in public health program or with the permission of the instructor.

PUBH 8435. Dissertation Proposal Development for Social and Behavioral Sciences. 2 Credits.

Advise and assist doctoral students in developing and defending their dissertation proposal. Restricted to doctoral students who have successfully completed comprehensive examinations.

PUBH 8610. Statistical Methods for Health Policy. 3 Credits.

Application of statistical analysis in health policy and public health research using Stata® to analyze a variety of large public health data sets. Prior completion of at least one graduate-level statistics course is required. Restricted to doctoral students.

PUBH 8620. Seminar: Foundations of U.S. Health Policy. 3 Credits.

Reintroduction to the basics of U.S. health policy, combining advanced legal, policy, and regulatory content acquisition with advanced health law and policy analysis skills. Restricted to doctoral students in health policy or with the permission of the instructor.

PUBH 8622. Health Care Payments, Systems, and Delivery Models. 3 Credits.

Survey of long-standing practices and recent developments in provider payment and the organization of health care delivery in the United States. Restricted to doctoral students in the health policy program or with the permission of the instructor.

PUBH 8999. Dissertation Research. 1-12 Credits.

Dissertation research.

ACADEMY FOR CLASSICAL ACTING (ACA)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ACA 6201. Acting I. 3 Credits.

The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobean, and master classes.

ACA 6202. Acting II. 2,3 Credits.

The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobean, and master classes.

ACA 6203. Acting: Classical Comedy. 2,3 Credits.

The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobean, and master classes.

ACA 6204. Acting: Master Class. 2,3 Credits.

The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobean, and master classes.

ACA 6205. Topics in Classical Drama and Culture. 2 Credits.

Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the eighteenth century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6206. Topics in Classical Drama and Culture. 2 Credits.

Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the eighteenth century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6207. Topics in Classical Drama and Culture. 2 Credits.

Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the eighteenth century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6208. Topics in Classical Drama and Culture. 1 Credit.

Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the eighteenth century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6209. Text I. 2 Credits.

Textual analysis emphasizing development of aesthetic expression. The forms and rules of verse: its meter, scansion, and overall structure in the early, middle, and late Shakespeare plays, as well as the intricacies of the prose.

ACA 6210. Text II. 2 Credits.

Textual analysis emphasizing development of aesthetic expression. The forms and rules of verse: its meter, scansion, and overall structure in the early, middle, and late Shakespeare plays, as well as the intricacies of the prose.

ACA 6211. Voice and Speech I. 3 Credits.

The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6212. Voice and Speech II. 2,3 Credits.

The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6213. Voice and Speech III. 3 Credits.

The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6214. Voice and Speech IV. 2 Credits.

The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6215. Movement I. 1,2 Credit.

The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6216. Movement II. 1,2 Credit.

The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6217. Movement III. 1,2 Credit.

The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6218. Movement IV. 1,2 Credit.

The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6219. Alexander Technique I. 1,2 Credit.

Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6220. Alexander Technique II. 1,2 Credit.

Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6221. Alexander Technique III. 1,2 Credit.

Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6222. Alexander Technique IV. 1,2 Credit.

Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6223. Stage Combat I. 2 Credits.

Skills in stage combat techniques, including unarmed combat and broadsword, buckler, rapier, dagger, and other lighter weapons, toward development of greater physical strength and an awareness of safety issues. The course is designed to lead to certification as an actor/combatant through the Society of American Fight Directors.

ACA 6224. Stage Combat II. 2 Credits.

Skills in stage combat techniques, including unarmed combat and broadsword, buckler, rapier, dagger, and other lighter weapons, toward development of greater physical strength and an awareness of safety issues. The course is designed to lead to certification as an actor/combatant through the Society of American Fight Directors.

ACA 6225. Practicum I. 2 Credits.

This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6226. Practicum II. 1-6 Credits.

This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6227. Practicum III. 1-6 Credits.

This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6228. Practicum IV. 1-6 Credits.

This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6229. Audition Techniques. 3 Credits.

A set of workshops to help students develop strong audition skills. Business aspects of acting, such as selection of agents, Equity status, and taxation issues. The workshop concludes with a showcase performance for casting directors, agents, and theatre directors.

ACA 6595. Selected Topics. 1 Credit.

ACCOUNTANCY (ACCY)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ACCY 2001. Introduction to Financial Accounting. 3 Credits.

Fundamental concepts underlying financial statements and the informed use of accounting information; analysis and recording of business transactions; preparation and understanding of financial statements; measurement of the profitability and financial position of a business.

ACCY 2002. Introductory Managerial Accounting. 3 Credits.

The use of accounting information to plan and control the activities of a business. Several widely used methods of determining the cost of business activities for use in making business decisions. Prerequisite: ACCY 2001.

ACCY 3101. Intermediate Accounting I. 3 Credits.

Financial accounting concepts underlying the preparation and interpretation of financial statements. Topics include revenue and expense recognition; accounting for receivables, inventories, fixed assets, intangible assets, and liabilities. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Prerequisite: ACCY 2001.

ACCY 3102. Intermediate Accounting II. 3 Credits.

Financial accounting concepts underlying the preparation and interpretation of financial statements; accounting for stockholders' equity, earnings per share, debt and equity investments, income taxes, pensions and other postretirement benefits, accounting changes, statements of cash flows, financial statement analysis, and disclosure. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Prerequisites: ACCY 3101 or permission of instructor.

ACCY 3106. Financial Statement Analysis. 3 Credits.

Introduction to the analysis and interpretation of corporate financial statements within the context of a company's industry and economic environment. Cash flow analysis, profitability and risk analysis, accounting policy analysis, forecasting and performance analysis, elements of equity valuation, and decision perspectives of creditors. Students cannot earn credit for both this course and ACCY 4801. Prerequisite: ACCY 2002.

ACCY 3401. Federal Income Tax: Individuals. 3 Credits.

Taxation of individuals, including tax planning strategies as well as compliance requirements. Introduction to tax principals and to tax planning for compensation, investment and business income of individuals, and major life events.

ACCY 3403. Advanced Tax. 3 Credits.

Taxation of all major types of businesses with an emphasis on strategic planning opportunities to improve business profits as well as compliance requirements; principals of business taxation and basic tax rules for businesses from sole proprietorships to multinational corporations. Prerequisites: ACCY 2001 and ACCY 3401.

ACCY 3601. Business Law: Contracts, Torts, and Property. 3 Credits.

Essential legal principles of contracts, torts, and property, including trusts and estates, leases, professional liability, and the Uniform Commercial Code.

ACCY 4107. Advanced Accounting. 3 Credits.

Accounting for corporate combinations, foreign currency financial statements, and derivative financial instruments. Governmental and not-for-profit accounting. Prerequisites: ACCY 3101 and ACCY 3102.

ACCY 4301. Auditing. 3 Credits.

A study of generally accepted auditing standards and accepted professional auditing practices and procedures, including reviewing and evaluating financial controls, auditing financial statements, and testing financial data of manual and automated accounting systems. Prerequisite: ACCY 3102.

ACCY 4501. Accounting Systems. 3 Credits.

Introduction to the design and operation of accounting systems and data management controls. Principles and applications of internal control applicable to manual and automated accounting systems. Prerequisite: ACCY 3102.

ACCY 4601. Business Law: Enterprise Organization. 3 Credits.

Legal aspects of organizing, financing, and operating an enterprise, including agency, partnerships, corporations, securities regulation, insurance, and secured credit financing.

ACCY 4801. Financial Accounting Capstone. 3 Credits.

Synthesis and application of knowledge of financial accounting to specific contexts, using the perspectives of the preparer and user of financial statements. Students cannot earn credit for both this course and ACCY 3106. Restricted to seniors only.

ACCY 4900. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more information.

ACCY 4995. Independent Study. 3 Credits.

Assigned topics. Admission by permission of the department chair.

ACCY 6101. Financial Accounting. 3 Credits.

The basic concepts and methods used in financial reports for understanding their content and context. The income statement, balance sheet, and statement of cash flows. Detailed accounting procedures and choices. How the most important accounting procedures are calculated and how different choices impact financial statements. Same as MBAD 6211.

ACCY 6104. Intermediate Accounting I. 3 Credits.

Accounting principles and concepts for financial accounting and reporting; emphasis on the preparation of general-purpose financial statements. Restricted to School of Business graduate degree students. Prerequisites: ACCY 6101 and MBAD 6211.

ACCY 6105. Intermediate Accounting II. 3 Credits.

Revenue recognition, employee compensation and pension plans, income tax expense, and earnings per share. Prerequisites: ACCY 6101 and ACCY 6104.

ACCY 6106. Financial Statement Analysis. 3 Credits.

Analysis and interpretation of financial statements for managers, stockholders, creditors, and financial analysts; ratio-driven financial analysis; earnings-based and cash-flow-based equity valuation; sales and EPS forecasting; preparation of projected financial statements. Prerequisites: ACCY 6101 and MBAD 6211.

ACCY 6110. International Reporting and Control. 1.5 Credit.

International comparisons of forces that shape financial management, such as corporate governance mechanisms, tax policies, economic development, and privatization. Same as IBUS 6308.

ACCY 6112. International Financial Reporting Standards. 1.5 Credit.

Financial reporting standards that are used throughout most of the world other than the United States. Comparisons of these standards with those of the United States. Prerequisites: ACCY 6101 and MBAD 6211. (Same as IBUS 6310).

ACCY 6113. Financial Decision-Making by Consumers and Professionals. 3 Credits.

Tools and applications necessary to evaluate the wide range of financial decisions individuals, both consumers and professionals, make throughout their lifetime. The course is also intended for those interested in becoming financial advisors and/or CPAs.

ACCY 6201. Cases in Management Accounting I. 1.5 Credit.

Effective use of internal generation, communication and interpretation of information for both operational and strategic decision-making purposes. Prerequisites: ACCY 6101 and MBAD 6211. (Same as MBAD 6213).

ACCY 6202. Cases in Management Accounting II. 1.5 Credit.

Further topics in applying concepts of control and decision analysis to optimize the financial management of organizations. Prerequisites: ACCY 6201 and MBAD 6213.

ACCY 6203. Controls, Alignment, and the Organization. 3 Credits.

The role accounting plays in planning and control issues within organizations. High-level view of planning and control, with a focus on the need for controls to deal with the agency problems. Prerequisites: ACCY 2002 or equivalent.

ACCY 6204. Managerial Accounting for Government and Nonprofits. 1.5 Credit.

Builds on basic understanding of managerial accounting concepts and examines issues in the government and nonprofit realm; leveraging core concepts to analyze and report on real world scenarios. Prerequisite: None.

ACCY 6301. Contemporary Auditing Theory. 3 Credits.

Survey of contemporary auditing as practiced by internal and external auditors; generally accepted auditing standards and government auditing standards; planning, directing, and reporting on various audits. Corequisite: ACCY 6104. Prerequisites: ACCY 6101 or MBAD 6211.

ACCY 6302. Fraud Examination and Forensic Accounting. 3 Credits.

Financial statement fraud, misappropriation of assets, and methods of deterrence, prevention, detection, and investigation. Prerequisites: ACCY 6101 and MBAD 6211. Recommended background: One auditing course.

ACCY 6401. Federal Income Taxation. 3 Credits.

Taxation of individuals, including tax planning strategies as well as compliance requirements; tax principals and to tax planning for compensation, investment and business income of individuals, and major life events.

ACCY 6402. Federal Income Taxation of Partnerships. 3 Credits.

Tax planning for business income from partnerships, including formation and operation, distribution to partners, liquidation, transfer of partnership interests, and financial accounting for partnership transactions. S corporations also considered. Prerequisite: ACCY 6401.

ACCY 6403. Federal Income Taxation of Corporations. 3 Credits.

Federal income taxation of C corporations, covering formation, capital structure, nonliquidating distributions, complete liquidations, corporate accumulations, and the alternative minimum tax.

ACCY 6404. Taxation of Financial Instruments. 3 Credits.

Overview of the economics and taxation of financial instruments; transactions in stock, debt instruments, commodities, options, short sales, wash sales, straddles, futures, foreign currency transactions, swaps, hedging, mark to market tax accounting, and time value of money. An equivalent course may be substituted for prerequisite ACCY 6101. Prerequisites: ACCY 6101 and ACCY 6401.

ACCY 6501. Accounting Information Systems and Electronic Data Processing. 3 Credits.

Development and application of accounting system theory, including analysis, design, control concepts, and implementation; integration of electronic data processing, accounting systems, and management information systems. Prerequisites: ACCY 6101 and MBAD 6211.

ACCY 6601. Business Law: Contracts, Torts, and Property. 3 Credits.

Essential legal principles of contracts, torts, and property, including trusts and estates, leases, professional liability, and the Uniform Commercial Code.

ACCY 6602. Business Law: Enterprise Organization. 3 Credits.

Legal aspects of organizing, financing, and operating an enterprise, including agency, partnerships, corporations, securities regulation, insurance, and secured credit financing.

ACCY 6701. Government Accounting. 3 Credits.

Budgeting, accounting, financial reporting, and auditing required of local, state, and federal governments; financial practices and requirements applicable to organizations receiving government financial assistance and those subject to government audits. Prerequisites: ACCY 6101 or MBAD 6211.

ACCY 6801. Corporate Governance and Ethics. 3 Credits.

The theory, practice, and public policy environment of corporate governance. Purpose, functioning, and responsibilities of boards of directors. Power, control, and compensation of corporate management. Shareholders and stakeholders. Corporate governance in comparative national settings. Same as SMPP 6215.

ACCY 6900. Special Topics. 1-3 Credits.

Experimental offering; new course topics and teaching methods.

ACCY 6998. Directed Readings and Research. 1-3 Credits.

ACCY 8001. Doctoral Seminar. 1-12 Credits.

Reasoning and research in technical areas of accounting; theoretical issues and their application to practice; conceptual themes in professional literature; comparative accounting research analyses.

ACCY 8009. Dissertation Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

ACCY 8999. Advanced Reading and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

AFRICANA STUDIES (AFST)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

AFST 1001. Introduction to Africana Studies. 3 Credits.

An interdisciplinary introduction to the study of people of Africa and the African diaspora in historical context. Links in the cultural, political, and intellectual experiences of people of African descent in the Americas, Caribbean, Europe, and Africa.

AFST 3001. Documenting Black Lives. 3 Credits.

Students complete and present an original research project pertaining to black history and culture; research strategies, including the use of digital material, historical archives, and public history sites. Recommended background: completion of a prior course in any Africana-related topic and an interest in research.

AMERICAN STUDIES (AMST)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

AMST 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details.

AMST 1050. Explorations in American Culture. 0-3 Credits.

Exploration of different aspects of American culture depending on the topic. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AMST 1070. The American Cinema. 3 Credits.

History and criticism of American films. The course enables the student to recognize and evaluate cinema techniques, to express the evaluation clearly in writing, and to understand the role of films in the context of American culture. Laboratory fee.

AMST 1100. Politics and Film. 0-3 Credits.

How American films interpret and challenge political power in America.

AMST 1160. Race, Gender, and Law. 3 Credits.

Significant civil rights cases, critical race theory, feminist theory, and current public policy debates on domestic violence, mass imprisonment, sexual assault, and racial profiling.

AMST 1200. The Sixties in America. 3 Credits.

A survey of American society, culture, and politics during the decade of the 1960s. Topics include the civil rights movement, the student movement, the Vietnam War, and the counterculture.

AMST 2000. Sophomore Colloquium. 3 Credits.

The Sophomore Colloquia are small seminar-style courses limited to second-year students in Columbian College. These courses engage students deeply in a discipline, focus on a narrow issue of high interest and impact, and require independent research projects of the students. Topics vary by semester; see department for more details. Permission of the instructor required prior to enrollment.

AMST 2010. Early American Cultural History. 3 Credits.

How culture was important in the creation of the United States—in its origins as a colonial outpost and its expansion across the continent; in its hierarchies and expressions of power, especially as organized by race, class, ethnicity, or gender; in the creation of democracy and the valuing of free expression; and in the development of cities and the varied uses of the countryside. Same as HIST 2010.

AMST 2011. Modern American Cultural History. 3 Credits.

The effects of culture in the shaping of the United States since 1876. The role of the mass media; effects of cultural conceptions on the physical landscape; changing ideas of race, ethnicity, gender, and sexuality; and the political meanings of cultural conflict. Transnational influences on U.S. culture and effects of U.S. culture abroad. Same as HIST 2011.

AMST 2020. Washington, DC: History, Culture, and Politics. 0-3 Credits.

Introduction to interdisciplinary methods of studying the contemporary city. Major problems of metropolitan life, past and present, analyzed by faculty and community leaders. Emphasis on experiential team projects. (Same as HIST 2020).

AMST 2020W. Washington, DC: History, Culture, and Politics. 0-3 Credits.

Introduction to interdisciplinary methods of studying the contemporary city. Major problems of metropolitan life, past and present, analyzed by faculty and community leaders. Emphasis on experiential team projects. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Same as HIST 2020).

AMST 2071. Introduction to the Arts in America. 3 Credits.

A survey of American art from the period of colonial exploration and settlement to the postmodern present. Political and social meanings of painting, sculpture, architecture, prints, and photographs. The relationship of art to religion and nationalism; issues of class, race, and gender. Same as AH 2071.

AMST 2120W. Freedom in American Thought and Popular Culture. 0-3 Credits.

America was founded on the premise of providing freedom to its people. But what, exactly, is freedom? The question has been debated in America since its founding and continues today; this course examines varied answers provided by American political thought and popular culture. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AMST 2125. Varieties of Feminist Theory. 3 Credits.

Classical and contemporary texts on feminist explanations of women's status. Relationships within the sex/gender system and arrangements based on class and race. Evaluation, through the lens of feminist theory, of several academic disciplines in the sciences, social sciences, and humanities. Same as WGSS 2125. Prerequisites: WGSS 1020 or WGSS 2120.

AMST 2144. Explorations in Historical Geography. 3 Credits.

Examination of selected themes in the cultural geography of the United States over the course of its history, in relation to an overview of the historical geography of the country. Same as GEOG 2144.

AMST 2210. The African American Experience. 3 Credits.

This course provides a survey of the historical, political, and cultural dimensions of the African American experience in the U.S. The course is organized chronologically and thematically and covers topics such as American slavery, medical experimentation, Hurricane Katrina, aesthetics, hip-hop, and Afro-futurism.

AMST 2320. U.S. Media and Cultural History. 3 Credits.

History and analysis of twentieth-century U.S. media and culture, including the rise of consumer culture, film, and television. Racial, gendered, and national identities in the context of modernism, mass culture, and globalization. (Same as HIST 2320).

AMST 2350. U.S. Religion and Politics. 3 Credits.

How religion and politics have influenced each other in the United States and how Americans have understood those influences. Religious violence; conflicts between faith and science; religious factors in racial and gender politics; and the separation of church and state. Same as HIST 2350.

AMST 2380. Sexuality in U.S. History. 3 Credits.

Examination of the changing social organization and meaning of sexual practices and desires in American culture, with particular attention to the relationship between sexuality and gendered racial and class identities and politics. Same as HIST 2380 and WGSS 2380.

AMST 2385. Sex and Citizenship. 3 Credits.

How gender and sexuality have shaped Americans' understanding of citizenship; the state regulation of marriage, reproduction, military service, immigration, and access to other government resources and benefits; the cultural representation of women, LGBTQ individuals, and other sexual and gender minorities as second-class citizens; and the efforts of women, LGBTQ groups, and others to claim full equality in American culture and politics.

AMST 2385W. Sex and Citizenship. 3 Credits.

How gender and sexuality have shaped Americans' understanding of citizenship; the state regulation of marriage, reproduction, military service, immigration, and access to other government resources and benefits; the cultural representation of women, LGBTQ individuals, and other sexual and gender minorities as second-class citizens; and the efforts of women, LGBTQ groups, and others to claim full equality in American culture and politics. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AMST 2410. Twentieth Century U.S. Immigration. 3 Credits.

Survey of immigration policy and immigrants' lives. How immigrants have changed the United States and how the United States has changed immigrants. (Same as HIST 2410).

AMST 2430. Capitalism and Culture. 3 Credits.

Cultural and political history of American capitalism from Wall Street to Whole Foods, including advertising, automation, baseball, Fordism, graffiti, housework, punk, real estate, strike-breaking, sex work, and slavery.

AMST 2440. The American City. 3 Credits.

An interdisciplinary introduction to the ethnic, cultural, political, and architectural landscape of the American city. Urban theory, race and ethnicity, urban history, planning and architecture, city politics, and cultural representations of the city. Same as HIST 2440.

AMST 2440W. The American City. 3 Credits.

An interdisciplinary introduction to the ethnic, cultural, political, and architectural landscape of the American city. Urban theory, race and ethnicity, urban history, planning and architecture, city politics, and cultural representations of the city. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AMST 2490. Themes in U.S. Cultural History. 3 Credits.

Topical examination of the ideas, values, and modes of expression that have made American life distinctive, as revealed through a cross-cultural or global perspective. Topic vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. (Same as HIST 2490).

AMST 2490W. Themes in U.S. Cultural History. 3 Credits.

Topical examination of the ideas, values, and modes of expression that have made American life distinctive, as revealed through a cross-cultural or global perspective. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Same as HIST 2490W).

AMST 2495. Special Topics in African American History. 3 Credits.

Concentration on specific issues central to the African American experience. Consult the Schedule of Classes for issues to be addressed.

AMST 2520. American Architecture I. 3 Credits.

Stylistic properties, form and type characteristics, technological developments, and urbanistic patterns are introduced as a means of interpretation of historic meaning. Buildings are analyzed both as artifacts and as signifiers of social, cultural, and economic tendencies. 1600-1860. Same as AH 2154.

AMST 2521. American Architecture II. 3 Credits.

Continuation of AMST 2520. Stylistic properties, form and type characteristics, technological developments, and urbanistic patterns are introduced as a means of interpretation of historic meaning; analysis of buildings both as artifacts and as signifiers of social, cultural, and economic tendencies. 1860 to present. (Same as AH 2155, CAH 2155).

AMST 2533. Material Culture in America. 3 Credits.

Review and analysis of the cultural messages embedded in our material surroundings. Consideration of a range of humanly created artifacts, ranging from specific objects to vast landscapes. Same as ANTH 2533.

AMST 2600. U.S. Popular Music and Culture. 3 Credits.

Interdisciplinary approach to U.S. popular music as a means for thinking critically about identity, culture, and history from the nineteenth century to the present; popular music as a cultural reflection of society and a key means through which Americans enact and negotiate social opportunities, challenges, and struggles.

AMST 2610. Science, Technology, and Politics in Modern America. 3 Credits.

The history of science and technology and their role in political and social life from the late 19th century to the present.

AMST 2610W. Science, Technology, and Politics in Modern America. 3 Credits.

The history of science and technology and their role in political and social life from the late nineteenth century to the present. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AMST 2620. Human Mind and Artificial Intelligence. 3 Credits.

The history of computers, robots, and artificial intelligence; visions of the future presented in science fiction; how human perceptions of machines affect their perceptions of the human mind.

AMST 2630. Discovering the Mind. 3 Credits.

Introduction to the ways in which the mind sciences have shaped how we understand ourselves, human nature, sex and race, morals, politics, and power.

AMST 2680W. Hashtag America. 3 Credits.

Influential technoskeptic and techno-utopian writing about social media and new media; the relationship between the Internet and society from various scholarly perspectives. Includes a significant engagement with writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AMST 2710. The United States in Global Context, 1898-Present. 3 Credits.

U.S. cultural and political engagement with the rest of the world in the twentieth- and twenty-first centuries; global culture, transnational ideas and social movements, travel and tourism, and the impact of media. (Same as HIST 2710).

AMST 2730. World War II in History and Memory. 0-3 Credits.

Examination of Americans' histories and memories of World War II. Same as HIST 2730.

AMST 2730W. World War II in History and Memory. 0-3 Credits.

Examination of Americans' histories and memories of World War II. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Same as HIST 2730).

AMST 2750W. Latinos in the United States. 3 Credits.

Exploration of the term Latino and its impact on discussions of race, identity, and citizenship expectations throughout U.S. history. How geographic, linguistic, aesthetic, political, and economic factors construct Latino identity and influence policy making and international relations. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AMST 3151. American Art in the Age of Revolution. 3 Credits.

Same as AH 3151.

AMST 3152. American Art in the Era of National Expansion. 3 Credits.

American art from the opening of the Erie Canal in 1825 to the Spanish-American War in 1898. Emphasis on the role of art in the expansion of the United States, exploring issues of race, class, and gender; art, and religion. (Same as AH 3152).

AMST 3324. U.S. Urban History. 3 Credits.

History of American urban life and culture from the colonial era to the present, focusing on transitions from pre-industrial to industrial and post-industrial forms. The social and spatial configuration of U.S. cities, and the urban politics of race, class, and gender. Same as HIST 3324.

AMST 3351. U.S. Social History. 3 Credits.

Survey of American society and social change from the Civil War to the present. Gender, sexuality, race, ethnicity, and class perspectives. (Same as HIST 3351).

AMST 3352. U.S. Women's History to 1865. 3 Credits.

History of women in the Americas and in the United States from trans-Atlantic encounters through the Civil War. Same as HIST 3352 and WGSS 3352. (Same as HIST 3352, WGSS 3352).

AMST 3352W. U.S. Women's History to 1865. 3 Credits.

History of women in the Americas and in the United States from trans-Atlantic encounters through the Civil War. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same as HIST 3352W/WGSS 3352W. (Same as HIST 3352W, WGSS 3352W).

AMST 3353. U.S. Women's History II. 3 Credits.

Continuation of AMST 3352. History of women in the Americas and in the United States from trans-Atlantic encounters from 1877 to present. Same as HIST 3353/ WGSS 3353. (Same as HIST 3353, WGSS 3353).

AMST 3360. African American History to 1865. 3 Credits.

Major themes and concepts emerging from the early history of the African presence in the Americas and black experiences in the new nation of the United States. Focus on the emergence and evolution of the concept of race, the ways race evolved in concert with Atlantic slavery, and how race intersected with gender, economics, religion, and nationality. (Same as HIST 3360).

AMST 3361. African American History Since 1865. 3 Credits.

African American efforts to realize full freedom after emancipation from slavery. Gender politics, cultural expression, labor organizing, and radicalisms; dynamics of racism within major eras of African American activity from Reconstruction through the Great Migration; and the history of civil rights, Black Power, and black feminism. (Same as HIST 3361).

AMST 3362. African American Women's History. 3 Credits.

Addresses the history of African American women's labor, cultural expression, institution-building, activism and strategies to combat oppression from the antebellum period through the late twentieth century. Investigates the intersection of race, gender, and class as it has shaped U.S. society, racism, the black freedom movement and African American women's experiences. (Same as AMST 3362W, HIST 3362, HIST 3362W, WGSS 3362, WGSS 3362W).

AMST 3362W. African American Women's History. 3 Credits.

The history of African American women's labor, cultural expression, institution-building, activism, and strategies to combat oppression from the antebellum period through the late 20th century; the intersection of race, gender, and class as it has shaped U.S. society, racism, the black freedom movement, and African American women's experiences. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Same as AMST 3362, HIST 3362, HIST 3362W, WGSS 3362, WGSS 3362W).

AMST 3367. The American Jewish Experience. 3 Credits.

The study of the Jewish minority in America from colonial times to the present. Emphasis on the interaction between a powerful majority culture and that of protean minority people. (Same as HIST 3367).

AMST 3600. Popular Music and Politics. 3 Credits.

The interactions and intersections of music and politics, focusing on the twentieth-century United States; music as political expression, music in social protest movements, and music as a tool of political organizing.

AMST 3810. Planning Cities. 3 Credits.

An examination of historical and contemporary trends and dynamics in urban planning in the United States and abroad. Same as GEOG 3810. Prerequisite: GEOG 1001.

AMST 3811. Historical Archaeology. 3 Credits.

Survey of the basic data and methods of research in the material culture of recent history. Same as ANTH 3811.

AMST 3835. Historical Archaeology Field Program. 3 Credits.

Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as ANTH 3835.

AMST 3900. Critiquing Culture. 3 Credits.

Modes of analysis, including ethnography and other cultural studies methods, applied to examination of the interaction of cultural texts and practices with structures of power. Theories and themes central to American studies; scholarly debate about mass culture, ideology, visuality, discourse, and affect. Restricted to American studies majors or American studies minors with permission of the instructor.

AMST 3901. Examining America. 3 Credits.

Modes of power and forms of identification within and across U.S. national borders. Social constructions of the nation; forms of diversity and identity, such as race, gender, and sexuality; and the transnational flow of people, ideas, culture, and religion. Restricted to students in the American studies program.

AMST 3950. Special Topics. 3 Credits.

May be repeated for credit provided the topic differs. Topics announced in the Schedule of Classes.

AMST 3950W. Special Topics. 3 Credits.

May be repeated for credit provided the topic differs. Topic announced in the Schedule of Classes. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AMST 4400. Independent Study. 1-3 Credits.

Open to a limited number of American studies majors as directed research or as an internship with a Washington museum or historical society. Approval of advisor required.

AMST 4450. Internship. 1-3 Credits.

Open to a limited number of American studies majors pursuing an internship directly related to the study of American culture. Students must make the case for a scholarly project that emerges from the internship and must write a significant final paper. Approval of a supervising faculty member required for registration. P/NP grading only.

AMST 4500. Proseminar in American Studies. 3 Credits.

Directed research and writing on special topics. May be repeated for credit provided the topic differs. Restricted to students in the American studies program. Prerequisites: AMST 2010, AMST 2011, AMST 3900 and AMST 3901.

AMST 4500W. Proseminar in American Studies. 3 Credits.

Directed research and writing on special topics. May be repeated for credit provided the topic differs. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Students select two of the prerequisite courses. Restricted to students in the American studies program. Prerequisites: AMST 2010, AMST 2011, AMST 3900 and AMST 3901.

AMST 4701W. Epidemics in American History. 3 Credits.

The history of epidemics in the United States from the late nineteenth to the early twentieth century. The development of medical and public health responses to epidemics, and their social, political, cultural, and economic impacts. Sources include primary documents, historical accounts, memoirs, fiction, and films. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AMST 4702W. Race, Medicine, and Public Health. 3 Credits.

The experiences of African Americans as patients and health care providers; the history of the relationship between race, American medicine, and public health. Emphasis on the importance of understanding the historical roots of contemporary policy dilemmas such as racial and ethnic disparities in health and health care. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AMST 6100. Scope and Methods in American Studies. 3 Credits.

Consideration of American studies as an area for research and teaching; introduction to bibliography. Required of candidates for the degree of Master of Arts in the field of American studies.

AMST 6110. Cultural Theory and American Studies. 3 Credits.

Major issues in critical and cultural theory as they relate to American culture. Various interpretive approaches including discourse analysis, cultural studies, new historicism, anthropological theory, etc. Prerequisites: AMST 6100 or permission of the instructor.

AMST 6120. Theories and Practices in the Study of Media. 3 Credits.

Examination of theories and methods in the study of media and popular culture; case studies explore specific issues related to cultural products such as film, television, music, and the Internet.

AMST 6190. Topics in American Studies. 1-4 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

AMST 6195. Research Seminar in American Studies. 3 Credits.

May be repeated for credit provided the topic differs.

AMST 6210. The United States in a Global Context. 3 Credits.

Analysis of the cultural constructions of the nation and international power, comparing the context of the eighteenth and nineteenth century, European colonialism, and U.S. expansion in the twentieth century. The role of literature and mass media in furthering the logic of globalization. Readings are both theoretical and historical.

AMST 6220. Theory and Emotions. 3 Credits.

Interdisciplinary exploration of politics of emotion, with an emphasis on the emotions that attach to race, gender, and sexuality.

AMST 6230. The Politics of Freedom. 3 Credits.

This seminar examines critical interventions into the theories, rhetorics, and practices of freedom. The seminar focuses on the politics of freedom in relation to an array of themes that may include liberalism, slavery, imperialism, political economy, individualism, and neoliberalism.

AMST 6240. Borders and Boundaries. 3 Credits.

Exploration of borders (the literal edge or limit of a territory) and boundaries (intra-societal differences). Readings from cultural anthropology, political science, and social history examine classic tensions between state formation and nation building. The U.S.-Mexico border and other border zones across the globe are used to assess and challenge what is local and particular about border space.

AMST 6410. Readings in American Cultural History. 3 Credits.

Studies in the cultural history of the United States.

AMST 6420. Religion and American Culture. 3 Credits.

Interdisciplinary analysis of religious beliefs, practices, and representations in the United States, as well as intersections of the religious and the secular. Relationships of religion to race, gender, capitalism, science, mass media, and material culture. Same as HIST 6420.

AMST 6430. Gender, Sexuality, and American Culture I. 3 Credits.

The changing social organization, cultural representation, and meaning of gender and sexuality in the United States, with emphasis on their relationship to race, class, region, nationality, empire, and globalization. Pre-colonial to 1877. Same as HIST 6430/WGSS 6430. (Same as HIST 6430, WGSS 6430).

AMST 6431. Gender, Sexuality, and American Culture II. 3 Credits.

Continuation of AMST 6430. The changing social organization, cultural representation, and meaning of gender and sexuality in the United States, with emphasis on their relationship to race, class, region, nationality, empire, and globalization. 1877 to present. Same as HIST 6431/ WGSS 6431.

AMST 6435. Readings on Women in American History. 3 Credits.

Important works in American women's history; evolution of the field in historiographical context. Same as HIST 6435/ WGSS 6435.

AMST 6450. Race in America. 3 Credits.

Interdisciplinary analysis of the history of race and its changing political, social, and cultural meanings in the United States. Transnational racial formations, struggles for and against civil rights, multiracialism, and interracialism. Same as HIST 6450.

AMST 6455. American Social Movements. 3 Credits.

The history of social movements in the United States, with emphasis on civil rights, feminism, conservatism, and labor in local, national, and transnational contexts; the historical rise and fall of these movements and their larger impact on American life. Same as HIST 6455.

AMST 6460. Popular Music Studies. 3 Credits.

Readings in popular music studies; varying methodologies for American studies work on sound and popular music; cultural histories of popular music; American music transnationally. Restricted to graduate students.

AMST 6470. Cityscapes. 3 Credits.

Interdisciplinary examination of the American city, including urban theory, history, planning, architecture, urban politics, and cultural representations of the city. Same as HIST 6470.

AMST 6475. U.S. Urban History. 3 Credits.

History of American urban life and culture from the Colonial era to the present, focusing on the transitions from pre-industrial to industrial and post-industrial forms, the social and spatial configuration of U.S. cities, and the urban politics of race, class, and gender. Same as HIST 6475.

AMST 6480. Theory and Practice of Public History. 3 Credits.

Theoretical and practical dimensions of public history, as illustrated by recent controversies surrounding public exhibitions and debates on revisionist history as well as more traditional means of presenting the past in public forums. Same as HIST 6480.

AMST 6495. Historic Preservation: Principles and Methods. 3 Credits.

The scope and purpose of the preservation movement in the United States, with focus on developments since the 1960s. Preservation theories, attitudes toward the past and toward design, the intent and impact of legislation, approaches to documentation, the concept of significance, and preservation as an instrument of change. Same as HIST 6495.

AMST 6496. Historic Preservation: Principles and Methods. 3 Credits.

Continuation of AMST 6495. The scope and purpose of the preservation movement in the United States, with focus on developments since the 1960s. Preservation theories, attitudes toward the past and toward design, the intent and impact of legislation, approaches to documentation, the concept of significance, and preservation as an instrument of change. Same as HIST 6496.

AMST 6520. Economics of Preservation. 3 Credits.

Analysis of economic techniques and benefits used to encourage the retention and reuse of historic buildings and districts in the United States. Emphasis on revitalization of older commercial centers and the Mainstreet program. Permission of the instructor required prior to enrollment.

AMST 6525. The Politics of Historic Preservation. 3 Credits.

Overview of the political issues, forces, events, and players that have shaped contemporary preservation practice, with an emphasis on public policy issues that have not been resolved and continue to confront preservation objectives. Permission of the instructor required prior to enrollment.

AMST 6530. Field Methods in Architectural Documentation. 3 Credits.

In-depth thematic examination of cultural landscape, focusing on field techniques for recording, analysis, and interpretation of historic properties. Work at field sites is supplemented by lectures, discussion, and readings. Restricted to graduate students.

AMST 6550. Seminar in American Architecture. 3 Credits.

Advanced research problems addressing artistic, cultural, social, technical, and urbanistic aspects of American architecture in the 19th and 20th centuries. Topics vary. Prerequisites: AMST 2520 or AMST 2521, or permission of the instructor.

AMST 6560. Vernacular Architecture. 3 Credits.**AMST 6650. Advanced Workshop in American Studies. 1-4 Credits.**

Required for first- and second-year PhD students; open to other graduate students. Provides instruction and guidance in the process of writing, revising, and submitting journal articles, conference papers, and dissertations. Faculty and peer review of written work. Students are expected to enroll for the full academic year. Restricted to American studies graduate students.

AMST 6709. Interpretation in the Historic House Museum. 3 Credits.

Seminar integrating advanced practices of museum education with current scholarship in architectural history, material culture, and social history. Extensive use of Washington museum resources. Admission by permission of instructor. Same as EDUC 6709.

AMST 6710. American Material Culture. 3 Credits.

Opportunities for research and publication based on historical objects in the collections of the Smithsonian Institution.

AMST 6720. American Decorative Arts I. 3 Credits.

Recognition and evaluation of domestic artifacts from the 17th, 18th, and 19th centuries.

AMST 6721. American Decorative Arts II. 3 Credits.

Continuation of AMST 6720. Recognition and evaluation of domestic artifacts from the 17th, 18th, and 19th centuries.

AMST 6730. Studies in American Art and History. 3 Credits.

Selected problems and themes in American cultural history involving the use of artistic materials in different media; emphasis on methodology and analytic techniques. May be repeated for credit. Same as AH 6255.

AMST 6835. Historical Archaeology Field Program. 3 Credits.

Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as ANTH 6835.

AMST 6930. Independent Study. 3 Credits.

Permission of the instructor required prior to enrollment. Restricted to master's and doctoral candidates.

AMST 6998. Thesis Research. 3 Credits.

AMST 6999. Thesis Research. 3 Credits.

AMST 8998. Advanced Reading and Research. 1-9 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

AMST 8999. Dissertation Research. 3-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

ANATOMY AND REGENERATIVE BIOLOGY (ANAT)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ANAT 2130. Human Embryology. 3 Credits.

Development of the basic organ systems; molecular control of development, congenital birth defects, and assisted reproductive technologies.

ANAT 2150. Human Microscopic Anatomy. 3 Credits.

Normal histological structure of cells, tissues, and organs. Structural-functional correlates; the relationship between histological structure-function and the etiology of disease states.

ANAT 2160. Human Functional Neuroanatomy. 3 Credits.

The central and peripheral nervous systems; diseases and injuries with impact on the normal structural-functional relationship. Two of the following courses must be completed prior to enrollment: BISC 2202, BISC 2214, BISC 2322.

ANAT 2181. Human Gross Anatomy. 3 Credits.

Covers the structural and functional organization of the human body, focusing on regional and organ systems-based functions. Clinical applications are used to demonstrate the importance of anatomical relationships and their interplay with regional and functional systems. Prerequisites: BISC 1115 and 1125; and BISC 1116 and 1126; or by permission of the course director. (Same as BISC 2581).

ANAT 6130. Clinically Oriented Human Embryology. 3 Credits.

The mechanisms of human embryology with clinical correlations of embryological development. Developmental control mechanisms and development of basic organ systems. Molecular control of development. Assisted reproductive technologies. Congenital birth defects. Demonstration labs and online animations for clinical correlates. Restricted to students in the graduate certificate in anatomical and translational sciences program. Recommended background: Introductory course in biology.

ANAT 6150. Clinically Oriented Human Microscopic Anatomy. 4 Credits.

The normal histological structure of cells, tissues, and organs of the human body with emphasis on clinical relevance; structural/functional correlates at both the light and electron microscopic levels; alterations in normal histology through disease or injury and the etiology of various disease states; integration of histological concepts with clinical correlates. Restricted to students in the graduate certificate in anatomical and translational sciences (GCATS) or master's in anatomical and translational sciences (M-ATS) programs. Prerequisites: BISC 1115 and BISC 1125; and BISC 2202.

ANAT 6160. Clinically Oriented Human Functional Neuroanatomy. 3 Credits.

Structure and function of the human central and peripheral nervous system, with an emphasis on identifying brain structures and pathways and the effects of lesions; neuroanatomy at the gross and microscopic level, embryology, neurophysiology, and pathology due to disease or injury to the brain, spinal cord, and peripheral nerves. Restricted to students in the anatomical and translational sciences graduate certificate and Institute for Biomedical Sciences PhD programs or with the permission of the course director. Prerequisites: prior completion of an introductory biology course for science or non-science majors.

ANAT 6181. Clinically Oriented Human Gross Anatomy. 4 Credits.

Structural organization of the human body and the relationship of the organization to regional and systems-related functions; application of normal anatomical structure/function relationships to understand clinical implications of disease or injury. The laboratory is used for cadaveric dissection to learn anatomical relationships and basic knowledge of radiographic imaging. Restricted to students in the graduate certificate and master's programs in anatomical and translational sciences and other graduate students with the permission of the course director. Recommended background: Completion of higher-level science courses during the student's undergraduate degree program.

ANAT 6182. Fundamentals of Translational Science. 4 Credits.

Fundamentals of organ development and study; how molecular defects during development can lead to disease. Restricted to students in the graduate certificate in anatomical and translational sciences program.

ANAT 6203. Human Developmental Anatomy. 1 Credit.

ANAT 6204. Neuroanatomy. 2 Credits.

ANAT 6212. Neurobiology. 3 Credits.

Same as Ldis 212.

ANAT 6213. Microscopic Anatomy. 4 Credits.

Required for medical students.

ANAT 6215. Anatomy for Physician Assistant Students. 3 Credits.

Lecture and student examination of prosected cadavers. Provides foundational anatomical knowledge for future courses in the physician assistant curriculum. Restricted to students enrolled in the physician assistant program.

ANAT 6216. Cellular Anatomy and Histology. 2 Credits.

.

ANAT 6219. Biomedical Ethics for Translational Sciences. 2 Credits.

Ethical issues relevant to the practice of medicine and biomedical research involving human subjects. Permission of the instructor required prior to enrollment. Restricted to graduate students. Recommended background: ANAT 6130, ANAT 6150, ANAT 6160, ANAT 6181 and ANAT 6292.

ANAT 6221. Special Topics in Stem Cell Biology. 1-3 Credits.

.

ANAT 6222. Special Topics in Stem Cell Biology. 1-3 Credits.

.

ANAT 6223. Special Topics in Regenerative Medicine. 2 Credits.

Students attend seminars given by invited lecturers to present their research findings and breakthroughs on topics of regenerative medicine. Seminars can be sponsored by the Department of Anatomy and Regenerative Biology, the Stem Cell Interest Group Journal and Data Club, the Molecular Medicine Graduate Program (MMED 8214), and the GW Institute for Neuroscience. Restricted to Graduate Certificate in Anatomical and Translational Sciences only. Prerequisites: Introductory Biology for Science or non-Science Majors.

ANAT 6249. Introduction to Anatomical Research. 1 Credit.

.

ANAT 6252. Human Variation. 1 Credit.

ANAT 6253. Developmental Neurobiology. 3 Credits.

ANAT 6260. Developmental Genetics. 2 Credits.

ANAT 6262. Gross Anatomy of Upper and Lower Extremities. 2 Credits.

.

ANAT 6264. Gross Anatomy of Head and Neck. 2 Credits.

.

ANAT 6266. Gross Anatomy of Thorax and Abdomen. 2 Credits.

.

ANAT 6268. Gross Anatomy of Pelvis, Perineum, and Lower Extremities. 2 Credits.

.

ANAT 6275. Advanced Studies in Translational Sciences. 3 Credits.

Semester long rotation in a research laboratory conducting translational researching and applying fundamental concepts learned in didactic courses and developing versatility with new technologies. Students must have completed an introductory course in biology for science or non-science majors prior to enrollment. Restricted to students in the graduate certificate and master of science in anatomical and translational sciences programs.

ANAT 6276. Advanced Studies in Anatomy. 1 Credit.

Detailed study of an anatomic topic tailored to the needs of the individual student. Restricted to graduate students who are in the Graduate Certificate in Anatomical and Translational Sciences program or who have permission of the program director and medical students.

ANAT 6277. Special Topics in Neurobiology. 1-3 Credits.

ANAT 6279. Applied Regional Anatomy. 1-5 Credits.

Regional dissection, guided readings.

ANAT 6284. Applied Surface Anatomy and Radiology. 5 Credits.

.

ANAT 6288. Surface Anatomy and Radiology. 1 Credit.

ANAT 6291. Special Projects in Anatomy. 1-12 Credits.

Independent study on any aspect of gross anatomy.

ANAT 6292. Projects in Anatomical Sciences: Introduction to Neuroradiology. 1 Credit.

Various imaging techniques and approaches to visualize normal neuroanatomy toward development and application of skills in teamwork, presentation, discussion, and literature searches. Restricted to students in the graduate certificate in anatomical and translational sciences program.

ANAT 6295. Research. 1-12 Credits.

ANAT 8120. Graduate Human Gross Anatomy. 5 Credits.

An in-depth introduction to human gross anatomy with cadaveric dissection. The structural organization of the human body, including its regional and systems-related functions. The relationship between normal human anatomical variation in structure and function and how disease and/or injury affect these relationships. Permission of the instructor is required prior to enrollment. Offered spring semester in even years. Restricted to doctoral students with permission of the instructor. Recommended background: Prior coursework in the biological sciences or anthropology.

ANAT 8501. Didactic Anatomy. 3 Credits.

Development of a didactic program to include human developmental anatomy, microscopic anatomy, gross anatomy, and/or neuroanatomy. May also include interdepartmental study.

ANAT 8800. Summer Remedial: Gross Anatomy. 6 Credits.

**ANAT 8802. Summer Remedial: Human Developmental
Anatomy. 1 Credit.**

ANTHROPOLOGY (ANTH)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ANTH 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details.

ANTH 1001. Biological Anthropology. 0-4 Credits.

Survey of human evolution, genetics and physical variation, and primatology. Regular laboratory exercises. Laboratory fee.

ANTH 1002. Sociocultural Anthropology. 3 Credits.

Survey of the world's cultures, illustrating the principles of cultural behavior.

ANTH 1002W. Sociocultural Anthropology. 3 Credits.

Survey of the world's cultures, illustrating the principles of cultural behavior. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ANTH 1003. Archaeology. 3 Credits.

Introduction to archaeological survey and excavation techniques and laboratory methods of dating and analysis. Brief history of archaeology and survey of world prehistory. Films and laboratory exercises.

ANTH 1004. Language in Culture and Society. 3 Credits.

Comparison and analysis of how cultures use language to communicate. The relationship of language to issues of human nature, gender, race, class, artistic expression, and power. Laboratory fee.

ANTH 1005. The Biological Bases of Human Behavior. 4 Credits.

Human behavior from an evolutionary perspective, including issues such as communication, intelligence, reproductive behavior, parental behavior, aggression, and cooperation, and drawing on an understanding of the behavior and biology of the nonhuman primates. Laboratory fee.

ANTH 2000. Sophomore Colloquium. 3 Credits.

Sophomore colloquia are small, seminar-type classes that deeply engage CCAS second-year students in a discipline, focus on a narrow issue of high interest and impact, and require independent research projects. May be repeated provided topic differs. Consult the Schedule of Classes for more details. Restricted to CCAS sophomores.

ANTH 2008. Foundations of Anthropological Thought. 3 Credits.

The development of anthropological thought in historical context. Exploration of selected basic concepts and theories of contemporary anthropology. To be taken in the junior or senior year. Prerequisite: ANTH 1002.

ANTH 2008W. Foundations of Anthropology. 3 Credits.

The development of anthropological thought in historical context. Exploration of selected basic concepts and theories of contemporary anthropology. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to juniors and seniors. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 2406. Human Evolutionary Genetics. 3 Credits.

Introduction to the patterns and processes of human genetic variation. Topics include human origins and migration; molecular adaptations to environment, lifestyle, and disease; ancient and forensic DNA analyses; and genealogical reconstructions.

ANTH 2501. The Anthropology of Gender: Cross-Cultural Perspectives. 3 Credits.

Anthropological representations of gender relations in "other" cultures have provided important case material for feminist theorizing of sex differences and gender roles and statuses. How a cross-cultural approach can inform our understanding of gender. Same as WGSS 2121.

ANTH 2502. Anthropology of Science and Technology: Twenty-First-Century Brave New Worlds. 3 Credits.

The relationship between science and society, with consideration of how scientific knowledge and emergent technologies affect our lives, identities, social relations, and material conditions. The sociopolitical context in which scientific knowledge is produced and the ethnographic study of biotechnology, especially genetics and its various applications.

ANTH 2505. Introduction to Ethnomusicology. 3 Credits.

Models of understanding music as a cultural endeavor. Application and critique of models in the design and execution of student independent field research. Prerequisites: MUS 1101 or ANTH 1002 or ANTH 1004 or permission of the instructor. (Same as MUS 2105).

ANTH 2506. Religion, Myth, and Magic. 3 Credits.

Theories of religion developed by anthropologists; survey of world religions with emphasis on non-Western societies; religious process and change.

ANTH 2533. Material Culture in America. 3 Credits.

Review and analysis of the cultural messages embedded in our material surroundings. Consideration of a range of humanly created artifacts, ranging from specific objects to vast landscapes. Same as AMST 2533.

ANTH 2750. Latinos in the United States. 3 Credits.

Exploration of the term Latino and its impact on discussions of race, identity, and citizenship expectations throughout U.S. history. How geographic, linguistic, aesthetic, political, and economic factors construct Latino identity and influence policymaking and international relations.

ANTH 2750W. Latinos in the United States. 3 Credits.

Exploration of the term Latino and its impact on discussions of race, identity, and citizenship expectations throughout U.S. history. How geographic, linguistic, aesthetic, political, and economic factors construct Latino identity and influence policymaking and international relations. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ANTH 2821. Myths and Mysteries in Archaeology. 3 Credits.

How archaeological methods and techniques can falsify, or support, exotic beliefs about the past. Topics range from King Arthur to Atlantis.

ANTH 2822. Archaeology in Film and Television. 3 Credits.

The relationships between archaeology, the media, and popular culture; nationalism, descendant communities, gender, race, and colonialism.

ANTH 3401. Human Functional Anatomy. 3 Credits.

The anatomy of the human body, how it works, and how it differs from other animals, especially other primates. Principles and approaches of functional morphology and biomechanics and how function can be reconstructed from fossils, with special focus on the musculoskeletal system. No prior knowledge of anatomy is required. Laboratory fee. Prerequisite: ANTH 1001.

ANTH 3402. Human Evolutionary Anatomy. 3 Credits.

The structure and function of human anatomy, as compared to our closest relatives, the great apes. Using this comparative approach, the course investigates the fossil record of human evolution, with an emphasis on reconstructing relationships, function, behavior, and adaptation in fossil hominins. Prerequisite: ANTH 1001.

ANTH 3403. Forensic Anthropology Laboratory. 2 Credits.

Identification of human skeletal remains by body part, age, sex, race, and individual disease or trauma history; study of skeletal variation in modern and recent populations. Taught at the Smithsonian. Corequisite: ANTH 3404.

ANTH 3404. Human Variation. 1 Credit.

An overview of human variation, with special emphasis on the skeleton. Includes history of physical anthropology, individual and population variations, archaeological recovery of human remains, paleodemography, growth, paleopathology, and forensic anthropology. Corequisite: ANTH 3403 Prerequisite: ANTH 1001.

ANTH 3406. Advanced Human Osteology. 3 Credits.

Advanced techniques in determination of age, sex, ancestry, and pathological conditions using the skeleton. Taught at the Smithsonian. Prerequisites: ANTH 3403 and ANTH 3404.

ANTH 3407. Conservation in a Changing World: Human and Animal Behavior. 3 Credits.

How humans and animals interact in a wide variety of settings, how human and animal welfare can be ensured, and how we can create a scientifically sound, yet socially and economically acceptable, conservation of the planet's biodiversity. Prerequisites: ANTH 1001.

ANTH 3408. The Evolution of Human Families. 3 Credits.

Human parental behavior considered from an evolutionary perspective, including parental care among mammals, concepts of parental investment, and parent-offspring conflict. Focus on parenting in the human lineage from early hominins to hunter-gatherers to the modern context. Prerequisites: ANTH 1001.

ANTH 3409. Evolution of Primate Life Histories. 3 Credits.

Human and non-human primate life histories and their evolution; factors such as body size, brain size, fertility, and life span. Features of modern human life histories, proposed explanations for them, and pertinent fossil evidence. Prerequisite: ANTH 1001.

ANTH 3411. Primatology. 3 Credits.

Physical and behavioral characteristics of the various primate groups and their relationship to human physical and cultural evolution. Prerequisite: ANTH 1001.

ANTH 3412. Hominin Evolution. 3 Credits.

The fossil record of human evolution, including its context. Review of the fossil evidence that concentrates on the distinctive features of each taxon. Pleistocene remains. Laboratory fee. Prerequisite: ANTH 1001.

ANTH 3412W. Hominin Evolution. 3 Credits.

The fossil record of human evolution, including its context. Review of the fossil evidence that concentrates on the distinctive features of each taxon. Pleistocene remains. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Laboratory fee. Prerequisite: ANTH 1001.

ANTH 3413. Evolution of the Human Brain. 3 Credits.

Examination of how the human brain is unique in comparison to other animals, with an emphasis on understanding our species' distinctive neurobiology in terms of the evolution of cognitive abilities such as language, social comprehension, tool making, and abstract thinking.

ANTH 3491. Topics in Biological Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. Instructors are drawn from GW faculty and Smithsonian Institution staff. May be repeated for credit if topic varies. Prerequisite: ANTH 1001.

ANTH 3501. Anthropology of Development. 3 Credits.

The impact of the world economy on nonindustrial societies. Analysis of the role of anthropology in international development programs aimed at alleviating problems in the Third World. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 3502. Cultural Ecology. 3 Credits.

Basic principles of cultural ecology. Human interaction with the ecosystem both past and present; emphasis on the application of anthropological precepts to current environmental problems. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004 or ANTH 1004W or permission of the instructor.

ANTH 3503. Psychological Anthropology. 3 Credits.

The cross-cultural study of the relationship between culture and personality. Topics include emotion, conceptions of the self, mental health and illness, sexuality, marriage and parenting, and cognition. Psychobiological, cultural, ecological, and psychoanalytical theories are examined. Prerequisites: ANTH 1002 or permission of the instructor.

ANTH 3504. Illness, Healing, and Culture. 3 Credits.

Introduction to medical anthropology. What the record of human evolution and prehistory tells about human health; the epidemiology of health and illness; how different cultures define disease; understanding illness and healing systems cross-culturally; and the role of medical anthropology in health care and international development. Prerequisites: ANTH 1002 or permission of the instructor.

ANTH 3506. Politics, Ethnicity, and Nationalism. 3 Credits.

Comparative analysis of political systems; political processes, such as factionalism, styles of leadership, political ritual. Prerequisites: ANTH 1002 or permission of the instructor.

ANTH 3507. Kinship, Family, and Community. 3 Credits.

Cross-cultural analysis of how people form, maintain, and transform social groups and boundaries. Focus on how communities such as family, ethnic group, and nation are defined in moral terms. Prerequisites: ANTH 1002 or permission of the instructor.

ANTH 3508. Art and Culture. 3 Credits.

The role of art in culture, with emphasis on small-scale societies; influences upon the artist, and beliefs and practices associated with art production. Prerequisites: ANTH 1002 or permission of the instructor.

ANTH 3513. Anthropology of Human Rights. 3 Credits.

Issues of basic human rights and their violation by different cultures, states, and organizations. Genocide, ecocide, abuses on the basis of ethnicity, religion, or similar factors, and the treatment of those seeking asylum. Rights of informants and groups studied in anthropological research. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 3513W. Anthropology of Human Rights. 3 Credits.

Issues of basic human rights and their violation by different cultures, states, and organizations. Genocide, ecocide, abuses on the basis of ethnicity, religion, or similar factors, and the treatment of those seeking asylum. Rights of informants and groups studied in anthropological research. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 3521. Visual Anthropology and the Social Lives of Images. 3 Credits.

Exploration of what still and moving images do in different cultural contexts, their social lives as they circulate, and how they are transformed as objects and a technology in diverse settings. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 3531. Methods in Sociocultural Anthropology. 3 Credits.

Approaches to field research. Conceptual bases and biases in the delineation of problems and in the selection, analysis, and organization of data. Students design and carry out their own field projects in the Washington area. Prerequisite: ANTH 1002.

ANTH 3601. Language, Culture, and Cognition. 3 Credits.

The role of language and culture in the organization of human experience. Beginning with debates about linguistic relativity, the course explores the way language use shapes cognition and practice in a variety of cultures and social contexts. Same as LING 3601. Prerequisite: ANTH 1004. Laboratory fee.

ANTH 3602. Ethnographic Analysis of Speech. 3 Credits.

Linguistic variation and change in discourse practices; social and political correlates of linguistic interaction; recording, transcription, and analysis of verbal interaction. Prerequisites: ANTH 1004. (Same as LING 3602).

ANTH 3602W. Ethnographic Analysis of Speech. 3 Credits.

Linguistic variation and change in discourse practices; social and political correlates of linguistic interaction; recording, transcription, and analysis of verbal interaction. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: ANTH 1004.

ANTH 3603. Psycholinguistics. 3 Credits.

Language as species-specific property of the human mind. Psychological processes involved in the encoding and decoding of language; first and second language acquisition and bilingualism. Same as LING 3603.

ANTH 3691. Special Topics in Linguistic Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Prerequisites: ANTH 1004 or permission of the instructor. (Same as LING 3691).

ANTH 3701. Native Peoples - North America. 3 Credits.

Comparative study of Indian groups representative of the different culture areas of the United States and Canada. Contemporary issues involving indigenous groups, the wider society, and the state. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3702. Anthropology of Latin America. 3 Credits.

Culture history and ways of life in a selected region of Central or South America. Regional focus to be announced in the Schedule of Classes. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004.

ANTH 3703. Cultures of the Pacific. 3 Credits.

Culture history and ways of life among native peoples of Melanesia, Micronesia, and Polynesia. Prerequisites: ANTH 1002 or ANTH 1004.

ANTH 3704. Cultures of Southeast Asia. 3 Credits.

Anthropological introduction to the cultures of Southeast Asia; the role of biocultural evolution, political economy, gender, colonialism, nationalism, and globalization, particularly in Vietnam, Myanmar, Thailand, Malaysia, Indonesia, and the Philippines.

ANTH 3705. Anthropology of East Asia. 3 Credits.

Intensive study of the culture and history of selected peoples of East or Central Asia. Specific area to be announced in the Schedule of Classes. May be repeated for credit. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004.

ANTH 3707. Anthropology of the Middle East. 3 Credits.

Geographic environment, language, religion, and social structure of settled and nomadic peoples of the Middle East; emphasis on the Arab world. Prerequisites: ANTH 1002 or ANTH 1004.

ANTH 3708. Anthropology of Africa. 3 Credits.

Comparative examination of the history, cultural development, and contemporary problems of sub-Saharan African cultures. New World African cultures are also considered. Prerequisites: ANTH 1002 or ANTH 1004.

ANTH 3709. Japanese Culture Through Film. 3 Credits.

Survey of the Japanese cultural heritage presented through films. Topics include literature, philosophy, art, religion, and social history from premodern times to the modern era. Lectures and discussion in English. Same as JAPN 3162.

ANTH 3710. Latin America Cinema, Indigenous Media, and Social Movements. 3 Credits.

Major topics in Latin American film and media studies. Political, economic, social, and cultural forces that have shaped Latin American cinema. The role indigenous artists, activists, and social organizations play in shaping Latin American cinema.

ANTH 3791. Topics in Regional Anthropology. 3-4 Credits.

Culture, history, and ways of life in a selected region of the world. Topics vary. Consult the Schedule of Classes for more details. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004.

ANTH 3801. African Roots from Australopithecus to Zimbabwe. 3 Credits.

The development and contributions of Africa from human beginnings through medieval states. Topics include human evolution, origins of art, technology, trade, and animal/plant domestication, rise of African states, early relations with Europe and Asia, antecedents of contemporary African diversity. Prerequisites: ANTH 1003 or permission of the instructor.

ANTH 3801W. African Roots from Australopithecus to Zimbabwe. 3 Credits.

The development and contributions of Africa from human beginnings through medieval states. Topics include human evolution, origins of art, technology, trade, animal/plant domestication, rise of African states, early relations with Europe and Asia, antecedents of contemporary African diversity. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: ANTH 1003.

ANTH 3802. Human Cultural Beginnings. 3 Credits.

Survey of prehistory in Europe, Africa, and Asia from the earliest hominid cultures to the beginnings of agriculture. Prerequisite: ANTH 1003.

ANTH 3802W. Human Cultural Beginnings. 3 Credits.

Survey of prehistory in Europe, Africa, and Asia from the earliest hominid cultures to the beginnings of agriculture. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: ANTH 1003.

ANTH 3803. Old World Prehistory: First Farmers to First Cities. 3 Credits.

Archaeology of the Near East, Egypt, Europe, and other areas, from the beginnings of agriculture to the rise of Babylon. Prerequisites: ANTH 1003.

ANTH 3803W. Old World Prehistory: First Farmers to First Cities. 3 Credits.

Archaeology of the Near East, Egypt, Europe, and other areas, from the beginnings of agriculture to the rise of Babylon. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: ANTH 1003.

ANTH 3804. Origins of the State and Urban Society. 3 Credits.

Emergence of urbanism and the state in the prehistory of various world regions. Regions covered might include India, China, Mexico, and the Pacific, among others. Prerequisites: ANTH 1003.

ANTH 3805. Archaeology of Israel and Neighboring Lands. 3 Credits.

The archaeology of Israel and adjacent areas (Syria, Jordan, Lebanon). Examination of many major sites and monuments. Significant problems and current debates. Same as AH 3106.

ANTH 3806. Art and Archaeology of the Aegean Bronze Age. 3 Credits.

Excavational and multidisciplinary aspects of classical archaeology. Minoan and Mycenaean civilizations (1700–1200 B.C.) Same as AH 3104.

ANTH 3808. Archaeology and the Celts. 3 Credits.

Historical and archaeological study of the Celtic people.

ANTH 3811. Historical Archaeology. 3 Credits.

Survey of the basic data and methods of research in the material culture of recent history. Same as AmSt 3811.

ANTH 3812. The Aztec Empire. 3 Credits.

Using archaeology, art, and ethnohistoric documents, this course focuses on the importance of power in Aztec society and how the normalization of violence created a form of social cohesion central to the state. Prerequisite: ANTH 1003. (Same as AH 3116, CAH 3116).

ANTH 3813. Archaeology of North America. 3 Credits.

History of American archaeology; survey of North American culture history from human entry into the Americas during the Pleistocene period until the time of the first European contacts. Focus on peoples north of Mexico. Prerequisite: ANTH 1003.

ANTH 3814. Ancient Mexican Civilizations. 3 Credits.

Cultural history of pre-Columbian societies in Middle America; the emergence of Mesoamerican civilization from the earliest hunter-gatherers and first farmers to the Aztec Empire. Prerequisite: ANTH 1003. (Same as AH 3107, CAH 3107).

ANTH 3823. Archaeology of Ritual and Religion. 3 Credits.

Archaeological and ethnographic examples from around the world are used to critically evaluate how archaeologists make inferences about ritual practices and the religious lives of past peoples. Issues include the origins of symbolic behavior, sacred landscapes, shamanism, ancestor veneration, and sorcery/witchcraft.

ANTH 3832. Paleoanthropological Field Program. 0-4 Credits.

Field research in paleoanthropology, including excavation methods, identification and analysis of materials, paleoecology, archaeology, and human anatomy. Conducted at selected sites in Eurasia, Africa, or Australia. Visits to comparative sites and collections in the region.

ANTH 3833. Field Research: New World. 1-6 Credits.

Survey, excavation, and/or laboratory analysis at localities in North or South America. See Schedule of Classes for details.

ANTH 3834. Field Research: Old World. 1-6 Credits.

Survey, excavation, and/or laboratory analysis at Neolithic or later localities in Eurasia, Africa, or Oceania. See Schedule of Classes for details.

ANTH 3835. Historical Archaeology Field Program. 3 Credits.

Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as AMST 3835.

ANTH 3838. Theory and Practice in Archaeology. 3 Credits.

The primary literature in archaeology theory since the 1960s. Ethics, topical issues, and archaeological practice. Prerequisite: ANTH 1003.

ANTH 3838W. Theory and Practice in Archaeology. 3 Credits.

The primary literature in archaeology theory since the 1960s. Ethics, topical issues, and archaeological practice. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: ANTH 1003.

ANTH 3839. Lab Research Methods in Archaeology. 3 Credits.

Research methods and techniques used by archaeologists. Emphasis on hands-on experience in one or more techniques. Prerequisite: ANTH 1003.

ANTH 3891. Special Topics in Archaeology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Prerequisites: ANTH 1003 or permission of the instructor.

ANTH 3991. Special Topics. 0-3 Credits.

Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 3991W. Special Topics. 3 Credits.

Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ANTH 3995. Undergraduate Research. 1-12 Credits.

Individual research problems to be arranged with a member of the faculty. May be repeated for credit. Permission of the instructor required prior to enrollment.

ANTH 4008. Seminar: Contemporary Anthropological Theory. 3 Credits.

The development of major trends in anthropological theory. How anthropologists from the four fields—sociocultural, linguistic, biological, and archaeology—have deployed and developed the ideas of theorists in their own empirical research and theorizing about specific processes. Prerequisite: ANTH 2008.

ANTH 4008W. Seminar: Contemporary Anthropological Theory. 3 Credits.

The development of major trends in anthropological theory. How anthropologists from the four fields -- sociocultural, linguistic, biological, and archaeology -- have deployed and developed the ideas of theorists in their own empirical research and theorizing about specific processes. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: ANTH 2008 or ANTH 2008W.

ANTH 6101. Proseminar in Biological Anthropology. 3 Credits.

Comprehensive overview of theory and practice in biological anthropology.

ANTH 6102. Proseminar in Sociocultural Anthropology. 3 Credits.

Comprehensive overview of theory and practice in sociocultural anthropology.

ANTH 6103. Proseminar in Archaeology. 3 Credits.

Survey of the most recent archaeological techniques and theoretical approaches to reconstructing and interpreting the cultures of the past.

ANTH 6104. Proseminar in Linguistic Anthropology. 3 Credits.

Contemporary anthropological studies of language in biological, social, and historical perspectives.

ANTH 6200. Museum Anthropology. 3 Credits.

How anthropological collections take shape in the past and carry meaning in the present. Critical examination of artifacts and forms of documentation. Application of material culture theory to museum records, collected objects, the changing meaning given to objects, and the context of collecting.

ANTH 6201. Methods in Museum Anthropology. 3 Credits.

How anthropological collections take shape in the past and carry meaning in the present. Research and analysis of existing collections; issues in museum anthropology.

ANTH 6202. Museums and the Public: Exhibiting Culture. 3 Credits.

Study of the issues and problems involved in "exhibiting culture," past and present, including issues of representation, message and interpretation, audience, ownership of objects and symbols, and ways of reconstructing the past. Critical examination of museum exhibits.

ANTH 6203. Preventive Conservation Concepts. 3 Credits.

Historical development of preventive conservation in museums, conservation ethics, team approaches to conservation, interactions of various materials with agents of deterioration. Basics of materials testing, preparation of condition reports, choosing museum storage and exhibition materials, and risk assessment. Same as MSTD 6203/ AH 6286.

ANTH 6204. Preventive Conservation Techniques. 3 Credits.

Practical applications of preventive conservation of materials, monitoring environmental conditions, conducting risk assessments, evaluation of exhibit and storage areas; developing plans, policies, and procedures for collections care; grant proposal preparation for collections care initiatives. Same as MSTD 6204/ AH 6287.

ANTH 6205. Problems in Conservation. 3 Credits.

Individual conservation projects to determine composition, construction, decomposition of materials, and possible stabilization techniques. Conservation laboratory experience. AH 6286 or ANTH 6203 may be taken as a corequisite. Prerequisites: AH 6286 or ANTH 6203.

ANTH 6230. Internship in Museum Anthropology. 1-6 Credits.

Supervised individual research and/or field work at the Smithsonian Institution or other area museums, arranged in consultation with the museum and the Anthropology Department. Admission by arrangement with the department chair or museum training advisor. May be repeated for credit up to a maximum of 6 credits.

ANTH 6291. Special Topics in Museum Anthropology. 3 Credits.

The social context and changing meaning of selected cultural processes or aspects of material culture that are represented in museums or public monuments. Topics vary by semester. See department for more details.

ANTH 6301. The Anthropology of Development. 3 Credits.

Theoretical perspectives that distinguish the contribution of anthropology to understanding processes of change in the Third World. Focus on health, population, environment, gender, and tourism issues. The role of anthropology in planning and implementing projects and policy.

ANTH 6302. Issues in Development. 3 Credits.

Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 6330. Internship in Development Anthropology. 3 Credits.

Supervised participation in a selected development agency or other relevant organization. Opportunity to observe agency procedures and gain practical experience. Admission by permission of instructor or department chair.

ANTH 6331. Research Methods in Development Anthropology. 3 Credits.

Anthropologists' roles in research-related activities, such as feasibility studies, social soundness analysis, and evaluations. Innovative research techniques, such as interactive data gathering, team survey methods, and rapid rural appraisal. Admission by permission of instructor.

ANTH 6391. Anthropology and Contemporary Problems. 3 Credits.

Exploration of anthropological perspectives on a current issue, such as refugees, ethnic violence, national mythologies, and women's health in developing countries. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 6401. Human Functional Anatomy. 3 Credits.

Growth and function of the musculoskeletal system, including the development, anatomy, and histology of bone, biomechanics of muscle and skeletal tissue, craniofacial and dental growth and morphology, and locomotion. No prior knowledge of anatomy required. Laboratory fee.

ANTH 6404. The Evolution of Primate Life Histories. 3 Credits.

Recent developments in the study of human and non-human life histories. Life history theory. Life history traits compared among primate groups in order to determine how selective pressures have shaped extant primate life history patterns. Laboratory fee.

ANTH 6406. Human Genetic Variation. 3 Credits.

The genetic variation in human populations as a framework for measurement and analysis of genetic diversity and evolutionary process. Consideration of the possible roles of cultural change leading to adaptive/selective events. Same as FORS 6246.

ANTH 6407. Anthropological Genetics. 3 Credits.

Molecular approaches to understanding human evolution and diversity; current research findings and new methodologies; social and ethical issues, including commercial DNA testing and ownership of biological samples.

ANTH 6412. Paleoanthropology. 1-3 Credits.

Survey of current research in hominid and hominoid evolution, focusing on the integrated nature of the field. Contributions from the geological and biological sciences are stressed, together with innovative geochemical techniques for establishing chronological sequences. Prerequisites: ANTH 3412 or BISC 2450.

ANTH 6413. Analytical Methods in Human Evolutionary Studies. 3 Credits.

A survey of methods and approaches for data collection and analysis in human evolutionary biology research. Topics include comparative methods and basic and multivariate statistics.

ANTH 6491. Topics in Biological Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. Instructors are drawn from GW faculty and Smithsonian Institution staff. May be repeated for credit if topic varies.

ANTH 6501. Gender and Sexuality. 3 Credits.

Study of new theoretical and methodological approaches developed in the anthropology of gender; postcolonialism, sexuality, and literary representations of gender. Same as WGSS 6257.

ANTH 6504. Social Study of Science and Technology. 3 Credits.

Concepts, theories, and cases in contemporary science and technology studies with an emphasis on the public and policy relevance of theory. Ethnographic material includes studies of laboratories, technomedicine, and environmental controversies.

ANTH 6505. Medical Anthropology. 3 Credits.

Concepts and theories in contemporary medical anthropology, including "critical" versus "conventional" medical anthropology, changes in approaches since the mid-twentieth century; structural and cultural construction of illness and suffering; ethnographic and epidemiological perspectives.

ANTH 6506. Topics in Medical Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit if the topic varies.

ANTH 6507. Nationalism and Ethnicity. 3 Credits.

Major theoretical and ethnographic issues in the study of nationalism worldwide. Explores how ethnic groups emerge in colonial and contemporary plural societies and how states attempt to integrate ethnic groups into nations.

ANTH 6508. Ethics and Cultural Property. 3 Credits.

Survey of ethical issues in anthropology, focusing on cultural property and repatriation; the epistemological, ethical, and political dilemmas of excavating, collecting, and owning cultural artifacts.

ANTH 6531. Methods in Sociocultural Anthropology. 3 Credits.

Epistemology; the definition of research problems; selection of research subjects and sites; techniques of data collection (e.g., surveys, interviews); data management and organization; ethical protocols; issues of safety; grant writing and funding.

ANTH 6561. American Folklife. 3 Credits.

The materials of American folk culture, concentrating on folk architecture, crafts, and art. Major organizing themes are regionalism and the use of objects as indicators of cultural intention. Same as AMST 6561.

ANTH 6562. Folklore Theory. 3 Credits.

An intellectual history of American folklore research; analysis of particular theories and methods. Same as AMST 6562.

ANTH 6591. Topics in Sociocultural Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit if the topic varies.

ANTH 6691. Topics in Linguistic Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit if the topic varies.

ANTH 6702. Issues in Latin American Anthropology. 3 Credits.

Intensive study of a selected topic in the anthropology of Central and/or South America. Topic to be announced.

ANTH 6707. Issues in Middle East Anthropology. 3 Credits.

Selected topics in the anthropology of the Middle East. Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 6710. Latin America Cinema, Indigenous Media, and Social Movements. 3 Credits.

Major topics in Latin American film and media studies. Political, economic, social, and cultural forces that have shaped Latin American cinema. The role indigenous artists, activists, and social organizations play in shaping Latin American cinema.

ANTH 6801. Paleolithic Archaeology. 3 Credits.

Current problems relating to materials from the Old World.

ANTH 6802. Problems in Eurasian and African Archaeology. 3 Credits.

Topic announced in the Schedule of Classes. Topics may include Bronze Age conflict, the Celts, etc. May be repeated for credit.

ANTH 6803. Problems in New World Archaeology. 3 Credits.

Current archaeological problems relating to the origin and development of aboriginal cultures. Specific topic to be announced in the Schedule of Classes. May be repeated for credit.

ANTH 6804. Problems in Mesoamerican Archaeology. 3 Credits.

Topics range from specific civilizations, such as the Olmec, to pan-Mesoamerican topics, such as religion and exchange. May be repeated for credit.

ANTH 6806. Technology. 3 Credits.

Cross-cultural examination of the form, function, meaning, and use of material culture (such as ceramics or stone tools) and the behavior patterns involved in its production. Topic vary by semester. Consult the Schedule of Classes for more details.

ANTH 6807. Public Archaeology. 3 Credits.

The use and creation of the past and the relationship between archaeologists and different publics.

ANTH 6832. Paleoanthropological Field Program. 0-4 Credits.

Intensive course on field research in paleoanthropology, including excavation methods, identification and analysis of materials, paleoecology, archaeology, and human anatomy. Conducted at selected sites in Eurasia, Africa, or Australia. Visits to comparative sites and collections in the region.

ANTH 6833. Field Research: New World. 1-6 Credits.

Survey, excavation, and/or laboratory analysis at localities in North or South America. Consult the Schedule of Classes for more details.

ANTH 6835. Historical Archaeology Field Program. 3-6 Credits.

Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as AMST 6835.

ANTH 6838. Archaeological Theory. 3 Credits.

Overview of major theories and positions in American archaeology; examination of new issues and directions in which the field appears to be moving.

ANTH 6839. Lab Research Methods in Archaeology. 3,4 Credits.

Research methods and techniques used by archaeologists. Emphasis on hands-on experience in one or more techniques. Laboratory fee.

ANTH 6891. Topics in Archaeology. 3 Credits.

Major issues related to the theory and practice of archaeology. Topic announced in the Schedule of Classes.

ANTH 6995. Research. 1-12 Credits.

May be repeated for credit.

ANTH 6998. Thesis Research. 3 Credits.

ANTH 6999. Thesis Research. 3 Credits.

ANTH 8695. Linguistic Field Methods. 3 Credits.

The relationship between language and thought in dialogue with the study of a particular foreign language. Ethnographic study of language and cognition and the application of linguistic theory and method to anthropological research. Methods of elicitation and textual analysis, and technologies used for storing and analyzing linguistic data. Restricted to graduate students.

ANTH 8998. Advanced Reading and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

ANTH 8999. Dissertation Research. 3-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

APPLIED SCIENCE (APSC)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

SEAS and its departments manage APSC courses as follows:

- SEAS Dean's Office—1001, 3098, 6215, 6216
- Civil and Environmental Engineering—2057, 2113, 6211, 6214
- Mechanical and Aerospace Engineering—2058, 6212, 6213
- Electrical and Computer Engineering—2114

APSC 1001. Introduction to Engineering for Undeclared Majors. 0-1 Credits.

As an introduction to disciplines within SEAS, potential solutions to problems are presented by practitioners of civil and environmental engineering; computer science; electrical, computer, and biomedical engineering; mechanical and aerospace engineering; and systems engineering.

APSC 2057. Analytical Mechanics I. 3 Credits.

First half of a one-year sequence. Concepts of statics: force systems, conditions of force and moment equilibrium, simple structures, distributed forces, centroids, internal forces, friction, moments of inertia. Prerequisites: PHYS 1021. (Fall and spring).

APSC 2058. Analytical Mechanics II. 3 Credits.

Second half of a one-year sequence. Concepts of dynamics: kinematics of particles, velocity and acceleration, translating and rotating reference frames, particle dynamics, motion under central and electromagnetic force, effect of Earth's rotation, vibrations, work, kinetic and potential energy, dynamics of systems of particles. Prerequisite: APSC 2057. (Fall and spring, Every Year).

APSC 2113. Engineering Analysis I. 3 Credits.

Analytical methods for the solution of problems in engineering, the physical sciences, and applied mathematics: applications of ordinary differential equations, matrices and determinants, eigenvalues and eigenvectors, systems of ordinary linear differential equations, Bessel and Legendre functions. Prerequisite or concurrent registration: MATH 2233.

APSC 2114. Engineering Analysis II. 3 Credits.

Analytical methods for the solution of problems in engineering, the physical sciences, and applied mathematics: complex variables, Fourier series and integral, frequency filters, Laplace transforms, inversion and Duhamel integrals; partial differential equations. Prerequisite: MATH 2233.

APSC 3098. Variable Topics. 1-36 Credits.

APSC 3115. Engineering Analysis III. 3 Credits.

Analytical methods for the solution of problems in engineering using concepts from probability and statistics: probability modeling, random variables and their distributions, mathematical expectation, sampling, point and confidence interval estimation, hypothesis testing, correlation, regression, and engineering applications. (Fall, spring, and summer).

APSC 3116. Engineering Analysis IV. 3 Credits.

Analytical methods using advanced concepts from probability and statistics: multivariate distributions, expectation, generating functions, parametric families of distributions, sampling and sufficient statistics, estimation, hypothesis testing, and engineering applications. May be taken for graduate credit. Prerequisites: APSC 3115 and MATH 2233. (Fall, Every Year).

APSC 6211. Analytical Methods in Engineering I. 3 Credits.

Engineering applications of the theory of complex variables: contour integration, conformal mapping, inversion integral, and boundary-value problems. Prerequisite: approval of department.

APSC 6212. Analytical Methods in Engineering II. 3 Credits.

Algebraic methods appropriate to the solution of engineering computational problems: linear vector spaces, matrices, systems of linear equations, eigenvalues and eigenvectors, quadratic forms. Permission of the department required prior to enrollment. (Spring, Every Year).

APSC 6213. Analytical Methods in Engineering III. 3 Credits.

Analytical techniques for solution of boundary-initial-value problems in engineering: wave propagation, diffusion processes, and potential distributions. Permission of the department required prior to enrollment. (Spring, Every Year).

APSC 6214. Analytical Methods in Engineering IV. 3 Credits.

Introduction to variational methods in engineering: Ritz and Galerkin approximation methods of boundary-value problems, aspects of linear integral equations arising from engineering analysis. Permission of the department required prior to enrollment. (Spring, Every Year).

APSC 6215. Analytical Methods in Engineering V. 3 Credits.

Advanced methods of solution of boundary-initial-value problems in engineering: characteristics, wave propagation, and Green's functions. Prerequisite: APSC 6213.

APSC 6216. Special Topics in Engineering Analysis. 3**Credits.**

Selected topics, such as perturbation techniques applied to approximate solution of nonlinear boundary and initial-value problems in engineering; application of singular integral equations in problems of mechanics. Permission of the department required prior to enrollment. (Fall and spring, Every Year).

ARABIC (ARAB)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ARAB 1001. Beginning Arabic I. 4 Credits.

Fundamentals of grammar and pronunciation and development of speaking, listening, reading, and writing skills in culturally appropriate contexts.

ARAB 1002. Beginning Arabic II. 4 Credits.

Continuation of ARAB 1001. Fundamentals of speaking, listening, reading, and writing in culturally appropriate and proficiency-oriented contexts. Prerequisite: ARAB 1001.

ARAB 1201. Intensive Elementary Arabic I. 6 Credits.

Accelerated learning of fundamentals of speaking, listening, reading, and writing Arabic in culturally appropriate contexts for proficiency.

ARAB 1202. Intensive Elementary Arabic II. 6 Credits.

Continuation of ARAB 1201. Fundamentals of speaking, listening, reading, and writing of Arabic in culturally and linguistically appropriate contexts. Prerequisites: ARAB 1201.

ARAB 2001. Intermediate Arabic I. 4 Credits.

Continuation of ARAB 1002. Further development of speaking, listening, reading, and writing skills of Arabic in culturally appropriate, proficiency-oriented contexts. Prerequisites: ARAB 1002.

ARAB 2002. Intermediate Arabic II. 4 Credits.

Continuation of ARAB 2001. Further development of speaking, listening, reading, and writing skills of Arabic in culturally appropriate and proficiency-oriented contexts. Prerequisites: ARAB 2001 or ARAB 1202.

ARAB 2105. Topics in Arabic Studies. 1-3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details.

ARAB 2201. Intensive Intermediate Arabic I. 6 Credits.

Continuation of ARAB 1202. Prerequisite: ARAB 1202. Laboratory fee.

ARAB 3001. Advanced Arabic. 4 Credits.

Emphasis on development of speaking, listening, reading, and writing skills at the advanced level of proficiency in culturally appropriate contexts. Discussion of cultural and social issues based on a selection of contemporary written and audiovisual materials from Arab literary and media sources. Prerequisites: ARAB 2002.

ARAB 3105. Special Topics. 3 Credits.

Topic announced in the Schedule of Classes may be repeated for credit provided the topic differs.

ARAB 3201. Intensive Intermediate Arabic II. 6 Credits.

Continuation of ARAB 2201. Accelerated learning of Arabic skills in speaking, listening, reading, and writing at the intermediate/advanced level of proficiency in culturally appropriate contexts. Prerequisites: ARAB 2201.

ARAB 3301. Modern Arabic Literature. 3 Credits.

Short stories, short plays, poems, literary essays in Modern Standard Arabic, with attention to linguistic and literary stylistic aspects. Prerequisites: ARAB 3001 or ARAB 3201.

ARAB 3302. Media Arabic. 3 Credits.

Authentic scripted and audiovisual materials from various contemporary Arab media outlets including television and radio newscast and cultural programs, newspaper and magazine articles, and the Internet. Prerequisites: ARAB 3001 or ARAB 3301; or permission of the instructor.

ARAB 3311. Business Arabic. 3 Credits.

General and specific business language skills used in a variety of business operations and settings, such as making presentations, researching opportunities, conducting interviews, and negotiating. Prerequisite: ARAB 3001.

ARAB 3501. Arabic and Arab Identity. 3 Credits.

History of the Arabic language from pre-Islamic times and its subsequent spread into contiguous regions. The role of the Arabic language in formulating the ideology of Arab nationalism and identity. Course is conducted in English.

ARAB 3502. Arab Film and Culture in English. 3 Credits.

Historical and thematic survey of Arab cinema and its expression of Arab culture. Course is conducted in English.

ARAB 3503. Fundamentals of Arabic Linguistics. 3 Credits.

Introduction to the structures, functions, and varieties of Arabic from a descriptive linguistics perspective. The history of the language, including contributions of major medieval Arabic grammarians. Analysis of standard and dialectal varieties of Arabic. Course is conducted in English.

ARAB 3901. Directed Projects. 1-3 Credits.

Individual advanced reading or research, to be arranged with a member of the faculty. Permission of the instructor and department required prior to enrollment. May be repeated for credit.

ARAB 4001. Genres in Modern Arabic Literature. 3 Credits.

Historical development of modern short Arabic stories or short Arabic plays throughout the twentieth and twenty-first centuries. Prerequisites: ARAB 3301 or permission of the instructor.

ARAB 4002. Arabic Narratives Through the Ages. 3 Credits.

Reading and discussion of diachronic narratives in texts, such as those found in stories of The Thousand and One Nights, or travel adventures, such as those of Ibn Battuta and his successors. Prerequisites: ARAB 3301 or permission of the instructor.

ARAB 4501. Arabic-English Translation. 3 Credits.

Theoretical background and practical applications of translation strategies from Arabic to English that are necessary for professional translation tasks. Prerequisite: ARAB 3301 or ARAB 3302.

ARAB 4502. Arabic-English Advanced Translation and Editing. 1-3 Credits.

The professional translation and editing of various types of material. Prerequisite: ARAB 4501.

ART HISTORY (AH)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

AH 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details.

AH 1031. Survey of Art and Architecture I. 3 Credits.

An introduction to the history of art through the study of major monuments, movements, and concepts. From the prehistoric period, through the Ancient Mediterranean cultures, including Greece and Rome, to the end of the Middle Ages.

AH 1032. Survey of Art and Architecture II. 3 Credits.

Continuation of AH 1031. An introduction to the history of art through the study of major monuments, movements, and concepts. From the early Renaissance through the Baroque and modern eras.

AH 1070. The American Cinema. 3 Credits.

History and criticism of American films. The course enables the student to recognize and evaluate cinema techniques, to express the evaluation clearly in writing, and to understand the role of films in the context of American culture. Laboratory fee.

AH 1135. Spanish Art: Prado/Thyssen Museums. 3 Credits.

AH 1136. Spanish Art: From Goya to Picasso. 3 Credits.

AH 2001. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See the department for more details.

AH 2001W. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AH 2071. Introduction to the Arts in America. 3 Credits.

A survey of American art from the period of colonial exploration and settlement to the postmodern present. Political and social meanings of painting, sculpture, architecture, prints, and photographs. The relationship of art to religion and nationalism; issues of class, race, and gender. Same as AMST 2071.

AH 2145. History of Decorative Arts: European Heritage. 3 Credits.

Changing styles of European furniture, textiles, ceramics, and glass in the context of general trends in art history and changing patterns in economic, technological, social, and cultural history. From antiquity to the modern age.

AH 2154. American Architecture I. 3 Credits.

Stylistic properties, form and type characteristics, technological developments, and urbanistic patterns as a means of interpreting historic meaning; analysis of buildings both as artifacts and as signifiers of social, cultural, and economic tendencies. 1600 to 1860. (Same as AMST 2520, CAH 2154).

AH 2155. American Architecture II. 3 Credits.

Continuation of AH 2154. Stylistic properties, form, and type characteristics, technological developments, and urbanistic patterns as a means of interpreting historic meaning; analysis of buildings both as artifacts and as signifiers of social, cultural, and economic tendencies. 1860 to present. (Same as AMST 2521, CAH 2155).

AH 2161. History of Decorative Arts: American Heritage. 3 Credits.

The decorative arts in America from the seventeenth century to the modern period. Consideration of changing visual characteristics in relation to the changing American experience.

AH 2162. History of Photography. 3 Credits.

The historical, social, aesthetic and technological developments of the photographic medium, including its relationship to modern art and modes of visual representation and the properties that inform our understanding of photographic meaning.

AH 2162W. History of Photography. 3 Credits.

The historical, social, aesthetic and technological developments of the photographic medium, including its relationship to modern art and modes of visual representation and the properties that inform our understanding of photographic meaning. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AH 2190. East Asian Art. 3 Credits.

Introduction to the visual and material cultures of East Asia from the prehistoric to modern periods, covering the areas of contemporary China, Japan, and Korea. (Same as CAH 2190).

AH 2191. South Asian Art. 3 Credits.

Visual and material cultures of South Asia from the prehistoric to contemporary periods, covering modern Afghanistan, Bangladesh, India, Nepal, Pakistan, and Sri Lanka. No previous knowledge of South Asian history or art history is required. (Same as CAH 2191).

AH 2192. Art of Southeast Asia. 3 Credits.

The arts of Southeast Asia, covering areas of Vietnam, Laos, Cambodia, Myanmar, Thailand, and Indonesia, especially Java and Bali. The fusion of Indian and Chinese concepts with indigenous cultural traits. (Same as CAH 2192).

AH 3101. Ancient Art of the Bronze Age and Greece. 3 Credits.

A survey of Greek art from the Minoans and Mycenaeans (c. 2000 B.C.) to the age of Alexander (c. 300 B.C.). Relationships among the arts of the different groups in the Aegean area and their impact on Western culture. The Thera volcanic eruption, the "Dorian Invasion," the portrayal of women, "heroic nudity," and the assumption of a stylistic chronology.

AH 3102. Ancient Art of the Roman Empire. 3 Credits.

A survey of Roman art from the successors of Alexander the Great (c. 300 B.C.) to the fall of the Roman Empire in the West (c. 300 A.D.). The impact of the Greek world on Roman art and culture; innovations and achievements of the Romans in architecture, portraiture, and historical narrative. Focus on the city of Rome and other areas of the Roman world such as North Africa and Asia.

AH 3103. Art and Archaeology of Egypt and the Near East. 3 Credits.

The great artistic tradition of the Nile Valley and the contemporary civilizations (c. 3000 B.C. to after 1000 B.C.) between the rivers Tigris and Euphrates (present day Iraq). The Pyramid Age, the temples at Karnak and Luxor, the tombs of the Valley of the Kings, and the artistic traditions of the Sumerians, Akkadians, Babylonians, Assyrians, and Persians.

AH 3104. Art and Archaeology of the Aegean Bronze Age. 3 Credits.

Excavational and multidisciplinary aspects of classical archaeology. Minoan and Mycenaean civilizations (1700–1200 B.C.). Same as ANTH 3806.

AH 3105. Topics in Ancient Art and Archaeology. 3 Credits.

May be repeated for credit provided the topic differs. Same as CLAS 3115.

AH 3106. Art and Archaeology of Israel and Neighboring Lands. 3 Credits.

The archaeology of Israel and adjacent areas (Syria, Jordan, Lebanon). Examination of many major sites and monuments. Significant problems and current debates. Same as ANTH 3805.

AH 3107. Ancient Mexican Civilizations. 3 Credits.

Cultural history of pre-Columbian societies in Middle America; the emergence of Mesoamerican civilization from the earliest hunter-gatherers and first farmers to the Aztec Empire. Prerequisite: ANTH 1003. (Same as ANTH 3814, CAH 3107).

AH 3111. Early Christian and Byzantine Art and Architecture. 3 Credits.

Art of the Mediterranean world following the collapse of Roman administration. Growth of the basilica and its decoration; the significance of small objects in medieval study. The rise and fall of the East Roman (Byzantine) Empire from Justinian to 1453.

AH 3112. Proseminar in Romanesque and Gothic Art and Architecture. 3 Credits.

The origin of Western art in the Hiberno-Saxon and Carolingian worlds, their relationship to the Ancient heritage and to the contemporary Byzantine art. Romanesque and Gothic architecture and its sculptural decoration as art historical and social phenomena.

AH 3113. Islamic Art and Architecture. 3 Credits.

Introduction to the visual culture of the Muslim world, from Spain to India, from the seventh century to the present. Examination of artworks in their historical, religious, and cultural contexts; key points in the field's historiography. (Same as CAH 3113).

AH 3114. Art of the Book in the Medieval Muslim World. 3 Credits.

Painting and book illumination in the Islamic world, beginning with the rise of Islam in the seventh century and ending with the seventeenth century. Uses written sources and works of art and material culture to better understand the unity and diversity of the Islamic world and its complex attitude toward images. (Same as CAH 3114).

AH 3114W. Art of the Book in the Medieval Muslim World. 3 Credits.

Introduction to the history of illustrated manuscripts, painting, and book illumination in the Muslim world, from the rise of Islam in the seventh century through the seventeenth century. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AH 3116. The Aztec Empire. 3 Credits.

Using archaeology, art, and ethnohistoric documents, this course focuses on the importance of power in Aztec society and how the normalization of violence created a form of social cohesion central to the state. Prerequisite: ANTH 1003. (Same as ANTH 3812, CAH 3116).

AH 3117. Special Topics in Precolumbian Art and Archaeology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3120. Italian Art and Architecture of the 13th through 15th Centuries. 3 Credits.

Origins, development, and theoretical foundations of Renaissance painting, sculpture, and architecture (Giotto, Duccio, Masaccio, Donatello, Ghiberti, Brunelleschi, Mantegna, Bellini, Botticelli).

AH 3121. Italian Art and Architecture of the Sixteenth Century. 3 Credits.

The development of the universal genius within the circle of Florence and Rome (Leonardo, Raphael, Michelangelo) and their counterparts in Venice (Giorgione, Titian, Tintoretto, Sansovino, Palladio).

AH 3122. Topics in Early Northern Renaissance Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

AH 3122W. Topics in Early Northern Renaissance Art and Architecture. 3 Credits.

AH 3123. Topics in Northern Renaissance Art and Architecture. 3 Credits.

Francis I and Fontainebleau Palace, Henry VIII and Hampton Court, Johann Friedrich of Saxony, and the Holy Roman Emperors Maximilian I and Charles V. François Clouet, Hans Holbein, Lucas Cranach, Albrecht Dürer, Pieter Brueghel, Bernard van Orley, and others. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3123W. Topics in Northern Renaissance Art and Architecture. 3 Credits.

AH 3131. Italian Art and Architecture of the Seventeenth Century. 3 Credits.

The Counter-Reformation and creation of the Baroque in painting, sculpture, and architecture in Rome (Carracci, Caravaggio, Bernini, Borromini, Pietro da Cortona), Turin (Guarini, Juvarra), and Venice (Longhena).

AH 3132. Topics in Northern European Art and Architecture of the Seventeenth Century. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. (Same as CAH 3132).

AH 3134. Topics in Spanish and Portuguese Art through the Sixteenth Century. 3 Credits.

The Kingdoms of the Iberian Peninsula from the Reconquest of Granada to the Renaissance Age of Exploration. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3134W. Topics in Spanish and Portuguese Art through the Sixteenth Century. 3 Credits.

The Kingdoms of the Iberian Peninsula from the Reconquest of Granada to the Renaissance Age of Exploration. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Same as AH 3134).

AH 3135. Topics in Seventeenth/Eighteenth Century Spanish and Portuguese Art. 3 Credits.

Secular and sacred art of the Baroque Golden Century or the Rococo Enlightenment. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3140. European Art of the Eighteenth Century. 3 Credits.

Painting, sculpture, and architecture in France, Great Britain, and Italy. Emphasis on Watteau, Chardin, David, Hogarth, Gainsborough, Reynolds, Canaletto, and Tiepolo. Painting, sculpture, and architecture in France, Great Britain, and Italy.

AH 3141. European Art of the Early Nineteenth Century. 3 Credits.

Neoclassicism and Romanticism in the context of Western European political, social, and cultural developments. Emphasis on France, England, and Germany and the representative styles of David, Ingres, Delacroix, Turner, Constable, and Friedrich.

AH 3141W. European Art of the Early Nineteenth Century. 3 Credits.

Neoclassicism and Romanticism in the context of Western European political, social, and cultural developments. Emphasis on France, England, and Germany and the representative styles of David, Ingres, Delacroix, Turner, Constable, and Friedrich. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AH 3142. European Art of the Late Nineteenth Century. 3 Credits.

The revolution in style of Realism, Impressionism, and Post-Impressionism in the context of Western European political, social, and cultural developments. Emphasis on representative styles of Courbet, Manet, Monet, Morisot, Repin, Seurat, Cezanne, Van Gogh, and Gauguin.

AH 3142W. European Art of the Late Nineteenth Century. 3 Credits.

The revolution in style of Realism, Impressionism, and Post-Impressionism in the context of Western European political, social, and cultural developments. Emphasis on representative styles of Courbet, Manet, Monet, Morisot, Repin, Seurat, Cezanne, Van Gogh, and Gauguin. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AH 3143. Early Twentieth-Century Art. 3 Credits.

History and theory of early twentieth-century modernism in the visual arts, from origins in the late nineteenth century through Surrealism. The work of artists such as Matisse, Picasso, Kandinsky, Duchamp, and Mondrian. (Same as AH 3143W).

AH 3143W. Early Twentieth-Century Art. 3 Credits.

History and theory of early twentieth-century modernism in the visual arts, from origins in the late nineteenth century through Surrealism. The work of artists such as Matisse, Picasso, Kandinsky, Duchamp, and Mondrian. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Same as AH 3143).

AH 3146. Modern Architecture in Europe and America. 3 Credits.

Major developments in architecture and urbanism from the Industrial Revolution to the end of the twentieth century.

AH 3146W. Modern Architecture in Europe and America. 3 Credits.

AH 3151. American Art in the Age of Revolution. 3 Credits.

American art during the eighteenth century "consumer revolution," the American War for Independence, and the early republic. Emphasis on the socioeconomic and political purposes of art, with focus on Enlightenment symbolism and the visualization of national identity. (Same as AMST 3151).

AH 3152. American Art in the Era of National Expansion. 3 Credits.

American art from the opening of the Erie Canal in 1825 to the Spanish-American War in 1898. Emphasis on the role of art in the expansion of the United States, exploring issues of race, class, and gender; art, and religion.

AH 3153. American Art of the Twentieth Century. 3 Credits.

Twentieth-century American painting and sculpture from the turn of the century to the beginnings of postmodernism, with focus on the avant garde. Artists of the Stieglitz circle and later modernist movements such as Abstract Expressionism, Pop, Op, Minimal, and Conceptual art. Theory and criticism.

AH 3160. Latin American Art and Architecture. 3 Credits.

AH 3165. Later Twentieth-Century Art. 3 Credits.

Artists, art, and critical concepts from the later twentieth century, focusing on key movements and issues, including abstract expressionism, minimalism, conceptual art, feminism, identity politics, and the rise of globalization. (Same as AH 3165W).

AH 3165W. Later Twentieth-Century Art. 3 Credits.

Artists, art, and critical concepts from the later twentieth century, focusing on key movements and issues, including abstract expressionism, minimalism, conceptual art, feminism, identity politics, and the rise of globalization. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Same as AH 3165).

AH 3170. Materials, Methods, and Techniques in Art History. 3 Credits.

Working hands-on in a workshop studio, students create panels, canvases, vehicles, mediums, pigments, drawings, and paintings from raw materials and are introduced to the materials, methods, and techniques of the fine arts through traditional practices and processes of manufacture in western cultures.

AH 3181. Special Topics in Asian Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

AH 3182. Special Topics in South Asian Art. 3 Credits.

Introduction to the art, architecture, and visual culture of the Indian subcontinent from ancient to contemporary periods. Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details.

AH 3182W. Special Topics in South Asian Art. 3 Credits.

Introduction to the art, architecture, and visual culture of the Indian subcontinent from ancient to contemporary periods. Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AH 4109. Topics in Ancient Art and Archaeology. 3 Credits.

May be repeated for credit provided the topic differs. (Same as CLAS 3115).

AH 4119. Seminar in Medieval Art and Architecture. 3 Credits.

For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4129. Seminar in Renaissance Art and Architecture. 3 Credits.

For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4139. Seminar in Baroque Art and Architecture. 3 Credits.

For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4149. Seminar in Modern European Art and Architecture. 3 Credits.

For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4150. Seminar in Modern Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. See department for more details Restricted to juniors and seniors.

AH 4150W. Seminar in Modern Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. See department for more details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to juniors and seniors.

AH 4157. Seminar in Photography. 3 Credits.

Advanced undergraduate study of photography and lens-based media. Topics vary by semester. May be repeated for credit provided topic differs. Consult department for more details Restricted to juniors and seniors.

AH 4159. Seminar in American Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult department for more details. Restricted to art history majors or with permission of the instructor.

AH 4159W. Seminar in American Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See department for details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to students in the art history program or with the permission of the instructor.

AH 4165. Topics in Islamic Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details.

AH 4169. Seminar in Contemporary Art. 3 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit if topic differs. Restricted to juniors and seniors.

AH 4181. Topics in Asian Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details. Restricted to art history majors or with the permission of the instructor.

AH 4182. Topics in South Asian Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. See department for more details. Restricted to art history majors or with permission of the instructor.

AH 4189. Seminar: Topics in Art History. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details. Restricted to art history majors or with permission of the instructor.

AH 4197. Senior Thesis. 1-4 Credits.

Students should consult the Director of Undergraduate Studies by the end of their junior year regarding eligibility, selection of an area of research, and the appropriate faculty members to supervise the project. May be repeated for credit.

AH 4198. Independent Study. 1-3 Credits.

Directed research and study in a specific area of art history to be approved by a faculty member. May be repeated for credit.

AH 4199. Internship in Art History. 1-3 Credits.

Students gain practical experience working in an arts institution such as a museum or gallery. Advisor approval required prior to registration. May not be repeated for credit toward the degree. Restricted to art history majors.

AH 6201. Proseminar in Ancient Art of the Bronze Age and Greece. 3 Credits.

Greek art from the Minoans and Mycenaeans (c. 2000 B.C.) to the age of Alexander (c. 300 B.C.). Relationships among the arts of the different groups in the Aegean area and their impact on Western culture. The Thera volcanic eruption, the "Dorian Invasion," the portrayal of women, "heroic nudity," and the assumption of a stylistic chronology.

AH 6202. Proseminar in Ancient Art of the Roman Empire. 3 Credits.

Roman art from the successors of Alexander the Great (c. 300 B.C.) to the fall of the Roman Empire in the West (c. 300 A.D.). The impact of the Greek world on Roman art and culture; innovations and achievements of the Romans in architecture, portraiture, and historical narrative. Focus on the city of Rome and other areas of the Roman world such as North Africa and Asia.

AH 6205. Topics in Ancient Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

AH 6211. Proseminar in Early Christian and Byzantine Art and Architecture. 3 Credits.

Art of the Mediterranean world following the collapse of Roman administration. Growth of the basilica and its decoration; the significance of small objects in medieval study. The rise and fall of the East Roman (Byzantine) Empire from Justinian to 1453.

AH 6212. Proseminar in Romanesque and Gothic Art and Architecture. 3 Credits.

The origin of Western art from the Hiberno-Saxon and Carolingian worlds and their relationship to the Ancient heritage. Romanesque and Gothic architecture and its sculptural decoration as social phenomena.

AH 6213. Islamic Art and Architecture. 3 Credits.

Introduction to the visual culture of the Muslim world, from Spain to India, from the seventh century to the present. Examination of artworks in their historical, religious, and cultural contexts; key points in the field's historiography. (Same as AH 3113).

AH 6214. The Art of the Book in the Medieval Muslim World. 3 Credits.

An advanced-level introduction to the visual culture of the Muslim world, from Spain to India, from the seventh century to the seventeenth century. Examination of artworks in their historical, religious, and cultural contexts; key points in the field's historiography. (Same as AH 3114).

AH 6215. Seminar in Medieval Art and Architecture. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6220. Proseminar in Italian Art and Architecture of the 13th through 15th Centuries. 3 Credits.

Origins, development, and theoretical foundations of Renaissance painting, sculpture, and architecture (Giotto, Duccio, Masaccio, Donatello, Ghiberti, Brunelleschi, Mantegna, Bellini, Botticelli).

AH 6221. Proseminar: Italian Art and Architecture of the 16th Century. 3 Credits.

The development of the universal genius within the circle of Florence and Rome (Leonardo, Raphael, Michelangelo) and their counterparts in Venice (Giorgione, Titian, Tintoretto, Sansovino, Palladio).

AH 6222. Proseminar in Early Northern Renaissance Art and Architecture. 3 Credits.

Royal and ducal patronage and the Flemish and French masters of the fifteenth century, including van Eyck, Campin, van der Weyden, Fouquet, van der Goes, Memling, and Gerard David. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6223. Proseminar in Northern Renaissance Art and Architecture. 3 Credits.

Francis I and Fontainebleau Palace, Henry VIII and Hampton Court, Johann Friedrich of Saxony, and the Holy Roman Emperors Maximilian I and Charles V. François Clouet, Hans Holbein, Lucas Cranach, Albrecht Dürer, Pieter Brueghel, Bernard van Orley, and others.

AH 6225. Seminar in Renaissance Art. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6231. Proseminar in Italian Art and Architecture of the Seventeenth Century. 3 Credits.

The Counter-Reformation and creation of the Baroque in painting, sculpture, and architecture in Rome (Carracci, Caravaggio, Bernini, Borromini, Pietro da Cortona), Turin (Guarini, Juvarra), and Venice (Longhena).

AH 6232. Proseminar in Northern European Art and Architecture of the Seventeenth Century. 3 Credits.

Hapsburg Flanders and Brussels under the Spanish archdukes and their patronage of Rubens and his circle. The role of Dutch merchants commissioning diverse secular themes in Utrecht, Haarlem, Delft, Leyden, and Amsterdam from "Golden Age" artists such as Rembrandt, Vermeer, and Hals. Specific topic announced in the Schedule of Classes.

AH 6234. Proseminar in Spanish and Portuguese Art through the Sixteenth Century. 3 Credits.

The Kingdoms of the Iberian Peninsula from the Reconquest of Granada to the Renaissance Age of Exploration. Specific topic announced in the Schedule of Classes.

AH 6235. Seminar in Baroque Art. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6240. Proseminar in European Art of the Eighteenth Century. 3 Credits.

Painting, sculpture, and architecture in France, Great Britain, and Italy. Emphasis on Watteau, Chardin, David, Hogarth, Gainsborough, Reynolds, Canaletto, and Tiepolo.

AH 6245. Seminar in European Art of the Nineteenth Century. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6246. Proseminar in Modern Architecture in Europe and America. 3 Credits.

Major developments in architecture and urbanism from the Industrial Revolution to the end of the twentieth century.

AH 6250. Seminar: Modern Art. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6251. Proseminar in American Art in the Age of Revolution. 3 Credits.

American art during the eighteenth-century "consumer revolution," the American War for Independence, and the early republic. Emphasis on the socioeconomic and political purposes of art, with focus on Enlightenment symbolism and the visualization of national identity.

AH 6252. Proseminar in American Art in the Era of National Expansion. 3 Credits.

American art from the opening of the Erie Canal in 1825 to the Spanish-American War in 1898. Emphasis on the role of art in the expansion of the United States, exploring issues of race, class, and gender; art and religion.

AH 6254. Seminar in American Art before 1900. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6255. Seminar: Studies in American Art and History. 3 Credits.

Selected problems and themes in American cultural history involving the use of artistic materials in different media; emphasis on methodology and analytic techniques. May be repeated for credit. Same as AMST 6730.

AH 6256. Seminar in American Art of the Twentieth Century. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6257. Seminar in Photography. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6258. Art Historiography. 3 Credits.

The development of art history as a discipline from the eighteenth century to the present. An investigation of different art historical methodologies, including formal analysis, iconological, feminist, Marxist, semiotic and deconstructivist approaches.

AH 6260. Seminar in African Art. 3 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

AH 6261. Seminar in Asian Art. 3 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

AH 6262. Seminar in South Asian Art. 3 Credits.

Topics in the visual cultures of South Asia from a range of time periods; artworks in their historical, religious, and cultural contexts; key points in the field's historiography. May be repeated for credit provided the topic differs. See department for more details.

AH 6265. Seminar in Islamic Art and Architecture. 3 Credits.

Topic announced in Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6269. Seminar in Contemporary Art. 3 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

AH 6270. Special Topics in Art History. 3 Credits.

AH 6286. Preventive Conservation Concepts. 3 Credits.

Historical development of preventive conservation in museums, conservation ethics, team approaches to conservation, interactions of various materials with agents of deterioration. Basics of materials testing, preparation of condition reports, choosing museum storage and exhibition materials, and risk assessment. Same as ANTH 6203/ MSTD 6203.

AH 6287. Preventive Conservation Techniques. 3 Credits.

Practical applications of preventive conservation of materials, monitoring environmental conditions, conducting risk assessments, evaluation of exhibit and storage areas; developing plans, policies, and procedures for collections care; grant proposal preparation for collections care initiatives. Same as ANTH 6204/ MSTD 6204.

AH 6298. Independent Research in Art History. 3 Credits.

AH 6299. Museum Internship. 3-12 Credits.

ART THERAPY (ARTH)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ARTH 6201. Survey of Art Therapy. 3 Credits.

The use of the visual arts to enhance personal development and growth; illustrated lectures, readings, discussion, and studio work presented by experts in the field. Instruction is delivered online via Blackboard. No previous art experience is necessary.

ARTH 6205. History and Theory of Art Therapy. 2 Credits.

Art therapy history and theory, milestones and practitioners. The development of art therapy as a distinct therapeutic practice. Overview of psychotherapy theories relevant to art therapy. Open only to art therapy students.

ARTH 6206. Human Development and Art Therapy. 3 Credits.

Psychological and artistic development across the life span; theories of personality development; cultural and environmental influences; and human behavior, including developmental crises, disability, exceptional behavior, and addictive behavior. Restricted to students in the art therapy program.

ARTH 6207. Human Development and Art Therapy I: Child and Adolescent. 2 Credits.

Practical and developmental considerations when working with adults and senior adults in art therapy; psychological, cultural, environmental, and artistic influences and expectations; life span impacts of human behavior, developmental crises, disability, and exceptional behavior. Restricted to students in the art therapy program.

ARTH 6208. Human Development and Art Therapy II: Adults and Senior Adults. 2 Credits.

Practical and developmental considerations when working with adults and senior adults in art therapy; psychological, cultural, environmental, and artistic influences and expectations; life span impacts of human behavior, developmental crises, disability, and exceptional behavior. Restricted to students in the art therapy program. Prerequisite: ARTH 6207.

ARTH 6210. Counseling/Art Therapy Process. 3 Credits.

Theoretical and clinical dimensions of counseling and art therapy explored through study of current research concerning the diverse elements affecting the therapeutic process. The goals of each phase of treatment; development of the therapeutic alliance; assessment of client readiness; therapeutic techniques and interventions as practiced in short- and long-term treatment.

ARTH 6211. Process of Counseling and Art Therapy: Theory. 3 Credits.

Major theories in counseling and art psychotherapy through the lens of the creative process and other aspects of clinical practice; the influence of multicultural issues, contemporary and evidence-based practices, and various settings on art-making and the therapeutic encounter. Restricted to students in the art therapy program. Prerequisite: ARTH 6210.

ARTH 6212. Creativity, Symbolism, and Metaphor. 2 Credits.

Theories of creative development, aesthetics, and art interpretive strategies for engaging metaphor, symbolism, and personal association to client artwork; integrating personal, familial, cultural, and social meanings for insight and revelation. Restricted to students in the art therapy program.

ARTH 6221. Studio/Technique of Art Therapy. 3 Credits.

Direct experience of the therapeutic utility and psychological influence of art processes and materials. Identifying the effect of art-making leading to assessment and intervention strategies. Open only to art therapy students.

ARTH 6231. Child Art Therapy. 2 Credits.

Practical, theoretical, and ethical considerations involved in treating children in clinical, community, and educational settings; application of art therapy and counseling principles and practices for diverse child populations; development of interventions for varied DSM diagnoses. Restricted to graduate students in the art therapy program.

ARTH 6232. Art Therapy with Adolescents. 2 Credits.

Practical, theoretical, and ethical considerations in treating adolescents in clinical, community and educational settings. Assessment and treatment issues in art therapy. Application of art therapy and counseling principles and practices for diverse adolescent populations. Development of interventions for varied DSM diagnoses. Restricted to art therapy students. Restricted to students in the art therapy program.

ARTH 6233. Marital and Family Art Therapy/Counseling. 3 Credits.

Principles of working with families and couples, including an overview of systems theories and stages of family life cycle development; art techniques for evaluating of family dynamics; intervention strategies and cultural and ethical considerations. Restricted to art therapy students. Restricted to students in the art therapy program.

ARTH 6234. Group Process. 3 Credits.

Theoretical and experiential understanding of group art therapy and counseling methods and skills. Principles of group dynamics, therapeutic factors, member roles and behaviors, leadership styles and approaches, selection criteria, and short- and long-term group process.

ARTH 6235. Social and Cultural Diversity. 3 Credits.

Exploration of the therapist's heritage, expectations, worldview and values; racial/cultural identity development; skills for multicultural counseling. Stereotypes and biases that interfere with effective treatment of culturally different clients. The role of the art therapist or counselor in conflict resolution, advocacy, and social justice. May be repeated for credit if taken through the study abroad course option. Restricted to art therapy students.

ARTH 6241. Assessment Procedures. 3 Credits.

Instruments and procedures used in assessment of psychological health and psychopathology; diagnostic and developmental criteria as manifested in artwork and art-making; statistical concepts, including reliability and validity; selection and administration of assessment tools; treatment planning; report writing. Restricted to students in the art therapy program.

ARTH 6242. Psychopathology: Art and Diagnosis. 3 Credits.

Criteria of psychiatric diagnoses, such as the Diagnostic and Statistical Manual multiaxial system, theories of psychopathology, and relevant literature evaluation of potential indicators of functional and organic disorders in behavior and artwork of clients; ethical issues; cultural and environmental influences on diagnostic categorization; basic introduction to psychopharmacology. Restricted to students in the art therapy program or with permission of the instructor.

ARTH 6243. Substance Abuse and Addictions. 3 Credits.

Overview of substance abuse and addictions for art therapy and counseling, including theory and treatment applications; screening and assessment tools; treatment models specific to the field of addictions; art therapy techniques in the treatment of substance abuse for adolescents and adults in a variety of treatment settings. Restricted to students in the art therapy program.

ARTH 6251. Research Methods. 3 Credits.

Planning, conducting, and evaluating relevant methodologies, including qualitative and quantitative approaches and basic statistics; the importance of research in the psychotherapy professions; ethical and legal considerations; and the use of research to assess effectiveness of mental health and art therapy services. Restricted to graduate students in the art therapy program.

ARTH 6261. Ethics and Professionalism. 3 Credits.

Professional identity and the role of the therapist; the ethical practice of counseling and art therapy, including familiarity with ethical standards of various professional organizations; credentialing and licensure; public policy and advocacy for patients and for the profession. Restricted to graduate students in the art therapy program.

ARTH 6262. Career Counseling and Art Therapy. 3 Credits.

Theoretical foundation and practical experience necessary to understand and support career development needs for diverse individual clients and groups; career development over the lifespan; assessments, tools, and resources; occupational and labor market trends and resources; specific art therapy techniques applicable to career counseling in educational and work settings. Restricted to students in the art therapy program.

ARTH 6263. Ethics and Professionalism I: Principles. 1 Credit.

The ethical standards of art therapy, counseling and related mental health professions. Restricted to students in the art therapy program.

ARTH 6264. Ethics and Professionalism II: Applications. 2 Credits.

Applying ethical principles and values for professional identity and the role of the therapist; credentialing and licensure; public policy and advocacy for patients and for the profession. Restricted to students in the art therapy program. Prerequisite: ARTH 6263.

ARTH 6265. Advanced Issues in Psychotherapy and Art Therapy. 1-3 Credits.

Overview and application of one or more treatment models or theories to various mental and emotional disorders. Connections between the practice of art therapy and the techniques of other disciplines.

ARTH 6271. Art Psychotherapy and Trauma I: Theory and Approaches to Treatment. 0-3 Credits.

Introduction and overview of theory, practice, and treatment related to complex, trauma-related problems; psychobiology of traumatic stress, impact of traumatic stress on individuals, and specific treatment modalities in clinical setting; somatic (body-based) and nonverbal (art and image-based) treatment modalities. Supervised treatment or observation of treatment of clients with trauma histories. Restricted to art therapy students. Restricted to students in the art therapy program.

ARTH 6272. Art Psychotherapy and Trauma II: Loss, Countertransference, and Resiliency. 3 Credits.

Multi-modal treatment of acute, serial, or complex trauma; theoretical, practical, moral, cross cultural, and personal aspects as seen through an art therapy and counseling lens. Supervised treatment or observation of treatment of clients with trauma histories. Restricted to students in the art therapy program. Prerequisite: ARTH 6271.

ARTH 6281. Practicum in Art Therapy. 1-2 Credits.

Supervised clinical experience with clients or patients in psychiatric, rehabilitation, and education settings with children, adolescents, and adults. On-site individual supervision by clinical instructors; on-campus group supervision by faculty. A total of six semesters of practicum are required while completing 900 internship hours, 400 of which must be direct client contact. Restricted to graduate students in the art therapy program.

ARTH 6292. Special Projects in Art Therapy. 1-12 Credits.

Individual work based on research. Empirical, clinical, and library research may be undertaken, as well as the development of new procedures. Details to be worked out with each student. May be repeated for credit with advisor's approval. Open only to art therapy students.

ARTH 6998. Thesis Research. 3 Credits.**ARTH 6999. Thesis Research. 3 Credits.**

ASTRONOMY (ASTR)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ASTR 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details.

ASTR 1001. Stars, Planets, and Life in the Universe. 4 Credits.

Primarily for non-science majors. An introduction to how our Universe is structured, including the basic principles underlying astronomical systems and observations. Topics include the known laws of nature, stars, and planetary systems and the conditions for extraterrestrial life and exploration. Prerequisite: high school algebra. Laboratory fee.

ASTR 1002. Origins of the Cosmos. 4 Credits.

Primarily for non-science majors. A description of the Universe, its origins and its evolution, based on known physical principles. Topics include galactic and stellar structure, black holes, origin of the elements, and big bang cosmology. Prerequisite: high school algebra. Laboratory fee.

ASTR 1003. Introduction to Astronomy. 2 Credits.

ASTR 2121. Introduction to Modern Astrophysics. 3 Credits.

Introduction to the concepts and methods of modern astrophysics. Physical processes behind the origin, structure and evolution of stars and galaxies, based on physical principles and modern astronomical observations. Topics include the energy source of the Sun, the stellar life cycle, galaxies, and the structure and fate of the Universe. Prerequisites: PHYS 1012 or PHYS 1022.

ASTR 2131. Astrophysics Seminar. 3 Credits.

Course led each week by a different expert in the research on various astrophysical sources and phenomena. Topics may include the life and death of stars; most violent explosions in the universe; evolution of galaxies; and evolution of the universe on the largest scales. Prerequisite: PHYS 1012 or PHYS 1022.

ASTR 3141. Data Analysis in Astrophysics. 3 Credits.

Principles of data analysis in astrophysics and basic analysis of astronomical data from NASA satellites and ground-based telescopes. Prerequisites: PHYS 1012 or PHYS 1022. Recommended background: Prior study in physics or astrophysics.

ASTR 3161. Space Astrophysics. 3 Credits.

Physical processes of celestial phenomena as determined from space-based instrumentation. While the entire electromagnetic spectrum is covered, the high-energy (X-ray and gamma ray) region is emphasized. Results from ground-based instrumentation (e.g., radio and optical) may be introduced. Prerequisites: PHYS 1022.

ASTR 3183. General Relativity. 3 Credits.

Einstein's general theory of relativity; special theory of relativity, the nature of space and time, the equivalence principle, Riemannian geometry, Einstein's proposal, tests of the theory, Schwarzschild and Kerr solutions, Hawking radiation, and cosmological models. Prerequisites: MATH 3342 and PHYS 2023.

ASTR 4195. Undergraduate Research in Astrophysics. 3 Credits.

Research on problems in astrophysics approved by the faculty. May be repeated once for credit.

BIOCHEMISTRY (BIOC)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BIOC 3261. Introductory Medical Biochemistry. 4 Credits.

Introduction to structures of biological macromolecules, enzyme catalysis, cellular bioenergetics, and metabolism. (Same as BISC 3261, CHEM 3165).

BIOC 3262. Biochemistry Laboratory. 2 Credits.

Study of common experimental techniques used in life science laboratories to separate and characterize biological macromolecules. Same as BISC 3262 and CHEM 3262. Laboratory fee. Prerequisites: BIOC 3261 or BISC 3261.

BIOC 3263. Special Topics in Biochemistry. 2 Credits.

In-depth discussion of current biochemically relevant topics, including cancer and HIV chemotherapy, immune response, photosynthesis, signal transduction, hormone regulation and nutrition. Prerequisites: BIOC 3261 or BISC 3261. (Same as BISC 3263).

BIOC 3263W. Special Topics in Biochemistry. 2 Credits.

Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

BIOC 3560. Diet, Health, and Longevity. 3 Credits.

Biochemical and molecular explanations of how calorie intake affects health; scientific principles of dieting. Prerequisites: BISC 1005 or BIOC 3261.

BIOC 3564. Lipid Biotechnology. 0-2 Credits.

Same as BISC 3564 and CHEM 3564. Laboratory fee. Prerequisites: BIOC 3261 or BISC 3261.

BIOC 3820. Bioinformatics and Computational Biochemistry. 2 Credits.

How biomedical researchers integrate information from molecular biology resources for analysis and testing of hypotheses. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and STAT 1127.

BIOC 3821. Projects in Biomedical Informatics. 1-2 Credits.

.

BIOC 4195. Undergraduate Research. 1 Credit.

Research conducted under a mentor who is a member of the department. May be repeated for credit (only 1 credit may count toward the minor). Permission of the instructor required prior to enrollment.

BIOC 4701. Science and Medicine. 0-4 Credits.

A broad overview of several biomedical discoveries made in the twentieth century and the often profound influence they have had on medical technology and on new directions in science and medicine, science administration, politics, ethics, and philosophy.

BIOC 6201. Medical Biochemistry. 7 Credits.

Required for medical students. Lecture and laboratory; emphasis on basic principles and their relation to medicine.

BIOC 6209. Research Elective in Medical Biochemistry. 1-12 Credits.

BIOC 6211. Biochemistry-Health Science Students. 3,4 Credits.

Basic concepts of biochemistry and their relation to health sciences.

BIOC 6221. Proteins, Pathways, and Human Health. 4 Credits.

A comprehensive course in general biochemistry for graduate students in biomedical sciences. Prerequisites: CHEM 2152 and CHEM 2154.

BIOC 6222. Biochemical Genetics and Medicine. 3 Credits.

Continuation of BIOC 6221. A comprehensive course in general biochemistry for graduate students in biomedical sciences. Prerequisites: CHEM 2152 and CHEM 2154.

BIOC 6223. Bioinformatics. 2 Credits.

The application of bioinformatics concepts and methods through the use of molecular biology databases and tools, covering molecular evolution, and protein sequence, structural, functional analysis. Recommended background: Prior completion of an undergraduate course in biochemistry.

BIOC 6224. Molecular Biology and Protein Methods. 3 Credits.

Common laboratory techniques used in life science laboratories to separate and characterize proteins, including chromatography, gel electrophoresis, immunoassays, spectroscopy, and centrifugation. Corequisite: BIOC 6221. Laboratory fee.

BIOC 6227. Biochemistry Seminar. 1 Credit.

Current literature in biochemistry. May be repeated for credit. Restricted to graduate students in the biochemistry and molecular medicine program.

BIOC 6234. Biochemical and Bioinformatic Approaches to Protein Structure and Function. 3 Credits.

Molecular biological, biophysical, chemical, and bioinformatic approaches to understanding protein structure and function. Protein folding, interactions, and ligand binding.

BIOC 6235. Seminar in Genomics, Proteomics, and Bioinformatics. 1 Credit.

BIOC 6236. Medical Genomics. 2 Credits.

The structure and function of genes and genomes; genomic theories, methods, and data analysis including bioinformatics and database mining. BIOC 6221 and BIOC 6222 may be taken as corequisites. Prerequisites: BIOC 6221 and BIOC 6222.

BIOC 6237. Proteomics and Biomarkers. 2 Credits.

Experimental proteomics, protein/proteome analysis, bioinformatics of proteomics, systems biology and structural genomics. Prerequisite: BIOC 6236.

BIOC 6238. Experimental Genomics Lab. 3 Credits.

Research applications of knowledge in genomics and proteomics. Prerequisite: BIOC 6236. Laboratory fee.

BIOC 6240. Next Generation Sequencing. 2 Credits.**BIOC 6242. Bioscience Big Data Statistics. 2 Credits.**

Modern bioscience big data from generation to analysis and interpretation; data structures and data types and objects; and challenges in big data storage, access, and computation.

BIOC 6250. Molecular Biology. 3 Credits.

Content includes the organization and replication of genetic material, transcriptional and translational machinery, regulation of eukaryotic gene expression, and other special topics. BIOC 6221 and BIOC 6222 may be taken as corequisites. Prerequisites: BIOC 6221 and BIOC 6222.

BIOC 6252. Current Laboratory Methods in Molecular Biology. 3 Credits.

Corequisite: BIOC 6221. Laboratory fee.

BIOC 6254. Fundamentals of Molecular Biology. 3 Credits.

An intermediate-level molecular biology survey course. Prerequisite: BIOC 6221.

BIOC 6260. Analytic Methods for Lipids and Carbohydrates. 3 Credits.

Basic techniques in the biotechnology of lipids and carbohydrates. Prerequisite: BIOC 6221.

BIOC 6262. Genes, Diets, and Aging. 3 Credits.**BIOC 6264. Membrane-Associated Complex Lipids. 1 Credit.****BIOC 6281. Topics. 1,2 Credit.**

Directed readings in biochemistry, molecular biology, and genetics. May be repeated for credit. Restricted to graduate students in the biochemistry and molecular medicine program.

BIOC 6290. Extramural Biochemistry Elective. 1-12 Credits.**BIOC 6291. Extramural Biochemistry Elective. 1-12 Credits.****BIOC 6295. Research. 1-12 Credits.**

Participation in a project under investigation or in a field suggested by the student and approved by the staff. May be repeated for credit. Laboratory fee.

BIOC 6298. Advanced Reading. 1-6 Credits.

Advanced reading in biochemistry. Restricted to students in the MS in molecular biochemistry and bioinformatics program.

BIOC 6998. Thesis Research. 3 Credits.**BIOC 6999. Thesis Research. 3 Credits.****BIOC 8225. Metabolism. 4 Credits.**

Metabolic pathways and integration of metabolic processes. Limited to PhD students in the Institute for Biomedical Sciences.

BIOC 8231. Biochemical Basis of Human Diseases. 3 Credits.

Biochemical perspectives on disorders involving metabolic alterations, immunological dysregulation, problems of environmental/toxicological etiology, genetic/epigenetic dysfunction, neglected tropical diseases. Prerequisites: BMSC 8210 and BMSC 8212.

BIOC 8232. Molecular and Cellular Signaling. 3 Credits.**BIOC 8501. Issues in Clinical Nutrition. 3 Credits.****BIOC 8502. Molecular Biology of Oncogenes. 1-12 Credits.****BIOC 8503. Readings in Immunology. 3 Credits.****BIOC 8800. Summer Remedial Biochemistry. 8 Credits.**

BIOLOGICAL SCIENCES (BISC)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BISC 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details.

BISC 1001. Departmental Seminar. 0 Credits.

BISC 1005. The Biology of Nutrition and Health. 3 Credits.

A study of the human body and food-related health issues through the examination of the nutritional needs of the human body, digestion, genetics, and life experiences/exposures. Laboratory fee. Credit cannot be earned for both BISC 1005 and BISC 1007.

BISC 1006. The Ecology and Evolution of Organisms. 3 Credits.

Introduction to ecology and evolution, including human being's impact on other plants and animals, and an overview of Earth's biodiversity. For non-majors.

BISC 1007. Food, Nutrition, and Service. 3 Credits.

A study of biology and nutrition that uses service learning to reinforce course concepts. Topics include the need for humans to consume other organisms, processing of consumed nutrients, unexpected effects of nutritional consumption, and measures to improve nutrition. Credit cannot be earned for both BISC 1007 and BISC 1005.

BISC 1008. Understanding Organisms through Service Learning. 3 Credits.

The evolution of life on earth; the value of other organisms, their role in our world, and how humans can cause harm to this infrastructure. Students work with a community partner to perform activities that assist the partner while reinforcing course concepts.

BISC 1111. Introductory Biology: Cells and Molecules. 4 Credits.

Nutrition and metabolism, cellular and developmental biology, genetics, and molecular biology of plants and animals. BISC 1111 is equivalent to the combination of BISC 1115 and its lab component BISC 1125.

BISC 1112. Introductory Biology: The Biology of Organisms. 4 Credits.

Concepts and methods in the study of whole organisms. Evolutionary theory; population biology; diversity of plants, animals, fungi, and microorganisms; ecology and behavior; and animal structure and function. BISC 1112 is equivalent to the combination of BISC 1116 and its lab component BISC 1126.

BISC 1115. Introductory Biology: Cells and Molecules. 3 Credits.

Structures and functional interactions of biomolecules and cells in microorganisms, animals, and plants. BISC 1115 and its lab component, BISC 1125, together are equivalent to BISC 1111.

BISC 1116. Introductory Biology: The Biology of Organisms. 3 Credits.

Concepts and methods in the study of whole organisms; evolutionary theory; population biology; diversity of plants, animals, fungi, and microorganisms; ecology and behavior; and animal structure and function. BISC 1116 and its lab component, BISC 1126, together are equivalent to BISC 1112.

BISC 1120. Laboratory Introduction to Biomolecular Research. 2 Credits.

Research methods in the study of proteins and DNA; focus on preparation for working with faculty members on their research. Permission of the instructor required prior to enrollment. BISC 1111 or BISC 1115 may be taken as a corequisite. Equivalent to BISC 1125, HONR 1120. Prerequisites: BISC 1111 or BISC 1115.

BISC 1125. Introduction to Cells and Molecules Laboratory. 1 Credit.

Laboratory associated with BISC 1115. Experimental methods in the study of cells and molecules, proteins, enzymes, DNA, and molecular genetics. BISC 1115 and BISC 1125 together are equivalent to BISC 1111. Prerequisite: BISC 1115.

BISC 1126. Introduction to Organisms Laboratory. 1 Credit.

Laboratory associated with BISC 1116. Experimental methods in the study of whole organisms; population biology; diversity of plants, animals, fungi, and microorganisms; ecology and behavior; and animal structure and function. BISC 1116 and BISC 1126 together are equivalent to BISC 1112. Prerequisite: BISC 1116.

BISC 2000. Sophomore Colloquium. 3 Credits.

Topics in biological diversity from the perspective of species and within the conceptual framework of evolutionary biology; the explanatory power, simplicity, and grandeur of evolution and its products; how questions and hypotheses are empirically addressed. Restricted to sophomores with permission of the department. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126.

BISC 2010. Global Change Biology. 3 Credits.

The impacts and implications of global climate change on biological systems; affected biological processes and their basic underlying physical and chemical principles. Focus on organismal physiological adaptations in aquatic and terrestrial ecosystems and ecological consequences. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126.

BISC 2202. Cell Biology. 3 Credits.

Structure and function of biological molecules and cellular organelles; cellular interactions. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126; and CHEM 2151.

BISC 2207. Genetics. 3 Credits.

Introduction to genetics, with emphasis on the integration of transmission of genetic traits and the molecular basis of gene action. Also includes cytogenetics, gene regulation, and examples of current applications of genetic technology. Prerequisites: BISC 1111 or BISC 1115, BISC 1125, and BISC 1112 or BISC 1116 and BISC 1126.

BISC 2208. Genetics Laboratory. 1 Credit.

Study of genetic principles and genetic and molecular techniques in *Drosophila* and *E. coli*. Benchwork and comparative genomics using bioinformatics. Prior or concurrent enrollment in BISC 2207 required. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126.

BISC 2213. Biology of Cancer. 3 Credits.

Cancer is a complex category of diseases caused in large part by genetic or genomic, transcriptomic, and epigenomics alterations leading to abnormal cell proliferation. This course will provide a basic overview of cancer biology including cellular and molecular basis of cancer, cancer development and progression as well as a brief overview of cancer diagnostics and therapy. Prerequisites: BISC 2202 or BISC 2207.

BISC 2214. Developmental Biology. 3 Credits.

The molecular processes and cellular phenomena that result in the formation of organized tissues and functional organisms; formation of early body plan, cell type determination, organogenesis, morphogenesis, stem cells, cloning, and issues in human development. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; BISC 1112 or BISC 1116 and BISC 1126; and BISC 2202 or BISC 2207 or BISC 2213.

BISC 2215. Genome Editing Laboratory. 1 Credit.

Practical training in genome editing in, from sequence design to molecular biology, generation of edited animals, and phenotypic analysis. Students undertake individual research projects involving CRISPR. In addition to the stated prerequisites, prior or concurrent enrollment in BISC 2214 or permission of instructor is required. Laboratory fee. Prerequisites: BISC 1115 and BISC 1125; BISC 1116 and BISC 1126.

BISC 2220. Developmental Neurobiology. 3 Credits.

The molecular mechanisms that guide neural development: events surrounding the birth of neurons, how specific neurons are determined, how neurons find the correct targets, how cell death guides proper neural development, and how synapses are formed and maintained. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126; or permission of the instructor.

BISC 2305. Plant Biology. 3 Credits.

Plant metabolism and molecular biology: photosynthesis, nitrogen metabolism, membrane transport, mechanisms of hormone action, protein targeting, biotechnology, and current research topics. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126; CHEM 1111 and CHEM 1112; or permission of the instructor.

BISC 2320. Neural Circuits and Behavior. 3 Credits.

The cellular and molecular properties of neural circuits that form the basis of behavior. Circuit properties and behaviors across a variety of invertebrate and vertebrate taxa. Individual neuronal units, the organizational principles and emergent properties of neural circuits, and how these neuronal ensembles influence behavior. Instructor's permission may be substituted for prerequisites. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126, BISC 2207.

BISC 2322. Human Physiology. 3 Credits.

Introduction to the function of organ systems of the human body. Prerequisites: CHEM 1111 and CHEM 1112; and BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126.

BISC 2331. Insect Biology. 3 Credits.

Overview of the class *Insecta*, focusing on insect external and internal morphology, classification, ecology/behavior, collection, and specimen preparation. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126.

BISC 2332. Comparative Vertebrate Anatomy. 4 Credits.

BISC 2332 provides a thorough introduction into the study of functional vertebrate anatomy. Lectures combined with intensive laboratory assignments will introduce students to the structure and function of most vertebrate organ systems. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126; or permission of the instructor.

BISC 2333. Evolution and Extinction of Dinosaurs. 3 Credits.

The 165-million-year history of dinosaurs; different groups and their evolution, end-Cretaceous extinction event, the origin of birds, and the biology of the group. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125, and BISC 1112 or BISC 1116 and BISC 1126; or GEOL 1001 and GEOL 1002; or GEOL 1002 and GEOL 1005.

BISC 2334W. Integrative Biology of Fishes. 3 Credits.

Concepts in anatomy, biomechanics, physiology, developmental biology, biomechanics and hydrodynamics, adaptive radiation, evolutionary biology, and ecology using fish as model organisms. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: BISC 1111 or BISC 1115 and 1125; and BISC 1112 or BISC 1116 and BISC 1126.

BISC 2335. Insect Biology Lab. 1 Credit.

An overview of insects, with an emphasis on ecology, behavior, economic importance, and the key adaptations that characterize the evolution of this diverse group. This lab teaches basic internal and external anatomy, field collection methods, insect identification, and discussion of the primary literature. BISC 2331 Insect Biology must be taken either prior or concurrently with BISC 2335 Insect Biology Lab. Laboratory fee. Prerequisite: BISC 2331.

BISC 2337. Introductory Microbiology. 4 Credits.

Lecture (2 hours), laboratory (4 hours). Survey of the major groups of microorganisms with emphasis on structure, physiology, ecology, evolution, pathogenesis, and biotechnology. Prerequisites: CHEM 1111 and CHEM 1112; BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126.

BISC 2337W. Introductory Microbiology. 4 Credits.

Lecture (2 hours), laboratory (4 hours). Survey of the major groups of microorganisms with emphasis on structure, physiology, ecology, pathogenesis, and biotechnology. Antibiotic resistance and emerging diseases. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Laboratory fee. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126; and CHEM 1111 and CHEM 1112 or permission of the instructor.

BISC 2339. Parasitology. 4 Credits.

Introduction to animal parasitology; survey of parasitic types from protozoa through arthropods. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126.

BISC 2401. Biodiversity in A Changing World. 3 Credits.

Topics on biological diversity from the perspective of species and within the conceptual framework of evolutionary biology. The explanatory power, simplicity, and grandeur of evolution and its products. Consideration of how questions and hypotheses are empirically addressed. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125 & BISC 1112 or BISC 1116 and BISC 1126.

BISC 2450. Organic Evolution. 3 Credits.

Synthetic theory of organic evolution, including population biology, speciation, adaptation, macroevolution, systematics, biogeography, and the geologic record. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126.

BISC 2451. History of Life. 3 Credits.

Overview of life through time; the origin of life, evolution of major groups of organisms, and important methodologies used in paleontology. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126; or permission of the instructor. (Same as GEOL 2151).

BISC 2452. Animal Behavior. 3 Credits.

An evolutionary approach to the study of animal behavior, emphasizing behavioral ecology and sociobiology. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126; or permission of the instructor.

BISC 2453. Animal Behavior Lab. 1 Credit.

Methods used in the study of animal behavior; observation, basic statistical analysis, and experimental design; review and evaluation research materials. Prerequisites: BISC or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126. Recommended background: Prior or concurrent enrollment in BISC 2452.

BISC 2454. General Ecology. 3 Credits.

The core concepts of the field of ecology across different hierarchical scales of ecological systems. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126; or permission of the instructor.

BISC 2456. General Ecology Laboratory. 1 Credit.

Practical exercises and field-trips are used to explore the core concepts of the field of ecology across different hierarchical scales of ecological systems. Laboratory fee. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126; and BISC 2454 taken previously or concurrently.

BISC 2581. Human Gross Anatomy. 3 Credits.

The structural organization of the human body and how it relates to regional and systems-based functions. Emphasis on the macroscopic structure of the body. Prerequisites: BISC 1111 or BISC 1115 and BISC 1112 or BISC 1125; and BISC 1116 and BISC 1126 except by permission of the instructor. (Same as ANAT 2181).

BISC 2583. Biology of Proteins. 3 Credits.

About half of the proteins in the human genome have unknown functions. Are some related to cancers, muscle degeneration, infectious disease? How can evolutionary relationships among proteins from other organisms help us discover functions of unknown proteins? Laboratory fee. Prerequisite: AP or IB Biology or Chemistry.

BISC 2584. Introduction to Bioinformatics. 3 Credits.

The use of computational techniques in molecular biology, genetics, and evolution; techniques and software for database searching, sequence alignment, gene finding, phylogenetics, genomics, and proteomics. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126. (Same as CSCI 3571).

BISC 3122. Human Physiology. 3 Credits.

Introduction to the function of organ systems of the body. Prerequisites: CHEM 1111 and CHEM 1112; and BISC 2202 or BISC 2207.

BISC 3123. Human Physiology Lab. 1 Credit.

Basic physiology laboratory techniques; emphasis on the experimental study of homeostatic mechanisms in humans. Laboratory fee. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126.

BISC 3165. Biochemistry I. 3 Credits.

Introduction to the chemistry of living cells; structure and function of proteins, lipids, carbohydrates, and nucleic acids; enzyme structure, mechanism, and regulation. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126, CHEM 2151 and CHEM 2152; course equivalents may be substituted for BISC 1115 and 1125; and BISC 1116 and BISC 1126 at the discretion of the instructor. (Same as CHEM 3165).

BISC 3166. Biochemistry II. 3 Credits.**BISC 3208. Molecular Biology Laboratory. 1 Credit.**

Techniques in molecular biology; traditional and modern methods in recombinant DNA technology, gene and protein characterization methods. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; BISC 1112 or BISC 1116 and BISC 1126; and CHEM 1111 and CHEM 1112.

BISC 3209. Molecular Biology. 3 Credits.

Theories and concepts in molecular biology; biosynthesis and structure of DNA, RNA, and proteins, relationships among gene function and expression; transcription and translation; regulation of gene expression in prokaryotes and eukaryotes; theory of traditional and modern methods in recombinant DNA technology, gene and protein characterization methods. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; BISC 1112 or BISC 1116 and BISC 1126; and CHEM 1111 and CHEM 1112.

BISC 3210. Nanobiotechnology. 3 Credits.

Theory and application of nanotechnologies in biology and medicine. Strategies for studying the organization, function, and complexity of biological systems at nanometer scale. Several areas of research are covered, including high-resolution cellular and molecular imaging, spectroscopy, and optical tweezers. Prerequisites: BISC 2202 or BISC 3261.

BISC 3211. Nanobiotechnology Laboratory. 1 Credit.

Modern instrumental techniques for analyzing biological structures and processes at the nanometer level; combining nano- and conventional techniques to answer scientific questions. Students formulate, design, and implement a research project. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126.

BISC 3212. Immunology. 3 Credits.

Introduction to mammalian immunology covering the progression of immune responses from initial pathogen contact to immune memory. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; BISC 1112 or BISC 1116 and BISC 1126; BISC 2202 or BISC 2207; and CHEM 1111 and CHEM 1112. Recommended background: prior completion of CHEM 2151 and CHEM 2153.

BISC 3215. Genome Editing Laboratory. 1 Credit.

Practical training in genome editing in, from sequence design to molecular biology, generation of edited animals, and phenotypic analysis. Students undertake individual research projects involving CRISPR. In addition to the stated prerequisites, prior or concurrent enrollment in BISC 2214 or BISC 3214 is required. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; BISC 1112 or BISC 1116 and BISC 1126; and BISC 2202 or BISC 2207.

BISC 3261. Introductory Medical Biochemistry. 4 Credits.

Introduction to structures of biological macromolecules, enzyme catalysis, cellular bioenergetics, and metabolism. Prerequisites: CHEM 2151 and CHEM 2152. (Same as BIOC 3261, CHEM 3165).

BISC 3262. Biochemistry Laboratory. 2 Credits.

Study of common experimental techniques used in life science laboratories to separate and characterize biological macromolecules. Laboratory fee. Prerequisites: BISC 1115 and BISC 1125; BISC 1116 and BISC 1126; and BISC 3261.

BISC 3263. Special Topics in Biochemistry. 2 Credits.

In-depth discussion of current biochemically relevant topics, including cancer and HIV chemotherapy, immune response, photosynthesis, signal transduction, hormone regulation, and nutrition. Topics vary by semester. May be repeated for credits provided topic differs. Consult the Schedule of Classes for more details. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; BISC 1112 or BISC 1116 and BISC 1126; and BISC 3261.

BISC 3320. Human Neurobiology. 3 Credits.

Introduction to the function of the human nervous system, gross and microscopic structure, and neurophysiology of the brain, spinal cord, and nerves; alterations caused by disease or injury. Prerequisites: BISC 2202 or BISC 3261.

BISC 3450. Evolutionary Medicine. 3 Credits.

The application of evolutionary principles, including natural selection, adaptation, phylogenetics, and evolutionary constraints, to understanding health, disease, and the biology of disease-causing organisms (viruses, bacteria, and parasites). How natural selection and phylogeny influence pathogen-host interactions, human genetics, immunology, development, cancer, and diseases of senescence. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126. Recommended background: BISC 2207 and BISC 2450.

BISC 3450W. Evolutionary Medicine. 3 Credits.

The application of evolutionary principles, including natural selection, adaptation, phylogenetics, and evolutionary constraints, to understanding health, disease, and the biology of disease-causing organisms (viruses, bacteria, and parasites). How natural selection and phylogeny influence pathogen-host interactions, human genetics, immunology, development, cancer, and diseases of senescence. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126. Recommended background: BISC 2207 and BISC 2450. (Same as BISC 3450).

BISC 3453. Plant Comparative Structure and Function Lab. 1 Credit.

Core concepts and techniques in comparative plant structure and function; how plants' construction shapes their physiological function in different ecological settings; evolutionary relationships among plants and how these relations shape responses to their environment. Concurrent enrollment in BISC 3458 is recommended. Laboratory fee. Prerequisite: BISC 2454.

BISC 3454. Marine Ecology. 3 Credits.

Abiotic and biotic factors in marine environments in general and ecological theory behind how they shape communities, biomes, and patterns in marine biodiversity; major marine habitats and the important organisms, physical environment, and major interactions in each; threats to marine environments and effective conservation strategies.

BISC 3455. Marine Ecology Laboratory. 1 Credit.

Study of marine ecology through experiential learning and an introduction to ecological research in the marine environment and using large datasets collected by marine scientists. By visiting marine ecosystems, students learn about marine resource use and conservation strategies in the coastal zone.

BISC 3458. Plant Comparative Structure and Function. 3 Credits.

Fundamental principles of how organisms are built, investigating trade-offs and coordination in design, how variation in structure influences physiological function in different ecological settings, and how relations among plants shape structure and function and responses to ecological gradients. Prerequisites: BISC 1115 and BISC 1125; BISC 1116 and BISC 1126; or permission of instructor.

BISC 3459. Field Biology. 4 Credits.

Overview of the approaches and techniques used by contemporary field biologists for cataloging, quantifying, and comparing patterns of biodiversity across plants, animals, and fungi at multiple spatial and temporal scales. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126. Recommended background: BISC 2454.

BISC 3460. Conservation Biology. 3 Credits.

Theory and practice of conserving biological diversity. Ecological patterns of biodiversity, biology of small populations, and conservation case studies. Use of ecological modeling software to explore various topics. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126.

BISC 3460W. Conservation Biology. 3 Credits.

Theory and practice of conserving biological diversity. Ecological patterns of biodiversity, biology of small populations, and conservation case studies. Use of ecological modeling software to explore various topics. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126.

BISC 3461. Plant-Animal Interactions. 3 Credits.

Review of the major ecological and evolutionary interactions that occur between plants and animals in natural and managed ecosystems. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126; or permission of the instructor. Recommended background: BISC 2450 or BISC 2454.

BISC 3462. Plant-Animal Interactions Laboratory. 1 Credit.

Field and laboratory study of temperate interactions between plants and animals. Group projects focus on original data collection, analysis, and interpretation. The stated prerequisites may be taken as corequisites; consult the instructor. Laboratory fee. Prerequisites: BISC 1115 and BISC 1125; BISC 1116 and BISC 1126; and BISC 3461.

BISC 3464. Ecology and Evolution of Societies. 3 Credits.

Study of broadly important ecological and evolutionary patterns and processes exemplified by organisms that have undergone the major evolutionary transition to living in societies. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126. Recommended background: Prior completion of BISC 2454.

BISC 3565. Plant Ecology and Evolution. 3 Credits.

How plants are built; how this construction shapes their physiological function in different ecological settings; how plants are related revolutionarily, and how these relations shape their structure, function, and responses to their environment. Prior completion of BISC 2454 is recommended. Prerequisites: BISC 1115 and BISC 1125; BISC 1116 and BISC 1126; or permission of the instructor.

BISC 3584. Introduction to Bioinformatics. 3 Credits.

The use of computational techniques in molecular biology, genetics, and evolution; techniques and software for database searching, sequence alignment, gene finding, phylogenetics, genomics, and proteomics. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126.

BISC 4132. Advanced Cellular-Molecular Biology. 3 Credits.

Advanced cell biology with emphasis on biochemistry and molecular biology; illustrations are drawn from different organisms and human biology. For upper-level undergraduates and beginning graduate students. Permission of the instructor required prior to enrollment. Prerequisite: BISC 3209. Recommended background: Six credits in the Cellular and Molecular category.

BISC 4171. Undergraduate Research. 1-12 Credits.

Admission by permission of the staff member concerned. May be repeated for credit. Laboratory fee. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126 except by permission of the instructor; 16 credits in biological science courses.

BISC 4171W. Undergraduate Research. 1-12 Credits.

Admission by permission of the staff member concerned. May be repeated for credit. Laboratory fee. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126; and CHEM 2152 except by permission of the instructor; 16 credits in biological science courses.

BISC 4172. Independent Study. 1-3 Credits.

Prescribed reading list and consultations with staff advisor culminating in a written report and/or examination. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126 and permission of the instructor.

BISC 4180. Undergraduate Research Seminar. 1 Credit.

Preparation for writing in diverse areas of modern biology; development of the skills needed to effectively communicate findings, publish research, and successfully obtain research funding.

BISC 4180W. Undergraduate Research Seminar. 1 Credit.

Preparation for writing in diverse areas of modern biology; development of the skills needed to effectively communicate findings, publish research, and successfully obtain research funding. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

BISC 4212. Virology and Antiviral Immunity. 4 Credits.

Comprehensive overview of the infection, replication, and immune evasion strategies of distinct classes of viruses; hands-on survey into the molecular techniques in virology. Prerequisites: BISC 2202 or BISC 2207 or BISC 3209 or BISC 3212.

BISC 4219. Host-Microbe Interactions. 3 Credits.

Overview of the molecular, genetic, cellular and physiological basis of symbiotic and pathogenic interactions between plants, invertebrate and vertebrate animals with various microbial organisms including bacteria, fungi, viruses as well prokaryotic and eukaryotic parasites. Prerequisites: BISC 2202 and BISC 2337.

BISC 6101. Responsible Research. 1 Credit.

This course provides an introduction to the ethical, social, and legal foundations of scientific practice. It is intended to provide a forum for graduate students and postdocs to discuss almost every aspect of the academic life of a scientist, except specific disciplinary topics that are treated in regular courses. Ensuring ethical conduct is an essential part of basic, applied, and clinical research, especially in the context of competitive, collaborative, and international settings so common nowadays. Students are exposed to case studies typifying complex social, ethical, and legal dilemmas that may arise in the conduct of research.

BISC 6102. Scientific Presentation. 1 Credit.

This course allows students to perfect their Scientific Presentation skills. In this course, students present, in front of peers and faculty, their current research projects and plans for future work leading towards a complete thesis or dissertation. Student presentations are designed to address a general audience of biologists, containing sufficient background information to provide perspective insights into the fundamental questions being asked, and at the same time providing enough detail on technical issues and analytical procedures to allow evaluation of potential outcomes. The class provides a friendly forum for students to collect feedback and comments, to discuss project design, content, and general significance of their research.

BISC 6132. Advanced Cellular-Molecular Biology. 3 Credits.

Advanced cellular biology for upper-level undergraduates and beginning graduate students; emphasis on biochemistry and molecular biology; organisms and human biology with emphasis on oral and written analysis of research literature. Permission of the instructor required prior to enrollment. Restricted to students who have completed 16 credits of 2000-4000 level biology courses, including 6 credits in the cell and molecular category. Prerequisites: Graduate standing or undergraduates with 16 credits of 2000-4000 level biology courses, including 6 credits in the Cell and Molecular category and permission of instructor. Recommended background: 4 to 6 upper level biology courses, including 2 cell and molecular courses.

BISC 6205. Current Topics in Cell Smith, Donaldson, Eleftherianos, Jeremic. 1-2 Credits.

May be repeated for credit. Prerequisite: BISC 2202 or BISC 3209.

BISC 6206. Current Topics in Evolutionary Ecology. 1-2 Credits.

May be repeated for credit.

BISC 6207. Seminar: Current Topics in Systematic Biology. 1-2 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs. Prerequisite: BISC 6210.

BISC 6210. Methods of Study of Evolution. 4 Credits.

A rigorous and up-to-date treatment of the theory and methods of systematics, including phylogenetic inference and its applications in evolutionary biology. Laboratory fee. Prerequisite: BISC 2450 .

BISC 6211. Biogeography and Speciation. 4 Credits.

Survey of methods, techniques, and theory in biogeography. Geological and paleontological aspects of biogeography; large-scale biogeographic patterns; speciation and phylogeography. Prerequisites: BISC 2451 or BISC 2452.

BISC 6212. Virology and Antiviral Immunity. 3 Credits.

Overview of the infection, replication, and immune evasion strategies of distinct classes of viruses, as well the host antiviral immune responses to these pathogens.

BISC 6213. Descriptive Systematics: Documenting Biodiversity. 3 Credits.

Study of those aspects of systematic biology concerned with description and inventory of biodiversity. Prerequisite: BISC 6210.

BISC 6214. The Phylogenetic Basis of Comparative Biology. 3 Credits.

The use of phylogenetic hypotheses to study questions in evolutionary biology and ecology. Prerequisites: BISC 6210 and STAT 1127.

BISC 6215. Vertebrate Phylogeny. 4 Credits.

A survey of vertebrate diversity, emphasizing evolutionary relationships and adaptations of the major groups. Prerequisite: BISC 2450. Recommended background: BISC 2332.

BISC 6216. Morphological Systematics. 3 Credits.

Methods of studying organismal morphology as a means of inferring phylogeny, emphasizing the concept of homology. Prerequisite: BISC 6210.

BISC 6218. Innate Immunity. 3 Credits.

Discussion of innate immune systems in a wide variety of organisms; from sponges to vertebrates plus higher plants. Prerequisite: BISC 3212. Recommended background: BISC 2202, BISC 2207, BISC 3209 and BISC 2330.

BISC 6219. Host-Microbe Interactions. 3 Credits.

Overview of the molecular, genetic, cellular, and physiological basis of symbiotic and pathogenic interactions between plants, invertebrate, and vertebrate animals with various microbial organisms including bacteria, fungi, viruses as well prokaryotic and eukaryotic parasites. Prerequisites: BISC 2202 and BISC 2337.

BISC 6224. Molecular Evolution. 3 Credits.**BISC 6225. Molecular Phylogenetics. 4 Credits.**

Review of molecular phylogenetic methods including data recovery, alignment, weighting, character optimization, and phylogenetic inference methods. Prerequisites: BISC 2207, BISC 2450 and BISC 6210.

BISC 6227. Seminar: Genetics. 3 Credits.

Review of selected topics in genetics, with emphasis on current literature; topics of special interest to participants encouraged. May be repeated for credit. Prerequisite: BISC 2207.

BISC 6228. Population Genetics. 3 Credits.

Origin, maintenance, and possible significance of genetic variation in populations. Selection, genetic drift, and population structure are emphasized. Both theoretical and applied aspects of population genetics are discussed. Same as FORS 6247. Prerequisite: BISC 2207.

BISC 6230. Human Genetics. 3 Credits.

Genetic mechanisms of transmission and expression of human traits, with emphasis on biochemical and cytogenetic aspects. Prerequisite: BISC 2207. Recommended background: Previous coursework in cell biology or cell biochemistry.

BISC 6243. Seminar: Ecology. 3 Credits.

In-depth study of selected topics, including reports on original publications. May be repeated for credit. Prerequisite: BISC 2454.

BISC 6249. Seminar: Developmental Biology. 3 Credits.

Discussion and reports on recent research on the endocrinological, genetic, and biochemical aspects of animal development. Prerequisite: a course in developmental biology or cell biology.

BISC 6251. Evolutionary Developmental Biology. 3 Credits.

Developmental mechanisms involved in the morphological changes that occur during the course of evolution.

BISC 6252. Seminar: Neurobiology. 3 Credits.

Study of current publications in functional neurobiology. May be repeated for credit with instructor's permission.

BISC 6274. Gene Regulation and Genetic Engineering. 3 Credits.

The control of gene expression as illustrated by several prokaryotic and eukaryotic model systems: discussions of recombinant DNA techniques. Prerequisite: BISC 2207.

BISC 6275. Introduction to Recombinant DNA Techniques. 3 Credits.

Lecture, 1 hour; laboratory, 4 hours. Basic techniques of genetic manipulation: cloning of genes, transformation of bacteria, PCR procedures, DNA sequencing, and other techniques. Prerequisite: BISC 2202 or BISC 2207 or BISC 2337 and permission of instructor. Laboratory fee.

BISC 6295. Research. 1-12 Credits.

Investigation of special problems. May be repeated for credit.

BISC 6998. Thesis Research. 3 Credits.**BISC 6999. Thesis Research. 3 Credits.****BISC 8998. Advanced Reading and Research. 1-12 Credits.**

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

BISC 8999. Dissertation Research. 3-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

BIOMEDICAL ENGINEERING (BME)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BME 1010. Introduction to Biomedical Engineering. 1 Credit.

Basic and emerging concepts in electrical, computer, and biomedical engineering. Hands-on experiments and projects. Introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills. (Fall, Every Year).

BME 1020. Introduction to Biomedical Engineering. 2 Credits.

Continuation of BME 1010. Basic and emerging concepts in electrical, computer, and biomedical engineering; practical experiments and projects; introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills. Prerequisite: BME 1010. (Spring, Every Year).

BME 2810. Biomedical Engineering Seminar I. 1 Credit.

BME 2810 and BME 2815 are taken in sequence by students in the biomedical engineering major. Overview of the field of biomedical engineering, including biomechanics, bioinformatics, telemedicine, instrumentation, and medical imaging. Prerequisite: BME 1020. (Fall).

BME 2815. Biomedical Engineering Seminar II. 1 Credit.

BME 2810 and BME 2815 are taken in sequence by students in the biomedical engineering major. Overview of the field of biomedical engineering, including biomechanics, bioinformatics, telemedicine, instrumentation, and medical imaging. (Fall and spring).

BME 2820. Biomedical Engineering Programming I. 3 Credits.

Introduction to Matlab Programming and fundamentals of programming in general with a focus on biomedical engineering problems. Functions, input/output, selection statements, loop statements, string manipulation, and debugging techniques are covered; manipulation of vectors and matrices and the use of vectorized code. (Fall, Every Year).

BME 2825. Biomedical Engineering Programming II. 3 Credits.

Introduction to C Programming and fundamentals of data structures with a focus on biomedical engineering problems; the use of data structures, pointers, and linked lists and discuss concepts such as binary trees and sorting algorithms. Students are expected to understand the basics of programming concepts such as the use of functions, input/output, selection statements, loop statements, string manipulation, and debugging techniques are understood, but no prior knowledge of C is required. Prerequisites: BME 2820 or permission of the instructor. (Fall, Every Year).

BME 3820. Principles and Practice of Biomedical Engineering. 4 Credits.

Introduction to engineering principles applicable to medicine; medical measurements for clinical use and research; anatomy and physiology of the human body from system and cellular approaches. Principles of biomedical engineering are reinforced by determining and analyzing physiological measurements in laboratory exercises. Prerequisites: ECE 2110 and APSC 2113. (Fall).

BME 3907. Special Topics in Biomedical Engineering. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. See department for more details. (Fall, spring, and summer, Every Year).

BME 3910. Capstone Design Preparation. 1 Credit.

Elements of project design; formulation of project ideas. Prerequisites: BME 2810 and BME 2815. (Fall, Every Year).

BME 3915W. Biomedical Engineering Capstone Project Lab I. 1 Credit.

BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: BME 3910. (Same as ECE 3915W) (Spring, Every Year).

BME 4480. Bioelectricity. 3 Credits.

Origin and applications of bioelectric phenomena; engineering tools for excitable cells, tissues and organs; biophysical and equivalent electrical engineering analysis; heart and brain abnormalities from a quantitative perspective. (Spring, Every Year).

BME 4488. Cell and Molecular Imaging. 3 Credits.

Basics of optics, microscopy, spectroscopy, and fluorescence in the context of imaging at the cellular and molecular level; advanced techniques for probing protein interactions and live cell functions; image processing algorithms and principles of scientific visualization. Restricted to juniors and seniors. Prerequisites: BME 2825 and ECE 3220. (Same as BME 6488) (Fall, Every Year).

BME 4489. Socially Assistive Robotics and Interactive Learning. 3 Credits.

Application of advanced robotic solutions to promoting human lives through social, emotional, and interactive therapies in areas such as social and behavioral therapies for children with autism spectrum disorder (ASD) and emotional and rehabilitation assistance in elder care. Prerequisite: BME 2825. Recommended background: Experience with computer programming. (Fall, Every Year).

BME 4820. Anatomy and Physiology for Engineers. 3 Credits.

Human anatomy and physiology from an engineering viewpoint. Analysis of functions of major physiological systems. Biopotentials, mechanics, gas exchange, chemical balance, electrical and chemical signaling, nervous control, voluntary and reflex factors. (Same as BME 6820) (Fall).

BME 4825. Biomedical Properties Laboratory. 1 Credit.

Introduction to biophysical concepts in a laboratory setting; emphasis on biomedical engineering. (Spring).

BME 4830. Introduction to Medical Imaging Methods. 3 Credits.

Application of linear systems analysis methods to medical imaging techniques; basic properties of imaging systems; physics and instrumentation behind modalities; advantages, disadvantages, and primary applications of modalities. Prerequisites: BME 3820 and ECE 3220. (Spring, Every Year).

BME 4835. Introduction to Assistive Robotics. 3 Credits.

Application of advanced robotic solutions to promoting human lives through social, emotional, and interactive therapies in areas such as social and behavioral therapies for children with autism spectrum disorder (ASD) and emotional and rehabilitation assistance in elder care. Prerequisites: BME 2825 and ECE 3220. (Spring, Every Year).

BME 4920W. Biomedical Engineering Capstone Project Lab II. 3 Credits.

BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: BME 3915W. (Same as ECE 4920W) (Fall, Every Year).

BME 4925W. Biomedical Engineering Capstone Project Lab III. 3 Credits.

BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Spring, Every Year).

BME 4990. Research. 1-3 Credits.

Applied research and experimentation projects, as arranged. Restricted to juniors and seniors. (Fall and spring, Every Year).

BME 6045. Special Topics. 1-3 Credits.

Topics to be announced in the Schedule of Classes. (Fall and spring).

BME 6050. Research. 1-12 Credits.

Applied research and experimentation projects, as arranged. May be repeated for credit. (Spring, Every Year).

BME 6065. Colloquium. 3 Credits.

Seminars and meetings featuring visiting scholars in biomedical engineering. Topics vary. See department for details. Restricted to graduate students in biomedical engineering. (Fall and spring, Every Year).

BME 6480. Bioelectricity. 3 Credits.

Origin and applications of bioelectric phenomena; engineering tools for excitable cells, tissues and organs; biophysical and equivalent electrical engineering analysis; heart and brain abnormalities from a quantitative perspective. Restricted to graduate students. (Spring, Every Year).

BME 6481. Regulatory Law for Medical Devices. 3 Credits.

An introduction to legal issues pertinent to medical device regulation; device classification, general and special controls, quality system regulation, 510(k) submissions, premarket approval applications (PMAs), clinical trials, investigational device exemptions (IDEs) and medical device reporting (MDR), recalls, labeling and advertising, enforcement, and emerging legal issues. Pharmaceutical regulation. (Fall).

BME 6482. Medical Measurements. 3 Credits.

Theory of measurements in biological areas and techniques for electronic measurements on biological specimens. Experiments in acquisition, processing, and measurement of physiological signals, ECG, EEG, and EMG. (Fall).

BME 6483. Medical Instrumentation Design. 3 Credits.

The medical device design process and many of its key aspects, including needs assessment, regulatory processes and concerns, intellectual property, patient safety, and market analysis. Prerequisites: BME 6482. (Spring).

BME 6484. Biomedical Signal Analysis. 3 Credits.

Origin, acquisition, and analysis of physiological signals. Deterministic and probabilistic modeling; fitting models; sequences and time series. Feature extraction from EEG and ECG; Fourier analysis and filtering; modeling. Noise and artifact removal and signal compensation. Prerequisites: BME 6482. (Spring).

BME 6485. Medical Imaging I. 3 Credits.

Principles of projection radiography, fluoroscopy, tomography, ultrasound and nuclear sources; biomagnetic imaging. Source and object; recorder resolution and noise; scatter and attenuation. Ultrasound techniques and instrumentation, including physics of ultrasound, transducers, ultrasound imaging, hemodynamics, Doppler techniques. Prerequisite: BME 4830. (Fall).

BME 6486. Clinical Medicine for Engineers. 3 Credits.

Overview of clinical medicine with emphasis on those areas most affected by engineering and technology. Prerequisites: BME 6482. (Spring, even years).

BME 6487. Rehabilitation Medicine Engineering. 3 Credits.

Cross-sectional view of those areas of medicine most involved with the treatment of handicapped individuals; application of engineering theory and techniques to the rehabilitation of handicapped individuals; solutions to major problem areas and specific problems. Prerequisite: BME 6482. (Spring, Every Year).

BME 6488. Cell and Molecular Imaging. 3 Credits.

Basics of optics, microscopy, spectroscopy, and fluorescence in the context of imaging at the cellular and molecular level; advanced techniques for probing protein interactions and live cell functions; image processing algorithms and principles of scientific visualization. Students taking this course for graduate credit complete additional work. Restricted to graduate students. Recommended background: Computer Programming. (Fall, Every Year).

BME 6489. Socially Assistive Robotics and Interactive Learning. 3 Credits.

Application of advanced robotic solutions to promoting human lives through social, emotional, and interactive therapies in areas such as social and behavioral therapies for children with autism spectrum disorder (ASD) and emotional and rehabilitation assistance in elder care. Restricted to graduate students. Recommended background: Experience with computer programming. (Fall, Every Year).

BME 6820. Anatomy and Physiology for Engineers. 3 Credits.

Human anatomy and physiology from an engineering perspective. Analysis of functions of major physiological systems. Biopotentials, mechanics, gas exchange, chemical balance, electrical and chemical signaling, nervous control, voluntary and reflex factors. (Same as BME 4820) (Fall).

BME 6830. Introduction to Medical Imaging Methods. 3 Credits.

Application of linear systems analysis methods to medical imaging techniques; basic properties of imaging systems; physics and instrumentation behind modalities; advantages, disadvantages, and primary applications of modalities. Recommended background: Knowledge of signal processing. (Same as BME 4830) (Spring, Every Year).

BME 6840. Digital Image Processing. 3 Credits.

Properties of images and visual systems. Image acquisition, sampling, quantization. One- and two-dimensional image transform techniques; enhancement and restoration. Image coding and data compression. Segmentation, representation, boundary and shape, texture, matching. Image understanding. Prerequisites: ECE 6800. (Same as ECE 6840) (Spring, odd years).

BME 6842. Image Engineering. 3 Credits.

Sensor/camera design and analysis as a system. Detection and noise processes underlying the sensing of optical radiation; the engineering and physics of image formation. Topics covered include radiometry/photometry, optics and image formation, device and camera characterization, and image quality metrics and system design trades. Prerequisites: ECE 6010 and ECE 6015. (Same as ECE 6842) (Fall, Every Year).

BME 6850. Pattern Recognition. 3 Credits.

Random vectors, transformations. Hypothesis testing, error probability: bias, variance, and sample size, resampling; sequential methods. Bayes, other linear classifiers. Discriminant functions, support vector machines, maximum-likelihood and parameter estimation, dimensionality reduction. Nonparametric methods; unsupervised learning and clustering; feature selection and ordering. Applications in industry and medicine. Student projects. Learning is reinforced by homework problems and in-class and at-home computer examples. Prerequisite: ECE 6015. (Same as ECE 6850) (Fall, Spring, and Summer, Every Year).

BME 6885. Computer Vision. 3 Credits.

Image processing; edge detection, segmentation, local features, shape and region description in 2D and 3D. Insights from human vision studies. Representation for vision: object models, synthetic images, matching, gaps, algorithms. Interference, production system, syntactic networks. Planning spatial reasoning for robot vision. Prerequisites: BME 6840 or ECE 6840 or equivalent. (Same as ECE 6885) (Fall, Spring, and Summer, Every Year).

BME 6994. Biomedical Engineering Regulatory Practicum I. 3 Credits.

First part of the BME 6994 and BME 6995 practicum sequence. Students work with a practicum mentor to develop either an application for federal funding using the Small Business Innovation Research (SBIR) or Small Business Technology Transfer (STTR) mechanism or a 510(k) submission for U.S. Food and Drug Administration (FDA) medical device review. Independent research combined with the synthesis of technical and regulatory topics covered in the program. Restricted to students who have completed a minimum of 9 credits in the Master of Engineering in Regulatory Biomedical Engineering program. (Fall, spring, and summer, Every Year).

BME 6995. Biomedical Engineering Regulatory Practicum II. 3 Credits.

Second part of the BME 6994 and BME 6995 practicum sequence. Prerequisite: BME 6994. (Fall, spring, and summer, Every Year).

BME 6998. Thesis Research. 3 Credits.

Thesis research. (Fall and spring).

BME 6999. Thesis Research. 3 Credits.

Thesis research. (Fall and spring).

BME 8484. Medical Imaging II: Image Analysis. 3 Credits.

Review of medical imaging modalities; review of image formation and characteristics, both static and dynamic; methods for and evaluation of: medical image reconstruction, enhancement, segmentation, registration, and description; feature extraction and classification; error analysis and the receiver operating characteristic; imaging applications in diagnosis and treatment, including surgery; metrics of truth and quality, with implications for image compression. Prerequisites: BME 6484. (Fall).

BME 8999. Dissertation Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates. (Fall, spring, and summer, Every Year).

BIOMEDICAL SCIENCES (BMSC)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BMSC 6218. Ethics for Translational Sciences. 2 Credits.

Ethical issues relevant to the practice of medicine and biomedical research involving human subjects. Permission of the instructor required prior to enrollment. Recommended background: ANAT 6130, ANAT 6150, ANAT 6160, ANAT 6181 and ANAT 6292.

BMSC 8210. Genes to Cells. 3 Credits.

Molecular aspects of cellular composition, gene expression, and processes; replication and regulation of gene expression, protein and cell structure, and functions.

BMSC 8212. Systems Physiology. 3 Credits.

The physiological bases of organ systems and origins of disease; key concepts and hypotheses in mammalian organ systems essential for pursuing contemporary experimental studies. Prerequisite: BMSC 8210.

BMSC 8215. Lab Rotations. 2 Credits.

For PhD students enrolled in the Institute for Biomedical Sciences. Laboratory training in advanced techniques in biomedical sciences research practices. May be repeated for credit.

BMSC 8216. Scientific Writing, Presentation Skills, and Seminar Planning. 1 Credit.

Instruction in the basic skills of scientific writing, integration with laboratory rotation (BMSC 8215) report writing, and genes to cells (BMSC 8210) blog writing.

BMSC 8217. Ethics and Grant Writing. 1 Credit.

Ethical issues related to the conduct of research, animal use, and human subject participation. The design of a successful grant proposal.

BMSC 8218. Career Options in the Biomedical Sciences. 1 Credit.

Professionals with PhD degrees in the biomedical sciences discuss their positions and provide PhD students with networking opportunities and advice about pursuing various career paths. Career areas covered may include research in varying settings, policy and program planning, grants administration, and biotechnology issues within intellectual property law.

BMSC 8219. Writing the Grant-Style Qualifier. 2 Credits.

Process of proposal development for PhD students. Research proposals in the format of an NIH F31 predoctoral fellowship, including specific aims, research plan, candidate background, biosketch, and training plan sections. Recommended for second-year students preparing for the grant-style qualifying examination. Restricted to students in the PhD programs in biomedical sciences. Prerequisites: BMSC 8210 and BMSC 8212.

BMSC 8230. Molecular Basis of Human Disease. 3 Credits.

Genetic causes of human disease, diagnostic methods of genomic medicine human molecular genetics, established and developing molecular methods, and current research topics and therapies; principles of precision medicine in the context of disease examples including intersex conditions, cancer, neuropsychiatric disorders, and inborn errors of metabolism.

BMSC 8231. Introduction to Genomics, Proteomics, and Bioinformatics. 3 Credits.

Implementation of genomics, proteomics and bioinformatics approaches to biological systems. Students are expected to have completed a prior course in biochemistry and molecular biology. Permission of the instructor is required. Prerequisite: BMSC 8230. Recommended background: Undergraduate degree in biology, chemistry, or a related field.

BMSC 8233. Integrative Bioinformatics. 3 Credits.

Bioinformatics techniques for analysis of macromolecular sequences, structures, gene expression arrays, and proteomics. Systems biology approaches to research problems. Permission of the instructor required prior to enrollment. Prerequisite: BMSC 8230. Recommended background: Undergraduate background in biology, computer sciences, biochemistry, or a related field.

BMSC 8234. Seminar in Systems Biology. 2 Credits.

. Prerequisites: permission of the instructor.

BMSC 8235. Applied Biostatistics for Basic Research. 2 Credits.

The handling and interpretation of large data sets, including biological data and genomic data. Permission of the instructor required prior to enrollment.

BMSC 8998. Readings and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

BMSC 8999. Dissertation Research. 3-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

BIostatISTICS (BIOS)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BIOS 6295. Reading and Research. 1-12 Credits.

May be repeated for credit.

BIOS 6998. Thesis Research. 3 Credits.

BIOS 6999. Thesis Research. 3 Credits.

BIOS 8998. Advanced Reading and Research. 1-12 Credits.

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

BIOS 8999. Dissertation Research. 3-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

BUSINESS ADMINISTRATION (BADM)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BADM 1001. First Year Development Course I. 1 Credit.

First in a two-course sequence of developmental experiences designed to enhance the educational experience and assist with career preparation. Focus on understanding strengths, values, and interests, and managing one's own academic and career goals. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Restricted to first-year students in the School of Business. Prerequisite: n/a.

BADM 1002. First Year Development Course II. 1 Credit.

Continuation of BADM 1001. Students develop as leaders through networking opportunities and community engagement, and perform service within the District of Columbia. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Restricted to first-year students in the School of Business.

BADM 1003. Transfer Student Development Course. 1 Credit.

Designed to help transfer students in the School of Business succeed both in and outside of the classroom. Developmental experiences designed to enhance the educational experience and assist with career preparation. Focus on understanding strengths, values, and interests, managing one's own academic and career goals, and developing leadership skills. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Restricted to transfer students in the School of Business.

BADM 1004. The Age of Globalization. 3 Credits.

A multidisciplinary foundation in the globalization of people, markets, and firms. Required for all School of Business students. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement.

BADM 1900. Special Topics. 1-3 Credits.

BADM 2001. Markets and Politics. 3 Credits.

Economic and political resource allocation; social and political influences on business organizations; contemporary problems and issues. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement.

BADM 2001W. Markets and Politics. 3 Credits.

Economic and political resource allocation; social and political influences on business organizations; contemporary problems and issues. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

BADM 2301. Management Information Systems Technology. 3 Credits.

An introduction to data and information processing concepts and systems viewed from a contemporary management perspective. Emphasis on uses and applications as well as emerging managerial issues with the potential to reshape the form and function of information systems. Lab required. Prerequisites: Basic knowledge of Microsoft Word, Excel, and PowerPoint.

BADM 2301W. Management Information Systems Technology. 3 Credits.

An introduction to data and information processing concepts and systems viewed from a contemporary management perspective. Emphasis on uses and applications as well as emerging managerial issues with the potential to reshape the form and function of information systems. Lab required. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: Basic knowledge of Microsoft Word, Excel, and PowerPoint.

BADM 3001. Career Management Strategy. 1 Credit.

The career development process, including job search strategies and formulation of a career management plan, with practice in producing a resume and interviewing for a position. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Restricted to School of Business students in their junior year.

BADM 3101. Human Resource Management. 3 Credits.

Global and strategic implications of human capital policies and practices, including human resource planning, recruitment, selection, training, development, compensation, and collective bargaining. Prerequisite: PSYC 1001.

BADM 3102. Business and Government Relations. 3 Credits.

Economic and legal environment of business enterprise; social and political influences; contemporary problems and issues.

BADM 3102W. Business/Government Relations. 3 Credits.

Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

BADM 3103. Human Capital in Organizations. 3 Credits.

An introduction and integration of concepts drawn from human resource management and organizational behavior. Application of these concepts to individual, group/team, and organizational scenarios through experiential exercises, cases, and projects. Development of skills in analyzing and evaluating human capital problems and determining appropriate solutions.

BADM 3401. Basic Marketing Management. 3 Credits.

Consumer and organizational buying behavior. Strategic marketing processes (market research, segmentation, targeting, positioning, and relationship-building). Product development and brand management, valuation and pricing, channel and logistics management, integrated marketing communications, e-commerce. Prerequisite: ECON 1012 or HONR 2044.

BADM 3401W. Basic Marketing Management. 3 Credits.

Consumer and organizational buying behavior. Strategic marketing processes (market research, segmentation, targeting, positioning, and relationship-building). Product development and brand management, valuation and pricing, channel and logistics management, integrated marketing communications, e-commerce. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: ECON 1012 or HONR 2044.

BADM 3501. Financial Management and Markets. 3 Credits.

Introduction to financial markets, investment analysis, and financial management. Financial analysis, risk management, working capital management, capital budgeting, financial structure, cost of capital, and dividend policy. Prerequisites: ECON 1012 or HONR 2044; MATH 1221 or MATH 1231 or MATH 1252; and APSC 3115 or DNSC 1001 or STAT 1051 or STAT 1053 or STAT 1111.

BADM 3601. Operations Management. 3 Credits.

Production planning concepts and analytical tools. Designing and managing production processes: facilities, equipment, process control systems. Design issues, demand forecasting, material planning, acquisition techniques. Managing the factory floor: scheduling, total quality management, continuous improvement concepts and methods. Prerequisites: STAT 1051, STAT 1053, STAT 1111 or APSC 3115 or DNSC 1001.

BADM 4101. Business Ethics and the Legal Environment. 3 Credits.

Introduction to practical reasoning at the intersection of business and society. Emphasis on application of ethics frameworks and key dimensions of the legal environment to problems of individual, organizational, and social responsibility in business. Restricted to School of Business students in their junior year. Restricted to School of Business students in their junior year.

BADM 4101W. Business Ethics and the Legal Environment. 3 Credits.

An introduction to practical reasoning at the intersection of business and society. Emphasis on application of ethics frameworks and key dimensions of the legal environment to problems of individual, organizational, and social responsibility in business. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

BADM 4801. Strategy Formulation and Implementation. 3 Credits.

An integrative capstone course to develop skills in diagnosing organizational problems, formulating and selecting strategic alternatives, and recognizing problems inherent in strategy implementation. BA, BAccy, and SEAS business concentration programs. Recommended for juniors and seniors. Prerequisites: ACCY 2001 and BADM 3501 and (BADM 3103 or BADM 3401/3401W, or BADM 4101 or IBUS 3001).

BADM 4900. Special Topics. 0-3 Credits.

Experimental offering; new course topics and teaching methods.

BADM 4900W. Special Topics. 0-3 Credits.

Experimental offering; new course topics and teaching methods. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

BADM 4950. Internship. 0 Credits.

School of Business undergraduates may register for this course when they wish to have an internship recorded on the transcript. The supervisor must verify that the internship has been completed for a minimum of six hours per week. An administrative fee is charged. May be repeated each semester if desired.

BADM 4995. Independent Study. 1-6 Credits.

Assigned topics with interdisciplinary focus. Admission by prior permission of advisor. May be repeated once for credit but in a separate semester.

CANCER BIOLOGY (CANC)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CANC 8214. Cancer Biology Seminar. 1 Credit.

Current and emerging topics with presentations and discussions facilitated by leading experts from GW and outside institution; student-led journal club and oral presentation opportunities. Prerequisites: BMSC 8210 and BMSC 8212.

CANC 8221. The Basic Science of Oncology. 3 Credits.

Epidemiology, genetics, viruses, oncogenes, chemical carcinogenesis, radiation carcinogenesis, tumor growth, metastasis, biochemistry of cancer cells, tumor markers, hormones and cancer, cancer immunobiology, radiotherapy, and chemotherapy and immunotherapy. Prerequisites: BMSC 8210, BMSC 8212 and BMSC 8230.

CANC 8222. Molecular Oncology and Cancer Epigenetics. 3 Credits.

Topics in molecular oncology, including epidemiology, genetics and epigenetics, carcinogenesis, tumor growth and metastasis, biochemistry of cancer cells, tumor markers, hormones and cancer, cancer immunobiology, radiotherapy, chemotherapy, and immunotherapy. Prerequisites: BMSC 8210 and BMSC 8212.

CANC 8998. Advanced Reading and Research. 1-12 Credits.

Restricted to doctoral candidates preparing for the qualifying examination. May be repeated for credit.

CANC 8999. Dissertation Research. 3-12 Credits.

May be repeated for credit. Restricted to IBS students.

CHEMISTRY (CHEM)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CHEM 1000. Dean's Seminar. 3 Credits.

Contemporary topics in chemistry.

CHEM 1003. Contemporary Science for Nonscience Majors. 3 Credits.

Contemporary topics in physical, biological, and medical science. CHEM 1003 is not a prerequisite to CHEM 1004. Laboratory fee.

CHEM 1004. Contemporary Science for Nonscience Majors. 3 Credits.

Continuation of CHEM 1003. Contemporary topics in physical, biological, and medical science. CHEM 1003 is not a prerequisite to CHEM 1004. Laboratory fee.

CHEM 1110. Fundamentals of Chemistry. 2 Credits.

Central concepts of chemistry including the metric system, unit conversions, classification of matter, periodicity, atomic structure, chemical bonding, chemical reactions, stoichiometry, and chemical equilibrium. Emphasis on mathematical and analytical skills required for effective problem solving. Restricted to students who successfully completed high school algebra prior to matriculation and have completed the ALEKS chemistry preparatory course at GW without achieving at least 95 percent mastery.

CHEM 1111. General Chemistry I. 4 Credits.

Atomic structure and properties; stoichiometry; gas, liquid, and solid state; chemical bonding; solutions; chemical kinetics and equilibria; thermodynamics; acids and bases; electrochemistry; descriptive chemistry. Restricted to students who have successfully completed high school algebra prior to matriculation and have completed the ALEKS chemistry preparatory course at GW and achieved at least 95 percent mastery.

CHEM 1112. General Chemistry II. 4 Credits.

Continuation of CHEM 1111. Atomic structure and properties; stoichiometry; gas, liquid, and solid state; chemical bonding; solutions; chemical kinetics and equilibria; thermodynamics; acids and bases; electrochemistry; descriptive chemistry. Laboratory fee. Prerequisite: CHEM 1111.

CHEM 2000. Sophomore Colloquium. 3 Credits.

Sophomore colloquia are small, seminar-type classes that deeply engage CCAS second-year students in a discipline, focus on a narrow issue of high interest and impact, and require independent research projects. May be repeated provided topic differs. Consult the Schedule of Classes for more details. Restricted to CCAS sophomores.

CHEM 2010. History of Chemistry. 2,3 Credits.

CHEM 2085. Environmental Chemistry. 3 Credits.

Chemistry and physics of the environment, with emphasis on water and air pollution; environmental analysis and modeling and their limitations.

CHEM 2122. Introductory Quantitative Analysis. 3 Credits.

Theory and practice of quantitative analysis by modern methods; evaluation of analytical data emphasizing detection and correction of experimental errors. CHEM 2123 may be taken as a corequisite. Prerequisite: CHEM 1112.

CHEM 2123. Introductory Quantitative Analysis Laboratory. 1 Credit.

Laboratory complement to CHEM 2122. Laboratory fee. CHEM 2122 may be taken as a corequisite. Prerequisite: CHEM 2122.

CHEM 2123W. Introductory Quantitative Analysis Laboratory. 1 Credit.

Laboratory complement to CHEM 2122. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Laboratory fee. CHEM 2122 may be taken as a corequisite. Prerequisite: CHEM 2122.

CHEM 2151. Organic Chemistry I. 3 Credits.

Systematic treatment of the structure, preparation, properties, and reactions of the principal classes of organic compounds. Fundamental principles of stereochemistry, reaction mechanisms, and spectroscopic methods of analysis. Prerequisite: CHEM 1112.

CHEM 2152. Organic Chemistry II. 3 Credits.

Continuation of CHEM 2151. Systematic treatment of the structure, preparation, properties, and reactions of the principal classes of organic compounds. Fundamental principles of stereochemistry, reaction mechanisms, and spectroscopic methods of analysis. Prerequisite: CHEM 2151.

CHEM 2153. Organic Chemistry Laboratory I. 1 Credit.

Laboratory component of CHEM 2151. Introduction to and practice in basic skills of synthesis, separation, purification, and identification of organic compounds. CHEM 2151 may be taken as a corequisite. Laboratory fee. Prerequisite: CHEM 2151.

CHEM 2154. Organic Chemistry Laboratory II. 1 Credit.

Continuation of CHEM 2153. Laboratory component of CHEM 2152. Introduction to and practice in basic skills of synthesis, separation, purification, and identification of organic compounds. CHEM 2152 may be taken as a corequisite. Laboratory fee. Prerequisites: CHEM 2152 and CHEM 2153.

CHEM 3140. Geochemistry. 3 Credits.

Chemical systems and processes on the planet Earth; origins and interactions among and within the Earth's lithosphere, oceans, and atmosphere; origin, distribution, and behavior of the elements; radioactive and stable isotope systems. Aqueous geochemistry; geochemical cycles. Prerequisites: GEOL 1001 or GEOL 1005; and CHEM 1111 and CHEM 1112.

CHEM 3165. Biochemistry I. 3 Credits.

Introduction to the chemistry of living cells; structure and function of proteins, lipids, carbohydrates, and nucleic acids; enzyme structure, mechanism, and regulation. Credit toward the degree cannot be earned for both CHEM 3165 and BIOC 3261 or BISC 3261. Prerequisites: CHEM 2151 and CHEM 2152.

CHEM 3166. Biochemistry II. 3 Credits.

Continuation of CHEM 3165. Introduction to the chemistry of living cells; structure and function of proteins, lipids, carbohydrates, and nucleic acids; enzyme structure, mechanism, and regulation. Credit toward the degree cannot be earned for both CHEM 3166 and BIOC 3263/BISC 3263. Prerequisite: CHEM 3165.

CHEM 3166W. Biochemistry II. 3 Credits.

Continuation of CHEM 3165. Introduction to the chemistry of living cells; structure and function of proteins, lipids, carbohydrates, and nucleic acids; enzyme structure, mechanism, and regulation. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Credit toward the degree cannot be earned for both CHEM 3166W and BIOC 3263/BISC 3263. Prerequisite: CHEM 3165.

CHEM 3170. Introduction to Physical Chemistry. 3 Credits.

Thermodynamics, chemical and physical equilibria, kinetics, and spectroscopy. Examples taken from biological systems. May not be taken for credit by students who have received credit for CHEM 3171 and CHEM 3172 or an equivalent course. Restricted to non-chemistry majors. Prerequisites: CHEM 1111 and CHEM 1112; and MATH 1231; and PHYS 1012 or PHYS 1022 or PHYS 1026; or permission of the instructor.

CHEM 3171. Physical Chemistry I. 3 Credits.

Gas laws, chemical thermodynamics, chemical equilibrium, kinetics, quantum chemistry, atomic and molecular spectra, structure of solids, liquids, and macromolecules. Prerequisites: CHEM 1112, MATH 1231 and PHYS 1022; or permission of the instructor.

CHEM 3172. Physical Chemistry II. 3 Credits.

Continuation of CHEM 3171. Gas laws, chemical thermodynamics, chemical equilibrium, kinetics, quantum chemistry, atomic and molecular spectra, structure of solids, liquids, and macromolecules. Prerequisite: CHEM 3171.

CHEM 3173. Physical Chemistry Laboratory. 2 Credits.

Laboratory complement to CHEM 3171 and CHEM 3172. Exploration of molecular structure and bonding as revealed through observation. CHEM 2123 and CHEM 3171 may be taken as a corequisite. Laboratory fee. Prerequisites: CHEM 2123 and CHEM 3171.

CHEM 3262. Biochemistry Laboratory. 2 Credits.

Study of common experimental techniques used in life science laboratories to separate and characterize biological macromolecules. Same as BIOC 3261/ BISC 3261. Prerequisite: CHEM 3165 or BIOC 3261/ BISC 3261. Laboratory fee.

CHEM 3263W. Special Topics in Biochemistry. 2 Credits.

Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CHEM 3564. Lipid Biotechnology. 0-2 Credits.

Study of common experimental techniques used in life science laboratories to separate and characterize biological macromolecules. Laboratory fee. Prerequisites: BIOC 3261 or BISC 3261 or CHEM 3165. (Same as BIOC 3564).

CHEM 4113. Chemical Instrumentation. 3 Credits.

Electronic analog measurements and control of electrical quantities in chemical instrumentation; digital and analog data conversion and optimization of electronic measurements in chemical instrumentation; computer interfacing and programming using PC-based systems. Prerequisite: CHEM 3172 and CHEM 4122. Laboratory fee.

CHEM 4122. Instrumental Analytical Chemistry. 3 Credits.

Theory of instrumental methods in qualitative and quantitative analysis, determination of structure, with emphasis on atomic and molecular spectrophotometry, infrared spectroscopy, nuclear magnetic resonance, mass spectrometry, chromatography, and electroanalysis. Corequisite: CHEM 4123. CHEM 3171 may be taken as a corequisite. Prerequisites: CHEM 3171 or permission of the instructor.

CHEM 4123. Instrumental Analytical Chemistry Laboratory. 2 Credits.

Laboratory complement to CHEM 4122. CHEM 3171 and CHEM 4122 may be taken as a corequisite. Laboratory fee. Prerequisites: CHEM 3171 and CHEM 4122.

CHEM 4134. Inorganic Chemistry. 3 Credits.

Periodic trends and structure and reactivity of transitional metal complexes. Prerequisite: CHEM 2122.

CHEM 4195. Undergraduate Research. 1-3 Credits.

Research on problems approved by the staff. Approval must be obtained prior to registration. A final written report on the work is required. For students requesting Special Honors in chemistry, a poster or oral presentation is also required. May be repeated for credit. Majors are encouraged to take the course for two semesters. Laboratory fee.

CHEM 4195W. Undergraduate Research. 1-3 Credits.

Research on problems approved by the staff. Approval must be obtained prior to registration. A final written report on the work is required. For students requesting Special Honors in chemistry, a poster or oral presentation is also required. May be repeated for credit. Majors are encouraged to take the course for two semesters. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Laboratory fee.

CHEM 6221. Spectrochemical Analysis. 3 Credits.

Theory and application of recent spectrometric methods of analysis, including advances in optimization techniques, optical instrumentation, atomic spectrometry, laser-based analytical techniques, X-ray methods, and surface analysis techniques. Prerequisite: CHEM 4122.

CHEM 6222. Biomedical Mass Spectrometry. 3 Credits.

Principles, instrumentation, methods, and applications of mass spectrometry; selected state-of-the-art methods demonstrate basic principles to show how new methods of analysis are developed; typical applications highlight solutions of biomedical problems, including proteomics and metabolomics. Prerequisite: CHEM 4122.

CHEM 6235. Advanced Inorganic Chemistry I. 3 Credits.

Application of modern chemical theories to inorganic substances and reactions; detailed study, developed from the periodic table, of the chemistry of the more common elements; electronic spectra and reaction mechanisms of complexes; organometallic chemistry; homogeneous and heterogeneous catalysis; bioinorganic chemistry. Prerequisites: CHEM 3172 and CHEM 4134.

CHEM 6236. Advanced Inorganic Chemistry II. 3 Credits.

Continuation of CHEM 6235. Application of modern chemical theories to inorganic substances and reactions; detailed study, developed from the periodic table, of the chemistry of the more common elements; electronic spectra and reaction mechanisms of complexes; organometallic chemistry; homogeneous and heterogeneous catalysis; bioinorganic chemistry. Prerequisites: CHEM 3172 and CHEM 4134.

CHEM 6238. Chemistry of Inorganic Materials. 3 Credits.

Synthesis, structure, and properties of materials such as ceramics, superconductors, ionic conductors, nanomaterials, and magnetic, optical, and electronic materials. Emphasis on traditional and low-temperature routes. Prerequisites: CHEM 3171 and CHEM 3172.

CHEM 6251. Advanced Organic Chemistry I. 3 Credits.

Synthesis, reactions, and properties of organic compounds; fundamental theories of organic chemistry, emphasis on reaction mechanisms. Prerequisite: CHEM 2152.

CHEM 6252. Advanced Organic Chemistry II. 3 Credits.

Continuation of CHEM 6251. Synthesis, reactions, and properties of organic compounds; fundamental theories of organic chemistry, emphasis on reaction mechanisms. Prerequisite: CHEM 6251.

CHEM 6257. Physical-Organic Chemistry. 3 Credits.

The transition state theory of chemical kinetics, applications to reaction mechanisms; kinetic isotope effects, linear-free energy relationships, concentrated and "super" acids, Woodward-Hoffman rules, free radical reactions. Prerequisites: CHEM 6251 or permission of the instructor.

CHEM 6259. Polymer Chemistry. 3 Credits.

A study of the preparation, properties, and structure of macromolecules. Prerequisites: CHEM 2152 and CHEM 3170; or CHEM 3171; or permission of the instructor.

CHEM 6273. Chemical Thermodynamics. 3 Credits.

Application of thermodynamics to chemical problems. Emphasis on statistical calculation of thermodynamic properties. Prerequisite: CHEM 3172 or CHEM 6372.

CHEM 6277. Chemical Bonding. 3 Credits.

Quantum mechanics, approximate methods, electron spin, Pauli principle, atomic and molecular structure. Prerequisite: CHEM 3172 or CHEM 6372.

CHEM 6278. Molecular Spectroscopy. 3 Credits.

Applications of quantum mechanics and group theory to the interpretation of electronic, vibrational, rotational, and magnetic resonance spectroscopy. Prerequisite: CHEM 6277.

CHEM 6280. Energy and the Environment. 3 Credits.

Fundamentals of energy conversion in thermomechanical, thermochemical, electrochemical, and photoelectric processes in existing and future power and transportation systems, with emphasis on efficiency, environmental impact, and performance.

CHEM 6281. Environmental Chemistry: Air, Water, and Soil. 3 Credits.

Survey of the behavior, movement and impact of natural and man-made chemicals in all layers of the environment in the context of the atmosphere, hydrosphere, and lithosphere; the effects of acid rain, sewage treatment, ozone destruction, anthropogenic climate change, air pollution, and eutrophication.

CHEM 6282. Green Industrial Chemistry. 3 Credits.

Introduction to the basic design principles for greener chemical technologies; widely used practices, including catalysis, use of renewable starting materials, minimization of energy inputs, and use of greener solvents.

CHEM 6283. Chemical Toxicology and Rational Design of Safer Chemicals. 3 Credits.

Introduction to the basic tools and paradigms of toxicology in the context of chemical design for minimizing potential toxicity of commercial chemicals; computational methods for prediction of bioavailability, reactivity, bioaccumulation and different types of toxicity; application of in silico methods to the rational re-design of functional and safer chemicals.

CHEM 6284. Environmental Analytical Chemistry. 3 Credits.

Advanced analytical methodology for environmental assessment; analytical instrumentation, techniques for remote measurements, determination of trace atmospheric constituents of anthropogenic and natural origin, measurement uncertainty analysis, detection and identification of organic and inorganic pollutants in air, water, soil and biota, and the determination of heavy metals and radionuclides in the environment.

CHEM 6298. Capstone Seminar in Environmental and Green Chemistry. 3 Credits.

Group projects carried out with an external partner or client—such as a government agency, nonprofit group, or chemistry laboratory research project—that identify and solve real world scientific problems related to environmental and green chemistry.

CHEM 6314. Fundamental-Computational Chemistry. 3 Credits.**CHEM 6315. Computational Chem-Biomolecule. 3 Credits.****CHEM 6320. Selected Topics in Analytical Chemistry. 1-3 Credits.**

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field of analytical chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6330. Selected Topics in Inorganic Chemistry. 1-3 Credits.

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field of inorganic chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6350. Selected Topics in Organic Chemistry. 1-3 Credits.

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field in organic chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6358. Synthesis and Structure Determination in Organic Chemistry. 3 Credits.

The design of syntheses for complex organic molecules; survey of modern synthetic methods, including asymmetric induction; spectroscopic methods of structure determination. Prerequisites: CHEM 6251 or permission of the instructor.

CHEM 6370. Selected Topics in Physical Chemistry. 1-3 Credits.

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field of physical chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6371. Physical Chemistry I. 1-3 Credits.

Gas laws, chemical thermodynamics, chemical equilibrium, kinetics, quantum chemistry, atomic and molecular spectra, structure of solids, liquids, and macromolecules. Students enrolled at the graduate level are expected to do additional work. Permission of the department required prior to enrollment.

CHEM 6372. Physical Chemistry II. 1-3 Credits.

Continuation of CHEM 6371. Basic concepts of quantum chemistry and molecular spectroscopy; application of modern physical chemistry theory to exploration of a wide range of physical properties for open and closed chemical systems in the gas and condensed phases. Restricted to students with permission of the department. Prerequisite: CHEM 6371.

CHEM 6390. Selected Topics in Chemistry. 0-3 Credits.

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field in chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6395. Research. 1-12 Credits.

Limited to master's degree candidates. Survey of a topic approved by departmental staff and resulting in a written report and presentation of a seminar. Open to qualified students with advanced training. May be repeated for credit.

CHEM 6998. Thesis Research. 1-9 Credits.

Limited to students in the master's degree program.

CHEM 6999. Thesis Research. 3 Credits.

Limited to students in the Master's Degree program.

CHEM 8998. Advanced Reading and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

CHEM 8999. Dissertation Research. 3-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

CHINESE (CHIN)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CHIN 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details.

CHIN 1001. Beginning Chinese I. 4 Credits.

Basic functional and communicative proficiency in Chinese. Development of listening and speaking skills, reading and writing abilities, and cultural awareness.

CHIN 1002. Beginning Chinese II. 4 Credits.

Continuation of CHIN 1001. Basic functional and communicative proficiency in Chinese. Development of listening and speaking skills, reading and writing abilities, and cultural awareness. Prerequisites: CHIN 1001 or equivalent.

CHIN 1011. Intensive Beginning Chinese. 8 Credits.

Intensive beginning course equivalent to CHIN 1001 and CHIN 1002. Laboratory fee.

CHIN 1088. E-Learning Tools for Chinese. 1 Credit.

Basic training for using computer programs, software, or web tools for Chinese word processing. Prerequisite: CHIN 1001. Laboratory fee.

CHIN 2003. Intermediate Chinese I. 4 Credits.

Continuation of grammar, with emphasis on speaking, reading, and writing. Prerequisite: CHIN 1002 or CHIN 1011. Laboratory fee.

CHIN 2004. Intermediate Chinese II. 4 Credits.

Continuation of CHIN 2003. Continuation of grammar, with emphasis on speaking, reading, and writing. Prerequisite: CHIN 2003. Laboratory fee.

CHIN 3105. Intermediate Chinese III. 3 Credits.

Augmentation of vocabulary, with emphasis on communicative proficiency development. Prerequisite: CHIN 2004. Laboratory fee.

CHIN 3106. Intermediate Chinese IV. 3 Credits.

Continuation of CHIN 3105. Augmentation of vocabulary, with emphasis on communicative proficiency development. Prerequisite: CHIN 3105. Laboratory fee.

CHIN 3109. Introduction to Classical Chinese. 3 Credits.

Introduction to classical writings in Chinese literature, history, and philosophy. Prerequisite: CHIN 2004.

CHIN 3110. Introduction to Classical Chinese. 3 Credits.

Continuation of CHIN 3109. Introduction to classical writings in Chinese literature, history, and philosophy. Prerequisite: CHIN 2004.

CHIN 3111. Chinese Literature in Translation I. 3 Credits.

An introductory survey of Chinese literature read in English translation, including fiction, poetry, drama, essays, diaries, testimonials. The pre-modern period.

CHIN 3112. Chinese Literature in Translation II. 3 Credits.

Continuation of CHIN 3111. An introductory survey of Chinese literature read in English translation, including fiction, poetry, drama, essays, diaries, testimonials. The modern period.

CHIN 3123. Introduction to Chinese Linguistics. 3 Credits.

The structure of the Chinese language, including such topics as the structure of sounds and words, sentence meaning and structure, the writing system, adaptation of foreign vocabulary, pragmatics, variation, and change. Course conducted in English.

CHIN 3124. Introduction to Chinese Linguistics. 3 Credits.

Continuation of CHIN 3123. The structure of the Chinese language, including such topics as the structure of sounds and words, sentence meaning and structure, the writing system, adaptation of foreign vocabulary, pragmatics, variation, and change. Course conducted in English.

CHIN 3136W. Chinese Women in Myth, Literature, and Film. 3 Credits.

Women's position in Chinese cultural and political life from prehistoric myth to the present time. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Conducted in English. (Same as WGSS 3136, WGSS 3136W).

CHIN 3162. Chinese Culture Through Film. 3 Credits.

Survey of the Chinese cultural heritage presented through films. Topics include literature, philosophy, art, religion, and social history from prehistorical times to the modern era. Course conducted in English.

CHIN 3163. Taiwanese Literature and Film. 3 Credits.

An introductory survey of modern and contemporary Taiwanese literary and cinematic works. Readings include poetry, folk lyrics, dramas, novels, and memoirs that bear distinctive marks of Taiwan's diverse literary trends. Films include those by internationally renowned directors such as Hou Hsiao-hsien, Ang Lee, Edward Yang, and Tsai Ming-liang.

CHIN 3171. Poetry of the Tang and Song Periods. 3 Credits.

Reading of works of leading poets. Discussion of content and style. Prerequisite: CHIN 3109.

CHIN 3172. Poetry of the Tang and Song Periods. 3 Credits.

Continuation of CHIN 3171. Reading of works of leading poets. Discussion of content and style. Prerequisite: CHIN 3109.

CHIN 3173. Chinese Drama and Theatre. 3 Credits.

Chinese drama and theatrical genres. Topics include the relation between theatrical performance and ritual practice, gender identities, and cross-cultural exchange. Course conducted in English.

CHIN 3188. Confucian Religion. 3 Credits.**CHIN 3841. Religion and Politics in China. 3 Credits.**

The changes, destructions, and reconstructions of Chinese religions from the late nineteenth century to the present. The relationship between the (re)making of Chinese religions and the making of a modern Chinese nation state.

CHIN 4107. Readings in Modern Chinese I. 3 Credits.

Readings in newspapers, social science materials, and documentary materials. Prerequisite: CHIN 3106 .

CHIN 4108. Readings in Modern Chinese. 3 Credits.

Continuation of CHIN 4107. Readings in newspapers, social science materials, and documentary materials. Prerequisite: CHIN 4107 or equivalent.

CHIN 4119W. Business Chinese. 3 Credits.

Basics of business-related communication in both oral and written form. Integrated language skills. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: CHIN 4107 or CHIN 4121.

CHIN 4121W. Advanced Conversation and Composition I. 3 Credits.

Productive skills at the advanced discourse level, topic-specific practice of commonly used speech patterns and writing formats. Permission of the instructor is required prior to enrollment. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: CHIN 3106.

CHIN 4122W. Advanced Conversation and Composition II. 3 Credits.

Productive skills at the advanced discourse level, topic-specific practice of commonly used speech patterns and writing formats. Permission of the instructor is required prior to enrollment. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CHIN 4179. Twentieth-Century Chinese Literature. 3 Credits.

Selected works of major twentieth-century writers, including Lu Xun, Lao She, Zhang Ailing, Bai Xianrong, and others. Lectures and discussion in Chinese. Prerequisite: CHIN 4107.

CHIN 4180W. Twentieth-Century Chinese Literature II. 3 Credits.

Continuation of CHIN 4179. Selected works of major twentieth-century writers, including Lu Xun, Lao She, Zhang Ailing, Bai Xianrong, and others. Lectures and discussion in Chinese. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: CHIN 4107.

CHIN 4185. Directed Reading I. 3 Credits.

Reading of material in the student's field of interest. Permission of the instructor required prior to enrollment.

CHIN 4186. Directed Reading II. 3 Credits.

Continuation of CHIN 4185. Reading of material in the student's field of interest. Permission of the instructor required prior to enrollment.

CHIN 4186W. Directed Reading II. 3 Credits.

Continuation of CHIN 4185. Reading of material in the student's field of interest. Permission of the instructor required prior to enrollment. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CHIN 4198. Proseminar: Readings for the Major in Chinese Language and Literature. 3 Credits.

Recommended for all majors. Preparation for advanced research in Chinese sources. One-on-one tutorials, seminar meetings, and practice in consulting Chinese reference works, both traditional and modern. Literary criticism; keeping abreast of sinological scholarship. Prerequisite: CHIN 3106.

CHIN 4199. Proseminar: Readings for the Major in Chinese Language and Literature. 3 Credits.

Continuation of CHIN 4198. Recommended for all majors. Preparation for advanced research in Chinese sources. One-on-one tutorials, seminar meetings, and practice in consulting Chinese reference works, both traditional and modern. Literary criticism; keeping abreast of sinological scholarship. Prerequisite: CHIN 4198.

CHIN 4201. Special Topics in Advanced Chinese. 3 Credits.

Development of linguistic proficiency and area content knowledge regarding China and Chinese. Topics vary by semester. May be repeated for credit provided the topic differs. See the Schedule of Classes for more information. Prerequisites: CHIN 4107 or CHIN 4119W or CHIN 4121W.

CHIN 6109. Introduction to Classical Chinese. 3 Credits.

Students explore the basic grammar and vocabulary of literary Chinese. Selections are based on the students' interests and level of proficiency, and include such genres as prose, short stories, performance texts, ci poetry and qu. Graduate students who are taking CHIN 6109 demonstrate their problem-solving and reading abilities through a 15 to 20 annotated translation at the end of the semester. Equivalent courses may be accepted for the prerequisite. Prerequisite: CHIN 2004. (Same as CHIN 3109).

CHIN 6110. Introduction to Classical Chinese. 3 Credits.

Students explore the basic grammar and vocabulary of literary Chinese. Selections are based on the students' interests and level of proficiency, and include such genres as prose, short stories, performance texts, ci poetry and qu. Graduate students who are taking CHIN 6109 and CHIN 6110 demonstrate their problem-solving and reading abilities through a 15 to 20 annotated translation at the end of the semester. Equivalent courses may be accepted for the prerequisite. Prerequisite: CHIN 2004. (Same as CHIN 3110).

CHIN 6111. Chinese Literature in Translation. 3 Credits.

A survey of the literatures and cultures of pre-modern China, from the origin of Chinese civilization through the last imperial dynasty including the works of representative writers as well as major literary modes, such as historical documents, philosophical writings, poetry, folktale, short story, drama, and novel. Graduate students taking CHIN 6111 demonstrate their ability in conducting independent research by writing a 15 to 20 page research paper.

CHIN 6112. Chinese Literature in Translation. 3 Credits.

A survey of the literatures and cultures of China, from late Qing (the last imperial dynasty) to contemporary China and the Chinese-speaking world. Students are introduced to works of representative writers as well as major literary genres, including fictions, poetry, dramas, and essays. Students taking CHIN 6112 develop the ability to conduct independent research on the primary text, and to evaluate the significance of the works in cross-cultural, comparative context, by writing a 15 to 20 page term paper. (Same as CHIN 3112).

CHIN 6123. Structure of Chinese. 3 Credits.

Introduction to the structure of Chinese from the perspective of linguistic analysis; serves to prepare students for more advanced graduate level courses in Chinese linguistics. Coursework includes introductory readings, readings from the primary linguistics research literature, and hands-on problem solving, etc.

CHIN 6125. History of the Chinese Language. 3 Credits.

The methodologies and theories in Chinese historical phonology and syntax. Students read materials in the original language, e.g. Classical Chinese, Vernacular writing, and etc. Students work towards a term research paper throughout the semester on a topic of their own choice. For graduate students, there is one extra question on all of the assignments throughout the semester including the homework problem sets, midterm exams and final exam.

CHIN 6126. Chinese Phonology. 3 Credits.

The theory and practice in Chinese phonology. Students will be provided with fundamentals of articulatory phonetics (the study of how speech sounds are produced) and phonology (the study of sound systems), which they apply to the study of phonetic and phonological properties of standard Chinese. Prerequisites: CHIN 1001 or equivalent.

CHIN 6128. Chinese Semantics. 3 Credits.

The formal approaches to semantics and interface issues between semantics and syntax and phonology, with an emphasis on aspects related to Chinese, such as quantificational isomorphism, modality, focus, question semantics, adjectival semantics and etc. Graduate students taking this course will turn in a research paper by the end of the semester to demonstrate their understanding of a certain topic and ability to do independent research.

CHIN 6163. Taiwanese Literature and Film. 3 Credits.

Taiwanese literature and film in its historical, social and cultural contexts; course materials include various genres (poetry, folk lyrics, dramas, novels and memoirs) that bear distinctive marks of Taiwan's lively and diverse cultural trends. (Same as CHIN 3163).

CHIN 6171. Poetry of the Tang and Song Periods I. 3 Credits.

Examination of exemplary works of leading Tang and Song poets, including Li Bo, Du Fu, Han Shan, Du Xunhe, and Bai Juyi. Undergraduate students must have the instructor's permission to enroll. Prerequisite: CHIN 3109.

CHIN 6172. Poetry of the Tang and Song Periods II. 3 Credits.

Continuation of CHIN 6171. Examination of exemplary works of leading Tang and Song poets, including Li Bo, Du Fu, Han Shan, Du Xunhe, and Bai Juyi. Undergraduate students must have the instructor's permission to enroll. Prerequisite: CHIN 3109.

CHIN 6173. Traditional Chinese Theatre and Drama. 3 Credits.

Traditional Chinese Theatre and Drama is a multimedia-enhanced course, which examines dramas and theatrical genres of China of pre-modern time. Students are introduced to the history of Chinese theatre, the aesthetics of theatrical performances, as well as works of representative playwrights in major dramatic genres. Students develop the ability to conduct independent research by writing a 15 to 20-page research paper on the primary text, and to evaluate the significance of the works in cross-cultural, comparative context. Permission of the instructor required prior to enrollment of undergraduate students.

CHIN 6179. Twentieth-Century Chinese Literature I. 3 Credits.

Introduction to modern Chinese literature through close reading and discussion of representative literary works from the era. The readings include several genres such as essay, poetry, short story, and novella. All readings and class discussion are in Chinese. Graduate students taking CHIN 6179 demonstrate their ability in conducting independent research by writing a 15 to 20 page research paper. Permission of the instructor required prior to enrollment of undergraduate students. Equivalent courses may be accepted for the prerequisite. Prerequisite: CHIN 4107.

CHIN 6180. Twentieth-Century Chinese Literature II. 3 Credits.

Introduction to the literature of twentieth-century China through close reading and discussion of representative literary works from the era. All readings and class discussion are in Chinese. Graduate students taking CHIN 6179 demonstrate their ability in conducting independent research by writing a 15 to 20 page research paper. Permission of the instructor required prior to enrollment of undergraduate students. Equivalent courses may be accepted for the prerequisite. Prerequisite: CHIN 4107.

CHIN 6199. Graduate Seminar. 3 Credits.

Preparation for advanced research in Chinese sources. One-on-one tutorials, seminar meetings, and practice in consulting Chinese reference works, both traditional and modern. Literary criticism; keeping abreast of sinological scholarship. Students research a selected topic in Chinese literature or philosophy, and prepare a research paper of 25 or more pages on this topic. Restricted to individualized curriculum; admission by instructor approval.

CHIN 6201. Second Language Acquisition of Mandarin Chinese. 3 Credits.

This course is an overview of, and introduction to, the theoretical foundations of second language (L2) acquisition in general and the acquisition of Chinese as a foreign language in particular. It is designed to deepen the understanding of the Chinese language from the perspective of L2 learners. Research papers focusing on the L2 acquisition of Mandarin Chinese from various perspectives, such as psycholinguistics, cognitive linguistics, pedagogical theories, are introduced in this class.

CHIN 6210. Introduction to Teaching Chinese as a Foreign Language. 3 Credits.

Gain knowledge of TCFL essentials including Chinese pedagogical grammar, instructional design, technology application, and testing and assessment. Discuss National Standards and assessment guidelines for proficiency development, and current studies of second language acquisition (SLA). Examine key issues, studies, and practices on the teaching and acquisition of difficult areas of Chinese, such as the pronunciation and writing systems, as well as topics of general interest. Explore language-teaching methodologies and techniques, and Chinese language testing and assessment. Permission of the instructor required prior to enrollment.

CHIN 6310. Practicum in Chinese Language Instruction. 3 Credits.

Develop basic skills for teaching Chinese as a foreign language (TCFL) through classroom observation, group discussion, lesson planning, syllabus writing, test designing, and supervised field experience in Chinese instruction. Gain knowledge of classroom management. Required seminar and practice sessions. Permission of the instructor required prior to enrollment. Prerequisites: CHIN 6210 or permission of the instructor.

CHIN 6550. Independent Study for Chinese Language and Culture. 1-3 Credits.

Students explore a topic of interest under the supervision of a faculty member and develop research and, in some cases, applied skills. Permission of the instructor and program director is required prior to registration.

CHIN 6841. Religion and Politics in China. 3 Credits.

Changes, destructions, and reconstructions of Chinese religions from the late nineteenth century to the present day. The relationship between the (re)making of Chinese religions and the making of a modern Chinese nation-state. (Same as CHIN 3841, REL 3841).

CHIN 6999. Thesis Research. 3 Credits.

CIVIL ENGINEERING (CE)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CE 1010. Introduction to Civil and Environmental Engineering. 1 Credit.

An introduction to the profession of civil and environmental engineering. Field visits and laboratory exercises complement classroom instruction. (Fall).

CE 1020. Introduction to a Sustainable World. 1 Credit.

The science underlying the basic processes that gave rise to the world we live in and that maintain its viability for human life. Ecosystem-functioning environmental issues, such as greenhouse gas emission and ozone, with current efforts to resolve them. Technological innovations in the context of sustainability.

CE 1098. Variable Topics. 1-36 Credits.

CE 2210. Engineering Computations. 3 Credits.

Numerical methods for engineering applications. Methods for solving systems of linear equations, root finding, curve fitting, and data approximation. Numerical differentiation and integration and numerical solution of differential equations. Computer applications. Prerequisites: APSC 2113 and CSCI 1121. (Spring).

CE 2220. Introduction to the Mechanics of Solids. 3 Credits.

Stress and strain, axial load problems, torsion, shear force and bending moment, pure bending of beams, shearing stresses in beams, compound stresses, analysis of plane stress and plane strain, combined stresses, deflection of beams, statically indeterminate problems, columns, energy methods. Prerequisites: APSC 2057 and APSC 2113. (Fall and spring, Every Year).

CE 2510. Environmental Sustainability. 3 Credits.

An introduction to environmental sustainability with focus on the nexus of water, energy, and climate; energy demands of water systems, water footprints of energy generation, and how the two valuable resources are limiting each other; technologies and research frontiers toward a sustainable water and energy supply.

CE 2710. Introduction to Transportation Engineering. 3 Credits.

Transportation system components; roadway traffic capacity and network performance measures; signalized and un-signalized intersections; monitoring techniques, instruments and data processing. Sustainability issues and environmental impact of transportation systems with focus on urban design, planning and regulation. Prerequisite: MATH 2233. (Spring, Every Year).

CE 3110W. Civil Engineering Materials. 2 Credits.

Mechanical properties and behavior of civil engineering materials such as metals, concrete, and fiber-reinforced polymer composites. Properties range from plastic deformations of metallic materials to crushing of confined and unconfined concrete. Basis of the strength of materials. Concepts of creep, fatigue, fracture, and crack propagation. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: CE 2220 and CHEM 1111. (Fall, Every Year).

CE 3111W. Civil Engineering Materials Lab. 1 Credit.

Measurement of stress-strain characteristics and study of failure modes in ductile steel, brittle concrete, and anisotropic composite materials. Experiments include data collection, data analysis, and interpretation and presentation of results regarding tension, compression, bending, impact, and shear properties. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. CE 3110W may be taken as a corequisite. Prerequisites: CE 3110W. (Fall).

CE 3140. Sustainability in Engineering Materials. 2 Credits.

Sustainable engineering: overall materials energy needs/properties and impacts; load resistance and aging, thermodynamics, water conservation, heat transfer, use of energy-efficient materials in construction, life-cycle assessment. (Fall and spring, Every Year).

CE 3230. Structural Theory I. 3 Credits.

Theory of statically determinate structures; stability and determinacy; influence lines and moving loads. Analysis of beams, frames, trusses, and arches. Calculation of deflections. Prerequisites: CE 2210 and CE 2220. (Fall, Every Year).

CE 3240. Structural Theory II. 3 Credits.

Theory of statically indeterminate structures using matrix methods and classical approaches such as moment distribution and slope-deflection; influence lines; energy methods. Prerequisite: CE 3230. (Spring, Every Year).

CE 3310. Reinforced Concrete Structures. 3 Credits.

Properties of concrete and reinforcement; design of flexural reinforcement, shear reinforcement; development of reinforcement; design of columns, floor slabs; ethics and professionalism in design. A design project, including the use of computer software and a detailed report, is required. CE 3240 may be taken as a corequisite. Prerequisite: CE 3240. (Fall and spring, Every Year).

CE 3520. Environmental Engineering I: Water Resources and Water Quality. 3 Credits.

Physical and chemical analyses of water quality and characteristics. Microbiology of water and pathogens. Introduction to water treatment processes involving coagulation, flocculation, filtration, and disinfection. Prerequisites: CE 3610 and CHEM 1111. (Spring, Every Year).

CE 3521. Environmental Engineering Laboratory. 1 Credit.

Laboratory experiments for physical and chemical analyses of water and wastewater. Measurement of turbidity, alkalinity, dissolved oxygen, BOD, COD, suspended solids, and optimum coagulant dose using jar tests. Corequisite: CE 3520.

CE 3610. Hydraulics. 3 Credits.

Fluid statics: pressure forces, buoyancy, and flotation. Application of kinematic principles; flow fields, stream tubes, and flow nets. Fluid dynamics: applications to pipe flow, hydraulic models, measurement of pressure, and velocity. Open channel flow: applications to water resources engineering. Prerequisites: CE 2210 and MAE 3126. (Spring, Every Year).

CE 3611. Hydraulics Laboratory. 1 Credit.

Laboratory experiments and demonstrations of hydraulics in pipe and open-channel flow. Topics include center of pressure, floating bodies, Bernoulli's theorem, discharge coefficients, velocity profile, and head losses. Prerequisite or corequisite: CE 3610.

CE 3720. Highway Engineering and Design. 3 Credits.

Road vehicle performance. Principles of highway design: horizontal and vertical alignments, roadside design; drainage and drainage structures, earthwork, intersections, interchanges, parking facilities; basic traffic models; highway materials. Application of safety standards. APSC 3115 and CE 2220 may be taken as a corequisite. Prerequisites: APSC 3115, CE 2220 and MATH 2233. (Fall and spring, Every Year).

CE 3730. Sustainable Urban Planning Dynamics. 3 Credits.

Human and physical processes shaping urban environments; human-environment interactions in the context of an urban region; urban design, materials, transport, planning, and regulation. Prerequisite: CE 2710.

CE 4320. Metal Structures. 3 Credits.

Principles of the design of metal structures, structural elements, connections, specific problems of analysis including the use of computer software, methods of construction, professionalism in design. Prerequisite: CE 3240.

CE 4330W. Contracts and Specifications. 3 Credits.

Law of contracts, construction contracts, specifications, bidding, insurance and bonds, professional liability, arbitration of disputes, litigation. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to juniors and seniors. (Spring, Every Year).

CE 4341. Senior Design Project I. 1 Credit.

First in a two-course sequence for the senior design project in civil and environmental engineering. Outcomes include team formation, project selection, task formulation and assignments, preliminary design validation and/or prototyping. Restricted to students in the civil engineering program with senior standing. (Fall, Every Year).

CE 4342. Senior Design Project II. 3 Credits.

Second in a two-course sequence for the senior design project in civil and environmental engineering. Application of civil and environmental engineering concepts in the design of a project that integrates the concepts and technical knowledge learned in two or more of the following disciplines: engineering mechanics, materials, environmental engineering, geotechnical engineering, structural engineering, transportation engineering, and water resources engineering. Restricted to students in the civil engineering program with senior standing. Prerequisite: CE 4341. Recommended background: Knowledge of structural analysis of indeterminate structures, reinforced concrete and structural steel design, and soil mechanics. (Spring, Every Year).

CE 4410. Introduction to Geotechnical Engineering. 3 Credits.

Soils and rock formation, soil composition, permeability, seepage and flow net analysis, stresses in soil medium, consolidation and settlement, shear strength of soil, analysis of lateral earth pressures, soil compaction. Prerequisites: CE 2220, CHEM 1111 and MAE 3126. (Fall, Every Year).

CE 4411. Geotechnical Engineering Laboratory. 1 Credit.

Laboratory experiments to evaluate liquid and plastic limits, grain-size distribution, shear strength, compressibility, permeability, and moisture-density relationship of soils. CE 4410 may be taken as a corequisite. Prerequisite: CE 4410. (Fall and spring, Every Year).

CE 4450. Introduction to Geo-environmental Engineering. 3 Credits.

Characterization of soils and wastes, engineering properties of soils and geo-synthetics, fundamental concepts of fate and transport of contaminants, common practice in design and construction of waste containment systems, current methods for remediation of contaminated groundwater and soils. Prerequisites: CE 3520 and CE 4410. (Spring, Every Year).

CE 4530. Environmental Engineering II: Water Supply and Pollution Control. 3 Credits.

Introduction to wastewater treatment systems including clarification, suspended and attached growth processes. Use of dissolved oxygen models. Water supply and wastewater collection systems, applied hydraulics of pipelines and pumps. Planning to meet quality needs and regulatory requirements. Prerequisite: CE 3520.

CE 4620. Hydrology and Hydraulic Design. 3 Credits.

Descriptive hydrology: hydrologic cycle, precipitation, stream flow, evaporation, and transpiration. Quantitative hydrology: hydrograph analysis, hydrographs of basin outflow, storage routing. Probability concepts in hydrology: flood frequency, rainfall frequency, stochastic hydrology. Culverts and stilling basins. APSC 3115 and CE 3610 may be taken as a corequisite. Prerequisites: APSC 3115 and CE 3610. (Fall and spring, Every Year).

CE 4810. Research. 1-8 Credits.

Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status. (Fall and spring, Every Year).

CE 4820. Special Topics. 1-6 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

CE 6101. Numerical Methods in Engineering. 3 Credits.

Eigenvalue problems. Numerical solution of systems of equations and ordinary differential equations. Solution techniques for elliptic, parabolic, and hyperbolic partial differential equations. Numerical methods for solving finite element equations. Introduction to solution of fluid-flow problems. Prerequisite: CE 2210.

CE 6102. Application of Probability Methods in Civil Engineering. 3 Credits.

Uncertainty in real-world information; basic probability concepts and models; random variables; useful probability distributions, statistical estimation of distribution parameters from observed data; empirical determination of distribution models; testing hypothesis; regression and correlation analyses; decision theory. Prerequisite: APSC 3115.

CE 6110. Contracts and Specifications In Construction Engineering. 3 Credits.

Overview of contracts, specifications, and the legal environment for engineers; construction contracts, specifications, bidding, contract administration, bonds and securities, dispute resolution. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6111. Project Management For Construction. 3 Credits.

Principles of project management in construction industry. Elements of project management such as structural organization, planning, scheduling, communications, bidding, change orders, contractual relationship, and labor relations and related activities in construction. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6112. Construction Project Acquisition. 3 Credits.

Basic principles used in the procurement and tendering stages of projects up to delivery; construction management activities, financial activities, and cost estimating software and techniques. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall, Every Year).

CE 6113. Construction Contracts, Insurance, and Bonds. 3 Credits.

Common laws used in construction such as contract, tort and statutory/regulatory laws. Elements of project dispute avoidance, subcontracts, project delivery, and insurance and performance and payment bonds. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6114. Construction Methods, Materials, Equipment, and Systems. 3 Credits.

Principles of construction methods, machinery and equipment selection, and production estimation. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6115. Project Planning and Scheduling. 3 Credits.

Fundamentals of project planning and scheduling, scoping estimation risk analysis with a focus on the tools and techniques available to a project planner for mitigation of project risks. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6116. Green Building Design and Construction. 3 Credits.

Sustainability issues and green building design and delivery with a focus on development of commercial and institutional high performance green buildings; LEED ratings and accreditation. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6117. Construction Finance and Engineering Economics. 3 Credits.

Fundamentals of financing construction projects. Commonly used business models, life cycle cost analysis, and software tools for construction project cost control. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6118. Advanced Construction and Computer-Aided Design. 3 Credits.

Integration of construction techniques and computer-aided design; building information modeling and other technologies in various phases of construction management. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall, Every Year).

CE 6119. Construction Safety And Quality Control. 3 Credits.

Principles and importance of construction quality assurance and contractor quality control. Quality control methods to assess design activities in design-build contracts. Overview of hazardous situations that may arise in the construction jobsite and methods for mitigation these dangerous situations. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6121. Construction Project Control. 3 Credits.

Basic principles of scope, cost, schedule, risk, and quality management; the organization of construction firms at the general corporate level and the project level, flow of information between parties in the project, scheduling software. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6201. Advanced Strength of Materials. 3 Credits.

Deflection of beams using singular functions, unsymmetrical bending of beams, beams on elastic foundation. Beam-column problems, shear center for thin-walled beam cross sections, curved beams. Applications of energy methods, torsion, basic equations for theory of elasticity, thin- and thick-walled cylinders, stress concentration, and failure criteria. Prerequisites: CE 2220 and CE 3240. (Spring, Every Year).

CE 6202. Methods of Structural Analysis. 3 Credits.

Theory and applications of modern methods of structural analysis, direct stiffness approach, energy and variational methods, elastoplastic analysis of frames, P-delta effects, application of commonly available structural analysis software. Prerequisites: CE 2220 and CE 3240. (Fall, Every Year).

CE 6203. Reliability Analysis of Engineering Structures. 3 Credits.

Probability theory, theory of structural reliability, probabilistic analysis of strength and loads, risk and reliability function, empirical distribution, probability plot. The design service life, method of perturbation, Monte Carlo simulation. Fatigue and fracture, proof testing, inspection and repair-replacement maintenance. Prerequisite: APSC 3115.

CE 6204. Analysis of Plates and Shells. 3 Credits.

Bending and stretching of thin elastic plates under loading with various boundary conditions, continuous plates and plates on elastic foundations, theory of folded-plate structures. Theory of curved surfaces; general linear bending theory and its simplification to membrane theory; bending stresses in shells of revolution, shallow-shell theory. Prerequisites: CE 2220 and CE 3240. (Spring, odd years).

CE 6205. Theory of Structural Stability. 3 Credits.

General criteria for stability, buckling of elastic and inelastic columns and frames, torsional and lateral buckling, variational methods. Buckling of plates and shells under static loads, stability of stiffened structures, effect of imperfections and boundary conditions. Prerequisites: CE 2220 and CE 3240. (Fall, Every Year).

CE 6206. Continuum Mechanics. 3 Credits.

Introduction to the mechanics of continuous media. Tensor calculus; kinematics; stress and stress rate, conservation of mass, conservation of linear and angular momentum, energy balance, second law of thermodynamics; constitutive theory; linear and nonlinear elasticity, newtonian fluids, micropolar elasticity. Prerequisites: CE 2220. (Fall, spring, and summer, even years).

CE 6207. Theory of Elasticity I. 3 Credits.

Introduction to Cartesian tensors; deformation, stress, constitutive relations for linear elasticity; formulation of boundary value problems, variational principles, torsion and bending of prismatic rods, plane problems. Prerequisites: CE 2220. (Same as MAE 6207) (Spring).

CE 6208. Plasticity. 3 Credits.

Introduction to the continuum theory of plastic deformation. Physical basis of rate-independent plasticity. Concepts of yield, strain hardening and softening, reverse yield, and cyclic plasticity. Constitutive equations describing plastic deformation. Prerequisite: CE 6201 or CE 6206.

CE 6209. Mechanics of Composite Materials. 3 Credits.

Stress-strain relationship for orthotropic materials, invariant properties of an orthotropic lamina, biaxial strength theory for an orthotropic lamina. Mechanics of materials approach to stiffness, elasticity approach to stiffness. Classical lamination theory, strength of laminates. Statistical theory of fatigue damage. Prerequisite: CE 3240. (Spring, even years).

CE 6210. Introduction to Finite Element Analysis. 3 Credits.

Calculus of variations. Variational formulation of the finite element method. Weighted residual techniques. Computer implementation of the finite element method. Application to problems in heat transfer, stress analysis, fluid flow, and structural analysis. Prerequisites: Proficiency in one computer language; and CE 2220 and CE 3240. (Fall, Every Year).

CE 6301. Design of Reinforced Concrete Structures. 3 Credits.

Structural behavior of reinforced concrete structures, ultimate strength and deformation characteristics; design of structural components including beams, columns, floor slabs, deep beams, corbels, and composite slab/beam systems. Prerequisite: CE 3310.

CE 6302. Prestressed Concrete Structures. 3 Credits.

Structural behavior and failure modes of prestressed concrete structures; design in prestressed concrete, including long-span structures, bridges, and precast systems. Prerequisite: CE 3310.

CE 6310. Advanced Reinforced Concrete Structures. 3 Credits.

Conception, analysis, and design of low-rise and high-rise buildings by ultimate-strength methods, precast systems, progressive collapse, earthquake considerations, domes, folded plates, shell-type structures, and special topics. Prerequisite: CE 6301.

CE 6311. Bridge Design. 3 Credits.

Application of basic design procedures for reinforced and prestressed concrete bridges, according to AASHTO bridge specifications. Various types of concrete bridges, design superstructure bridge elements (deck slab, girders, bearing pads), and development of superstructure/substructure details. Prerequisite: CE 6302.

CE 6320. Design of Metal Structures. 3 Credits.

Structural behavior of metal structures and composite girders. Conception, analysis, and design of low-rise and high-rise buildings by elastic and inelastic methods. Earthquake considerations and special topics. Prerequisite: CE 4320.

CE 6321. Advanced Metal Structures. 3 Credits.

Conception and design of advanced structural components and systems, hysteretic behavior, plastic design principles, box-type girders, cable systems, and unique structural systems. Prerequisite: CE 6320. (As arranged).

CE 6340. Structural Dynamics. 3 Credits.

Vibration of continuous systems: membranes, beam plates, and shells; approximate methods of vibration analysis; methods of integral transform; analysis of nonlinear systems; wave propagation. Prerequisites: APSC 2058 and CE 3240. (Fall, odd years).

CE 6341. Random Vibration of Structures. 3 Credits.

Introduction to random processes, responses of linear structures to stationary and nonstationary random inputs. Structural responses to earthquakes, waves, boundary-layer turbulences, wind loads, etc. Failure analysis of structures under random loads. Prerequisites: APSC 3115 and CE 6340. (Spring, even years).

CE 6342. Structural Design to Resist Natural Hazards. 3 Credits.

Prediction of forces due to earthquakes and strong winds; generalized codes; pseudostatic methods for preliminary design; codes based on spectra, energy absorption and ductility; influence of foundations; ground failures; static and aeroelastic effects of strong winds. Design project. Prerequisites: CE 3240 and CE 4340; and CE 6340 or CE 6701. (Spring, Every Year).

CE 6350. Introduction to Biomechanics. 3 Credits.

Fundamentals of continuum mechanics as they apply to biological materials: concepts of stress, strain, and equilibrium; elastic and viscoelastic properties of solids; physiological fluid mechanics and bioheat and mass transfer. Fundamentals of solid mechanics of soft tissues and bone structures. Development of computer models and applications. Prerequisite: CE 2220. (Fall, Every Year).

CE 6401. Fundamentals of Soil Behavior. 3 Credits.

Soil mineralogy, clay-water-electrolyte systems, soil composition, fabric, structure, volume change behavior, permeability, coupled phenomena, in-situ evaluation of soil behavior. Prerequisite: CE 4410. (Fall, even years).

CE 6402. Theoretical Geomechanics. 3 Credits.

Porous media, stress-strain behavior of soil skeleton, elastic and elastoplastic models for soil behavior, critical state concept, cam clay, strength of soils, stress-dilatancy, stress paths. (Fall, odd years).

CE 6403. Foundation Engineering. 3 Credits.

Principles of soil mechanics applied to the analysis and design of mat foundations, pile foundations, retaining structures including sheeting and bracing systems, and waterfront structures. Foundations on difficult soils and reinforced earth structures. Prerequisite: CE 4410. (Spring, Every Year).

CE 6404. Geotechnical Earthquake Engineering. 3 Credits.

Ground motion, wave propagation, foundation isolation, site response analysis, seismic stability of retaining structures, soil structure interaction. Prerequisite: graduate standing.

CE 6405. Rock Engineering. 3 Credits.

Classification and properties of rock; nature of rock masses and rock discontinuities; field exploration; methods of excavation; design and applications to foundation slopes, tunnels, and chambers in rock. Prerequisite: CE 4410.

CE 6501. Environmental Chemistry. 3 Credits.

Principles of thermodynamics and kinetics, acid-base chemistry, alkalinity, coordination chemistry, precipitation, adsorption, redox chemistry. Prerequisites: CHEM 1111 and CHEM 1112. (Fall, Every Year).

CE 6502. Advanced Sanitary Engineering Design. 3 Credits.

Elements of design, including basic parameters and hydraulic requirements; layout and design of water supply and wastewater systems, pumping stations, and treatment plants; plant expansions and modifications. Prerequisite: CE 4530. (Spring, Every Year).

CE 6503. Principles of Environmental Engineering. 3 Credits.

Principles of chemical equilibrium and reaction kinetics, acid-base and redox reactions, chemical transport, and reactors. Reactor design of ozone contactor, air stripping tower, activated carbon adsorption, and membrane filtration by the principle of mass balance. Prerequisite: CE 3520. (Fall, Every Year).

CE 6504. Water and Wastewater Treatment Processes. 3 Credits.

Theory and application of commonly used processes. Sedimentation, coagulation, filtration, disinfection, gas transfer, activated sludge, trickling filters, oxidation ponds, sorption, and sludge stabilization and disposal. Process combinations to produce treatment systems. Nanotechnology and water reuse systems. Prerequisite: CE 3520. (Spring, Every Year).

CE 6505. Environmental Impact Assessment. 3 Credits.

Public policy and legislation on environmental quality. Methods for assessing impacts of engineering projects. Technology for assessing impacts on air, water, and land environments, applied to transportation facilities, water and wastewater facilities, industrial and community development. Prerequisites: CE 3520. (Fall).

CE 6506. Microbiology for Environmental Engineers. 3 Credits.

Principles of microbiology and their applications to biological processes in the natural environment and engineered systems. Engineering applications, principles of biochemistry and microbiology of drinking water quality, waste and wastewater treatment, and bioremediation. Prerequisite: CE 3520. (Spring, even years).

CE 6507. Advanced Treatment Processes. 3 Credits.

Principles and applications of advanced treatment systems for water, waste-water, and hazardous wastes, including: biological nutrient removal, oxidation-reduction processes, stripping, sorption, membrane processes, chemical precipitation, others. Prerequisite: CE 6504. (Fall and spring, Every Year).

CE 6508. Industrial Waste Treatment. 3 Credits.

Types of industries, waste sources. Characteristics, measurements, and evaluation. Minimization and reuse. Treatment process selection, development, and design. Regulations, permits, standards, monitoring, and pretreatment. (Fall, Every Year).

CE 6509. Introduction to Hazardous Wastes. 3 Credits.

Regulations, including RCRA and Superfund; transport and fate of hazardous substances; elements of environmental toxicology, risk assessment, and hazard ranking; monitoring, data collection, and evaluation; waste minimization. Prerequisite: CE 3520. (Spring, Every Year).

CE 6601. Open Channel Flow. 3 Credits.

Types and regimes of flow; energy and momentum principles, uniform flow, gradually varied flow, spatially and rapidly varied flow. Flow in nonprismatic channels. Unsteady flow; dam break problem, flood routing. Prerequisite: CE 3610.

CE 6602. Hydraulic Engineering. 3 Credits.

Hydraulic design of conveyance, regulating, and measurement structures. Design for spillways, energy dissipators, inlet and outlet works related to dams. Forces on hydraulic structure and stability analysis. Hydraulic turbines and pumps. Design considerations for flow through pipes. Transients and cavitation. Prerequisite: CE 3610.

CE 6603. Design of Dams. 3 Credits.

Project planning and investigations. Types of dams; design of earth-rock fill dams; stability analysis, foundation treatment, wind-wave protection. Construction methods for dams. Reservoir sedimentation. Safety inspection of dams. Prerequisite: CE 3610.

CE 6604. Advanced Hydrology. 3 Credits.

Precipitation, evaporation, and transpiration. Soil physics; stream flow, drainage basins, hydrograph analysis, and stream-flow routing. Design criteria, flood frequency statistics and analysis, flood forecasting and control, water supply forecasting. Prerequisite: CE 4620.

CE 6605. Ground Water and Seepage. 3 Credits.

Permeability theory of groundwater flow, flow nets, analogs, computer solutions; applications to engineering problems such as excavation dewatering, flow through dams, stabilization of earth slopes. Prerequisites: CE 4410. (Spring).

CE 6606. Mechanics of Water Waves. 3 Credits.

Irrrotational theory for deep- and shallow-water waves, reflexion, refraction, diffraction, attenuation. Water waves of finite amplitude: shallow-water theory, tides, bores, long-waves theory, conoidal and solitary waves. Wave generation by wind. Wave breaking and reflexion. Prerequisites: APSC 6213 and permission of the instructor. (Fall and spring, Every Year).

CE 6607. Water Resources Planning and Control. 3 Credits.

The parameters of water resources planning and control, economics of water resources and related natural resources, economics of water-quality control, physical parameters of water resource development, water resources law. Prerequisite: CE 4410. (Fall and spring, Every Year).

CE 6608. Hydraulic Modeling. 3 Credits.

Dimensional analysis and similitude. Types of models—physical, mathematical. Distortions in physical models. Erodible bed models. Prerequisite: CE 3610.

CE 6609. Numerical Methods in Environmental and Water Resources. 3 Credits.

Use of microcomputers in water resources. Elements of finite difference schemes, basic operations, convergence, stability, and consistency. Nonuniform flow and error analysis; unsteady laminar flow; diffusion problems; unsteady flow in open channels; water hammer, seepage flow, and diffusion-dispersion problems. Prerequisites: CE 2210 and MAE 3126. (Spring, Every Year).

CE 6610. Pollution Transport Systems. 3 Credits.

Distribution of pollutants in natural waters and atmosphere, diffusive and advective transport, mathematics for stream pollutant deoxygenation rates, groundwater pollution transport, sediment transport, thermal transport, numerical simulation of pollutant transports in streams and estuaries. Prerequisites: CE 3610 and MAE 2131. (Fall and spring, Every Year).

CE 6701. Analytical Mechanics. 3 Credits.

Fundamental principles, particle and rigid-body dynamics, generalized coordinates, variational principles and Lagrange's equations, nonholonomic systems, Hamilton's equations, theory of small oscillations. Prerequisites: APSC 2058 and APSC 2113. (Fall, Every Year).

CE 6702. Vehicle Dynamics. 3 Credits.

Engineering principles and analytical methods explaining the performance of an automotive vehicle. Basic mechanics governing vehicle dynamic performance in longitudinal, ride, and handling modes. Engineering analysis techniques applied to basic systems and subsystems to derive the governing equations. CE 6701 may be taken as a corequisite. Prerequisite: CE 6701. (Spring, even years).

CE 6705. Nonlinear Finite Element Modeling and Simulation. 3 Credits.

Rigid and flexible body methods for modeling crashes. Application of dynamic nonlinear finite element methods with contact algorithms for modeling crash phenomena. Modeling and simulation of vehicles, airbags, safety restraining systems, and highway barriers. (Spring).

CE 6706. Pavement and Runway Design. 3 Credits.

Pavement types, wheel-load characteristics; stresses in pavements and subgrades; empirical methods of design of flexible and rigid highway and airfield pavements; general principles of runway design. (Spring, odd years).

CE 6707. Systems Dynamics Modeling and Control. 3 Credits.

Introduction of concepts in control theory and applications to solve problems in civil and transportation engineering dealing with single-input/single-output and multi-input/multi-output systems. Review of classical control theory in the frequency and time domain, state-space analysis, system optimization, and non-linear control. (Fall).

CE 6721. Traffic Engineering and Highway Safety. 3 Credits.

Roadway traffic capacity and network performance measures; steady and unsteady traffic flow phenomena; traffic control signalization theory and practical implementation; monitoring techniques, instruments, and data processing for highway safety. Traffic related highway safety design concepts. (Fall).

CE 6722. Intelligent Transportation Systems. 3 Credits.

Commands, controls, and communications in modern multimodal transportation; infrastructure/highway and vehicle automation, advanced traffic management, vehicle control and safety systems; information, data, and sensory requirements; practical applications and projects. Prerequisites: CE 2710 or CE 3720. Recommended background: Basic knowledge of transportation engineering. (Spring, Every Year).

CE 6730. Sustainable Urban Planning. 3 Credits.

Human and physical processes shaping urban ecologies and environments; human-environment interactions in the context of an urban region; urban land use, transport and planning. Restricted to students with departmental approval. Prerequisite: CE 2710. (Spring, Every Year).

CE 6800. Special Topics. 1-6 Credits.

Topic to be announced in the Schedule of Classes.

CE 6801. Civil and Environmental Engineering Graduate Internship. 1 Credit.

May be repeated once for credit. Additional prerequisites may be required for a specific internship as determined by the research supervisor. Restricted to graduate students in the civil and environmental engineering program. Prerequisites: Required courses in the area of focus and permission of the department. (Fall and spring, Every Year).

CE 6808. Research. 1-12 Credits.

Basic research projects, as arranged. May be repeated for credit.

CE 6998. Thesis Research. 3 Credits.**CE 6999. Thesis Research. 3 Credits.****CE 8320. Theory of Elasticity II. 3 Credits.**

Application of integral transform and analytic function theory to solution of plane problems; elastic wave propagation. Three-dimensional elasto-statics. Prerequisites: APSC 6211 and CE 6207. (Spring, Every Year).

CE 8321. Nonlinear Mechanics of Continua. 3 Credits.

Polar decomposition, invariance, isotropy, representation theorems for invariants and isotropic tensor functions. Deformation, kinematics, stress, balance principles. Principles for constitutive relations. Applications to nonlinear elasticity and non-Newtonian fluids. Prerequisite: CE 6206.

CE 8330. Advanced Finite Element Analysis. 3 Credits.

Review of variational formulation of the finite element method. Formulation of various continuum and structural elements. Application to static and dynamic problems in elasticity, plasticity, large deflection, and instability in plates and shells. Recent developments in finite element methods. Prerequisites: CE 6206 and 6210; or MAE 6210 and MAE 6286. (Same as MAE 6288) (Fall and spring, Every Year).

CE 8350. Sedimentation Engineering. 3 Credits.

Problems of erosion and sedimentation. Properties of sediment. Initiation of motion. Suspension of sediment and sediment discharge theories. Sedimentation measurements. Economic and legal aspects. Prerequisites: CE 6601 or permission of the department. (Fall and spring, Every Year).

CE 8351. Mechanics of Alluvial Channels. 3 Credits.

Physical processes in drainage basins and channels. Channel forms and bed forms. Hydraulics and sediment transport in alluvial channels. Design of stable channels. Qualitative and quantitative response of rivers. Channel stabilization, navigation channels. Case studies including environmental impacts. Prerequisites: CE 6601 or permission of the department. (Fall and spring, Every Year).

CE 8352. Advanced Hydraulics. 3 Credits.

Theory of unsteady flow. Diffusion and dispersion through pipes and open channels. Numerical solutions using finite element and finite difference methods. Prerequisites: CE 6601 or permission of the department. (Fall and spring, Every Year).

CE 8370. Intelligent Systems Theory and Applications. 3 Credits.

Overview of artificial intelligence, neural networks, genetic algorithms, fuzzy systems, and hybrid intelligent systems and their integration with other information processing methods. Intelligent systems applications; examples are drawn from ITS and traffic engineering, vehicle safety, remote sensing, and structural design optimization. Prerequisite: CE 6707.

CE 8380. Advanced Biomechanics. 3 Credits.

Historical overview of biomechanics and biomaterials. Fundamental concepts in mechanics as applied to the treatment of biological systems. Approaches to the mechanical analysis of the human structure under physiological and non-physiological loading conditions. Constitutive laws for biological materials. Finite element applications. Prerequisite: CE 6206. (Fall and spring, Every Year).

CE 8998. Advanced Reading and Research. 1-12 Credits.

Doctoral candidates preparing for qualifying examination. (Fall and spring, Every Year).

CE 8999. Dissertation Research. 1-12 Credits.

Doctoral candidate research. Restricted to doctoral candidates. (Fall and spring, Every Year).

CLASSICAL STUDIES (CLAS)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CLAS 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details.

CLAS 1001. Ancient Mediterranean Civilizations. 0-3 Credits.

Overview and brief introduction to the civilizations of the ancient Mediterranean world ca. 6000 BCE through ca. 476 CE. Aspects of the political, social, cultural, economic, diplomatic, military, artistic, and religious history of the ancient Near East, Egypt, Israel, Greece, and Rome. Restricted to freshmen and sophomores.

CLAS 2104. Ancient Medicine and Modern Medical Terms. 3 Credits.

The formation of medical terms derived from Greek and Latin, along with principles that govern the derivation of their meaning. The course includes a survey of ancient medical centers and practices.

CLAS 2105. Special Topics. 0-3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

CLAS 2105W. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CLAS 2106. Mythology of the Classical World. 3 Credits.

The creation of the world, the nature of the gods, and the adventures of heroes as described in various Greek and Roman literary sources (e.g., epic, drama, hymns) and as shown in ancient art.

CLAS 2106W. Mythology of the Classical World. 3 Credits.

The creation of the world, the nature of the gods, and the adventures of heroes as described in various Greek and Roman literary sources (e.g., epic, drama, hymns) and as shown in ancient art. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CLAS 2107. Families and Politics in Ancient Drama. 3 Credits.

Study of Greek and Roman tragedy and comedy; the nature and setting of dramatic performance in classical antiquity.

CLAS 2112. History of Ancient Greece. 3 Credits.

A political and social survey of Bronze Age Minoan and Mycenaean civilizations, the Iron Age, Archaic Period, Classical Greece through Alexander the Great. (Same as HIST 2112).

CLAS 2113. The Roman World to 337 A.D.. 3 Credits.

Prehistoric Italy; rise and decline of the Roman Empire and Latin civilization; cultural, social, and political developments in the Greek world under Roman rule. Same as HIST 2113.

CLAS 2802. Gods and Goddesses of the Ancient Near East. 3 Credits.

Focus on texts from ancient Mesopotamia, Egypt, Syria, Phoenicia, Israel, and the Hittites. Readings from primary sources translated into English as well as secondary literature.

CLAS 2803. The Ancient Near East and Egypt to 322 B.C.. 3 Credits.

Survey of Egyptian, Mesopotamian, Anatolian, West Semitic, and Iranian civilizations from the Neolithic period to Alexander's conquest.

CLAS 2804. History of Ancient Israel. 3 Credits.

The history of ancient Israel from the Patriarchs through the Romans. Topics include historical, archeological, political, social, cultural, religious, diplomatic, military, economic, and intellectual events, movements, and relationships. Same as HIST 2804.

CLAS 3104. Dead Sea Scrolls. 3 Credits.

Manuscript discoveries and excavations at Khirbet Qumran with some attention to additional sites in the region of the Dead Sea. Focus on the history and diversity of Second Temple Judaism, Second Temple hermeneutical methods, Jewish apocalypticism, Jewish messianism, the development of the canon, and textual criticism of the Hebrew Bible.

CLAS 3105. Topics in Classical Studies. 0-3 Credits.

CLAS 3107. Law and Diplomacy in the Ancient Near East and Mediterranean. 3 Credits.

Focus on texts from ancient Mesopotamia, Egypt, Syria, Phoenicia, Israel and Judah, and the Hittites, as well as Moab and Ammon. Readings from primary sources translated into English as well as secondary literature.

CLAS 3111. Topics in Ancient History. 3 Credits.

May be repeated for credit provided the topic differs. Same as HIST 3111.

CLAS 3112. Art and Archaeology of Pompeii. 3 Credits.

Introduction to the Roman world and Roman daily life through study of evidence found in the exceptionally well-preserved ancient town of Pompeii.

CLAS 3113. Greece and Rome in the Art and Architecture of Washington D.C.. 3 Credits.

The influences of Classical Greek and Roman architecture, design, and symbols on urban design, public architecture, and civic sculpture in late eighteenth, nineteenth, and early twentieth century Washington, D.C. within their historical, political, and cultural contexts. At least one third of this course involves field trips, including walking tours and visits to monuments and museums.

CLAS 3114. Topics in Ancient Literatures and Cultures. 3 Credits.

May be repeated for credit provided the topic differs.

CLAS 3115. Topics in Ancient Art and Archaeology. 3 Credits.

May be repeated for credit provided the topic differs. Same as AH 3105.

CLAS 3116. Identity in the Greco-Roman World. 3 Credits.

Questions of identity surrounding the Romans and non-Romans who populated the ancient Mediterranean world in classical antiquity and whose culture is considered the cornerstone of Western civilization.

CLAS 3117. Alexander The Great. 3 Credits.

Close reading of ancient primary sources reveals the complex personality and remarkable deeds of Alexander the Great (356-323 BCE); the nature of Alexander's military success, lasting effects of his conquests, and long-term impact on the varied people and lands of his empire. Prerequisites: AH 3101 or HIST 2112. (Same as HIST 3117).

CLAS 3119. The Ancient Economy. 3 Credits.

This course introduces students to the sources and approaches to the study of the economic history of ancient Greece and Rome. Key issues that we will explore in this course include the "ecologies" of the Mediterranean region, trade and transport, the invention of coinage and monetization, taxation, food production, consumption, and slavery.

CLAS 3901. Directed Project. 1-3 Credits.

Individual advanced reading or research, to be arranged with a member of the faculty. May be repeated for credit. Permission of the instructor and the department required prior to enrollment.

CLAS 3901W. Directed Project. 1-3 Credits.**CLAS 4111. Capstone Study. 3 Credits.**

The capstone study seminar enables junior or senior majors to design, in consultation with a Classical Studies faculty member, a culminating project aligned with their interests, previous curricular experience, and/or future goals. The results of a student's capstone study is submitted as a written report and shared with all Classical Studies majors in a presentation that might include written, oral, and/or digital formats. Capstone studies should demonstrate that a student can locate and evaluate information about the ancient world in both traditional and digital forms and present their findings clearly and logically. Restricted to juniors or seniors in the classical studies program. Recommended background: Classical Studies.

CLAS 4901. Directed Project. 1-3 Credits.

Continuation of CLAS 3901. Individual advanced reading or research, to be arranged with a member of the faculty. May be repeated for credit. Permission of the instructor and the department required prior to enrollment.

CLINICAL EMBRYOLOGY AND REPRODUCTIVE TECHNOLOGY (CERT)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CERT 3004. Endocrinology for Health Sciences. 3 Credits.

How hormones control the flow of information between different cells and tissues with an emphasis on the human reproductive system; classes of hormones, sources and synthesis of hormones, receptors and target tissues, mechanisms of action and regulation, and methods used in endocrinology. Prerequisites: BISC 1111; or BISC 1115 and BISC 1125.

CERT 3005. Topics in Biomedical Science. 1 Credit.

Topics vary by semester. May be repeated for credit provided topic differs. See Schedule of Classes for more details. Prerequisites: BISC 1111; or BISC 1115 and BISC 1125.

CERT 4010. Clinical Human Embryology. 3 Credits.

Physiology of the female reproductive system; gamete biology, fertilization and early embryo development; embryo culture techniques, intracytoplasmic sperm Injection (ICSI), and embryo selection and transfer. Proctor fee. Prerequisites: BISC 1111; or BISC 1115 and BISC 1125.

CERT 4011. Human Embryology Laboratory. 1 Credit.

Techniques used in the clinical embryology laboratory, including embryo culture, oocyte retrievals, selection and egg denudation, sperm preparations for in vitro fertilization (IVF), and intracytoplasmic sperm injection (ICSI) procedures. CERT 4010 may be taken as a corequisite. Laboratory fee. Prerequisites: CERT 4010.

CERT 4012. Clinical Human Andrology. 3 Credits.

The physiology of the male reproductive system; sperm anatomy and motility, seminal plasma, and male gamete biology. Proctor fee. Prerequisites: BISC 1111; or BISC 1115 and BISC 1125.

CERT 4013. Human Andrology Laboratory. 1 Credit.

Techniques used to analyze semen for assisted reproduction procedure; sperm morphology, motility and vitality, sperm preparation, and chromatin assessment. CERT 4012 may be taken as a corequisite. Laboratory fee. Prerequisites: CERT 4012.

CERT 4014. Human Reproductive Cryobiology. 3 Credits.

Theory and methods used to freeze sperm, testicular tissues and embryos for use during in vitro fertilization procedures. Cryo-injuries and vitrification solutions. Proctor fee. Prerequisites: BISC 1111; or BISC 1115 and BISC 1125.

CERT 4015. Human Cryobiology Laboratory. 1 Credit.

Freezing techniques for assisted reproductive technologies; sperm and embryo freezing, embryo stage vitrification, blastocyst slow freezing, and testicular sperm freezing. CERT 4014 may be taken as a corequisite. Laboratory fee. Prerequisites: CERT 4014.

CERT 4016. Preimplantation Genetic Diagnosis Laboratory. 1 Credit.

The role of preimplantation genetics procedures for use in reproductive medicine; embryo biopsies at different developmental stages and trophectoderm cell biopsy at the blastocyst stage. MLS 4171 may be taken as a corequisite. Laboratory fee. Prerequisites: MLS 4171.

CERT 4017. Clinical Experience in Embryology. 3 Credits.

Application of embryology techniques in a clinical assisted reproductive technology (ART) laboratory facility. Proctor fee. Prerequisites: MLS 4010 and MLS 4011.

CERT 4018. Clinical Experience in Andrology. 3 Credits.

Application of andrology techniques in a clinical assisted reproductive technology (ART) laboratory facility. Proctor fee. Prerequisites: MLS 4012 and MLS 4013.

CERT 4019. Clinical Experience in Cryobiology. 3 Credits.

Application of cryobiology techniques in a clinical assisted reproductive technology (ART) laboratory facility. Proctor fee. Prerequisites: MLS 4014 and MLS 4015.

CERT 4020. Clinical Experience in Preimplantation Genetic Diagnosis. 3 Credits.

Application of preimplantation genetic diagnosis techniques in a clinical assisted reproductive technology (ART) laboratory facility. Proctor fee. Prerequisites: MLS 4016 and MLS 4171.

CLINICAL MANAGEMENT AND LEADERSHIP (CML)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CML 2140. Management of Human Resources in Health Sciences Organizations. 3 Credits.

Builds on concepts introduced in HSci 104. Theory and application of management and leadership as they affect the management of human resources in health sciences organizations. Focus is on leadership, ethics, and organizational dynamics in a changing health care environment.

CML 2141. Planning and Marketing in Health Sciences. 3 Credits.

The role of planning and marketing in the management and promotion of health sciences services, products, and organizations. Focus on the theory and application of quality principles in assessment of on-going organizational effectiveness, concepts and techniques of project planning, and methods for identifying and addressing customer needs.

CML 2142. Financial Management in the Health Sciences. 3 Credits.

An overview of accounting and financial concepts for management of health sciences organizations. Budgeting, cash management, reimbursement guidelines, and financial management.

CML 2143. Current Issues in Health Sciences Management. 3 Credits.

Evaluation of major problem areas in the management of health sciences organizations. Discussions include legal, technological, managerial, organizational, and leadership issues in the changing health care environment.

CML 4144. Seminar in Health Science Leadership. 3 Credits.

.

CML 6020. Fundamentals of Correctional Health Care. 3 Credits.

General overview of the U.S. criminal justice system; the legal framework underpinning correctional health care; defining elements of the correctional standard of health care; and ethical dilemmas facing the correctional health care administrator. Restricted to students in the graduate certificate in correctional health administration program or with the permission of the instructor.

CML 6021. Correctional Health Care Administration for Special Populations. 3 Credits.

Health care policy and programmatic requirements for managing incarcerated populations with special health care needs, including women, juveniles, detainees, sexual minorities, the elderly, disabled persons, and persons with serious mental illness (SMI) and chronic addiction. Restricted to students in the graduate certificate in correctional health administration program or with the permission of the instructor.

CML 6023. Correctional Health Care Fiscal Management. 3 Credits.

Essential fiscal management responsibilities of the correctional health care administrator; cost efficient health care staffing, budgeting and inventory management, contract development and oversight, cost containment strategies, and the effective use of financial metrics. Restricted to students in the graduate certificate in correctional health administration program or with the permission of the instructor.

CML 6025. Correctional Health Care Oversight. 3 Credits.

Essential policy and programmatic requirements that ensure effective oversight of a correctional health care program; health care governance, quality improvement, infection prevention and control, and risk management. Restricted to students in the graduate certificate in correctional health administration program or with the permission of the instructor.

CML 6050. Correctional Health Care Delivery. 3 Credits.

Key operational responsibilities of the correctional health care administrator; policy development, staffing, and managing a multidisciplinary health care team; ensuring access to efficiently run sick call and chronic care services; and providing necessary oral health care and ancillary support services. Restricted to students in the graduate certificate in correctional health administration program or with the permission of the instructor.

CML 6202. Human Resource Development. 3 Credits.

Methods, techniques and policies appropriate for the development and management of human resources complementary to an organization's vision, strategy, and desired culture. Managerial knowledge, skills and behaviors required for the effective management of people to promote and maintain a professional health care organization are explored.

CML 6203. Health Information Quality and Outcomes. 3 Credits.

Approaches to medical informatics to support managerial decision making, patient care, and quality improvement in clinical practices. Ethical, legal, and social dimensions of health care information technology.

CML 6204. Marketing Clinical Services. 3 Credits.

The marketing process from the viewpoint of clinical practice managers. Needs assessment, environmental analysis, planning, distribution, pricing, promotion.

CML 6205. Case Studies in Clinical Management and Leadership. 3 Credits.

Integrative case-based approach to the analysis of complex problems in the management and leadership of clinical practice services.

CML 6274. Health Economics and Finance. 3 Credits.

Issues of health care economics, financial management, and budgeting that relate to managerial decision-making. Applied financial management, management control systems, budgeting, staffing, and cost accounting.

CML 6275. Leadership and Change in Clinical Management. 3 Credits.

Theories and models of leadership and change from a systems perspective. The development of leadership solutions to problems in clinical organizations; integration of all field course work into implementation plans for health care system changes.

CLINICAL OPERATIONS AND HEALTHCARE MANAGEMENT (COHM)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

COHM 2141. Marketing for Healthcare Leaders. 3 Credits.

Skills needed by health care leadership to promote services and strategic change; theory and application of marketing principles for the purpose of project planning, organizational growth, and public relations. Restricted to students in the graduate certificate in correctional health administration program or with the permission of the instructor.

COHM 2142. Finance for Health Care Managers. 3 Credits.

Introduction to key finance competencies necessary for clinical and healthcare operations; costs, expenditure, and reimbursement of services. Restricted to students in the clinical operations and health care management program.

COHM 4145. Case Studies for Clinical Healthcare Management and Leadership. 3 Credits.

Builds on prior coursework to apply clinical operations and health care management practices to a case studies format. Students analyze and discuss real-life operational case studies from various health care organizations. Recommended background: students in the clinical operations and health care management program.

COHM 4150. Practicum in Clinical Operations. 1-3 Credits.

Supervised field work in clinical operations and health management, arranged in consultation with the program director. May be repeated for credit. Restricted to students in the clinical operations and health care management program. Prerequisites: CML 4144 and COHM 4145.

COHM 6107. Economics of Health Care Systems. 3 Credits.

Economic principles as they apply to health policy in the public and private sectors. Restricted to students in the health services and outcome research program.

COHM 6210. Strategic Communications. 3 Credits.

Using effective communication in the health care environment to maximize operational outcomes; critical evaluation of personal communication styles. Recommended background: COHM major.

COHM 6215. Population Health for Health Care Innovators. 3 Credits.

Key concepts of population health; historical perspective on health care in the United States; public health as a health system; regulations and laws; the health workforce infrastructure; interventions.

COHM 6220. Finance for Health Care Operations. 3 Credits.

Applied health economics, finance and policy for high-quality, value-based health care operations; costs, expenditure, and reimbursement of services; strategic financial planning tools. Restricted to students in the clinical operations and health care management program.

COHM 6320. Informatics for Operational Leadership and Health Care Quality. 3 Credits.

The life cycle of clinical informatics from a systems theory perspective; clinical informatics and its affiliated data, governance, and interoperability structures. Restricted to students in the clinical operations and health care management program.

COHM 6430. Health Care Systems Operations. 3 Credits.

Management in the health care industry; systems and functions required for planning, producing, and delivering high-quality, patient-centered health care services. Restricted to students in the clinical operations and health care management program.

COHM 6465. Practicum in Clinical Operations. 1-3 Credits.

Supervised field work in clinical operations and health management, arranged in consultation with the program director. May be repeated for credit. Program approval and completion of 9 credits in graduate-level clinical management and leadership (CML) coursework are required prior to enrollment. Restricted to students in the clinical operations and health care management program.

COHM 6470. Applications in Clinical Operations and Health Care Management. 3 Credits.

Builds on prior coursework to apply clinical operations and health care management practices; analysis and discussion of real-life operational case studies from a diverse array of health care organizations. Restricted to students in the clinical operations and health care management program. Prerequisite: COHM 6430.

CLINICAL RESEARCH ADMINISTRATION (CRA)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CRA 2101. Basics of Clinical Research. 3 Credits.

Fundamental concepts, trends, regulations, and practices in clinical research. An overview of industry and government practices and policies in the development of patient care products (drug, devices, biologicals, and diagnostics) and treatment protocols.

CRA 2102. Processes of Clinical Research. 3 Credits.

The key process steps involved in the design, implementation, analysis, and approval of investigational new products with an emphasis on the operational steps involved in conducting clinical trials.

CRA 2103. Good Clinical Practices. 3 Credits.

The organization and management of data, documents, materials and findings resulting from clinical research as prescribed by governmental institutions, regulatory agencies, industry sponsors, and research organizations. Audit standards and mechanisms are introduced, and practice audits are conducted.

CRA 2104. Business of Clinical Research. 3 Credits.

Fiscal and managerial components of clinical research, including the budgeting processes, fiscal management, software applications, legal and contractual issues, and recruitment of personnel and subjects. Examination of all entities involved in clinical research, including drug, device, biological, and diagnostics sponsors; academic medical centers; and contract research organizations, site management companies, physician-run organizations, and health delivery organizations.

CRA 2105. Capstone in Clinical Research Administration. 3 Credits.

Identification, analysis, and application of the various administrative aspects of clinical research associated with the development and implementation of a clinical trial for an investigational product.

CRA 2107. Introduction to Monitoring Clinical Trials. 3 Credits.

Introduction to the role of monitoring in clinical research administration to ensure valid, reliable, and accurate clinical data and adherence to good clinical practices by sponsors and study sites.

CRA 4106. Clinical Research Administration Internship. 3 Credits.

.

CRA 6201. Critical Analysis Clinical Research. 3 Credits.

Analyses of the essential components of clinical research including good clinical practice, human subject protection, study design, and trials administration.

CRA 6202. Medicines Development. 3 Credits.

Examination of nonclinical, clinical, commercial, regulatory and risk assessment strategies required to develop a clinical development plan for an approvable, marketable new therapeutic and propose life cycle management strategies.

CRA 6203. Partnerships with Human Subjects. 3 Credits.

Regulatory, policy, ethical, and practical considerations associated with the engagement, recruitment, retention, and interaction with human research subjects.

CRA 6204. The Clinical Research Industry. 3 Credits.

Integration of project management principles, decision making models, cross-cultural competency, and interdisciplinary team dynamics to facilitate effective and efficient conduct of clinical trials.

CRA 6205. Clinical Investigation. 3 Credits.

Analysis and evaluation of study design strategies and current practices for major therapeutic areas of clinical research (e.g., vaccine development, cardiovascular disease, anti-infectives, CNS, etc.).

CRA 6208. International Clinical Research. 3 Credits.

Analysis of the strategies and methods of clinical research in international settings; explore cultural and ethical consideration in global clinical research projects.

CRA 6209. Quality and Risk Management. 3 Credits.

Managing risk and safety assessments to ensure quality in clinical research.

CRA 6210. Medical Writing/Clinical Research. 3 Credits.

Strategies and practices in writing documentation related to clinical research administration.

CRA 6211. Monitoring, Auditing, and Oversight in Clinical Research. 3 Credits.

Key stakeholder roles, responsibilities, and processes associated with monitoring, auditing, and oversight in clinical trial conduct. Recommended background: MSHS in CRA or graduate certificate student status.

CRA 6212. Teaching Strategies in the Health Professions. 3 Credits.

Teaching skills pertinent to the delivery of education in health sciences professions. Course design illustrates teaching and learning practices grounded in andragogy, contributing to curriculum program objectives of enhancing teaching skills. (Same as EHS 6212).

CRA 6213. Curriculum Development in Health Professions. 3 Credits.

Curriculum development and assessment skills in the health professions. Variables that affect the manner in which individuals learn and interact within professions and organizations.

CRA 6275. Leadership and Change in Clinical Research Administration. 3 Credits.

A capstone course focusing on the concept of leadership within the contexts of health professionals, health systems, and health policy.

CLINICAL TRANSLATIONAL SCIENCE (CTS)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CTS 6201. Critical Analysis in Clinical Research. 3 Credits.

Analyses of the essential components of clinical research including good clinical practice, human subject protection, study design, and trials administration.

CTS 6202. Research Methods for Clinical and Translational Research. 2 Credits.

The design and conduct of clinical research with an emphasis on the types of studies most relevant to health care professionals.

CTS 6203. Legal and Ethical Issues in Clinical and Translational Research. 1 Credit.

Legal and ethical issues that arise in the design and conduct of clinical and translational research.

CTS 6205. Clinical Investigations. 3 Credits.

Analysis and evaluation of study design strategies and current practices for major therapeutic areas of clinical research, including vaccine development, cardiovascular disease, anti-infectives, CNS, and others.

CTS 6261. Foundations in Clinical and Translational Research. 3 Credits.

Overview and analysis of translational research principles and practice; analysis and integration of basic clinical community health and health services research concepts as applied to key diseases.

CTS 6264. Clinical and Translational Research Capstone Project. 3 Credits.

Application of the knowledge gained during the course of the program through the completion of a mentored independent research project.

CTS 6265. Grantsmanship in Translational Health Science. 3 Credits.

Writing grant proposals to fund clinical research, with an emphasis on translational research proposals; persuasive communication, conceptually-based hypotheses, and research methods and the grant application process.

CTS 6266. Grant Writing for the Individual Investigator. 3 Credits.

The complete process of research grant proposal development; organizing collaborators, mentors and advisory committees, and negotiating those relationships. Designed for early independent investigators (MD/DO, EdD, PhD, or other terminal degree) who are prepared to develop a grant for submission.

CTS 6273. Bioinformatics for Genomics. 3 Credits.

Bioinformatics tools for different analytical situations; strengths and limitations of the most common bioinformatics strategies. Generalizing acquired knowledge and its underlying principles and techniques to other types of big data applications for the purpose of interpretation of results.

CTS 6275. Transdisciplinary Research Proposal. 3 Credits.

Integration of the competencies acquired throughout the program. Development and submission of a transdisciplinary research proposal that responds to a call for proposals from an external sponsor, such as the National Institutes of Health.

CTS 6285. Collaboration and Team Science in Practice and Research. 3 Credits.

Approaching health, technology, social, and environmental problems with cross-disciplinary engagement and collaboration. Foundational and practical principles and their impact on collaborative and team science engagements.

COLLEGE OF PROFESSIONAL STUDIES (CPS)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CPS 0920. Continuing Research-Master's. 1 Credit.

CPS 1000. Special Topics. 1-4 Credits.

CPS 1090. Assessment of Prior Learning. 1-12 Credits.

CPS 1191. Special Topics. 1-3 Credits.

Pre-college level course of various topics. May be repeated for credit provided the topic differs.

CPS 2017. Intrusion Detection Systems. 2 Credits.

Introduction to and experimentation with intrusion detection tools for data capture analysis; recognizing types of cyber threats and creating in-depth defense measures. Recommended background: Prior coursework and/or experience in information systems protection, cyber threat detection, risk management, computer network defense, or related topics.

CPS 2101. The Criminal Justice System. 4 Credits.

CPS 2102. Resource Management. 4 Credits.

CPS 2103. Particular Forms of Crime. 4 Credits.

CPS 2104. Leading Teams. 4 Credits.

CPS 2105. Deviance and Social Control. 4 Credits.

.

CPS 2106. Strategic Planning. 4 Credits.

CPS 2107. Models of Policing. 4 Credits.

CPS 2108. Criminal Intelligence. 4 Credits.

.

CPS 2109. Criminal Analysis. 4 Credits.

CPS 2110. Predictive Policing. 4 Credits.

CPS 2130. Introduction to Forensic Science. 4 Credits.

.

CPS 2131. Crime Scene Investigation. 4 Credits.

CPS 2132. Computer Crime Investigation. 4 Credits.

CPS 2133. Incident Management. 4 Credits.

CPS 2134. Ethical Dilemmas in Policing. 4 Credits.

CPS 2170. Domestic Violence. 4 Credits.

CPS 2171. The Criminal Mind. 4 Credits.

CPS 2172. Comparative Police Systems. 4 Credits.

CPS 2173. Transnational Threats and Security. 4 Credits.

.

CPS 2174. Crisis and Emergency Planning. 4 Credits.

.

CPS 2175. Emergency Public Health Issues. 4 Credits.

.

CPS 2176. Media, Public Relations, and Crisis Communication. 4 Credits.

.

CPS 2177. Crime Prevention and Physical Security. 4 Credits.

.

CPS 2191. Special Topics. 1-6 Credits.

CPS 4190. Capstone Project. 4 Credits.

CPS 4192. Capstone Simulation. 2 Credits.

CPS 4199. Independent Research. 1-6 Credits.

CPS 6291. Special Topics. 1-6 Credits.

CPS 6292. Special Topics. 0 Credits.

Topics in politics and strategic communications. Topics vary by semester. Consult the Schedule of Classes for more details.

CPS 6295. Supervised Internship. 1-6 Credits.

CPS 6300. Capstone Research Project. 3 Credits.

Culminating experience for students in the master's in strategic public relations program. Students use skills and knowledge learned in the program to prepare an in-depth case study on a recent major public relations case or crisis. Prerequisites: PSPP 6201, PSPP 6202, PSPP 6203, PSPP 6204, PSPP 6205 and PSPP 6206.

COLUMBIAN COLLEGE OF ARTS AND SCIENCES (CCAS)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CCAS 0920. Continuing Research - Master's. 1 Credit.

.

CCAS 0940. Continuing Research - Doctoral. 1 Credit.

CCAS 1005. GWECF Advising. 0 Credits.

CCAS 2154. Elective Internship. 0-3 Credits.

Fieldwork and academic work carried out under faculty supervision. Students contract with agency, faculty, and Columbian College. Restricted to students of at least sophomore standing who have obtained approval from the Columbian College Undergraduate Studies Office.

CCAS 2190. Special Interdisciplinary Topics. 1-3 Credits.

May be repeated for credit provided the topic differs.

CCAS 2190W. Special Interdisciplinary Topics. 1-3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CCAS 3001. Undergraduate Research. 0-3 Credits.

Open to undergraduates at any level. Focused exploration of an idea, question, or issue, under the guidance of a research mentor/supervisor, culminating in a report about the experience. Students must find a sponsoring faculty member and receive approval from the Office of Undergraduate Studies in the Columbian College of Arts and Sciences. Zero-credit option is graded on a P/NP basis only and is available only during summer sessions. Restricted to students who find a faculty mentor/supervisor and receive CCAS approval.

CCAS 4191. Special Interdisciplinary Major Capstone. 3 Credits.

Required of all students completing a special interdisciplinary major.

CCAS 6154. Elective Internship. 0-3 Credits.

Fieldwork and academic work carried out under faculty supervision. Students contract with agency, faculty, and Columbian College. May be repeated to a maximum of 6 credits. Admission by permission of Columbian College. Graded on a P/NP basis only. Zero credit option available only during summer sessions.

CCAS 8888. THIS IS A TEST COURSE PLEASE IGNORE. 3 Credits.

This is a test course, please ignore.

CCAS 8920. Continuing Research - Masters. 1 Credit. N/A.

CCAS 8999. THIS IS A TEST COURSE PLEASE IGNORE. 3 Credits.

THIS IS A TEST COURSE.

COMMUNICATION (COMM)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

COMM 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details.

COMM 1025. Introduction to Communication Studies. 3 Credits.

Introduction to historical and intellectual development of the field. Students survey the origins of contemporary theory; learn about fundamental concepts, models, investigative tools, and contexts of communication; and explore a variety of professional opportunities awaiting communication graduates.

COMM 1040. Public Communication. 3 Credits.

Study and practice of the basic techniques of public speaking used to inform, to entertain, and to persuade audiences. Emphasis on the speech-building process: audience analysis, research, development, composition, organization, style, delivery, and criticism.

COMM 1041. Interpersonal Communication. 3 Credits.

Study and practice of verbal and nonverbal communication in ritual, information and perspective sharing, problem solving, and relationship formation, maintenance, and dissolution. Designed to raise awareness of the complexity and power of the communication process in daily life and to help students develop interpersonal skills cognitively, affectively, and behaviorally.

COMM 1042. Business and Professional Speaking. 3 Credits.

Study of the communication process in business and professional organizations; practice in interviewing, small group communication, and public presentations. For non-majors and non-minors only.

COMM 2000. Sophomore Colloquium. 3 Credits.

Topic vary by semester. See the Schedule of Classes for more detailed information. Restricted to CCAS students with sophomore standing.

COMM 2100. Communication Theory. 3 Credits.

The nature and function of communication theory as a framework for the study of communicative behavior; analysis of paradigmatic approaches in rhetorical, interpersonal, and mass communication theories and models. Restricted to students in the communication program. Prerequisite: COMM 1025.

COMM 2120. Small Group Communication. 3 Credits.

The study and practice of communication in small groups, focusing on problem solving, norms, roles, and leadership. Prerequisite: COMM 1025 or permission of the instructor.

COMM 2140. Nonverbal Behavior. 3 Credits.

Introduction to predominant theories, principles, and problems in the study of nonverbal behavior; application of research results to everyday life. Topics include facial expression, eye behavior, physical appearance, body movement and gestures, tactile messages, vocal characteristics, use of time, spatial dynamics, gender and life-stage differences.

COMM 2162. Sociology of the Family. 3 Credits.

Examination of the stages of family life: birth, childhood, premarital relationships, marriage and sex roles in marriage, retirement, and old age. Special emphasis on development and maintenance of interpersonal relations. Prerequisites: SOC 1001 or SOC 1002 or COMM 1025. (Same as SOC 2162).

COMM 3110. Research Methods-Communication. 3 Credits.

Processes of inquiry within interpersonal and public communication. Students are introduced to concepts of framing research questions, conducting literature reviews, developing a research design, using qualitative and quantitative research tools, and interpreting results of research in communication. Prerequisite: COMM 2100.

COMM 3170. Organizational Communication. 3 Credits.

Exploration of the philosophy, process, problems, and potential of human communication within organizational contexts. May involve experiential workshops and fieldwork.

COMM 3171. Professional Communication. 3 Credits.

Principles and theories of communication applied to situations encountered in organizational and professional environments. Development of knowledge and abilities for workplace tasks, such as interviewing, facilitating meetings, providing performance appraisals, designing and delivering instructional materials and other professional presentations.

COMM 3172. Health Communication. 3 Credits.

Exploration of the nature, functions, and impact of relational communication in the context of health care. Both formal (health care organizations) and informal (family communication) systems may be studied. Topics can include provider-patient interaction, media and health, confirmatory communication. Prerequisites: COMM 1041 or COMM 2100 or permission of the instructor.

COMM 3173. Communication in a Mediated World. 3 Credits.

An exploration of human-to-human communication mediated by computer technology. Traditional communication theories are applied and adapted to the computer-mediated realm; newer theories of computer-mediated communication are addressed.

COMM 3174. Intercultural Communication. 3 Credits.

Exploration of the process, trends, rewards, and difficulties of human communication in intercultural contexts, with an eye toward establishing guidelines for mitigating miscommunication across cultures. May involve fieldwork.

COMM 3175. Strategic Communication. 3 Credits.

Exploration of the strategies and techniques employed in successful communication in the face of obstacles such as shrinking budgets and technological expansion. Emphasis on the principles of communication planning through a strategic matrix in an evolving communication environment.

COMM 3176. Issues and Image Management. 3 Credits.

The issues and image management function in corporate, professional, and nonprofit organizations. Assignments may include in-class collaboration on case studies of communication campaigns and crisis communication strategies, interviews with professionals in the practice of communication management, and a communication audit of strategies and messages of a selected organization.

COMM 3177. Corporate Ethical Communication. 3 Credits.

How businesses analyze their communication methods in the context of internal ethical standards. General codes of ethics, marketing ethics, corporate social responsibility, consumer protection, environmental protection, and ethical issues that corporate decision makers face in developing policies that affect employees, customers, and society as a whole.

COMM 3179. Sexual Communication. 3 Credits.

Exploration of sexual communication addressing behaviors, attitudes, and knowledge; the formation of sexual norms, negotiating sexual intimacy and safer-sex, gender roles in sexual relationships, sexual health communication campaigns, and parent-child sexual communication.

COMM 3180. Communication Criticism. 3 Credits.

Evaluation of communication paradigms along critical dimensions of analysis. Prerequisites: COMM 1040 or COMM 4150 or permission of the instructor.

COMM 3190. Selected Topics. 1-3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

COMM 4150. Persuasion. 3 Credits.

In-depth study of the principles and techniques of persuasion from both production and consumption perspectives, in both personal and mediated contexts. Emphasis on the common-premise model, with consideration of such topic areas as pathos/ethos/logos, attitude and behavior change, effectiveness, ethics, and subconscious influence. Restricted to students in the communication program. Prerequisite: COMM 1025.

COMM 4196. Independent Study. 1-3 Credits.

Independent research and special projects. Before students are permitted to register, they must submit a written proposal of the plan of study and obtain approval of the faculty member who directs the study and of the program chair. Restricted to seniors and juniors in the communication program; juniors must receive permission of the department prior to enrollment.

COMM 4197. Internship. 3 Credits.

Student-secured internships in public or private communication-related organizations in the metropolitan area. Students spend at least 15 hours per week doing communication-related work. Meetings, reports, and/or analysis paper are required. Permission of the program required prior to enrollment. Graded on a Pass/No Pass basis. Restricted to students in the communication program.

COMM 4199W. Senior Seminar. 3 Credits.

Capstone course in which students work on an individually designed research project to be presented in a major paper. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to students in the BA in communication program. Prerequisites: COMM 2100 and COMM 3110.

COMM 6100. Communication Theory. 3 Credits.

Theories of human communication; interpersonal, small group, intercultural, and media communication. Additional work is required when taken for graduate credit. Restricted to students in the MA in communication management program.

COMM 6110. Research Methods in Communication. 3 Credits.

Graduate-level study of communication-based quantitative and qualitative research methods. Restricted to students in the MA in communication management program.

COMM 6150. Persuasion. 3 Credits.

Principles, techniques, and ethics of persuasion from both sender and receiver perspectives, and across both personal and mediated contexts; the common-premise model with special consideration of such topics as audience analysis; systems of ethics; persuasive claims; pathos/ethos/logos; attitude and behavior change; sender, message, channel, and receiver characteristics; subconscious influence. Restricted to students in the MA in communication management program.

COMM 6165. Organizational and Communication Networks. 3 Credits.

The application of tools of social network analysis to organizational settings and behavior as well as communication processes, both within and among organizations. Restricted to graduate students.

COMM 6171. Professional Communication. 3 Credits.

Principles and theories of advanced public communication used in organizational and professional environments; job interviewing, providing performance appraisals, designing and delivering instructional materials, facilitating and participating on panels, and other professional presentations. Restricted to graduate students.

COMM 6172. Health Communication. 3 Credits.

Health communication theory, methods of health communication research, and practices of effective health communication campaigns. Restricted to graduate students.

COMM 6174. Intercultural Communication. 3 Credits.

A multidisciplinary examination of the conceptual foundations of culture, the effects of culture on communication in comparative and multicultural contexts, and the suggested guidelines for communication competence in intercultural communication settings. Restricted to graduate students.

COMM 6179. Sexual Communication. 3 Credits.

How public and private communication about sex reflects and affects sexual attitudes, behaviors, and knowledge; health communication, interpersonal communication, and mass communication theories, with consideration of topics such as sexual norms, negotiating sexual intimacy and safer sex, gender roles, and parent-child sexual communication. Restricted to graduate students. (Same as COMM 3179).

COMM 6189. Intercultural Negotiation. 3 Credits.

Introduction to negotiation and dispute resolution in intercultural contexts. Students hone their negotiation and conflict management skills through a series of simulation exercises. Theoretical and methodological issues related to the study of negotiation in intercultural contexts. Open to undergraduate students with permission of the instructor.

COMM 6190. Leadership Communication. 3 Credits.

Leadership as a function of human communication; theories of leadership and communication strategies employed by leaders in a variety of contexts; leadership as a form of social action; effectiveness and social implications of the strategies employed in leadership communication. Open to undergraduate students with the permission of the instructor. Restricted to graduate students.

COMM 6196. Independent Study. 1-12 Credits.

Directed research and study in a specific area of communication management, which must be pre-approved by department faculty prior to registration. Restricted to graduate students.

COMM 6199. Master's Thesis. 3-6 Credits.

Students must identify a member of the full-time faculty to serve as thesis adviser prior to registration. May be repeated for credit. Restricted to students in the MA in communication management program who have selected the thesis option.

COMM 6242. Organizational Communication and Conflict Management. 3 Credits.

Models for effective organizational communication and constructive conflict resolution; organizational communication principles and theoretical and practical approaches to conflict analysis, management, and resolution. Restricted to graduate students. (Same as ORSC 6242).

COMPUTER SCIENCE (CSCI)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CSCI 1010. Computer Science Orientation. 1 Credit.

Introduction to the field of computer science. Basic and emerging concepts and applications of computer science. Hands-on experiments and team projects. Technical resources, professional ethics, writing, and presentation.

CSCI 1011. Introduction to Programming with Java. 3 Credits.

An introductory course in programming a computer, using the Java language. Object-oriented programming, classes, applets, methods, control structures, inheritance, overriding, GUI widgets, containers, and exceptions.

CSCI 1012. Introduction to Programming with Python. 3 Credits.

Introduction to programming a computer using the Python language; variables, types, assignment, conditionals, loops, lists, and program units. (Fall, spring, and summer, Every Year).

CSCI 1020. Applications Software. 3 Credits.

Introduction to the use of microcomputer hardware and software for word processing (e.g., Word), spreadsheets (e.g., Excel), and database management (e.g., Access), with emphasis on the use of computers to solve typical problems in academia and business.

CSCI 1021. Introduction to Computers and the Internet. 3 Credits.

Survey of computers and languages. Introduction to computer programming. History of computing and networking. The effects of computing and the Internet on our lives. E-commerce and new technologies. Concepts of web page design. (Fall and spring).

CSCI 1022. Introduction to Internet Technology. 3 Credits.

An introductory course for non-technical students who wish to obtain a better understanding of the hardware and software that comprise the Internet. Information transfer over fiber, routing and switching of packets, methods of information transfer, protocols, software, ISP, web pages and multimedia.

CSCI 1023. Introduction to Web Software Development. 3 Credits.

Introduction to the Internet. Topics include address and URL to find your way, linking to a URL, HTML and web programming, building a web page, building a home page, client-server techniques. (Fall and spring).

CSCI 1030. Technology and Society. 3 Credits.

Historical, social, and ethical issues of the technological age. Ethical principles and skills and social analysis skills needed to evaluate the design and implementation of complex computer systems. Privacy, computer crime, equity, intellectual property, professional ethics. Data collection, analysis, and presentation; technical writing and oral communication skills.

CSCI 1030W. Technology and Society. 3 Credits.

Historical, social, and ethical issues of the technological age. Ethical principles and skills and social analysis skills needed to evaluate the design and implementation of complex computer systems. Privacy, computer crime, equity, intellectual property, professional ethics. Data collection, analysis, and presentation; technical writing and oral communication skills. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Fall and spring, Every Year).

CSCI 1041. Introduction to FORTRAN Programming. 3 Credits.

Structured programming with high-level language using FORTRAN. Control structures. Different data types with emphasis on real and complex number computations. Arrays used with vector and matrix manipulation to solve simultaneous equations. External subroutines for mathematical and graphical applications. MATH 1220 or MATH 1231 may be taken as a corequisite. Prerequisites: MATH 1220 or MATH 1231. (Fall and spring, Every Year).

CSCI 1111. Introduction to Software Development. 3 Credits.

Introduction to the solution of problems on a digital computer using the Java language. Object-oriented programming concepts; documentation techniques; design of test data. Writing, debugging, and running programs in an interactive computing environment.

CSCI 1112. Algorithms and Data Structures. 3 Credits.

Object-oriented software. Inheritance, exceptions, development of classes, event-driven programming. Data structures such as trees, lists, stacks, queues, and strings. Sorting and searching. Introduction to algorithm performance prediction. May be taken for graduate credit by students in fields other than computer science. Prerequisites: CSCI 1111 with a minimum grade of C; and MATH 1220 or MATH 1231. (Spring, Every Year).

CSCI 1121. Introduction to C Programming. 3 Credits.

Structured programming with the C language; control structures; data types; use of pointers; matrix manipulation to solve simultaneous equations; external subroutines for mathematical and graphical applications; introduction to C++; complex number representation. Co-requisites: MATH 1220 and MATH 1231. (Spring, Every Year).

CSCI 1131. Introduction to Programming with C. 3 Credits.

Intensive introductory course for students with a science, mathematics, or other quantitative background. Solution of numerical and nonnumerical problems on a digital computer using C programming language in a Unix environment. Recommended for graduate and advanced undergraduate students in other departments. Prerequisite: MATH 1232.

CSCI 1132. Data Structures and Software Design. 3 Credits.

Data structures such as trees, lists, stacks, queues, and strings. Big-O notation and introduction to algorithm performance analysis. Solutions of numerical and non-numerical problems. Use of I/O libraries. Application development and software testing. Prerequisite: CSCI 1121.

CSCI 1311. Discrete Structures I. 3 Credits.

Mathematics for computer science. Sets, functions, sequences. Propositional and predicate calculus, formal proofs, mathematical induction. Matrices, semigroups, groups, isomorphism. Relations, partitions, equivalence relations, trees, graphs. May be taken for graduate credit by students in fields other than computer science. Prerequisites: MATH 1220 or MATH 1231. (Fall).

CSCI 2113. Software Engineering. 3 Credits.

Programming techniques and software development in one or more programming languages; application development with GUIs, database access, threads, web programming. Prerequisites: CSCI 1112 with a minimum grade of C; and MATH 1221 or MATH 1231. (Fall and spring, Every Year).

CSCI 2312. Discrete Structures II. 3 Credits.

Basic discrete techniques in computer science; proofs, algebraic structures, number theory, graph theory, (coloring and planar graphs, communication networks), advanced recurrences, advanced sums, approximations and asymptotics. Students must have received a minimum grade of C in CSCI 1311. Prerequisites: CSCI 1311; and MATH 1220 or MATH 1231; and MATH 1221. (Fall, Every Year).

CSCI 2441. Database Systems and Team Projects. 3 Credits.

Design of relational database systems, relational query languages, normal forms, and design of database applications. Team software development, integration, and testing. Professional code of ethics, intellectual property, privacy, and software copyrights. Students cannot receive credit for both CSCI 2441 taken while an undergraduate and CSCI 6441 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 2541 and CSCI 6441. (Fall and spring, Every Year).

CSCI 2441W. Database Systems and Team Projects. 3 Credits.

Design of relational database systems, relational query languages, normal forms, and design of database applications. Team software development, integration, and testing. Professional code of ethics, intellectual property, privacy, and software copyrights. Students cannot receive credit for both CSCI 2441W taken while an undergraduate and CSCI 6441 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 2441W and CSCI 6441. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Corequisite: CSCI 2113. (Spring, Every Year).

CSCI 2461. Computer Architecture I. 3 Credits.

Number representation, computer arithmetic, digital logic, and circuit design. Computer organization, micro-architecture and processor datapath, assembly and machine language programming. Introduction to memory organization and the hardware-software interface. Implementation of high-level language constructs. Prerequisites: CSCI 1112 and CSCI 1311. (Fall, Every Year).

CSCI 2501. Ethical Issues in Computing. 1 Credit.

Introduction and analysis of the ethical issues of the technological age; ethical principles and skills and social analysis skills needed to evaluate future consequences of the design and implementation of complex computer systems; application of professional ethics codes in decision-making in professional practice. Restricted to computer science majors. Prerequisites: CSCI 1010 and CSCI 1011. (Fall and spring, Every Year).

CSCI 2541W. Database Systems and Team Projects. 3 Credits.

Design of relational database systems, relational query languages, Introduction to Not just SQL (NoSQL) database systems, normal forms, and design of database applications. Team software development, integration, and testing. Students cannot receive credit for both CSCI 2541W taken while an undergraduate and CSCI 6441 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 2541 and CSCI 6441. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Corequisite: CSCI 2113. Prerequisite: CSCI 1311. (Spring, Every Year).

CSCI 3212. Algorithms. 4 Credits.

Core concepts in design and analysis of algorithms, data structures, and problem-solving techniques. Hashing, heaps, trees. Graph algorithms, searching, sorting, graph algorithms, dynamic programming, greedy algorithms, divide and conquer, backtracking. Combinatorial optimization techniques. NP-completeness. Prerequisites: CSCI 1311 and CSCI 2113. (Fall and spring, Every Year).

CSCI 3221. Programming Languages. 3 Credits.

Programming language and software design fundamentals. Writing programs in a non-procedural programming language. Closures; procedure and data abstraction; object-oriented, procedural, and declarative programming; continuation compilation and interpretation, and syntactic extension. Advanced control structures appropriate for parallel programming. Prerequisite: CSCI 2113.

CSCI 3240. Pre-Senior Design with Research. 3 Credits.

For students who wish to combine a research project with their Senior Design project. The goal is to complete the research, under a faculty mentor, within three semesters. Prerequisites: CSCI 3212, CSCI 3313, CSCI 3411 and permission of the instructor. (Fall and spring, Every Year).

CSCI 3313. Foundations of Computing. 4 Credits.

Theoretical foundations. Formal languages and automata; regular expressions, context-free languages; finite state automata and pushdown automata; Turing machines and computability, recursive function theory, undecidability. Compiler construction. Lexical and syntax analysis; parsing and parsing techniques; lexical and parsing tools. Prerequisites: CSCI 2461 and CSCI 2113. (Fall and spring, Every Year).

CSCI 3362. Probability for Computer Science. 3 Credits.

Introduction to probability and statistics for computer scientists; random variables; conditional probability, independence, correlation; applications to computer science, including information theory, data compression, coding, inference, Markov chains, randomized algorithms. Students cannot receive credit for both CSCI 3362 taken while an undergraduate and CSCI 6362 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 3362 and CSCI 6362. Prerequisites: CSCI 1311 and MATH 1232. (Spring, Every Year).

CSCI 3410. Systems Programming. 3 Credits.

Concepts underlying all computer systems. Processor operation, hierarchical memory systems, embedded boards, data acquisition, actuation, and systems software such as compilers, linkers, and operating systems from the programmer's perspective. Use of embedded platforms to examine how programs interact with and are constrained by hardware. Prerequisites: CSCI 2461 and CSCI 2113. (Fall and spring, Every Year).

CSCI 3411. Operating Systems. 4 Credits.

Process management, process state, concurrent processing, synchronization, events; operating system structure, the kernel approach, processor scheduling, task switching, monitors, threads; system management, memory management, process loading, communication with peripherals; file systems; socket programming, packets, Internet protocols. Prerequisites: CSCI 2113 and CSCI 2461. (Fall, Every Year).

CSCI 3462. Computer Architecture II. 3 Credits.

Computer organization; design of computer components and of a simple computer. Instruction set and assembly language of a pipelined RISC processor; introduction to high-performance processors; design of cache, main memory, and virtual memory systems; program performance models and system performance; I/O structure and peripherals. Prerequisites: CSCI 2113 and CSCI 2461. (Spring, Every Year).

CSCI 3571. Introduction to Bioinformatics. 3 Credits.

An introduction to the use of computational techniques in molecular biology, genetics, and evolution. Techniques and software for database searching, sequence alignment, gene finding, phylogenetics, genomics, and proteomics. May be taken for graduate credit. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126. (Same as BISC 2584) (Spring, Every Year).

CSCI 3907. Special Topics. 1-3 Credits.

Topic to be announced in the Schedule of Classes. (Fall and spring).

CSCI 3908. Research. 1-3 Credits.

Applied research and experimentation projects, as arranged. Restricted to juniors and seniors. (Fall and spring, Every Year).

CSCI 4222. Theory of Computer Translators. 3 Credits.

Lexical and syntax analysis, regular expressions, context-free grammars, parsing techniques, top-down parsing, efficient parsing, syntax-directed translation, intermediate formats, flow of control, block structures, procedure calls, symbol tables, run-time storage, error-detection and recovery, code optimization, code generation. Prerequisites: CSCI 3313 and CSCI 3462. (Fall and spring, Every Year).

CSCI 4223. Principles of Programming Languages. 3 Credits.

Fundamental concepts underlying design of programming languages. Detailed study of functional and object-oriented computational models. Types, evaluation, abstraction, control flow, modules, mutation, laziness, polymorphism, subtyping, inheritance. Practice learning new languages. Students cannot receive credit for both CSCI 4223 taken while an undergraduate and CSCI 6223 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4223 and CSCI 6223. Prerequisites: CSCI 1311 and CSCI 2113. (Spring, odd years).

CSCI 4235. Development of Open-Source Software. 3 Credits.

Design, process, tools, and culture of open-source software development. Cross-platform development and testing. Geographic dispersal, social and team dynamics, licenses (GPL, BSD, other); code reuse (modular code, shared libraries); very-large-scale distributed development techniques (CVS, Bugzilla, release-management, mailing-lists). May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4237. Software Design for Handheld Devices. 3 Credits.

Design of interactive software for handheld devices. Event driven programming, user interface design practices, memory management, handheld debugging techniques. May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4243. Capstone Design Project I. 3 Credits.

Planning, design, and construction of the capstone project. Economic analysis of the project. Application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Report writing and presentations. Prerequisite: senior status.

CSCI 4243W. Capstone Design Project I. 4 Credits.

Planning, design, and construction of the capstone project; economic analysis of the project; application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: CSCI 3212 and CSCI 3411. (Fall, Every Year).

CSCI 4244. Capstone Design Project II. 4 Credits.

Continuation of CSCI 4243. Planning, design, and construction of the capstone project. Economic analysis of the project. Application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Restricted to seniors. Prerequisites: CSCI 4243W or CSCI 4243. (Spring, Every Year).

CSCI 4314. Discrete Analysis-Computer Science. 3 Credits.

Combinatorial theory: permutations and combinations, generating functions, recurrence relations, the principle of inclusion and exclusion. Block designs. Applications to the analysis of algorithms, computer organization, VLSI placement, coding theory, simulation, and other problems. May be taken for graduate credit. Prerequisites: CSCI 1311 or permission of the instructor. (Fall, Every Year).

CSCI 4331. Cryptography. 3 Credits.

Algorithmic principles of cryptography from Julius Caesar to public key cryptography. Key management problems and solutions. Cryptographic systems and applications. Students cannot receive credit for both CSCI 4331 taken while an undergraduate and CSCI 6331 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4331 and CSCI 6331. Prerequisites: CSCI 2312, CSCI 3212 and CSCI 3313. (Spring, Every Year).

CSCI 4341. Continuous Algorithms. 3 Credits.

Structures in continuous mathematics from a computational viewpoint; continuous system simulation, computational modeling, probability, statistical techniques, next-event simulation, algorithms for continuous optimization, machine learning, neural networks, statistical language processing, robot control algorithms. Students cannot receive credit for both CSCI 4341 taken while an undergraduate and CSCI 6341 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4341 and CSCI 6341. Prerequisites: CSCI 1311 and CSCI 2113. (Spring, Every Year).

CSCI 4342. Computational Linear Algebra and Applications. 3 Credits.

Application of linear algebra to computer science and engineering, with a computational perspective; points, vectors, matrices, and their programming representations; algorithms for 3D transformations, pose and viewpoint estimation; linear equations, independence, rank; algorithms for matrix decompositions, reduction of dimension; computation with large matrices, under and over-determined systems; applications to large data, computer vision, text processing. Students cannot receive credit for both CSCI 4342 taken while an undergraduate and CSCI 6342 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4342 and CSCI 6342. Prerequisite: CSCI 2113. (Spring, Every Year).

CSCI 4361. Simulation Methods. 3 Credits.

Computational methods for continuous and discrete system simulation; effects of computer software and hardware architectures on computational precision and accuracy requirements. Random-number generation and testing; calibration and scaling technique; verification and validation technique. May be taken for graduate credit. Prerequisite: CSCI 2113 or permission of the instructor. (Spring, Every Year).

CSCI 4364. Machine Learning. 3 Credits.

Overview of core machine learning techniques: nearest-neighbor, regression, classification, perceptron, kernel methods, support vector machine (SVM), logistic regression, ensemble methods, hidden Markov models (HMM), non-parametrics, online learning, active learning, clustering, feature selection, parameter tuning, and cross-validation. Students cannot receive credit for both CSCI 4364 taken while an undergraduate and CSCI 6364 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4364 and CSCI 6364. Prerequisites: CSCI 3212, CSCI 3362 and MATH 2184. (Fall, Every Year).

CSCI 4415. Real-Time and Embedded Systems. 3 Credits.

Development of software for real-time control of physical systems; reliability and fault tolerance, exceptions and exception handling, reliability and concurrent processes, timeouts, deadline scheduling, shared-memory and message-based device drivers. May be taken for graduate credit. Prerequisite: CSCI 2113. (Spring, Every Year).

CSCI 4417. UNIX System Programming. 3 Credits.

Exposure to UNIX internals. Use of UNIX system calls and utilities in conjunction with script and C programs. RFCs, GNU project, and other collaborative traditions in the UNIX community. May be taken for graduate credit. Prerequisite: Senior status or 1 year of C programming and UNIX user experience.

CSCI 4418. UNIX System Administration. 3 Credits.

System administration for the stand-alone system or small networks. Installation of two or more UNIX variants (Linux, FreeBSD, Solaris) on Intel or Sparc platforms. Configuration of mail, name services, and other network utilities. Backup and recovery, security and ethics. May be taken for graduate credit. Prerequisite: CSCI 4417.

CSCI 4431. Computer Networks I. 3 Credits.

Higher-layer protocols and network applications on the Internet, such as session layer, presentation layer, data encryption, directory services and reliable transfer services, telnet, network management, network measurements, e-mail systems, and error reporting. Students cannot receive credit for both CSCI 4431 taken while an undergraduate and CSCI 6431 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4431 and CSCI 6431. Prerequisites: CSCI 2113 and CSCI 2461. (Fall, Every Year).

CSCI 4431W. Computer Networks I. 3 Credits.

Higher-layer protocols and network applications on the Internet, such as session layer, presentation layer, data encryption, directory services and reliable transfer services, telnet, network management, network measurements, e-mail systems, and error reporting. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: CSCI 2113 and CSCI 2461. (Fall and spring, Every Year).

CSCI 4432. Computer Networks II. 3 Credits.

Computer networks and open system standards. Network configurations and signals, encoding and modulation, transmission media, connection interfaces, error detection and correction, signal compression, switching, link layer control, ISDN, X.25, frame relay, ATM, and Sonet. Bridges, routers, and routing algorithms. Prerequisite: CSCI 4431.

CSCI 4455. Computer Game Design and Programming. 3 Credits.

Principles, techniques, and design of computer games. Graphic game engines, modeling, motion, AI and interaction; sound design and synthesis; real-time software and hardware issues. May be taken for graduate credit. (Fall).

CSCI 4511. Artificial Intelligence Algorithms. 3 Credits.

Knowledge representation and reasoning, propositional logic and predicate calculus. Logic programming; search, game trees, backtracking; planning. May be taken for graduate credit. Prerequisites: CSCI 3212 and CSCI 3221. (Spring, Every Year).

CSCI 4521. Introduction to Mobile Robotics. 3 Credits.

Overview of autonomous mobile robotics. Sensing, localization, calibration, mapping, perception, decision making, planning, and control. Emphasis on algorithmic rather than hardware aspects of robotics. Development of algorithms that can operate autonomous mobile platforms in complex, real-world environments. Prerequisites: MATH 1232 and MATH 2184; and CSCI 3362 or CSCI 4341. (Fall and spring, Every Year).

CSCI 4525. Autonomous Robotics: Manipulation. 3 Credits.

Introduction to robot manipulation. Core principles necessary to program robots for autonomous operation in dynamic and typically human-centric environments. Transdisciplinary concepts from computer science (reinforcement learning, perception), mechanical engineering (kinematics, dynamics), and electrical engineering (control theory). Prerequisites: Permission of the instructor. (Fall and spring, Every Year).

CSCI 4527. Introduction to Computer Vision. 3 Credits.

Introduction and overview of computer vision. Image-formation signal processing and filtering. Saliency, image features and feature extraction, tracking, stereo disparity estimation, structure from motion, photogrammetry, optic flow, homography estimation and warping, scene segmentation, place recognition, object recognition, robust estimation, and camera calibration. Prerequisites: MATH 1232 and MATH 2184; and CSCI 3362 or CSCI 4341. (Spring, Every Year).

CSCI 4531. Computer Security. 3 Credits.

Risk analysis, cryptography, operating system security, identification and authentication systems, database security. Students cannot receive credit for both CSCI 4531 taken while an undergraduate and CSCI 6531 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4531 and CSCI 6531. Corequisite: CSCI 4331. Prerequisite: CSCI 3411. (Spring, Every Year).

CSCI 4532. Information Policy. 3 Credits.

Roles, issues, and impacts of computer-based information systems in national and international arenas, focusing on privacy, equity, freedom of speech, intellectual property, and access to personal and governmental information. Professional responsibilities, ethics, and common and best practices in information use. Students cannot receive credit for both CSCI 4532 taken while an undergraduate and CSCI 6532 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4532 and CSCI 6532. (Fall, Every Year).

CSCI 4541. Network Security. 3 Credits.

Security protocols and applications in local, global, and wireless networks; IPsec and packet-level communication security systems; network authentication and key-exchange protocols; intrusion detection systems and firewalls; secure network applications; network worms and denial-of-service attacks. Students cannot receive credit for both CSCI 4541 taken while an undergraduate and CSCI 6541 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4541 and CSCI 6541. Prerequisite: CSCI 4531. (Spring, Every Year).

CSCI 4551. Concepts and Applications of Computer Graphics. 3 Credits.

Introduction to computer graphics without programming; building 3-D geometry and rendering; computer animation; virtual reality and computer games; hands-on projects in modeling, rendering, and animation using commercial software; hands-on projects in photo and video manipulation.

CSCI 4552. Design of Computer Animation I. 3 Credits.

Use of commercial 3-D computer animation packages to create digital artistic works. Principles of animation, including timing, exaggeration of motion, and anticipation; use of a storyboard; modeling; motion; rendering and editing. (Fall, Every Year).

CSCI 4553. Design of Computer Animation II. 3 Credits.

Use of commercial 3-D animation packages to create artistic works and visualizations. Process-spanning concepts of development through pre-production, production, and post-production. Emphasis on developing original content and attaining high production values. Prerequisite: CSCI 4552.

CSCI 4554. Computer Graphics I. 3 Credits.

Graphics primitives; 2D, 3D, and viewing transformations; hierarchical modeling and animation; illumination and shading; texture mapping; shaders; visibility and collision detection; sampling and anti-aliasing; global illumination; projects using OpenGL graphics API. May be taken for graduate credit. Prerequisites: CSCI 2113 or CSCI 6221. (Spring, Every Year).

CSCI 4561. Design of User-Interface Programs. 3 Credits.

Structure of interactive programs. Widgets, windows, and input devices. Client-server model, event-driven programming, and callbacks. Window systems (e.g., Xwindows) and dialog control. May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4572. Computational Biology. 3 Credits.

Pairwise alignment and scoring. Multiple sequence alignment. Fragment assembly, physical mapping of DNA. Phylogenetic trees. Molecular structure prediction and protein folding. Microarrays and microarray data, image comparison. Clustering. Overview of biological databases, PDB, MMDB, GenBank. Draft genomes and genome browsers. Pathway databases. May be taken for graduate credit. Prerequisite: CSCI 3571 and CSCI 3212 or CSCI 6212.

CSCI 4576. Introduction to Biomedical Computing. 3 Credits.

A survey of the problems and solutions in biomedical computing. Application of computers in medicine. Patient care and monitoring systems, electronic medical records, digital imaging and analysis. Telemedicine, medical ethics, health care regulations and organizations.

CSCI 4577. Biomedical Computing. 3 Credits.

Computing issues in epidemiology and biosurveillance, decision support, medical imaging and visualization, image-guided surgery; medical databases, issues in system integration, mobile medical computing. May be taken for graduate credit. Corequisite: CSCI 2441. Restricted to graduate students. Prerequisites: CSCI 2113 and CSCI 4576. (Spring, Every Year).

CSCI 6001. Introduction to Computer Programming and Software Development. 3 Credits.

Introduction to concepts and skill development in programming and software development, including problem solving on a digital computer and writing, debugging, and executing programs. Restricted to students in select programs; departmental permission is required. (Fall, spring, and summer, Every Year).

CSCI 6002. Introduction to Data Structures and Their Applications. 3 Credits.

Introduction to core computer science data structures including: arrays, lists, linked structures, stacks, queues, and trees. Sorting, searching, and comparison of algorithmic performance. Restricted to students in select programs; departmental permission is required. (Fall, spring, and summer, Every Year).

CSCI 6003. Introduction to Software Design and Engineering. 3 Credits.

Introduction to objects and object-oriented programming. Software development for applications including development with GUIs, database access, threads, web programming. Restricted to students in select programs; departmental permission is required. (Fall, spring, and summer, Every Year).

CSCI 6010. Introduction to Computer Science Fundamentals. 3 Credits.

Review of programming in a high-level language using Java or C++ Introduction to objects and object-oriented programming: static and dynamic objects, inheritance, dynamic method invocation. Data structures: 2D-arrays, linked-lists, stacks, queues, trees, hashing. Discrete structures: sets, graphs, permutations and combinations. Restricted to students whose letter of admission stated that the course is required. (Fall and spring, Every Year).

CSCI 6011. Introduction to Computer Systems. 3 Credits.

Introduction to basic concepts underlying all computer systems; processor operation, hierarchical memory systems, elementary logic circuits, and systems software such as compilers, linkers, and operating systems from the programmer's perspective. Students must have completed one year of coursework in programming in C, C++, or Java prior to registration. Restricted to students whose letter of admission stated that the course is required. (Fall and spring, Every Year).

CSCI 6012. Cybersecurity and Privacy. 3 Credits.

Overview of cybersecurity and privacy, including cryptography, authentication, malware, viruses, network security, anonymity, privacy and online privacy, risk management; common cyberattacks and techniques for detection and defense; policy and legal perspectives for managing cybersecurity missions supporting private sector and government; cyber technologies as applied to the stability of global information and communications infrastructure; government cybersecurity policies. (Fall, spring, and summer).

CSCI 6013. Security in Mobile Computing. 3 Credits.

Relationship between security strategic plan and business strategic plan; mobile device solutions (MDS) to access enterprise corporate data; bring your own device (BYOD) paradigm; mobile device management (MDM) best practices, policies, network controls to identify countermeasures, and risk mitigation strategies against common threats. Overview of mobile security solutions for classified processing and communications. Prerequisites: CSCI 6012. (Fall, spring, and summer).

CSCI 6114. Introduction to Computer Systems and Systems Programming. 3 Credits.

Introduction to basic concepts underlying all computer systems; processor operation, hierarchical memory systems, elementary logic circuits, and systems software such as compilers, linkers, and operating systems from the programmer's perspective. Software development with the C programming language. Students cannot receive credit for this course and CSCI 6011. Restricted to students in select programs; departmental permission is required. Prerequisites: CSCI 2113 or CSCI 6003. (Fall, spring, and summer, Every Year).

CSCI 6115. Application Development I. 3 Credits.

Client-server programming, web development, front end design, back-end server development, introduction to databases. Front and back-end languages, server administration and tools. Students cannot get credit for this course and CSCI 2441, CSCI 2441W, CSCI 2541, or CSCI 2541W. Restricted to students in select programs; departmental permission is required. Prerequisites: CSCI 2113 or CSCI 6003. (Fall, spring, and summer, Every Year).

CSCI 6116. Advanced Application Development. 3 Credits.

Design of large software systems and installable applications, development frameworks, integration of components and services, cloud and web programming, and mobile device development; software specification and testing. Prerequisites: CSCI 6115, CSCI 6431 and CSCI 6441. (Fall, spring, and summer, Every Year).

CSCI 6212. Design and Analysis of Algorithms. 3 Credits.

Design and analysis of algorithms; Turing machines; NP-complete theory; algorithmic techniques: divide-and-conquer, greedy, dynamic programming, graph traversal, backtracking, and branch-and-bound; applications include sorting and searching, graph algorithms, and optimization. Students are expected to know data structures and possess general programming skills in one or more procedural/OOP language such as C/C++/Java, and to have a good mathematical background such as discrete math and some calculus, prior to registration. (Fall, spring, and summer, Every Year).

CSCI 6221. Advanced Software Paradigms. 3 Credits.

Object-oriented, procedural, functional, and concurrent software design paradigms; design patterns; software life cycle concepts; tradeoffs between compiled and interpreted languages; examples from Java, C, C++ and Perl. Restricted to graduate students. (Fall, spring, and summer, Every Year).

CSCI 6223. Principles of Programming Languages. 3 Credits.

Fundamental concepts underlying design of programming languages; detailed study of functional and object-oriented computational models; types, evaluation, abstraction, control flow, modules, mutation, laziness, polymorphism, subtyping, inheritance. Students cannot receive credit for both CSCI 6223 taken while a graduate and CSCI 4223 taken while an undergraduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4223 and CSCI 6223. (Spring, odd years).

CSCI 6231. Software Engineering. 3 Credits.

The life-cycle model. Requirements and specifications. Design models, structured and object-oriented design. Program development, PDL's tools, configuration control. Program, unit, and integration testing. Program verification. Other development models. Development metrics. Computer-aided software engineering (CASE). Prerequisites: CSCI 6221 and CSCI 6212. (Fall and spring, Every Year).

CSCI 6232. Software Engineering Development. 3 Credits.

Formal methods in software engineering. First-order logic, basic specification elements, rigorous proofs, formal development process, concurrency. Prerequisites: CSCI 6461 and CSCI 6212. (Fall and spring, Every Year).

CSCI 6233. Software Testing and Quality. 3 Credits.

Flow graphs and path testing, transaction flow testing, data flow testing, software metrics, system testing, test planning and documentation, reliability, statistical testing. Prerequisite: CSCI 6231. (Fall and spring, Every Year).

CSCI 6234. Object-Oriented Design. 3 Credits.

Object-oriented systems, software reusability, software modularity, top-down and bottom-up approaches, object classification, genericity, metaprogramming, concurrent object-oriented programming languages. Prerequisite: CSCI 6221.

CSCI 6235. Component-Based Enterprise Software Development. 3 Credits.

Component-based software development for enterprise applications. Component models, multi-tier architecture. Specific case studies may include topics such as Enterprise Java Beans, DCOM, and COBRA. Prerequisite: CSCI 6221.

CSCI 6311. Theory of Computation. 3 Credits.

Theoretical foundations of computer science. Formal languages and automata; regular expressions, context-free languages, parsing; Turing machines and complexity; partial recursive functions; undecidability; program correctness; fixed-point theory; formal specifications of software. Prerequisite: CSCI 6212.

CSCI 6312. Graph Theory and Applications. 3 Credits.

Undirected and directed graphs. Connectivity, partitions, cycles and matchings. Edge and vertex coloring, chromatic polynomials, and the four-coloring problem. Planar graphs and Kuratowski's theorem. Properties of random graphs. Applications to a variety of problems. Prerequisite: CSCI 6212. (Fall and spring, Every Year).

CSCI 6318. Complex Systems. 3 Credits.

The edge-of-chaos phenomenon, phase transitions, power laws, small-world networks, Boolean networks, cellular automata, and complex dynamics. Applications to networks and biological systems. Prerequisite: CSCI 6212.

CSCI 6331. Cryptography. 3 Credits.

Review of mathematical theory for cryptography; classical ciphers; modern block and stream ciphers; symmetric and asymmetric systems; digital signatures; public key infrastructure; authentication. Students cannot receive credit for both CSCI 4331 taken while an undergraduate and CSCI 6331 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4331 and CSCI 6331. Prerequisite: CSCI 6212. (Spring, Every Year).

CSCI 6341. Continuous Algorithms. 3 Credits.

Structures in continuous mathematics from a computational viewpoint; continuous system simulation, computational modeling, probability, statistical techniques, next-event simulation, algorithms for continuous optimization, machine learning, neural networks, statistical language processing, robot control algorithms. Students cannot receive credit for both CSCI 4341 taken while an undergraduate and CSCI 6341 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4341 and CSCI 6341. (Spring, Every Year).

CSCI 6342. Computational Linear Algebra and Applications. 3 Credits.

Linear algebra applied to computational problems in computer science and engineering; points, vectors, matrices, and their programming abstractions; 3D transformations, pose and viewpoint estimation; linear equations; algorithms for matrix decompositions, dimension reduction, computation with large matrices, under- and over-determined systems; applications to big data, computer vision, text processing. Students cannot receive credit for both CSCI 4342 taken while an undergraduate and CSCI 6342 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4342 and CSCI 6342. (Spring, Every Year).

CSCI 6351. Data Compression. 3 Credits.

Background on signals, information theory, transforms, human vision, and metrics. Lossless and lossy compression techniques. Video compression. Compression standards. Progressive transmission. Prerequisite: CSCI 6212.

CSCI 6362. Probability for Computer Science. 3 Credits.

Concepts of probability and statistics used in computer science; random variables; conditional probability, independence, correlation; law of large numbers, central limit theorem; applications to computer science, including entropy, information theory, data compression, coding, inference, Markov chains, randomized algorithms. Students cannot receive credit for both CSCI 3362 taken while an undergraduate and CSCI 6362 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 3362 and CSCI 6362. (Spring, Every Year).

CSCI 6364. Machine Learning. 3 Credits.

Machine learning algorithms: nearest-neighbor, regression, classification, perceptron, kernel methods, support vector machine (SVM), logistic regression, ensemble methods, boosting, graphical models, hidden Markov models (HMM), non-parametrics, online learning, active learning, clustering, feature selection, parameter tuning, and cross-validation. Students cannot receive credit for both CSCI 4364 taken while an undergraduate and CSCI 6364 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4364 and CSCI 6364. Prerequisites: CSCI 6212 and CSCI 6362. (Fall, Every Year).

CSCI 6365. Advanced Machine Learning. 3 Credits.

Theory and algorithms for machine learning research; in-depth focus on advanced machine learning topics such as clustering, learning from data streams, and climate informatics. Prerequisite: CSCI 6364. (Spring, Every Year).

CSCI 6411. Advanced Operating Systems. 3 Credits.

Fundamentals of operating system design and structure, resource management, and system support for multi-core. Topics include scheduling, synchronization, system structure, virtual address spaces, memory management, I/O management, and systems abstractions for modern multi-core architectures. The course involves an implementation component and requires substantial programming experience. This course can be taken for credit by undergraduates who have taken CSCI 3411. Prerequisite: CSCI 6461 or CSCI 2461.

CSCI 6412. OS Design and Implementation. 3 Credits.

Builds on CSCI 6411 to provide students with the knowledge to build parts of modern operating systems, which is studied and motivated from the viewpoint of practical design and implementation. Students learn how operating system's components for resource management and abstraction are built from the ground up and integrated into working systems considering the challenges of reliability, multi-core, and security. The course has a significant implementation component; substantial low-level programming experience is required. Prerequisite: CSCI 6411. (Fall and spring, Every Year).

CSCI 6418. Unix Systems Administration. 3 Credits.

System administration for the stand-alone system or small networks; installation of two or more UNIX variants (Linux, FreeBSD, Solaris) hardware platforms; configuration of mail, name services, and other network utilities; backup and recovery, security and ethics. Students cannot receive credit for both CSCI 4418 taken while an undergraduate and CSCI 6418 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4418 and CSCI 6418. Prerequisites: CSCI 6114; or CSCI 6010 and CSCI 6011. (Fall, spring, and summer, Every Year).

CSCI 6419. Advanced Systems Administration. 3 Credits.

Administration of large systems, non-Unix platforms, web document systems, website administration, cloud and web services, user and IT personnel components, and economics of IT support. Prerequisite: CSCI 6418. (Fall, spring, and summer, Every Year).

CSCI 6421. Distributed and Cluster Computing. 3 Credits.

Algorithmic and implementation challenges in building large scale distributed applications; distributed coordination, scheduling, consistency issues, and fault tolerance algorithms; fundamental distributed systems concepts applied to both high performance computing and cloud computing environments. Prerequisite: CSCI 6212. Recommended background: Substantial programming experience. (Fall, Every Year).

CSCI 6431. Computer Networks. 3 Credits.

Fundamental concepts in the design and implementation of computer communication networks and internet, their protocols, and applications; layered network architectures, applications, network programming interfaces, transport, routing, data link protocols, local area networks, network management, and network security. Students cannot receive credit for both CSCI 4431/CSCI 4431W taken while an undergraduate and CSCI 6431 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4431/CSCI 4431W and CSCI 6431. Prerequisite: CSCI 6461. (Fall, Every Year).

CSCI 6433. Internet Protocols. 3 Credits.

Understanding of the layered protocols for the Internet. Interconnection of networks. The IP protocol and routing algorithms, switches, bridges, and routers. The transmission control protocol (TCP). Addressing and names. Application-specific protocols, FTP, TELNET, SMTP, SNMP, HTTP. Domain name services. Prerequisites: CSCI 6221 and CSCI 6431. (Fall and spring, Every Year).

CSCI 6434. Design of Internet Protocols. 3 Credits.

Protocol specifications and formal description methods. Finite-state descriptions of Internet protocols. Specification and Description Language. Implementation of protocol specifications. Prerequisites: CSCI 6212 and CSCI 6433. (Fall and spring, Every Year).

CSCI 6441. Database Management Systems. 3 Credits.

Design and architecture of relational database management systems; query languages, data models, index structures, database application design. Students cannot receive credit for CSCI 2441W or 2541W taken while an undergraduate and CSCI 6441 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for CSCI 2441W or CSCI 2541W and CSCI 6441. Prerequisites: CSCI 6221 and CSCI 6461. (Spring, Every Year).

CSCI 6442. Database Systems II. 3 Credits.

Concepts in database systems. Relational database design. Editing, report generation, updating, schema refinement, tuning. Construction of database management systems. Conceptual and logical design of a database. Prerequisite: CSCI 6441.

CSCI 6443. Data Mining. 3 Credits.

Fundamental concepts of data mining. Algorithm techniques for data mining, including classification, clustering, association rules mining. Prerequisites: CSCI 6441 or permission of the instructor. (Fall and spring, Every Year).

CSCI 6444. Introduction to Big Data and Analytics. 3 Credits.

Big data, its properties, technology, and the types and classes of analytics that can be applied to it; associated storage and programming systems. Students gain practical experience through focused projects to apply different analytics to a data set. Prerequisite: CSCI 2113 or CSCI 6221. (Fall, spring, and summer).

CSCI 6451. Information Retrieval Systems. 3 Credits.

Information organization and retrieval of natural language data by digital computer systems; statistical, syntactic, and logical analysis of natural language; dictionary and thesaurus systems; searching strategies and cataloging. Large-scale file structures. Prerequisites: CSCI 6221 and CSCI 6461. (Fall and spring, Every Year).

CSCI 6461. Computer System Architecture. 3 Credits.

Concepts in processor, system, and network architectures; architecture of pipeline, superscalar, and VLIW/EPIC processors; multiprocessors and interconnection networks; cache coherence and memory subsystem design for multiprocessor architectures; parallel and distributed system architecture; internetworking. Restricted to graduate students. (Fall, spring, and summer, Every Year).

CSCI 6511. Artificial Intelligence. 3 Credits.

Representation and space search; heuristic search; predicate calculus; knowledge representation and knowledge engineering for expert systems; rule-based, hybrid, and O-O systems; semantic nets, frames, and natural language; theorem provers; planning, learning, neural nets; use of AI languages. Prerequisite: CSCI 6212. (Spring, Every Year).

CSCI 6515. Natural Language Understanding. 3 Credits.

The state of the art of natural language parsing and semantic understanding by computer systems. Review of formal, context-free, and transformational grammars and parsing. Augmented transition networks: problems of complexity, semantics, and context. Deterministic parsing and semantic parsing. Prerequisite: CSCI 6511.

CSCI 6521. Introduction to Mobile Robotics. 3 Credits.

Concepts of autonomous mobile robotics with emphasis on algorithmic aspects. Sensing, sensor fusion, localization, calibration, mapping, perception, decision making, planning, behavior-based control, world modeling, and navigation. Development of algorithms that can operate autonomous mobile platforms in complex, real-world environments. Prerequisites: MATH 1232 and MATH 2184; and CSCI 6362 or CSCI 4341. (Fall and spring, Every Year).

CSCI 6525. Autonomous Robotics: Manipulation. 3 Credits.

Manipulation and autonomous operation in dynamic, human-centric environments. Reinforcement learning, perception, optimization algorithms, kinematics, dynamics, control theory. Prerequisites: CSCI 6362 and MATH 2184; or permission of the instructor. (Fall and spring, Every Year).

CSCI 6527. Introduction to Computer Vision. 3 Credits.

Image signal processing and filtering. Saliency, features and feature extraction, tracking, stereo disparity estimation, structure from motion, photogrammetry, optic flow, homography estimation and warping, scene segmentation, place recognition, object recognition, robust estimation, and camera calibration. Current research topics. Prerequisites: MATH 1232 and MATH 2184; and CSCI 6362 or CSCI 6341. (Fall and spring, Every Year).

CSCI 6531. Computer Security. 3 Credits.

Functional description of cryptographic primitives; risk analysis; policy models; design principles; assurance; malicious logic. Students cannot receive credit for both CSCI 4531 taken while an undergraduate and CSCI 6531 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4531 and CSCI 6531. Prerequisite: CSCI 6461. (Spring, Every Year).

CSCI 6532. Information Policy. 3 Credits.

Roles, issues, and impacts of computer-based information systems in national and international arenas, focusing on privacy, equity, freedom of speech, intellectual property, and access to personal and governmental information. Professional responsibilities, ethics, and common and best practices in information use. Students cannot receive credit for both CSCI 4532 taken while an undergraduate and CSCI 6532 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4532 and CSCI 6532. (Fall, Every Year).

CSCI 6534. Information Security in Government. 3 Credits.**CSCI 6541. Network Security. 3 Credits.**

Security protocols and applications in local, global, and wireless networks; IPsec and packet-level communication security systems; network authentication and key-exchange protocols; intrusion detection systems and firewalls; secure network applications; network worms and denial-of-service attacks. Students cannot receive credit for both CSCI 4541 taken while an undergraduate and CSCI 6541 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4541 and CSCI 6541. Prerequisite: CSCI 6531. (Spring, Every Year).

CSCI 6542. Computer Network Defense. 3 Credits.

Offensive and defensive information warfare operations. Simulation of various attacks on and defenses of computer systems. Laws related to information warfare. History and literature related to information warfare attacks. Prerequisite: CSCI 6541.

CSCI 6545. Software Security. 3 Credits.

Security for software systems. Theory and practice of designing and implementing secure software. Security in the context of software engineering. Practical experience with building a software system and securing it, with emphasis on correctness and robustness. Requires substantial prior programming experience. Prerequisites: CSCI 6461 or CSCI 6411; and CSCI 6531 or EMSE 6540; or permission of the instructor. (Fall and spring, Every Year).

CSCI 6547. Wireless and Mobile Security. 3 Credits.

Mobile agents, wireless Web, WAP, WEP, peer-to-peer computing; secure routing; intrusion detection and authentication on wireless networks; security for handheld devices; encryption and cryptographic measures for wireless; real-time wireless security; security measures for embedded devices. Prerequisites: CSCI 6431 and CSCI 6531. (Spring, Every Year).

CSCI 6548. E-Commerce Security. 3 Credits.

Advanced technical topics in e-commerce security; key security threats; authentication and authorization models, directory services, cloud based IAM, federated identity; public key cryptography and PKI; mobile payment methods, digital currencies, blockchain; technologies and applications for securing web commerce; Web service security standards. Prerequisite: CSCI 6541. (Fall and spring, Every Year).

CSCI 6554. Computer Graphics II. 3 Credits.

Algorithmic aspects of computer graphics; 3D viewing transformation; shape modeling; shading and illumination models; visible-surface determination; curves and surfaces; sampling and aliasing; global illumination, ray tracing and radiosity; shadows; image manipulation and texture mapping; procedural models. (Spring, Every Year).

CSCI 6555. Computer Animation. 3 Credits.

Euler angles and quaternions; articulated figure motion; forward and inverse kinematics; kinematic, physics based, and behavioral motion control; character animation; motion capture; temporal aliasing; sound synthesis and synchronization. (Fall, Every Year).

CSCI 6561. Design of Human-Computer Interface. 3 Credits.

Design of dialogues for interactive systems. Psychological, physiological, linguistic, and perceptual factors. Advantages and disadvantages of various interaction techniques, command language syntaxes, and data presentations. Design methodology and guidelines. Case studies, research readings, and projects. Prerequisite: CSCI 6221.

CSCI 6562. Design of Interactive Multimedia. 3 Credits.

History, theory, and development of multimedia concepts. Hardware components, platforms, and authoring tools. Scientific, technical, and cognitive foundations of various media including text, sound, graphics, and video. Interface design. Use of a media taxonomy as a design and evaluation tool. Completion of a multimedia portfolio required. Prerequisite: CSCI 6221.

CSCI 6572. Computational Biology Algorithms. 3 Credits.

Algorithms and models for DNA and protein sequence alignments, gene finding, identification of gene regulatory regions, sequence evolution and phylogenetics, RNA and protein structure, microarray and/or proteomics data analysis. Prerequisites: CSCI 6212; and programming experience in C/C++ or Java. (Spring, Every Year).

CSCI 6900. Colloquium. 0 Credits.

Lectures by outstanding authorities in computer science. Topics to be announced each semester. (Fall and spring).

CSCI 6907. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit if the topic differs. See department for details. (Fall and spring, Every Year).

CSCI 6908. Research. 1-12 Credits.

Applied research and experimentation projects, as arranged. May be repeated for credit.

CSCI 6998. Thesis Research. 3 Credits.**CSCI 6999. Thesis Research. 3 Credits.****CSCI 8211. Advanced Topics in Algorithms. 3 Credits.**

Graph algorithms, strongly connected components, biconnected components, dominators in acyclic graphs, ordered trees, network flow, planarity testing, bipartite matching, theory of NP completeness, NP-complete problems. Design and analysis of approximation algorithms for NP-complete problems. Prerequisite: CSCI 6212.

CSCI 8231. Advanced Topics in Software Engineering. 3 Credits.

Seminar on current research and developments in software engineering. Students develop a software package with the aid of available software tools such as requirement tool, design tool, code generators, testing tools, measurement tools, cost estimation tools. Prerequisites: CSCI 6232 and CSCI 6233. (Fall and spring, Every Year).

CSCI 8331. Advanced Cryptography. 3 Credits.

Linear and differential cryptanalysis. Cryptanalysis of AES. Factorization and primality. Computational and information-theoretic secrecy. Theory of secrecy. Zero-knowledge proofs. Secret sharing. Cooperative distributed cryptography. Provable security. Prerequisite: CSCI 6331.

CSCI 8401. Advanced Topics in Systems. 3 Credits.

Seminar on current research and developments in computer operating systems. May be repeated for credit. (Spring, even years).

CSCI 8431. Advanced Topics in Computer Networks and Networked Computing. 3 Credits.

Seminar on current research and developments in computer networks, Internet, networked computing, mobile computing and pervasive computing. May be repeated for credit. Prerequisites: CSCI 6461, CSCI 6212 and CSCI 6433. (Fall and spring, Every Year).

CSCI 8440. Advanced Topics in Data Management. 3 Credits.

Seminar on current research and developments in computer database systems and information retrieval. May be repeated for credit. Prerequisite: CSCI 6442 or CSCI 6451.

CSCI 8531. Advanced Topics in Security. 3 Credits.

Seminar on current research and developments in information assurance. May be repeated for credit. Prerequisite: CSCI 6531.

CSCI 8554. Advanced Topics in Computer Graphics. 3 Credits.

Seminar on current research and developments in computer graphics. Spatial and temporal anti-aliasing: hidden-surface algorithms: illumination models, radiosity, textural mapping. May be repeated for credit. Prerequisite: CSCI 6554.

CSCI 8900. Advanced Selected Topics. 3 Credits.

Topics announced in the Schedule of Classes.

CSCI 8901. Research and Evaluation Methods. 3 Credits.

Required for all computer science doctoral candidates.

The scientific method; research/design requirements and objectives; qualitative, quantitative, and case studies; performance metrics; design procedures and control; sources of error and bias; evaluation tools; formal validation methods; documentation standards. Prerequisite: APSC 3115.

CSCI 8998. Computer Science Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the qualifying examination. (Fall and spring, Every Year).

CSCI 8999. Dissertation Research. 1-12 Credits.

Doctoral candidates performing dissertation research.

Restricted to doctoral candidates. (Fall and spring, Every Year).

CORCORAN ART AND THE BOOK (CBK)

Courses

CBK 2110. Letterpress From the 1400's to the Digital Age. 3 Credits.

Introduction to traditional letterpress applications and contemporary digital and relief printing trends; typesetting; presswork, inking, editioning, and Vandercook press operation; black and white relief printing, reduction printing; and experimental collagraph techniques.

CBK 5220. Box Elements in Book Arts. 3 Credits.

This class covers the basic ins and outs for box making. Suitable tools and materials for box construction as well as various box applications are also discussed. Students create four archival box constructions as examples of storage and presentation solutions-the drop spine box, a slipcase, a paper box wrapper, and a folding box. Students also explore using the box as a creative outlet for self-expression. For final project, the class--under instructor guidance--creates a "story box" with the goal being to produce an individual conceptual book object while at the same time finding one's own unique artistic voice. Priority to graduate students of the Art and the Book department; open to other degree students as space is available.

CBK 5750. SMdA: Charting San Miguel de Allende: The Artist's Journal. 3 Credits.

How do we write literature and make art that captures the experience of the places we visit as tourists? What strategies are available beyond the obvious ones? Through writing and the making of visual art, how can we see and record aspects of the daily life of a community that might go unremarked or unknown otherwise? The historic town of San Miguel, Mexico, with its rich history of art and literature, provides an unparalleled opportunity to explore these questions. This winter-session course focuses on the intersection of writing and bookmaking. Through a series of hands-on seminars and workshops, students learn how to transform the raw materials of their sketchbooks and notebooks into fully realized literary texts in a variety of hand-made book forms. Two major book projects, one collaborative and one independent, are required. Note: This course carries an additional fee which includes triple occupancy lodging, daily breakfast, materials fee for the duration of the course, and airport transportation. Airfare and tuition are additional, as is an optional excursion. Please contact the department for details.

CBK 6010. Art and the Book Seminar I. 3 Credits.

What is an artists' book and how can it be defined? Hands on in nature, Art and the Book Graduate Seminar I focuses on Washington, D.C. and exploration of the premiere book and related collections throughout the city. This academic course consists of research topics and discussions revolving around such areas as exploring characteristics of an artists' book, origins of the artists' book itself and defining the future of the book form along with roughly five site visits to numerous museum collections at outstanding institutions like the Library of Congress, the Smithsonian American Art Museum/National Portrait Gallery Library, the National Gallery of Art Library and the National Museum of Women in the Arts. Visiting artists are also invited to speak in reference to topics inspired by collection excursions when possible. Students are asked to delve personally deeper by developing a research paper and PowerPoint presentation based on material presented at the various site visits and through class lectures. The last two weeks of this course consist of in-depth formal presentations where students present their research papers and multimedia presentations to the group as a whole.

CBK 6020. Art and the Book Studio I. 3 Credits.

Collaborations can serve as an idea generation tool, an expansion of one's own skill set, or a joining of ideas to create a piece that is larger than the sum of its parts. The Art and the Book Studio I course explores various forms of collaboration through a series of hands-on projects that range from working with unknown collaborators to pairing with complementary skill sets. The semester culminates in a final collaborative project where students can experiment and explore as a synergistic unit. Visiting artists speak about their own experiences with collaborative projects. Priority to graduate students of the Art and the Book department; open to other degree students as space is available.

CBK 6100. Layout and Design of the Book. 3 Credits.

This course provides an opportunity for visual artists from all backgrounds to combine images with text, to sequence existing content, to expand their typographic options, and to explore publishing alternatives beyond hand-made limited editions. It covers type selection and typesetting, page grid systems and production methods for a variety of layout options, including handmade as well as commercially produced books. We test several online publishing services, bypassing the limitations of their proprietary software by using InDesign for design and typesetting and exporting the final layouts as PDFs. Image formats, color modes, and color correction are covered as needed. This course is open to MA/Art and the Book Students.

CBK 6110. Letterpress I: Letterpress Basics From the 1400s to the Digital Age. 3 Credits.

This course provides an introduction to traditional Letterpress applications while also exploring computer and relief printing trends used in the field today. Students are provided technical instruction in typesetting--from composing stick to quoin key -- along with presswork, inking, editioning, and Vandercook press operation schooling. Students examine such areas as Linocut, Woodcut, and computer photographic processes with the goal being to incorporate these practices with that of traditional typesetting. A collaborative broadside project is produced in the second half of the semester. Priority to graduate students of the Art and the Book department; open to other degree students as space is available.

CBK 6120. Binding I: Intermediate and Advanced. 3 Credits.

This course covers advanced techniques in binding while laying a proper foundation in book arts. Both practical and aesthetic decisions are discussed as more challenging structures such as Coptic binding, portfolio, and flag books to name only a few are created. Independent projects are produced over the course of the semester in which content of the book is emphasized. This course culminates with a final artists' book project where a student explores any binding of their choosing while making conceptual decisions under a universal theme. Priority to graduate students of the Art and the Book department; open to other degree students as space is available.

CBK 6150. Type and the Book Form. 3 Credits.

Typography for book arts and design. Development of narrative themes through the use of type, image, grid, materials, and multiple page sequencing. The history of typography including the use of technology; terminology and classification. Restricted to MA in Art and the Book degree students; other graduate students with permission of the instructor.

CBK 6210. Letterpress II: Advanced Discoveries in Letterpress. 3 Credits.

Letterpress II. provides an exploratory arena in advanced letterpress techniques with the use of text and image as a fine arts medium. This course covers conceptual, aesthetic, and practical considerations in print media. Also, an individual book project is introduced midway through semester that the graduate student will work on as a team experimenting with new trends in Letterpress to produce a book edition. Priority to graduate students of the Art and the Book department; open to other degree students as space is available. Pre-requisite: Letterpress I or permission of the Art and the Book Director.

CBK 6331. Vandercook Relief Fine Art Printing. 3 Credits.

An introduction to fine art relief printing methods on Vandercook presses. Technical instruction in multiple relief printing processes, including reduction cut, multiple block registration, wood block, and collagraph. The use of alternative material printing on letterpress equipment emphasizing the graphic image and fine print quality. Focus on the production of multiple print editions and small books forms using learned techniques. Recommended background: CBK 6110.

CBK 6800. Independent Study: Book Arts. 3 Credits.

This option is appropriate for degree students who want access to independent faculty supervision, lab areas, and supplies for independent projects, and do not need or desire extensive course instruction.

CBK 6900. Art and the Book Internship. 3 Credits.

For degree students only. Internships can help students develop marketable skills, establish professional contacts, and explore different career options.

CBK 7010. Art and the Book Studio II. 3 Credits.

Working with the varied talents and experiences of the Art and the Book student population, this class embarks on the creation of a collaborative book project. What emerges from the unique personality of the Studio II class make-up is a student driven book edition. Beginning with discussions, this class experiments and hones in on the important issues of theme, content and structure which will establish the book's character. Materials choices lend texture and nuance to the book form development. Production of the collaborative book edition entails creative and disciplined work in such areas as: layout design, typesetting, plate making, papermaking, printing and binding. By completion of the book edition, students will have experienced an ambitious team-building and productive inclusive art experience. For MA in Art and the Book graduate students only.

CBK 7311. Pop-Up Books: Exploration of the Sculptural Book through Paper Engineering. 3 Credits.

This class focuses on non-traditional sculptural book formats and on the design of pop-ups as sculptural book inclusions. Students learn to engineer a range of pop-up structures, beginning with simple non-adhesive cut-and-fold pop-ups and progressing through a series of more complex glued constructions, including platforms, props, V-folds, and volumes. Emphasis is on how to integrate the dimensional and mechanical aspects of the pop-up with graphic and illustrative concepts. The class also explores several sculptural bindings, including accordion books, carousel books, and tunnel books. The carousel book (a nested series of accordions) and the tunnel book (two accordions holding a series of page frames) are theatrical stage-like constructions employing layers of images and text to create dimensional graphic illustrations. Basic bookbinding tools and skills are discussed, along with the design of jigs and templates for streamlining production in for editions. Slide shows of historical and artist-made books are presented on each major class topic. Priority to MA Art and the Book students; open to other degree students on a space-available basis.

CBK 7320. Binding II: Leather Bindings. 3 Credits.

This course offers an introduction to the use of leather in Book Arts. Students focus on traditional techniques for creating both historic and modern book structures. Knife care, paring and application of leather, as well as excellence in book forwarding will be emphasized. Students will sew multi-colored headbands, and be asked to design and execute several books in quarter leather. A discussion and demonstration of inlay/onlay and tooling offers students a glimpse into the visual opportunities afforded by this exciting medium. Prerequisite: CBK 6120.

CBK 7322. Japanese Binding. 3 Credits.

The history and evolution of Japanese bookbinding. Exploration and production of historically important Japanese bookbinding methods, including hand scroll, stab binding variations, accordion books, and ledgers. Techniques such as backing paper or cloth for covers and making traditional book cases are covered.

CBK 7400. Exploration in East/West Papermaking. 3 Credits.

This intermediate/ advanced course is an exposure to traditional and experimental methods of hand papermaking, with an emphasis on papermaking as an expressive art medium. Work includes processing raw fiber, pigmenting pulp, exploring Eastern and Western sheet formation styles, and examining various drying and finishing techniques. In addition, 3-D techniques, including paper casting and vacuum forming are taught. Throughout the course, the history of paper is discussed. Prerequisite for this course is 2D Applications in Paper or Dimensional and Color Papermaking. Or permission can be granted by Instructor or Director of the Art and the Book program.

CBK 7800. Art and the Book Pro-Thesis. 3 Credits.

In the Art and the Book program, Thesis for students with a studio focus consists of a cohesive body of work grounded in the book form with a formal exhibition, defense meeting, along with a written paper component that informs the candidate's thesis studio project. For students in the program with an academic focus, an in-depth written paper, defense, and public talk to the college are required to fulfill the requirements of thesis. Students of the Pro-Thesis course develop a thesis petition and outline that serves as the guideline for Thesis construction. Students with a studio focus must in the petition also present a comprehensive plan for their studio exhibition to be developed and completed in the Thesis Forum course occurring in the following semester. All petitions must be approved by the Thesis Petition Faculty Committee. Students choose a paper and exhibition theme/topic and create a mission statement and written document during the expanded research and writing phase of this course. The final Pro-Thesis document is an academic paper that conforms to the writing standards of the Corcoran graduate programs and that of UMI dissertation publishing, where the final Thesis submission is published online of the Spring semester. Students in Pro-Thesis also explore professional development through a personal exploratory process culminating in the creation of a learned artist statement and CV. This class is for Art and the Book students only.

CBK 7900. Art and the Book Thesis Forum. 3 Credits.

In this course, students complete a comprehensive body of work with a written supporting thesis at the professional level exploring a unique book arts-related topic. Each student's thesis should contain a rigorous exploration of theme, under the supervision of a thesis advisor with the goal being to produce a sound body of work or comprehensive written composition. The process culminates with the display of thesis projects developed over the course of the semester, with students presenting to jurors composed of faculty as well as professionals from the book arts community.

CORCORAN ART EDUCATION (CED)

CED 0920. Continuing Research. 1 Credit.

CED 2000. Foundations in Art Education. 3 Credits.

This is the introduction to the subject of Art Education for every student considering the BFA/MAT5 degree program. It is also open to non-majors. We read and discuss major historical and contemporary concepts of learning, perception, and artistic experience that form the framework for diverse approaches to art education in practice in schools, museums, and community-based institutions today. Students integrate and compare their own artistic experiences through systematic self-reflection to deeply understand the creative learning process in themselves as a basis for developing experience-based art education.

Integrating theory and praxis, this course establishes critical thinking skills for addressing the four main components of art education: interpretation/meaning-making, criticism/aesthetic discernment, studio/production, and historical understanding. The course includes visits to art education venues around the metropolitan area (some outside class time), frequent short written assignments, and oral presentation exercises. Students receive guided support in starting the required core reading program for the Art Education concentration. Required as prerequisite for all other Art Education courses. CAS 1110 may be taken as a corequisite. Prerequisites: CAS 1110 or permission of the instructor.

CED 3005. Teaching Art to Young Adults: Post-Secondary. 3 Credits.

This course is an elective addition to complete the Art Education degree program's sequence focusing on major phases of visual and aesthetic learning throughout life. This course covers the theory and practice of art pedagogy for transitional young adults, whether in formal college programs or informal circumstances. We cover widely varying developmental benchmarks in this cohort, both individuals with extensive art training and those without prior exposure, in terms of creativity, interaction with the social environment, self-understanding and expression, and technical skill. For many emergent adults, the completion of schooling and greater independence presents the first opportunity to explore artistic experience, or to do so in a self-directed environment. Emphasis is on organized learning experiences in art production, with additional attention to the important outlets for self-guided and independent art experiences at this age. At times this course may be cross-tallied at the graduate level as CED 6005. Additional work required for graduate level credit is outlined in the course syllabus. Prerequisite: CED 2000 Foundation in Art Education or CED 5000 Graduate Art Education Core, plus one additional ED course, or permission of Department.

CED 3010. Art and Learners to Age 12. 3 Credits.

This course focuses on the theory and practice of art education programs for children of elementary and middle school age, both in the school setting and beyond. We cover developmental advances in this cohort in terms of creativity, interaction with the social environment, self-understanding and expression, the dynamics and independent and group activity, and technical skill. The course considers the role of art for young learners, both as an aspect of school experience and as a separate track. Emphasis is on organized learning experiences in art, with additional attention to the important outlets for self-guided and independent art experiences at this age. This course is cross-tallied at the undergraduate level as CED 3010 and at the graduate level as CED 6010. Prerequisite: CED 2000 Foundation in Art Education, or CED 5000 Graduate Art Education Core, or permission of Department.

CED 3015. Art and Adolescents. 3 Credits.

This course starts from an understanding of the essential developmental advances of the teen years and moves to the design and implementation of a wide range of visual art experiences for young people in transition from childhood to adulthood. The class reviews a variety of existing materials and formats to discover the educational approaches underlying different lessons and programs. We trace age-appropriate creative activity, social and cultural interaction, identity formation through art, the dynamics of group activity, and an increasingly divergent range of technical skill in this cohort. The course considers art education for adolescents whether in school, a museum, community programs, or increasingly, as an independent learner. This course is cross-tallied at the undergraduate level as CED 3015, and at the graduate level as CED 6015. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Offered for credit only, Continuing Education students need department approval to enroll. Prerequisites: CED 2000 or CED 5000; or permission of the department.

CED 3020. Development, Behavior, and Learning. 3 Credits.

This course introduces core concepts of developmental psychology essential to future educators. Students gain knowledge about different approaches in the field regarding the relationship between generally predictable stages of human development and the capacity of individuals to learn creatively. The course emphasizes the development of young people, their behavior and mental growth from birth through adolescence, but is not limited to those years. The class models a variety of learning strategies relevant to its subject and useful to students in their later work. Short written assignments, group learning exercises, informal oral presentations, and tests/quizzes. This course is cross-tallied at the undergraduate level as CED 3020 and at the graduate level as CED 6020. This course starts from an understanding of the essential developmental advances of the teen years and moves to the design and implementation of a wide range of visual art experiences for young people in transition from childhood to adulthood. The class reviews a variety of existing materials and formats to discover the educational approaches underlying different lessons and programs. We trace age-appropriate creative activity, social and cultural interaction, identity formation through art, the dynamics of group activity, and an increasingly divergent range of technical skill in this cohort. The course considers art education for adolescents whether in school, a museum, community programs, or increasingly, as an independent learner. This course is cross-tallied at the undergraduate level as CED 3015, and at the graduate level as CED 6015. Additional work is required to earn graduate credit. Offered for credit only, Continuing Education students need department approval to enroll. CED 2000 or CED 5000 may be taken as corequisites. Prerequisites: CED 2000 or CED 5000; or permission of the department.

CED 3030. Sociology of Family. 3 Credits.

The study of family dynamics in today's society begins with understanding of basic necessary functions such as domestic living, working, earning, educating the young, and sustaining the well-being of all. In addition, we consider the influence of family patterns and values on the lives of all its members, both within the family unit and beyond. This course surveys traditional and evolving forms of the "nuclear" family, multi-generational interactions, the extended and the informal family (among other types), especially in their impact on young people raised in a wide variety of family environments. Assignments include analysis of typical family behaviors and educational programming designed for family groups, especially in the visual arts and related subjects. This course is cross-tallied at the undergraduate level as CED 3030 and at the graduate level as CED 6030. Prerequisite: CED 3020/CED 6020 Development, Behavior, and Learning; or permission of the department.

CED 3100. Art in the Museum and Community Organizations. 3 Credits.

A comprehensive survey of approaches to informal art education as practiced in museums, community centers, educational support facilities and varied social settings. This course is based on direct observation and systematic review of diverse methodologies, to provide an informed framework for integrated art education, whether as a collaboration between schools and alternative sites, or developed separate from formal schooling. Expertise of the Corcoran's museum educators is emphasized. This course is cross-tallied at the undergraduate level as CED 3100 and at the graduate level as CED 6100. Prerequisite: CED 3020/6020 Development, Behavior, and Learning, or permission of department.

CED 3150. Classroom and Activity Management. 3 Credits.

During this semester, students learn to plan and present lessons for youth in schools or other educational settings. Skills to be emphasized include the development of educational activities to fulfill specific curricular or group goals, identification and adaptation of exemplary existing educational resources, responsive flexibility to varied group needs, group management techniques, and basic assessment methods for both student performance and program success. This course is often integrated with simultaneous Field Experience. This course is cross-tallied at the undergraduate level as CED 3150 and at the graduate level as CED 6150. Prerequisite: CED 3020/6020 Development, Behavior, and Learning, CED 3010/6010 Art and Learners to Age 12, or CED 3015/CED 6015 Art and Adolescents, completed or concurrent; or permission of department.

CED 4000. Development: Birth to Adolescence. 3 Credits.

This course provides an in-depth investigation of human development from infancy to adolescence. A sequel to the broad developmental theories and concepts that were introduced in CED 3020/6020, this course encourages students to explore firsthand the writings and perspectives of key developmental theorists. In addition, students are asked to critically review case studies and comparative research on cognitive, perceptual, and emotional development of young people and to investigate practical applications of theoretical constructs as they pertain to the field of art education. Normal and abnormal developmental profiles are covered, with emphasis on differentiations that teachers are likely to encounter within the general population, or in a mainstream classroom and activity setting. At times this course may be cross-tallied at the graduate level as CED 6000. Additional work required for graduate level credit is outlined in the course syllabus. Prerequisites: CED 3020/CED 6020 Development, Behavior, and Learning, or instructor's permission.

CED 4010. Contemporary Issues: Education Policy and Visual Art. 3 Credits.

This is an interdisciplinary investigation of current affairs concerning the interaction of cultural politics, governmental trends, and broad developments in educational philosophy in the public arena. Topics change in response to emerging issues of public concern, often including the interaction of local, regional, and national attitudes to art, the impact of educational reform efforts, the role of art education as social acculturation, and appropriate funding levels for both art and education. This course is cross-tallied at the undergraduate level as CED 4010 and at the graduate level as CED 7010. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Required for BFA/MAT5 and MAT.

CED 4040. Math in Art/Art in Math. 3 Credits.

One of two courses available to advanced students that reinforce their general knowledge of fundamental principles and processes of math and science. This provides a basis for integration of artistic learning with core academics in schools and for thematic development of educational activities that bridge traditional divisions between alternative modes of thought and intellectual experience. Students prepare original art education activities for both formal and informal educational settings which utilize and reinforce mathematical concepts of number, pattern, form, etc. This course is cross-tallied at the undergraduate level as CED 4040 and at the graduate level as CED 6040. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Offered for credit only, Continuing Education students need department approval to enroll.

CED 4050. Art Science: Developing Creativity. 3 Credits.

One of two courses available to advanced students that reinforce their general knowledge of fundamental principles and processes of math and science. This provides a basis for integration of art education with core academics in schools and for thematic development of educational activities that bridge traditional divisions between alternative modes of thought and intellectual experience. The semester includes a multidisciplinary consideration of intellectual creativity as it is understood and practiced in the arenas of art and science. Specific topics vary with the interests of faculty and students. Students prepare original art education activities for both formal and informal educational settings, incorporating concepts from the course. This course is cross-tallied at the undergraduate level as CED 3050 and at the graduate level as CED 6050. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook).

CED 4060. Digital Media for Educators. 3 Credits.

In this hands-on course, students learn the rudiments of educational technology for presentation, as well as how to search and assess existing multi-media educational teaching resources in art, adapt existing visual resources for new programs and audiences, and create simple artistic projects for students on the computer using widely available basic desktop publishing software. This course is offered at the undergraduate level as CED 4060 and at the graduate level as CED 6060. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook).

CED 5000. Graduate Art Education Core. 3 Credits.

For students with a solid grounding in studio art and art history, this course serves as a starting point for the study of pedagogy and educational practice. An intensive class reading of the core literature of the field introduces major historical and contemporary concepts of learning, perception and artistic experience that comprise the framework for diverse approaches to art education schools, museums and alternative settings today. During visits to art education venues around the metropolitan area, members of the class learn to discover the underlying goals and approaches imbedded in excellent art education programs, and critique the advantages and disadvantages of contrasting methods for differing learners and situations. Integrating theory and praxis, this course establishes critical skills for the four main domains of art education: Interpretation/Meaning-making, Criticism/Aesthetic Discernment, Studio/Production and Historical Understanding. Students plan and carry-out a variety of original educational exercises. Restricted to first year students in the MAT in museum education program.

CED 5070. Education Pro-Seminar I. 0.5 Credits.

Pro-seminar in Art Education provides a summary review of academic disciplines pertinent to research in the field, with a practical guide to the scope and methods of different disciplines which frequently overlap. The first semester is more theoretical and is intended to assist each student in skills for forming clear research questions, assessing the merits of existing research and determining corresponding implementation steps for their own extended research projects in art education. The second semester focuses topic selection, preliminary research, and proposal preparation for the Art Education thesis. A total of 1 credit in Education Pro-Seminar is required for the MAT and BFA/MAT in Art Education. Students must enroll in CED 5070 and CED 5071 sequentially and grades will be assigned upon completion of the second semester of enrollment.

CED 5071. Education Pro-Seminar II. 0.5 Credits.

Pro-seminar in Art Education provides a summary review of academic disciplines pertinent to research in the field, with a practical guide to the scope and methods of different disciplines which frequently overlap. The first semester is more theoretical and is intended to assist each student in skills for forming clear research questions, assessing the merits of existing research, and determining corresponding implementation steps for their own extended research projects in art education. The second semester focuses on topic selection, preliminary research, and proposal preparation for the Art Education thesis. A total of 1 credit in Education Pro-Seminar is required for the MAT and BFA/MAT in Art Education. Students must enroll in CED 5070 and CED 5071 sequentially and grades will be assigned upon completion of the second semester of enrollment. Prerequisite: CED 5070 Education Pro-seminar I.

CED 5072. Education Pro-Seminar I. 1 Credit.

Pro-seminar in Art Education provides a summary review of academic disciplines pertinent to research in the field, with a practical guide to the scope and methods of different disciplines which frequently overlap. The first semester is more theoretical and is intended to assist each student in skills for forming clear research questions, assessing the merits of existing research and determining corresponding implementation steps for their own extended research projects in art education. The second semester focuses topic selection, preliminary research, and proposal preparation for the Art Education thesis. Effective Fall 2012, a total of 2 credits in Education Pro-Seminar is required for the MAT and BFA/MAT in Art Education. Students must enroll in CED 5072 and CED 5073 sequentially and grades are assigned upon completion of the second semester of enrollment.

CED 5073. Education Pro-Seminar II. 1 Credit.

Pro-seminar in Art Education provides a summary review of academic disciplines pertinent to research in the field, with a practical guide to the scope and methods of different disciplines which frequently overlap. The first semester is more theoretical and is intended to assist each student in skills for forming clear research questions, assessing the merits of existing research and determining corresponding implementation steps for their own extended research projects in art education. The second semester focuses topic selection, preliminary research, and proposal preparation for the Art Education thesis. Effective Fall 2012, a total of 2 credits in Education Pro-Seminar is required for the MAT and BFA/MAT in Art Education. Students must enroll in CED 5072 and CED 5073 sequentially and grades are assigned upon completion of the second semester of enrollment.

CED 5100. Evaluation, Program Assessment, and Criteria of Quality. 3 Credits.

This course examines program assessment and evaluation with a focus on the independent criteria of quality in the art world. The design and implementation of assessment tools in an authentic manner that is intrinsically connected to the context of the art work being both produced and viewed in an educational setting is one that must take into account the nature of art evaluation, critical analysis, content issues, audience, and technical skill. This course allows students to build a vocabulary within which to evaluate both an individual's understanding of a learning activity as well as to plan a program that addresses the unique needs of learners in a creative environment. Assignments require both assessment and evaluation at the program level as well as the development of criteria and tools for use with individual learners. Projects may coincide with students' Field Experience. Students have the ability to create and implement cohesive tools, from traditional methods of testing to alternative assessment, with which to critically examine both teaching and learning and to use the results of their study to adapt curricula to learners in a variety of settings.

CED 5610. Special Topics: Art & Lifelong Learning. 3 Credits.**CED 5620. Special Topics: Art Across the Curriculum. 3 Credits.**

The Art Education program offers a rotating series of advanced seminars in education, designed to apply theory and practice to the most timely issues emerging in the field as they relate changing trends in art pedagogy in particular. This semester, Special Topics: Art Across the Curriculum responds to both trends in the era of nation-wide school reform and a recognition of the dynamic relationship between visual culture and formal learning. Students investigate existing models of art instruction applied to curricular units in subjects such as history, social studies, language arts, math, and science to determine their strengths and limitations. Then, in teams and individually, students plan lesson units, design resource materials, and practice teaching their own cross-disciplinary lessons. The course considers resources and approaches appropriate to both school settings and non-traditional educational sites in the community. Prerequisites: Four CED courses or permission of the department.

CED 5630. Special Topics: Art, Cultural, and Character Education. 3 Credits.

At the graduate level, the MAT Art Education program offers a rotating series of advanced seminars in education, designed to apply theory and practice to the most timely issues emerging in the field as they relate changing trends in art pedagogy in particular. This special topics course brings together two areas of recent curricular expansion in order to focus specifically on the potential for the visual arts to provide a framework for important areas of attitudinal education: 1) cultural understanding among diverse local communities and across the globe, and 2) personal development in terms of ethics, decision-making, and participation in civil society. This course is divided between a systematic review of strong examples of materials available to educators, their similarities and differences, and weekly sessions devoted to the creation on cutting-edge lesson units by student teams. Prerequisites: Four CED courses or permission of the department.

CED 5680. Studio-Based Teaching and Learning. 3 Credits.

At the graduate level, the Art Education Department offers a rotating series of advanced seminars in education designed to apply theory and practice to the most timely issues emerging in the field as they relate changing trends in art pedagogy in particular. This special topics course explores teaching, learning and curriculum planning across content areas and levels of learner experience through in-depth exploration of one visual art discipline (printmaking, ceramics, photography, digital media, sculpture, painting or drawing, etc). Students design and teach lessons and a curriculum unit/materials based on their studio experiences in class using methods and materials appropriate for PreK-12, community and museum settings. The selected medium/media changes each semester. Prerequisites: Four education courses or permission of the department.

CED 5682. Community-Based Teaching and Learning. 3 Credits.

In this advanced special topics course students study theories of transformative learning and service learning as it applies in an intergenerational community setting through art study and art making. Students explore teaching, learning, and curriculum planning for learners across the lifespan through the development and implementation of a specific community/public arts project in tandem with members of that community and in some cases with creative collaboration/experience sharing with a partner institution(s). Each stakeholder (students, faculty and community members) has an equal role in planning and implementing the project. Students study community/public art, service learning and transformative learning theory, how to write effective project proposals, community-based art curriculum, conduct visual research (plans/mock ups/sketches), and documentation of the process/project.

CED 5690. Summer Teaching Institute. 3 Credits.

To be announced.

CED 5700. Art Therapy Orientation for Educators. 3 Credits.

This course introduces classic concepts and current practices of Art Therapy which enrich the educational work of art instructors, and familiarize them with a related profession, its goals and methods. NOTE: This is not a training course to prepare art therapists for future practice. Readings include the books of Robert Coles and other masters in the field. Assignments include interactive exercises, reading discussions, and short and mid-length written essays. This course includes on-site observation of model art therapy techniques by professionals inside or outside of class time. Prerequisites: Four CED courses or permission of the department chair.

CED 5900. Art Education Field Experience. 1 Credit.

One semester of short, coordinated part-time practicum rotations, assisting experienced educators in classrooms and cultural institutions, while observing varied teaching and learning strategies and student responses to different activities and educational methods. Students in this course write observational critiques and meet together regularly with the supervising professor to discuss their experiences. Offered in the Spring for BFA/MAT5 and MAT students only.

CED 6000. Development: Birth to Adolescence. 3 Credits.

This course provides an in-depth investigation of human development from infancy to adolescence. A sequel to the broad developmental theories and concepts that were introduced in CED 3020/6020, this course encourages students to explore first-hand the writings and perspectives of key developmental theorists. In addition, students are asked to critically review case studies and comparative research on cognitive, perceptual and emotional development of young people and to investigate practical applications of theoretical constructs as they pertain to the field of art education. Normal and abnormal developmental profiles are covered, with emphasis on differentiations that teachers are likely to encounter within the general population, or in a mainstream classroom and activity setting. At times this course may be cross-tallied at the undergraduate level as ED4000. Students wishing to pursue undergraduate credit should register for the undergraduate section. Prerequisites: CED 3020/CED 6020 Development, Behavior, and Learning, or instructor's permission.

CED 6010. Art and Learners to Age 12. 3 Credits.

This course focuses on the theory and practice of art education programs for children of elementary and middle school age, both in the school setting and beyond. We cover developmental advances in this cohort in terms of creativity, interaction with the social environment, self-understanding and expression, the dynamics and independent and group activity, and technical skill. The course considers the role of art for young learners both as an aspect of school experience and as a separate track. Emphasis is on organized learning experiences in art, with additional attention to the important outlets for self-guided and independent art experiences at this age. This course is cross-tallied at the undergraduate level as CED 3010 and at the graduate level as CED 6010. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Prerequisite: CED 2000 Foundation in Art Education, or CED 5000 Graduate Art Education Core, or permission of Department. Required for MAT degree.

CED 6015. Art and Adolescents. 3 Credits.

This course starts from an understanding of the essential developmental advances of the teen years and moves to the design and implementation of a wide range of visual art experiences for young people in transition from childhood to adulthood. The class reviews a variety of existing materials and formats to discover the educational approaches underlying different lessons and programs. We trace age-appropriate creative activity, social and cultural interaction, identity formation through art, the dynamics of group activity, and an increasingly divergent range of technical skill in this cohort. The course considers art education for adolescents whether in school, a museum, community programs, or increasingly, as an independent learner. This course is cross-tallied at the undergraduate level as CED 3015, and at the graduate level as CED 6015. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Offered for credit only, Continuing Education students need department approval to enroll. Prerequisites: CED 2000 or CED 5000 or permission of the department.

CED 6020. Development, Behavior, and Learning. 3 Credits.

This course introduces core concepts of developmental psychology essential to future educators. Students gain knowledge about different approaches in the field regarding the relationship between generally predictable stages of human development and the capacity of individuals to learn creatively. The course emphasizes the development of young people, their behavior and mental growth from birth through adolescence, but is not limited to those years. The class models a variety of learning strategies relevant to its subject and useful to students in their later work. Short written assignments, group learning exercises, informal oral presentations and tests/quizzes. This course is cross-tallied at the undergraduate level as CED 3020 and at the graduate level as CED 6020. This course starts from an understanding of the essential developmental advances of the teen years and moves to the design and implementation of a wide range of visual art experiences for young people in transition from childhood to adulthood. The class reviews a variety of existing materials and formats to discover the educational approaches underlying different lessons and programs. We trace age-appropriate creative activity, social and cultural interaction, identity formation through art, the dynamics of group activity, and an increasingly divergent range of technical skill in this cohort. The course considers art education for adolescents whether in school, a museum, community programs, or increasingly, as an independent learner. This course is cross-tallied at the undergraduate level as CED 3015, and at the graduate level as CED 6015. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Offered for credit only, Continuing Education students need department approval to enroll. Prerequisites: CED 2000 and CED 5000.

CED 6030. Sociology of the Family. 3 Credits.

The study of family dynamics in today's society begins with understanding of basic necessary functions such as domestic living, working, earning, educating the young, and sustaining the well-being of all. In addition, we consider the influence of family patterns and values on the lives of all its members, both within the family unit and beyond. This course surveys traditional and evolving forms of the "nuclear" family, multi-generational interactions, the extended and the informal family (among other types), especially in their impact on young people raised in a wide variety of family environments. Assignments include analysis of typical family behaviors and educational programming designed for family groups, especially in the visual arts and related subjects. This course is cross-tallied at the undergraduate level as CED 3030 and at the graduate level as CED 6030. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Prerequisite: CED 3020/CED 6020 Development, Behavior, and Learning; or permission of the department.

CED 6040. Math in Art/Art in Math. 3 Credits.**CED 6050. Art Science: Developing Creativity. 3 Credits.**

One of two courses available to advanced students that reinforce their general knowledge of fundamental principles and processes of math and science. This provides a basis for integration of art education with core academics in schools and for thematic development of educational activities that bridge traditional divisions between alternative modes of thought and intellectual experience. The semester includes a multidisciplinary consideration of intellectual creativity as it is understood and practiced in the arenas of art and science. Specific topics vary with the interests of faculty and students. Students prepare original art education activities for both formal and informal educational settings, incorporating concepts from the course. This course is cross-tallied at the undergraduate level as CED 3050 and at the graduate level as CED 6050. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook).

CED 6060. Digital Media for Educators. 3 Credits.

In this hands-on course, students learn the rudiments of educational technology for presentation, learn to search and assess existing multi-media educational teaching resources in art, adapt existing visual resources for new programs and audiences, and create simple artistic projects for students on the computer using widely available basic desktop publishing software. This course is offered at the undergraduate level as CED 4060 and at the graduate level as CED 6060. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook).

CED 6100. Art in the Museum and Community Organizations. 3 Credits.

A comprehensive survey of approaches to informal art education as practiced in museums, community centers, educational support facilities and varied social settings. This course is based on direct observation and systematic review of diverse methodologies, to provide an informed framework for integrated art education, whether as a collaboration between schools and alternative sites, or developed separate from formal schooling. Expertise of the Corcoran's museum educators is emphasized. This course is cross-tallied at the undergraduate level as CED 3100 and at the graduate level as CED 6100. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Prerequisite: CED 3020/6020 Development, Behavior, and Learning.

CED 6113. Museum Teaching Applications. 3 Credits.

In this course students learn to use the museum, its collections, exhibitions and expert personnel as a resource for their teaching. Students apply instructional principles based on the Understanding by Design framework, Discipline Based Art Education, and the Art for Life/Issues-Based curricular structure to create curriculum units for historical, modern and contemporary art topics, art works and artifacts.

CED 6150. Classroom and Activity Management. 3 Credits.

In during this semester, students learn to plan and present lessons for youth in schools or other educational settings. Skills to be emphasized include the development of educational activities to fulfill specific curricular or group goals, identification and adaptation of exemplary existing educational resources, responsive flexibility to varied group needs, group management techniques, and basic assessment methods for both student performance and program success. This course is often integrated with simultaneous Field Experience. This course is cross-tallied at the undergraduate level as CED 3150 and at the graduate level as CED 6150. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Prerequisite: CED 3020/6020 Development, Behavior, and Learning, CED 3010/6010 Art and Learners to Age 12, or CED 3015/CED 6015 Art and Adolescents, completed or concurrent; or permission of department.

CED 6800. Independent Study: Art Education. 3 Credits.

This option is appropriate for degree students who want access to independent faculty supervision, lab areas, and supplies for independent projects, and do not need or desire extensive course instruction.

CED 6900. Student Teaching in Art I. 3 Credits.

The most extensive educational practicum experience for students at the graduate level. Each student selects a single intensive supervised assignment as a student educator in a school, museum or community organization. An individualized syllabus provides a framework for planning and implementing art education lessons in this setting, formally and informally evaluating these activities in educational terms, and reflecting upon the experience from the perspective of an artist/educator. All interns during the same semester meet intermittently to critique and support each other's educational initiatives. A total of 6 credits is needed to fulfill the Student Teaching in Art requirement. Students must enroll in CED 6900 and CED 6901 which may be taken concurrently or sequentially as approved by an advisor and grades are assigned upon completion of the second semester of enrollment.

CED 6901. Student Teaching in Art II. 3 Credits.

The most extensive educational practicum experience for students at the graduate level. Each student selects a single intensive supervised assignment as a student educator in a school, museum or community organization. An individualized syllabus provides a framework for planning and implementing art education lessons in this setting, formally and informally evaluating these activities in educational terms, and reflecting upon the experience from the perspective of an artist/educator. All interns during the same semester meet intermittently to critique and support each other's educational initiatives. A total of 6 credits is needed to fulfill the Student Teaching in Art requirement. Students must enroll in CED 6900 and CED 6901 which may be taken concurrently or sequentially as approved by an advisor and grades are assigned upon completion of the second semester of enrollment. Prerequisite: CED 6900.

CED 6906. Student Teaching in Art. 3 Credits.**CED 6910. Art Education Internship I. 3 Credits.**

The most extensive educational practicum experience for students at the graduate level. Each student selects a single intensive supervised assignment as a student educator in a school, museum or community organization. An individualized syllabus provides a framework for planning and implementing art education lessons in this setting, formally and informally evaluating these activities in educational terms, and reflecting upon the experience from the perspective of an artist/educator. All interns during the same semester meet intermittently to critique and support each other's educational initiatives. A total of 6 credits is needed to fulfill the Art Education Internship requirement. Students must enroll in CED 6910 and CED 6911 which may be taken concurrently or sequentially as approved by an advisor and grades are assigned upon completion of the second semester of enrollment.

CED 6911. Internship: Art Education II. 3 Credits.

The most extensive educational practicum experience for students at the graduate level. Each student selects a single intensive supervised assignment as a student educator in a school, museum or community organization. An individualized syllabus provides a framework for planning and implementing art education lessons in this setting, formally and informally evaluating these activities in educational terms, and reflecting upon the experience from the perspective of an artist/educator. All interns during the same semester meet intermittently to critique and support each other's educational initiatives. A total of 6 credits is needed to fulfill the Art Education Internship requirement. Students must enroll in CED 6910 and CED 6911 which may be taken concurrently or sequentially as approved by an advisor and grades are assigned upon completion of the second semester of enrollment. Prerequisite: CED 6910 Art Education Internship I.

CED 7000. Integrated Art Education. 3 Credits.

For graduate students with a solid grounding in educational theory and practice, this course serves as a starting point for the study of pedagogy and educational practice relating specifically to art and art institutions. An intensive class reading of the core literature of the field introduces major historical and contemporary concepts of creativity, visual learning, perception and artistic experience that comprise the framework for diverse approaches to art education schools, museums and alternative settings today. During visits to art education venues around the metropolitan area, members of the class learn to discover the underlying goals and approaches imbedded in diverse art education programs, and critique the advantages and disadvantages of contrasting methods for differing learners and situations. Integrating theory and praxis, this course establishes critical skills for the four main domains of art education: Interpretation/Meaning-making, Criticism/Aesthetic Discernment, Studio/Production and Historical Understanding. Students plan and carry-out a variety of original educational exercises.

CED 7010. Contemp Issues: Educ Policy/Visual Art. 3 Credits.

This is an interdisciplinary investigation of current affairs concerning the interaction of cultural politics, governmental trends and broad developments in educational philosophy in the public arena. Topics change in response to emerging issues of public concern, often including the interaction of local, regional and national attitudes to art, the impact of educational reform efforts, the role of art education as social acculturation, and appropriate funding levels for both art and education. This course is cross-titled at the undergraduate level as CED 4010 and at the graduate level as CED 7010. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Offered for credit only, Continuing Education students need department approval to enroll.

CED 7100. Art and Special Education. 3 Credits.

This advanced course probes three distinct, but interrelated issues: Differentiated curriculum planning and instruction adaptive to highly varied levels of ability and disability within the same class or learning group; the specific challenges presented to both learner and educator by common physical and learning disabilities; and the special role of visual learning and artistic self-expression for individuals who are challenged by significant disabilities and special gifts in the context of schooling and prevalent educational expectations in our society. Current professional and legal standards for educational access of people with disabilities are covered.

CED 7900. Education Thesis I. 3 Credits.

The thesis in art education is equips future or practicing teachers to engage in systematic research projects during their careers. The thesis may be completed within a wide range of subject areas, using the appropriate methods of information gathering and analysis of results for the approved thesis question. Interdisciplinary projects are encouraged. Each thesis student works with an advisor from the MAT program faculty and one or more secondary readers, usually over two semesters. Particulars of the Education Thesis are published in the "Thesis Advisory" of the Art Education program. A total of 6 credits in Education Thesis are required for the MA in Art Education. Students must enroll in CED 7900 and CED 7901, and have the option to complete both in one semester or over the course of two semesters as approved by an advisor.

CED 7901. Education Thesis II. 3 Credits.

The thesis in art education equips future or practicing teachers to engage in systematic research projects during their careers. The thesis may be completed within a wide range of subject areas, using the appropriate methods of information gathering and analysis of results for the approved thesis question. Interdisciplinary projects are encouraged. Each thesis student works with an advisor from the MAT program faculty and one or more secondary readers, usually over two semesters. Particulars of the Education Thesis are published in the "Thesis Advisory" of the Art Education program. A total of 6 credits in Education Thesis are required for the MAT in Art Education. Students must enroll in CED 7900 and CED 7901, and have the option to complete both in one semester or over the course of two semesters as approved by an advisor. Pre-requisite: CED 7900 Education Thesis I.

CED 7950. Praxis Thesis. 3 Credits.

The thesis project for finishing MA/Art Ed students provides the student with an opportunity to demonstrate their educational leadership skills, pedagogical expertise and creative, artistic capabilities within the scope of a studio-based or educational research project. The process of writing the praxis thesis is intended to further professional growth through inquiry, reflection and integration and may with approval be combined with the studio capstone project. The praxis thesis may take one of three forms: independent study project, portfolio option, site-based inquiry option. Each thesis student works with an advisor from the Art Education program faculty and one or more Fine Art faculty members or approved outside experts. Note: MA in Art Education students may opt to substitute the Education Thesis for the Praxis Thesis, if they complete Proseminar (0 credits) as preparation.

CED 7951. Studio Capstone II. 3 Credits.

CORCORAN ART HISTORY (CAH)

CAH 1032. Survey of Art and Architecture II. 3 Credits.

History of art through the study of major monuments, art movements, and concepts in relation to their historical, cultural, political, economic, and religious contexts. Early Renaissance through the Baroque and modern eras. Includes visits to area museums.

CAH 1070. The American Cinema. 3 Credits.

History and criticism of American films; recognizing and evaluating cinema techniques; and the role of films in the context of American culture. (Same as AMST 1070).

CAH 1090. Art History I: Art Now, Contemporary Perspectives in the Visual Arts. 3 Credits.

Through a focused study of artworks, exhibitions, and critical writings, students are introduced to the major ideas and issues in modern and contemporary art and design as they explore what it means to be an artist today and how the arts evolved into the diverse media landscape of the present.

CAH 1091. Art History II: Historical Perspectives in the Visual Arts. 3 Credits.

The history of art and architecture produced by cultures around the world from prehistory to the end of the nineteenth century; works of architecture, sculpture, and painting both in the process of their creation and meaning in cultural context.

CAH 1135. History of Spanish Art From the Golden Age to Goya. 3 Credits.

Spanish cultural history of the early modern period connecting developments in art and architecture with social, intellectual, and political history; interpretation of images through direct analysis of works of art. Offered through the GW Madrid program.

CAH 2001. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details.

CAH 2001W. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See Schedule of Classes for topics. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CAH 2026. Contemporary Culture. 3 Credits.

This course examines our society's production and reception of various forms of media, including print images and graphic design, TV and cable TV, film and video, computer interfaces and software design, Internet/Web as a visual platform, digital multimedia, and advertising. The course is concerned with helping students develop an informed and critical understanding of the nature of contemporary culture, in particular the mass media, the techniques used by them, and the impact of this media culture on the visual arts and design. The course increases students' understanding of how the media works, how it produce meaning, how it are organized, and how it constructs reality. Through readings, screenings and group discussions, the course provides students with theoretical and practical tools with which to understand and analyze contemporary culture.

CAH 2071. Introduction to the Arts in America. 3 Credits.

Survey of American art from the period of colonial exploration and settlement to the postmodern present; political and social meanings of painting, sculpture, architecture, prints, and photographs; the relationship of art to religion and nationalism; issues of class, race, and gender.

CAH 2145. History of European Decorative Arts. 3 Credits.

Changing styles of European furniture, textiles, ceramics, and glass in the context of general trends in art history and changing patterns in economic, technological, social, and cultural history from antiquity to the modern age.

CAH 2154. American Architecture I. 3 Credits.

Stylistic properties, form and type characteristics, technological developments, and urbanistic patterns as a means of interpreting historic meaning; analysis of buildings both as artifacts and as signifiers of social, cultural, and economic tendencies. 1600 to 1860. (Same as AH 2154, AMST 2520).

CAH 2155. American Architecture II. 3 Credits.

Continuation of CAH 2154. Stylistic properties, form and type characteristics, technological developments, and urbanistic patterns as a means of interpreting historic meaning; analysis of buildings both as artifacts and as signifiers of social, cultural, and economic tendencies. 1860 to present. Recommended background: Prior completion of AMST 2520 or CAH 2154. (Same as AMST 2521, AH 2155).

CAH 2161. History of Decorative Arts: American Heritage. 3 Credits.

The decorative arts in America from the seventeenth century to the modern period; consideration of changing visual characteristics in relation to the changing American experience. Recommended background: Assumes some prior knowledge of European design styles and history, such as that covered in CAH 2145.

CAH 2190. East Asian Art. 3 Credits.

Introduction to the visual and material cultures of East Asia from the prehistoric to modern periods, covering the areas of contemporary China, Japan, and Korea.

CAH 2191. South Asian Art. 3 Credits.

Visual and material cultures of South Asia from the prehistoric to contemporary periods, covering modern Afghanistan, Bangladesh, India, Nepal, Pakistan, and Sri Lanka. (Same as AH 2191).

CAH 2192. Art of Southeast Asia. 3 Credits.

Introduction to the arts of visual and material cultures of Southeast Asia covering areas of contemporary Vietnam, Laos, Cambodia, Myanmar, Thailand, and Indonesia, especially Java and Bali. (Same as AH 2192).

CAH 2300. Medieval Legends in Art. 3 Credits.

This course examines the relationship between medieval epic tales and artistic representations of those stories from the 11th-14th centuries in Western Europe. Although the written texts often coincide with the chronological record of the literature, the visual retellings of the legends are not merely illustrations of the written word. We examine the meanings of visual programs by comparing visual material (tapestries, manuscript paintings, stone sculpture, and small-scale decorative objects) with textual narratives. Special emphasis is placed on the romantic legends of King Arthur and the Knights of the Round Table by Chrétien de Troyes and also romantic tales of medieval Germany, such as Roland, Tristan, and the Niebelungenlied. For term projects students research recent reinterpretations of medieval legends, such as Monty Python's Holy Grail, Tolkien's Lord of the Rings, the literature or films of Harry Potter, King Arthur (2004), Tristan & Isolde (2006), or even the BBC series on Merlin. Course topics include: oral tradition, medieval memory, and the visual record; framing single-scene images and narrative cycles; audiences for visual and written epics; royal portraits in word and image; courtly epics and tapestries; the relationship of secular legends and their representation in stone on churches; courtly ideals for heroes and heroines; 19th c. Romantic idealization of medieval epics in art; and modern cinematic versions of Arthurian legends. This course may also be taken for AS credit.

CAH 3030. History of Architecture and Interior Design. 3 Credits.

Major architectural styles, predominantly of Western civilization, from 1800 to the present; historical development of interior design from the nineteenth century to the present, including design reform of the nineteenth century, Art Nouveau, Arts and Crafts, and Modernism. Additional work required if taken for graduate credit.

CAH 3060. History of Design. 3 Credits.

History of designed objects, images, and spaces, including products, furniture, appliances, interiors, posters and other printed materials, and the latest digital media. Influences among the design disciplines, as well as developments in materials and technologies, within their cultural, political, economic, and social contexts. Recommended for all design students.

CAH 3065. Digital Media Culture. 3 Credits.

From the early days of the telegraph, telephone, radio, television, to the Internet and beyond, the ease and speed with which information can be conveyed digitally is dramatically changing long-established business and social patterns, including how we live, work, and interact. Considering both contemporary media and older technologies as they have been transformed through digitization, this course covers the impact of the digital revolution on the creation, production, and spectatorship of new forms of visual art and design.

CAH 3101. Ancient Art of the Bronze Age and Greece. 3 Credits.

Survey of Greek art from the Minoans and Mycenaeans (c. 2000 BC) to the age of Alexander (c. 300 BC); relationships among the arts of different groups in the Aegean area and their impact on Western culture; Thera volcanic eruption, Dorian Invasion, portrayal of women, heroic nudity, and assumption of a stylistic chronology.

CAH 3102. Ancient Art of the Roman Empire. 3 Credits.

Survey of Roman art from the successors of Alexander the Great (c. 300 BC) to the fall of the Roman Empire in the West (c. 300 AD); impact of the Greek world on Roman art and culture; innovations and achievements of the Romans in architecture, portraiture, and historical narrative. Focus on the city of Rome and other areas of the Roman world such as North Africa and Asia.

CAH 3103. Art and Archaeology of Egypt and the Near East. 3 Credits.

The great artistic tradition of the Nile Valley and the contemporary civilizations (c. 3000 BC to after 1000 BC) between the rivers Tigris and Euphrates (present day Iraq). The Pyramid Age, temples at Karnak and Luxor, tombs of the Valley of the Kings, and artistic traditions of the Sumerians, Akkadians, Babylonians, Assyrians, and Persians.

CAH 3104. Art and Archaeology of the Aegean Bronze Age. 3 Credits.

Excavational and multidisciplinary aspects of classical archaeology in the Bronze Age Aegean utilizing archaeology, ancient history, art history, classical studies, and anthropology; Minoan and Mycenaean civilizations (1700 to 1200 BCE). (Same as ANTH 3806).

CAH 3112. Proseminar in Romanesque and Gothic Art and Architecture. 3 Credits.

The origin of Western art in the Hiberno-Saxon and Carolingian worlds and their relationship to the Ancient heritage and to the contemporary Byzantine art. Romanesque and Gothic architecture and its sculptural decoration as art historical and social phenomena.

CAH 3113. Islamic Art and Architecture. 3 Credits.

Introduction to the visual culture of the Muslim world, from Spain to India, from the seventh century to the present. Examination of artworks in their historical, religious, and cultural contexts; key points in the field's historiography. (Same as AH 3113).

CAH 3114. Art of the Book in the Medieval Muslim World. 3 Credits.

Painting and book illumination in the Islamic world, beginning with the rise of Islam in the seventh century and ending with the seventeenth century. Uses written sources and works of art and material culture to better understand the unity and diversity of the Islamic world and its complex attitude toward images. Recommended background: Prior completion of CAH 3113. (Same as AH 3114).

CAH 3117. Special Topics in Precolumbian Art and Archaeology. 3 Credits.

Topic vary by semester. May be repeated for credit provided the topic differs. See the Schedule of Classes for more details.

CAH 3121. Italian Art and Architecture of the Sixteenth Century. 3 Credits.

Development and theoretical foundations of painting, sculpture, architecture, and urban form in Renaissance Italy from the early fifteenth to late sixteenth centuries.

CAH 3122. Topics in Early Northern Renaissance Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See the Schedule of Classes for more details.

CAH 3123. Topics in Northern Renaissance Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. (Same as AH 3122).

CAH 3131. Italian Art and Architecture of the Seventeenth Century. 3 Credits.

The Counter-Reformation and creation of the Baroque in painting, sculpture, and architecture in Rome (Carracci, Caravaggio, Bernini, Borromini, Pietro da Cortona), Turin (Guarini, Juvarra), and Venice (Longhena).

CAH 3132. Topics in Northern European Art and Architecture of the Seventeenth Century. 3 Credits.

Topic vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. (Same as AH 3132).

CAH 3134. Topics in Spanish and Portuguese Art through the Sixteenth Century. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

CAH 3134W. Topics in Spanish and Portuguese Art Through the Sixteenth Century. 3 Credits.

The Kingdoms of the Iberian Peninsula from the reconquest of Granada to the Renaissance Age of Exploration. May be repeated for credit provided the topic differs. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CAH 3135. Topics in Seventeenth and Eighteenth Century Spanish and Portuguese Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

CAH 3140. European Art of the Eighteenth Century. 3 Credits.

Painting, sculpture, and architecture in France, Great Britain, and Italy. Emphasis on Watteau, Chardin, David, Hogarth, Gainsborough, Reynolds, Canaletto, and Tiepolo. Painting, sculpture, and architecture in France, Great Britain, and Italy. Restricted to Graduate standing.

CAH 3142. European Art of the Late Nineteenth Century. 3 Credits.

The revolution in style of Realism, Impressionism, and Post-Impressionism in the context of Western European political, social, and cultural developments; representative styles of Courbet, Manet, Monet, Morisot, Repin, Seurat, Cezanne, Van Gogh, and Gauguin.

CAH 3143. Early Twentieth-Century Art. 3 Credits.

History and theory of early twentieth-century modernism in the visual arts, from origins in the late nineteenth century through Surrealism. The work of artists such as Matisse, Picasso, Kandinsky, Duchamp, and Mondrian.

CAH 3143W. Early Twentieth-Century Art. 3 Credits.

History and theory of early twentieth-century modernism in the visual arts, from origins in the late nineteenth century through Surrealism. The work of artists such as Matisse, Picasso, Kandinsky, Duchamp, and Mondrian. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CAH 3146. Modern Architecture in Europe and America. 3 Credits.

Major developments in architecture and urbanism from the Industrial Revolution to the end of the twentieth century.

CAH 3150. Theories and History of Graphic Design. 3 Credits.

This course investigates traditional and contemporary ideas, language, and theories of graphic design. It includes a survey of the development of graphic design from 1900 until the present. Specific graphic design assignments are assigned to support certain historical lessons.

CAH 3150W. Theories and History of Graphic Design. 3 Credits.

Analysis of the history of graphic design and visual communication. How cultural factors, such as new technologies, economic shifts, and developments in art and culture, have shaped the field of graphic design.

CAH 3151. American Art in the Age of Revolution. 3 Credits.

American art during the eighteenth-century consumer revolution, the American War for Independence, and the early republic; socioeconomic and political purposes of art, focusing on Enlightenment symbolism and the visualization of national identity. (Same as AMST 3151).

CAH 3152. American Art in the Era of National Expansion. 3 Credits.

American art from the opening of the Erie Canal in 1825 to the Spanish-American War in 1898. Emphasis on the role of art in the expansion of the United States, exploring issues of race, class, and gender; art and religion.

CAH 3153. American Art of the Twentieth Century. 3 Credits.

Twentieth-century American painting and sculpture from the turn of the century to the beginnings of postmodernism. Artists of the Stieglitz circle and later modernist movements such as abstract expressionism, pop, op, minimal, and conceptual art.

CAH 3160. Topics in Latin American Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

CAH 3165. Later Twentieth-Century Art. 3 Credits.

Artists, art, and critical concepts from the later twentieth century; key movements and issues, including abstract expressionism, minimalism, conceptual art, feminism, identity politics, and the rise of globalization.

CAH 3165W. Later Twentieth-Century Art. 3 Credits.

Artists, art, and critical concepts from the later twentieth century, focusing on key movements and issues, including abstract expressionism, minimalism, conceptual art, feminism, identity politics, and the rise of globalization. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CAH 3170. Materials, Methods, and Techniques in Art History. 3 Credits.

Hands-on introduction to the materials, methods, and techniques of the fine arts through traditional practices and processes of manufacture including panels, canvases, grounds, pigments, and drawings and paintings from raw materials.

CAH 3181. Special Topics in Asian Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

CAH 3182. Special Topics in South Asian Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

CAH 3182W. Special Topics in South Asian Art. 3 Credits.

Introduction to the art, architecture, and visual culture of the Indian subcontinent from ancient to contemporary periods. Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CAH 3240. Cultures of Photography: WWII to 2000. 3 Credits.

The nature of photography, its practices, meanings, and visual results during a critical era of rapid development of the medium; how contextual and cultural understandings have shaped the readings of images over the second half of the twentieth century. Additional work is required if taken for graduate credit.

CAH 3330. The Twentieth Century Artist Book. 3 Credits.

The historical, theoretical, and critical development of artists' books throughout the 20th and early 21st centuries within the context of movements and trends in the visual and performing arts; Arts and Crafts Movement, Russian Futurism, Surrealism, fluxus, Conceptual Art, and Postmodernism, among others. Restricted to Priority to graduate students of the Art and the Book department; open to other degree students as space is available.

CAH 3360. The Black Arts Movement. 3 Credits.

This course focuses on the historical, social, and cultural impact of the Black Arts Movement of the 1960s and 1970s. Through an interdisciplinary approach, students are introduced to the issues and themes pivotal to this international art movement's symbols of racial consciousness, transformations in urban life, fashions and hairstyles, music and cinema as aesthetic statements. We explore the works of painters, sculptors, photographers, graphic artists, and filmmakers, including Romare Bearden, Faith Ringgold, David Hammons, Gordon Parks, Elizabeth Catlett, Betye Saar, and Charles White.

CAH 3530. Art and Architecture of Washington, D.C. 3 Credits.

The art and architecture of the city of Washington, D.C. Major collections, special exhibitions, historic architecture, and the city itself. As a majority of class time is spent at various sites outside the classroom, this is a walking-intensive course. Additional work is required if taken for graduate credit.

CAH 3531. Iconic American Designers. 3 Credits.

In-depth examination of works by a select group of iconic American designers from the nineteenth century to the present, including Gustav Stickley, Greene & Greene, Frank Lloyd Wright, Louis Comfort Tiffany, Eero Saarinen, Charles and Ray Eames, Josef and Anni Albers, Frances Knoll, Herman Miller, and Eliot Noyes, and others. Additional work is required if taken for graduate credit.

CAH 3700. Theories of Art. 3 Credits.

This course investigates traditional and contemporary concepts about the relation of ideas, language, and theory to art. Readings cover the history of aesthetics and a selection of modern theoretical proposals, including ethical, political, and psychological interpretations, and theories of expression and communication. Classes combine textual analysis with student criticism. Students develop their own analytical and interpretative propositions concerning contemporary art and design.

CAH 3800. Independent Study: Art History. 3 Credits.

This option is appropriate for degree students who want access to independent faculty supervision, lab areas, and supplies for independent projects, and do not need or desire extensive course instruction.

CAH 3900. Internship: Art History. 1-3 Credits.

For degree students only. Internships can help students develop marketable skills, establish professional contacts, and explore different career options.

CAH 4109. Topics in Ancient Art and Archaeology. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to juniors and seniors.

CAH 4110. The Photograph in Contemporary Art. 3 Credits.

The art, artists, and critical discourses that form the environment for contemporary photo-based art. Consideration of the work of Andy Warhol, Ed Ruscha, Robert Heinecken, Bernd and Hilla Becher, Robert Smithson, Jan Groover, William Wegman, Cindy Sherman, Nan Goldin, Robert Mapplethorpe, and Adam Fuss. Prior knowledge of twentieth-century art and photography is useful.

CAH 4119. Seminar in Medieval Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to juniors and seniors.

CAH 4129. Seminar in Renaissance Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to juniors and seniors.

CAH 4139. Seminar in Baroque Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

CAH 4149. Seminar in Modern European Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to juniors and seniors.

CAH 4157. Seminar in Photography. 3 Credits.

Advanced undergraduate study of photography and lens-based media. Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to juniors and seniors.

CAH 4159. Seminar: American Art/Architec. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

CAH 4159W. Seminar in American Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to juniors and seniors.

CAH 4165. Topics in Islamic Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. Restricted to juniors and seniors.

CAH 4169. Seminar in Contemporary Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See program for more details. Restricted to juniors and seniors.

CAH 4179. Topics in Design History and Theory. 3 Credits.

Practical, historical, and theoretical underpinnings of designed spaces, objects, and interactions. Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details.

CAH 4181. Topics in Asian Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See program for more details. Restricted to juniors and seniors.

CAH 4182. Topics in South Asian Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult program for more details. Restricted to juniors and seniors.

CAH 4197. Senior Thesis. 1-4 Credits.

Students should consult the Director of Undergraduate Studies by the end of their junior year regarding eligibility, selection of an area of research, and the appropriate faculty members to supervise the project. May be repeated for credit.

CAH 4198. Independent Study. 1-3 Credits.

Directed research and study in a specific area of art history to be approved by a faculty member. A written proposal of the plan of study and approval from the faculty member and the Director of Undergraduate Studies is required for registration. May be repeated for credit.

CAH 4199. Internship in Art History. 1-3 Credits.

Students gain practical experience working in an arts institution such as a museum or gallery. Advisor approval required for registration. A maximum of 3 credits may count toward the major. Restricted to Corcoran BA and BFA majors.

CAH 4202. New Media. 3 Credits.

Has the screen replaced the canvas? This class looks at the history and theory, as well as major practitioners, of new media art. Starting with Moholy-Nagy, whose *Painting Photography Film* (1927) argued for the advent of new artistic forms characterized by reproduction, projection, and transmission, we trace the emergence of new media from the late 1960s and 1970s up to the present day. Topics include video art, installation, and computer and internet-based art. Students research contemporary artists working in new media. In some terms this course may be offered at the undergraduate level as CAH 4202 or at the graduate level as CAH 7202. Additional work is required to earn graduate level credit.

CAH 4300. Victorian Avant-Garde: British Art and Culture from 1851 to 1901. 3 Credits.

The second half of the nineteenth century was a period of extreme technological, social, and cultural upheaval. During these years, traditional ideas about art, design, literature, and journalism were challenged by new ways of thinking that seeded the ground for more radical changes in the twentieth century. The class focuses on close and critical readings of primary artworks and texts in Washington-area libraries, archives, and museums. Visits are scheduled for the Rare Book and Special Collections Department of the Library of Congress and the National Gallery of Art. Topics include: The Great Exhibition of 1851, the Pre-Raphaelite Brotherhood, the Arts and Crafts Movement, Aestheticism, and the Revival of Printing. Key figures include: John Ruskin, Dante Gabriel Rossetti, Julia Margaret Cameron, Elizabeth Siddal, William Morris, W.E. Godwin, Walter Pater, J.M.W. Whistler, Aubrey Beardsley, and Oscar Wilde. Along with weekly readings and short written responses, there is one long-form seminar essay and presentation due at the conclusion of the semester, as well as a shorter theoretical essay and a mid-term exam.

CAH 4400. History of Exhibitions from 1850 to Present. 3 Credits.

The history and theory of exhibiting new art since 1850; the French Salon and the independent alternatives that challenged it, from avant-garde exhibitions to installation art and alternative exhibition strategies and contemporary art fairs and biennials. Additional work required if taken for graduate credit.

CAH 4410. From Arts and Crafts to Ikea. 3 Credits.

While the widespread influence of William Morris' Arts and Crafts movement confirms its importance and success, its failure to create truly affordable handcrafted goods for everyday use and everyday people eventually inspired a manufacturing revolution. Since the early twentieth century, mass-produced objects or interior complexes assembled with specific design vocabularies have stimulated a major consumer industry, mediated by sales and marketing strategies that intentionally appeal to the broadest possible clientele. Pursuing discussions inspired by Arts & Crafts into the present age, this course touches on discourses about fashion versus style, 'sham' or kitsch versus high design, the inherent value of crafted versus mass produced items, and innovations in materials or manufacturing techniques that either reflect their own period of time or romanticize the past—all topics that still resonate within the design and manufacturing arena. What began with many regionally inventive streams—including Germany's Bauhaus curriculum, Scandinavia's national romanticist movement, or America's Colonial and Mission revivals—has culminated in mass-marketed brands and ensemble marketing, represented by IKEA, Herman Miller, Ethan Allen, or Pottery Barn (among others). This course surveys various pioneers whose design ethos eventually merged with mass production, reviewing a variety of ensemble design approaches: for example, Peter Behrens, Lily Reich (with Mies van der Rohe), Marcel Breuer, Le Corbusier's Thonet preference, Charles and Ray Eames, the Saarinen at Cranbrook, the reproduction industry that represents Frank Lloyd Wright, Russell Wright, and others. The integration of non-Western influences (characterized in the past as Japonisme, Chinoiserie, folkloric or primitivist), the impact of various international expositions, and the success of the "museum"-store mentality (which made Isamu Noguchi, Alvar Aalto, and others more affordable to a wider audience) is also introduced. This seminar-style survey concludes with the "Target" approach (featuring architect Michael Graves), as well as some consideration of recycled or 'green' products that are marketed as "environmentally correct." By the end of this class, students are aware of the major stylistic distinctions, socio-cultural influences, revivals, and shifts in design practices from the eighteenth century to the present in their fields of interior design or decoration. At times this course may be cross-tallied at the graduate level as CAH 6410. Additional work required for graduate level credit is outlined in the course syllabus.

CAH 6030. History of Architecture and Interior Design. 3 Credits.

Major architectural styles and the development of interior design since the nineteenth century, covering such seminal movements as Art Nouveau, Arts and Crafts, the International Style, and Modernism. Consideration of the social and cultural forces that shape design.

CAH 6040. Contemporary Culture and Design. 3 Credits.

This course examines how the field of design reflects the movements and attitudes of our contemporary culture and vice versa. Each year the course explores different topics through a combination of seminar, special guest lectures, student presentations, and readings. Students complete an extensive research project on a topic of their choice and present their findings at the end of the semester. The Spring semester focuses on the objects with which we surround ourselves—from the highly functional to the purely decorative and the imminently disposable to the cherished heirloom. We explore the societal influences, the environmental impact, and the role and responsibility of designers in a culture of objects.

CAH 6130. The History of the Western Book: From Gutenberg to Google. 3 Credits.

This one semester course is a brief survey of the history of the book over the last 550 years. We examine not only the production methods of a wide range of book and print materials, but the cultural and theoretical issues that underpin our understanding of the role of the book in history. Although we discuss non-Western and ancient and mediaeval manuscript books, the focus of the course is on developments in Europe and North America. Special, but not exclusive, attention is paid to illustrated and decorated books, as well as twentieth-century livres d'artiste. Many of the course sessions are held at the Library of Congress, where students have direct access to the materials under study. As digital technologies have forced us to reconsider the signifying power of the "body of the book," academic interest in the field of material bibliography has expanded considerably. This course is designed to introduce students to these scholarly issues and debates. Priority to graduate students of the Art and the Book department; open to other degree students as space is available.

CAH 6201. Proseminar in Ancient Art of the Bronze Age and Greece. 3 Credits.

Greek art from the Minoans and Mycenaeans (c. 2000 BC) to the age of Alexander (c. 300 BC). Relationships among the arts of the different groups in the Aegean area and their impact on Western culture. The Thera volcanic eruption, the Dorian Invasion, the portrayal of women, heroic nudity, and the assumption of a stylistic chronology. Restricted to graduate students.

CAH 6202. Proseminar in Ancient Art of the Roman Empire. 3 Credits.

Roman art from the successors of Alexander the Great (c. 300 BC) to the fall of the Roman Empire in the West (c. 300 AD). The impact of the Greek world on Roman art and culture; innovations and achievements of the Romans in architecture, portraiture, and historical narrative. Focus on the city of Rome and other areas of the Roman world such as North Africa and Asia.

CAH 6205. Topics in Ancient Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to graduate students.

CAH 6211. Proseminar:Christian/Byzantine. 3 Credits.

Art of the Mediterranean world following the collapse of Roman administration. Growth of the basilica and its decoration; the significance of small objects in medieval study. The rise and fall of the East Roman (Byzantine) Empire from Justinian to 1453.

CAH 6212. Proseminar in Romanesque and Gothic Art and Architecture. 3 Credits.

The origin of Western art from the Hiberno-Saxon and Carolingian worlds and their relationship to the Ancient heritage. Romanesque and Gothic architecture and its sculptural decoration as social phenomena. Restricted to graduate students.

CAH 6213. Islamic Art and Architecture. 3 Credits.

Introduction to the visual culture of the Muslim world, from Spain to India, from the seventh century to the present. Examination of artworks in their historical, religious, and cultural contexts; key points in the field's historiography. Restricted to graduate students.

CAH 6214. Art of the Book in the Medieval Muslim World. 3 Credits.

An advanced-level introduction to the visual culture of the Muslim world, from Spain to India, from the seventh to the seventeenth century. Examination of artworks in their historical, religious, and cultural contexts; key points in the field's historiography. Restricted to graduate students.

CAH 6215. Seminar in Medieval Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to graduate students.

CAH 6220. Italian Art/Ach 13th-15th Cent. 3 Credits.

Origins, development, and theoretical foundations of Renaissance painting, sculpture, and architecture (Giotto, Duccio, Masaccio, Donatello, Ghiberti, Brunelleschi, Mantegna, Bellini, Botticelli).

CAH 6221. Proseminar in Italian Art and Architecture of the Sixteenth Century. 3 Credits.

Development and theoretical foundations of painting, sculpture, architecture, and urban form in Renaissance Italy from the early fifteenth to late sixteenth centuries.

CAH 6222. Proseminar in Early Northern Renaissance Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

CAH 6223. Proseminar in Northern Renaissance Art and Architecture. 3 Credits.

Topic vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to graduate students.

CAH 6225. Seminar in Renaissance Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to graduate students.

CAH 6231. Proseminar in Italian Art and Architecture of the Seventeenth Century. 3 Credits.

The Counter-Reformation and creation of the Baroque in painting, sculpture, and architecture in Rome (Carracci, Caravaggio, Bernini, Borromini, Pietro da Cortona), Turin (Guarini, Juvarra), and Venice (Longhena). Restricted to graduate students.

CAH 6232. Proseminar in Northern European Art and Architecture of the Seventeenth Century. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to graduate students.

CAH 6234. Proseminar in Spanish and Portuguese Art through the Sixteenth Century. 3 Credits.

The kingdoms of the Iberian Peninsula from the reconquest of Granada to the Renaissance Age of Exploration. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to graduate students.

CAH 6235. Topics in Design History and Theory. 3 Credits.

Examines practical, historical and theoretical underpinnings of designed spaces, objects, and interactions. Topics vary by semester. May be repeated for credit provided the topic differs. Restricted to This course is restricted to graduate students.

CAH 6236. Seminar in Baroque Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to graduate students.

CAH 6240. Proseminar in European Art of the Eighteenth Century. 3 Credits.

Painting, sculpture, and architecture in France, Great Britain, and Italy. Emphasis on Watteau, Chardin, David, Hogarth, Gainsborough, Reynolds, Canaletto, and Tiepolo.

CAH 6245. Seminar in European Art of the Nineteenth Century. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to graduate students.

CAH 6246. Proseminar in Modern Architecture in Europe and America. 3 Credits.

Major developments in architecture and urbanism from the Industrial Revolution to the end of the twentieth century. Restricted to graduate students.

CAH 6250. Seminar in Modern Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to graduate students.

CAH 6251. Proseminar in American Art in the Age of Revolution. 3 Credits.

American art during the eighteenth-century consumer revolution, the American War of Independence, and the early republic. The socioeconomic and political purposes of art, with focus on Enlightenment symbolism and the visualization of national identity. Prerequisite: graduate students.

CAH 6252. Proseminar in American Art in the Era of National Expansion. 3 Credits.

American art from the opening of the Erie Canal in 1825 to the Spanish-American War in 1898. The role of art in the expansion of the United States, exploring issues of race, class, and gender. Art and religion. Restricted to graduate students.

CAH 6254. Seminar in American Art before 1900. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to graduate students.

CAH 6255. Seminar Studies in American Art and History. 3 Credits.

Selected problems and themes in American cultural history involving the use of artistic materials in different media. Emphasis on methodology and analytic techniques. Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to graduate students. (Same as AMST 6730).

CAH 6257. Seminar in Photography. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to graduate students.

CAH 6330. The Twentieth-Century Artist Book: Tradition and Innovation. 3 Credits.

This course explores the historical, theoretical, and critical development of artists' books throughout the twentieth- and early twenty-first-centuries within the context of movements and trends in the visual and performing arts. Books associated with the Arts & Crafts Movement, Russian Futurism, Surrealism, fluxus, Conceptual Art, and Postmodernism, among others are closely studied. Johanna Drucker's anthology "The Century of Artists' Books"(1995) serves as a guide. Readings and presentations are based on individual books, presses, writers, and artists. Independent research at the Library of Congress and other area research centers culminates in a developed seminar paper to be presented to the class at the conclusion of the semester. In some semesters this course maybe offered at the undergraduate level as CAH 3330 and at the graduate level as CAH 6330. Additional work is required to earn graduate credit. Priority to graduate students of the Art and the Book department; open to other degree students as space is available.

CAH 6332. The Creative Space: Viewing and Reading. 3 Credits.

The emergence of Netscape and the Internet in the 1990s ushered in an important shift in our cultural sensibility surrounding the aesthetic apprehension of words and images. Instead of the meditative, contemplative approach cultivated by the Fine Arts and Literature, we were now asked to "browse" and adopt a more casual, less totalizing approach to our apprehension of mixed verbal and pictorial messages. This course presumes that the emergence and importance of "browsing" today is much more than a technological development limited to digital culture. Instead, it is a symptom of a larger shift in attitudes affecting aesthetic categories generally, part of the construction of a new cultural space "between viewing and reading," a space with its own attitudes and norms. To explore this potential space, and the attitudes and competencies associated with it, we examine examples from artists' books, painting, sculpture, film, video and digital environments that mix words and images, and in doing so contest the dominant paradigms of viewing and reading and suggest an intermediary position or "betweenness". The course begins with a theoretical overview of the problems facing works that combine words and images and suggest betweenness, problems of classification, value and meaning. After establishing a theoretical position, we move through a series of readings and examples week by week that allow us to cultivate a critical vocabulary. Graded assignments in this class address both production and reception. Students are required to produce two works that address the potential middle ground between viewing and reading and the phenomenon of browsing. Two papers analyzing a work or works that address the concepts of the class are also required.

CAH 6400. History of Exhibitions. 3 Credits.

The exhibition is where modern and contemporary art meets the public. This course looks at the history and theory of exhibiting new art in the past 150 years, starting with the French Salon and the independent alternatives that challenged it (Courbet, the Impressionists, and Post-Impressionists), through avant-garde exhibitions (Expressionists, Dada, and Surrealists), installation art and alternative exhibition strategies, and leading to today's art fairs and biennials (Art Basel, Documenta, the Venice Biennale, the Whitney Biennial, etc.). We cover historic exhibits including the Armory Show and Hitler's Degenerate Art exhibit. Individual and group projects research specific recent exhibitions, as we consider such issues as design, audience, and critical reception. At times this course may be cross-tallied at the undergraduate level as CAH 4400. Students wishing to pursue undergraduate credit should register for the undergraduate section.

CAH 6410. From Arts and Crafts to Ikea. 3 Credits.

While the widespread influence of William Morris' Arts and Crafts movement confirms its importance and success, its failure to create truly affordable handcrafted goods for everyday use and everyday people eventually inspired a manufacturing revolution. Since the early twentieth century, mass-produced objects or interior complexes assembled with specific design vocabularies have stimulated a major consumer industry, mediated by sales and marketing strategies that intentionally appeal to the broadest possible clientele. Pursuing discussions inspired by Arts & Crafts into the present age, this course touches on discourses about fashion versus style, 'sham' or kitsch versus high design, the inherent value of crafted versus mass produced items, and innovations in materials or manufacturing techniques that either reflect their own period of time or romanticize the past—all topics that still resonate within the design and manufacturing arena. What began with many regionally inventive streams—including Germany's Bauhaus curriculum, Scandinavia's national romanticist movement, or America's Colonial and Mission revivals—has culminated in mass-marketed brands and ensemble marketing, represented by IKEA, Herman Miller, Ethan Allen, or Pottery Barn (among others). This course surveys various pioneers whose design ethos eventually merged with mass production, reviewing a variety of ensemble design approaches: for example, Peter Behrens, Lily Reich (with Mies van der Rohe), Marcel Breuer, Le Corbusier's Thonet preference, Charles and Ray Eames, the Saarinens at Cranbrook, the reproduction industry that represents Frank Lloyd Wright, Russell Wright, and others. The integration of non-Western influences (characterized in the past as Japonisme, Chinoiserie, folkloric or primitivist), the impact of various international expositions, and the success of the "museum"-store mentality (which made Isamu Noguchi, Alvar Aalto, and others more affordable to a wider audience) is also be introduced. This seminar-style survey concludes with the "Target" approach (featuring architect Michael Graves), as well as some consideration of recycled or 'green' products that are marketed as "environmentally correct." By the end of this class, students are aware of the major stylistic distinctions, socio-cultural influences, revivals, and shifts in design practices from the eighteenth century to the present in their fields of interior design or decoration. At times this course may be cross-tallied at the undergraduate level as CAH 4410. Students wishing to pursue undergraduate credit should register for the undergraduate section.

CAH 6530. Art and Architecture of Washington, DC. 3 Credits.

This course investigates the art and architecture of the city of Washington, DC: major collections, special exhibitions, historic architecture, and the city itself. A majority of our time is spent on site, outside the classroom, so this is a walking-intensive class. Weekly reading and frequent short writing assignments are required, as well as a developed seminar paper at the conclusion of the seminar. At times this course may be cross-tallied at the undergraduate level as CAH 3530 and at the graduate level as CAH 6530. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook).

CAH 6531. Iconic American Designers. 3 Credits.

This course offers an in-depth examination of works by a select group of iconic American designers, from the nineteenth century to the present. We will consider the esthetic, social, and historical implications of the design work of Gustav Stickley, Greene & Greene, Frank Lloyd Wright, Louis Comfort Tiffany, Eero Saarinen, Charles and Ray Eames, Josef and Anni Albers, Frances Knoll, Herman Miller, and Eliot Noyes, among others. Students from diverse disciplinary approaches (fine arts, photography, and design) are encouraged to enroll so that our discussions will be richly informed by different perspectives. Requirements include: presentations, papers, and participation in discussions. At times this course may be cross-tallied at the graduate level as CAH 3531. Additional work required for graduate level credit is outlined in the course syllabus.

CAH 6550. Cultures of Photography: WWII to 2000. 3 Credits.

This course surveys the nature of photography, its practices, meanings, and visual results during a critical era of rapid development of the medium. The class also explores the ways that contextual and cultural understandings have shaped the readings of images over the second half of the twentieth century. Lectures and discussion are supplemented with artifactual material from the collection of Professor Beck. In some semesters this course may be cross-listed at the undergraduate level as CAH 3240 and at the graduate level as CAH 6550. Additional work is required for graduate level credit.

CAH 7211. Museums in the Digital Age. 3 Credits.

This intensive two-week course explores the impact of digital media on museums, with a particular emphasis on museum exhibitions. Students examine the recent history of digital media in museums, meet distinguished practitioners in the field, and work with a local (Washington, DC) museum to introduce digital media into its permanent galleries. While the focus of the course is on museum exhibitions, students also examine the evolving relationship between museums and their audiences. Digital media gives museum professionals an array of tools - mobile, site-based, web-based - but raises serious challenges to long-standing expectations about collections, curatorial authority, and audience participation. Students explore both the current impact and future visions for these tools, their implications, and their significance for museums.

CAH 7281. World Textiles. 3 Credits.

This global survey course introduces students to the important textiles of Asia, Africa, Oceania, and the Americas, from a material culture point of view. Dress and textiles in nomadic, rural, urban, and court social settings are covered, while exploring issues such as gender, religious and political symbolism, and trade and migration of textiles, designs, and materials in ancient, historic, and modern times. The course equips students with the basic terminology and methodology used in analyzing and cataloging textiles. Emphasis is placed on those examples typically encountered in museum and other collections. The course includes both slide lectures and museum visits, all of which are required for successful completion of the course.

CAH 7283. Modern Textiles and Contemporary Fiber Art. 3 Credits.

This course introduces the student to the development of modernist textiles and to contemporary fiber art, examining the continued vitality of textiles in the 20th and 21st centuries and the development of fiber art as an important art form. Topics include: overviews of important art movements (Arts and Crafts, Art Nouveau, Dada and Surrealism, Modernism and others) which have influenced modern textiles; influences of non-western art forms on textiles design; discussion of important designers, artists, and manufacturers. The course is a mixture of seminar discussions and visits to museums with relevant textile collections (Baltimore Museum of Art, Renwick Gallery, Textile Museum). Guest lectures, drawn from museum curators, interior designers, and contemporary fiber art appraisers augment class-led discussions. In addition there are required visits to the homes of contemporary fiber art collectors and to studios of fiber artists. Students are responsible for leading several class discussions based on reading. Students produce several PowerPoint presentations based on topics drawn from themes of the course, produce two papers, and discuss their papers with the class.

CAH 7300. Victorian Avant-Garde: British Art and Culture (1851-1901). 3 Credits.

The effects of the technological, social, and cultural upheaval of the nineteenth century on traditional ideas about art, design, literature, and journalism; the more radical changes in these media in the twentieth century. Study of primary artworks and texts in Washington-area libraries, archives, and museums. The Great Exhibition of 1851, Pre-Raphaelite Brotherhood, Arts and Crafts Movement, Aestheticism, and Revival of Printing. John Ruskin, Dante Gabriel Rossetti, Julia Margaret Cameron, Elizabeth Siddal, William Morris, W.E. Godwin, Walter Pater, J.M.W. Whistler, Aubrey Beardsley, and Oscar Wilde. (Same as CAH 4300).

CAH 7532. Pop, Wiggle, and Wave: Transformative Design of the 1960s. 3 Credits.

Culturally relevant and quintessentially American, design in the 1960's fused a slick, modern vibe with a hipster aesthetic. Explore this iconic period through a hands-on, fast-paced seminar which informs and inspires. Students gain an understanding of the language of design of the 1960's, its antecedents in modernism and its regional and international variations. By looking at design in this period as a cultural history and using the lens of social geography, the class connects the impact of the 60's with culture, style, form and making today.

CAH 7540. History of Modern Graphic Design. 3 Credits.

With the Industrial Revolution came advances in printing and the new medium of photography, both of which shaped the design of books, magazines, posters, and newspapers. Beginning in the mid-nineteenth century, the course examines the significant historical events, modern art movements, designers, and technological advances which shaped the development of modern graphic design. The course includes readings and discussion about contemporary visual systems and the effects of the digital revolution in the field of design.

CORCORAN ARTS AND HUMANITIES (CAS)

CAS 2590. Cultural Resources of Washington, DC. 3 Credits.

In this seminar, first-year students will be introduced to the diverse cultural resources within the major metropolitan area of Washington, DC, that lead to the making of artists. Students will investigate the web of institutions that make up the experience of art, culture, and society; these institutions generate, motivate, activate, foster, and disseminate change - and sometimes stand in its way. Although this course is reading and writing intensive, we will move from the classroom to the locations of culture and the various institutions unique to Washington, DC, that form the experience of art, the creation of culture, and a vision of society. For example, students may choose to explore the changes and shifts in cultural capital for black and African Americans as seen through the locations of former slave Frederick Douglass' house in Anacostia, the Black Renaissance whose music lit up the Lincoln Theatre on U Street (next door to Ben's Chili Bowl, the iconic restaurant that withstood the 1968 race riots after MLK's assassination), and local café and bookstore chain Busboy and Poets named after poet Langston Hughes.

CAS 3091. Art Studies Seminar: Critical Approaches to Modern and Contemporary Art. 3 Credits.

In this seminar course students develop skills in critical analysis of primary and secondary sources, as well as research and communication skills. Students learn how to formulate a thesis statement and provide visual and textual evidence to support an argument. The seminar includes peer evaluation in response to written work and oral presentations. This course is offered in the spring semester. It is required for BA students, and is an elective for BFA students with permission by the instructor. Topics, which vary each semester it is offered, focus on one or more of the following: visual arts, including time-based media, such as video, television, and film, performing arts, and literary arts.

CAS 3120. Principles and Theory of Interior Design. 3 Credits.

Through a seminar format, this course explores the underlying principles and themes of the design of the built interior environment. Major developments in the field and contemporary methodology are placed within a social as well as historical context. In-depth research on selected topics provides each student an opportunity to focus on areas of particular interest under the guidance of the instructor. At times this course may be cross-tallied at the graduate level as CAS 6120. Additional work required for graduate level credit is outlined in the course syllabus.

CAS 3205. Baudelaire to Blogs: The Art of Writing About Art. 3 Credits.

Much writing about art occurs not in books or long scholarly articles but in short formats such as critical reviews, written introductions to exhibits, statements, interviews, opinion pieces, and more recently, blog entries. This class looks both at examples of such art-writing (from the early modern era to the present), and undertakes the practice of writing short descriptive and critical pieces of the types mentioned above in a workshop setting, making use of area exhibits and resources. The goal is for students to develop skill and enjoyment in the diverse possibilities for writing about visual art (including one's own), leading to potential publication (online or in print).

CAS 3216. Art as Social Practice. 3 Credits.

Social practice is a genre of artistic production that utilizes a range of strategies to engage diverse audiences within the public sphere: urban interventions; collaborative and participatory art; service dispersal and generosity art; public performance; and Social Media and new media applications. In this course, we investigate how artists working within the field of Social Practice access the public sphere to shape and develop relations with a range of audiences and publics. What does it mean for artists to create work outside of the gallery and within public space? How might participatory strategies work to change notions of authorship and blur the line between artist and audience? What is the potential of Internet-based protocols as venues for publicly engaged art? To answer these questions, we'll explore the various strategies that characterize Social Practice as well as the theoretical concerns that inform the genre (social theory, relational aesthetics, pluralism) through critical readings, artist projects, guest lectures and classroom experiments.

CAS 3330. Body and/as Image. 3 Credits.

Twentieth-century art has increasingly seen the artist's body used as both the subject and object of artists' work. Expanding and renewing the age-old tradition of self-portraiture, body and performance artists are part of the tradition of artists moving art out of the gallery, into unexpected spaces and media. Beginning with key artists such as Marcel Duchamp and Jackson Pollock, we examine the work of artists who have used their bodies to create their art, including Carolee Schneemann, Yoko Ono, Chris Burden, Ana Mendieta, Vito Acconci, Marina Abramovic, Matthew Barney, Yasumasa Morimura, and Mona Hatoum. Representations of the artist's body in a wide range of media, including painting, photography, video, and performance, are analyzed in relation to the social historical context as well as critical writing by philosophers and thinkers such as Georges Bataille and Gilles Deleuze. This course is designed for students whose work involves the human body. Students research artists or art movements for a paper and project. In some terms this course may be cross-tallied at the undergraduate level as CAS 3330 and at the graduate level as CAS 6330. Additional work is required to earn graduate credit.

CAS 3360. Psychology of Creativity. 3 Credits.

How can we define creativity? Do we always recognize it when we see it? How can we make access to our own creativity more reliable? Artists, designers, and innovative thinkers have always pursued these questions. In the rapidly changing age of information, they have become crucial in all fields. In this course, the psychological and biological foundations of perception through problem-solving and creative work are studied as a means of exploring and developing creativity through readings, practical exercises, and student projects.

CAS 3381. The Uncanny in Literature, Film, and Art. 3 Credits.

The sensation of the Uncanny has been the subject of debates in criticism since the early days of Romanticism: Is it just a physical response to something creepy, unexpected, or inexplicable? Is it something more exalted, a variation on the Sublime, or the artistic trace of an attempt to represent what can never be represented? To understand how these questions moved from the periphery to the center of ideas about modern art, we explore Freud's influential theory of the Uncanny, as well as accounts of the fantastic and supernatural in art. To trace some of the forms of the Uncanny, we look into haunted houses, monsters, doubles, vampires, and ghosts in examples from fiction and film such as: Edgar Allan Poe, *The Fall of the House of Usher* and *The Black Cat*; E. T. A. Hoffmann, *The Sandman*; Henry James, *The Turning of the Screw*; Bram Stoker, *Dracula*; Carl Dreyer, *Vampyr*; Michal Waszynski, *The Dybbuk*; Jacques Tourneur, *Cat People*; Peter Greenaway, *A Zed and Two Noughts*.

CAS 3400. Introduction to Documentary Film. 3 Credits.

Following John Grierson's definition of the documentary as "the creative treatment of reality," this course considers documentary as a special type of non-fiction film that is primarily marked by its desire to give a subjective account of the world as opposed to an objective report. In the first half of the semester, we examine some key theoretical and formal issues surrounding the documentary form. In the second half of the semester, we pay special attention to the history of documentary film from the 1960s as an alternative film practice and consider documentary's special relationship to reality, experience, expression, and social commentary/change. In particular, we are interested in attempts by filmmakers to explore the limits of non-fiction.

CAS 3421. The Birth of Cinema. 3 Credits.

The global history of the silent cinema; aesthetic and social issues, with particular emphasis on the development of Hollywood and production; the proto-cinema of zoopraxiscopes and nickelodeons; the parallels between early cinema and the emerging media of representation in the contemporary world. Credit cannot be earned for both this course and CAS 6421.

CAS 4090. BA Senior Thesis Workshop. 3 Credits.

Offered only in the fall semester, this course prepares BA students in their final year with the conceptual and methodological framework necessary for successful completion of the senior thesis project in the spring semester. The emphasis is on developing higher-level academic research and writing skills. Students make a number of off-site visits to the Library of Congress and other archives in the Washington DC region. Coursework consists of frequent short writing assignments and preliminary work on the senior written thesis project: proposals, outlines, bibliographies, etc. Open only to BA majors in their final year.

CAS 4091. BA Thesis Directed Study. 3 Credits.

Reserved for B.A. requirement.

CAS 4105. Interior Design Professional Practices. 3 Credits.

This course explores the everyday business, legal and financial considerations of the practicing interior designer. Topics include the formation and operation of an interior design business, and designer/client relationships. Students are also introduced to portfolio preparation and business writing skills. This course is only offered during the Spring semester. At times this course may be cross-tallied at the graduate level as CAS 7100. Additional work is required for graduate credit. Prerequisites: CID 3091 Interior Design Studio IV.

CAS 4200. Business Communications for Designers. 3 Credits.

This course focuses on building business communication skills and materials necessary for success in the field of design. Written, oral, and visual communications skills and best practices are covered. Designers brand themselves as a creative professionals through presentation of projects in a professional and compelling manner. Projects include writing content for resumes, cover letters, introduction and thank you letters, emails, proposals/cost estimates, websites and marketing materials; role playing for phone and in-person interviews; presentations of design work to potential clients; and establishing (or enhancing) a presence on various professional community networking sites. Please note that this is not a studio course, nor are studio-based projects part of the syllabus.

CAS 4290. The Object in its Public Space. 3 Credits.

Objects exist in ritual, exhibitionary, civic, and domestic spaces. Drawing on theories of space developed in anthropology, semiotics, performance studies, urban studies, and museum studies, this course explores how spaces shape the meaning, value, and power of objects and how objects transform the spaces which they inhabit. Roland Barthes' ground-breaking semiotic analyses of objects, Carol Duncan's *Civilizing Rituals: Inside Public Art Museums*, and Barbara Kirshenblatt-Gimblett's extensive writings on display as performance provide key readings. At times this course may be cross-tallied at the graduate level as CAS 4290. Additional work required for graduate level credit is outlined in the course syllabus.

CAS 4430. The Dream Screen: Cinematic Fantasy from The Wizard of Oz to Eternal Sunshine of the Spotless Mind. 3 Credits.

From the earliest era of cinema, the ability of the medium to replicate the hallucinatory experience of dreaming has been exploited in some genres, but the prevailing mode has been realism. Now the paradigm is shifting: motion pictures that explore the interior space of the mind and portray imaginary worlds are popular successes and win critical esteem. This course investigates the artist's ability to invoke worlds that have never existed in waking reality through the use of photographic illusion and explores outstanding cinematic representations of the dream. The larger purpose of the course is to investigate the foundation of psychoanalytic criticism in the analogy of dream and art. To deepen the student's experience, the course also offers training in keeping a dream journal and exploring your own nightly theater of dreams. Readings in Freud, Jung, Rank, Klein, Kristeva, and film theory; films screened include Surrealist classics *Un chien andalou* and *Dreams That Money Can Buy*; the experimental films of Maya Deren, Kenneth Anger, Stan Brakhage, and Phil Solomon; Hitchcock's *Spellbound*; Ingmar Bergman's *Wild Strawberries*; Richard Linklater's *Waking Life*.

CAS 4440. Sex in American Cinema. 3 Credits.

From silent-screen sirens to contemporary bromance, the movies have not only reflected Americans' sexual mores, but taught the public what to believe, denounce, and accept. This course examines the historical capacity of American cinema both to represent sexual norms and to subvert the idea of the normal, with particular emphasis on the profound historical and cultural influence of the Hollywood Production Code. Examples for study are screened in the Corcoran auditorium and include representative works from genres such as melodrama, farce, film noir, horror and the western, as well as experimental, independent and adult film. Students undertake a critical paper on an American film as their semester project. In some terms this course may be offered at the undergraduate level as CAS 4440 and at the graduate level as CAS 7440. Additional work is required to earn graduate credit.

CAS 4540. Curatorial Seminar. 3 Credits.

Students in this course research and prepare for an exhibition on selected topic in photography, scheduled to open at the Corcoran Gallery of Art at the end of the spring semester. Students research the history of the specific topic and particular photographer(s) who may be in the show. Working in teams, they also learn the hands-on elements of exhibition preparation, and prepare checklists, wall labels, object labels, sample catalogue entries, press releases, work on exhibition design and layout. They also learn the basics of museum techniques for gallery design, shipping costs and planning, condition reports, exhibition installation and preparation, shipping, budgeting, public relations, and catalogue publications.

CAS 6120. Principles and Theory of Interior Design. 3 Credits.

Through a seminar format, this course explores the underlying principles and themes of the design of the build interior environment. Major developments in the field and contemporary methodology are placed within a social as well as historical context. In-depth research on selected topics provide each student and opportunity to focus on areas of particular interest under the guidance of the instructor. This course is open to students enrolled in the Master of Interior Design program; or by permission from the Department Chair. At times this course may be cross-tallied at the undergraduate level as CAS 3120.

CAS 6330. Body and/as Image. 3 Credits.

Twentieth-century art has increasingly seen the artist's body used as both the subject and object of artists' work. Expanding and renewing the age-old tradition of self-portraiture, body and performance artists are part of the tradition of artists moving art out of the gallery, into unexpected spaces and media. Beginning with key artists such as Marcel Duchamp and Jackson Pollock, we examine the work of artists who have used their bodies to create their art, including Carolee Schneemann, Yoko Ono, Chris Burden, Ana Mendieta, Vito Acconci, Marina Abramovic, Matthew Barney, Yasumasa Morimura, and Mona Hatoum. Representations of the artist's body in a wide range of media, including painting, photography, video, and performance, are analyzed in relation to the social historical context as well as critical writing by philosophers and thinkers such as Georges Bataille and Gilles Deleuze. This course is designed for students whose work involves the human body. Students research artists or art movements for a paper and project. In some terms this course may be cross-tallied at the undergraduate level as CAS 3330 and at the graduate level as CAS 6330. Additional work is required to earn graduate credit.

CAS 6400. Introduction to Documentary Film. 3 Credits.

Following John Grierson's definition of the documentary as "the creative treatment of reality," this course considers documentary as a special type of non-fiction film that is primarily marked by its desire to give a subjective account of the world as opposed to an objective report. In the first half of the semester, we examine some key theoretical and formal issues surrounding the documentary form. In the second half of the semester, we pay special attention to the history of documentary film from the 1960s as an alternative film practice and consider documentary's special relationship to reality, experience, expression, and social commentary/change. In particular, we are interested in attempts by filmmakers to explore the limits of non-fiction.

CAS 6421. The Birth of Cinema. 3 Credits.

Between the 1890s and the 1920s, moving pictures evolved from a children's diversion to a force that transformed modern life at all levels. As new technology, as industry, and as a medium of mass art, the cinema contributed significantly to the United States' economic and cultural domination of the twentieth century. In this course, we examine the global history of the silent cinema through outstanding examples, focusing on aesthetic as well as social issues, with particular emphasis on the development of Hollywood and production. We begin with the proto-cinema of zoopraxiscope and nickelodeons, and conclude with a consideration of the parallels between early cinema and the emerging media of representation in the contemporary world. Graduate students in this course offer in-class critiques of required readings in relevant criticism; and prepare a seminar research project in one of four key topic areas: The Cinema of Attractions; Style and Ideology in National Cinemas; Social and Economic Dimensions of the American Cinema Market; Experimental Traditions and Counter-Cinema.

CAS 7100. Interior Design Professional Practice. 3 Credits.

This course explores the everyday business, legal and financial considerations of the practicing interior designer. Topics include the formation and operation of an interior design business, and designer/client relationships. Students are also introduced to portfolio preparation and business writing skills. This course is only offered during the Spring semester. At times this course may be cross-tallied at the undergraduate level as CAS 4105. Additional work is required for graduate credit.

CORCORAN CERAMICS (CCR)

CCR 1253. Introduction to the Wheel. 3 Credits.

Students are introduced to using the wheel to create functional pottery. The class covers wedging, throwing, trimming, and glazing for simple forms. Assignments explore the poetic presence that results from the character of clay, the manipulation of form, and the qualities of glazed surfaces. Weekly assignments focus on bowls and vertical forms with a focused glazing/slipping palette. At times this course may be cross-tallied at the intermediate level as CCR 2253. Students who have completed CCR 1253 may wish to register for CCR 2253.

CCR 2236. Images in Clay. 3 Credits.

Ceramic object-making techniques tie in with drawing, painting, printmaking-this is an intermedia experience for students. Students work with various image-producing techniques which are compatible with ceramics-decals, printing, and painting-to bring the surface image into context with the form of the ceramic object. The class works with oxides and glazes as well as the printed and transferred image. From Majolica to digital imagery, from tile to sculptural object, students create diverse works representing the scope of image-making on clay.

CCR 2253. Intermediate Wheel: Poetry of Pottery. 3 Credits.

The intermediate wheel class delves into beakers, vase's, and pitchers through weekly assignments using the pottery wheel. Just as a poet contemplates the nuances of language, the class considers the aesthetic vocabulary of volume, material and physical traces. Students make and use hand-made brushes as one means to investigate the interrelationship of form and surface decoration. The nuance of slip and glaze application is explored; projects are fired in a high temperature gas kiln. At times this course may be cross-tallied at the Introductory level as CCR 1253. Students with prior experience may register for CCR 2253 if they have already completed CCR 1253. Prerequisites: CCR 1250 or CCR 1253 or permission of the department.

CCR 2380. Sculpture in Clay. 3 Credits.

This course provides an exploration of methods of clay construction relating to sculptural form and the aesthetic concerns of the sculptural object. A variety of traditional hand building methods and innovative forming techniques are introduced to challenge and inspire students notion of ceramic sculpture. The production of discreet objects, multiples, and issues dealing with the installation of each are addressed. The full range of ceramic finishes and firing techniques are introduced and explored to emphasize the interfacing of ceramic surface and form.

CCR 3600. Special Topics: Ceramics. 3 Credits.

Students explore ways of representing the human form utilizing various hand-building techniques. Pinch, coil, and slab methods are reinterpreted with the hollow figure/vessel in mind. Gesture studies in clay form a basis for understanding the connection between the inherent plasticity of the clay and the animation of the body. Sustained figure modeling studies address more traditional sculptural focus using life models. Surface treatments include the use of slips, engobes, sgraffito, as well as glaze and firing options.

CCR 5236. Images in Clay. 3 Credits.

Ceramic object-making techniques tie in with drawing, painting, printmaking-this is an intermedia experience for students. Students work with various image-producing techniques which are compatible with ceramics-decals, printing, and painting-to bring the surface image into context with the form of the ceramic object. The class works with oxides and glazes as well as the printed and transferred image. From Majolica to digital imagery, from tile to sculptural object, students create diverse works representing the scope of image-making on clay.

CCR 5380. Sculpture in Clay. 3 Credits.

This course provides an exploration of methods of clay construction relating to sculptural form and the aesthetic concerns of the sculptural object. A variety of traditional hand building methods and innovative forming techniques are introduced to challenge and inspire students notion of ceramic sculpture. The production of discreet objects, multiples, and issues dealing with the installation of each are addressed. The full range of ceramic finishes and firing techniques are introduced and explored to emphasize the interfacing of ceramic surface and form.

CORCORAN CONTINUING EDUCATION (CCE)

CCE 0899. Digital Photography Basics. 0 Credits.

. Restricted to non-degree students.

CCE 1010. Fundamentals of Graphic Design. 0 Credits.

. Restricted to non-degree students.

CCE 1101. Special Topics: Studio Arts. 0 Credits.

Specialized areas, techniques, theories, and genres of fine arts, photography, or photojournalism. Topics vary by semester. May be repeated for credit provided the topic differs. See program for details. Materials fee. Restricted to non-degree students.

CCE 1120. Introduction to Painting. 0 Credits.

Composition, color, and canvas preparation. Designed for all skills levels; beginners learn the basics and more advanced students progress on an individual basis. Restricted to non-degree students.

CCE 1140. Introduction to Botanical Painting. 0 Credits.

Introduction to the techniques of transparent watercolor using live plant material. Working from simple plant forms to more complex plant portraits; applying paint and rendering precise characteristics of specific plants with attention to form, detail, and color accuracy. Those with botanical drawings may proceed immediately to finished paintings. Prior drawing experience is helpful. Restricted to non-degree students.

CCE 1182. Painting Short Course. 0 Credits.

Composition, color theory, and canvas preparation. For all skill levels; beginners learn basics and more advanced students progress on an individual basis. Restricted to non-degree students.

CCE 1183. The Art of Watercolor/Gouache. 0 Credits.

Control and expression of two water-based media, transparent watercolor and opaque gouache, with primary emphasis on color mixing and color expression. Life, landscape, and portrait subjects. Restricted to non-degree students.

CCE 1185. Non-traditional Watercolors. 0 Credits.

Fresh approach to using watercolor as a flexible and erasable medium; color mixing, new surfaces for watercolor, and techniques for layering imagery. Restricted to non-degree students. Recommended background: Prior drawing or painting experience.

CCE 1186. Figure Painting Short Course. 0 Credits.

Working from live models, students explore how the human body may be represented in paint both realistically and semi-abstractly. Beginning students focus on acquiring technical skills and more advanced students receive guidance in handling compositional and expressive challenges. Students may work in oil or acrylic. Restricted to non-degree students.

CCE 1188. Landscape Drawing and Painting. 0 Credits.

For students of all levels of experience. Students work in their chosen media to hone their hand skills and sharpen their artist's eye in articulating forms in the landscape. Includes regular outdoor and off-campus visits to scenic locations and popular panoramic sites, as well as street scenes and garden vistas. Color theory and the principles of good landscape composition. Restricted to non-degree students.

CCE 1200. Introduction to Jewelry I. 0 Credits.

Basic skills needed to design and fabricate jewelry, including piercing, filing, finishing, soldering, forming, embellishment techniques, and simple clasps. Safety, use, and maintenance of studio equipment and hand tools. Designed for beginning students or those seeking to sharpen technical skills. Restricted to non-degree students.

CCE 1201. Special Topics in Design. 0 Credits.

Specialized areas, principles, and practices in design. Topics vary by semester. May be repeated for credit provided the topic differs. See program for details. Materials fee. Restricted to non-degree students.

CCE 1210. Introduction to Jewelry II. 0 Credits.

Further techniques used in basic jewelry creation; additional clasps, introduction to wax carving and basic stone setting, and surface treatments. Students are encouraged to develop a personal design vocabulary and to broaden their definition of jewelry. For advanced beginner and intermediate students. Restricted to non-degree students.

CCE 1224. Connections: Chains. 0 Credits.

Design and creation of handmade chains; principles of linkage systems; technical processes, including fusing and soldering links and making jump rings, woven chains, and chains with hollow elements. Restricted to non-degree students.

CCE 1253. Introduction to the Wheel. 0 Credits.

Introduction to using the wheel to create functional pottery; wedging, throwing, trimming, and glazing for simple forms. The character of clay, manipulation of form, and qualities of glazed surfaces. Assignments include bowls and vertical forms with a focused glazing/slipping palette. Restricted to non-degree students.

CCE 1300. Introduction to Screenprinting. 0-1.5 Credits.

The use of contemporary water-based ink technology in a variety of techniques for stencil making suited specifically to the screenprinting medium. Substantial independent work is possible for advanced students. Restricted to non-degree students.

CCE 1301. Special Topics in Museum Studies. 0 Credits.

Specialized areas in museum studies. Topics vary by semester. May be repeated for credit provided the topic differs. See program for details. Materials fee. Restricted to non-degree students.

CCE 1370. Book Arts Basics Workshop. 0 Credits.

Demonstration-based course focusing on book structure; basic sewn, glued binding, and box structures; basic techniques, including assembly for a box structure and proper preparation for paper, book board, and book cloth. Proper use of tools and materials. Restricted to non-degree students.

CCE 1383. Introduction to Lithography. 0 Credits.

Introduction to the lithographic process and instruction in executing a lithograph from a stone. Restricted to non-degree students.

CCE 1388. Plate Lithography. 0 Credits.

An introduction to photo-plate lithography. Students take photo-based images and turn them into black and white and color prints using traditional lithography techniques and image building strategies. Restricted to non-degree students.

CCE 1420. Introduction to Drawing. 0 Credits.

This course emphasizes gesture, line, proportion, perspective, mass, volume, value, tone and shading. Working with conté crayon, graphite, pen and ink wash, and an assortment of papers, students study the figure, still life, and subjects of individual choice. Students are provided with a strong foundation for more advanced classes. Restricted to non-degree students.

CCE 1422. Academic Drawing: Still Life, Portrait, and Figure. 0 Credits.

This course incorporates traditional methods of studying drawing used by the European art academies for centuries. Structurally, the course consists of several long-term assignments such as still life, portrait, and figure. The emphasis is on tonal drawing, which teaches students to see relationships between the most complex characteristics of the form and corresponding tonal values of the materials used. Restricted to non-degree students.

CCE 1440. Introduction to Botanical Drawing. 0 Credits.

History, issues, and concepts related to botanical illustration. Study of the major botanical painters and illustrators; seeing and rendering plants and developing a personal style. Restricted to non-degree students.

CCE 1481. Academic Drawing Short Course. 0 Credits.

This course incorporates traditional methods of studying drawing used by the European art academies for centuries. The course consists of several long-term assignments such as still life, portrait and figure. The emphasis is on tonal drawing and learning to see relationships between the most complex characteristics of the form and corresponding tonal values of the materials. The result is similar to the grisaille technique in painting. Restricted to non-degree students.

CCE 1485. Figure Drawing Short Course. 0 Credits.

This course focuses on drawing from live models during each session, working primarily with black and white materials. Students learn how to capture the pose with quick gestures, to develop a quality of line with contours, and to become familiar with proportions by measuring and foreshortening. Short drills lead to long poses and the development of more complete, detailed drawings of the human form. Restricted to non-degree students.

CCE 1487. Portrait Drawing Short Course. 0 Credits.

This course in portrait drawing focuses on learning to draw the basic structure and form of the human head through organization of contours, proportions, and planes. Students develop skills in rendering facial features, explore movement and expression, and attempt to achieve a likeness. Restricted to non-degree students.

CCE 1488. Drawing the District: Nature. 0 Credits.

This course is designed to help students develop a broad foundation of naturalistic drawing using the unique offerings of Washington, D.C. Students draw nature onsite at places such as the U.S. Botanic Garden and the Smithsonian's National Zoo and Natural History Museum. The course is suitable for both artists with some experience and students wishing to develop a strong portfolio for admission to art school or graduate school. Professionals also can use the course as an opportunity to build on their skills. Restricted to non-degree students.

CCE 1493. Drawing in the District. 0 Credits.

Students improve their ability to record and capture their visual impressions of the urban landscape using the unique neighborhoods of Washington, D.C. The class meets once per week at locations such as Dupont Circle, Capital Hill, Georgetown, and Embassy Row. Restricted to non-degree students.

CCE 1501. Special Topics: Music. 0 Credits.

Specialized areas, theories, history, and genres of music. Topics vary by semester. May be repeated for credit provided the topic differs. See program for details. Materials fee. Restricted to non-degree students.

CCE 1586. In My Home. 0 Credits.

This course focuses on the basic elements of interior design. A simplified approach to the principles of design in a residential interior allows students the opportunity to explore interior design within the context of their own homes. Restricted to non-degree students.

CCE 1588. Introduction to Interior Design Concepts for Non-professionals. 0 Credits.

This course is geared toward the nonprofessional design enthusiast who wants to gain a deeper understanding of interior design. The course covers interior design concepts and topics such as drafting to scale by hand, color and material systems, furniture, space planning, site development, lighting, and sustainability. Students undertake a design project, which involves applying these concepts to a small home's interior and exterior and presenting the results to their peers. Appropriate for those students who are looking to stimulate their love of design in a more structured way, take on future renovation projects, and engage with designers and architects on a higher level. Restricted to non-degree students.

CCE 1650. Figure Sculpture. 0 Credits.

An exploration of subtractive versus additive methods within the practice of sculpture. Media used includes clay, plaster, metal, wood, and charcoal. Restricted to non-degree students.

CCE 1782. Portraiture Workshop. 0 Credits.

Focus on the mechanism of portraiture, covering subject, lighting, locations, and other elements. Students practice the skills they learn by creating portraits of one another as well as through brief homework assignments. Critiques, both group and individual, are a fundamental part of this course. Restricted to non-degree students.

CCE 1785. Dark Room Photography Basics. 0 Credits.

Operating a camera, developing film, and printing photos. A manual 35 mm SLR camera with a working light meter is required. Laboratory fee. Restricted to non-degree students.

CCE 1789. Digital Photography Basics. 0 Credits.

This course develops photographic skills, and teaches students how to enhance pictures on the computer, and make digital prints. The curriculum introduces concepts in digital imaging and features of the digital camera. Students learn about, and practice, shooting in aperture and shutter priority modes under different lighting conditions. Composition, depth of field, motion, raw file format, storage issues and color management concepts are discussed. Basic methods of image enhancement using Adobe Photoshop are demonstrated and applied in preparing pictures for printing. Restricted to non-degree students.

CCE 1791. Basic Digital Photography II. 0 Credits.

This course is designed for students with moderate digital camera experience and/or who have completed CCE 1789, Digital Photography Basics. Students should have some experience with using a camera in manual mode and basic familiarity with Photoshop or similar photo editing software. Restricted to non-degree students.

CCE 1801. Special Topics: Theatre and Dance. 0 Credits.

Specialized areas, theories, history, concepts, and forms in dance and theatre. Topics vary by semester. May be repeated for credit provided the topic differs. See program for details. Materials fee. Restricted to non-degree students.

CCE 1806. Ceramics Workshop: Creating the Teapot. 0 Credits.

An introduction to functional and sculptural teapot designs. Throwing and assembling techniques with emphasis on good craftsmanship. Pottery making techniques and the roles that balance volume, surface texture, negative space, and color have in making complex forms. Restricted to non-degree students.

CCE 1820. Introduction to Ceramics. 0 Credits.

This course is open to all skill levels. New students learn basic hand-building techniques and also learn to work on the wheel. Intermediate and advanced students focus on expressive development while building technical skills in construction, glazing, and firing. Lectures and demonstrations cover ceramic sculpture and pottery, glaze application, kiln use, and firing methods. Visits to contemporary and historical ceramic exhibitions are incorporated. Critiques address craftsmanship and personal expression. Restricted to non-degree students.

CCE 1825. Introduction to the Wheel. 0 Credits.

Students are introduced to using the wheel to create functional pottery. The class covers wedging, throwing, trimming, and glazing for simple forms. This course explores the poetic presence that results from the character of clay, the manipulation of form, and the qualities of glazed surfaces. Projects focus upon bowls and vertical forms with a glazing/slipping palette. Restricted to non-degree students.

CCE 1951. Becoming a Professional Artist. 0 Credits.

Topics include artist statements, grants, studio practice, etiquette, pricing, taxes, and tools available to emerging artists. Students develop a deeper understanding of the nature of the art world. Materials fee. Restricted to non-degree students.

CCE 1961. Pre-College: Figure Painting. 0 Credits.

Students work from observation and experiment with abstraction to learn painting fundamentals and the basics of color theory and composition. Subject matter includes both nude and draped models. Students are introduced to various materials, mediums, and techniques. Group and individual critiques take place throughout the course. To enroll visit www.precollege.gwu.edu. Studio fee. Restricted to non-degree students.

CCE 1981. A Week of Photoshop. 0 Credits.

This intensive workshop gives students a solid grounding in the fundamentals of Adobe Photoshop and the confidence to explore more advanced features. Students learn how to scan and import images and artwork and how to correct and adjust image tone and color. Restricted to non-degree students.

CCE 1984. Web Design for Professionals. 0 Credits.

Using industry-standard Adobe Dreamweaver, this professional development workshop introduces students to the basics of modern web development and design, including best practices; formatting with CSS; understanding Web 2.0; reusing data; using open-source JavaScript libraries; the role of the database in web design, creating forms, using Photoshop to create mouse-overs, optimizing images for the Internet, using AJAX to create widgets and drop-down menus; and much more. Students critique sites, discuss finding a niche in the huge world of web design, review likely web design trends in the next several years, and discuss project management and customer relations, including explaining the technical and design sides of projects to clients who are otherwise not equipped to evaluate project goals. It is recommended for students with at least two years of professional experience with Photoshop. Restricted to non-degree students.

CCE 2050. Typography I. 0 Credits.

Typography I Restricted to non-degree students.

CCE 2101. Special Topics: Painting. 0 Credits.

In-depth study of specialized areas, techniques, movements, and genres of painting. Topics vary by semester. Consult the Schedule of Classes for more details. Materials fee. Restricted to non-degree students.

CCE 2120. Intermediate Painting. 0 Credits.

This course reviews the fundamentals of painting and focus on individual development of style, technique, and direction. With the instructor's guidance, students explore their personal visions and examine the historical and contemporary context of individual work. Class critiques and discussions help students gain a better understanding of the painting process and increase their ability to express visual concepts. Students may work in oil or acrylic paint. This course is for intermediate and advanced students. Restricted to non-degree students. (Same as CCE 1120).

CCE 2122. Abstract Painting. 0 Credits.

This course explores the concepts and meanings of abstraction and their relevance in today's world. Students draw on imagery from nature and the visible world, personal experience, ideas, dreams, and the history of abstract painting. No painting or drawing experience required. Restricted to non-degree students. (Same as CCE 3220).

CCE 2135. Still Life Painting in Oil: Techniques of the Old Masters. 0 Credits.

Students become acquainted with the painting techniques of early seventeenth-century Europe. Starting with a tonal underpainting, students use transparent glazes to build form, color, luminosity, and drama. The paintings of Caravaggio, Georges de La Tour, Claude Lorraine, and Vermeer are used as guides as students become familiar with the terms chiaroscuro, tenebrism, and sfumato. Subject matter includes still life and landscape. Appropriate for both beginner and intermediate students. Restricted to non-degree students.

CCE 2140. Intermediate Botanical Painting in Watercolor. 0 Credits.

Continuation of CCE 1140. Further study of techniques of transparent watercolor using live plant material. Students learn to apply paint and render the precise characteristics of specific plants, paying close attention to form, detail, and color accuracy. Beginning with a simple plant form, students move quickly to more complex plant portraits. Those with botanical drawings may proceed immediately to finished paintings. Restricted to non-degree students.

CCE 2201. Botany for Illustrators. 0 Credits.

Botany for Illustrators Restricted to non-degree students.

CCE 2220. Intermediate Jewelry. 0 Credits.

Focusing on individual artistic development as well as more advanced metalworking techniques, this course provides an opportunity for students to integrate their design sense into more conceptual projects. Technical topics to be covered include more advanced surface embellishment techniques, wire construction, fold forming, fusing, and more advanced mechanisms. This course is designed for intermediate students. Restricted to non-degree students.

CCE 2253. Intermediate Wheel Throwing. 0 Credits.

While being assisted in their efforts to enhance their throwing skills, students are encouraged to explore a wide range of decorative techniques, both in the forms they produce and texturing and color treatments applied to those forms. Methods useful in the throwing of large forms are also explored, as are possibilities of combining thrown shapes to create larger vessel or sculptural forms. Restricted to non-degree students. Prerequisite: CCE 1253. (Same as CCE 1253).

CCE 2300. Intermediate Screenprinting. 0 Credits.

Use of water-based ink technology in a variety of techniques for stencil making suited specifically to the screen printing medium. Independent projects as well as those for group critique. For advanced students. Restricted to non-degree students. (Same as CCE 1300).

CCE 2301. Special Topics: Printmaking. 0 Credits.

In-depth study of a specialized area in the art of printmaking. Consult the Schedule of Classes for more details. Materials fee. Restricted to non-degree students.

CCE 2320. Digital Illustration I. 0 Credits.

Digital illustration I Restricted to non-degree students.

CCE 2328. Between Paint and Print. 0 Credits.

This course is an opportunity for painters to explore the possibilities and potential of integrating screenprinted imagery, textures, and ideas into painting as unique works or as serial projects. Students explore ways to incorporate printed images directly into the painted surface, working with printing inks, resists, and adhesives to alter and organize the paint. Restricted to non-degree students.

CCE 2341. Woodworking and Furniture Design. 0 Credits.

This course explores the fundamentals of both traditional and contemporary design. From chairs to tables to a variety of cabinetry, students have the ability to construct a work of their own design. Over the course of the semester, students work with the instructor on the design and building of a piece of furniture. Instruction in the usage and techniques of both machine and hand tools are covered in conjunction with the execution of the finished piece. Beginning with sketches, students explore design and materials, fabricate models, and generate construction drawings, with a goal of fabricating and completing their own project. Restricted to non-degree students.

CCE 2342. Hand Papermaking Techniques. 0 Credits.

Introduction to western papermaking as an art medium. The process of making production paper; manipulation of pulp. Studio techniques, including pulp painting, inclusions, watermarks, and sculptural techniques. Materials fee. Restricted to non-degree students.

CCE 2380. Sculpture in Clay. 0 Credits.

Sculpture in clay. Restricted to non-degree students.

CCE 2401. Special Topics: Drawing. 0 Credits.

In-depth study of a specialized area in the art of drawing. Topics vary by semester. Consult the Schedule of Classes for more details. Materials fee. Restricted to non-degree students.

CCE 2420. Intermediate Drawing. 0 Credits.

This course further develops drawing skills and explores a wider range of materials related to drawing through still life, landscape, and the model. Students should enter with basic drawing skills. Restricted to non-degree students.

CCE 2440. Intermediate Botanical Drawing. 0 Credits.

This course is a continuation of Introduction to Botanical Drawing. In this exploration of the history, issues, and concepts of detailed plant drawings, students use graphite and colored pencil. The course explores the close observation of form and the use of contemporary drawing sensibilities in the tradition of botanical illustration. Notable historical and contemporary artists of this genre are discussed. Restricted to non-degree students.

CCE 2501. Special Topics: Interior Architecture. 0 Credits.

Specialized concepts, methods and techniques, theories and design processes of interior architecture. Topics vary by semester. May be repeated for credit provided the topic differs. See program for details. Materials fee. Restricted to non-degree students.

CCE 2600. Medieval Illumination. 0.5 Credits.

Medieval illumination.

CCE 2601. Drawing Cacti & Succulents. 0.5 Credits.

This workshop explores the beauty and subtle color and variety of forms of cacti and Succulents. Open to students of all experience levels the workshop includes basic drawing techniques with a study of values to capture form in pencil, ink, as well as capturing color using pastel pencils. Basic plant anatomy, botanical illustration techniques as well as simple color theory and an exploration of composition principles in both Eastern and Western art traditions will be discussed. A variety of dry media techniques will be demonstrated. Restricted to Departmental approval required to register.

CCE 2625. Introduction to Metal Sculpture. 0 Credits.

This course is designed for beginning students and explores welding, cutting, bending, and fastening a variety of metals. Oxyacetylene and MIG welders, cutting saws and shears, and the bending brake are introduced. Students construct sculpture projects of their own design. Restricted to non-degree students.

CCE 2635. Intermediate Woodworking and Furniture Design. 0 Credits.

In this intermediate course students expand on introductory skills and techniques and construct a work of their own design. Over the course of the semester, students work with the instructor to design and build a piece of furniture. Instruction in the usage and techniques of both machine and hand tools are covered in conjunction with the execution of the finished piece. Restricted to non-degree students. (Same as CCE 2341).

CCE 2645. Introduction to 3D Printing. 0 Credits.

Set up and use of a 3D printer and overview of 3D modeling software programs that can be used to create and manipulate 3D objects for printing. Students should have a basic knowledge of 3D modeling software and be familiar with Windows operating systems. Laboratory fee. Restricted to non-degree students.

CCE 2701. Special Topics: Photography. 0 Credits.

In-depth study of a specialized area in photography. Consult the Schedule of Classes for more details. Materials fee. Restricted to non-degree students.

CCE 2735. Botanical Photography Workshop. 0.5 Credits.

This two-session workshop emphasizes creative approaches to flower photography, visual composition, managing light, choosing a background, and close-up photography. Participants learn how to use props-such as textured Plexiglas, fabrics, and decorative objects to enhance and capture the beauty of flowers. Restricted to non-degree students.

CCE 2801. Special Topics: Ceramics Studio. 0 Credits.

In-depth study of a specialized area in the art of ceramics. Consult the Schedule of Classes for more details. While not required, some background in wheelthrown ceramics and design is helpful. Materials fee. Restricted to non-degree students.

CCE 2823. Pyro-techniques: Atmospheric Effects and Firing. 0 Credits.

This course is an introduction to multiple experiences of firing techniques from ancient ceramic traditions as an alternative form of expression in contemporary ceramic practice. The class explores the materials and methodologies of pit-firing, sagger-firing, and wood-firing. A wide range of firing temperatures are explored to mirror the development and understanding of firing methods through history. The course requires travel to off-site locations for daylong excursions on weekends to conduct firings. All clay building techniques are encouraged with each firing method, which offer their own set of parameters on ceramic forms and fired expression. Restricted to non-degree students.

CCE 2825. Intermediate Wheel Throwing. 0 Credits.

This course enhances student throwing skills and encourages exploration of a wide range of decorative techniques related to form and texture in ceramics. Methods useful in the throwing of large forms are also explored, as are possibilities of combining thrown shapes to create larger vessel or sculptural forms. Students should enter with basic pottery and ceramics skills. Restricted to non-degree students. (Same as CCE 1825).

CCE 2901. Special Topics: Art History. 0 Credits.

In-depth study of a specialized area of art history. Consult the Schedule of Classes for more details. Materials fee. Restricted to non-degree students.

CCE 3131. Painting in a Series. 0 Credits.

For intermediate and advanced students interested in producing a coherent and expressive body of work. Students identify core themes in their work, refine drawing and painting skills, and develop focus and organize efforts toward a coherent artistic vision. Laboratory fee. Restricted to non-degree students.

CCE 3200. Advanced Jewelry. 0 Credits.

This course culminates the general jewelry class offerings and is designed for advanced students. Students design and create a portfolio of work around a central theme or theory using all the skills developed in lower-level courses. Restricted to non-degree students.

CCE 3210. Advanced Painting: Special Topics. 3 Credits.

Advanced painting.

CCE 3220. Advanced Abstract Painting. 0-1.5 Credits.

Both individual and group critiques will be provided, with emphasis on the development of personal attitudes and approaches to painting. Out-of-class work will be encouraged and critiqued in relation to in-class work. This course is designed for intermediate students. Restricted to Non-degree students.

CCE 3430. Design for Mobile Devices. 0 Credits.

Design for mobile devices. Restricted to non-degree students.

CCE 3601. Special Topics: Sculpture. 0 Credits.

In-depth study of a specialized area in the art of sculpture. Consult the Schedule of Classes for more details. Materials fee. Restricted to non-degree students. Recommended background: .

CCE 3635. Advanced Woodworking and Furniture Design. 0 Credits.

This course explores the fundamentals of both traditional and contemporary design. Students work with the instructor on the design and building of a piece of furniture. Instruction in the usage and techniques of both machine and hand tools are covered in conjunction with the execution of the finished piece. Beginning with sketches, students explore design and materials, fabricate models, and generate construction drawings, with a goal of fabricating and completing their own project. This course is designed for students with experience in woodworking and furniture design. Restricted to non-degree students. (Same as CCE 2635).

CCE 3901. Special Topics: Digital Media. 0 Credits.

In-depth study of a specialized area in digital media. Consult the Schedule of Classes for more details. Materials fee. Restricted to non-degree students.

CCE 6110. Letterpress I. 0 Credits.

Letterpress.

CORCORAN DECORATIVE ARTS AND DESIGN (CDAD)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CDAD 6570. Proseminar in Decorative Arts and Design. 3 Credits.

Preparation for careers in the history of decorative arts and design. Students choose an object on which to conduct research, write, and make a presentation. Writing intensive. Restricted to graduate students.

CDAD 6571. Survey of Decorative Arts and Design I. 3 Credits.

Overview of major historical developments in decorative arts and design from the 1400s through the 1700s. Focus on objects from Italy, France, England, Germany, and the Netherlands. Restricted to graduate students.

CDAD 6572. Survey of Decorative Arts and Design II. 3 Credits.

Overview of major developments in decorative arts and design in Europe and the United States from 1800 to present. Restricted to graduate students.

CDAD 6573. Material Culture Theory. 3 Credits.

Exploration of material culture theory through a detailed case study of material and artistic output in a particular time period. Topics vary. See department for more details. Restricted to graduate students.

CDAD 6574. Topics in Medium-Based Decorative Arts and Design. 3 Credits.

Provides opportunities for introductory-level study of media – including textile, wood, glass, ceramics, metal, and paper – outside of the student's major area of focus. Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details. Restricted to graduate students.

CDAD 6575. Non-Western Influences in Decorative Arts and Design. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details. Restricted to graduate students.

CDAD 6600. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details. Restricted to graduate students.

CDAD 6900. Independent Study. 3 Credits.

Advanced study of a particular topic or theme in decorative arts and design through readings, research, and analysis. Faculty advisor's approval is required prior to enrollment. Restricted to graduate students.

CDAD 6902. Internship. 3 Credits.

Practicum for credit at a museum, gallery, auction house, arts center, or other approved institution under the supervision of a member of the professional staff. Students are required to spend 260 contact hours on-site over the course of the semester, including the development of a final project based on their internship experience. Restricted to students in the MA in decorative arts and design program.

CDAD 6998. Thesis Research. 3 Credits.

Original advanced research of a particular topic or theme in decorative arts and design that results in an annotated scholarly paper. Includes a thesis defense. May be repeated for credit. Restricted to students in the MA in decorative arts and design program with the permission of the advisor.

CDAD 6999. Thesis Research. 3 Credits.

Original advanced research of a particular topic or theme in decorative arts and design that results in an annotated scholarly paper. Includes a thesis defense. May be repeated for credit. Restricted to students in the MA in decorative arts and design program with the permission of the advisor.

CORCORAN DESIGN (CDE)

CDE 1090. Design Fundamentals I. 3 Credits.

An introduction to the visual components that serve as fundamental principles in the field of design. The study, classification, and application of Gestalt theories of perception, color systems for designers, and pattern making. Design methodology, processes, and language; the critique process; project workflow; professional practices and presentation; and digital software and hand craft tools. Students create 2D and 3D forms and learn how to use materials in design projects.

CDE 1091. Design Fundamentals II. 3 Credits.

In Design Fundamentals II, students utilize and deepen the skills they acquired in Design Fundamentals I. Course projects focus on visual relationships of form and image; type and grid structures; and scale. Visual communication and visual hierarchy are concepts integrated in course projects. Students are engaged in a series of projects that address more advanced 2D and 3D concepts of abstract forms and their professional applications. Students learn about the cultural and functional meaning of materials and finishes, while continuing to hone their digital software tools and hand craft skills. Prerequisites: A grade of C or above in CDE 1090.

CDE 1250. Frame By Frame Animation. 3 Credits.

This course introduces students to the principles and workflow for frame-by-frame animation with still images. Through wire framing and drawing flip books, students learn basic principles of animation. Students learn how to combine claymation and hand crafted techniques with digital production tools. Student learn animation methods and processes, along with workflow and production. Critique process and animation terminology is introduced and developed with course content and projects.

CDE 2090. Design Studio I. 3 Credits.

Course content focuses on visual hierarchy, principles of composition, design principles, and intro to Semiotics. Typography, form, image, space, and the grid are explored through projects. Students learn an iterative design process to explore and develop concepts. This course requires a high level of execution through precise craftsmanship.

CDE 2091. Design Studio II. 3 Credits.

This course explores brand identity systems and programs. Students learn an iterative design process to develop a cohesive and comprehensive branding program. The developed brand identity is applied to various media: print, motion, and web. Prerequisites: A grade of C or above in CGD 2090; or permission of the department chair.

CDE 3800. Independent Study: DM/GD. 3 Credits.

This option is appropriate for degree students who want access to independent faculty supervision, lab areas, and supplies for independent projects, and do not need or desire extensive course instruction.

CDE 3900. Internship: DM/GD. 3 Credits.

Internships can help students develop marketable skills, establish professional contacts, and explore different career options. Restricted to students in the BFA in digital media design program.

CDE 4170. Professional Practices for Designers. 3 Credits.

This course explores targeted résumé and portfolio development in addition to the everyday business considerations of the practicing designer. Topics include personal goal assessment, strengths vs. weaknesses, the formation and operation of a design business, and designer/client relationships. Refining a professional portfolio and reviewing projects is emphasized. This course is geared towards students who are about to enter the design job market. Prerequisites: CDM 3091 or CGD 3091 or CID 3091.

CORCORAN DIGITAL MEDIA DESIGN (CDM)

CDM 0841. Web Design for Professionals. 0 Credits.

Using industry-standard Adobe Dreamweaver, this professional development workshop introduces students to the basics of modern web development and design, including best practices; formatting with CSS; understanding Web 2.0; reusing data; using open-source JavaScript libraries; the role of the database in web design, creating forms, using Photoshop to create mouse-overs, optimizing images for the Internet, using AJAX to create widgets and drop-down menus; and much more. Students critique sites, discuss finding a niche in the huge world of web design, review likely web design trends in the next several years, and discuss project management and customer relations, including explaining the technical and design sides of projects to clients who are otherwise not equipped to evaluate project goals. Pre-requisite: At least two years professional experience with Photoshop.

CDM 0880. Digital Video Basics Workshop. 0 Credits.

Learn to plan, shoot and edit a video production using the latest DV technology. This intensive course offers the student hands-on training in digital movie making and editing techniques using Final Cut Pro. Basic script writing and tools for lighting, editing, and acquiring audio/video are covered. Prior Mac OSX experience preferred.

CDM 1200. Digital Design I. 3 Credits.

An introduction to design fundamentals and digital software tools. The use and application of type and images to design projects; image making; methods, processes, visual hierarchy, and visual communication strategies; and professional practices, project workflow, and the critique process. Students learn to use professional design industry digital software tools, including Adobe Photoshop, Illustrator, and InDesign.

CDM 1201. Digital Design Fundamentals. 1.5 Credit.

This course introduces the fundamentals of digital design using Adobe Illustrator, InDesign, and Photoshop taught within the context of contemporary professional design. Students learn to navigate these three essential graphic design programs and to use the tools and functions necessary for professional design work, both as individual software programs and in combination with one another. Upon completion of this course, students have a solid understanding of how to use Illustrator, InDesign and Photoshop to create typography, layouts and images. Recommended background: Concurrent registration in CGD 1011 strongly recommended for students without prior design experience.

CDM 1241. Web Design Fundamentals. 1.5 Credit.

In this hands-on course, students explore the technical and design fundamentals of creating a website. Students learn how to hand-code Web pages with HTML and CSS, to format text, incorporate images, build tables and create links, as well as how to use Photoshop to prepare images for the web. Through lectures, demonstrations and critiques students are introduced to the elements of good web design, the basics of user interface, and recommended standards. Students design and build a simple website that implements each of the skills and techniques covered in the course. Each student is required to host and upload their website. Students enrolling in this class must have at least 2 years of experience using a Macintosh computer to save, find and open files. They must also be familiar with browsing the web.

CDM 1500. Introduction to VectorWorks. 1.5 Credit.

Introduction to the practice of architectural drawing and detailing through the use of VectorWorks, an industry-standard CAD software for Exhibition Design, Theater Design, Landscape Design, and increasingly used by Architects. Through this course students learn the basics of orthogonal projections (Plan, Elevation, Section) while learning to use and navigate the interface of VectorWorks.

CDM 2230. Page Layout for Print and Interactive Design. 3 Credits.

This course focuses on Adobe InDesign's layout and typesetting tools for print and interactive design. Course content covers page layout, grid systems, typography, styles, tables and forms, color space, file formats, resolution sizes for print and interactive documents. Project and software workflow is included in course projects. Prerequisites: CDM 1200 or CFN 1000.

CDM 2280. Interactive Web Design I. 3 Credits.

This course offers a technical and conceptual introduction to web design. Topics covered include visual design; the fundamentals of website structure and navigation; accessibility and usability; writing HTML and CSS; and content management systems. Projects examine the web as a platform for both client-driven and self-published work.

CDM 2300. Motion Graphics I: After Effects. 3 Credits.

Motion graphics and visual effects for animation, digital video, and film using Adobe After Effects. Visual storytelling through kinetic sequencing, using images, type, and sound. Students learn to create and communicate with pre-visualization tools such as storyboards and style frames before animating in the timeline. Asset management, timeline work flow, keyframes, sound, compositing techniques, basic keying, effects, lighting, and camera use. Projects cover all facets of motion design and narrative storytelling from conceptual design to final production. Prerequisites: CDE 1090 or CDM 1200.

CDM 2320. Digital Illustration I for Designers. 3 Credits.

Digital illustration for print and web. Application of traditional illustration to digital media, using primarily Adobe Photoshop and Illustrator. Focus on concept development and personal style. Critiques consider composition, lighting, content, meaning, and other constructive criteria.

CDM 2420. Sound Design and Editing. 3 Credits.**CDM 3010. Special Topics in Design. 3 Credits.**

Topics vary by semester. May be repeated for credit provided topic differs. See department for more details. Prerequisite: CDE 1090.

CDM 3090. Digital Media Design Studio III. 3 Credits.

Mood boards, storyboards, style frames, video editing, narrative structure, animation, and motion graphics for the network television industry. Design and animation methodology, processes, language, and the critique process. Project workflow, professional presentation, and professional practices for designers and animators are integrated into course projects. The semester long course project is a network ID package that includes a 10 second open, bump in, bump out, lower thirds, and in-show transitions. Adobe After Effects and handcraft tools. Restricted to students in the BFA in digital media design program. Prerequisite: CDE 2091.

CDM 3091. Digital Media Design Studio IV. 3 Credits.

In this advanced level course, students learn and develop skill sets in research, script writing, and voice-overs. Course projects include creating mood boards, storyboards, style frames, video editing, narrative structure, animation, and motion graphics. Students learn design and animation methodology, processes, language, and the critique process. Project workflow, professional presentation, and professional practices for designers and animators are integrated into course projects. Course projects include a Network Promo animation and a kinetic infographic. Students expand their skill sets with Adobe After Effects and handcraft tools in course projects. At the end of the semester, students obtain experience in professional animation projects and skill sets, while understanding on-the-job expectations for a fast-paced professional animation studio in the network television and film industry. Restricted to students in the BFA in digital media design program. Prerequisites: A grade of "C" or better in CDM 3090 or permission of the department chair.

CDM 3280. Interactive Web Design II. 3 Credits.

In this course, students learn to design for dynamic systems. Building on the foundation of Interactive Web Design I, students use tools such as JavaScript, PHP, and SQL in to create pages that communicate up-to-the-minute information. Prerequisite: CDM 2280.

CDM 3300. Motion Graphics II: After Effects. 3 Credits.

Animation and motion graphics using Adobe After Effects. Kinetic sequence projects include narrative animation and type in motion. Students develop advanced level storyboards and style frames as pre-visualization tools. Projects incorporate sound and audio files as tone and storytelling elements. Project workflow emphasizes narrative exploration, pacing, timing, and scene transitions. Projects encompass all facets of motion design and narrative storytelling from conceptual design to final production. Prerequisite: CDM 2300.

CDM 3311. Animation I: Cinema 4D. 3 Credits.

3D animation using Cinema 4D software. 3D space, scale, perspective, modeling, lighting, camera use, textures, and rendering. Students learn 3D animation processes, methods, and workflow as they design and produce small- and large-scale objects in 3D environments. Course content and projects focus on Cinema 4D integration with Adobe Illustrator and Adobe Photoshop.

CDM 3312. Animation II: Cinema 4D. 3 Credits.

Intermediate course in 3D animation using Cinema 4D software. Skill sets, project workflow, and production in 3D animation, including 3D space, modeling, lighting, camera use, and textures. Animation processes, methods, and workflow while creating large scale projects using the software. Introduction of more advanced subjects of character rigging and animation, Dynamics, BodyPaint, Particles and MoGraph, with an exploration of the integration between Cinema 4D and After Effects. Prerequisites: CDM 3311.

CDM 3320. Digital Illustration II for Designers. 3 Credits.

The visual communication art of illustration. Students apply drawings to visual story development by composing graphics, concept art, covers, and other application techniques for a variety of media for print and web. Adobe Photoshop with Adobe Illustrator. Prerequisite: CDM 2320.

CDM 3410. Entertainment Design: Movie Key Art. 3 Credits.

This course introduces the fundamental basics of Movie Key Art for the purpose of movie marketing campaigns, which includes movie posters, promotional merchandise, dvd packaging, outdoor and Internet advertising. Topics covered include the history of Movie Key Art, marketing strategy with ideation and branding, as well as typeface development and using Adobe Creative Suite software at an advanced level. Through the use of Adobe Photoshop, Illustrator and Indesign, the process of Key Art Design for movie advertising will be handled step by step. Establishing pay rates and professional practice in the design industry is discussed in this course. Course projects focus on individual and team collaboration for a real world Studio Experience. Prerequisites: CDE 2091 and CGD 2060.

CDM 3420. Sound Design. 3 Credits.

This course introduces students to audio recording, mixing and mastering skills, as well as creative application of post-production techniques on campus, in the workplace, and at home. Focused on teaching audio recording and post-production mixing basics, this course also concentrates on the history of recording and recording technologies; recording personnel and duties; legal aspects of sound production and design, and the role of the creative process in the world of constantly emerging multimedia and communication technologies. This class features hands-on recording and digital editing in real-world scenarios using a variety of equipment and techniques.

CDM 3430. Design for Mobile Devices. 3 Credits.

Handheld, touchscreen devices as a new medium for telling stories, enhancing communication, and creating relationships. Projects combine text, images, sound, video, and interactivity. Prototyping, visual publishing tools, and HTML/CSS/JavaScript. Adobe Digital Publishing Suite (DPS) and Adobe InDesign. Prerequisites: CDE 2091 and CGD 2060.

CDM 3440. Web Applications: Google, Smart Phones, Drupal, Joomla. 3 Credits.

In this two-part course, learn how to leverage tools used to create mobile and online applications for businesses and organizations. Part 1 focuses on basic iPhone and Google apps. Part 2 covers Drupal, Joomla and Wordpress implementation, including which platform works best for a particular business or organizational model. Prerequisites: CDM 2280 or CDM 1200 or CFN 1000.

CDM 4090. Digital Media Design Thesis I. 3 Credits.

The senior thesis project includes conducting research, writing a thesis paper, interviewing a motion designer or animation professional, writing a script, and designing a thesis animation. Discussion and critique of motion design and animation's role in contemporary culture, commerce, and social identity. This is the culminating project for the BFA in digital media design. Restricted to students in the BFA in digital media design program. Prerequisite: CDM 3091.

CDM 4091. Digital Media Design Thesis II. 3 Credits.

Digital Media Design Senior Thesis is comprised of three components: written paper, interview of digital media design professional, and final multi-media installation. Students must have received a grade of C or above in CDM 4090 to have it count toward the prerequisite requirement. Students finalize the written thesis paper on a design-related topic in the digital media design field. Then, students interview a prominent practitioner in the field of Digital Media Design. As the third component of Digital Media Design Senior Thesis, students translate their thesis paper into a multi-media installation which can be either a rich media interactive experience or a linear or non-linear motion/video narrative. Upon completion, the thesis projects are presented in a special museum exhibition. Restricted to students in the BFA in digital media design program. Prerequisites: CDM 4090 or CDM 4000; or permission of the department chair.

CDM 4300. Motion Graphics III: After Effects. 3 Credits.

Techniques and professional methods for digital filmmaking, video production, and visual effects; process and project workflow for large-scale projects, narrative storytelling, and best professional practices. Builds upon project work in CDM 3300 Prerequisite: CDM 3300.

CDM 4301. Motion Graphics IV. 3 Credits.

Students enrolled in this course learn techniques and apply professional methods for digital filmmaking, video production and visual effects. Advanced course projects include storytelling with camera tracking, green screen, and digital compositing. This course builds upon projects from CDM 4300 Motion Graphics III. Topics covered include process and project workflow for large-scale projects, narrative storytelling, and best professional practices. Students develop advanced level story boards and style frames as pre-visualization tools. Projects incorporate sound and audio files as a tool, tone, and storytelling element. Project workflow emphasizes narrative exploration, pacing, timing, and scene transitions. Critiques are integrated into course projects. Students learn and develop professional verbal communication skills as they develop their creative and technological skill sets Prerequisite: CDM 4300.

CDM 4311. Time-based Media and Animation III. 3 Credits.

This is an advanced course in 3D animation using Cinema 4D software. Students learn advanced skill sets, project workflow, and production in 3D animation, which includes: 3D space, modeling, lighting, camera use, and textures. Students learn animation processes, methods, and workflow while designing and producing a single, high quality animation short, graphics package, commercial campaign, or other equally complex portfolio piece. Students explore the high level subjects of scripting and expressions, while delving deeper into the capabilities of the core foundations of the software as it relates to texture painting and UVs, Organic Modeling, high quality renders, project optimization, and production processes as they relate to real world expectations. Prerequisite: CDM 3312.

CDM 4330. Interaction Design. 3 Credits.

Design - says Elizabeth Coleman - is the art of organizing the world of things to maximum effect. How does this instinct for structure and consequences speak to a practice in interactive media? This course explores ways of shaping experiences and creating meaning in interfaces and on the web. Subjects include user-centered design, information architecture, design documentation, and art direction Prerequisites: CDE 2091 and CGD 2060.

CDM 6010. Topics in Design. 3 Credits.

Issues in contemporary design practice. Topics vary by semester. May be repeated for credit provided topic differs. See department for more details. Materials fee.

CORCORAN EXHIBITION DESIGN (CEX)

CEX 6001. Introduction to Vectorworks. 1 Credit.

This course, offered to non-degree and degree students in the MA/Exhibition Design program, provides an introduction to the 2-D and 3-D environments of Vectorworks. Students learn the principles of architectural drafting, orthogonal projection, basic 3-D modeling and rendering, and efficient workflow in this software.

CEX 6010. Core Studio: Introduction to Exhibition Planning and Design. 3 Credits.

Introduction to the process of planning and designing effective interpretive exhibitions. The final project and presentation is a conceptual interpretive exhibition design that identifies the target audiences and their needs and that develops interpretive goals and objectives, theme and subthemes, the overall visitor experience, schematic plans and drawings, and graphic design and typography typicals. Field trips and guest speakers bring real-world experience to the course. Restricted to students in the MA in exhibition design program; students in the Graduate Certificate in exhibit design program may be admitted upon request.

CEX 6011. Core Studio: Introduction to Tools and Methods of Visual Representation. 3 Credits.

Tools and methods used for graphic design, drafting, and model-making for the purposes of exhibition development and design. Essentials of graphic design through practice in Adobe Photoshop, Illustrator and InDesign. Students document exhibition elevations and floor plans using Vectorworks. Techniques of model-making for use in design development and final presentation of exhibition design concepts. Restricted to students in the MA in exhibition design program.

CEX 6020. Core Studio: Advanced Exhibition Design and Planning: Museum Environments. 3 Credits.

With instruction of designers from the National Gallery of Art, students learn about the design of a large-scale comprehensive exhibition. Conceptual thinking, creative problem solving, and attaining project goals. Students further their skills in articulating and presenting design solutions within contexts that may include challenging architectural issues, universal design principals, and complex client requirements. Organization, clarity of thought and communication, drawing, and model making are stressed. Specific topics may vary. Restricted to students in the MA in exhibition design program; permission required for students in the Graduate Certificate in exhibit design program. Prerequisite: CEX 6010.

CEX 6021. Core Studio: Advanced Exhibition Design and Planning: Non-Museum Environments. 3 Credits.

For students interested in exploring exhibition design in non-traditional environments. By engaging in a real-world project students learn conceptual thinking, creative problem solving, and how to attain project goals. Students further their skills in articulating and presenting design solutions within contexts that may include challenging architectural issues, universal design principals, and complex client requirements. Organization, clarity of thought and communication, drawing, and model making are stressed. Specific topics may vary. Restricted to MA Exhibition Design Students Only; Certificate in Exhibit Design students by permission. Prerequisite: CEX 6010.

CEX 6050. Advanced 3D Modeling and Rendering: Vectorworks. 3 Credits.

Architectural and exhibition design modeling and rendering in the virtual 3D environment of Vectorworks. Students build and document construction-ready virtual structures and environments, with textures, lighting, and image props to generate photorealistic renderings. The final project is a design package that includes renderings and construction drawings for a gallery exhibition or installation. Prerequisites: CEX 1500 or demonstrated skill through portfolio review.

CEX 6100. Lighting Exhibitions. 3 Credits.

Museum lighting design, including such issues as conservation of objects, identification of lamps and fixtures, strategies for controlling lighting effects, and the safe handling of electric equipment.

CEX 6110. Materials, Finishes and Methods for Exhibition Design. 3 Credits.

The range of building and finishing materials available for the design and construction of museum exhibitions and architectural interiors. Design and fabrication of exhibit components, based on considerations of design intent, function, aesthetics, and the visitor experience, as well as ADA guidelines, security, operations, and maintenance. Basics of organizing and preparing construction documents and specifications.

CEX 6120. Core Studio: Advanced Tools and Methods of Visual Representation. 3 Credits.

Advanced instruction in the principles and fundamentals of computer-aided design, representation, presentation, and analysis. Development of skills with digital tools to communicate the design intent to a variety of project stakeholders. Systems of the design process, including analytical, expressive, syntactical, and spatial language. Prerequisite: CEX6011.

CEX 6210. Special Topics in Exhibition Design. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details.

CEX 6800. Independent Study: Exhibition Design. 1-3 Credits.

For degree students only. Enrollment requires prior permission. Restricted to Instructor Permission Required.

CEX 6900. Exhibition Design Internship. 3 Credits.

For degree students only. Enrollment requires prior permission. Restricted to Instructor Permission Required.

CEX 7010. Exhibition Design Studio III: Visual Storytelling. 3 Credits.

Learning through real-world exhibition projects. Further advancement of student skills in planning, programming, developing, and designing a museum exhibition. Students gain experience in developing an exhibition concept package suitable to promote, raise funds, and acquire artifacts for an exhibition in a museum venue in the Washington metropolitan area. Definition of the exhibition mission, teaching points and goals, theme and storyline within the conceptual design. Prerequisites: CEX 6020 or CEX 6021.

CEX 7011. Exhibition Design Studio III: Media and Technology for Audience Engagement. 3 Credits.

Learning through real-world exhibition projects. Explore how digital media is used in museums, as experience and as information delivery. Understand the various forms that digital media takes from simple touch screens and linear video to visitor guided interactive projections. New software tools, applying them to increasingly more complex and demanding scenarios. Augmenting an exhibit item on a local device, activating an exhibit area with projection and motion information graphics, and finally using the visitor as a component of the museum experience. Restricted to MA in Exhibition Design degree candidates; students in the Certificate in Exhibition Design may be admitted upon request. Prerequisites: CEX 6020 and CEX 6021.

CEX 7100. Museum Management and Operations. 3 Credits.

Arts institutional management, including curatorial and collections management as well as legal and financial considerations. Strategic and tactical planning, programming, fundraising, board relations, and outcomes assessment. The roles and relationships of departments such as visitor services, development, finance, education, marketing, communications, curatorial, and collections management.

CEX 7120. Construction and Detailing for Exhibition Design. 3 Credits.

The materials, documentation, and construction techniques used by exhibition designers and fabricators. How design decisions can influence manufacturing efficiency and cost. Drawing skills for reverse engineering of typical exhibit structures. Compilation of a final design or construction documentation package with exhibit media keys and requisite components to communicate and control the design during fabrication.

CEX 7200. Curatorial Studies for Exhibition Designers. 3 Credits.

Overview of curatorial practice in institutions that vary in size, scale, and scope. Traditional and non-traditional curatorial practice, including collections management, research, exhibition planning, public programs, and educational outreach. Specific focus may vary.

CEX 7220. Conservation and Art Handling: The Art of Exhibition Mount Making. 3 Credits.

In this blended learning course, each student combines a research project investigating mount making techniques and their relationship with museum standards for conservation and art handling with hands-on experience in brass mount-making. Students research mount making techniques that reflect understanding of museum object conservation and display. Students visit exhibitions and go behind the scenes to meet conservators, mount-makers, designers and other museum professionals. Students also participate in hands-on workshop component to learn the basics of brass mount-making for museum objects and artifacts. Students work independently towards a final written paper and presentation, along with a physical example of mount making techniques.

CEX 7800. Exhibition Design Capstone/Thesis Part 1. 3 Credits.

The equivalent of the programming phase of a professional exhibition design project, Part 1 of the Capstone/Thesis lays the critical foundation for an exhibition proposal by defining its mission, interpretive goals, and content. Students develop a design concept, based on precedent research, that serves as the guideline for the Capstone/Thesis to be completed in the following semester. The format of the final pro-thesis document is an academic research paper with concept design sketches, plans, and drawings. Prerequisites: CEX 7010 or CEX 7011. Restricted to MA in Exhibition Design students; pre-thesis assessment is required prior to registration.

CEX 7900. Exhibition Design Capstone/Thesis Part 2. 3 Credits.

The student is expected to work at a professional level in completing a comprehensive exhibition design proposal. The process culminates in a public review of the project with jurors drawn from the faculty and the professional design community. Restricted to students in the MA in exhibition design program. Prerequisite: CEX 7800.

CORCORAN FINE ART (CFA)

CFA 1090. Fine Art Fundamentals I: Drawing. 3 Credits.

Drawing is the fundamental language of visual communication and an essential skill for all visual artists. In this course, you improve your drawing skills through exercises in mark making, perspective, and line, with assignments also focusing on value, form and mass, and composition. Students do gesture and contour drawings as well as fully developed drawings; frequent individual and group critiques foster both feedback and your own ability to express your point of view. Classes include demonstrations, drawing the life model and still lifes, and exposure to the history and contemporary practice of drawing. First-year drawing is required of all prospective Fine Art majors and serves as the prerequisite for more advanced drawing, illustration, and animation courses.

CFA 1091. Fine Art Fundamentals II: Painting. 3 Credits.

First-year painting focuses on materials, techniques, and historical precedents as means to begin to develop your personal imagery, content, and techniques. Classes devoted to a rigorous, hands-on learning process provide a context for the expression and development of individual goals, from realism to abstraction to animation. Working on several paintings during the semester, students experiment with both traditional and new methods. Discussions on the history of painting, along with faculty-moderated critiques begin to address the rich context in which the contemporary painter participates. Fundamentals of Fine Art: Painting is a prerequisite for taking intermediate and advanced painting courses.

CFA 1092. Fine Art Fundamentals II: Sculpture. 3 Credits.

This fundamental course in 3-D form and thinking introduces students to a wide variety of techniques, fabrication strategies, and conceptual approaches to form and space. Basic carpentry and welding skills are taught, along with methods of making simple connections, cutting and bending, modeling, mold making and casting. Through demonstrations and research students are exposed to contemporary methods of fabrication and their uses in contemporary art. Class and individual projects are critiqued by the instructor and fellow students, with an emphasis on experimentation and the development of project management skills. Fundamentals of Fine Art: Sculpture is a prerequisite for more advanced courses in sculpture, installation, and performance.

CFA 1215. Color Across Media: Symbolism and Science. 3 Credits.

How artists have used color has changed enormously over the last century. This course examines the main theories which they employed, experimented with, and what they abandoned, as well as some of the science involved. We study several approaches to color, from traditional views about its spiritual aspects, symbolism and scientific properties of specific colors, including both subtractive (physical) and additive (light) color, to Postmodern practices of chance, systems, cultural contexts and commercial color charts. These approaches are studied by a variety of means, from photo expeditions, to extensive paint mixing, to computer exercises, to experiments in chance. Studies include color in cultural contexts; color as mood, temperature, value and space; chromatic gray; color interaction, and some paint-by-number games. Recommended background: Basic familiarity with Adobe Photoshop.

CFA 2090. Fine Art Studio I. 3 Credits.

Students are challenged and encouraged, individually and collaboratively, to employ resourcefulness, critical thinking and creativity to identify, analyze, understand and resolve problems related to contemporary art practice, production and theory. To facilitate this approach, broad problems are presented by a team of faculty that examine the creative appetite and move on to investigation and development of strategies for making art. Required for FA majors.

CFA 2091. Fine Art Studio II. 3 Credits.

The second semester of the fine art studio sequence. Students are challenged and encouraged, individually and collaboratively, to employ resourcefulness, critical thinking and creativity to identify, analyze, understand and resolve problems related to contemporary art practice, production and theory. To facilitate this approach, broad problems are presented by a team of faculty that examine the creative appetite and move on to investigation and development of strategies for making art. Required for FA majors.

CFA 2122. Medium and Materials Workshop: Time-Based Media. 3 Credits.

Medium and Materials workshops are required for BFA Fine Art students but may be used as electives for other programs. As the threshold for media production software and hardware drops, visual artists increasingly have the opportunity to work with time-based, trans-disciplinary tools. Even artists working primarily in traditional media are extending their understanding of their practice as they explore their subjects in time. This course exposes students to a broad range of works: from conventional film and video, to video installation, performance documentation, generative and interactive works. Students get hands-on experience with a variety of commercial and open source tools, as they create and present projects throughout the semester.

CFA 2123. Medium and Materials Workshop: The Object in its Environment. 3 Credits.

Medium and Materials workshops are required for BFA Fine Art students but may be used as electives for other programs. This course focuses on the relationship of the created object with its environment relationships to space and time via the production of sculptural objects involving a variety of materials and processes including (but not limited to) fiber textiles leather plastics wood metals and appropriation of existing objects, placing them in a contemporary context to include practices such as installation, performance fashion, and addresses issues of site sensitivity or specificity, sustainability and environmental design. This is achieved through studio work (investigation, discovery and making) demonstrations, lectures, research and discussion.

CFA 2124. Medium and Materials Workshop: Painting Basics for Fine Art. 3 Credits.

Medium and Materials workshops are required for BFA Fine Art students but may be used as electives for other programs. This course introduces historical and contemporary approaches to painting. Students explore the language of images- developing an awareness of the roles of visual judgement (the objective view), and intuition (the subjective response) in making our creative decisions. We address issues of form, process and content in painting. Students experiment with a variety of materials and surfaces appropriate for painting in watercolor, acrylic, and oil. We also explore a wide range of subjects and sources - with the goal of building a broad visual language of exploration, discovery, and self expression. Material demonstrations, class readings and discussions, and individual and group critiques take place throughout the semester. Intended for, but not limited to, Sophomore BFA/FA majors.

CFA 2125. Medium and Materials Workshop: Printmaking. 3 Credits.

An introduction to the use of a variety of printmaking media, connecting their use to the mainstream of contemporary artistic practice. Etching, lithography, screen print, and relief printing. Printmaking's multi-faceted relationships to photography, sculpture, painting, and other media.

CFA 2126. Medium and Materials Workshop: Ceramic Practice, Earth to Stone. 3 Credits.

This course provides a comprehensive introduction into the materials and methods essential to ceramic practice. Clay forming techniques in all areas of hollow construction is introduced and explored, including hand building, wheel throwing, extrusion, and casting in the creation of clay forms. A basic introduction to the range of clays, and clay bodies facilitates the student's understanding of the suitable methodologies in which to manifest their ideas in clay. The use of slips, engobes, and glazes explores the role of surface treatments in the context of the skin and bones of ceramic objects. The final process of firing is investigated and explored with the student being introduced to multiple firing techniques and the basic operations of an electric kiln.

CFA 2200. Intermediate Drawing. 3 Credits.

This course expands on the concept of drawing to include a wide variety of conventional and unconventional materials and techniques. Students approach drawing both technically and conceptually. Drawing projects focus on both traditional and prepared surfaces. Students discover fresh approaches and open up new possibilities for personal expression. Class meetings emphasize drawing as a sustained effort, with time allotted for demonstrations, discussions, and critiques.

CFA 2201. Drawing Strategies and Practice. 3 Credits.

Why do artists draw today? How are contemporary artists using drawing to conceptualize, to commemorate, to record, or to recall? Drawing is currently an end in itself, as well as a means to project the information that supports all art-making processes. Drawing can be imitative, descriptive, interpretive, and imaginative. The act of drawing can require only the most primitive of media-charcoal made from wood and fire, or pigment of earth mixed with water-and it can take advantage of technology such as photography and digital imaging. This course encourages your understanding of the basis of spatial perception; the value of immediacy in recording; your body's physical-action component in drawing; the rich trove of mark-making we can tap into. Students use a wide range of materials with a creative variety of substrates or surfaces. Projects are observation-based and expand through concept and narrative. All styles and techniques are appropriate for exploration and development. Where can you take drawing? At times this course may be cross-tallied at the undergraduate level as CFA 2201 and at the graduate level as CFA 5201. Additional work is required to earn graduate credit. Prerequisite: CFN 1040 Foundation Drawing, or instructor permission.

CFA 2202. Introduction to Illustration. 3 Credits.

Through lectures and assignments, students are introduced to concepts and history, and experience and are exposed to the multiple facets of illustration. Familiarity with the work of historical and contemporary illustrators helps students gain a greater appreciation of where illustration has come from, where it is going, and how their work might fit into the timeline. The diverse avenues to which illustration work applies are demonstrated. The course emphasizes the importance and significance of creating works of art that have both parameters(size, media, aspect, color, etc.) and deadlines, two things that set "illustration" work apart from many other disciplines of art-making. Students effectively brainstorm ideas and visual solutions to creatively fulfill project requirements. Students are able to research both online and through print media the subject of their illustrations and gather quality reference material to aid in the production of final illustrations. Assignments are intended to simulate projects that illustrators might encounter in real-world working situations and give the student an understanding of the relationship between illustrators and art directors. This course helps students develop an understanding of the importance of following directions, meeting deadlines, and succinctly and effectively conveying concepts visually.

CFA 2210. Intermediate Painting I for Fine Art. 3 Credits.

This course reviews fundamental painting approaches and introduces further experimentation and development of formal, technical, and conceptual aspects of painting. We explore both current and historical painting practices, and investigate the concepts of observation, representation, abstraction, and conceptual thought as sources for our work. Discussion regarding scale, supports, surface preparation, color, and the manipulation of paint as materials and their impact on content and expression is explored. Students are encouraged to work from self direction and self motivation, and begin to develop a personal language of content and expression. Prerequisites: CFA 1220 or CFA 2124.

CFA 2270. In Stitches. 3 Credits.

This course explores the use of the stitch - by hand or machine, knitted or crocheted - as a drawing tool and as a method of creating dimension. It covers historical and contemporary uses in quilting and embroidery, and examines some of their socio-political implications. A variety of techniques are investigated, including applique, piecing, the use of stippling, trapunto, free motion quilting/embroidery and basic knitting and crochet stitches. A variety of tools, materials and threads are studied that include needles, thimbles, fabric stabilizers, batting, embroidery floss and yarn. Completed samples demonstrate understanding of various techniques, and one final project exhibits creative use of them. Intended for, but not limited to Sophomore BFA/FA majors.

CFA 2305. Digital Art I for Fine Art & Photography. 3 Credits.

Students explore the capabilities of powerful programs to manipulate, aggregate and translate digital images and video footage. The course covers editing, proofing, and printing images; provides instruction in basic enhancement to digital photography; develops skill in digital image-making to produce high-quality large scale prints. Students apply the techniques of computer drawing, painting, digitizing, and animation to computer-generated images or images from external sources such as photography, video, and scanners. Images and text are combined to create large-scale compositions. This class is designed for students with photography and fine arts background. In some terms this course may be cross-tallied at a more advanced level as CDM 3200. Students in CDM 3200 deal with more complex image making, and printing challenges, building on CDM 2200 Digital Art I. Prerequisites: CFN 1000 Communication Design, CDM 1200 Digital Art I, or CFA 2122 Medium/Materials: Time-Based Media.

CFA 3090. Fine Art Studio III. 3 Credits.

Fine Art Studio III curriculum is constructed with an emphasis on the development of your individual creative process and studio production. Of equal significance is the student's first-hand understanding of areas of critical importance to the fabric of contemporary art that is studied through the various assignments. These content areas are explored in depth in Seminar providing the necessary background for your investigations. The seminar acts to enrich your understanding of all Studio III Assignments. Third year is a year built around assignments called "contracts" that provide a framework by which you can begin to create a vital and productive individualized studio practice. The contracts bridge faculty-directed studio projects with independent self-directed art making and emphasize the research of ideas, exploration of medium and materials, and the development of process and production over the course of the year. Formal instruction includes brief lectures and specialized demos with an emphasis on feedback on your work in progress through individual studio meetings as well as feedback on your completed work through formal group critiques. This semester your faculty will work with each of you towards better articulation and implementation of your goals arising from your studio investigations. During the course of the year, you are guided through a variety of art making and writing projects that operate through two distinct, but intertwined, art making approaches: expansion of your current studio practice into new and unknown areas and focused studio work. It is important to discover new tools, techniques and areas of conceptual investigation in an effort to expand both your knowledge base and your individualized studio practice. No less important, however, is the focused movement necessary for your commitment to the production of completed, well-realized art works and bodies of work. Methods for locating areas of inspiration are studied collectively in this course. Your Third Year Studio course is a time for beginning the self-directed practices that are necessary for a studio artist beyond the framework of the academy.

CFA 3091. Fine Art Studio IV. 3 Credits.

Reserved for BFA/FA requirement. Corequisite: CFA 3121 Fine Art Seminar II. Prerequisite: CFA 3090 Fine Art Studio III.

CFA 3120. Fine Art Seminar I. 3 Credits.

Fine Art Seminar I is a companion course to Fine Art Studio III, offering students an opportunity to delve deeply into the concepts, historical context, materials, and processes that relate to the contract assignments and to the independent art making you are engaged in this year. The Seminar centers on skills related to your work but differs substantially from your studio class in both content and organization. Its goal is to support your development as an artist, and to challenge you to see your work and the work of your peers in a critical way. Fine Art Seminar I sessions is led by one or more of the Seminar faculty team members, on a rotating basis. The content of these Seminars varies according to the contract and may include lectures, presentations, and group activities such as written or experiential activities or group discussions that relate to and supplement the Fine Art Studio curriculum. Additionally, students are asked to give presentations that relate to this work. Visiting artists and field trips are also a major component of the Seminar.

CFA 3121. Fine Art Seminar II. 3 Credits.

Fine Art Seminar II is a companion course to Fine Art Studio III, offering students an opportunity to delve deeply into the areas of conceptual investigation, historical context, materials, and processes that relate to Studio contract assignments and to the independent art making you are engaged in this year. The Seminar centers on skills related to your work but differs substantially from your Studio class in both content and organization. Its goal is to support your development as an artist, and to challenge you to see your work and the work of your peers in a critical way. Fine Art Seminar II sessions are lead by one or more of the Seminar faculty team members, on a rotating basis. The content of these Seminars varies according to the contract and may include lectures, presentations, and group activities such as written or experiential activities or group discussions that relate to and supplement the Fine Art Studio curriculum. On occasion, students are asked to give presentations that relate to this work. Visiting artist lectures and field trips to museums and other sites of interest will also be a major component of Seminar.

CFA 3210. Advanced Painting: Special Topics. 3 Credits.

This course reviews fundamental painting approaches and introduce further experimentation and development of formal, technical, and conceptual aspects of painting. We explore both current and historical painting practices, and investigate the concepts of observation, representation, abstraction, and conceptual thought as sources for our work. Discussion regarding scale, supports, surface preparation, color, and the manipulation of paint as materials and their impact on content and expression are explored. Students are encouraged to work from self-direction and self-motivation, and begin to develop a personal language of content and expression. Prerequisites: CFA 2124 or CFA 1220.

CFA 3240. Wear, Strut, Occupy. 3 Credits.

Explore notions of costuming, fashion, sculpture, performance, and wearer/performer. Our reasons to wear anything are varied and manifold: to conceal, reveal camouflage or disguise; for protection or to project power or threat; for the purpose of modesty or exhibitionism; to communicate an idea or establish identity, to enhance or impede movement, to express beauty, to impress or to shock. This course approaches the broadest possible definition of clothing and adornment as a vehicle to explore the relationship between the individual, the material and the environment. For their projects students may make use of traditional construction materials, methods and processes, such as patternmaking and sewing, but also can consider manipulating metal, wood, plastics, found objects, and natural materials.

CFA 3306. Performative Media. 3 Credits.

The class introduces students to the creative process of producing performance-based media works, installations, staging and time-based video. Students work with narrative and theoretical texts to study and develop works inspired by theater, cinema, TV culture and mass media. The class focuses on research, development and production of projects on a larger scale with process, evolution and decision-making as part of their creation.

CFA 3331. Fold, Tear, Build. 3 Credits.

As paper is less used to transmit information, interest in its creative potential as an art medium increases. Beginning with rudimentary objects, and concluding with elaborate pop ups, we examine a wide range of paper objects and design, from quickly produced to intricate with painstaking detail, and using anywhere from simple techniques of folding, cutting, gluing and collage to digitally printed, these objects can have a variety of applications including character design, urban art, fine art, graphic design, illustration, animation and film. Starting with making basic volumes, students can extrapolate their own forms and designs for a variety of purposes. The second half of the semester concentrates on the pop up with its myriad of floating and moving forms. Students learn the basic "engines" for mobilizing a 3-D effect from paper, including V-folds and parallel folds, upon which more elaborate forms can be built. Projects range from test pop ups of the basic forms, through large prototypes culminating in a large one-page display of a student's choice of subject, involving drawing, painting and/or photographic imagery. Students learn precise craft skills and organizing efficient sequences of assembly. A laser cutter may be used to save labor. Intended for any level following freshman year. Formerly titled, Paper Craft: Objects Pop Ups.

CFA 3511. Public/Spectacle: Socially Engaged Art. 3 Credits.

Ethical, cultural, and political implications of using art in the public sphere. Philosophical, theoretical, and historical background of these practices. Students create collaborative artworks that address real-life problems and seek solutions in actual and virtual communities - from inventing a persona to creating a social movement. Prerequisites: Any 2000 level FA, CFA, CDE, CGD, CDM, CSL, CPR, CCR or CPH course or equivalent preparation and permission of instructor.

CFA 3800. Directed Studies: Fine Art. 1-3 Credits.

This option is appropriate for degree students who want access to independent faculty supervision, lab areas, and supplies for independent projects, and do not need or desire extensive course instruction.

CFA 3900. Internship: Fine Art. 1 Credit.

For degree students only. Internships can help students develop marketable skills, establish professional contacts, and explore different career options.

CFA 4090. Fine Art Thesis I. 3 Credits.

Reserved for BFA/FA requirement. Prerequisite: CFA 3091 Fine Art Junior Studio II.

CFA 4091. Fine Art Thesis II. 3 Credits.

Reserved for BFA/FA requirement.

CFA 4170. Professional Practices for Fine Artists. 3 Credits.

No artist, however famous or successful, had a clear path to succeed from the beginning. Successful artists learn to maximize opportunities and resources available to them, navigating their way at every turn. There is not one single approach; a strategy with lots of planning and variables must be created and examined. Artists develop a resume and artist statement, research and write grants, practice applying for residencies, and participate in information gathering sessions with art spaces. The instructor creates opportunities for students to meet gallery directors, curators and professional artists in the DC area. These meetings provide substantive time to discuss practical issues and concerns that add to a post-school plan. Writing and reading assignments are two papers including writing a grant application and creating a personal post-college plan plus one exam. Completion of this course results in a deeper understanding of the specific tools available to emerging artists and the nature of the art world in general. Restricted to students in the BFA in fine art program. Prerequisite: CFA 3091.

CFA 4210. Advanced Painting Studio. 3 Credits.

In this advanced painting studio students begin a cohesive body of work or fully develop one in progress. They fine-tune image making skills on work with live models, projected images, or special projects, with emphasis on professional execution. History suggests that Van Eyck made the first oil painting medium, Rubens, Vermeer, and others helped to perfect it. Using the secret formulas and techniques of the Masters, students learn how to use Maroger medium also known as miracle medium. Students also explore imprimatura, underpainting and glazing, mixing and drying properties, opacities and characteristics of colors and media, and the production of effects with different brushes and painting tools. Finally, they master these techniques and adapt them to their vision in forming expressive strategies in oil or acrylics.

CFA 4310. Art Outside the Gallery. 3 Credits.

This course introduces students to creating site specific and installation art while emphasizing public art, the non-profit art world, pop-up and D.I.Y. galleries. Class time is divided between studio time, research, and field visits. Field visits include studio visits with local artist, opening receptions, art fairs and festivals, as well as visits to public art locations throughout the DC area. This is a studio intensive class focusing on a cumulative project/exhibition that the students facilitate on their own or as a class from proposal thru to exhibition installation. Students gain experience with public art proposals and finding/creating alternative art spaces.

CFA 4311. Installation Art. 3 Credits.

This advanced level fine arts sculpture course focuses on the genera of installation sculpture through the lens of site specificity, architecture, media, and landscape. Through instructor directed research, engagement in artistic practice and theoretical exploration the students attain a better understanding of the theories, practices, artists and historical contexts within the field of installation art. Students are encouraged to explore beyond traditional art exhibition sites in order to understand how/why the content of work cannot be separated from its context.

CFA 5201. Drawing Strategies and Practice. 3 Credits.

Why do artists draw today? How are contemporary artists using drawing to conceptualize, to commemorate, to record, or to recall? Drawing is currently an end in itself, as well as a means to project the information that supports all art-making processes. Drawing can be imitative, descriptive, interpretive, and imaginative. The act of drawing can require only the most primitive of media-charcoal made from wood and fire, or pigment of earth mixed with water-and it can take advantage of technology such as photography and digital imaging. This course encourages your understanding of the basis of spatial perception; the value of immediacy in recording; your body's physical-action component in drawing; the rich trove of mark-making we can tap into. Students use a wide range of materials with a creative variety of substrates or surfaces. Projects are observation-based and expand through concept and narrative. All styles and techniques are appropriate for exploration and development. Where can you take drawing? At times this course may be cross-tallied at the undergraduate level as CFA 2201 and at the graduate level as CFA 5201. Additional work is required to earn graduate credit.

CFA 5202. Introduction to Illustration. 3 Credits.

Through lectures and assignments, students are introduced to concepts and history, and experience and are exposed to the multiple facets of illustration. Familiarity with the work of historical and contemporary illustrators helps students gain a greater appreciation of where illustration has come from, where it is going, and how their work might fit into the timeline. The diverse avenues to which illustration work applies is demonstrated. The course emphasizes the importance and significance of creating works of art that have both parameters (size, media, aspect, color, etc.) and deadlines, two things that set "illustration" work apart from many other disciplines of art-making. Students effectively brainstorm ideas and visual solutions to creatively fulfill project requirements. Students are able to research both online and through print media the subject of their illustrations and gather quality reference material to aid in the production of final illustrations. Assignments are intended to simulate projects that illustrators might encounter in real-world working situations and give the student an understanding of the relationship between illustrators and art directors. This course helps students develop an understanding of the importance of following directions, meeting deadlines, and succinctly and effectively conveying concepts visually.

CFA 5210. Inter. Painting for Fine Art. 3 Credits.**CFA 5270. In Stitches. 3 Credits.**

This course explores the use of the stitch - by hand or machine, knitted or crocheted - as a drawing tool and as a method of creating dimension. It covers historical and contemporary uses in quilting and embroidery, and examines some of their socio-political implications. A variety of techniques is investigated, including applique, piecing, the use of stippling, trapunto, free motion quilting/embroidery and basic knitting and crochet stitches. A variety of tools, materials and threads are studied that include needles, thimbles, fabric stabilizers, batting, embroidery floss and yarn. Completed samples demonstrate understanding of various techniques, and one final project exhibits creative use of them. Intended for, but not limited to Sophomore BFA/FA majors.

CFA 6210. Advanced Painting: Special Topics. 3 Credits.

Special Topics in Advanced Painting.

CFA 6240. Wear, Strut, Occupy. 3 Credits.

Explore notions of costuming, fashion, sculpture, performance, and wearer/performer. Our reasons to wear anything are varied and manifold: to conceal, reveal camouflage or disguise; for protection or to project power or threat; for the purpose of modesty or exhibitionism; to communicate an idea or establish identity, to enhance or impede movement, to express beauty, to impress or to shock. This course approaches the broadest possible definition of clothing and adornment as a vehicle to explore the relationship between the individual, the material and the environment. For their projects students may make use of traditional construction materials, methods and processes, such as pattern making and sewing, but also can consider manipulating metal, wood, plastics, found objects, and natural materials. Graduate students identify and research a topic related to the course material, and present their research to the class and any other interested parties. They also submit written and visual support for their research for review. Graduate students adhere to level-appropriate standards regarding content, execution, and finish of their projects.

CFA 6331. Fold, Tear, Build. 3 Credits.

As paper is less used to transmit information, interest in its creative potential as an art medium increases. Beginning with rudimentary objects, and concluding with elaborate pop ups, we examine a wide range of paper objects and design, from quickly produced to intricate with painstaking detail, and using anywhere from simple techniques of folding, cutting, gluing and collage to digitally printed, these objects can have a variety of applications including character design, urban art, fine art, graphic design, illustration, animation and film. Starting with making basic volumes, students can extrapolate their own forms and designs for a variety of purposes. The second half of the semester concentrates on the pop up with its myriad of floating and moving forms. Students learn the basic "engines" for mobilizing a 3-D effect from paper, including V-folds and parallel folds, upon which more elaborate forms can be built. Projects range from test pop ups of the basic forms, through large prototypes culminating in a large one-page display of a student's choice of subject, involving drawing, painting and/or photographic imagery. Students learn precise craft skills and organizing efficient sequences of assembly. A laser cutter may be used to save labor. Intended for any level following freshman year. Formerly titled, Paper Craft: Objects Pop Ups.

CFA 6511. Public/Spectacle: Contemporary Performance from Pop Culture to Social Practice. 3 Credits.

This class introduces students to performance art forms that create social spaces while addressing larger challenges facing society, all with an eye on pop culture and social media. Students work on projects in D.I.Y. production of popular forms, from making their own art bands, music videos and brand identities to creating collaborative artworks which address real-life problems and seek solutions in actual (and virtual) communities. This class provides a forum for students to engage with the full range of appropriations of pop culture spectacle in the field of art - from inventing a persona to creating a social movement.

CFA 6800. Independent Study: Fine Art. 1-3 Credits.

This option is appropriate for degree students who want access to independent faculty supervision, lab areas, and supplies for independent projects, and do not need or desire extensive course instruction.

CFA 7210. Advanced Painting Studio. 3 Credits.

Students in this course begin a cohesive body of work or fully develop one in progress. They fine-tune image making skills on work with live models, projected images, or special projects, with emphasis on professional execution. Using *The Secret Formulas and Techniques of the Masters* students learn how to use Maroger Medium also known as Miracle Medium, history suggests that Van Eyck made the first oil painting medium, Rubens, Vermeer, and others helped to perfect it. Additionally, students explore imprimatura, underpainting and glazing, mixing and drying properties, opacities and characteristics of colors and media, and the production of effects with different brushes and painting tools. Finally, they perfect techniques and adapt them to vision in forming expressive strategies in oil or acrylics. For all skill levels, but some drawing is recommended. A few beginning and intermediate flourish with the Advanced students. Beginning students should register for CPT 3200 and advanced students may register for CPT 4200 if they have met the prerequisite.

CFA 7310. Art Outside the Gallery. 3 Credits.

This course introduces students to creating site specific and installation art while emphasizing public art, the non-profit art world, pop-up and D.I.Y. galleries. Class time is divided between studio time, research, and field visits. Field visits include studio visits with local artist, opening receptions, art fairs and festivals, as well as visits to public art locations throughout the DC area. This is a studio intensive class focusing on a cumulative project/exhibition that the students facilitate on their own or as a class from proposal thru to exhibition installation. Students gain experience with public art proposals and finding/creating alternative art spaces.

CFA 7311. Installation Art. 3 Credits.

This advanced level fine arts sculpture course focuses on the genera of installation sculpture through the lens of site specificity, architecture, media, and landscape. Through instructor directed research, engagement in artistic practice and theoretical exploration the students attain a better understanding of the theories, practices, artists and historical contexts within the field of installation art. Students are encouraged to explore beyond traditional art exhibition sites in order to understand how/why the content of work cannot be separated from its context.

CORCORAN FIRST-YEAR FOUNDATION (CFN)

CFN 1000. Communication Design. 3 Credits.

This course examines digital design techniques and concepts that are relevant to all majors. Students learn the basics of visual communication, typography, and design by utilizing Adobe Photoshop to create a series of projects that result in the creation of their own basic website. Students learn how to scan, import, and create artwork and how to correct and adjust image tone and color. Students also use Photoshop's many selection and editing tools and are introduced to layers, channels, color palettes, and scripted actions. By going through lessons ranging from image retouching to title banner and button creation and simple time-based animation, students assemble and produce a simple website which showcases a portfolio of their own work. In addition to the projects above, students are introduced to the theories and practices of visual communications and graphic design through a series of lectures and demonstrations. Other Adobe CS software such as InDesign are touched on as well.

CFN 1090. Drawing and Surface. 3 Credits.

An intensive studio covering the principles of drawing and mark-making and their place in contemporary art and design practice. Through the physical activity of drawing, students refine their capacity to observe and visualize. Materials fee. Restricted to BFA majors.

CFN 1091. First-Year Studio 1: Form and Materials. 3 Credits.

Comprehensive studio course providing a broad experience with the tools and materials of traditional and conceptual sculptural practices in art and design; develops students' ability to think, perceive, visualize, design, and build in three dimensions and explore questions of space, place, site, presentation, and context. Required for all first-year BFA majors.

CFN 1092. Time and Light. 3 Credits.

Technical applications of lens and non-lens based dark-room photographic processes; video recording and editing; field and experimental audio recording, and outdoor projection; the roles of time-based media in contemporary art and design practice. Required for first-year BFA majors.

CFN 1093. First-Year Studio 4: Interaction. 3 Credits.

Understanding, conceptualizing, and creating art and design projects that expect interaction from audiences or users; the influence of design on the human experience; politics of space; skills for working collaboratively with other makers. Required in the first year for BFA majors.

CORCORAN GRAPHIC DESIGN (CGD)

CGD 1010. Fundamentals of Graphic Design. 3 Credits.

This course is an introduction to the visual components that serve as fundamental principles in the field of Design. Projects include the study, classification, and application of Gestalt theories of perception; color systems for designers; and pattern design. Course projects focus on visual relationships of form, image, type and grid structures. Students are engaged in a series of projects that address 2D and 3D abstract forms and their professional applications. Students learn design methodology and processes, design language, and the critique process for designers. These design methods and processes help students observe, understand, and articulate their intuitive visual decision-making skills. Professional practices for designers, project workflow, and professional presentation are integrated into course projects. Digital software tools and hand craft tools are learned and applied to course projects. Prerequisites: CDM 1200 and a working knowledge of OSX and Illustrator, InDesign, and Photoshop.

CGD 2000. Design Studio I for CE/AFA. 3 Credits.

This course expands on the lessons learned in Design Concepts by covering design principles such as Visual Hierarchy, Principles of Composition, and Semantics. Typography, form, image, motion, space, and the grid are explored through projects. Students learn an iterative design process to explore concepts and ideas. This course requires a high level of execution through precise craftsmanship. Prerequisites: CFN 1000 Communication Design, CDM 1200 Digital Design I, CDE 1000 Design Concepts, or CGD 1010 Fundamentals of Graphic Design. Formerly "Graphic Design Core II".

CGD 2050. Typography I. 3 Credits.

This course introduces students to one of the most integral components of visual communication- typefaces and their letter forms. Topics covered include typographic vocabulary, terminology, history, technology, classification, measurement, and syntax. Students are introduced to typographic history, nationality, and technology. Students learn visual hierarchy and the grid as organizing principle and system. In some terms this course may be cross-tallied at the undergraduate level as CGD 2050 and at the graduate level as CGD 6350. Students enrolled at the graduate level complete additional assignments to earn graduate credit. Prerequisites: CFN 1000 or CDM 1200; and CDE 1000 or CGD 1010.

CGD 2060. Typography II. 3 Credits.

This is an intermediate studio course in typography. Topics covered include typographic vocabulary, terminology, history, technology, classification, measurement, and syntax. Projects explore audience, structure/syntax, content/meaning, visual hierarchy, and aesthetics in message building for visual communications. Students further their knowledge of typographic history, nationality, technology, and the grid as organizing principle and system. Students must have received a grade of C or above in CDG 2050 to have it count toward the prerequisite requirement. Prerequisites: CGD 2050; and CDE 2090 or CGD 2000.

CGD 3010. Special Topics in Design. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. See department for more details. Prerequisite: CDE 1090.

CGD 3050. Typography III. 3 Credits.

This is a course in advanced typography. Topics covered include typographic vocabulary, terminology, history, technology, classification, measurement, and syntax. Projects cover advanced visual hierarchy, sequence, narrative tools, and the grid as organizing principle and system. Students explore typography as legible and expressive communication within cultural context. Students further their knowledge of typographic history, nationality, and technology. Media utilized include print and motion. Students must have received a grade of C or above in CGD 2060 to have it count toward the prerequisite requirement. Prerequisites: CGD 2060; and CDE 2091; or permission of the department chair.

CGD 3060. Typography IV. 3 Credits.

This is a course in advanced typography. Projects cover advanced visual hierarchy, sequence, kinetic type, narrative tools, and the grid as organizing principle and system. Students explore typography as legible and expressive communication within cultural context. Letterform ideation is investigated. Media utilized includes print and motion. Students must have received a grade of C or above in CGD 3050 or CGD 3090 or CDM 3090 to have it count toward the prerequisite requirement. Prerequisites: CGD 3050 or CGD 3090 or CDM 3090; or permission of the department chair.

CGD 3070. Typography in Motion. 3 Credits.

This course focuses on advanced experimental typography for animation and motion graphics. Projects focus on narrative, storyboarding, style frames, kinetic sequence, transitions, and workflow. Students explore typography as legible and expressive communication within cultural context. Methods and iterative processes for experimental typeface design are explored and developed. Students must have received a grade of C or above in CGD 3050 or CGD 3090 or CDM 3090 to have it count toward the prerequisite requirement. Prerequisites: CGD 3050 or CGD 3090 or CDM 3090; or permission of the department chair.

CGD 3090. Graphic Design Studio III. 3 Credits.

In this advanced level course, students focus on interactive and interaction design. Course projects immerse students in interactive web design, and mobile apps design for smart phones and tablet devices. Students learn, employ, and engage in systems design, user experience, user interface design, user interaction, and responsive design. Students learn to use mobile devices (smart phones/tablet devices) and computers as digital tools to communicate designed messages and visual content. Students learn advanced design process which includes: iterative concept development, wire framing, prototyping, design development, craft, details, production, and coding. Software and coding used in course projects include Adobe Digital Publishing Suite (DPS), HTML, and CSS. Students develop professional oral presentation skills by participating in weekly critiques. Project workflow, professional presentation, and professional practices for designers are integrated into course projects. At the end of the semester, students obtain experience in professional design projects and skill sets, while understanding on-the-job expectations for a fast-paced professional design studio. Students must have received a grade of C or above in CDE 2091 to have it count toward the prerequisite requirement. Restricted to graphic design majors. Prerequisites: CDE 2091 or permission of the department chair.

CGD 3091. Graphic Design Studio IV. 3 Credits.

In this advanced level course, students focus on design as instrument for social change. The semester long course project is Design Ignites Change. The project focuses on a social change or a social awareness issue. Students learn and develop skill sets in research, messaging, strategy, mood boards, branding, identity, production, and implementation. The project components include print design, interactive design, motion design, and social media. Students learn advanced design processes and create a cohesive brand package as they work with numerous project components and phases. The design process includes: iterative concept development, design development, craft, details, and production. Students develop professional oral presentation skills by participating in weekly critiques. Project workflow, professional presentation, and professional practices for designers are integrated into course projects. At the end of the semester, students obtain experience in professional design projects and skill sets, while understanding on-the-job expectations for a fast-paced professional design studio. Students must have received a grade of C or above in CGD 3090 to have it count toward the prerequisite requirement. Restricted to graphic design majors. Prerequisites: CGD 3090; or permission of the department chair.

CGD 3960. Design Lab. 3 Credits.

This course offers a select group of undergraduate junior and senior graphic design students the unique opportunity to design and oversee production of projects for the Corcoran Gallery of Art and College of Art Design. Design Lab serves as an in-house design studio as students gain experience interacting with clients, managing deadlines, understanding and working within the limitations of their projects, and scheduling timelines. Elements of the design process covered in the course include writing design briefs and contracts, conceptual and design development phases, producing print-ready artwork, and fabrication coordination and supervision. Permission of department required for enrollment.

CGD 3961. Design Lab II. 3 Credits.

To be announced.

CGD 4090. Graphic Design Thesis I. 3 Credits.

Graphic Design Senior Thesis is comprised of three components: written paper, interview of a design professional, and a final graphic design thesis project. In this course, students select a topic related to the field of Design, develop a thesis statement and written paper through a research and writing phase. Graphic Design briefs pertaining to the development of the written thesis and paper are explored during the semester. This course is for BFA/Graphic Design only. Prerequisite: A grade of "C" or better in CGD 3091 Graphic Design Studio IV; or Department Chair's approval.

CGD 4091. Graphic Design Thesis II. 3 Credits.

Graphic Design Senior Thesis is comprised of three components: written paper, interview of a design professional, and a final graphic design thesis project. Students finalize the written thesis paper on a design-related topic. Then, students interview a prominent practitioner in the field of Design. As the third component of Graphic Design Senior Thesis, students translate their thesis paper into a graphic design thesis project. Upon completion, the thesis projects are presented in a special museum exhibition. This course is for BFA/Graphic Design only. Prerequisite: A grade of "C" or better in CGD 4090 Graphic Design Thesis I; or Department Chair's approval.

CGD 4120. Environmental Design. 3 Credits.

CORCORAN INTERACTION DESIGN (CIXD)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CIXD 2090. Narrative Media for Interaction. 3 Credits.

Exploration of narrative as a method to conceptualize, communicate, and evaluate interactions across design contexts and media; using key aspects of narrative and event structure as a method for framing and analyzing designed interaction. Materials fee. Restricted to interaction design majors. Prerequisite: CFN 1093.

CIXD 2091. Systems Thinking for Interaction Design. 3 Credits.

The importance of technological, organizational, and social systems in the practice of interaction design. Materials fee. Restricted to interaction design majors. Prerequisites: CIXD 2090 and CIXD 2111 or permission of the instructor.

CIXD 2111. Creative Code. 3 Credits.

Procedures and methods of code-based strategies for realizing creative ideas; fundamental skills in creative coding languages and environments. Materials fee.

CIXD 3090. Human Centered Design for Social Engagement. 3 Credits.

Studio-based introduction to participatory design processes and their application for interaction design and social innovation. Materials fee. Prerequisite: CIXD 2091.

CIXD 3091. Prototyping and Fabrication for Interaction. 3 Credits.

Investigation of prototyping as a method for testing and communicating initial design assumptions and creating platforms for participatory response; refinement of associated fabrication skills. Materials fee. Prerequisites: CIXD 2091 and CIXD 2111.

CIXD 3110. Topics in Interaction Design Studio. 3 Credits.

Issues in contemporary design practice. Topics vary by semester. May be repeated for credit provided topic differs. See department for more details.

CIXD 3112. Data Visualization and Sonification. 3 Credits.

Tools and processes for visualizing and sonifying data sets using current web-based tools; critical analysis of data visualization examples; interactive possibilities of creating user experiences around data. Materials fee. Prerequisites: CIXD 2111 or permission of the instructor.

CIXD 3120. Interaction Design Internship. 0-3 Credits.

For interaction design majors pursuing an internship directly relevant to program themes and goals. Permission of the major advisor required prior to enrollment. Graded on a Credit/No Credit basis. Restricted to interaction design majors.

CIXD 3820. Engagement Lab. 3-6 Credits.

Design lab with a focus on social, environmental, and community impact. Project teams collaborate with a community partner to identify and respond to local challenges that might be addressed through interaction design processes and skills. Materials fee.

CIXD 3910. Collaborative Design Project. 3 Credits.

Practical experience in the conceptualization, production, and delivery of a multidisciplinary design project. Materials fee.

CIXD 4020. Topics in Design Research. 3 Credits.

Key theoretical and methodological concepts in the field of interaction design connect research in design innovation with qualitative and quantitative research methods, providing insights into user behaviors, attitudes, and expectations. Prerequisites: CGD 2091 or CIXD 2091.

CIXD 4090. Interaction Design Thesis I. 3 Credits.

The development of a senior thesis project and accompanying research. Student work evolves in a studio atmosphere that stresses user-oriented research, analysis, and prototyping of digital and physical interactive experiences, services, or products with a focus on social and environmental impacts. Materials fee. Restricted to Interaction Design majors. Prerequisites: CIXD 3090 and CIXD 3091.

CIXD 4091. Interaction Design Thesis II. 3 Credits.

Completion of a senior thesis project and accompanying research. Student work evolves in a studio atmosphere that stresses user-oriented research, analysis, and prototyping of digital and physical interactive experiences, services, or products with a focus on social and environmental impacts. Materials fee. Restricted to undergraduate interaction design majors. Prerequisite: CIXD 4090.

CIXD 4193. Topics in Design Leadership. 3 Credits.

Experiential study of professional practices of interaction designers and the leadership skills that promote innovative, equitable, and sustainable design solutions. Topics vary by semester. See program for more details. Restricted to undergraduate interaction design majors. Prerequisite: CIXD 3091.

CIXD 6001. 6001 Design Intensive. 1-3 Credits.

Intensive introduction to design processes for students transitioning careers or entering a design graduate program from a non-design background; design thinking, design tools and technologies, digital imaging, sketching, model making and prototyping. No prior experience is necessary.

CIXD 6010. Interaction Design for Service. 3 Credits.

Tools and approaches for developing interactive services and experiences. Students work to define and frame problems, generate innovative proposals, and think comprehensively about the social, ethical, and organizational models surrounding the solutions they design. Restricted to graduate students in the interaction design program or with the permission of the instructor.

CIXD 6011. Narrative Media Design for Interaction. 3 Credits.

Exploration of narrative as a method to conceptualize, communicate, and evaluate interactions across design contexts and media; key aspects of narrative and event structure as a method for framing and analyzing designed interaction. Restricted to graduate students in the interaction design program or with the permission of the instructor.

CIXD 6012. Prototyping Interaction. 3 Credits.

Investigation of prototyping as a method for testing and communicating initial design assumptions, establishing feedback processes, creating platforms for participatory response, improving design ideas, and assessing the life-cycle implications of design solutions. Restricted to graduate students in the interaction design program or with the permission of the instructor.

CIXD 6020. Topics in Human Centered Design. 3 Credits.

Critical analysis of human-centered design methods in public policy and civic contexts using a case study approach. Topics vary by semester. See department for details. Prerequisites: CIXD 6010, PPPA 6006 and PPPA 6011.

CIXD 6021. Topics in Design Leadership. 3 Credits.

Practice-based investigation of leadership skills that promote innovative, equitable, and sustainable design solutions. Topics vary by semester. See department for more details. Permission of the instructor may be substituted for the prerequisites. Prerequisites: CIXD 6010 and CIXD 6011.

CIXD 6080. Engagement Lab. 3-6 Credits.

Design lab with a focus on social, environmental, and community impact. Project teams collaborate with a community partner to identify and respond to local challenges through interaction design. Restricted to graduate students in the interaction design program or with the permission of the instructor.

CIXD 6090. Topics in Design Research. 3 Credits.

Key theoretical and methodological concepts in the field of interaction design; connecting research in design innovation with research methods that offer insight into users' behaviors, attitudes, and expectations. Topics vary by semester. See department for more details. Restricted to graduate students in the interaction design program or with the permission of the instructor.

CIXD 6110. Studio Topics in Interaction Design. 3 Credits.

Issues in contemporary design practice. Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details.

CIXD 6111. Creative Code. 3 Credits.

Procedures and methods of code based strategies for realizing creative ideas; fundamental skills in creative coding languages and environments. Restricted to graduate students in the interaction design program or with the permission of the instructor.

CIXD 6112. Data Visualization and Sonification. 3 Credits.

Tools and processes for visualizing and sonifying data sets using current web-based tools; critical analysis of data visualization examples and interactive possibilities of creating user experiences around data. Students are expected to have foundational knowledge of digital design processes prior to enrollment. Restricted to graduate students in the interaction design program or with the permission of the instructor. Recommended background: Prior experience with digital imaging and web-based tools.

CORCORAN INTERIOR DESIGN (CID)

CID 0850. Color in Interiors. 0 Credits.

Preparing a cohesive color palette in the home is a challenging task, particularly when rooms are renovated over a period of time. This seminar provides the student with the opportunity to learn the fundamentals of color application, as well as the skills necessary to refine their design strategy as their design needs change.

CID 0860. In My Home. 0 Credits.

For the aspiring non-professional, this course focuses on the basic elements of interior design. A simplified approach to the principles of design in a residential interior allows continuing education students the opportunity to explore interior design within the context of their own homes. This course is offered for non-credit only, and is recommended for those whose interest in interior design is limited to the decoration of their own homes.

CID 1000. Introduction to Interior Design. 3 Credits.

This introductory course provides students with an overview of the elements that comprise the practice of interior design. Studio assignments promote theoretical and analytical problem-solving skills. Students learn the rudiments of the use of materials and finishes, interior construction, drafting and rendering, space planning, and color theory. This course is recommended for students considering interior design as a profession. This course may be cross-tallied as CID 5000 at the graduate level for MA in interior design program prerequisites. Additional work is required for graduate level credit.

CID 1200. Stand on the Right, Walk on the Left: Human Response to the Urban Environment. 3 Credits.

This course explores the dynamics of people and space, how they interact with each other, and how this informs the way we design. Students are immersed in a collaborative, interactive studio experience which involve: instructor-led or self-guided expeditions in and around the city during class time; observation, data-collection, and thoughtful documentation of findings; conceptual sketching; and model making. An increased curiosity and awareness of our surroundings and the way we interact with our environment leads to an introductory exploration of human factors including; scale, anthropometrics, ergonomics, universal design, and cultural contexts. Students also engage in the study of texts and films which explore the basic frameworks of design at its core, and are asked to react to the readings/viewings. Students use photography and social media tools such as Pinterest and Instagram to explore and document observations in their own environment using the rich, dynamic setting of Washington DC. The final product of this studio is a photo-documentary, inspired by Jane Fulton Suri's "Thoughtless Acts," which probes ideas and asks questions similar to those we explore in the course.

CID 1210. Elements & Principles of Interior Design. 3 Credits.

This introductory interior design studio focuses on the fundamental elements and principles of interior design. The studio explores the elements and principles of design as tools to create, manipulate, and affect interior environments. Specifically, the course explores point, line, plane, form, shape, color, texture, light, proportion, scale, balance, harmony, unity and variety, rhythm and emphasis in relation to 3D space. Students translate the elements and principles to 2D visual presentation strategies through the creation of physical and digital design boards. The elements and principles of design are explored in relation to architectural drawing as communication, 2D visual presentation, and 3D spatial experience.

CID 1250. Drawing for Interior Design. 1.5 Credit.

Architecture and Interior Design professionals use drawings to communicate ideas and designs to their clients. This course introduces students to the skills of hand drawing and sketching of architectural interiors. The basics of orthogonal projections such as plan, section, elevation, and simple perspectives are taught in this course.

CID 2000. Introduction to Perspective and Interior Rendering. 3 Credits.

This course provides an introduction to linear, two-, and three-point perspectives, and rendering of interior space (and elements within that space) in various media. Students learn to observe, analyze, interpret, and reproduce what they see. Special attention is paid to the expressive use of color, the interrelationships of forms, and the placement of the human figure in an interior space. It is recommended that students take this course in a different semester than CID 2100.

CID 2050. Representation/Documentation. 3 Credits.

Through a series of projects including drawing and model making, students gain valuable skills in documenting visual culture, developing tools for representing design concepts. This studio course provides an in-depth study of the conventions of plan, section and elevation as they relate to visual experience. Problems expand the students' ability to translate between two-dimensional exercises and three-dimensional visual experience. This course is only offered during the Fall semester. This course may be cross-tallied as CID 5150 at the graduate level for MA in interior design program prerequisites.

CID 2090. Interior Design Studio I. 3 Credits.

In this course, students utilize the elements and principals of design and human factor considerations to explore the design of a compact space. Students learn an iterative design process to explore and develop concepts. The course provides continued emphasis on presentation, hand drafting, and translation of concepts to 3D spatial experiences. This course requires a high level of execution through precise craftsmanship.

CID 2091. Interior Design Studio II. 3 Credits.

In this course, students explore branding in relation to spatial environments. This approach to interior design focuses on the manipulation of space, the selection of furniture, finishes, and materials, and graphics development to create a unique experience and identity. The developed brand identity is applied to the interior design, as well as presentation materials in a comprehensive and cohesive manner. This studio provides an introduction to commercial space planning, building codes, and ADA guidelines. Students must have received a grade of C or above in CID 2090 to have it count toward the prerequisite requirement. Prerequisites: CID 2090; or permission of the department chair.

CID 2100. Color Theory for Interiors. 3 Credits.**CID 3050. Interior Design Digital Applications I. 3 Credits.**

This course focuses on the foundations of AutoCAD and basic drafting skills. Students learn the basics of computer-assisted drafting techniques, including basic drawing, dimensioning, layering, and various commands for drawing and document output. Prerequisite: CID 1000.

CID 3060. Revit I. 3 Credits.

Upon the completion of this course, students are proficient in building information modeling (BIM). BIM creates coordinated, consistent, computable information that is used for design decision making, high-quality visual presentation production, construction documents, performance prediction, cost estimating, construction planning, and, eventually, for managing and operating a facility. Mirroring the real world of buildings and interiors, Revit Architecture helps students accurately capture their design concepts. The software bridges students' visions from concept to reality through innovative design, accurate documentation, and efficient construction. Integrated bidirectional associativity helps ensure that any change to students' project information is reflected throughout the students' models, while parametric components offer an open, graphical system for conceptualizing and expressing detailed design intent. Course concepts facilitate more precise conceptual design, which enhance client understanding while supporting more efficient and sustainable production, construction, and fabrication. At times this course may be cross-tallied at the graduate level as CID 6060. Additional work is required to earn graduate credit. Prerequisite: CID 1000.

CID 3090. Interior Design Studio III. 3 Credits.

This studio class pursues the aesthetic and technical principles of more complex and larger-scale residential and contract projects. Conceptual thinking, creative problem solving, and attaining project goals are stressed. Students work at a more advanced level in articulating and presenting design solutions. Drawing, model-making, and other presentation skills are stressed. Prerequisite: CID 2091 Interior Design Sophomore Studio II.

CID 3091. Interior Design Studio IV. 3 Credits.

This course focuses on the design issues implicit in commercial spaces, including office, hospitality, retail, medical and institutional. Students become acquainted with the organizational, social, physical, psychological, and cultural factors integral to the design of such spaces. Students focus on one of the building project types and prepare a comprehensive design solution for a professional critique. Prerequisite: CID 3090.

CID 3100. Interior Lighting Design. 3 Credits.

This course provides an introduction to the effects of light on interior space, as well as to various lighting products and lighting systems. Students learn about the lighting challenges for interior spaces and how to effectively meet them. The course teaches the basics of lighting layout, lighting terminology, and the lighting designer's role in the interior design process. Within the studio structure, students are expected to produce a complete lighting package, including a fixture schedule and reflected ceiling plan. At times this course may be cross-tallied at the graduate level as CID 6100. Additional work required for graduate level credit is outlined in the course syllabus. The textbook, *Interior Lighting for Designers* by Gary Gordon and Jim Nuckolls (either third or fourth edition), is necessary for the first class. Prerequisites: CID 1000 or CID 1000; or permission of the department chair.

CID 3110. Materials, Methods, and Finishes. 3 Credits.

This course surveys the major materials available to designers and architects, including their structure, properties, potential expressive qualities, and their use. Students learn how to integrate materials into the design and construction of interior spaces. The course familiarizes students with the selection of appropriate materials for various uses based on function, aesthetics, safety, comfort, and maintenance. During the course of this class, students gain an understanding of construction documents including both drawings and specifications. At times this course may be cross-tallied at the graduate level as CID 6110. Additional work required for graduate level credit is outlined in the course syllabus. This course is only offered during the Fall semester. Prerequisite: CID 1000. Recommended background: CID 3050 or CID 6060.

CID 3900. Interior Design Internship. 3 Credits.

Internships can help students develop marketable skills, establish professional contacts, and explore different career options. A good internship should offer the student career-related experience in a setting where the student may learn about professional practice in their field. While some administrative tasks are necessary, these should be minimal with most of the work focusing on skill building or educational opportunities. Continuing Education students are not eligible to receive credit for internships. Students are responsible for locating and securing individual internships, with the assistance and approval of their department chair. To receive credit for an internship, the student needs to complete an internship contract and the appropriate registration form. The internship contract is the agreement between the internship provider, the Corcoran, and the student; all three must be signed. To be eligible to earn academic credit for an internship, students must have completed their Foundation Year or have earned equivalent credits (30). While students are free to do multiple internships while enrolled at the Corcoran, students cannot take more than one internship per semester. A 45-60 hour internship is equivalent to 1.5 credits and a 90-120 hour internship is equivalent to 3 credits. The student must receive signed approval from his or her department chair before they are allowed to register for internship credit. The department chair's signature must appear on both the contract and the registration form or the internship registration is not processed. The contract must be turned into the Office of Student Affairs before the internship start date. The registration or add/drop form must be submitted to the Office of the Registrar before the add/drop deadline of the semester the student is seeking credit. Late contracts are not accepted and credit are not given. In order to receive a grade for the internship the student is required to submit a mid-semester evaluation and final evaluation of the internship experience. The internship provider is required to submit a final evaluation of the student's performance with a recommendation for a grade (pass/fail) no later than 10 working days prior to the end of the semester. The student's department chair is responsible for reviewing the student and employer evaluations and submitting the final grade to the Office of the Registrar.

CID 4060. Advanced Revit. 3 Credits.

This class expands upon the fundamental skills learned in Revit I, allowing students to produce independent projects that reflect the full scope of tools and techniques available to Revit users. At times this course may be cross-tallied at the graduate level as CID 7060. Additional work is required to earn graduate credit. Prerequisite: CID 3060 Revit I.

CID 4090. Interior Design Thesis I. 3 Credits.

Interior Design Senior Thesis is comprised of three components: a written paper, interview of a design professional, and a final interior design thesis project. In this course, students select a topic related to the field of Interior Design, develop a thesis statement and written paper through a research and writing phase. Interior Design project concepts pertaining to the development of the written thesis and paper are explored during the semester. This course is for BFA/Interior Design only. Prerequisite: A grade of "C" or better in CID 3091 Interior Design Studio IV; or Department Chair's approval.

CID 4091. Interior Design Thesis II. 3 Credits.

Interior Design Senior Thesis is comprised of three components: a written paper, interview of a design professional, and a final interior design thesis project. Students finalize the written thesis paper on a design-related topic. Then, students interview a prominent practitioner in the field of Interior Design. As the third component of Interior Design Senior Thesis, students translate their thesis paper into a interior design thesis project. Upon completion, the thesis projects are presented in a special museum exhibition. This course is for BFA/Interior Design only. Prerequisite: A grade of "C" or better in CID 4090 Interior Design Senior Thesis I; or Department Chair's approval. Prerequisite: CID 4090 Interior Design Thesis I.

CID 4600. Selected Topics in Interior Design. 3 Credits.

Through a changing selection of design studios with instructors drawn from the professional design community, this studio offers a broad range of topics from which students may choose during their course of study. The shifting nature of the subject matter of this studio intentionally allows for topical issues in the design community to be addressed. Topic varies each time it is offered.

CID 5000. Introduction to Interior Design. 3 Credits.

This introductory course provides students with an overview of the elements that comprise the practice of interior design. Studio assignments promote theoretical and analytical problem-solving skills. Students learn the rudiments of the use of materials and finishes, interior construction, drafting and rendering, space planning, and color theory. This course is recommended for students considering interior design as a profession. This course may be cross-tallied as CID 1000 at the undergraduate level.

CID 5100. Color Theory for Interiors. 3 Credits.

The use of color and interaction of color and light are essential elements of interior design. Through in-depth study of color sequences and primary, secondary and tertiary relationships, students explore the effects of color on design concept and application. Using various media including painting, textiles and finishes, students explore issues of color interaction. Throughout this studio class, students work toward developing their own unique aesthetic as artists and designers. It is recommended that students take this course in a different semester than CID 2000.

CID 5110. Perspective and Interior Rendering. 3 Credits.

This course provides an introduction to linear, two-, and three-point perspectives, and rendering of interior space (and elements within that space) in various media. Students learn to observe, analyze, interpret, and reproduce what they see. Special attention is paid to the expressive use of color, the interrelationships of forms, and the placement of the human figure in an interior space. It is recommended that students take this course in a different semester than CID 2100.

CID 5150. Representation/Documentation. 3 Credits.

Through a series of projects including drawing and model making, students gain valuable skills in documenting visual culture, developing tools for representing design concepts. This studio course provides an in-depth study of the conventions of plan, section and elevation as they relate to visual experience. Problems expand the students' ability to translate between two-dimensional exercises and three-dimensional visual experience. This course is only offered during the Fall semester. This course may be cross-tallied at the undergraduate level as CID 2050.

CID 5200. Introduction to Digital Presentation and Techniques. 3 Credits.

This class explores the possibilities for creating, manipulating images, and transforming ideas using computer software. Students learn basic tools and techniques along with the overall concepts of scanning and digitizing images, rendering elevations and perspectives and creating presentation boards and templates for the Interior Design and Exhibition Design profession. The course introduces a variety of software from the Adobe Creative Suite. Students experience enough knowledge to aid them in their future classes. Additional lab time is encouraged for class assignments and individual projects. Recommended background: CID 5000.

CID 6000. Interior Design Summer Studio. 3 Credits.

This course exposes the student to the studio environment for learning and exploring various topics related to design of the built environment. Through an intensive two-week series of assignments, the student is exposed to fundamental topics and skills requisite of the interior design discipline. The program models the ideals of studio culture, including regular presentation, critique, and peer-review of ongoing and final work. The course introduces students to a design-thinking methodology with experiences in both analog and digital media in the representation of interior design ideas.

CID 6010. Interior Design Studio I. 3 Credits.

CID 6010 introduces the fundamental conventions and principles of interior design, visual and verbal communication, formal analysis, and design process. Students develop an awareness of spatial composition, perceptual sequence, basic program, and simple building systems related to the built environment.

CID 6020. Interior Design Studio II. 3 Credits.

Building on the foundation of CID 6010, this course furthers student understanding of the fundamental conventions and principles of interior design. Emphasis is placed on issues of specific program, site, or typology with a focus on understanding design standards and regulations. Through the completion of a series of projects, students develop a deeper understanding of more complex spatial and anthropometric considerations. Additionally, students are introduced to material and color systems.

CID 6050. Interior Design Digital Applications I. 3 Credits.

This course introduces digital applications as they relate to an interior design process. Students are introduced to the drawing methods of drafting and annotation in the examination of digital visualization as it relates to analysis and synthesis. Assignments concentrate on fundamental concepts of digital representation, including the creation of measured drawings, layer management, and various output formats. Formerly titled: AutoCAD II.

CID 6060. Interior Design Digital Applications II. 3 Credits.

Information modeling for an interior design process. Three-dimensional visualization, digital rendering, and the development of construction documents. Concept models, accurate documentation, and efficient construction. Prerequisites: CID 6050.

CID 6100. Interior Lighting Design. 3 Credits.

This course provides an introduction to the effects of light on interior space, as well as to various lighting products and lighting systems. Students learn about the lighting challenges for interior spaces and how to effectively meet them. The course teaches the basics of lighting layout, lighting terminology, and the lighting designer's role in the interior design process. Within the studio structure, students are expected to produce a complete lighting package, including a fixture schedule and reflected ceiling plan. The textbook is necessary for the first class. "Interior Lighting for Designers" by Gary Gordon and Jim Nuckolls. Either the 3rd or 4th Edition are fine. At times this course may be cross-tallied at the undergraduate level as CID 3100. Students wishing to pursue undergraduate credit should register for the undergraduate section. This course is only offered during the Fall semester. Prerequisites: CID 1000, or permission of the department chair.

CID 6110. Materials, Methods, and Finishes. 3 Credits.

This course surveys the major materials available to designers and architects, including their structure, properties, potential expressive qualities, and their use. Students learn how to integrate materials into the design and construction of interior spaces. The course familiarizes students with the selection of appropriate materials for various uses based on function, aesthetics, safety, comfort, and maintenance. During the course of this class, students gain an understanding of construction documents including both drawings and specifications. At times this course may be cross-tallied at the graduate level as CID 6110. Additional work required for graduate level credit is outlined in the course syllabus. This course is only offered during the Fall semester Prerequisite: CID 1000. Recommended background: CID 3050 or CID 6060.

CID 6250. Portfolio and Resume Design. 3 Credits.

This course introduces students to Portfolio and Resume Design. It focuses on developing a "brand" for each student, which is represented on their resume, portfolio, business cards, and other material that may be used during a job search. The purpose of this "brand" is to set the students apart from other aspiring designers entering the job market to aid them in obtaining a job. Students incorporate work from previous studios and classes that they have completed to include in the portfolio. The final deliverables are a professional resume, cover letter and portfolio. Prerequisites: CID 6050 or CID 6060; and a minimum of 2 Interior Design Studios.

CID 6800. Directed Studies: Interior Design. 3 Credits.

This option is appropriate for degree students who want access to independent faculty supervision, lab areas, and supplies for independent projects, and do not need or desire extensive course instruction. This option is justified only if 1) the project content cannot be covered in an existing course, 2) the student's department deems it of substantive value to the student's educational goals and interests, and 3) the project work is done outside of regularly scheduled class time. All directed studies are for credit (one to three credits). Students cannot take more than three credits of directed studies per semester. Students enrolled in directed studies have access to the facilities and equipment at times arranged by the instructor. The directed studies instructor is responsible for working with the student to establish project goals, oversee progress, and determine final course grades. Bachelor's Foundation students and Continuing Education students are not eligible for directed studies. Under certain circumstances, directed studies may be pursued by graduate students by combining participation in an advanced undergraduate course with extra independent assignments at the graduate level, as arranged in advance with the directed studies instructor. Prerequisites: Submission of a Directed Studies Contract; and written permission of the instructor, department chair or program director and CID department.

CID 6900. Internship: Interior Design. 3 Credits.

For degree students only. Internships can help students develop marketable skills, establish professional contacts, and explore different career options.

CID 7010. Interior Design Studio III. 3 Credits.

CID 7010 concentrates on the application of building systems and spatial identity as they relate to the interior environment. Students explore specific design contexts and examine the relationships between site, program, and method. A comprehensive project accounts for lighting, material specification, FFE, building systems, and sustainable building methods. Refined methods of representation, documentation, and communication are explored including the conventions of construction documents.

CID 7020. Interior Design Studio IV. 3 Credits.

In CID 7020, students coordinate their design process with input from multiple disciplines. Students conduct specialized research and develop personal philosophies to execute a comprehensive design project. Integration of lighting, FFE, building systems, and sustainable building methods are essential components of the final project. Students are required to establish a refined method of communicating their design intent through an advanced concentration on representational techniques.

CID 7060. Interior Design Digital Applications III. 3 Credits.

The use of digital design technology to convey advanced design concepts. Methods of representation explored using digital modeling, rendering, and fabrication. The relationship between virtual and physical models.

CID 7100. Construction and Detailing. 3 Credits.

Detailing skills are central to the success of any interior design process. This course allows students to understand the methodology and practice of designing and drawing interior construction details in a built environment. Intensive study of the integration of materials leaves students with confidence in their ability to contribute to the preparation of technical drawings, and to provide drawing references for fabrication of design concepts. This course is only offered during the Spring semester. Prerequisites: CID 3050 or permission of the department chair.

CID 7200. Advanced Lighting Applications. 3 Credits.

In this hands-on advanced lighting studio students gain practical experience with lighting drawings, fixture/lamp specifications and fixture installations. The course is project oriented with students working in teams on a range of projects such as lighting design concept development working from images to three dimensional spaces, and developing RCP light plans and specifications. The teams then create working fixtures using found or everyday objects, create flashlight spaces, and participate in a Festival of Lights under the directions of the instructor. Prerequisites: CID 6100 or permission of the department chair.

CID 7310. Advanced Digital Graphics. 3 Credits.

This course is intended to expand upon students' understanding of the fundamentals of computer-aided design through exploration of digital media. These explorations include systems of analysis, meaning of media, expression, syntactical, and spatial language. Students focus on both two-dimensional graphic techniques/concepts and 3D modeling and image making techniques/concepts. Prerequisites: CDM 1200 or equivalent experience; and CID 3050 or CID 6060 or CID 6060.

CID 7600. Selected Topics in Interior Design. 3 Credits.

Through a changing selection of design studios with instructors drawn from the professional design community, this studio offers a broad range of topics from which students may choose during their course of study. The shifting nature of the subject matter of this studio intentionally allows for topical issues in the design community to be addressed. Topic varies each time it is offered. Restricted to students in the MA in interior design program.

CID 7800. Interior Design Pro-Thesis Seminar. 3 Credits.

Through a combination of research, writing and pre-design studies, students formulate a thesis proposal for the final semester of study in the MA in interior design program. During this preparatory semester, students document their research and experiences under the supervision of the instructor. This course is only offered during the Fall semester. Restricted to students in the MA in interior design program. Prerequisites: CID 7010 or permission of the department chair.

CID 7900. Interior Design Thesis. 3 Credits.

The student is expected to work at a professional level in completing a comprehensive design project. Each student undertakes a rigorous exploration of a project of their own design and development, under the supervision of a thesis advisor. The process culminates in a public review of the project with jurors drawn from the faculty as well as the professional design community. This course is only offered during the Spring semester.

CORCORAN PHOTOGRAPHY (CPH)

CPH 1090. Photography Fundamentals I: Light Studies and Optical Culture. 3 Credits.

Light and optics are the fundamental elements of photographic media and of contemporary media culture. This Foundation year course introduces students to the formal characteristics of light and lenses by surveying a variety of image-making practices, from primitive photographic devices to digital photography and video. Through a combination of classroom talks and hands-on projects, students encounter principles of black-and-white and color photography, as well as learning camera controls that open up a wide range of expressive possibilities. Historical antecedents, contemporary practices, and strategies of critical interpretation are discussed in relation to specific assignments throughout the semester.

CPH 1091. Photo Fund II: Techniques/Practice. 3 Credits.

This film-based course for prospective photography majors and others interested in furthering their photography abilities extends students' existing camera and darkroom skills through a thorough assessment of individual image-making abilities. Students will learn advanced methods for making black-and-white negatives and prints, including controls for exposing and developing, as well as encountering new film formats and types. Practical instruction is accompanied by assignments that explore different genres and allow students to develop their own personal approaches.

CPH 2090. Photography/Photojournalism Studio I. 3 Credits.

Students explore personal sources of image making, strategies for editing, and different ways of seeing while refining their technical abilities. Assignments provide a structure for individual expression and interpretation while developing an awareness of photographic traditions, including photojournalism and documentary modes, and of the current state of contemporary practices. Students develop confidence and rigor in their approaches within an atmosphere of exploration and risk-taking. Fine-art photography and photojournalism students meet together and participate in frequent group and individual critiques, which promote intensive dialogue and proficiency in critical thinking.

CPH 2091. Photography Studio II. 3 Credits.

Students explore personal sources of image making, strategies for editing, and different ways of seeing while continuing to refine their technical abilities. This course continues the progression from Photography Studio I, but concentrates on discovering the sources of the student's impulse to make art and on developing a process for finding ways to express these sources using the photographic medium. For Fine Art Photography majors only. Pre-requisite: CPH 2090 Photography Studio I.

CPH 2100. Media Lab I. 3 Credits.

Required of Fine Art Photography and Photojournalism majors and elective for other BFA and BA students. This course extends the traditional use and control of photographic materials into the digital realm, exploring the scanning of negatives, the use of the digital darkroom for editing and tonal control, and the comparison of different output devices and materials available to the photographer. Discussions also include the integration of digital tools with traditional approaches to photography as well as non-traditional approaches, such as multimedia and animation. Issues dealing with presentation and the choice of archival inks and papers are covered. The goal is to familiarize students with the digital tools and materials, so as to allow freedom of personal expression and an awareness of the integration of technique, medium, and content. Formerly titled "Digital Photography for PH/PJ". Prerequisite: CPH 1000 Technique and Practice, or permission of instructor.

CPH 2110. Color Photography. 3 Credits.

This class introduces the student to the materials, techniques, and aesthetics of making color photographs using traditional chemical materials. Initially, the class explores the use of a variety of transparency materials; however, the emphasis of the class is on making prints from color negatives. The prints are produced using enlargers with color filtration and an automatic roller-transport color processor. The aesthetics of color photography are examined through group critiques and discussions of work by contemporary color photographers. Prerequisites: CPH 1000 or CPH 1200; or permission of the instructor.

CPH 2301. Digital Photography for Fine Art. 3 Credits.

This course is specifically designed for Fine Art and other non photographic majors who want to learn the fundamentals of digital photography. The class covers all aspects of digital photography from proper use of cameras, how to properly scan both film and flatwork and how to use Adobe Photoshop CS 6 and Adobe Bridge CS 6 to edit and organize their work. There is an emphasis on making fine prints using state of the art ink jet printers up to 44 inches wide. Students are encouraged to explore how their photography fits into the content of their other work as well as how photographs can stand on their own. Current issues in photography are explored through classroom discussions and critiques.

CPH 2350. The Extended Image. 3 Credits.

This course is for anyone interested in non-traditional photography, as well as for artists working in other media who wish to expand their use of photographic imagery. Students learn to break away from the "classic" print by exploring the likes of soft focus, camera movement, pinhole and toy cameras, hand-applied color, paint-on developer, print toning, flashlight drawing, photograms, magazine lift, Polaroid transfer, photo collage, and blueprints, among other techniques. Emphasis (where possible) is on simple, inexpensive, and nontoxic techniques and materials. Portfolio review may be required. Prerequisites: CPH 1000 and CPH 1200; or permission of the instructor.

CPH 3050. Media Lab II. 3 Credits.

This course introduces students already familiar with still photography to time-based media, including video and audio. Over the course of the semester students script, shoot/record, edit, and present projects including a silent video, a sound piece or audio package, and a video with audio. The history of time-based media is examined and its influence traced through pop culture, art history, and conceptual and technical analyses. Basic techniques in Final Cut Pro and audio software are covered. This course fulfills a PH and PJ major requirement, is open to all BFA majors and other degree students with permission of the instructor, and is a prerequisite for more advanced video classes. Formerly "Digital Video for PH/PJ" and "Media Lab". Prerequisites: CPH 1000 or CPH 1200.

CPH 3070. Studio and Location Lighting. 3 Credits.

Introduction to studio and location lighting. Strobe and continuous lighting equipment; light modifiers and grip equipment; mixed sources light; and aesthetic approaches using artificial and ambient light. Restricted to students in the BFA in fine arts photography, BFA in photojournalism, or MA in new media photojournalism programs; demonstrated abilities and preparedness through portfolio review by department head or instructor may be substituted.

CPH 3090. Photography Studio III. 3 Credits.

The fine art photography major's third year is spent exploring the connections between ideas and photo-based techniques; between process and content. These explorations are the basis for discussions, assignments, field trips, and critiques. Students also study theory and criticism, with related assignments designed to promote a better understanding of the critical process. Students are encouraged to develop their own voices and to take responsibility for their own ideas through various strategies for the sequencing, construction, presentation, and existence of their work in different contexts (gallery wall, books, installation, video projections, internet, etc) and through self-assigned projects, which often become the nucleus of the students' senior-year thesis work. Prerequisite: CPH 2091 Photo Studio II.

CPH 3091. Photography Studio IV. 3 Credits.

This course continues the objectives of PH3090 Photography Studio III, with an emphasis on synthesizing the research and experimentation of that course to develop a student's ability to work in a self-directed fashion. Prerequisite: PH3090 Photo Studio III.

CPH 3120. Photography/Photojournalism Seminar I. 3 Credits.

This departmental seminar reflects on and reinforces issues of topical concern to photographers and photojournalists, as an adjunct to students' studio coursework. Topics vary from year to year and when possible are based on museum exhibitions, publications, and contemporary culture and events.

CPH 3200. Advanced Black and White Printing. 3 Credits.

This intensive darkroom course allows students to pursue work of their own choosing while learning advanced controls for black-and-white printing. The emphasis is on gaining the skills to make your prints look exactly as you want them to. Topics to be covered include local and overall contrast controls, toning for impact and for archival quality, masking and differential exposure, multiple printing, choices of paper tonality and surface, and the differences between condenser and cold-light printing. Students work with their own negatives, which should be developed outside of class time. Prerequisites: CPH 1000 or CPH 2200 or permission of the instructor.

CPH 3260. Advanced Digital Photography. 3 Credits.

This course is for students who know the basics of digital imaging, printing, and workflow and want to increase their skills and competencies in these areas in a workshop environment. Students learn more refined and subtle approaches to editing and printing their photographs, develop a personal workflow process that is efficient and confidence-building, and benefit from individual and group critiques of their personal projects. The emphasis is on exploring the creative possibilities of the digital darkroom, on integrating advanced digital techniques and approaches so that they serve the content of the image and the intentions of the image-maker, and on making high quality prints from both digital originals and scanned film. The class is taught in an up-to-date digital lab using Adobe's latest Creative Suite version of PhotoShop and a choice of printers and film and flatbed scanners. Among the subjects covered are varieties of ink-jet printers and papers, color profiles and color management, test printing and proofing, advanced scanning and re-sampling, and creating master files. Students also learn contemporary ideas about digital asset management (DAM). Prerequisites: CPH 2100 or permission of the instructor.

CPH 3450. Pre-Digital Alternative Process. 3 Credits.

This workshop-style course allows students to investigate new and personal directions using alternative photographic processes such as albumen, salted paper, gum bichromate, platinum/ palladium, and mordantage, leading to a fully realized portfolio, book, or other personal project. The course explores the creation of large-format digital negatives. Field trips include a visit to a Daguerreotype studio in New York City. Invention, experimentation, and risk are strongly encouraged in this intermediate to advanced level class. Students are required to provide their own chemistry and supplies for their final project. Prerequisites: CPH 2250 or permission of the instructor.

CPH 3640. Advanced Studio Lighting: Commission Project. 3 Credits.

Students work collaboratively with two professional photographers to produce 5-10 photographic portraits and 5-10 short videos of Foreign Service employees for an exhibition at the U.S. Department of State's new U.S. Diplomacy Center. Through an immersive, hands-on approach, students learn the different aspects of commissions and exhibitions, including research, project management, collaboration and production. Students also learn about historical and contemporary aesthetic approaches to photographic portraiture and master technical issues such as lighting and interviewing skills. This course is aimed toward photography and photojournalism students who want to learn to work collaboratively in a real-life commission situation. Prerequisites: CPH 3070 and CPH 3050 or equivalent.

CPH 3800. Independent Study: Photography. 3 Credits.

This option is appropriate for degree students who want access to independent faculty supervision, lab areas, and supplies for independent projects, and do not need or desire extensive course instruction.

CPH 3900. Internship: Photography. 1 Credit.

For degree students only. Internships can help students develop marketable skills, establish professional contacts, and explore different career options.

CPH 4090. Photography Thesis I. 3 Credits.

As a complement to Senior Seminar, Senior Thesis Studio emphasizes process and practice in the development of a senior thesis project. The work evolves from a studio and seminar atmosphere that stresses individual and group critiques, as well as readings and discussions. Students are responsible for planning and executing a final thesis exhibition that meets professional standards and pushes their visual language and conceptual development. Various modes of presentation are discussed and demonstrated. During the fall semester, students exhibit their work-in-progress (White Walls Gallery) and participate in a critique with other Corcoran faculty. The work-in-progress critique at the end of the fall semester represents a pivotal moment in the development of the thesis exhibition and is judged accordingly by the Studio faculty. Additionally, students present and defend their work in the Photography Department's Departmental Review, in preparation for their exhibition during the spring semester. Prerequisite: CPH 3091.

CPH 4091. Photography Thesis II. 3 Credits.

Senior Thesis Studio emphasizes process and practice in the development of a senior thesis project. The work evolves from a studio and seminar atmosphere that stresses individual and group critiques, as well as readings and discussions. Students are responsible for planning and executing a final thesis exhibition that meets professional standards and pushes their visual language and conceptual development. Various modes of presentation are discussed and demonstrated. During the spring semester, students continue to develop and refine their thesis project, so as to exhibit it in the thesis exhibition (Corcoran Gallery of Art). The latter part of the semester is dedicated to preparing the student to go out into the world as a practicing artist, interacting with visiting artists, with the public, continuing to look at a variety of artists' approaches, while pursuing a new body of work. Prerequisite: CPH 4090 Photo Thesis I.

CPH 4120. Photography/Photojournalism Seminar II. 3 Credits.

This course is a complement to CPH 4090 and CPJ 4090. This course explores issues of photographic voice, precedent and impact in the art world and publishing worlds. Students develop an awareness of the context in which they are making work by addressing contemporary issues through writing and oral presentations, visiting speakers, readings, exhibitions, and critiques with Corcoran faculty and outside experts. An emphasis is placed on engaged participation and articulate and convincing writing addressing a student's ideas and aspirations in relation to traditions, practices, and discourses of photo-based art and media. This course is designed to assist Fine Art Photography and Photojournalism students in the process of working through a successful Senior Thesis project as well as in developing a well-rounded artistic and photojournalistic practice.

CPH 4170. Professional Practices for Photography. 3 Credits.

For photography majors only. This course facilitates the transition from a structured learning environment to real life. The range of experiences discussed includes working in commercial photography, in a classroom, or in commercial galleries or museums. In addition to field work, a classroom component provides information about current professional practices in photography. Topics include models' releases, copyright laws, taxes, contracts, graduate schools, resume writing, and business card and portfolio preparation, as well as others. Prerequisite: CPH 3091 or permission of department.

CPH 4251. Making Meaning: Narrative and the Art of the Photography Book. 3 Credits.

This advanced studio-based seminar engages with the traditions and practices of the photographic book to examine and explore narrative strategies useful to today's artists/photographers. Through close readings of such classic twentieth-century book works as Walker Evans's *American Photographs*, Wright Morris's *The Inhabitants*, Robert Frank's *The Americans*, Ralph Gibson's *The Somnabulist* and *Déjà Vu*, Larry Clark's *Tulsa*, Joel Sternfeld's *American Prospects*, and Alex Soth's *Sleeping by the Mississippi*, students gain insight into ways of structuring their own photographic projects. On completion of the course, students are expected to have sequenced and produced a book-length collection of their own photographs, in consultation with the instructor. This course can be taken as a substitute for CPH 3120. Former name: The Photo Book.

CPH 6070. Studio and Location Lighting. 3 Credits.

Introduction to studio and location lighting. Strobe and continuous lighting equipment; light modifiers and grip equipment; mixed sources light; and aesthetic approaches using artificial and ambient light.

CPH 6450. Pre-Digital Alternative Process. 3 Credits.

1. Exploration of Salted Paper, Platinum printing, Mordencage, production of large format negatives and Wet Plate Processes
2. Alternative presentation methods
3. Exploration of the marriage between concept and process
Restricted to This is a graduate level course. (Same as CPH 3450).

CORCORAN PHOTOJOURNALISM (CPJ)

CPJ 2091. Photojournalism Studio Sequencing and Narrative Strategies. 3 Credits.

Techniques, practices, and ethics of photojournalism. Strategies for researching, photographing, editing, and interpreting stories and sequences; advancing technical skills; history and contemporary practices of visual journalism. Prerequisites: CSA 1501 or CSA 1502 or CPH 1091. Recommended background: prior completion of CSA 2090 or SMPA 2113.

CPJ 3090. Photojournalism Studio III. 3 Credits.

For Photojournalism majors only. Classes in this third-year course for photojournalism majors examine the similarities and differences in photojournalism in newspapers, magazines, television, the Internet, and other media. In addition to short-term, deadline-driven assignments, students undertake long-term projects. Topics include still and moving images, writing and editing needs in a variety of assignments, journalistic ethics, and communication laws. Prerequisite: CPJ 2091 Photojournalism Studio II.

CPJ 3091. Photojournalism Studio IV. 3 Credits.

For Photojournalism students only. In this continuation of CPJ 3090 students research, report and photograph a longterm narrative project. Through guest speakers, readings and assignments students consider different modes of practice, journalistic ethics, and communication laws. Multimedia approaches are explored as part of the course. Prerequisite: CPJ 3090 Photojournalism Studio III.

CPJ 3300. Speed of Sound. 3 Credits.

Great audio is a key component to compelling multimedia and video. Over the course of this class, audio reporting, collection, and postproduction techniques are explored and put into practice as a means to sharpen skills and advance understanding of the role and power of audio in visual journalism. Prerequisites: CPH 3050 and CPJ 2090 or CPJ 2091, or CPH 2090 and CPH 2091.

CPJ 4050. Picture Editing. 3 Credits.

CPJ 4090. Photojournalism Thesis I. 3 Credits.

In the final year of the Photojournalism curriculum, the emphasis is on developing individual strengths and style in the context of a sophisticated understanding of how photographic media shape and reflect public opinion. Students define, propose, research and initiate a longterm project that culminates in the Spring semester Senior Thesis exhibit. Intensive one-on-one and group critiques are integrated into the course as the students explore various approaches to their chosen subject matter. Prerequisites: CPJ 3091 and permission of the department.

CPJ 4091. Photojournalism Thesis II. 3 Credits.

This course continues the objectives of CPJ 4090 and focuses on the completion of the students' thesis work, which results in an exhibition at the Corcoran Gallery. Portfolio development and critique prepares students for the onset of their careers. Prerequisites: CPJ 4090 Photojournalism Thesis I and permission of the department.

CPJ 4170. Professional Practices for Photojournalism. 3 Credits.

This classroom complement to students' internship experiences examines the professional contexts in which today's photojournalism takes place and incorporates business practices, ethics, and economic realities. Practical approaches for working across multiple platforms are explored. Students meet with working professionals and experts during the semester and develop their portfolios, resumes and web identities for presentation in meeting the professional demands of the field. Restricted to photojournalism majors. Prerequisite: CPJ 3091.

CPJ 4340. Project-Driven Website Design. 3 Credits.

Technical and conceptual introduction to web design; visual design; fundamentals of website structure and navigation; accessibility and usability; writing HTML and CSS; content management systems; the web as a platform for both client-driven and self-published work. Prerequisites: CDM 1200 or CDM 2220 or CFN 1000.

CPJ 4600. Web Essay. 3 Credits.

This class teaches photographers to build essays with still photography images and audio files. Over the course of the semester students propose, research, edit and produce a series of audio/stills essays for web publication. Skills in developing and executing photo stories are addressed, in addition to effective audio gathering and editing. Audio gear and laptops required. Prerequisites: CPH 2090 or CPJ 2090 or permission of the department.

CPJ 6010. Photojournalism Graduate Seminar I. 3 Credits.

This is the first in a three-semester series of courses exploring traditional and non-traditional uses of photographic imagery in the media. Over the semester the class examines photojournalism to determine the elements within an image, sequence or mode of publication that are most effective in communicating a concept or representing human experience. The class runs as a series of lectures, visiting artists, field trips and group projects.

CPJ 6020. Photojournalism Graduate Seminar II: Approaches to Photo Editing. 3 Credits.

The course includes modules on the theory and aesthetics of editing and will enable students to develop creative skills for translating ideas into picture stories. Students will develop newspaper and magazine picture editor's management skills from managing assignments and photographers to storytelling in newspapers and magazines in print and online. Discussions on the communicative qualities of images how they affect decisions of picture use in publications and on the web.

CPJ 6024. Photojournalism Seminar II: Danish Embassy. 3 Credits.

To be announced.

CPJ 6025. Photojournalism Seminar II: Theories of Change/ New Forms of Radical Photography. 3 Credits.

In questioning how photographers collaborate with NGO's, policy makers, community activists and many others, this course examines if and how creative work can radicalize civic institutions like the press, citizenship and even government toward greater justice and equity. With a focus on three arenas examined through visual arts: violence, the environment and global equity; the class presents students with a comprehensive window into the discourse and practice(s) of socially engaged art, film, and photography. Through critical discussions, field trips, and visiting artists, the class creates a blueprint and staging ground for students to activate these ideas within their own areas of interest.

CPJ 6050. Advanced Multimedia Lab I. 3 Credits.

In this intensive, required course all MA in CPJ students are immersed in the basics of audio collection and production, integration of still images into audio timelines, video techniques and post-production. Three projects are completed through the course of the semester and grow increasingly complex. Final projects are published on a webpage conceived by the student.

CPJ 6060. Advanced Multimedia Lab II: Editing and Production. 3 Credits.

Reserved for MA/PJ requirement.

CPJ 6100. Research, Reporting, and Writing: Contemporary Journalism Practice. 3 Credits.

Students go beyond the basics in story coverage exploring effective research techniques, interview techniques, and writing for breaking news as well as short and long term projects. Through lectures, writing assignments, intensive workshops as well as individual and team assignments, students develop and begin to hone the skills of effective story coverage for web and print publications. This course works closely with the Photojournalism Story and Narrative and Advanced New Media Lab courses. A critical reading of contemporary media is emphasized throughout the course.

CPJ 6110. Story and Narrative in Photojournalism. 3 Credits.

At the heart of photojournalism is the human condition and the day-day-lives of those around us. Through this course students analyze effective visual story telling with still images. Students develop an understanding of what makes a strong photo story and how to pursue compelling images. A series of student-generated projects is completed through the course of the semester.

CPJ 6300. Speed of Sound. 3 Credits.

Great audio is a key component to compelling multimedia and video. Over the course of this class, audio reporting, collection, and postproduction techniques are explored and put into practice as a means to sharpen skills and advance understanding of the role and power of audio in visual journalism. Prerequisite: CPJ 6050.

CPJ 6401. El Salvador Travel: International Experience/ Transnational Identity. 3 Credits.

The travel component of the course provides an opportunity for cultural exchange and for the application of an integrated model of art and social practice in a global/local context. By in situ exploration, conducting video interviews of artists and key cultural figures, and by leading educator workshops for youth, Corcoran students partner with students in El Salvador, empower young people, provide new models of engagement, and together construct a visual document of the artistic scene of the 1980s in El Salvador and its relevance to the current, transnational, cultural milieu. Travel expenses for CPH 3401 are additional. Pre-requisite: CPH 3400/6400 or permission by the instructor.

CPJ 6450. Pre-Digital Alternative Processes for Photography. 3 Credits.

1. Exploration of Salted Paper, Platinum printing, Mordencage, production of large format negatives and Wet Plate Processes
2. Alternative presentation methods
3. Exploration of the marriage between concept and process
Restricted to Must have photographic experience prior to this course.
Recommended background: photographic skills. (Same as CPH 3450, CPH 3640).

CPJ 6600. Web Essay: Effective Storytelling with Audio and Images. 3 Credits.

This class teaches photographers to build essays with still photography images and audio files. Over the course of the semester students propose, research, edit and produce a series of audio/stills essays for web publication. Skills in developing and executing photo stories are addressed as are effective audio gathering and editing. Audio gear and laptops required. Restricted to students with advanced level with still photography skills; advanced knowledge of Adobe Premiere or Final Cut required of graduate students. Prerequisites: CPH 2090 and CPJ 2090 or permission of department for BFA and BA students; CPJ 6110 and CPJ 6050 or portfolio review and permission of department for graduate students. Recommended background: Advanced abilities in still photography and/or photojournalism. (Same as CPJ 4600).

CPJ 6640. Advanced Studio Lighting: Commission Project. 3 Credits.

Students work collaboratively with two professional photographers to produce 5-10 photographic portraits and 5-10 short videos of Foreign Service employees for an exhibition at the U.S. Department of State's new U.S. Diplomacy Center. Through an immersive, hands-on approach, students learn the different aspects of commissions and exhibitions, including research, project management, collaboration and production. Students also learn about historical and contemporary aesthetic approaches to photographic portraiture and master technical issues such as lighting and interviewing skills. This course is aimed toward photography and photojournalism students who want to learn to work collaboratively in a real-life commission situation.

CPJ 6800. Independent Study: Photojournalism. 3 Credits.

This option is appropriate for degree students who want access to independent faculty supervision, lab areas, and supplies for independent projects, and do not need or desire extensive course instruction.

CPJ 6900. Internship: MA Photojournalism. 3 Credits.

For degree students only. Internships can help students develop marketable skills, establish professional contacts, and explore different career options.

CPJ 7010. Photojournalism Graduate Seminar III: The Medium and the Message. 3 Credits.

This course is designed to support and challenge New Media Photojournalism students as they work through the concepts of their thesis work and presentations. Units address the essential elements of exhibitions, social media, online publishing, and community engagement. A combination of case studies, visiting lecturers and practical exercises is used to explore ideas and develop multi-platform strategies for publishing work. This course functions as a complement to CPJ 7800.

CPJ 7251. Making Meaning: The Photography Book. 3 Credits.

This advanced studio-based seminar engages with the traditions and practices of the photographic book to examine and explore narrative strategies useful to today's artists/photographers. Through close readings of such classic twentieth-century book works as Walker Evans's *American Photographs*, Wright Morris's *The Inhabitants*, Robert Frank's *The Americans*, Ralph Gibson's *The Somnabulist* and *Déjà Vu*, Larry Clark's *Tulsa*, Joel Sternfeld's *American Prospects*, and Alex Soth's *Sleeping by the Mississippi*, students gain insight into ways of structuring their own photographic projects. On completion of the course, students are expected to have sequenced and produced a book-length collection of their own photographs, in consultation with the instructor.

CPJ 7320. Fine Printing Technique. 3 Credits.

This course is for graduate New Media Photojournalism students who know the basics of digital imaging, printing, and workflow and want to increase their skills and competencies in these areas in a workshop environment. Students learn more refined and subtle approaches to editing and printing their photographs, develop a personal workflow process that is efficient and confidence-building, and benefit from individual and group critiques of their personal projects. The emphasis is on exploring the creative possibilities of the digital darkroom, on integrating advanced digital techniques and approaches so that they serve the content of the image and the intentions of the image-maker, and on making high quality prints from both digital originals and scanned film. The class is taught in an up-to-date digital lab using Adobe's latest Creative Suite version of Photoshop and a choice of printers and film and flatbed scanners. Among the subjects covered are varieties of ink-jet printers and papers, color profiles and color management, test printing and proofing, advanced scanning and re-sampling, and creating master files. Students also learn contemporary ideas about digital asset management (DAM).

CPJ 7340. Project Driven Website Design for NMPJ. 3 Credits.

This class guides students through the process of bringing a large body of work or project to life through a website. Explored through the semester are questions of how to drive website design with content, engage viewers and nurture and build upon bodies of work. Each student is expected to have join the class with a thesis project or equally substantial body of work upon which to base the development of a site. Project deadlines are linked to the Corcoran thesis process.

CPJ 7350. Nuancing the Story: Advanced Post Production for NMPJ. 3 Credits.

This course explores motion graphics and visual effects for video and film. Asset management, timeline work flow, keyframes, sound, compositing techniques, basic keying, effects, lighting, and camera are just some of the elements and reviewed and taught in this course. Professional techniques and standards are explored for timeline based special effects. Students learn advanced asset management, effects, and presets. The focus is on enhancing existing projects and preparing a professional demo reel of work.

CPJ 7800. Thesis Workshop. 3 Credits.

This workshop-style course focuses on student's projects and progress in the research and production of a thesis project for graduation from the New Media Photojournalism program. Arranged as a series of team-led workshops, group and individual critiques, coaching sessions, and work with outside mentors, the class provides a productive atmosphere as students build and refine their projects. This is where the rubber hits the road. The proof gets into the pudding required of anyone who is working on thesis for Spring exhibit and defense.

CPJ 7815. Thesis Travel Project. 3-6 Credits.

This course provides structured support for New Media Photojournalism students undertaking thesis projects involving travel outside of the Washington, D.C. metro area. To be eligible to for this course students must have successfully completed the first year (24 credits) of the NMPJ curriculum and be on schedule to graduate and in good academic standing overall as outlined in the Student Handbook. Prior to enrolling in the course a thesis topic, proposal and budget must be approved by the program director and thesis project coach. Once approved and enrolled, the student works with an assigned faculty member to develop a Work Plan and Outcomes document in order to define the pace and content of work, schedule of deadlines and expected outcomes. This plan must be approved by the program director. Students undergo a minimum of three substantial reviews of work over the course of the semester in addition to a regular schedule of feedback as defined in the project Work Plan and Outcomes document. Students are expected to work independently and meet all deadlines for the course as well as thesis production, post-production, exhibition and defense over the course of the academic year. Expenses incurred for travel and submitting deadline materials to faculty before critiques are the responsibility of the student. As with all second-year NMPJ students, those enrolled in Thesis Travel Project are required to participate in Departmental Reviews at the end of the semester as scheduled. Program Director Approval Required. This course is offered at 3 and 6 credits. Credit value is determined based on the scope and content of the course as outlined in the Work Plan and Outcomes document.

CPJ 7900. Photojournalism Graduate Thesis (Directed Study). 3 Credits.

In this course, students complete a comprehensive body of visual journalism accompanied by a written thesis outlining approach, photo/video precedents, and a narrative piece to accompany visual work. Each student works closely with faculty and advisors with the goal of producing the highest quality work for all components of the thesis process. Regular critiques and workshops are designed to support each student and keep on a schedule of production, postproduction, exhibition and defense. The process culminates with the display of thesis projects developed over the course of the semester through required websites and other exhibition formats; formal students presentations to faculty and area professionals; completion of community engagement projects; and submission of all thesis work. Recommended background: CPJ 7340 may be taken as a corequisite.

CORCORAN PRINTMAKING (CPR)

CPR 2300. Screenprinting. 3 Credits.

This is a broad based course in screen printing for both beginning and intermediate students. The course covers techniques and strategies in screen printing for students studying graphic design, photography and fine arts. The first half of the semester is devoted to basic skill building and understanding the potential and uses of this medium. The second half focuses on specific projects related to each student's interests and background.

CPR 2403. Book Arts: Concept and Content. 3 Credits.

This course is for the beginner to intermediate student in fine arts, graphic design, or photography, and encompasses the fundamentals for creating and assembling artist's books. Class focus is on student examination of book content and concept and covers a range of book structures such as portfolio forms, pamphlets, Japanese stab binding, concertina, Coptic, and perfect bindings. The altered book and book object are also covered. The intermediate student works more independently with additional hybrid book forms under the guidance of the instructor. Content of the books is emphasized with demonstrations in a variety of print and image-making techniques.

CPR 2423. Introduction to Papermaking. 3 Credits.

Introduction to papermaking skills, tools, and techniques; fibers and surface characteristics; coloring techniques; papers for specific purposes such as printmaking, bookbinding, and photographic processes; methods used in handmade paper. Intermediate to advanced students work on a more self-directed basis; a research paper is required for graduate credit.

CPR 3250. Lithography. 3 Credits.

Designed as an exploration of the lithographic process, which involves both the direct application of drawing on stone and aluminum plate and the use of photographically derived imagery. This course is a great introduction to printmaking, as well as an excellent tool for more advanced students. Lithography can be a highly expressive drawing medium as well as a versatile technical tool for the manipulation of photography. Students are able to sample both skills, with expert guidance from CCAD's printmaking faculty. Ambitious prints are realized in black and white and color, and are driven by images and imagination. Students learn some great technical skills while getting critical feedback on their ideas. At times this course may be cross-tallied at the graduate level as CPR 5250. Students seeking graduate credit are required to do additional work including a research paper and formal presentation of their work and ideas to the general class.

CPR 3261. Photo Printmaking Projects. 3 Credits.

Ideal for the printmaker, photographer, or any student interested in utilizing photographic or appropriated images in their work, this course covers a range of approaches in making fine art prints. Using solar etching plates, lithographic pronto plates and alternative processes such as gum transfer printing, and other mixed media and alternative print methods, the student develops his/her imagery in an expansive and experimental manner. Color printing techniques, and unique monoprint processes are also covered, allowing the student to explore the many possibilities these media have to offer.

CPR 3311. Screenprinting for Digital Media. 1.5 Credit.

The combination of traditional printmaking processes and digital techniques is explored. Students learn how to produce limited-edition fine art prints and/or posters for graphic projects. They also develop conceptual and technical skills for the creation of digitally-based work. Artwork is generated on the computer and in combination with drawing, painting, and/or photography. Film positives for screenprinting are printed directly from the computer as multilayered, duotone, or four-color process separations. Images are then transferred to a screen using a photo emulsion process. The latest techniques for screenprinting is demonstrated using water-based inks on archival papers as well as alternative materials. At times this course may be cross-tallied at the undergraduate level as CPR 3311 and at the graduate level as CPR 5311. Students seeking graduate credit are required to do additional work including a research paper and formal presentation of their work and ideas to the general class.

CPR 3361. The Wood Block Print: Traditional and Contemporary. 3 Credits.

Traditional and contemporary methods of wood block printing; techniques for incorporating wood block and other media in the creation of individual and multiple prints and objects; uses of woodblock printing in historical contexts and in contemporary art.

CPR 3701. Collagraph and Mixed-Media Printmaking. 3 Credits.

Production of multiple print editions using collaged and mixed-media collagraph printmaking techniques.

CPR 4350. Advanced Printmaking: Lithography, Monoprint, Etching. 3 Credits.

This intensive course covers advanced techniques in Etching, Relief, and Monoprint processes, and is designed for the student who has had introductory courses in some of these areas. The class covers a variety of color printing methods such as multi-plate, chine colle, and stencil printing. Further exploration into photo print and mixed media processes as well as a range of monotype and monoprint techniques are demonstrated.

CPR 4351. Advanced Printmaking: Screenprinting and Woodblock. 3 Credits.

Expanding upon knowledge students have gained studying woodcut and/or screenprinting through intermediate level courses, students work toward a level of mastery of one or both forms. Technical demonstrations challenge students to technical expertise in their own work. This course demonstrates the broad and varied connections of screenprinting and woodcut to other media, with emphasis on how they can be applied to the student's own artistic practice. Students also pursue a cross media project resulting in a research paper and presentation, building toward strategies for future work. Examples are regularly given linking the work of select contemporary artists to the notion that "printmaking processes, imagery and the materials themselves have an expansive quality that open new possibilities and perspectives in artistic process." Examples of artists whose work uses print media to expand their ideas based in other media are given. Students keep a journal with their thoughts and ideas about these artists and their work.

CPR 5250. Lithography. 3 Credits.

Designed as an exploration of the lithographic process, which involves both the direct application of drawing on stone and aluminum plate and the use of photographically derived imagery. This course is a great introduction to printmaking, as well as an excellent tool for more advanced students. Lithography can be a highly expressive drawing medium as well as a versatile technical tool for the manipulation of photography. Students are able to sample both skills, with expert guidance from CCAD's printmaking faculty. Ambitious prints are realized in black and white and color, and are driven by images and imagination. Students learn some great technical skills while getting critical feedback on their ideas. At times this course may be cross-tallied at the graduate level as CPR 5250. Students seeking graduate credit are required to do additional work including a research paper and formal presentation of their work and ideas to the general class.

CPR 5300. Screenprinting. 3 Credits.

This is a broad based course in screen printing for both beginning and intermediate students. The course covers techniques and strategies in screen printing for students studying graphic design, photography and fine arts. The first half of the semester is devoted to basic skill building and understanding the potential and uses of this medium. The second half focuses on specific projects related to each student's interests and background.

CPR 5423. 2D Applications in Paper. 3 Credits.

This course introduces the beginning student to basic papermaking skills, tools and techniques. Sheets of various fibers and surface characteristics are covered, as well a range of coloring techniques. Students learn to prepare and beat cotton fiber and linter and design sheets for specific purposes such as printmaking, bookbinding, and photographic processes. Methods unique to making artwork in handmade paper are explored, including pulp painting, printing and pulp transfer processes, and a variety of collaging, embedding, and watermark techniques. This course may be offered at the undergraduate level as CPR 3423 and at the graduate level as CPR 5423. The intermediate to advanced student is able to do more self-directed projects in these areas and graduate students are required to do a research paper on historical or contemporary papermakers and/or papermaking.

CPR 6261. Photo Printmaking Process. 3 Credits.

Ideal for the printmaker, photographer, or any student interested in utilizing photographic or appropriated images in their work, this course covers a range of approaches in making fine art prints. Using solar etching plates, lithographic pronto plates and alternative processes such as gum transfer printing, and other mixed media and alternative print methods, the student develops his/her imagery in an expansive and experimental manner. Color printing techniques, and unique monoprint processes are also covered, allowing the student to explore the many possibilities these media have to offer.

CPR 6361. The Wood Block Print: Traditional and Contemporary. 3 Credits.

Contemporary practice in art has over the years attached a special interest in the unique and expressive visual qualities of the woodcut. Its appeal is both as a stand alone print medium as well as one that can be combined with screenprinting, painting, sculpture and photography in multimedia projects. In this class, traditional methods of wood block printing are taught as well as techniques that include reductive color printing from single blocks and works that incorporate the inclusion of other media enabling the student to create unique as well as multiple prints and objects. Anselm Kiefer and Christiane Baumgartner, both known for their large scale woodcuts are a few the artists working today who have mined the potential of this medium in their work. Their woodcuts along with other contemporaries artists working in this medium are introduced in this class.

CPR 6701. Collagraph and Mixed#Media Printmaking. 3 Credits.

Collaged and mixed-media collagraph printmaking techniques, including silk organza collagraphs, sandrographs for the Vandercook press, traditional collaged collagraph plates and paper prints. Production of multiple print editions; technical skills.

CPR 7350. Advanced Printmaking: Lithography, Monoprint, Etching. 3 Credits.

This intensive course covers advanced techniques in Etching, Relief, and Monoprint processes, and is designed for the student who has had introductory courses in some of these areas. The class covers a variety of color printing methods such as multi-plate, chine colle, and stencil printing. Further exploration into photo print and mixed media processes as well as a range of monotype and monoprint techniques are demonstrated.

CPR 7351. Advanced Printmaking: Screenprint/Woodblock. 3 Credits.

Expanding upon knowledge students have gained studying woodcut and/or screenprinting through intermediate level courses, students work toward a level of mastery of one or both forms. Technical demonstrations challenge students to technical expertise in their own work. This course demonstrates the broad and varied connections of screenprinting and woodcut to other media, with emphasis on how they can be applied to the student's own artistic practice. Students also pursue a cross media project resulting in a research paper and presentation, building toward strategies for future work. Examples are regularly given linking the work of select contemporary artists to the notion that "printmaking processes, imagery and the materials themselves have an expansive quality that open new possibilities and perspectives in artistic process." Examples are given of artists whose work uses print media to expand their ideas based in other media. Students keep a journal with their thoughts and ideas about these artists and their work.

CORCORAN SCULPTURE (CSL)

CSL 2252. Metals and Metalsmithing. 3 Credits.

Large-scale metal sculpture and small-scale metalsmithing techniques share the student's creative energy in this inter-studio course. In the Sculpture studio, students explore welding, cutting, bending, and fastening a variety of metals. Oxyacetylene and MIG welders, cutting saws and shears, and the bending brake are introduced. Small scale bronze casting, cold forging, piercing (jeweler's saw) scoring-and-bending, cold connections (rivets), soldering and emphasizing the use of the jeweler's saw, torch, flexible shaft drill and fine hammer work, are the focus of work in the metalsmithing studio. Assignments are designed to relate the use of metal and metalsmithing to students' own artistic explorations.

CSL 2320. Creative Destruction: Subtractive Processes. 3 Credits.

Using both wood and foam students explore the subtractive method of carving and discover ways to make large works relatively inexpensively. Students gain familiarity with power wood carving techniques using tools such as the band saw, die grinder, and the lathe. In addition, the class explores foam carving through the use of hot wire tools, hand tools and power tools. Various types of foam are discussed as well as materials for foam coating which creates a firm, paintable, permanent shell over the foam using materials such as Magic-Smooth, Aqua-Resin, Plasti-paste, and more. Priming and painting methods for finished works are stressed in addition to the method of final presentation. The application of mixed media or video to the final presentation is encouraged but not required. In addition to gaining a level of proficiency with these techniques, students create a cohesive body of work that is an investigation of a singular theme of the student's choice.

CSL 3260. Mold-making and Casting. 3 Credits.

In this class students gain familiarity with a variety of mold making and casting techniques and materials, brush up on clay modeling skills, and experiment with ways to add a final finish such as paint, stain, flocking, etc, to three-dimensional work. Students create several small silicone rubber box molds, a large brush-on silicone rubber mold with a plaster mother mold, and an alginate mold from life. Castings are made in Aqua Resin (a new non-toxic material) as well as polyurethane resin (liquid plastic) and alternative media such as latex, dirt, soap, or chocolate. The addition of dyes and decorative powders to the casting resin is covered. The concept of the multiple and the copy is discussed. The integration of mixed media into the final work is encouraged along with creative final presentation methods as students work towards the goal of creating portfolio quality work.

CSL 3352. Wood as Sculpture. 3 Credits.

This practical skill-building course explores the different uses and applications of wood as a material for making art. Students learn the material characteristics of wood, methods of milling and processing, as well as engineered wood products. Instruction includes joinery, proper use of fasteners and adhesives, and wood finishing techniques. Emphasis is placed on tool safety, project planning, and critical thinking skills. Through a series of direct, hands-on explorations students gain the knowledge and experience to safely and confidently use; stationary tools as well as portable woodworking machines to perform cutting, joining, turning, carving, shaping, and finishing operations. At the conclusion of this course students are able to identify and use the table saw, jointer, planer, band saw, drill press, hand circular saw, lathe, angle grinder, belt sander and miter saw. Successful completion of this course is required for use of the Sculpture Department's woodworking studio.

CSL 3451. Sculpture/New Technologies. 3 Credits.

CSL 5252. Metals and Metalsmithing. 3 Credits.

Large-scale metal sculpture and small-scale metalsmithing techniques share the student's creative energy in this inter-studio course. In the Sculpture studio, students explore welding, cutting, bending, and fastening a variety of metals. Oxyacetylene and MIG welders, cutting saws and shears, and the bending brake are introduced. Small scale bronze casting, cold forging, piercing (jeweler's saw) scoring-and-bending, cold connections (rivets), soldering and emphasizing the use of the jeweler's saw, torch, flexible shaft drill and fine hammer work, are the focus of work in the metalsmithing studio. Assignments are designed to relate the use of metal and metalsmithing to students' own artistic explorations.

CSL 6451. Sculpture/New Technologies. 3 Credits.

CORCORAN STUDIO ARTS (CSA)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CSA 1101. Introduction to Handbuilt Ceramics. 3 Credits.

Introduction to working with clay as an art form; fundamental hand-building techniques such as pinch, coil, and slab; basic surface, glaze, and firing techniques. Introductory history of ceramics. Materials fee.

CSA 1102. Introduction to Wheelthrown Ceramics. 3 Credits.

Introduction to wheelthrowing in ceramics; the potter's wheel as a tool to make ceramic cylindrical, open forms, and vessels; slips, underglazes, and glazes; reduction and oxidation kiln firing; the role of wheel-thrown pottery in historic and contemporary cultures. Materials fee.

CSA 1201. Sculpture Fundamentals: Material Investigations. 3 Credits.

Beginning study of design and fabrication of sculpture. Introduction to sculptural techniques across multiple media, with a focus in hand-built processes including textile, wood, and found object techniques. Materials fee.

CSA 1301. Drawing Fundamentals. 3 Credits.

Fundamentals of line, shape, value, contrast, composition, and mark making. Emphasis on working directly from life. Traditional and contemporary strategies and skills for developing technique, process, and meaning. Conceptual issues. Materials fee.

CSA 1401. Painting: Visual Thinking. 3 Credits.

Development of technical and perceptual skills that are the foundation of visual expression. Introduction to the mechanics of paint handling, including how to begin a painting, apply paint, and model form. Value, line, color, and abstraction. Materials fee.

CSA 1501. Black and White Photography Fundamentals. 3 Credits.

Materials and processes of black and white chemical photography; camera operations, film processing, printing, and presentation methods; the visual language of photography: historical antecedents, contemporary practices, and strategies of critical interpretation. Materials fee.

CSA 1502. Digital Photography Fundamentals. 3 Credits.

Materials and processes of digital color photography; color theory, exposure techniques, film scanning, digital color correcting, and printing; the use of color as a means of visual communication and creative expression, historical antecedents, contemporary practices, and strategies of critical interpretation. Materials fee.

CSA 1601. New Media Digital Art. 3 Credits.

Introduction to the tools and processes of digital, electronic, and time-based arts; development of technical skills necessary for using the computer as a creative tool.; the history and current role of digital representation and distribution in art, ideas, and relationships. Materials fee.

CSA 2000. Sophomore Colloquium. 3 Credits.

Sophomore colloquia are small, seminar-type classes that deeply engage CCAS second-year students in a discipline, focus on a narrow issue of high interest and impact, and require independent research projects. May be repeated provided topic differs. Consult the Schedule of Classes for more details. Restricted to CCAS sophomores.

CSA 2001. Concept Lab. 3 Credits.

Connecting concept, materials, media, and audience; addressing challenges using materials and media. Cross-disciplinary thinking and individual and collaborative creative practices as well as historical, contemporary, and theoretical context of art works.

CSA 2090. Photography/Photojournalism Studio Documentary Modes and Constructed Realities. 3 Credits.

How photographic processes construct perception of truth and fiction; approaches to image making and interpretation, strategies for editing, and advancing technical skills while developing awareness of photographic traditions and contemporary practices, including photojournalism and documentary modes. Prerequisites: One of the following: CPH 1091, CSA 1501, or CSA 1502. (Same as CPJ 2090).

CSA 2091. Photography Studio Sequencing and Narrative Strategies. 3 Credits.

Approaches to image making and interpretation in sequence. Strategies for researching, photographing and editing stories; advancing technical skills; photographic traditions and contemporary practices, including photojournalism and documentary modes. Prerequisites: CSA 1501 or CSA 1502 or CPH 1091. Recommended background: prior completion of CSA 2090 or SMPA 2113.

CSA 2101. Clay and Earth Medium and Materials Workshop. 3 Credits.

Intensive introduction to the materials and methods essential to ceramic practice; clay forming techniques in hollow construction, including hand building, wheel throwing, extrusion, and casting; materials and basic chemistry of clay, glazes, and firing. Materials fee.

CSA 2111. Ceramic Design in Handbuilt Forms. 3 Credits.

Further development of handbuilding techniques in ceramic sculpture; pinching, coiling, paddling, and hollowing; use of slabs and hump and press molds. Students produce clay and glazes and experiment with those materials in various reduction and oxidation firing ranges. Prerequisites: One of the following: CSA 1101, CSA, 2101, or FA 1101.

CSA 2112. Ceramic Wheelthrown Forms. 3 Credits.

Use of the wheel to create intricate elements and practices that accompany advanced functional and non-functional ceramic forms, including sculptural applications. Clay and glazes in various reduction and oxidation firing ranges; relationships between clay, surface, and fire. Prerequisites: One of the following: CSA 1102, CSA 2101, or FA 1102.

CSA 2113. Sculpture in Clay. 3 Credits.

Methods of clay construction relating to sculptural form and the aesthetic concerns of the sculptural object. Traditional hand building methods and innovative forming techniques; production of discreet objects, multiples, and issues dealing with the installation of each; finishes and firing techniques to connect ceramic surface and form. Prerequisites: One of the following: CFA 2126, CSA 1101, CSA 2101, or FA 1101.

CSA 2201. The Object in its Environment: Medium and Materials Workshop. 3 Credits.

The relationship of the created object with its environment including relationships to space, time, and social context. Variety of sculptural materials and practices including performance, installation, and issues of site sensitivity and specificity, sustainability and environmental design. Prerequisites: One of the following: CFA 1092, CFN 1091, CSA 1201, or FA 1201.

CSA 2211. Sculpture Fabrication. 3 Credits.

Intermediate to advanced fabrication techniques including woodworking, metal fabrication, mold-making, and textiles; developing safe and creative uses of more advanced sculptural techniques and tools in the development of a body of work. Materials fee. Prerequisites: CFA 1092 or CFN 1091 or CSA 1201 or FA 1201.

CSA 2212. Sculpture: Design in Action. 3 Credits.

The design, fabrication, and implementation of artwork to address real world problems using a variety of materials and techniques. Students put their sculptures into action in site-specific contexts. Prerequisites: One of the following: CFA 1092, CFN 1091, CSA 1201, or FA 1201.

CSA 2214. Metals and Metalworking. 3 Credits.

Introduction to a variety of processes for working with metal alone or with other materials, including forming, cutting, joining, casting, and 3D printing, and their application to contemporary sculpture. Prerequisites: One of the following: CFA 1092, CFN 1091, CSA 1201, or FA 1201.

CSA 2215. Mold Making and Casting. 3 Credits.

Introduction to a variety of mold making and casting techniques and materials, discussion of the possibilities of the multiple, and their application to contemporary art. Prerequisites: One of the following: CFA 1092, CFN 1091, CSA 1201, or FA 1201.

CSA 2216. Form in Wood. 3 Credits.

Applications of wood as a material for art and design practice; expanded techniques for milling, joining, bending, and shaping; exploration of the physical, historical, and conceptual properties of wood as a living material. Prerequisites: One of the following: CFA 1092, CFN 1091, CSA 1201, or FA 1201.

CSA 2311. Drawing: Perception and Mark Making. 3 Credits.

Expands on the concept of drawing to include a wide variety of conventional and unconventional materials, techniques, and prepared surfaces; perceptual and conceptual development; observational practice of drawing and exploration of historical and contemporary developments in drawing. Prerequisites: One of the following: CFA 1090, CFA 1091, CFN 1090, CSA 1301, CSA 1401, or FA 1301.

CSA 2314. Introduction to Illustration. 3 Credits.

Introduction to contemporary illustration and processes for effectively conveying concepts visually. Visual rhetoric, visual narrative, and their applications in illustration; concepts and history; and various parameters of work encountered by illustrators. Prerequisites: One of the following: CFA 1090, CFA 1091, CFN 1090, CSA 1301, CSA 1401, or FA 1301.

CSA 2401. Painting Medium and Materials Workshop. 3 Credits.

Intensive introduction to the materials, surfaces, subjects, and sources of historical and contemporary approaches to painting. Issues of form, process, and content are used to develop the student's objective visual judgement and intuitive subjective response. Materials fee. Recommended background: Intended for, but not limited to, BA and BFA in fine arts majors.

CSA 2410. Topics in Intermediate Painting. 3 Credits.

Development of formal, technical, experimental, and conceptual aspects of painting. Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Prerequisites: One of the following: CFA 1091, CFA 2124, CSA 1401, CSA 2401, or FA 1401.

CSA 2413. Painting: Process and Materials Lab. 3 Credits.

Traditional and experimental contemporary materials, construction, and application processes used in fine art painting: support structures, grounds, paints, application tools, and actions by the painter. Materials fee. Prerequisites: CFA 1091 or CFA 2124 or CSA 1401 or CSA 2401 or FA 1401.

CSA 2502. Time-based Media Lab. 3 Credits.

Video and audio production with a focus on the skills needed to be a technically proficient and thoughtful media maker. Basic techniques in recording, editing, and production management and conceptual and technical analyses in pop culture, art history, and documentary studies. Restricted to students in the BFA in fine art photography and in photojournalism programs or with the permission of the instructor. Prerequisites: CPH 1091 or CSA 1052.

CSA 2503. Photography Techniques and Practices. 3 Credits.

Extends camera and darkroom skills with advanced methods for making black-and-white negatives and prints, including new film formats and types. Development of individual image-making abilities and personal approach. Prerequisites: One of the following: CPH 1090, CSA 1501, or FA 1501.

CSA 2511. Photography: Abstraction Versus Representation. 3 Credits.

Theory and practice of abstract and representational photography in historical and contemporary contexts; chemical and digital photographic processes. Prerequisites: One of the following: CPH 1091, CSA 1501, CSA 1502, or FA 1502.

CSA 2512. Photography: Altered Landscapes. 3 Credits.

Investigation of images of place in contrast to conventions of landscape photography; historical and contemporary contexts; chemical and digital photographic processes. Prerequisites: One of the following: CPH 1091, CSA 1501, CSA 1502, or FA 1502.

CSA 2513. Photography: From Photograms to Scanograms. 3 Credits.

Low-tech methods of producing analogue photographs and generating digital images. Working in both the chemical darkroom and digital lab. Analyzing examples of photography from the earliest practitioners to work being produced by contemporary artists. Prerequisites: One of the following: CPH 1091, CSA 1501, CSA 1502, or FA 1502.

CSA 2515. The Extended Image. 3 Credits.

Nontraditional and alternative photo processes for photographers and artists in other media, including photograms, primitive cameras, cyanotypes, transfers, toning, alternative substrates, and sculptural uses of photography. Prerequisites: CFN 1092 or CSA 1501.

CSA 2570. Studio and Location Lighting. 3 Credits.

Introduction to studio and location lighting. Strobe and continuous lighting equipment; light modifiers and grip equipment; mixed sources light; and aesthetic approaches using artificial and ambient light. Prerequisites: CPH 1091, CSA 1501, CSA 1502, FA 1501, or FA 1502.

CSA 2601. Time-Based Media and Materials Workshop. 3 Credits.

Video and audio production with a focus on the skills needed to be a technically proficient and thoughtful media maker. The history of video in contemporary art since 1965; avant-garde moving image languages; performance documentation; and theoretical and social contexts that have informed the development and use of the medium. Prerequisites: One of the following: CFN 1090, CSA 1502, or CSA 1601.

CSA 2701. Printmaking Medium and Materials Workshop. 3 Credits.

Introduction to printmaking media and their use in historic and contemporary artistic practice; multi-faceted relationships of printmaking with photography, sculpture, painting, and other media. Materials fee. Recommended background: CFN 1090, CSA 1301, or FA 1301.

CSA 2702. Screenprinting. 3 Credits.

Fundamental techniques required to produce hand-pulled screen prints and their context within printmaking and contemporary art; history of screen printing and its role as a fine art, mass media, and commercial tool. Materials fee.

CSA 2703. Wood Block Print. 3 Credits.

Traditional and contemporary methods of wood block printing; techniques for incorporating wood block and other media in the creation of individual and multiple prints and objects; uses of woodblock printing in historical contexts and in contemporary art. Materials fee.

CSA 2705. Collagraph and Mixed-Media Printmaking. 3 Credits.

Production of multiple print editions using collaged and mixed-media printmaking techniques, including including, sandographs for the Vandercook press, silk organza, traditional collaged plates and paper prints; historical and contemporary examples and development of critical language for analyzing print media. Materials fee.

CSA 2706. Lithography. 3 Credits.

Introduction to lithographic printmaking as a versatile tool for manipulating photographic images and as an expressive drawing medium. Materials fee. Recommended background: CFN 1090 or CSA 1301 or FA 1301.

CSA 2708. Introduction to Papermaking. 3 Credits.

Skills, tools and techniques for producing paper for a variety of fine arts, printmaking, book binding, and photographic processes; history and current uses of non-industrial paper within printmaking and contemporary art. Materials fee.

CSA 2760. Book Arts: Concept and Content. 3 Credits.

Fundamentals of developing book art structures and artist's books; construction and bindings, text and image-making techniques, and utilizing design, photography, and writing as source materials for book projects. Materials fee.

CSA 3020. Topics in Photography and Photojournalism. 3 Credits.

Topics in contemporary photography, photojournalism and image culture. Strategies for connecting research and writing to creative practice. Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. Prerequisites: One of the following: CPJ 2090, CPH 2090, CSA 2090, or CSA 2091. (Same as CPJ 3120).

CSA 3021. Topics in Fine Art. 3 Credits.

Theoretical, historical, material, political and poetic context of topics in contemporary art and culture. Strategies for connecting research and writing to creative practice. Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. Restricted to juniors and seniors.

CSA 3090. Photography Studio Appropriation and the Archival Impulse. 3 Credits.

Use of preexisting images, archival investigation, and the role of mediated images in the contemporary world. Introduces students to increasingly sophisticated ways of analyzing and producing lens-based work. Emphasis on technical, conceptual, and aesthetic development. Prerequisites: One of the following: CPH 2090, CPJ 2091, CSA 2090, or CSA 2091.

CSA 3091. Photography Studio Conceptual Strategies. 3 Credits.

Conceptual strategies for production and presentation. Analysis and production of lens-based work. Emphasis on technical, conceptual, and aesthetic development of personal work. Prerequisites: One of the following: CPH 2090, CPJ 2091, CSA 2090, or CSA 2091. Recommended background: prior completion of CSA 3090.

CSA 3092. Fine Art Studio Critical Practices in Making. 3 Credits.

Students create work in response to conceptually oriented questions in media with focus on the structure and rhythm of their creative practice, consideration of the lives and politics of objects, and processes of individual and collective action. Emphasis on technical, conceptual, and aesthetic development. Materials fee. Restricted to BFA in fine art majors; BA in fine arts majors with the permission of the instructor. Prerequisites: CFA 2090 and CSA 2092. Recommended background: Prior completion of CSA 2093.

CSA 3093. Fine Art Studio Conceptual Strategies. 3 Credits.

Connecting independently generated project ideas with choices of material, action, and site. Focus on conceptual and contextual strategies for presentation. Technical, conceptual, and aesthetic risk-taking emphasized; supported by study of theory, criticism, and project management. Restricted to students in the BFA in fine art and BA in fine arts programs or with the permission of the instructor. Prerequisites: CFA 2091 or CSA 2093. Recommended background: prior completion of CSA 3092.

CSA 3101. Special Topics: Ceramics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Prerequisites: One of the following: CFA 2126, CSA 1101, CSA 2101, or FA 1101.

CSA 3201. Special Topics: Sculpture. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Prerequisites: One of the following: CFA 1092, CFN 1091, CSA 1201, or FA 1201.

CSA 3202. Sculpture Digital Forms. 3 Credits.

Applications of digital fabrication to a multi-media contemporary art practice. The intersection between digital and physical methods of fabrication. Prerequisites: One of the following: CFA 1092, CFN 1091, CSA 1201, or FA 1201.

CSA 3240. Wear, Strut, Occupy. 3 Credits.

Costume, adornment and the relationship between individual, material, and context, including wearable sculpture, fashion, performance, and wearer/performer identity. Practical experience with clothing design and interpretation through a variety of costume design projects. Prerequisites: One of the following: CFA 1092, CFN 1091, CSA 1201, or FA 1201.

CSA 3241. Installation Art. 3 Credits.

Installation and sculpture through the lens of site specificity, architecture, media, and landscape. Theoretical dialogue of context and material as well as the practical issues of fabrication and implementation. Prerequisites: One of the following: CFA 1092, CFN 1091, CSA 1201, or FA 1201.

CSA 3301. Special Topics: Drawing. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. Prerequisites: One of the following: CFA 1090, CFA 1091, CFN 1090, CSA 1301, CSA 1401, or FA 1301.

CSA 3312. Advanced Drawing. 3 Credits.

Investigation of drawing as an organizing tool for thought, analysis, and personal imagery. Drawing as a method to integrate complex ideas and concepts into the visual field. Prerequisites: One of the following: CFA 1090, CFA 1091, CFN 1090, CSA 1301, CSA 1401, or FA 1301.

CSA 3313. Drawing Strategies and Practice. 3 Credits.

Drawing as an end in itself and as a support for all art-making processes, including drawing as spatial perception, a physical act, and a mode of recording immediacy. Wide range of materials furthers formal and conceptual skills. Prerequisites: One of the following: CFA 1090, CFA 1091, CFN 1090, CSA 1301, CSA 1401, or FA 1301.

CSA 3401. Special Topics: Painting. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. Prerequisites: One of the following: CFA 1091, CFA 2124, CSA 1401, CSA 2401, or FA 1401.

CSA 3402. Painting: Contemporary Issues. 3 Credits.

The variety of historical and contemporary painting practices. Deepening understanding of painting construction and its meaning-making and developing one's own interests, pleasures, and concerns. Prerequisites: One of the following: CFA 1091, CFA 2124, CSA 2401, CSA 1401, or FA 1401.

CSA 3510. Pre-Digital Alternative Process. 3 Credits.

Investigation of alternative photographic processes such as albumen, salted paper, gum bichromate, platinum/ palladium, and mordantage, leading to a fully realized portfolio, book, or other independent project. Prerequisites: One of the following: CPH 1091, CSA 1501, or FA 1501. Recommended background: prior completion of CPH 2090 or CSA 2090.

CSA 3514. Color in Lens-Based Media. 3 Credits.

Creative use of the formal, symbolic and emotional impact of color; structure of perception and aesthetics in color photographic images; historical and contemporary issues in color photography. Prerequisites: One of the following: CPH 1091, CSA 1502, or FA 1502. Recommended background: Prior completion of CSA 2090 or CSA 2092.

CSA 3531. Photography: Contemporary Issues. 3 Credits.

Emphasis on the incorporation of contemporary strategies, trends, and approaches into the student's personal practice; study of the work of contemporary artists who use photography. Prerequisites: One of the following: CPH 1091, CSA 1501, CSA 1502, FA 1501, or FA1502. Recommended background: Prior completion of CSA 2090.

CSA 3535. Advanced Digital Photography. 3 Credits.

Enhancement of digital camera, editing, and printing techniques through advanced approaches. Connecting process with content of the image and intentions of the image-maker. Development of individual image-making abilities and personal approach. Prerequisites: CPH 2100 or CSA 1502. Recommended background: Prior completion of CSA 2090.

CSA 3536. Making Meaning in the Photography Book. 3 Credits.

Methods of developing narrative and non-narrative photo books, including assembly of individual photographs and texts into sequential form. Historical and contemporary strategies of making meaning. Prerequisites: One of the following: CPH 1091, CSA 1501, CSA 1502, FA 1501, or FA 1502. Recommended background: CSA 2091.

CSA 3540. Advanced Lens-Based Commissions Project. 3 Credits.

Through a real-world collaborative project students learn the aspects of commission and exhibition work including research, project management, and production. Advanced lighting and interviewing skills, problems in historical and contemporary portraiture. Commissions vary by semester. Prerequisites: CSA 2570 or SMPA 2113.

CSA 3601. Special Topics: Time-Based and Electronic Media. 3 Credits.

Issues in contemporary time-based and electronic media. Topics vary by semester. May be repeated provided the topic differs. See the schedule of classes for more details. Prerequisites: CDE 1091, CSA 1502, CSA 1601, or SMPA 2012.

CSA 3606. Performative Media. 3 Credits.

Development and production of performance-based art works. Elements of performance (text, movement, sound, video, ritual, social practice). Narrative and theoretical approaches to performance art and works for stage, video, or installation.

CSA 3612. Video: Remixing the Archive. 3 Credits.

Use of existing moving image and sound in video, live remix or sources for performance in arts and documentary contexts. Narrative and theoretical approaches to mediated memory. Introduces students to the substantial archival resources in Washington, DC, and online collections. Prerequisites: CSA 2502, CSA 2601 and SMPA 2112 or related coursework with the permission of the instructor.

CSA 3613. Site and Sound. 3 Credits.

Contemporary sonic art practice and audio production; audio storytelling, spatialized sound, and site-based sonic artwork; critical perspectives on sound and audio practice. Prerequisites: CFN 1093 or CSA 1502 or CSA 1601 or SMPA 2112.

CSA 3710. Special Topics in Print Media. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See program for more details. Permission of the instructor may substitute for prerequisites. Prerequisites: CFA 2125, CPR 2300, CPR 2423, CPR 2403, CSA 2701, CSA 2702, CSA 2703, CSA 2705, CSA 2708 and CSA 2760.

CSA 3712. Letterpress From the 1400s to the Digital Age. 3 Credits.

Traditional and contemporary letterpress and relief printing applications; typesetting; presswork, inking, editioning, and Vandercook press operation; black and white relief printing, reduction printing; and experimental collagraph techniques. Materials fee.

CSA 3714. Photo Printmaking Projects. 3 Credits.

The use of photography, appropriated imagery, and photographic processes in printmaking. Students develop personal imagery in an expansive and experimental manner. The instructor's permission may be substituted for prerequisites. Materials fee. Prerequisites: CSA 1502, CFN 1092, CSA 2701, CSA 2702, CSA 2703, CSA 2705, CSA 2708, CSA 2760, FA 1502, CFA 2125, CPR 2300, CPR 2423 and CPR 2403.

CSA 3715. Lithography, Monoprint, and Etching Printmaking. 3 Credits.

Techniques in etching, relief, and monoprint processes with a focus on building a body of work while further developing a technical vocabulary in color print processes. Prerequisites: CFA 2125, CPR 2300, CPR 2403, CPR 2423, CSA 2701, CSA 2702, CSA 2703, CSA 2705, CSA 2708, CSA 2760 and FA 1502.

CSA 3901. Special Topics: Cross-Disciplinary Studio Arts. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. Recommended background: Prior coursework in the media or topics covered.

CSA 3912. The Cinematic in Contemporary Art. 3 Credits.

The influence of cinema on contemporary art in historical, conceptual, and aesthetic contexts. Students employ cinematic strategies through projects that explore setting, sequencing, camera angle, point of view, tracking, lighting, performance, narrative, and sound. Prerequisites: CFN 1092 or CSA 1502 or CSA 2502 or CSA 2601.

CSA 3913. Painting Off the Wall. 3 Credits.

Nontraditional approaches to painting, including manipulation of its structural aspects. Painting combined with other creative fields such as architecture, sculpture, social practice, performance, and film/video. Prerequisites: One of the following: CSA 2401, CSA 1401, TRDA 4338, FA 1401, CFA 2124, or CFA 1091.

CSA 3914. Art Outside the Gallery. 3 Credits.

Site-specific art practices emphasizing a variety of forms of public art, artist-run spaces, and practices that engage places and audiences outside of formal art spaces. Prerequisites: CFN 1093, CSA 2201 and CFA 2123.

CSA 3915. Public Spectacle in Socially Engaged Art. 3 Credits.

Ethical, cultural, and political implications of using art in the public sphere and the philosophical, theoretical, and historical background of these practices. Students create collaborative artworks that address real-life problems and seek solutions in actual and virtual communities, from inventing a persona to creating a social movement. May be repeated for credit. Recommended background: Prior completion of any two 2000-level courses in one or more of the subject areas CDE, CGD, CDM, CMUS, CPJ, CSA, and CTAD.

CSA 3951. Creative Photovoltaics. 3 Credits.

The fabrication process of solar devices and the parameters of solar cells in design and art applications. Students build a small solar device and conceptualize innovative proposals for new solar technology solutions. Prerequisites: CSA 1201 or CFN 1093.

CSA 4020. Photography and Photojournalism Studio Seminar. 3 Credits.

Critical issues in contemporary photography, photojournalism, and related lens-based media including photographic voice, precedent and impact in the art world and publishing worlds. Research and writing in support of the development of thesis and independent projects. Prerequisites: One of the following: CPH 3020, CPJ 3020, or CSA 3020.

CSA 4021. Fine Art Studio Seminar. 3 Credits.

Critical issues in the production, contextualization, presentation, documentation, and distribution of contemporary art works. Research and writing in support of the development of thesis or capstone projects in contemporary art. Restricted to juniors and seniors.

CSA 4070. Professional Practices for Lens-Based Media. 3 Credits.

Ideas and strategies for career success in photography and related lens-based media; establishing practical modes of promotion, fundraising and entrepreneurship, preparing packages or work, and writing grants and press releases. Business practices including model releases, contracts, copyright law, managing budgets. Restricted to students in the BFA programs in fine art photography and photojournalism. Prerequisites: One of the following: CPH 3090, CPJ 3090, or CSA 3090.

CSA 4085. Directed Studies: Studio Arts. 1-3 Credits.

Directed research and study in a specific area of studio art practice to be approved and supervised by a faculty member. Students must have their plan of study approved by the faculty supervisor and the Director of Undergraduate Studies prior to enrollment. Restricted to fine art photography, fine art, and photojournalism majors.

CSA 4092. Fine Art Thesis I. 3 Credits.

The development of a senior thesis project and accompanying research. Individual and group critiques, readings and discussions. Planning and execution of a body of work that extends visual language and conceptual development. Restricted to students in the BFA in fine art program and those in the BA in fine arts program with the permission of the instructor.

CSA 4093. Fine Art Thesis II. 3 Credits.

Completion and exhibition of a senior thesis project and accompanying research. Individual and group critiques, readings and discussions. Planning and execution of a body of work that extends visual language and conceptual development. Restricted to students in the BFA in fine art program; BA in fine arts students with the permission of the instructor.

CSA 4170. Professional Practices for Artists. 3 Credits.

Infrastructure of the art world through analysis of various sustainable models of contemporary art practice for young artists. Establishing practical modes of criticism, promotion, fundraising and entrepreneurship in relation to exhibiting one's work, seeking venues, conducting studio visits, managing budgets, and writing grants, press releases, and artist statements. Restricted to juniors and seniors in the BFA and BA in fine arts programs. Prerequisites: CSA 2001 and CSA 3092.

CSA 6010. Social Practice Workshop. 4 Credits.

Core studio for students in the MFA in social practice program. Intensive studio critique supported by an equally rigorous investigation of the interdisciplinary tools, strategies, cultural and technological innovations for socially engaged creative practice. Restricted to students in the MFA in social practice program.

COUNSELING (CNSL)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CNSL 0920. Continuing Research - Master's. 1 Credit.

.

CNSL 0940. Continuing Research - Doctoral. 1 Credit.

.

CNSL 2102. Foundations of Counseling. 3 Credits.

CNSL 2162. Professional and Ethical Orientation to Counseling. 3 Credits.

The roles and functions of a professional counselor and the ethical standards that govern the profession.

CNSL 2163. Psychosocial Adjustment. 3 Credits.

Mental health problems; emphasis on needs of counselors, teachers, and others working with children and adolescents.

CNSL 2376. Introduction to Rehabilitation Counseling. 3 Credits.

Overview of rehabilitation profession, including philosophy, history, ethics, theory, legislation, settings, and practice.

CNSL 2378. Disability Management and Psychosocial Rehabilitation. 3 Credits.

Case management services for persons with physical, mental, and emotional disabilities.

CNSL 2381. Medical and Psychosocial Aspects of Disabilities. 3 Credits.

Chronic and traumatic disorders; rehabilitation and psychosocial implications.

CNSL 6100. Special Workshop. 1-12 Credits.

Topics to be announced in the Schedule of Classes. May be repeated for credit.

CNSL 6101. Research and Independent Study. 1-3 Credits.

Individual research under guidance of a staff member. Program and conferences arranged with an instructor.

CNSL 6103. Thesis Research. 3 Credits.

CNSL 6104. Thesis Research. 3 Credits.

CNSL 6130. Vocational Assessment of Individuals with Disabilities. 3 Credits.

Investigation of vocational appraisal processes and techniques for individuals with disabilities. Includes assessment for transition using field-based assignments. Three credits of practicum experience for students specializing in vocational evaluation. Material fee. Same as SPED 6230.

CNSL 6151. Professional and Ethical Orientation to Counseling. 3 Credits.

The roles and functions of a professional counselor and the ethical standards that govern the profession.

CNSL 6153. Counseling Interview Skills. 3 Credits.

Acquisition of counseling skills common to all theories through lectures, demonstrations by faculty, role playing, and videotaping. Permission of the instructor required for non-counseling majors. CNSL 6151 may be taken as a corequisite. Material fee. Prerequisites: CNSL 6151 for counseling majors.

CNSL 6154. Theories and Techniques of Counseling. 3 Credits.

An introduction to basic counseling and psychotherapeutic theories and associated techniques. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others.

CNSL 6155. Career Counseling. 3 Credits.

A consideration of theory, practice, and the body of information related to career counseling, choice, and development over the life span. Prerequisite: CNSL 6153, EDUC 6114 for counseling majors; permission of instructor is required for others. Material fee.

CNSL 6157. Individual Assessment in Counseling. 3 Credits.

Detailed study of individual analysis and appraisal techniques. Development of systematic case study. Prerequisite: CNSL 6153, EDUC 6114 for counseling majors; permission of instructor is required for others. Material fee.

CNSL 6159. Psychosocial Adaptation. 3 Credits.

Mental health problems; emphasis on needs of counselors, teachers, and others working with children, adolescents, and adults.

CNSL 6161. Group Counseling. 3 Credits.

Principles of group dynamics as related to interaction within groups. Techniques and practice in group counseling. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others.

CNSL 6163. Social and Cultural Dimensions - CNS. 3 Credits.

Basic sociocultural concepts in counseling theory and how they apply to the practice of the counseling profession. CNSL 6153 may be taken as a corequisite. Permission of the instructor required for non-counseling majors. Prerequisites: CNSL 6153 for counseling majors.

CNSL 6164. Values, Spiritual, and Religious Issues in Counseling. 3 Credits.

The theoretical and practical intersection of counseling, psychotherapy, and mental health considerations with religion and spirituality. The clinically effective and ethically responsible integration of religion and spirituality into counseling. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others.

CNSL 6169. Counseling Substance Abusers. 3 Credits.

Individual, group, family, and self-help counseling applied to substance abusers. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.

CNSL 6170. Grief and Loss. 3 Credits.

Exploration and discussion of grief and loss from theoretical, practical, cross-cultural, and personal perspectives; implications for counselors within a multidisciplinary environment.

CNSL 6171. Family Counseling. 3 Credits.

The family as a system: how it affects the client and how the client affects it. Didactic presentations, role playing, and work with simulated families. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.

CNSL 6172. Human Sexuality for Counselors. 3 Credits.

Issues of sexuality as related to counseling in contemporary society. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.

CNSL 6173. Diagnosis and Treatment Planning. 3 Credits.

For counselors and mental health practitioners. Symptoms and treatment of various mental disorders. The process of making psychiatric diagnoses. A variety of treatment strategies are covered, along with their application to various disorders. Prerequisite: CNSL 6153.

CNSL 6174. Trauma and Crisis Intervention. 3 Credits.

This course provides the counseling student with an introduction to research, theory, and practices within the field of traumatology. The course covers the historical evolution of the field; biopsychosocial underpinnings of trauma and trauma spectrum disorders; issues in diagnosis, assessment, and intervention from a culturally diverse framework; and a synthesis of best practices as they are currently evolving. Using a developmental and systemic approach, the course provides a counseling perspective on the knowledge base from the multiple disciplines that contribute to the field of traumatology.

CNSL 6175. Living and Dying: A Counseling Perspective. 3 Credits.

Survey of fundamental psychosocial issues surrounding grief, loss, and life-threatening illness. Topics include AIDS, suicide, multiple loss, caregiver's grief, spirituality, and cross-cultural issues.

CNSL 6177. Spirituality and Loss. 3 Credits.

Exploration of how spiritual beliefs, faith traditions, and life philosophy affect the process of dying, bereavement, and grieving. Effective counseling approaches.

CNSL 6179. Children and Loss. 3 Credits.

The process of grief, loss, and death as experienced by children and adolescents from theoretical, moral, spiritual, and developmental perspectives. Development of effective and sensitive skills and competencies to meet the needs of children and their families as they face life-challenging transitions.

CNSL 6185. Internship in Counseling. 3 Credits.

First part of a two-semester clinical experience for degree and certificate candidates in counseling. Includes 100 hours of supervised practicum in a counseling setting.

CNSL 6186. Advanced Internship in Counseling. 3 Credits.

Second part of a two-semester clinical experience for degree and certificate candidates in counseling. Includes 600 hours of supervised counseling experience in a counseling setting. Prerequisite: CNSL 6185.

CNSL 6188. Systems in Career Counseling Development. 3 Credits.

The complex role of systems in career counseling and development. Class and work experience in the areas of career assessment, computerized career planning, and the design and evaluation of career counseling systems.

CNSL 6189. Career Development and the Contemporary Workforce. 3 Credits.

Through case studies, simulations, and group work, the demographics and challenges of the workforce in the United States are examined. The knowledge, skills, and competencies necessary to respond to current trends and projected changes in the global workforce.

CNSL 6190. Advanced Career Counseling. 3 Credits.

Expansion of career development theory, concepts, and practice: the helping relationship, delivery systems, current market and economic information, and available resources. Prerequisite: CNSL 6155 (for counseling majors); permission of instructor is required for others. Material fee.

CNSL 6268. Foundations of Clinical Mental Health Counseling. 3 Credits.

Description of community counseling settings, problems clients present, and a consideration of appropriate intervention strategies.

CNSL 6269. Practicum I in Counseling. 3 Credits.

First in a two-semester clinical experience. Working with clients in the practicum clinic, agency, or school setting under intensive supervision from faculty, developing the therapeutic relationship and basic counseling competencies. Six to eight hours of work per week are required for a minimum of 100 hours total over two practica. Prerequisites: CNSL 6151, CNSL 6153, CNSL 6154, CNSL 6157, CNSL 6163, CNSL 6173, CNSL 6174, CNSL 6268, EDUC 6115 and HDEV 6108.

CNSL 6270. Practicum II in Counseling. 3 Credits.

Second in a two-semester clinical experience. Working with clients in the practicum clinic, agency, or school setting under intensive supervision, developing therapeutic relationship and basic counseling competencies. Six to eight hours of work per week are required for a minimum of 100 hours total over two practica. Prerequisite: CNSL 6269.

CNSL 6376. Foundations/Practicum: Rehabilitation and Case Management. 3 Credits.

Survey of history, philosophy, basic principles, legislation, roles, and services.

CNSL 6378. Disability Management and Psychosocial Rehabilitation. 3 Credits.

Disability management services; psychosocial aspects of disability; rehabilitation services for persons with psychiatric disabilities.

CNSL 6380. Job Placement and Supported Employment. 3 Credits.

Job development and modification: placement of persons with disabilities.

CNSL 6381. Medical and Psychosocial Aspects of Disabilities. 3 Credits.

Chronic and traumatic disorders with rehabilitation and psychosocial implications.

CNSL 6395. Foundations of Forensic Rehabilitation Counseling I. 3 Credits.

Overview of the roles and functions of professionals who provide forensic rehabilitation services in matters of litigation. Vocational assessments, labor market issues, transferable skills analysis, job analyses. Instruments utilized in forensic rehabilitation.

CNSL 6396. Foundations of Forensic Rehabilitation Counseling II. 3 Credits.

Workers' compensation, personal injury, medical/professional malpractice, catastrophic injury, loss of earnings capacity, and life care planning. Ethical standards, practices, federal court rules, and common situations found in the litigation process.

CNSL 6397. Law and the Rehabilitation Consultant. 3 Credits.

Overview of law and court procedures for forensic rehabilitation professionals. Qualification of forensic experts, roles and functions of expert witnesses, discovery, work product, hearsay, direct and cross-examination, admissibility of evidence, and opinions in state and federal venues.

CNSL 6398. Psychopharmacology. 3 Credits.**CNSL 6466. Foundations of School Counseling K-12. 3 Credits.**

Study of the environmental and specialty elements for school counseling, with special attention to the principles and practices of school counseling.

CNSL 8100. Special Workshop. 1-12 Credits.

Topics to be announced in the Schedule of Classes. May be repeated for credit.

CNSL 8101. Research and Independent Study. 1-3 Credits.

Guided individual research. Program and conferences arranged with an instructor.

CNSL 8244. Advanced Group Counseling. 3-6 Credits.

A post-master's course on interpersonal process groups, with didactic, experiential, and supervisory components. Prerequisites: CNSL 6161 and permission of the instructor.

CNSL 8251. Advanced Psychopathology and Pharmacology. 3 Credits.

In-depth study of psychopathology and standard pharmacological intervention to psychological dysfunction associated with distress or impaired functioning; the range of child, adolescent, and adult presentations of psychological disorders seen in clinical practice.

CNSL 8252. Leadership and Advocacy in Counseling. 3 Credits.

Exploration of leadership styles as they apply to counseling professionals. Ethical and multicultural issues associated with leadership and advocacy will be presented, consultation models will be introduced.

CNSL 8253. Work, Identity, and Adult Development. 3 Credits.

The influence of work on identity, intellectual and personality development, and other developmental attributes. Same as HDEV 8253/HOL 8742.

CNSL 8254. Advanced Multicultural Counseling. 3 Credits.

Recent research addressing key aspects of multicultural counseling. Practical knowledge about effective skills practice in the provision of services to clients from different cultural backgrounds, with emphasis on experiential and cognitive/behavioral approaches. Permission of the instructor required prior to enrollment. Prerequisite: CNSL 6163. Recommended background: PhD degree student in the field of counseling; completed a master's degree in counseling.

CNSL 8255. Supervision in Counseling. 3 Credits.

Theory and practice of clinical supervision and consultation for preparation to enter supervisory positions in the field of counselor education. Current thinking regarding supervisory theory/models, practice, research, and ethics. Permission of the instructor required prior to enrollment. Restricted to students in the PhD in counseling program.

CNSL 8256. Doctoral Practicum in Counseling. 3 Credits.

Supervised clinical experiences in applied settings. Students receive University-based supervision related to their cases through group supervision and case presentations.

CNSL 8257. Doctoral Internship in Teaching. 3 Credits.

Minimum 300 clock hours of supervised didactic and experiential learning activities relevant to instructional roles and responsibilities in counselor education.

CNSL 8258. Advanced Theories of Counseling. 3 Credits.

Current research on counseling and psychotherapy process and outcome; critical analysis of theory with applications for practice and research. For EdS and PhD degree candidates in the field of counseling. Permission of the instructor required prior to enrollment.

CNSL 8259. Doctoral Internship in Supervision I. 3 Credits.

Doctoral internship.

CNSL 8260. Doctoral Internship in Supervision II. 3 Credits.

Doctoral internship. Prerequisite: CNSL 8259.

CNSL 8961. Doctoral Internship in Research. 3 Credits.

Critical approach to reading research; practical experience in applied research design; integration of theoretical, research, and applied elements of the profession of counseling.

CNSL 8998. Predissertation Seminar. 3 Credits.

Required of all doctor of philosophy in the field of counseling degree candidates.

CNSL 8999. Dissertation Research. 3,6 Credits.

. Prerequisites: CNSL 8998 or EDUC 8998.

CURRICULUM AND PEDAGOGY (CPED)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CPED 0920. Continuing Research - Masters. 1 Credit.

CPED 0940. Continuing Research - Doctoral. 1 Credit.

CPED 6100. Special Topics. 1-12 Credits.

Topics and fees announced in the Schedule of Classes.

CPED 6100W. Special Topics. 1-12 Credits.

Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CPED 6101. Research and Independent Study. 1-3 Credits.

Individual research under the guidance of a staff member; program and conferences arranged with an instructor.

CPED 6131. Teaching Jewish History to Middle and High School Students. 3 Credits.

Concepts for educators surrounding the ways in which Jewish historians interpret primary sources and analyze historiographic debates.

CPED 6132. Strategies for Teaching Biblical Texts. 3 Credits.

Analysis of major biblical narratives using study methods ranging from the historical to the literary; key aspects of biblical interpretation and strategies for teaching Bible effectively.

CPED 6133. Rabbinic Judaism and the Teaching of Rabbinic Texts. 3 Credits.

The development of rabbinic Judaism through a study of its thought and literature using primary texts from 100 to 500 C.E.; best practices for teaching rabbinic texts using different pedagogical approaches; distinctions between a historically-based academic approach and a more imaginative, theological approach.

CPED 6134. Practicum in Jewish Education. 2 Credits.

Field-based experiences and weekly seminar for students seeking to teach in classrooms dedicated to Jewish education; honing disciplinary expertise in the curriculum; lesson planning, instructional strategies, classroom management and intervention, and new methods and tools.

CPED 6172. Strategies for Inclusion: Addressing the Needs of Diverse Learners. 3 Credits.

Strategies by which teachers can more effectively assume the responsibility to serve all children in an inclusionary setting, including those who are second language learners and students with disabilities. Same as SPED 6272.

CPED 6175. The Culturally and Linguistically Diverse Student with Special Needs: Policy, Research, and Trends. 3 Credits.

Educational service delivery for the culturally and linguistically diverse student. National, state, and local policies; current research in bilingual education, special education, and bilingual special education. Material fee. Same as SPED 6275.

CPED 6176. Academic and Psychosocial Assessment of the Culturally and Linguistically Diverse Student. 3 Credits.

Issues in academic and psychosocial assessment of second language learners. The impact of second language acquisition and culture on the assessment process; differentiation between language difference and disability; IEP development; the use of interpreters and translators; the involvement of family and communities; standardized and alternative assessments; and legislative mandates. Material fee. Same as SPED 6276.

CPED 6199. Federal Education Policy Institute. 3 Credits.

The federal role in education policymaking in the context of national, state, and local efforts to create school environments for effective learning and the promotion of social and emotional health in children and youth. Same as SPED 6299.

CPED 6221. Developmental Reading: Emergent Literacy. 3 Credits.

The components of a balanced literacy program for emergent, beginning, and early-instructional-level readers. Incorporation of phonological awareness, phonics, fluency, reading comprehension, and writing lessons into a balanced reading-literacy program.

CPED 6223. Interdisciplinary Elementary School Literacies. 3 Credits.

Theory and practice of interdisciplinary elementary school studied in the context of the interactions between the domain-specific and strategic processes involved in teaching and learning from printed text and other media in science, literature, mathematics, social studies, and the arts.

CPED 6224. Diagnostic Teaching of Reading: K-6. 3 Credits.

Collection of diagnostic data; construction of informal traditional and non-traditional reading and writing tests; other instruments of evaluation; selecting and planning activities suitable to specific problems. Prerequisite: at least one previous course in reading.

CPED 6225. Introduction to International Curricula. 3 Credits.

CPED 6229. Current Issues in Elementary Education. 3 Credits.

Identification, definition, and analysis of some of the most important problems facing the contemporary American elementary school.

CPED 6236. Analysis of Teaching. 3 Credits.

Teaching viewed as a system; component aspects are examined with a view toward developing a critical method of analysis. Material fee.

CPED 6239. Practicum in Curriculum and Instruction. 3-6 Credits.

Supervised field experience in curriculum and instruction. Permission of the instructor required prior to enrollment.

CPED 6289. New Literacies Coach and Reading Specialist. 3 Credits.

Contemporary issues and conditions influencing literacy/reading leadership roles and the expanded roles of the new literacy reading coach and reading specialist. Topics include designing and evaluating interdisciplinary literacy education environments. Students work with educators on instructional and professional development activities to meet the literacy education needs of children. Prerequisites: CPED 6224 and permission of the department.

CPED 6292. Practicum 2: Leadership in Interdisciplinary Literacies. 3-6 Credits.

Drawing on prior program experiences in leadership and interdisciplinary literacies, students develop and refine effective interdisciplinary literacy education leadership qualities and skills, facilitate change in school communities, and foster teacher growth and student achievement. Students demonstrate lessons and provide assistance with lesson planning to teachers in, across, and between subject area disciplines and conduct professional development workshops in school settings. Prerequisite: CPED 6289.

CPED 6305. Foundations of Curriculum Theory. 3 Credits.

Examination of the educational ideas of individuals and groups that have influenced American and international curriculum development and practice during the 20th and 21st centuries. Comparisons of the issues, models, and principles that have guided curricular thought, development, and innovation.

CPED 6339. Teachers as Researchers. 3 Credits.

Qualitative and quantitative methods of research in teaching and learning with a focus on practitioner-based research. Prepares teachers to develop an inquiry stance towards their practice and provides them with the knowledge, experiences, and skills to systematically examine their own practice and student learning.

CPED 6340. Teacher Leadership in Education. 3 Credits.

From the perspectives of educational theory and practice, the ideals and realities of contemporary public school teaching are viewed within a system of local, state, and federal organizations, with the goal of enhancing the role of teachers as knowledgeable and effective leaders in their profession. Material fee.

CPED 6353. Post-Master's Internship in Curriculum and Instruction. 3-6 Credits.

Supervised professional internship in curriculum, instruction, teaching, research, or policymaking. Internships are individually arranged. (Same as SPED 8353).

CPED 6365. Perspectives and Research in Teaching Computer Science. 3 Credits.

CPED 6366. Perspectives and Research in Teaching English. 3 Credits.

The teaching of English in the context of the social and historical foundations of education and through conceptual frameworks from contemporary curriculum theory.

CPED 6367. Perspectives and Research in Teaching Science. 3 Credits.

Significant trends, findings, and perspectives in science education in the United States from the early nineteenth century to the present.

CPED 6368. Perspectives and Research in Teaching Social Studies. 3 Credits.

Deepens students' understanding of the social studies curriculum through analysis of current research, theory, and practice, and application of this knowledge to instructional planning.

CPED 6370. Perspectives and Research in Teaching Mathematics. 3 Credits.

Survey of the history of mathematics, mathematics education research, instructional design, and the teaching of science, technology, engineering, and mathematics (STEM) curriculum standards. The impact of history in the field and research on teaching.

CPED 6410. Reading Children's Literature across the Curriculum. 2,3 Credits.

Participants read and analyze multicultural children's literature (from folktale to nonfiction) while simultaneously practicing discussion, dramatization, art, and writing response strategies suitable for involving all students and integrating literature across the school curriculum.

CPED 6412. Elementary School Curriculum and Methods. 2 Credits.

A comprehensive block course with sections in mathematics, science, language arts, and social studies. Integrated with CPED 6635. Pre-service teachers taking the four sections learn to be successful teachers of elementary methods in all content areas, including how to incorporate content and pedagogy into practice at their internships. May be repeated for up to 8 credits; with permission, up to four blocks (to a total of 8 credits) may be taken in one semester. Permission of the advisor required prior to enrollment.

CPED 6507. Instructional Models and Classroom Management. 3 Credits.

The interconnections between effective instruction and positive classroom management. Through planning, implementing, and evaluating learning activities that apply research-based practices, students link instructional and management strategies to specific content and thinking goals. Microteaching lab. Material fee.

CPED 6530. Assessment in the Secondary Classroom. 3 Credits.

Key concepts and principles in the field of educational assessment, with emphasis on practical applications for classroom teachers. Students design and evaluate a range of assessment tools in their content areas.

CPED 6532. Professional Internship in Middle School Education. 3-6 Credits.

Supervised internship in middle schools; required seminar. Restricted to permission from instructor.

CPED 6534. Professional Internship in Secondary Education. 0-6 Credits.

Internship seminar providing various means of support related to the field placement and program portfolio, as well as a forum for engaging in academic conversation around the field experiences. Fee applies.

CPED 6544. Educational Technology and Computer Literacy Methods. 3 Credits.

Computers and related technologies in educational settings. Using national technology standards for teachers as a framework, the course combines discussion of key issues related to technology in education, demonstration of technology-related instructional methods, and hands-on computer use and materials development. Material fee.

CPED 6545. Teaching Computer Science in Secondary Schools. 3 Credits.

Theoretical, curricular, and practical considerations. Thirty hours of field experience in a secondary classroom is required. Material fee.

CPED 6546. Teaching English in Secondary Schools. 3 Credits.

Offers theoretical, curricular, and practical considerations for teaching the content area concerned. Requires a 30-hour field experience in a secondary classroom. Material fee. Prerequisites: CPED 6606 and CPED 6507 and the approved certification coursework in the content area.

CPED 6547. Teaching Science in Secondary Schools. 3 Credits.

Offers theoretical, curricular, and practical considerations for teaching the content area concerned. Requires a 30-hour field experience in a secondary classroom. Material fee. Prerequisites: CPED 6606 and CPED 6507 and the approved certification coursework in the content area.

CPED 6548. Teaching Social Studies in Secondary Schools. 3 Credits.

Theoretical, curricular, and practical considerations. 30-hour field experience in a secondary classroom is required. Material fee. Prerequisites: CPED 6507 and CPED 6606.

CPED 6549. Teaching Art in Secondary Schools. 3 Credits.

Theoretical, curricular, and practical considerations. Material fee.

CPED 6550. Teaching Mathematics in Secondary Schools. 3 Credits.

Introductory course in mathematics teaching that derives its goals from pedagogy standards for secondary mathematics developed in collaboration with the National Council of Teachers of Mathematics (NCTM). Focus on developing and understanding middle and high school curriculum standards. Material fee.

CPED 6551. Second Language Instructional Methods. 3 Credits.

Knowledge and skills related to the instruction and assessment of language students in English and foreign language settings; past second language teaching methods, contemporary instructional approaches and materials, and other considerations in developing academic and social language proficiency. Requires field experience in a classroom. Materials fee. Prerequisites: CPED 6507 and CPED 6606.

CPED 6554. Issues, Study, and Practices - ESL. 3 Credits.

A critical review of scholarship and research findings in English as a second language. Major policy issues and implications that relate to ESL practice.

CPED 6555. Educating Language Minorities. 3 Credits.

A study of federal, state, and local policies and issues affecting the education of linguistically diverse populations. Resources for use with specific linguistically diverse groups.

CPED 6556. Linguistic Applications in English as a Second Language. 3 Credits.

The science of language and how its different branches may be used for English as a Second Language (ESL) teacher training, classroom instruction, material development, evaluation, research, and policy development.

CPED 6557. Second Language Acquisition. 3 Credits.

The nature of first and second language acquisition and development; social, psychological, and linguistic factors affecting language acquisition; implications of language acquisition research and theory on English and foreign language classroom instruction.

CPED 6604. Perspectives in American Education. 3 Credits.

Historical and social development of education in the United States; evolution of American education related to the growth of the nation and the changing social order; examination of selected issues in contemporary education.

CPED 6606. Theories of Learning and Development. 3 Credits.

A comprehensive investigation of the complex relationship between teaching and learning. How learning takes place, how it is motivated, and how it is influenced. Material fee.

CPED 6608. Development and Diversity. 3 Credits.

Student diversity in relation to theories of human growth and development. Diverse student strengths and needs; the special needs population; dynamics of inclusion; and intercultural issues related to the teaching/learning process. Material fee.

CPED 6622. Foundations of Reading Development. 3 Credits.

Theories of printed text reading acquisition and development; strategic processes of teaching and learning from printed texts; linguistic, cognitive, developmental, sociocultural, and affective dimensions and models of reading; design and implementation of meaningful reading instruction.

CPED 6623. Foundations of Reading Development. 2 Credits.

Basic theories and processes of reading acquisition and assessment; linguistic, cognitive, developmental, social, and affective bases of reading; influences of media, instructional strategies, including formal and informal assessment. Design and implementation of instruction in critical literacy.

CPED 6624. Foundations and Research of Literacy and Reading Education. 3 Credits.

Study of the scholarship on foundational and new literacy knowledge, concepts, and practices. Topics include models of literacy, theories and relations of multimodal and printed text reading (e.g., linguistic, psychological, and sociocultural), and the uses of these theories for the teaching and learning of literacies.

CPED 6626. Practicum 1: Reading Diagnosis, Assessment, and Solutions. 3 Credits.

Candidates learn advanced diagnostic and assessment procedures to determine specific difficulties associated with printed-text reading, generate diagnostic profiles, and make instructional recommendations. Data are collected from children who struggle with printed texts; and, from those data, case studies are developed with implications for instruction.

CPED 6627. Teaching Second Language Reading and Writing. 3 Credits.

Literacy development for language learners; theories of literacy development in a second or foreign language, strengths and needs of language learners, reading and writing instructional strategies for language and content classrooms. Appropriate for students interested in teaching ESL, foreign languages, or content areas in elementary or secondary schools. Materials fee.

CPED 6628. Literacies in Informal Learning Environments. 3 Credits.

How culture, language, and out-of-school literacy experiences, particularly those in museums, influence attitude, learning, affective and interdisciplinary knowledge, and teaching practices. New literacy research, curriculum, and literature, and how social and cultural factors contribute to the literacies of everyday life.

CPED 6635. Professional Internship in Elementary Education. 3-6 Credits.

Supervised internship; required seminar. Permission of the instructor required prior to enrollment. Material fee.

CPED 6691. Interdisciplinary Adolescent Literacies. 3 Credits.

Theory and practice of interdisciplinary adolescent literacies studied in the context of the interactions between the domain-specific and strategic processes involved in teaching and learning from printed text and other media in science, literature, mathematics, social studies, and the arts.

CPED 6701. Arts in the STEM Curriculum. 3 Credits.

In-depth coverage of approaches to integrating arts and design into STEM curricula ("STEAM") for student learning; criteria and approaches for assessing student learning in arts-integrated STEM curricula; building a culture of craftsmanship; and collaborating with arts and design professionals.

CPED 6702. Integrating Engineering in the Math and Science Classroom. 3 Credits.

Approaches to integrating engineering and design into K-12 math and science classrooms. Students develop competencies by engaging in various forms of engineering and design, from small "design challenges" to more complex, semester-long engineering projects.

CPED 6703. Advanced STEM Teaching Methods. 3 Credits.

Advanced approaches for integrating science, technology, engineering, and mathematics into the K-12 classroom.

CPED 8100. Special Topics. 1-12 Credits.

Topics and fees announced in the Schedule of Classes.

CPED 8101. Research and Independent Study. 1-3 Credits.

Individual research under guidance of a faculty member. Program and conferences arranged with an instructor.

CPED 8199. Federal Education Policy Institute. 3 Credits.

.

CPED 8309. Supervising Preservice Clinical Experience. 1-3 Credits.

CPED 8325. Curriculum Theory. 3 Credits.

History and development of the field of curriculum studies; theoretical perspectives on curriculum and the nature and purposes of curriculum research, development, and theorizing.

CPED 8330. Foundations of Education Research in Curriculum and Instruction. 3 Credits.

Works that have influenced twenty-first century curriculum and instruction: post-positivism, constructivism, critical theory, and post-structuralism/new materialism.

CPED 8331. Seminar in Instruction. 3 Credits.

Analysis of alternative models of instruction and the factors that influence the instructional process in schools. Connections among learning, instructional theory, research, and practice. Material fee.

CPED 8332. Search of the Literature in Curriculum and Instruction. 3 Credits.

Analysis of types of literature reviews in the field of curriculum and instruction and development of a literature review; the relationship of theory building to review of literature, and how research questions arise from extant theory and related literature. For doctoral students in curriculum and instruction, to precede CPED 8998. Material fee.

CPED 8333. School Reform through Professional Development. 3 Credits.

Fundamental perspectives of school reform through professional development of educators (K-12); evolution of contemporary professional development models and trends: examination of interactive modules using selected professional development activities. Material fee.

CPED 8334. Seminar in Learning. 3 Credits.

Theories and processes for making claims about learning.

CPED 8335. Seminar in Research in Curriculum and Instruction II. 0-3 Credits.

Students develop research skills in curriculum and instruction; create an individual, unique, and focused research study that is feasible for a doctoral student to accomplish; and learn skills and strategies for writing a research proposal. Prerequisite: CPED 8334.

CPED 8340. Education Policy, Reform, and Teacher Leadership. 3 Credits.

This online course engages students in the study of education policies and reforms that specifically focus on teaching and teachers. Further, this course examines teacher leadership as it impacts school reform through professional development initiatives that sustain change efforts. Four areas of study ground the focus of this course: education policy, change theories and school reform, teacher leadership, and professional development. Restricted to doctoral students; permission of the instructor required for master's students.

CPED 8341. Evaluation in Curriculum and Instruction. 3 Credits.

This course teaches doctoral and master's students about evaluating curriculum and instruction related programs, projects, or policies. This course provides students with the theoretical grounding and practical experiences they need to develop and implement evaluation research. Students in the course are required to: 1) read current literature that covers the breadth of theories and models applied in the field of evaluation, 2) participate in live online discussions and instructor presentations and, 3) design, implement and report on a targeted evaluation of a curriculum and instruction related program, project or policy. Restricted to doctoral students; master's students with approval of instructor.

CPED 8354. Doctoral Internship: Teacher Education. 3-6 Credits.

Supervised professional internship in college teaching, administration, supervision, research, policymaking, or private agency function. Permission of the advisor required prior to enrollment.

CPED 8998. Doctoral Seminar in Curriculum and Instruction. 3-6 Credits.

Review of literature; preparation of a dissertation proposal and a manuscript of publishable quality. Permission of the instructor and major advisor required prior to enrollment. Material fee.

CPED 8999. Dissertation Research. 3-6 Credits.

Prerequisite: CPED 8998.

DATA SCIENCE (DATS)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

DATS 6101. Introduction to Data Science. 3 Credits.

Basic techniques of data science. Algorithms for data mining, basics of statistical modeling, and concepts, abstractions, and practical techniques.

DATS 6102. Data Warehousing. 3 Credits.

Fundamentals and practical applications of data warehousing, including planning requirements, infrastructure, design, and maintenance. Prerequisites: STAT 2118 or permission of the instructor. Recommended background: An undergraduate degree with a strong background in science, mathematics, or statistics.

DATS 6103. Introduction to Data Mining. 3 Credits.

Concepts, principles, and techniques related to data mining; strengths and limitations of various data mining techniques, including classification, association analysis, and cluster analysis.

DATS 6201. Numerical Linear Algebra and Optimization. 3 Credits.

Linear and quadratic programming, nonlinear equations, global and unconstrained optimization, and general linearly and nonlinearly constrained optimization as used in data science. Restricted to students in the MS in data science program or with the permission of the instructor. Prerequisites: MATH 2184 or MATH 2185. Recommended background: An undergraduate degree with a strong foundation in science, mathematics, or statistics.

DATS 6202. Machine Learning I: Algorithm Analysis. 3 Credits.

Practical approach to fundamentals of algorithm design associated with machine learning; techniques of statistical and probability theory, combinatorial optimization, and factor graph and graph ensemble as used in machine learning. Prerequisites: DATS 6101 and DATS 6103.

DATS 6203. Machine Learning II: Data Analysis. 3 Credits.

This course is a practical approach to fundamentals of machine learning with an emphasis on data analysis; i.e., how to extract useful information from different datasets. Topics include linear models, error and noise, training and testing methods, and generalization as used in machine learning. Restricted to Designed primarily for students in the Data Science program, however other students with appropriate backgrounds can register for the course with permission of the instructor. Prerequisite: DATS 6101. Recommended background: An undergraduate degree with a strong background in science, mathematics, or statistics.

DATS 6401. Visualization of Complex Data. 3 Credits.

This course is a practical approach to fundamentals of data visualization specifically for data science professional. It covers all significant topics, including graphics, discrete and continuous variables, clustering and classification. Restricted to candidates for the MS or graduate certificate in data science; permission of the instructor may be substituted. Prerequisites: DATS 6101, DATS 6102, and DATS 6103.

DATS 6402. High Performance Computing and Parallel Computing. 3 Credits.

Practical approach to high performance computing specifically for the data science professional. Topics such as parallel architectures and software systems, and parallel programming. Restricted to students in the MS or graduate certificate in data science programs or with permission of the instructor. Prerequisites: DATS 6101, DATS 6102 and DATS 6103.

DATS 6450. Topics in Data Science. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. See department for more details. Restricted to students in the master's and graduate certificate in data science programs. Restricted to students in the master's and graduate certificate programs in data science. Prerequisites: DATS 6101 or permission of the instructor.

DATS 6499. Data Science Applied Research. 3 Credits.

Students conduct research projects under the supervision of the instructor. Project topics build on the knowledge and skills acquired during the data science program. Permission of the instructor required prior to enrollment.

DATS 6501. Data Science Capstone. 3 Credits.

Practical application of the knowledge and skills acquired during the master's program. Capstone team projects are chosen in consultation with the instructor. In addition to the specific prerequisite courses, completion of five pre-approved data science courses is required prior to enrollment. Restricted to students in their final semester of the MS in data science program. Prerequisites: DATS 6101, DATS 6102 and DATS 6103.

DATS 6810. Hot Topics in Big Data Analytics. 3 Credits.

This course will enhance students' big-data analysis and statistical skills, and is aimed at upper-level undergraduate and graduate students from the physical, biological and social sciences. In addition to overviewing standard tools using R, it will expose students to current thinking about real data, analysis and modeling in our 'non-normal' world where distributions are fat-tailed rather than approximately normal, and where processes are bursty rather than approximately Poisson. Its cross-disciplinary approach will also help address the likely challenge facing next-generation researchers and employees, to 'understand' real-world data not only through statistical tests, but also by building generative simulations (e.g. in C) that reproduce the statistical stylized facts of real-world data sets. Other topics to be discussed include networks, machine-learning, as well as web-scraping of data – e.g. from social media sources. Restricted to Graduate and advance undergraduate students with permission of the instructor. Prerequisite: MATH 2184. Recommended background: Competency in single-variable calculus; MATH 2233 would be beneficial but is not strictly necessary. (Same as PHYS 6810).

DECISION SCIENCES (DNSC)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

DNSC 1001. Business Analytics I: Statistics for Descriptive and Predictive Analytics. 3 Credits.

Foundations of probability and statistical methodologies used in business analytics; probability laws, probability models, univariate and bivariate models and their applications, sampling, hypothesis testing, contingency table analysis, simple and multiple linear regression models.

DNSC 2001. Business Analytics II: Predictive and Prescriptive Analytics. 3 Credits.

Builds on the foundations of probability and statistical methodologies covered in DNSC 1001. Categorical data analysis; design of experiments and analysis of variants (ANOVA); multiple regression; parameter estimation and testing; residual analysis; indicator variables; model selection procedures; logistic regression; and applications of optimization models. Prerequisites: DNSC 1001 or STAT 1051 or STAT 1053 or STAT 1111.

DNSC 3401. Introduction to Business Analytics. 3 Credits.

Fundamentals of business analytics: what information it provides, how and when that information is used, and how it affects decision making. Working with uncertainty; understanding the dynamic nature of decision making; using data, regardless of its size; and making decisions with incomplete data. The simulation of real-life scenarios to support optimal decision making. Prerequisites: APSC 3115 or STAT 1051 or STAT 1053 or STAT 1111.

DNSC 3402. Data Mining. 3 Credits.

The practice of exploring and discovering actionable business intelligence from large amounts of data; concepts, methods, and tools; supervised and unsupervised data mining techniques for discovering relationships in large data sets and building predictive models; regression models, decision trees, neural networks, clustering, and association analysis. Prerequisites: APSC 3115 or STAT 1051 or STAT 1053 or STAT 1111; Math 1231 or Math 1252.

DNSC 3403. Decision Models. 3 Credits.

Designing and developing decision models using Microsoft Excel and specialized decision support add-ins; interpreting the models' outputs. Equivalent courses may be substituted for the prerequisites. Prerequisites: DNSC 2001 or STAT 2112 or STAT 2118 or ECON 2123 or STAT 2123.

DNSC 4211. Programming for Analytics. 3 Credits.

Handling and preparing data for business analytics; descriptive, predictive and prescriptive analytics; creating data stories in collaboration with and for end users and information consumers; scripting, publishing, and collaborating for data products. Prerequisites: DNSC 1001 and DNSC 2001. Recommended background: Some prior knowledge of a programming.

DNSC 4279. Data Mining. 3 Credits.

The practice of exploring and discovering actionable business intelligence from large amounts of data. Prerequisites: DNSC 2001 or ECON 2123 or STAT 2112 or STAT 2118 or STAT 2123; and MATH 1221 or MATH 1231 or MATH 1252.

DNSC 4403. Decision Models. 3 Credits.

Design and development of decision models using spreadsheet software with decision support add-ins; interpreting decision model outputs; commonly used classes of models; decision analysis spanning business disciplines. Restricted to juniors and seniors.

DNSC 4404. Essentials of Project Management. 3 Credits.

Theoretical foundations of and practical insights into project management; the role of project management in contemporary business and government organizations; the link between projects and strategy. Project design and development.

DNSC 4900. Special Topics. 0-3 Credits.

DNSC 6201. Introduction to Business Analytics. 1.5 Credit.

An introduction to business analytic concepts, methods, and tools with concrete examples from industry applications; Big Data and the opportunities it has created for businesses to store, organize, and analyze vast amounts of information. Completion of a basic course in statistics prior to enrollment is recommended.

DNSC 6202. Statistics for Managers. 3 Credits.

Mathematical and statistical concepts employed in the solution of managerial problems. Applications of functions, elements of calculus, and linear algebra. Introduction to probability, frequency distributions, statistical inference, and regression and correlation.

DNSC 6203. Statistics for Analytics I. 1.5 Credit.

The foundations of statistical methodologies used in business analytics; statistical inference and probability models; methods of estimation, hypothesis testing, contingency table analysis, analysis of regression models and logit and probit analysis. Corequisite: DNSC 6206. Restricted to students in the MS in business analytics and graduate certificate in business analytics programs or with departmental permission.

DNSC 6206. Stochastic Foundation: Probability Models. 1.5 Credit.

Introduces the foundations of probability, along with the commonly used probability models (binomial, normal, and poisson) in predictive analytics. Restricted to students in the MS in business analytics and graduate certificate in business analytics programs or with departmental permission.

DNSC 6207. Applied Probability Models. 1.5 Credit.**DNSC 6208. Computational Optimization. 3 Credits.****DNSC 6209. Forecasting for Analytics. 1.5 Credit.**

Predictive analysis and use of blackbox models for time-series forecasting. Identifying hidden patterns and structures in the data and exploiting these for forecasting. Prerequisites: MBAD 6224 or DNSC 6202.

DNSC 6210. Decision and Risk Analytics. 1.5 Credit.

Concepts, methods, and practical tools to analyze managerial decisions involving risk and uncertainty. Restricted to students in the master of science in business analytics degree program or with program approval. Prerequisites: DNSC 6206 and DNSC 6203.

DNSC 6211. Programming for Analytics. 3 Credits.

Accessing, preparation, handling, and processing data that differ in variety, volume, and velocity. The ability to handle and process data is a core capability in the context of any analytics position in the industry. Development of a theoretical grounding in emerging paradigms like schema-less data. The programming environments typically employed include Python and R. Restricted to MSBA or GCBA. Prerequisites: MSBA or GCBA Candidacy.

DNSC 6212. Optimization Methods and Applications. 3 Credits.

Linear, network, integer, and nonlinear models and their fundamental underlying analytic concepts and solution methods; model development, formulation, solution and interpretation of results using powerful commercial software; intuitive understanding of solution methods and their underpinning theoretical paradigms for effective use of optimization models. Restricted to students in the master of science in business analytics degree program or with the permission of the instructor.

DNSC 6213. Statistics for Analytics II. 1.5 Credit.

Statistical methodologies for business analytics in real world scenarios; introduction of high-level analytical techniques such as hierarchical linear modeling and mixed-effects modeling. Restricted to students in the MS in business analytics and graduate certificate in business analytics programs or with permission of the department. Prerequisite: DNSC 6203.

DNSC 6214. Pricing and Revenue Management. 1.5 Credit.

Methodologies for addressing pricing issues; tactical optimization of pricing and capacity allocation decisions; quantitative models of consumer behavior and constrained optimization. For the prerequisites, DNSC 6206 must be taken before DNSC 6203. Prerequisites: DNSC 6206 and DNSC 6203; and DNSC 6202 or MBAD 6224.

DNSC 6215. Social Network Analytics. 1.5 Credit.

Concepts, methods, and applications of network science; analyzing real networks and related phenomena such as organizational analysis, social power, fraud detection, and disease propagation. For the prerequisites, DNSC 6206 must be taken before DNSC 6203. Prerequisites: DNSC 6206 and DNSC 6203; and DNSC 6202 or MBAD 6224. Recommended background: Prior exposure to Python and R scripts.

DNSC 6216. Business Analytics Skills Workshops. 0-1.5 Credits.

Practical workshop designed to develop the student's application-related skills for the analytics realm. Programming skills, computing environments (e.g. cloud or enterprise computing), and data ethics and security. Restricted to students in the master of science in business analytics degree program.

DNSC 6217. Business Analytics Practicum. 1.5 Credit.

Working in small teams, students apply their analytics skills to projects sponsored by public or private institutions. Each team is advised by a faculty member, and the practicum sponsor designates a mentor to provide guidance to the team for the duration of the project. Prerequisite: MSBA degree candidacy.

DNSC 6219. Time Series Forecasting for Analytics. 3 Credits.

Predictive analysis and blackbox models for time series and econometric forecasting; identifying hidden patterns and structures in the univariate and multivariate time series data and exploiting these for forecasting; use of SAS to apply different forecasting models and methodologies to real life time-series data. For the prerequisites, DNSC 6206 must be taken before DNSC 6203. Restricted to students in the master of science in business analytics degree program or with the permission of the department. Prerequisites: DNSC 6206 and DNSC 6203; and DNSC 6202 or MBAD 6224.

DNSC 6225. Business Process Simulation. 1.5 Credit.

Introduction to the approaches and issues involved in business process design; basic tools used to analyze and improve processes; process modelings using a powerful discrete-event simulation tool. If DNSC 6206 and DNSC 6203 are taken as prerequisites, they must be completed in that order. Prerequisites: DNSC 6206 and DNSC 6203; or DNSC 6202 or MBAD 6224.

DNSC 6230. Management of Technology Innovation. 3 Credits.

.

DNSC 6231. Consulting for Analytics. 1.5 Credit.

Practical tools used by analysts and managing analysts, within an organization or for an external consulting-focused organization, for integrating analytical skills into problem solving. Prerequisites: DNSC 6203, or DNSC 6206 or DNSC 6211.

DNSC 6233. Social Network Analysis for Managers. 3 Credits.

Concepts, theories, and applications associated with network data; concepts at micro, meso, and macro levels, including connectedness, homophily, transitivity, and clustering. Power, roles, social position, and social capital.

DNSC 6234. Procurement and Contracting. 3 Credits.

Principles and concepts essential to effecting large procurement programs. Planning, sourcing, and contractual design for diverse acquisitions. Emphasis on federal government policy with comparison of buying at other governmental levels and the private sector.

DNSC 6235. Communication Strategies in Project Management. 3 Credits.

Communication leadership and management practices that facilitate successful project management; strategies and practices related to communication, change management, and performance reporting.

DNSC 6236. Project Quality Management. 3 Credits.

Current theories and practices regarding quality management as applied to manufacturing and the service industry, the application to project systems, and the application to individual projects. Prerequisite: None.

DNSC 6237. International Project Management. 1.5 Credit.

Augments the basics of project management with theory, practice, and methodology related to global project environment; practical investigation of the cultural environment in the context of managing global projects.

DNSC 6238. Project Management and Organizational Context. 1.5 Credit.

Organizational influences on project management practices; definition and classification of organizations; organizational culture; organizational strategy; project management practices that take place during initiation, planning, execution, monitoring and controlling, and closing processes.

DNSC 6239. Project Governance. 1.5 Credit.

An overview of project governance; models, practices and case studies.

DNSC 6247. Organization, Management, and Leadership. 3 Credits.

Fundamentals of human resource management for project managers. Tools and techniques for success in managing and leading people in a project environment.

DNSC 6250. Project Management Finance. 3 Credits.

DNSC 6251. Optimization Models for Decision Making. 1.5 Credit.

Optimization modeling techniques, including linear programming, sensitivity analysis, networks, integer programming, multiple objective optimization, and nonlinear and evolutionary programming. Prerequisites: DNSC 6202 or MBAD 6224.

DNSC 6252. Risk Analysis for Decision Making. 1.5 Credit.

Probabilistic modeling techniques with spreadsheet implementation, focusing on the concept of risk and methods for its analysis; risk attitudes, risk measures, decision trees, simulation models, game theory, real options approach, and risk communication. Prerequisites: DNSC 6202 or MBAD 6224.

DNSC 6254. Risk Management. 1.5 Credit.

Basic principles of risk management practices. Developing a risk management plan, including identifying, analyzing, mitigating, and monitoring projects risks. Prerequisites: DNSC 6202 or MBAD 6224 or MBAD 6221, MBAD 6222.

DNSC 6257. Cost Estimation and Control. 1.5 Credit.

Methods of developing project estimates during the planning stages and updating the estimates throughout the life of the project; monitoring, reporting, controlling, and managing project cost; relationships between project cost and other parameters, including scope, time, quality, reliability and procurement risk. Prerequisites: DNSC 6202 or MBAD 6221, MBAD 6222 or MBAD 6224.

DNSC 6258. Executive Decision Making. 1.5 Credit.

Concepts and methods for making complex decisions in business and government; identifying objectives and alternatives, setting priorities, and making collaborative decisions.

DNSC 6259. Project Portfolio Management. 1.5 Credit.

Management of an organization's portfolio of projects for the overall success of the enterprise; alignment of projects with an organizations strategy and goals and consistency with values and culture. Prerequisites: DNSC 6202 or MBAD 6221, MBAD 6222 or MBAD 6224.

DNSC 6261. Introduction to Project and Program Management. 3 Credits.

Practical examination of how projects can be managed from start to finish, including specific emphasis on planning and controlling to avoid common pitfalls. Identifying needs, defining requirements, project costing, scheduling, resource allocation, and project politics.

DNSC 6262. Directed Computational Project Management. 3 Credits.

Practical examination of project management concepts by quantitative application using various software tools. Research in real cost data to support project calculations. Prerequisite: DNSC 6254, DNSC 6257, DNSC 6261, DNSC 6267.

DNSC 6263. Managing External Projects. 3 Credits.

Fundamentals of contract management from a project manager's perspective. The outsourcing process, associated project strategies, and legal elements. Acquisition planning, vendor selection, contract formulation, and performance control.

DNSC 6267. Planning and Scheduling. 3 Credits.

Integrated planning, scheduling, and control systems for planning the scope of a project; optimizing time, cost, and resources; and monitoring and controlling schedules, including those for delayed projects. Prerequisites: DNSC 6202 and DNSC 6261.

DNSC 6269. Project Management Application. 3 Credits.

Students are expected to demonstrate integration of the knowledge accumulated in their study plan and apply integrated knowledge and experience to best practices, a project case history, and a handbook. Prerequisites: MSPM candidacy or permission of instructor/advisor.

DNSC 6274. Statistical Modeling and Analysis. 3 Credits.

The process of specifying, analyzing, and testing models of human and systemic behavior. Formalization of models; statistical test comparison and selection; computer implementation of univariate, bivariate, and multivariate tests. General linear model: linear regression, analysis of variance, and analysis of covariance. Prerequisite: MBAD 6221 and MBAD 6222 .

DNSC 6275. Advanced Statistical Modeling and Analysis. 3 Credits.

Advanced topics associated with the general linear model. Testing for and remediation of assumption violations. Detection of outliers, influential observations, and multicollinearity. Alternative design strategies in the analysis of variance; latent growth analysis; hierarchical linear modeling; testing for interactions and parallelism. Prerequisite: DNSC 6274 or permission of instructor.

DNSC 6276. Exploratory and Multivariate Data Analysis. 3 Credits.

Methods for exploratory and multivariate data analysis. Application and comparison of advanced multivariate analytical procedures. Multivariate and discriminant analysis, LISREL analysis, and canonical correlation. Prerequisite: DNSC 6274 or permission of instructor.

DNSC 6277. Applied Forecasting and Time-Series Analysis for Managers. 3 Credits.

Introduction to various forecasting techniques, including time-series regression models, cyclical trends, exponential smoothing methods, seasonal and nonseasonal ARIMA processes, and the Box-Jenkins approach. Application of forecasting methods in economics, finance, and marketing. Prerequisite: MBAD 6222 or permission of instructor.

DNSC 6278. Big Data Analytics. 3 Credits.

Practical workshop focusing on the use of cloud computing resources for analysis and manipulation of datasets; Hadoop ecosystem, Spark and MapReduce, and other tools. Permission of the instructor may substitute for the prerequisites. Prerequisites: DNSC 6211 and ISTM 6212. Recommended background: Understanding and experience with Linux/OSX; programming concepts; R, Python, SQL or other programming language; remote computing via ssh; shell executables; version control tools such as git/github.

DNSC 6279. Data Mining. 3 Credits.

How organizations make better use of increasing amounts of collected data and convert that data into information to support managerial decision making; data mining and data analysis methods and tools for exploring and analyzing data sets; state-of-the-art software tools for developing novel applications. Note that the prerequisite courses must be taken in the order listed. Restricted to students in the master of science in business analytics and graduate certificate in business analytics programs. Prerequisites: DNSC 6206 and DNSC 6203.

DNSC 6290. Special Topics. 0-3 Credits.

Experimental offering; new course topics and teaching methods. May be repeated once for credit.

DNSC 6298. Directed Readings and Research. 0-3 Credits.**DNSC 6300. Thesis Seminar. 3 Credits.****DNSC 6401. Sustainable Supply Chains. 1.5 Credit.**

Introduction to integrating environmental management and sustainability concepts into the operations and supply chain management fields.

DNSC 6403. Visualization for Analytics. 1.5 Credit.

Use of data visualization software technology in the context of exploratory and reporting capabilities; SAS Visual Analytics/ Statistics and other methodologies; various graphical approaches to preparing and visualizing data. Prerequisites: DNSC 6206; and DNSC 6202, or DNSC 6203 or MBAD 6224.

DNSC 6404. Sports Analytics. 1.5 Credit.

Analyzing and leveraging information throughout a sports organization; strategies for gaining competitive advantage on the field of play; player analysis; and business operations. For the prerequisites, DNSC 6206 must be taken before DNSC 6203. Prerequisites: DNSC 6206 and DNSC 6203; and DNSC 6202 or MBAD 6224.

DNSC 8328. Special Topics in Decision Making. 3 Credits.

Special topics and advanced applications, such as catastrophe theory, Markovian decision processes, and Bayesian statistics. May be repeated once for credit.

DNSC 8385. Special Topics in Research Methods. 3 Credits.

Research problems and issues related to student dissertations form topics for readings, group discussions, and assigned papers.

DNSC 8392. Computational Optimization. 3 Credits.

The description, design, and programming of efficient computational methods for large-scale optimization problems; introduction to software, optimization solvers, and programming languages used by professionals to code and model industry-size optimization problems.

DNSC 8393. Applied Stochastic Models for Business. 3 Credits.

In-depth coverage of stochastic models and their applications in business and industry; applications to marketing, call center modeling, finance, queuing systems, and operations.

DNSC 8394. Stochastic Programming. 3 Credits.

The intersection of probability theory and statistics with mathematical programming for modeling optimization problems that involve uncertainty. Basic knowledge of linear programming, elementary analysis and probability. Emphasis on algorithmic methods to solve stochastic programming instances.

DNSC 8397. Advanced Special Topics. 1-3 Credits.

Current research and scholarly issues in management science.

DNSC 8998. Advanced Readings and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

DNSC 8999. Dissertation Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

EAST ASIAN LANGUAGE AND LITERATURE (EALL)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

EALL 1075. East Asian Calligraphy. 3 Credits.

Writing of Chinese characters with traditional writing implements. No knowledge of the language required. Covers the history, aesthetics, and philosophy of East Asian scripts and calligraphy and their relationships to paintings, seal carving, and literature. Same as FA 1075.

EALL 2802. Introduction to Chinese Religions. 3 Credits.

General introduction to Chinese religions focusing on religious doctrines and institutions; religious practices, including ancestor worship, family and communal rituals, spirit possession, fengshui theories, pilgrimage, popular worship of ghosts and gods. (Same as REL 2802).

EALL 3811. Confucian Literature in East Asia. 3 Credits.

General introduction to the Confucian traditions of literature, with an emphasis on history, historical writings, popular tales, and drama in China, Japan, and Korea. (Same as REL 2811).

EALL 3814. Religion and Philosophy in East Asia. 3 Credits.

Historical introduction to the major religious and philosophical traditions in China, Japan, and Korea, with focuses on ancestor worship, shamanistic cults, Confucianism, Buddhism, Daoism, and Shinto. The interactions of common East Asian religious and philosophical traditions, how these traditions evolved over time, and the way each culture assimilates foreign elements. How the very ideas of religion and philosophy are formulated and practiced differently in East Asia from those in the Western tradition. (Same as REL 2814).

EALL 3814W. Religion and Philosophy in East Asia. 3 Credits.

General introduction to the religions and philosophical tradition of China, Japan, and Korea. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

EALL 3831. Introduction to Daoism. 3 Credits.

A general introduction to the Daoist tradition from the antiquity to contemporary times, through reading major Daoist classics, scriptures, poems, novels, and examining Daoist material cultures and bodily cultivation techniques.

EALL 3831W. Daoism in East Asia. 3 Credits.

Study of the early history of the formation and development of Daoism, its growth into an institutionalized religious organization in China, and its role in the religious and philosophical history of Japan and Korea. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Same as REL 3831).

EALL 3832. Myth, Ritual, and Popular Religion in China. 3 Credits.

Key aspects of popular religious myths, symbols, rituals, and practices in China, such as ancestor worship, spirit possession, fengshui theories, and pilgrimage. Same as REL 3832.

EALL 3881. Women, Gender, and Religion in China. 3 Credits.

Historical introduction to women and men as gendered subjects and the construction of gender and power in Chinese religions. May be taken for graduate credit with extra work assigned. Same as REL 3881/WGSS 3881. (Same as REL 3881, WGSS 3881).

EALL 4197. Independent Study. 1-3 Credits.

Departmental approval is required to register.

EALL 6811. Confucian Literature in East Asia. 3 Credits.

Introduction to Confucian literature in China and other parts of East Asia from earliest times to the present day. Various historical, philosophical, and religious dimensions of Confucian texts and practices. (Same as EALL 3811).

EALL 6831. Introduction to Daoism. 3 Credits.

General introduction to the Daoist (Taoist) Tradition in China and in East Asia. Students who take the course for graduate credit are assigned additional work. (Same as EALL 3831).

EALL 6832. Myth, Ritual, and Popular Religion in China. 3 Credits.

Popular beliefs and practices in the everyday life of China, with consideration of a variety of practices such as ancestor worship, family and communal rituals, spirit possession, fengshui theories, and pilgrimage.

EALL 6881. Women, Gender, and Religion in China. 3 Credits.

A historical introduction to the concepts of body, gender, and womanhood in Confucian, Daoist, Buddhist, and popular Chinese religious traditions. Women's roles in religious ritual and practices; the influence of Christianity and modernity. (Same as EALL 3881, REL 3881, WGSS 3881).

ECONOMICS (ECON)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ECON 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details.

ECON 1001. Principles of Mathematics for Economics. 3 Credits.

Prepares students for college instruction in principles of microeconomic and macroeconomic theory, as well as instruction in business, social science, and basic science courses that do not require knowledge of calculus. Restricted to students who have successfully completed high school algebra I and basic geometry prior to matriculation and who have taken the Assessment and Learning in Knowledge Spaces (ALEKS) placement examination at GW; No minimum ALEKS score is required for this course.

ECON 1011. Principles of Economics I. 3 Credits.

Major economic principles, institutions, and problems in contemporary life. Microeconomics—supply and demand, the price system and how it works, competitive and monopolistic markets.

ECON 1012. Principles of Economics II. 3 Credits.

Continuation of ECON 1011. Major economic principles, institutions, and problems in contemporary life. Topics in macroeconomics, including national income concepts, unemployment and inflation, institutions of monetary control. Prerequisite: ECON 1011 OR HONR 2043.

ECON 2101. Intermediate Microeconomic Theory. 3 Credits.

Analysis of household economic behavior, including derivation of demand functions. Analysis of firm behavior, including derivation of supply frameworks. Demand and supply interaction under various market structures and in factor markets. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 or HONR 2044; and MATH 1221 or MATH 1231 or MATH 1252.

ECON 2102. Intermediate Macroeconomic Theory. 3 Credits.

Investigation of the determinants of national income, inflation, unemployment, and interest rates. Alternative business cycle theories, with emphasis on the role of imperfect information, uncertainty, and expectations. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 or HONR 2044; and MATH 1221 or MATH 1231 or MATH 1252.

ECON 2103. Intermediate Microeconomic Theory: A Mathematical Approach. 3 Credits.

Analysis of household economic behavior, including derivation of demand functions, and of firm behavior, including derivation of supply frameworks; demand and supply interaction under various market structures and in factor markets; reliance on constrained and unconstrained optimization techniques when analyzing household and firm behavior. Corequisite: MATH 1232. Recommended for students pursuing the BS degree in economics. Prerequisites: ECON 1011 and ECON 1012; or HONR 2043 and HONR 2044; MATH 1221 or MATH 1231 or MATH 1252.

ECON 2104. Intermediate Macroeconomic Theory: A Mathematical Approach. 3 Credits.

Development and application of mathematical models of aggregate economic behavior with a focus on the intertemporal choices made by households, firms, and governments. Corequisite: MATH 1232. Recommended for students pursuing the BS degree in economics. Prerequisites: ECON 1011 and ECON 1012; or HONR 2043 and HONR 2044; and MATH 1221 or MATH 1231 or MATH 1252.

ECON 2121. Financial Economics. 3 Credits.

Economic analysis of key financial institutions, markets, and variables. Investigation of the performance of asset markets and the roles of money, credit, interest rates, and exchange rates. Examination of private sector institutions like equity markets and the banking system and the roles of regulators like the Federal Reserve. Credit cannot be earned for both ECON 2121 and ECON/FINA 3301. Prerequisites: ECON 1011 and ECON 1012; or HONR 2043 and HONR 2044.

ECON 2122. Monetary Theory and Policy. 3 Credits.

Analysis of classic and modern monetary theories and their application to current economic conditions. The links between theory and policy. The altered role of money over time; the new money technology. Prerequisites: ECON 1011 and ECON 1012.

ECON 2123. Introduction to Econometrics. 3 Credits.

Construction and testing of economic models: regression theory, parameter estimation, and statistical techniques applicable to economic models. Joint offering of the Departments of Economics and Statistics. Prerequisites: ECON 1011 or HONR 2043; ECON 1012 or HONR 2044; MATH 1221 or MATH 1231 or MATH 1252; and STAT 1051 or STAT 1053 or STAT 1111;. (Same as STAT 2123).

ECON 2136. Environmental and Natural Resource Economics. 3 Credits.

Analysis of a variety of environmental and natural resource problems. The economic causes of these problems, their consequences, and the relative merits of alternative policies for dealing with them. Prerequisites: ECON 1011 and ECON 1012; or HONR 2043 and HONR 2044.

ECON 2148. Survey of Health Economics. 3 Credits.

Economic analysis of the determinants of demand, supply, output, and distribution in the health care sector, with special emphasis on current policy issues of access, quality, and cost. Credit cannot be earned for both ECON 2148 and ECON 3148. Prerequisites: ECON 1011 and ECON 1012.

ECON 2151. Economic Development. 3 Credits.

Theories and empirical studies of the economic problems of developing countries. Prerequisites: ECON 1011 or HONR 2043 and ECON 1012 or HONR 2044.

ECON 2151W. Economic Development. 3 Credits.

Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: ECON 1011 and ECON 1012.

ECON 2157. Urban and Regional Economics. 3 Credits.

Analysis of the determinants of urban growth and development; firm location; the functioning of urban land and housing markets. Prerequisites: ECON 1011 and ECON 1012.

ECON 2158. Industrial Organization. 3 Credits.

Analysis of market structure, conduct, and performance of firms in a market economy, with emphasis on case studies of U.S. industries. Prerequisite: ECON 1011- ECON 1012.

ECON 2159. Government Regulation of the Economy. 3 Credits.

Economic analysis of antitrust and regulation in the American economy. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 or HONR 2044; and ECON 2101 or ECON 2103 or ECON 2158.

ECON 2160. Surv:Finance&Engineering Econ. 3 Credits.

ECON 2167. Economics of Crime. 3 Credits.

Analysis of crime, both empirical and theoretical, that examines the links between law and economics, the economics of criminal participation, and the economics of law enforcement. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 or HONR 2044.

ECON 2169. Introduction to the Economy of China. 3 Credits.

Background, organization, and operation of the economy. Appraisal of performance and analysis of problems of development. Prerequisites: ECON 1011 or HONR 2043 and ECON 1012 or HONR 2044.

ECON 2170. Introduction to the Economy of Japan. 3 Credits.

Analysis of the structure and growth of the Japanese economy. Prerequisites: ECON 1011 and ECON 1012.

ECON 2180. Survey of International Economics. 3 Credits.

Basic concepts of international trade and international finance, with emphasis on policy issues. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 or HONR 2044.

ECON 2181. International Trade Theory and Policy. 3 Credits.

The basis for international trade and the effect of trade on consumers, producers, and workers; causes and effects of the international movement of factors including foreign direct investment, outsourcing, and migration; and the impacts of trade policies and trade agreements. Credit may not be earned for both ECON 2181 and ECON 3181. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 or HONR 2044.

ECON 2182. International Macroeconomic Theory and Policy. 3 Credits.

Topics include the balance of payments, the determination of exchange rates and prices in open economies, the interaction of the exchange rate and domestic economic activity, international financial markets, and exchange rate and financial crises. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 and HONR 2044.

ECON 2185. Economic History and Problems of Latin America. 3 Credits.

Analysis of present structures and problems of Latin American economies. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 and HONR 2044.

ECON 2195W. Special Topics. 3 Credits.

Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ECON 2198. Special Topics in Economics - Regional. 3 Credits.

Topics cover individual countries or regions of the world and vary depending on current issues of interest and faculty availability. Prerequisites: ECON 1011 and ECON 1012.

ECON 2199. Special Topics in Economics. 3 Credits.

Topics vary depending on current issues of interest and faculty availability. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 or HONR 2044.

ECON 3098. Variable Topics - Regional Economics. 1-9 Credits.

.

ECON 3105. Economic Forecasting. 3 Credits.

Theory and empirical analyses of economic trends and fluctuations; use of economic indicators and simple econometric models. Prerequisites: ECON 1011 and ECON 1012; and ECON 2102 or ECON 2104; and ECON 2123.

ECON 3142. Labor Economics. 3 Credits.

Analysis of labor supply and demand; measurement and theory of unemployment; occupational choice; wage differentials; labor market issues and policies. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 and HONR 2044; and ECON 2101 or ECON 2103.

ECON 3148. Health Economics. 3 Credits.

Analysis of economic theories and applications to the demand for and supply of health care. Examination of the role of government in health care, public health, and unhealthy behavior (e.g., smoking). Credit cannot be earned for both ECON 2148 and ECON 3148. Prerequisites: ECON 2101 or ECON 2103.

ECON 3161. Public Finance: Expenditure Programs. 3 Credits.

Economic analysis of government spending and social regulation program; public goods, externalities, income transfer and social insurance programs, and benefit-cost analysis of government programs. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 or HONR 2044; and ECON 2101 or ECON 2103.

ECON 3162. Public Finance: Taxation. 3 Credits.

Economic analysis of taxes. Topics include individual and corporate income taxes, payroll taxes, sales and excise taxes, property and wealth taxes, design of tax systems, and effects of taxation on labor and capital markets. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 and HONR 2044; and ECON 2101 or ECON 2103.

ECON 3165. Economics of Human Resources. 3 Credits.

Economic analysis of education and training, labor market discrimination, marriage and the family, and social security. Prerequisites: ECON 1011 and ECON 1012; and ECON 2101 or ECON 2103.

ECON 3181. International Trade Theory. 3 Credits.

Rigorous examination of theories of international trade that explain why countries trade and their gains from trade. Theories include comparative advantage, the factor-proportions theory of trade, and recent theoretical developments. The course also deals with the theory of trade policies, such as tariffs and quotas. Credit cannot be earned for both ECON 2181 and ECON 3181. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 or HONR 2044; and ECON 2101 or ECON 2103; and MATH 1221, MATH 1231, or MATH 1252.

ECON 3190. Law and Economics. 3 Credits.

An introduction to the economic analysis of legal systems. How laws alter behavior and how laws might be designed to satisfy efficiency and fairness criteria. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 or HONR 2044; and ECON 2101 or ECON 2103.

ECON 3191. Game Theory. 3 Credits.

Introduction to game theory, covering concepts such as Nash equilibrium, evolutionary games, backward induction and subgame perfection, Bayesian-Nash games of imperfect information, adverse selection, and moral hazard. Prerequisites: ECON 1011 or HONR 2043; and ECON 1012 or HONR 2044; and ECON 2101 or ECON 2103.

ECON 3198. Advanced Topics in Economics - Regional. 3 Credits.

Topics cover individual countries or regions of the world and vary depending on current issues of interest and faculty availability. Prerequisites: Depending on the topic: ECON 2101 (or ECON 2103) or ECON 2102 (or ECON (2104) or ECON 2123.

ECON 3199. Advanced Topics in Economics. 3 Credits.

Topics vary depending on current issues of interest and faculty availability. Prerequisites: Depending on the topic: ECON 2101 (or ECON 2103) or ECON 2102 (or ECON (2104) or ECON 2123.

ECON 4198W. Proseminar in Economics. 3 Credits.

Preparation and presentation of a research paper in any field of economics agreed upon by the student and instructor. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to seniors in the economics program. Prerequisites: ECON 2101 or ECON 2103; and ECON 2102 or ECON 2104. Recommended background: Prior or concurrent enrollment in ECON 2123 or STAT 2112 or STAT 2118.

ECON 4199. Independent Research - Economics. 3 Credits.

Independent research. Prerequisites: ECON 1011 and ECON 1012; and completion of 12 credits of upper-division economics courses, including ECON 2101 or ECON 2103 and ECON 2102 or ECON 2104, with a minimum grade-point average of 3.4; and approval of an independent research project by a faculty member of the economics department.

ECON 6217. Survey of Economics I. 3 Credits.

Intermediate-level microeconomic theory for graduate students in fields other than economics.

ECON 6218. Survey of Economics II. 3 Credits.

Continuation of ECON 6217. Intermediate-level macroeconomic theory for graduate students in fields other than economics. (ECON 6217 and ECON 6218--).

ECON 6219. Managerial Economics. 3 Credits.

Intermediate microeconomic theory, with emphasis on production and costs, market structure and pricing, risk analysis, and investment theory and capital budgeting. Credit can be earned for only one of ECON 6217 or ECON 6219.

ECON 6237. Economics of the Environment and Natural Resources. 3 Credits.

Analysis of public policy problems relating to the environment and natural resources development and management. Prerequisite: ECON 6217.

ECON 6239. Economics of Defense. 3 Credits.

Economic analysis applied to national security planning and objectives. Analysis of defense establishment problems, including manpower, the defense industry base, procurement policy.

ECON 6248. Health Economics. 3 Credits.

Demand for medical care; organization of the health care delivery industry; policy issues on regulation, efficiency, and allocation of health care services.

ECON 6249. Industrial Org-TComm Industry. 3 Credits.**ECON 6250. Survey of Economic Development. 3 Credits.**

An introduction to economic problems faced by less developed countries. Emphasis on applications to policymaking and evaluation. Prerequisite: ECON 6217 or ECON 6280 or equivalent.

ECON 6255. Economics of Technological Change. 3 Credits.

Economics of research and development; innovation and growth; the role of government in the development and use of new technology.

ECON 6269. Economy of China I. 3 Credits.

Analysis of organization, operation, policies, and problems. Development of the economy since 1949.

ECON 6270. Economy of China II. 3 Credits.

Continuation of ECON 6269. Examination of critical problems of development. Prerequisites: ECON 6269 or permission of the instructor.

ECON 6271. Economy of Japan. 3 Credits.

Analysis of Japanese economic institutions and their contribution to Japan's development.

ECON 6280. Survey of International Economics. 3 Credits.

Introductory international trade and finance, primarily for students in the Elliott School. Topics include the economic effects of trade liberalization and protection, exchange rate determination, and macroeconomic policies in an open economy. Prerequisite: ECON 1011 and ECON 1012.

ECON 6283. Survey of International Trade Theory and Policy. 3 Credits.

For graduate students in fields other than economics. Survey of international economics and policy; application of comparative advantage and other arguments for trade; impact of trade on a domestic economy; new arguments for protectionism; and regional trading blocs.

ECON 6284. Survey of International Macroeconomics and Finance Theory and Policy. 3 Credits.

For graduate students in fields other than economics. Open economy macroeconomics; international finance; balance of payments accounting; exchange markets; alternative models of balance of payments determination and adjustment; behavior of flexible exchange rate systems.

ECON 6285. Economic Development of Latin America. 3 Credits.

Diversity of structures of Latin American economies; import substituting industrialization; inflation; problems of underemployment and income distribution.

ECON 6286. Economic Development of Latin America. 3 Credits.

Continuation of ECON 6285. Structure of trade; protection, exports, and economic development; regional and global economic integration; foreign investment, multinational enterprise, and technology transfer.

ECON 6290. Principles of Demography. 3 Credits.

Introduction to basic demographic perspectives and data; methods for analysis of population size, distribution, and composition; determinants and consequences of population trends. Departmental prerequisite waived. Same as GEOG 6290/ SOC 6290/ STAT 6290.

ECON 6291. Methods of Demographic Analysis. 3 Credits.

Basic methods for analysis of mortality, natality, and migration; population estimates and projections; estimation of demographic measures from incomplete data. Departmental prerequisite waived. Same as GEOG 6291/ SOC 6291/ STAT 6291.

ECON 6292. Topics in International Trade. 3 Credits.

Topics on international trade issues and policy. Primarily for master's students in programs other than economics. May be repeated for credit if topic differs.

ECON 6293. Topics in International Finance. 3 Credits.

Topics on macroeconomic issues and policies in open economies, including exchange rate regimes, determinants of international capital flows, currency crises, financial contagion, current account sustainability and sovereign crises, fiscal problems, and macro-policies in emerging markets and mature economies.

ECON 6294. Topics in Economic Development. 3 Credits.

Topics on economic development issues and policy vary depending on faculty availability and interest. Primarily for master's students in programs other than economics. May be repeated for credit if topic differs.

ECON 6295. Special Topics. 3 Credits.

Topics vary, depending on current issues of interest and faculty availability.

ECON 6298. Reading and Research. 3 Credits.

Independent research. Restricted to master's candidates.

ECON 6300. Mathematical Methods for Economics. 3 Credits.

Instruction in the mathematical background required to appreciate and understand the use of mathematics in economic analysis, including multivariable calculus, integral calculus, and linear algebra. Emphasis on techniques for solving systems of equations, unconstrained and constrained optimization, comparative static analysis, difference equations, and analysis of dynamic models and their application to a range of economic problems. Restricted to students in the MA in applied economics program.

ECON 6301. Applied Microeconomic Theory. 3 Credits.

The principal areas of microeconomic theory: consumer demand, decision making under uncertainty, production and costs, game theory, and product markets; both competitive and imperfectly competitive, factor markets, and market failures. Emphasis on the application of theory to microeconomic issues of interest to the private and public sectors, such as product pricing, market entry and deterrence, competition policy, tax policy, and environmental regulation. ECON 6301 may be taken as a corequisite. Restricted to students in the MA in applied economics program. Prerequisite: ECON 6300.

ECON 6305. Applied Macroeconomic Theory. 3 Credits.

Development of an integrated framework for analyzing the determination of macroeconomic variables such as total production, unemployment, interest rates and inflation; interpreting macroeconomic data and macroeconomic policy; linking economic theory and current economic policy. The level of mathematical rigor is above that in a typical intermediate undergraduate macroeconomics course, but below that in a first-year PhD course. ECON 6300 may be taken as a corequisite. Restricted to students in the MA in applied economics program. Prerequisite: ECON 6300.

ECON 6321. Applied Managerial Economics. 3 Credits.

The application of economic principles and methodologies to key management decisions within organizations. Recommended background: Prior completion of a course in intermediate microeconomics.

ECON 6323. Applied Behavioral Economics. 3 Credits.

The application of economic principles and methodologies to key management decisions within organizations. Recommended background: Prior completion of a course in intermediate microeconomics.

ECON 6325. Applied Game Theory. 3 Credits.

Equilibrium concepts based on the Nash Equilibrium; application of these concepts to oligopolistic markets, long-term relationships in repeated games, auctions, reputation formation, and others. Recommended background: Prior completion of a course in intermediate microeconomics and one semester of undergraduate calculus.

ECON 6330. Applied Macroeconomics and Money. 3 Credits.

Motivations for employing the modern, expanded tools of a central bank; historical and present limitations. Recommended background: Prior completion of a course in intermediate macroeconomics.

ECON 6335. Applied Financial Derivatives. 3 Credits.

Introduction to the theoretical and practical aspects of financial and derivative markets; application of quantitative and statistical approaches to a variety of problems. Recommended background: Prior completion of a course in intermediate microeconomics.

ECON 6340. Applied Labor Economics and Public Policy. 3 Credits.

Topics in labor economics, including unemployment, unions, immigration, the minimum wage, pensions, worker mobility, and inequality. ECON 6300 may be taken as a corequisite. Prerequisite: ECON 6300.

ECON 6344. Applied Industrial Organization. 3 Credits.

The behavior of firms and implications of market structure and resource allocation; market participants, the role of transaction costs, product differentiation, imperfect knowledge, and market contestability. Public policy related to monopoly regulation and antitrust law. Use of standard microeconomic empirical and theoretical tools, including an introduction to game theory. Recommended background: Prior completion of a course in intermediate microeconomics and one semester of undergraduate calculus.

ECON 6350. Applied Development Economics. 3 Credits.

The complex causes of underdevelopment and contemporary ideas about how to make development succeed; theory underlying development economics, as well as the analytical tools used in development research. Students are expected to have a working understanding of the concepts of calculus. Recommended background: Prior completion of a course in intermediate microeconomics or intermediate macroeconomics.

ECON 6374. Probability and Statistics for Economics. 3 Credits.

Basics of research design, probability theory, mathematical expectations, univariate and bivariate statistical comparison tools, and a brief introduction to regression analysis. Restricted to students in the MA in applied economics program or with the permission of the instructor.

ECON 6375. Applied Econometrics. 3 Credits.

An introduction to the skills needed to critically evaluate and conduct econometric analysis. Multiple regression analysis; theoretical underpinnings of the ordinary least squares estimator; interpreting regression results and how to address common issues that arise in regression analysis; econometric methods to estimate and test economic models and to address causal questions using observational data. Students build proficiency in using statistical software to perform basic econometric techniques studied in the course. Restricted to students in the MA in applied economics program. Prerequisites: ECON 6300 and ECON 6374.

ECON 6376. Time Series Analysis. 3 Credits.

The tools required to understand, implement, and interpret common models used in time series econometrics. Emphasis on intuition and application. Students become proficient with performing basic time series analysis and forecasting using time series statistical software. Restricted to students in the MA in applied economics program. Prerequisites: ECON 6305 and ECON 6374.

ECON 6997. Independent Research. 1-3 Credits.

This course is limited to master's degree candidates in Economics. Before permission is granted to register for ECON 6997, the student must submit a written plan of study for the approval of the staff member of the department who will be directing the research. The written plan must also be approved by the program director. This course may be repeated once for credit but to no more than a total of 6 credits.

ECON 6998. Thesis Research. 3 Credits.**ECON 6999. Thesis Research. 3 Credits.****ECON 8301. Microeconomic Theory I. 3 Credits.**

Theory of unconstrained optimization; optimization subject to equality and inequality constraints, along with applications. Profit maximization, utility maximization and cost minimization, concave and quasi-concave functions, monotone comparative statics, duality theory, the envelope theorem and Le Chatelier principle, and the Kuhn-Tucker conditions.

ECON 8302. Microeconomic Theory II. 3 Credits.

Expected utility theory, general equilibrium in a pure exchange economy and economy with production, welfare theorems and the core theory of the competitive firm in the short run and long run, monopoly and price discrimination, models of oligopoly. Prerequisite: ECON 8301.

ECON 8303. Microeconomic Theory III. 3 Credits.

Theory of games, including Nash equilibrium and its refinements and comparative statics, evolutionary game theory, multistage games and subgame perfection, repeated games and oligopolistic supergames, static and dynamic Bayesian games, auction theory, and bargaining theory. Prerequisite: ECON 8301 and ECON 8302.

ECON 8305. Macroeconomic Theory I. 3 Credits.

Alternative theories of income, employment, and the price level; impact of monetary and fiscal policy; role of expectations in the economy; and microfoundations of macroeconomic models and dynamic analysis.

ECON 8306. Macroeconomic Theory II. 3 Credits.

Extensions of alternative models of income determination, economic growth, and the application of analytical frameworks to the U.S. and international economies. Prerequisite: ECON 8305.

ECON 8307. Macroeconomic Theory III. 3 Credits.

Extensions to stochastic and dynamic general equilibrium frameworks, with emphasis on economic policy. Prerequisite: ECON 8306.

ECON 8323. Monetary Theory and Policy I. 3 Credits.

Theory of monetary policy within the framework of contemporary American central banking.

ECON 8324. Monetary Theory and Policy II. 3 Credits.

Continuation of ECON 8323. Theory of monetary policy within the framework of contemporary American central banking.

ECON 8337. Environmental Economics. 3 Credits.**ECON 8341. Labor Economics I. 3 Credits.**

Theory of wages and employment, analysis of labor supply and demand. Analysis of unemployment; unions; wage regulation.

ECON 8342. Labor Economics II. 3 Credits.

Continuation of ECON 8341. Theory of wages and employment, analysis of labor supply and demand. Analysis of unemployment; unions; wage regulation.

ECON 8345. Industrial Organization I. 3 Credits.

Economic theory and evidence regarding industrial market structure, conduct, and economic performance.

ECON 8346. Industrial Organization II. 3 Credits.

Continuation of ECON 8345. Economic issues in antitrust and government regulation of the U.S. economy.

ECON 8351. Development Economics I. 3 Credits.

Major analytic concepts, measures, theoretical models, and empirical methods of development economics.

ECON 8352. Development Economics II. 3 Credits.

Continuation of ECON 8351. In-depth examination of special research topics with emphasis on methods in applied microeconomics.

ECON 8357. Regional Economics. 3 Credits.

Study of regional planning and growth models, including input-output, programming, and econometric models used by planning agencies; analysis of interregional production, trade, migration, firm location, and pricing models.

ECON 8358. Urban Economics. 3 Credits.

Analysis of spatial relationships among economic activities within an urban area including the urban land, labor, and housing markets; urban transportation models; fiscal relationships among jurisdictions.

ECON 8363. Public Finance I. 3 Credits.

Theoretical and empirical analysis of the economic role of the public sector and the effects of public expenditures on resource allocation and income distribution. Topics include public goods, externalities, social insurance, and benefit-cost analysis.

ECON 8364. Public Finance II. 3 Credits.

Theoretical and empirical analysis of the effects of taxes and transfers on the allocation of resources and income distribution. Topics include partial and general equilibrium models of tax incidence, effects of taxes on labor supply, saving, and portfolio choices of households and on investment and financing decisions of firms.

ECON 8375. Econometrics I. 3 Credits.

Statistical foundations for econometrics; standard methods of estimation and inference for classical and generalized regression models. Same as STAT 8375.

ECON 8376. Econometrics II. 3 Credits.

Topics may include asymptotic theory, statistical endogeneity, instrumental variables estimation, discrete and limited dependent variable models, and time-series models. Same as STAT 8376. Prerequisite: ECON 8375.

ECON 8377. Econometrics III. 3 Credits.

Econometric methods for systems of equations and panel data, with additional topics that may vary from year to year. Prerequisite: ECON 8376.

ECON 8378. Economic Forecasting. 3 Credits.

Introduction to the theoretical and applied aspects of economic forecasting. Topics include the role of forecasting, univariate time-series analysis, single equation models, multiple series models, and evaluation of forecasts. Prerequisites: ECON 8375 or permission of the instructor.

ECON 8379. Laboratory in Applied Econometrics. 0-3 Credits.

Application of econometric theory and the use of econometric software; students are required to write an empirical research paper. The course usually deals exclusively with either micro or macroeconomic issues. May be repeated for credit provided the topic differs.

ECON 8381. International Trade Theory. 3 Credits.

International trade theory, including alternative models of the gains from trade and evaluations of the new justifications for protectionism, and analysis of commercial policy, factor flows, and trade and investment with multinational corporations. Prerequisites: Most sections require calculus or permission of the instructor.

ECON 8382. International Finance and Open-Economy Macroeconomics. 3 Credits.

International finance, including alternative models of balance of payments behavior and adjustment, payments accounting, exchange markets, and alternative exchange-rate regimes.

ECON 8383. International Financial Markets. 3 Credits.

Financial economics and international financial markets. Topics include standard asset pricing theory, uncertainty in open economy macroeconomics models, financial market micro-structure, and incomplete markets.

ECON 8395. Advanced Special Topics. 3 Credits.

Topics vary depending upon current interests and faculty availability. Open to graduate students in economics. May be repeated for credit.

ECON 8397. Dissertation Proposal Seminar. 3 Credits.

Limited to Doctor of Philosophy candidates in Unit II. Critical analysis of current research. Formulation of a dissertation proposal and development of dissertation research strategies.

ECON 8997. Independent Research. 3 Credits.

This course is limited to doctoral degree candidates in Economics. Departmental approval required to register. Before permission granted to register for ECON 8997, the student must submit a written plan of study for the approval of both the faculty member of the department who will be directing the research. And the Director of Graduate Studies for the PhD Program or the Department Chair. May be repeated for a total of 6 credits.

ECON 8998. Advanced Reading and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

ECON 8999. Dissertation Research. 3-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

EDUCATIONAL LEADERSHIP (EDUC)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

EDUC 0920. Continuing Research - Master's. 1 Credit.

.

EDUC 0940. Continuing Research: Doctoral. 1 Credit.

.

EDUC 2701. Museums as Cultural and Educational Resources. 3 Credits.

A general introduction to museums as institutions, sources of information, and places for enjoyment. Classes take place on campus and at museums in the metropolitan area. Admission by permission of instructor.

EDUC 3002. Special Workshops. 3 Credits.

EDUC 6100. Experimental Courses. 1-12 Credits.

Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

EDUC 6101. Research and Independent Study. 1-3 Credits.

Individual research under guidance of a staff member. Program and conferences arranged with a program advisor.

EDUC 6112. Foundations of Assessment, Testing, and Measurement in Education. 3 Credits.

Foundations of assessment, testing, and measurement with a focus on basic statistical concepts for assessment data literacy, research design issues for assessments, a review of other educational assessments (IQ and psychological, personality and diagnostic), and other issues with assessment and testing including technology, ethical, and legal issues.

EDUC 6114. Introduction to Quantitative Research. 3 Credits.

Development of a conceptual understanding of research design and quantitative analysis options for the consumer of research. Appropriate use of vocabulary and interpretation of research findings. Critique of research articles and/or development of a small-scale proposal.

EDUC 6116. Introduction to Educational Statistics. 3 Credits.

Fundamentals of descriptive statistics and hypothesis testing; introduction to inferential statistics and research design, distinguishing between nonexperimental, quasi-experimental, and true experimental designs. Designed for those with little preparation in quantitative methods or who are not prepared for Educ 8120.

EDUC 6232. Supervision of Curriculum, Instruction, and Assessment. 3 Credits.

Preparation to lead and assess curriculum, instruction, and assessment practices in educational settings.

EDUC 6234. Foundations of K-12 Educational Leadership. 3 Credits.

Function, processes, and best practices involved in school principal leadership.

EDUC 6236. School Law and Policy. 3 Credits.

The legal basis of education and public schools in the United States. Constitutional provisions and federal statutes that guide school law. Legal factors that influence school policy. Consideration of practical school situations for legal implications, development of skills to research legal issues affecting schools, and preventive law measures.

EDUC 6238. Leadership for Equity and Social Justice. 3 Credits.

Cultural diversity and social justice in the context of teaching, learning, and leadership practice; systemic inequities in schools and how inclusive and socially just leadership practices can address these inequities.

EDUC 6240. Instructional Leadership for School Improvement. 3 Credits.

Introduction to the theory and practice of school improvement with a focus on the role of school leaders in the process.

EDUC 6242. Administrative Issues in Education. 3 Credits.

The impact of major social, political, economic, and education issues on the role of school leaders and the delivery and quality of programs and services.

EDUC 6244. School, Family, and Community Engagement. 3 Credits.

The purpose, scope, essential elements, and impact of a successful school-community relations program; community power structures, the roles of policy and leadership, communication techniques for interacting with various audiences and the media, and evaluation of public relations and marketing for educational institutions.

EDUC 6246. School Finance and Resource Management for School Leaders. 3 Credits.

Theory and practice of personnel and resource management for school administrators; selection, compensation, evaluation, promotion, retention, and removal of staff; principles of effective financial and resource management, including accounting, budgeting, and reporting; technology acquisition, building operations, and facilities management.

EDUC 6252. Human Relations Diversity. 3 Credits.

Application of current theory and research findings in human relations to staff motivation, change, conflict management, and communication techniques for working with individuals and groups within organizations.

EDUC 6256. School Business Management. 3 Credits.

Management and control of the business functions of school districts. Assessing, planning, developing, and presenting educational budgets; the legal contexts affecting school business management. Risk management and school-site budgeting.

EDUC 6258. School Finance. 3 Credits.

The financing of public elementary and secondary education in the United States; current revenue sources, distribution decisions, and trends in the fiscal operations of schools. Litigation, finance policies, and equitable investments of public monies.

EDUC 6260. Practicum in Supervision. 3-6 Credits.

Practical experience in supervision of instruction. Admission by permission of instructor.

EDUC 6262. Internship in Supervision and Instructional Leadership. 3-6 Credits.

Service in a school situation directed by the University's faculty and school systems; integration of theory and practice.

EDUC 6264. Problems and Practices in Staff. 3 Credits.

Application of principles and practices concerned with change and evaluation of educational administration.

EDUC 6270. Education Policy for School Leaders. 3 Credits.

Overview of education policy for educational leaders; economic and social dimensions of education policy and analysis of the policy process; policy development, planning, implementation, analysis, and evaluation.

EDUC 6272. Leading Evidence-Based Action Research for School Improvement. 3 Credits.

Culminating experience implementing the design and leadership of an action research project at a school or central office location. Gathering and analysis of data, reviewing the literature, developing and implementing a program to address an identified area of need; and measuring the program's effectiveness and reflecting on/modifying it based on results. Prerequisite: EDUC 6287.

EDUC 6287. Internship: Administration. 1-6 Credits.

Standards-based work in a practical setting, planned and guided cooperatively by GW and personnel in the placement school district.

EDUC 6314. History of American Education Reform. 3 Credits.

An examination of how evolving social, economic, and political forces have propelled and opposed American education reform efforts throughout history.

EDUC 6368. Leadership and Education. 3 Credits.

A general introduction to issues of leadership applicable to education settings and to key features of educational organizations; leadership as a process and a set of skills and how its styles interact with organizational contexts.

EDUC 6371. Education Policy. 3 Credits.

An introduction to the development, implementation, and assessment of education policies at national, state, and local levels.

EDUC 6381. Program Evaluation: Theory and Practice. 3 Credits.

Introduction to the theory of social program evaluation, alternative evaluation models and methodologies, and the political and social contexts of evaluation.

EDUC 6388. Analysis of Education Policy Issues. 3 Credits.

Covers a range of education policy options, assessing their advantages and disadvantages based on evidence, and drawing implications for policy formulation. A critical approach is applied to the assigned readings, questioning the sources of evidence, appropriateness of analysis, and validity of the findings. Prerequisite: EDUC 6371, EDUC 6114, or permission of instructor.

EDUC 6392. Practicum in Educational Policy Program Evaluation. 3-6 Credits.

Supervised practical experience in field placements. Admission by permission of instructor. Prerequisite: EDUC 6381.

EDUC 6401. Foundations in Educational Technology. 3 Credits.

Theory and practice of educational technology. Key characteristics of different media, principles of application, and issues concerning their appropriate use.

EDUC 6402. Trends and Issues in Educational Technology. 3 Credits.

The research and practice surrounding the use of computers in educational and training settings. Students acquire the practical knowledge necessary to the development and evaluation of computer-related curricula through projects and case studies.

EDUC 6403. Educational Hardware Systems. 3 Credits.

Design and implementation of educational hardware systems, including computers and computer networks.

EDUC 6404. Managing Computer Applications. 3 Credits.

For managers and prospective managers in education and human services who are concerned with the automation of their operations. Basic principles needed to design, implement, and manage an information system. Admission by permission of instructor.

EDUC 6405. Developing Multimedia Materials. 3 Credits.

The design, development, integration, and use of multimedia resources in education and training settings. Students examine and critique multimedia technologies, develop instructional materials, and create a unit or module that applies instructional design theory.

EDUC 6406. Instructional Design. 3 Credits.

Designing, implementing, and evaluating instructional strategies for learners. Assessing needs, writing objectives, selecting curriculum/content, selecting and implementing methods and techniques, selecting appropriate devices and evaluating instruction.

EDUC 6407. Design and Implementation of Educational Software. 3 Credits.

Theory and practice of creating educational software; psychological basis of using software in learning; instructional programs; authoring tools; artificial intelligence applications; interactive media. Students design and evaluate an educational program. Prerequisite: EDUC 6401 or permission of instructor.

EDUC 6421. Critical Issues in Distance Education. 3 Credits.

Historical, conceptual, theoretical, and practical issues associated with distance education as a foundation for research and practice in the domain of distance education as well as adult learning, educational systems design, and school administration and policy.

EDUC 6422. Instructional Needs Assessment and Analysis. 3 Credits.

An introduction to the role of instructional needs assessment and analysis. The design and development of instruction. Key elements of the instructional design cycle, including data analysis.

EDUC 6423. Technology and Disabilities. 3 Credits.

Assistive technology as it impacts the lives of people with disabilities, including the performance of tasks related to employment, education, and activities of daily living.

EDUC 6424. Learning Technologies and Organizations. 3 Credits.

The role of learning technology in organizations, learning in the workplace, and knowledge management in corporations, schools, and universities.

EDUC 6425. Developing Effective Training with Technology. 3 Credits.

Development of skills in planning and producing effective technology-rich training that meets institutional and organizational needs.

EDUC 6426. Computer Interface Design for Learning. 3 Credits.

Human-computer interaction, both in general and with emphasis on issues in education. General design aspects; theories, principles, and guidelines related to human-computer interaction.

EDUC 6427. Advanced Instructional Design. 3 Credits.

Development of a prototype instructional design project and documentation report requiring rapid design and development strategies. Prerequisites: EDUC 6406.

EDUC 6428. Developing Digital Professional Portfolios. 3 Credits.

Students create a digital professional portfolio, using advanced skills in the design, development, integration, and use of multimedia resources.

EDUC 6441. Internship in Educational Technology Leadership. 3 Credits.

Students are assigned to a cooperating agency and work in consultation under the guidance of the course instructor. Admission by permission of instructor.

EDUC 6442. Educational Technology Leadership Master's Project. 1-6 Credits.

Students design, develop, implement, and evaluate an individual project. Admission by permission of instructor.

EDUC 6500. Introduction to Student Affairs and Higher Education. 3 Credits.

Introduction to the study of higher education and the student affairs profession, including the ways in which broader aspects of higher education research, theory and policy inform the work of student affairs practitioners. Historical and current contexts of American higher education, the academic community, and existing issues and emerging challenges surrounding the practice of student affairs in the current higher education landscape.

EDUC 6510. Administration of Higher Education. 3 Credits.

Government, organization, and administration of colleges and universities; duties of trustees and administrators.

EDUC 6520. Foundations of College Student Development. 3 Credits.

College student development theories, practices, and problems, including historical overview and human development theories related to college students.

EDUC 6525. Managing College Student Services Programs. 3 Credits.

An overview of student affairs administrative practices, including planning models, budgeting, policy development, program development, facility management, and team building. Admission by permission of instructor.

EDUC 6530. Intercultural Campus Leadership. 3 Credits.

This course is designed to explore intercultural leadership skills through the lens of understanding group identity differences, multicultural competence, and the foundations of effective advocacy for social justice. Lectures, readings, class discussions, written assignments, and experiential activities are used to promote an understanding of intercultural leadership skills to help create inclusive learning environments. The course explores how oppression and privilege relate to differences based on gender, race and ethnicity, sexual orientation, and (dis)ability. Students also study how these identities intersect with each other.

EDUC 6540. Group and Organizational Theories. 3 Credits.

Review of major organizational theories inside and outside higher education, including systems, institutional, cultural, cognitive, environmental, ecological, as well as power and influence.

EDUC 6550. Assessment in Higher Education. 3 Credits.

Key concepts in the assessment of outcomes in higher education and in student affairs. History of the assessment movement in higher education, strategies and methods for measuring outcomes of the college experience, identifying the limitations of operational processes that can be improved, and current issues in measuring student success in higher education.

EDUC 6555. Higher Education Policy. 3 Credits.

Assessment of policies that impact higher education, including the relationship of K-12 policy to higher education. Policy networks and mechanisms of policymaking. Policy development and assessment.

EDUC 6560. Legal Problems in Higher Education. 3 Credits.

Investigation of legal problems in higher education related to the legal structure of higher education, religious concerns, students, faculty, and academic programs.

EDUC 6565. Financing Higher Education. 3 Credits.

Analysis of private, state, federal, and other revenue sources; strategic planning, program budgets, and financial methods and practices.

EDUC 6570. Educational Planning. 3 Credits.

An examination of the planning movement in education: its historical development and the recent shift in premises, context, and expectations. Different approaches to the planning process; its role in research; and overview of main analytical techniques currently in use.

EDUC 6572. Dynamics of Change. 3 Credits.

An analysis of the process of change, particularly as it relates to educational policy. Comparison of theories; analytical tools; historical precedents; examples of federal education policies.

EDUC 6575. Personnel Administration. 3 Credits.

Human resource management: planning, recruitment, selection, placement and induction, staff development, rewards, and negotiations. Issues and legislation that influence personnel functions and policy; communication skills for human resource leadership.

EDUC 6579. Managing Multicultural Environments. 3 Credits.

Application of multicultural research in identifying key elements for managing diverse environments, communicating with families, planning professional development activities, and increasing student learning.

EDUC 6585. Master's Internship in Higher Education Administration. 3-6 Credits.

Supervised field experience in higher education settings. Admission by permission of instructor.

EDUC 6590. Capstone in Higher Education Administration. 0 Credits.

The capstone is designed to promote the integration of the core curriculum and practitioner experiences of the Master's degree program in Higher Education Administration, and to prepare for student transition to a professional student affairs or academic affairs position following completion of the degree. Restricted to students in the MAEd&HD in higher education administration program.

EDUC 6601. International and Comparative Education. 3 Credits.

Theoretical foundations of comparative and international education; systematic investigation of the structure and practices of selected representative school systems in different parts of the world. Emphasis on development of methodologies for comparative study.

EDUC 6602. Regional Studies in International Education. 3 Credits.

In-depth study of education in a selected region of the world. Structures and issues facing education systems in social, political, economic, cultural, and historical context. Prospects of education for human national development. May be repeated for credit provided the region differs.

EDUC 6610. Programs and Policies in International Education. 3 Credits.

Overview of policies and programmatic responses to issues in international education. Topics include education and development, international higher education and student services, and education and marginalized people. May be repeated for credit provided the topic differs.

EDUC 6615. Internationalizing U.S. Schools. 3 Credits.**EDUC 6620. Strategies and Analysis in International Education. 3 Credits.**

Strategies for improving education in international contexts. Topics include education and development, international higher education and student services, or education and marginalized people. May be repeated for credit provided the topic differs.

EDUC 6630. International Experiences. 1-6 Credits.

Study and research in a foreign country as part of a group program. Admission may require permission of the instructor.

EDUC 6631. Internship: International Education. 1-6 Credits.

Service in an international education institution or related individually designed program planned to enable the student to connect theory to practice. Admission may require permission of instructor. May be repeated for credit.

EDUC 6640. Selected Topics in International Education. 3 Credits.

Current trends, themes, and issues in international education. May be repeated for credit provided the topic differs.

EDUC 6650. Education and National Development. 3 Credits.

The role education plays in the process of national development in advanced industrial societies and societies moving to industrialism.

EDUC 6660. Capstone in International Education. 3 Credits.

Review of core topics in international education and completion of major supervised project or paper. Taken near the end of the master's program in lieu of the Comprehensive Examination.

EDUC 6701. Museums as Institutions I: Fundamentals. 3 Credits.

An overview of the museum as an environment for learning, considering the influence of institutional history and organizational structure on the museum's mission of serving the public.

EDUC 6702. Facilitating Museum Learning I: Fundamentals. 3 Credits.

Theory of and practice in the development of communication skills in the museum. Educational concepts; teaching strategies and techniques; institutional liaison and group process.

EDUC 6703. Museum Audiences. 3 Credits.

A survey of the museum's diverse audience, emphasizing implications for effective programming, with attention to audience research.

EDUC 6704. Facilitating Museum Learning II: Field Placement and Seminar. 3-6 Credits.

Supervised placement in local educational institutions. On-campus seminar focuses on human development and learning theory. Placement requires a 16 hour per week commitment.

EDUC 6705. Museums as Institutions II: Field Placement and Seminar. 6 Credits.

Supervised placement in area museums and related organizations where students carry out projects in cooperation with the site. On-campus seminar includes presentations by leading practitioners. Placement requires a commitment of 32 hours per week. Restricted to museum education students. Prerequisites: EDUC 6701, 6702, 6703 and 6704.

EDUC 6706. Evaluating Museum Learning. 3 Credits.

Evaluation and research methods appropriate to the museum setting. Review of research on museum audiences; designing exhibition and program evaluations.

EDUC 6707. Museum Proposal Writing. 3 Credits.

Preparation of proposals for museums seeking support from public and private funders. Proposals are developed in cooperation with local museums.

EDUC 6709. Interpretation in the Historic House Museum. 3 Credits.

Seminar integrating advanced practices of museum education with current scholarship in architectural history, material culture, and social history. Extensive use of Washington museum resources. Same as AMST 6709. Admission by permission of instructor.

EDUC 6710. Museums and Technology. 3 Credits.

Applications of technology that link the public with the museum: Internet exhibitions, interactive computer programs, video conferencing, the electronic classroom. Guest lectures, field trips, and group projects.

EDUC 6711. Museum as a Learning Environment. 3 Credits.

Exploration of why visitors frequent museums and how they create personal meaning. Approaches to support the audience's engagement with the museum's resources.

EDUC 6801. Prelude to Experiential Education and Jewish Cultural Arts. 1 Credit.

Theme-based orientation to the program in experiential education and Jewish cultural arts and to the metropolitan Washington, DC, Jewish community. Includes extensive site visits. Restricted to students in the experiential education and Jewish cultural arts program.

EDUC 6802. Finale in Experiential Education and Jewish Cultural Arts. 1 Credit.

Theme-based orientation to the program in experiential education and Jewish cultural arts and to the metropolitan Washington, DC, Jewish community. Students plan and implement extensive site visits. Restricted to students in their final semester of the experiential education and Jewish cultural arts major. Prerequisite: EDUC 6801.

EDUC 6803. Introduction to Experiential Jewish Education. 4 Credits.

Introduction to the theory and practice of experiential Jewish education in a variety of settings, addressing the relationship of education to identity development. Includes a fieldwork experience.

EDUC 6804. Applied Research in Experiential Jewish Education. 3 Credits.

Overview of research methods employed in experiential Jewish educational settings and their various applications to practice. Prerequisite: EDUC 6803 Introduction to Experiential Jewish Education.

EDUC 6805. Capstone in Experiential Education and Jewish Cultural Arts. 3 Credits.

Six-week, full-time internship at leading Jewish cultural institutions in the United States and abroad. Restricted to students in the experiential education and Jewish cultural arts program.

EDUC 6806. Jews, Social Justice, and Activism. 3 Credits.

Critical examination of the important place of social activism, civic engagement, and community service in American Jewish life.

EDUC 6807. Fieldwork in Experiential Jewish Education. 3 Credits.

Sixteen-week, part-time internship at leading Jewish organizations or institutions. Restricted to students in the master's degree in experiential Jewish education program.

EDUC 6810. Paideia and Jewish Education. 2 Credits.

Analysis of the ancient Greek concept of paideia and its implications for the theory and practice of contemporary experiential Israel education.

EDUC 6811. Foundations of Contemporary Israel. 3 Credits.

Key questions and concepts surrounding Israel's history, and Israeli society, politics, and culture, from 1948 to present. Restricted to students in the graduate certificate in Israel education program.

EDUC 6812. American Jews and Modern Israel. 2 Credits.

The relationships of young American Jews, and the American Jewish community more broadly, to the modern State of Israel, particularly in the context of new political and ideological dynamics in the United States and Israel.

EDUC 6813. The Israel Educational Experience. 4 Credits.

Held in Israel over an eight-day period. Students learn about issues that characterize contemporary Israeli society and apply this learning to educational programming. Restricted to students in the graduate certificate in Israel education program.

EDUC 6840. Introduction to Improvement Science in Education. 3 Credits.

The process and application of improvement science to complex educational problems.

EDUC 6841. Inquiry Tools Supporting Improvement Science. 3 Credits.

The means by which improvement science uses and adapts to a range of established qualitative and quantitative tools, processes, and methods to support educator inquiry within the context of K-12 school settings.

EDUC 6842. Teacher Leadership through Improvement Science. 3 Credits.

Improvement science practices that facilitate teacher leadership; dispositions, knowledge, processes, and relationships supportive of teacher leaders working in different school contexts.

EDUC 6843. Improvement Science as Educational Change. 3 Credits.

Improvement science as a staged, interpretive educational change process; diverse role group perspectives; past and current reforms efforts.

EDUC 6998. Thesis Research. 3 Credits.

Thesis research.

EDUC 6999. Thesis Research. 3 Credits.**EDUC 8100. Experimental Courses. 1-12 Credits.**

Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

EDUC 8101. Research and Independent Study. 1-3 Credits.

Review of literature. Preparation of a dissertation proposal and a manuscript of publishable quality.

EDUC 8110. Advanced Study: Ideas, Issues, and Practices in Education. 3 Credits.

For precandidates for the EdD Alternative means of responding to the complexities of the educational process. Topics vary but concern education as an individual process and as sociocultural preservation and renewal. May be repeated for credit.

EDUC 8120. Group Comparison Designs and Analyses. 3 Credits.

Designs and analyses to assess differences for more than two groups when compared on one dependent variable. Fixed, random, and mixed effects ANOVA and ANCOVA models within factorial design, multiple comparison tests, and introduction to regression analysis. Prerequisites: EDUC 6116.

EDUC 8122. Qualitative Research Methods. 3 Credits.

A general introduction to several major qualitative research traditions (e.g., biography, grounded theory, ethnography, phenomenology, and case study). Application of qualitative research design and procedures, including preliminary data collection, analysis, and writing.

EDUC 8130. Survey Research Methods. 3 Credits.

Techniques used to collect an array of information from a large number of people through structured interviews and mailed, e-mailed, or web-based questionnaires. Defining the research question and design; sampling, survey development, data collection procedures, pretesting, and data handling. Prerequisite: EDUC 8120, EDUC 8122.

EDUC 8131. Case Study Research Methods. 3 Credits.

Techniques used to examine one or a few complex cases, collecting data from several types of sources and by several methods. The course covers design, data collection, and data analysis/integration. Prerequisite: EDUC 8122.

EDUC 8140. Ethnographic Research Methods. 3 Credits.

Techniques used to examine systematically the contemporary daily life of a given group in its natural setting, focusing on culture—the recurring patterns of thought and social relations. Issues of research design and data collection and analysis. Prerequisite: EDUC 8122.

EDUC 8142. Phenomenological Research Methods. 3 Credits.

Techniques used to elicit and recognize perceptions, interpretations, motives, expectations, and imaginations. The framing of appropriate research questions, data collection and analysis, and the statement of conclusions. Prerequisite: EDUC 8122.

EDUC 8144. Discourse Analysis. 3 Credits.

Techniques used to examine verbal and nonverbal communication to understand identity, beliefs, intentions, relationships, and culture. The framing of appropriate research questions; data collection and analysis. Prerequisite: EDUC 8122.

EDUC 8170. Educational Measurement. 3 Credits.

Classical and modern measurement theory, item response theory, and factor analysis. Educational and psychological instrument development and validation. Interpretation of scale scores and assessment of instrument adequacy. Prerequisites: EDUC 8120. Recommended background: EDUC 6112 or equivalent.

EDUC 8171. Predictive Designs and Analyses. 3 Credits.

Techniques used to assess how independent variables are related to one dependent variable. Multiple linear regression, logistic regression, ordinal regression, and non-linear regression. Appropriate research questions, data interpretation, and design within generalized linear modeling. Prerequisites: EDUC 8120.

EDUC 8172. Multivariate Analysis. 3 Credits.

Techniques for assessment of relationships among multiple independent variables and dependent variables. Multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), discriminant analysis, and exploratory factor analysis. Prerequisite: EDUC 8171.

EDUC 8173. Structural Equation Modeling. 3 Credits.

Multivariate techniques used for assessment of structural (causal) relations among latent (unobserved) variables with multiple observed indicators: observed and latent variable path analysis and confirmatory factor analysis. Latent means analysis and latent growth modeling. Prerequisite: EDUC 8171.

EDUC 8174. Hierarchical Linear Modeling. 3 Credits.

Techniques appropriate for analyses of hierarchically structured data. Theoretical concepts of hierarchical linear models (HLM); social and behavioral research; popular HLM software such as HLMwin; and large scale datasets. Prerequisites: EDUC 8171.

EDUC 8175. Item Response Theory. 3 Credits.

Conceptual, mathematical, and applied issues in item response theory. Dichotomous models, item response theory software used for estimation and model fit, test construction, differential item functioning, and item response theory equating. Prerequisites: EDUC 8170.

EDUC 8177. Assessment Engineering. 3 Credits.

In-depth coverage of topics related to assessment engineering, including cognitive model development using cognitive diagnostic assessment and formative assessment modeling, item model development using auto item generation, and automated test assembly and psychometric model development using computer adaptive testing. Introduction to current assessment engineering and educational big-data analytic applications. Prerequisites: EDUC 8170.

EDUC 8179. Capstone Project in Assessment, Testing, and Measurement in Education. 3,6 Credits.

Multifaceted assessment that serves as a culminating academic and intellectual experience for students during the end of their academic program. The capstone project is similar to a thesis or dissertation but may take a variety of forms. Permission of the instructor required prior to enrollment. Prerequisite: EDUC 8170.

EDUC 8240. Organizational Theory and Leadership in Education. 3 Credits.

Theories and models examining how pk-12 school organizations are part of larger bureaucratic structures and how micro processes that help the overall organization function occur. Restricted to students in the EdD in educational leadership and administration program.

EDUC 8268. Leadership Theory for Education. 3 Credits.

Historical and contemporary theories of leadership through the lens of education; leadership, adaptive leadership, and power analysis.

EDUC 8270. Fundamentals of Educational Planning. 3 Credits.

The planning movement in education at the federal, state, division, and building levels; strategic, short-term, and long-term planning processes for school and educational leaders.

EDUC 8271. Education Policy for School Leaders. 3 Credits.

The interactions of policy development, interpretation, and implementation at different levels of the system; how policy actors draw upon different values to advance and critique current problem formulations and related solutions in education.

EDUC 8276. Seminar: Administration and Supervision. 1-12 Credits.**EDUC 8277. Advanced Instructional Leadership for School Improvement. 3 Credits.**

Introduction to the role of the instructional leader from school and district perspectives. Students gain theoretical and practical skills and knowledge in areas including instructional improvement; education reform; accountability; conditions for improvement; and planning and sustaining change.

EDUC 8280. Critical Review of Educational Leadership Literature. 1,3 Credit.

The techniques, tools, and presentation of critical reviews and syntheses of educational literature used to inform forthcoming research. Systematic mapping of what is known and deriving research questions, conceptual frameworks, and applicable methods. Prerequisite: an approved dissertation topic or permission of instructor.

EDUC 8320. The Politics of Education. 3 Credits.

Examination of the contextual factors (political, economic, and historical) and the nature of political decision making on education issues, primarily at the state and local level. Prerequisite: EDUC 6371.

EDUC 8321. Economics of Education. 3 Credits.

Application of economic theory and analysis to education problems and policies; analysis of contemporary education reforms adopted to improve educational outcomes. Prerequisites: EDUC 6371 and EDUC 8171.

EDUC 8322. Education Policy Implementation. 3 Credits.

The evolution and implementation of education policies. Analysis of policy implementation at varying governance levels and types of educational systems. Policy is analyzed as a process and as it interacts with organizational, social, economic, and political factors. Prerequisites: EDUC 6371.

EDUC 8323. Policies of Education Equity. 3 Credits.

Analysis of the development, implementation, and evaluation of education equity policies, with consideration of their context, formulation, and application. Prerequisites: EDUC 6371 and EDUC 8171.

EDUC 8325. Policy Design: Accountability in Education. 3 Credits.

Models of educational accountability and their implementation within the broader U.S. education system; approaches to accountability, including contemporary policies such as market-based systems, regulatory approaches, and professional accountability. Prerequisite: EDUC 6371.

EDUC 8329. Seminar in Program Evaluation. 3 Credits.

Contemporary problems and issues in evaluation of social programs: design, implementation, analysis, and utilization. Prerequisite: EDUC 6381 and approval of instructor.

EDUC 8334. Doctoral Internship in Educational Policy. 3-6 Credits.

Methods of analysis used in the study of educational policy issues. Case studies on a range of policy issues and trends, including testing and accountability, school finance, school choice, and the federal role. Prerequisite: EDUC 6371, EDUC 6114, or permission of instructor.

EDUC 8340. Methods of Policy Analysis in Education. 3 Credits.

Methods of analysis used in the study of educational policy issues; policy issues and trends, including testing and accountability, school finance, school choice, and the federal role. Prerequisites: EDUC 6116 and EDUC 6371.

EDUC 8345. Advanced Studies in Educational Policy Analysis. 1-12 Credits.

The process by which education policies are designed, adopted, and implemented by education systems. Case studies of specific policies, examining their assumptions and objectives, the criteria for assessing their effectiveness, and their governance at federal, state, and local levels. Prerequisite: EDUC 6371, EDUC 8120, or permission of instructor.

EDUC 8505. Seminar: Higher Education Administration. 1-12 Credits.**EDUC 8510. Administration and Organization of Higher Education. 3 Credits.**

Organizational characteristics and administrative nature of colleges and universities; challenges and opportunities for governance; cultures, norms, and changes in higher education organizations.

EDUC 8515. Comparative and International Higher Education. 3 Credits.

An exploration of cultural, theoretical, and disciplinary perspectives of international higher education through a comparative lens.

EDUC 8520. Theories for Research on College Students. 3 Credits.

Theoretical approaches used to study college students; competing frameworks and the contributions of emergent approaches to understanding college students.

EDUC 8525. College and University Curriculum. 3 Credits.

Development, patterns, creative design, issues, problems, evaluation, and trends in the higher education curriculum.

EDUC 8530. Leadership in Higher Education. 3 Credits.

Cognitive leadership theory as articulated in higher education: what leadership is, how it works, how it is practiced, how it is considered by scholars and practitioners, and how it is researched.

EDUC 8540. History of Higher Education. 3 Credits.

History, philosophy, scope, purpose, present status, programs, and trends in higher education in the United States.

EDUC 8555. Policy Analysis in Higher Education. 3 Credits.

The intricacies of major policy debates in higher education, focusing on policy framing, goals, solutions, and implementation.

EDUC 8560. Case Studies in Higher Education Administration. 3 Credits.

An analysis of case studies related to administrative functions in colleges and universities.

EDUC 8565. College and University Governance. 3 Credits.

Organizational and administrative structures, patterns, and relationships in higher education.

EDUC 8566. Higher Education Finance. 3 Credits.

Fundamental concepts in higher education finance; state finance and policy issues; and the impact of financial decisions made at the federal, state, and institutional levels on faculty and students.

EDUC 8580. The Community/Junior College. 3 Credits.

The two-year college as it relates to secondary education, four-year colleges, and universities. Objectives, curricula, students, faculty, legal concerns, and special problems of two-year colleges.

EDUC 8582. Administration and Governance of Two-Year Colleges. 3 Credits.

A study of the community/junior college, focusing on administrative and governance patterns and national, regional, state, and local influences, as well as the theory and structure of two-year college organization.

EDUC 8585. Doctoral Internship in Higher Education Administration. 3-6 Credits.

Service in a higher education situation directed by the University and the cooperating institution to integrate theory and practice. Admission by permission of instructor.

EDUC 8594. Current Issues in Higher Education. 3 Credits.

Analysis of contemporary issues in higher education practice and scholarship.

EDUC 8701. Education Policy Design. 3 Credits.

Processes and practices of policy planning and design in a system of federal, state and local control; effect of federal actions on the work of state and local educators; the state role in shaping federal education policies.

EDUC 8702. Evidence in Education Policymaking. 3 Credits.

Review of theory and research on evidence-informed policymaking and the practical skills of drafting evidence-informed policy initiatives; integrating research with other types of evidence to understand policy problems and formulate responses.

EDUC 8703. Implementation for Education Policymakers. 3 Credits.

The challenge of designing and implementing policy with attention to implementation. Review of research on the organizational, social, and political factors that influence implementation and case study analyses of successful and unsuccessful policy implementation.

EDUC 8704. Advocacy and Strategic Communications. 3 Credits.

The ways in which public discourse and political advocacy shape policy making and implementation; framing policy issues, advancing policy objectives, and engaging stakeholders and members of the media.

EDUC 8998. Pre-Dissertation Seminar. 3-6 Credits.

Required of all departmental EdD degree candidates. Approval of the dissertation research proposal by the dissertation committee is necessary for successful completion of the seminar. Admission by permission of instructor.

EDUC 8999. Dissertation Research. 3,6 Credits.

Prerequisite: EDUC 8998.

ELECTRICAL AND COMPUTER ENGINEERING (ECE)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ECE 1010. Introduction to Electrical and Computer Engineering I. 1 Credit.

Basic and emerging concepts in electrical and computer engineering; professional literature and resources; technical writing, speaking, and presentation skills. Practical experiments and projects. (Fall, Every Year).

ECE 1020. Introduction to Electrical and Computer Engineering II. 1 Credit.

Continuation of ECE 1010. Basic and emerging concepts in electrical and computer engineering; professional literature and resources; technical writing, speaking, and presentation skills. Practical experiments and projects. (Spring, Every Year).

ECE 1120. C Programming for Electrical and Computer Engineering. 3 Credits.

Basic programming concepts including algorithmic thinking and structured programming, control flow, data types, pointers, functions, algorithms, I/Os, threads, and performance evaluation and optimization; concurrency and multicore programming using threads, processes as well as parallel C programming paradigms; controlling hardware devices and fine control via interfacing with assembly language. Credit cannot be earned for both this course and CSCI 1121. (Spring, Every Year).

ECE 1125. Data Structures and Algorithms for ECE. 3 Credits.

Fundamentals of algorithms and data structures for electrical and computer engineering; techniques to solve problems through programming in C/C++ languages, linked lists, stacks, queues and trees; searching methods such as binary trees, hashing, and multi-way trees; design and analysis of algorithms and their space and time complexity. Prerequisite: ECE 1120. (Fall, Every Year).

ECE 2110. Circuit Theory. 4 Credits.

Circuit elements, techniques of circuit analysis; circuit theorems; operational amplifiers; RLC circuits; natural and step responses; series, parallel and resonant circuits; sinusoidal steady-state analysis; phasers; power calculations; transformers; two-port circuits. CAD tools used in circuit projects. Corequisites: APSC 2113, and either PHYS 1022 or PHYS 1026. (Fall and spring, Every Year).

ECE 2115. Engineering Electronics. 4 Credits.

Solid state devices used in electronic engineering; physics of their operation; application to electronic circuits. Application of these elements in power supplies and in linear amplifiers. Design concepts through use of SPICE and graphical techniques. Prerequisite: ECE 2110. (Spring, Every Year).

ECE 2120. Engineering Seminar. 1 Credit.

A detailed view of the electrical and computer engineering professions. Departmental and other speakers discuss facets of ECE, engineering education, and other department, college, or university topics of interest. (Fall, Every Year).

ECE 2140. Design of Logic Systems. 4 Credits.

Boolean algebra; combinational and sequential circuits; minimization techniques; design and build logic subsystems, such as decoders, multiplexers, adders, and multipliers. Use of CAD tools. Corequisite: ECE 2115. Prerequisite: ECE 2110. (Fall, Every Year).

ECE 2210. Circuits, Signals, and Systems. 3 Credits.

Circuit analysis using Laplace transforms; transfer functions; poles and zeroes; Bode diagrams; effects of feedback on circuits; convolution; Fourier series and Fourier transforms; design of filters; CAD tools used in design of projects. Prerequisite: ECE 2110. (Spring, Every Year).

ECE 3125. Analog Electronics Design. 4 Credits.

Design, testing, and measurement of analog electronic circuits. Differential and multistage amplifiers; output stages and power amplifiers; frequency response of amplifiers, high-frequency models of FETs and BJTs; introduction to feedback circuit topologies; use of electronic CAD tools, such as P-SPICE. Prerequisite: ECE 2115. (Fall, Every Year).

ECE 3130. Digital Electronics and Design. 4 Credits.

Design and testing of logic gates, regenerative logic circuits, and semiconductor memory circuits. Implementation of such circuits with NMOS, CMOS, TTL, and other integrated circuit technologies. Use of electronic CAD tools, such as SPICE. Students must have completed a course in logic systems, such as ECE 2140 or equivalent, prior to enrollment. Consult the instructor if uncertain whether this requirement has been met. Prerequisite: ECE 2140. (Fall, Every Year).

ECE 3135. Digital Design with FPGAs. 4 Credits.

Lecture (3 hours), laboratory (3 hours). Introduction of ASIC design techniques; design and programming of FPGAs using CAD tools; timing in sequential circuits; essential hazards; races in sequential circuits; design-and-build FPGA project. Prerequisite: ECE 2140. (Spring, Every Year).

ECE 3220. Introduction to Digital Signal Processing. 3 Credits.

Signal representation, sampling, discrete-time signals, z-transforms and spectra, difference equations; Fourier analysis; discrete Fourier transform, IIR and FIR filter design. Prerequisite: ECE 2210. (Fall, Every Year).

ECE 3225. Signal and Image Analysis. 3 Credits.

Introduction to digital filters and digital image processing, time- and frequency-domain techniques for signal feature analysis; spectral estimation and analysis; autoregressive modeling; detection and estimation of periodicity; digital images as two-dimensional signals; 2-D Fourier transform. Offered as arranged. Prerequisites: APSC 3115 and ECE 2110. (Summer, Every Year).

ECE 3310. Introduction to Electromagnetics. 3 Credits.

Maxwell's equations, pulse propagation in one dimension, transmission line equations, reflection coefficient, capacitance and inductance calculations, Smith chart, plane waves, reflection from a dielectric of fiber and integrated optics. Prerequisites: APSC 2113; and PHYS 1022 or PHYS 1026. (Spring, Every Year).

ECE 3315. Fields and Waves I. 3 Credits.

Complex phasor notation, uniform transmission lines, standing wave ratio, power, reflection coefficient, impedance matching; review of vector analysis and numerical methods; electrostatics, generalizations of Coulomb's law, Gauss's law, potential, conductors, dielectrics, capacitance, energy; Magnetostatics, Biot-Savart Law, Maxwell's equations, vector magnetic potential, inductance, magnetic energy, boundary conditions. Prerequisites: APSC 2113; and PHYS 1022 or PHYS 1026. (Fall, Every Year).

ECE 3410. Communications Engineering. 3 Credits.

Fourier series and Fourier transform in relation to signal analysis. Convolution and linear filtering. Signal bandwidth and sampling theorem. Analog modulation. Random variables and stochastic processes; power spectrum. Digital modulation: BPSK, QPSK, MSK. Pulse code modulation, DPCM and delta modulation. Prerequisites: APSC 3115; and ECE 2210. Recommended background: Students in this course should have taken APSC 3115 (Engineering Analysis III) and ECE 2210 (Circuits, Signals, and Systems) or an equivalent course; If unsure, please contact the instructor, and discuss the prerequisite requirements. (Spring, Every Year).

ECE 3420. Communications Laboratory. 1 Credit.

Experiments supporting communications systems. Fourier analysis and Fourier transform. Sampling theorem, filtering, and aliasing. Amplitude modulation (AM), frequency modulation (FM), quantization, and pulse code modulation (PCM). Delta modulation. Binary phase shift keying (BPSK). Quadrature phase shift keying (QPSK). Offered As Arranged. Prerequisite: ECE 3410. (Summer, Every Year).

ECE 3515. Computer Organization. 3 Credits.

Structure and operation of a digital computer. Design of computer arithmetic units, data and instruction paths. Microprogramming; memory technology; virtual memory; caches; pipelined computer organization; characteristics of secondary storage; I/O interfacing. Prerequisite: ECE 2140. Recommended background: Students should have taken at least one prior course in logic design (ECE 2140 or equivalent). (Fall, Every Year).

ECE 3520. Microprocessors: Software, Hardware, and Interfacing. 3 Credits.

Microprocessor architecture, address decoding, hardware interrupt, parallel and serial interfacing with various circuits, timer/counters, direct memory access, microprocessor-based system. Hands-on laboratory experience using laboratory facilities is an integral part of this course. Prerequisites: ECE 1120 and ECE 2140. (Fall, Every Year).

ECE 3525. Introduction to Embedded Systems. 3 Credits.

Microcontrollers and their application in embedded systems. Topics include assembly and C for microcontroller programming, serial and parallel I/O interfacing, and multimedia interfacing. Students perform laboratory experiments and a final project to develop a microcontroller-based embedded system. Prerequisites: ECE 1120 and ECE 3520. (Spring, Every Year).

ECE 3530. Introduction to Parallel and Distributed Computer Systems. 3 Credits.

Parallel Computing versus Distributed Computing Systems. Applications of Parallel Computing and Distributed Computing in Science and Engineering. Computer networks versus interconnection networks of parallel systems; high throughput versus low latency computing systems. Data Centers, Clouds, Grids, Edge, Fog and Cluster Computing. Performance analyses and evaluation of parallel and distributed systems. Shared memory and distributed systems programming with introduction to OpenMP, pthreads, message passing, Hadoop and MapReduce. Synchronization issues and methods. Introduction to the design and analyses of parallel algorithms. Performance Analysis and Program Optimizations. Introduction to GPUs and Heterogeneous systems and programming. Offered as arranged. Prerequisites: ECE 1120 and ECE 1125. (Summer, Every Year).

ECE 3915W. Electrical and Computer Engineering Capstone Project Lab I. 1 Credit.

Program majors take ECE 3915, ECE 4920, and ECE 4925 in sequence beginning in the second semester of their junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Spring, Every Year).

ECE 4140. VLSI Design and Simulation. 3 Credits.

Study of VLSI circuit design including PMOS and NMOS transistor analysis, switch and gate logic design, understanding of semiconductor fabrication processes and design rules, CAD system, speed and power considerations, scaling of transistors to the nano-scale, and designing with highly variable process parameters. Each student designs a VLSI chip, simulates the design and submits a GDS II file for Chip fabrication. Prerequisites: ECE 3130 and ECE 3135. (Same as ECE 6240) (Fall, Every Year).

ECE 4145. Micro- and Nanofabrication Techniques. 3 Credits.

Introduction to the basic fabrication principles at the micro and nano scale; students practice and fabricate simple devices. Prerequisite: ECE 2110. (Fall, Every Year).

ECE 4150. ASIC Design and Testing of VLSI Circuits. 3 Credits.

ASIC and mixed-signal design methodology, use of ASIC design CAD tools. Logic synthesis, styles of synthesis, power/area/speed constraints. MIPS CPU HDL implementation/verification/testing. VLSI testing, fault models, design for testability techniques, scan path, built-in self-test. Testing of chips designed and fabricated in ECE 4140 or equivalent chips. Prerequisite: ECE 4140. (Same as ECE 6250) (Spring, Every Year).

ECE 4155. Sensors, Networks, and Applications. 3 Credits.

Sensor technologies for measurement of mechanical, optical, magnetic, electromagnetic, thermal, and acoustic signals; interface electronic components, calibration, noise, and nonlinearity in addition to main modern sensors and sensor networks. May be taken for graduate credit; additional coursework is required. Prerequisite: ECE 3125. (Spring, Every Year).

ECE 4160. Introduction to Nanoelectronics. 3 Credits.

Nanoscience and technology and nanoelectronics. Basic nanofabrication steps, and techniques to build devices such as carbon nanotubes, Graphene device, and other 2D nanoelectronic devices. Tools for performing design and characterizations of nanodevices, including scanning electron microscopy (SEM), atomic force microscopy (AFM), and transmission electron microscope (TEM). Prerequisite: ECE 2115. (Same as ECE 6260) (Fall, Every Year).

ECE 4320. Fields and Waves II. 3 Credits.

Magnetostatic fields, Lorentz force torques, Biot-Savart law, Ampere's law, magnetic materials, inductance, magnetic energy; Maxwell's equations, Faraday's law, charge-current continuity, vector potential; time-harmonic fields, plane waves, polarization, skin effect, dielectric boundaries, and fiber optics; radiation, dipole, gain, effective area. Prerequisites: APSC 2114; and ECE 3315. (Spring, Every Year).

ECE 4325. Microwave and Optics Laboratory. 1 Credit.

Experiments in transmission lines, network analyzer measurements of scattering parameters, microwave systems, fiber-optic systems and antennas. Introduction to the characteristics of laser and optical systems. Prerequisite: ECE 4320.

ECE 4415. Introduction to Computer Networks. 3 Credits.

Layered protocol architectures; digital transmission and fundamental limits; error detection and ARQ protocols; data link layer and control; multiple access protocols; circuit and packet switching; multiplexing; routing; flow and congestion control and queue management; LAN standards; TCP/IP; Next-generation Internet. Prerequisite: APSC 3115. (Spring).

ECE 4425. Data Communications Laboratory. 1 Credit.

Experiments in support of the analysis and design of communications systems with emphasis on network protocols. Time and frequency division multiplexing, flow control, automatic repeat request, interfacing, token ring, token bus, multiple access for Ethernet, routing, packet switching. Prerequisite: ECE 4415. (Spring, Every Year).

ECE 4435. Fiber Optical Communications. 3 Credits.

Concepts of opto-electronic devices; light-matter-interaction; absorption; device details and applications: laser, photodetector, modulators, optical cavity, waveguides and optical fibers; device and link considerations, including energy-per-bit, modulation speed, and nano fabrication; plasmonics and nanophotonics; industry perspective. Students should have completed at least one undergraduate-level course in electromagnetism and semiconductors prior to enrollment. Prerequisites: APSC 2114; ECE 3310 or ECE 4320. (Spring, even years).

ECE 4535. Computer Architecture and Design. 3 Credits.

Advanced topics in computer architecture and design; instruction-level parallelism, thread-level parallelism, memory, multithreading, and storage systems. Prerequisite: ECE 3515. (Fall, Every Year).

ECE 4610. Electrical Energy Conversion. 3 Credits.

Three-phase and single-phase AC rotating machines and transformers, DC machines, rotating machines as circuit elements, power semiconductor converters. Renewable generation, utility grid integration, smart grid applications. Prerequisites: ECE 2210 and ECE 3315. (Same as ECE 6610) (Spring, Every Year).

ECE 4615. Electrical Power Laboratory. 1 Credit.

Experiments in support of the analysis and design of electrical power systems. Measurements of the characteristics of devices to generate electric power. Rectification and inversion processes for power systems and drives. Prerequisite or corequisite: ECE 4610.

ECE 4620. Electrical Power Systems. 3 Credits.

AC power grids, transmission line parameters, load flow, economic dispatch voltage, frequency and power flow control. Voltage, current and power limitations. Fault analysis and stability considerations. Effect of independent power producers and variable energy sources and energy storage. (Same as ECE 6620) (Fall, Every Year).

ECE 4662. Power Electronics. 3 Credits.

The application of electronics to energy conversion; principles of operation, analysis, and control of circuits; methods of solving power electronic circuits and finding the steady-state values of important quantities; deriving the linear model of the studied power electronic circuits and designing controllers for these devices. A general knowledge of electric circuits and linear control theory is required. Restricted to undergraduate students. (Same as ECE 6662) (Spring, Every Year).

ECE 4710. Control Systems Design. 3 Credits.

Mathematical models of linear systems; steady-state and transient analyses; root locus and frequency response methods; synthesis of linear feedback control systems. Prerequisites: APSC 2114; and ECE 2210 or MAE 3134. (Fall, Every Year).

ECE 4715. Control Systems Laboratory. 1 Credit.

Experiments in support of control theory, involving the use of the digital computer for process control in real time. Design of feedback and compensation with computer implementation. Digital simulation of linear and nonlinear systems. Prerequisite or corequisite: ECE 4710.

ECE 4730. Robotic Systems. 3 Credits.

Modeling and analysis of robot designs. Kinematics of mechanical linkages, structures, actuators, transmissions, and sensors. Design of robot control systems, computer programming, and vision systems. Use of artificial intelligence. Current industrial applications and limitations of robotic systems. Same as MAE 3197. Prerequisite: computer programming, APSC 2058, ECE 4710.

ECE 4735. Robotics Laboratory. 1 Credit.

Experiments illustrating basic principles and programming of robots and other automated machinery. Design and writing of computer programs to use a robot's arm, vision, and data files to accomplish tasks. Prerequisite or corequisite: ECE 4730/MAE 3197.

ECE 4920W. Electrical and Computer Engineering Capstone Project Lab II. 3 Credits.

Program majors take ECE 3915, ECE 4920, and ECE 4925 in sequence beginning in the second semester of their junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Fall, Every Year).

ECE 4925W. Electrical and Computer Engineering Capstone Project Lab III. 3 Credits.

Program majors take ECE 3915, ECE 4920, and ECE 4925 in sequence beginning in the second semester of their junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: ECE 4920W. (Spring, Every Year).

ECE 4980. Special Topics. 1-3 Credits.

Topic to be announced in the Schedule of Classes. (Fall and spring).

ECE 4990. Research. 1-3 Credits.

Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status.

ECE 6005. Computer Architecture and Design. 3 Credits.

Advanced topics in computer architecture and design; instruction-level parallelism, thread-level parallelism, memory, multithreading, and storage systems. (Fall, Every Year).

ECE 6010. Linear Systems Theory. 3 Credits.

Introduction to linear systems theory. Topics include linear vector spaces and linear operators, mathematical representation of dynamic linear systems, concept of state and solution of the state equation, controllability and observability, canonical forms of the state equation, state feedback, and state estimation. (Fall, Spring, Every Year).

ECE 6015. Stochastic Processes in Engineering. 3 Credits.

Axioms of probability; conditional probability; independent events; sequential experiments. Single and multiple random variables. Discrete-valued and continuous-valued stochastic processes; discrete-time and continuous-time stochastic processes; mean, auto-correlation and autocovariance functions; multiple random processes; stationary stochastic processes and linear time-invariant systems; ergodicity; Markov chains. Examples from engineering applications. (Fall, spring, and summer, Every Year).

ECE 6020. Applied Electromagnetics. 3 Credits.

Vector algebra and calculus, Divergence and Stokes theorems, Maxwell's equations, Boundary conditions, Poynting vector theorem, Time harmonic waves, Wave equation, Propagation in lossy media, Skin depth, Plane waves in an arbitrary direction, Polarization, Snell's law, Transmission line equations, Propagation constant, Characteristic impedance, Average power, Waveguides, TEM, TM and TE modes, cutoff frequencies, Vector and scalar potentials, scalar Green's function, Near and far fields from a dipole, radiated power and Antenna fundamentals Recommended background: ECE 4320 or similar course. (Fall, Every Year).

ECE 6025. Signals and Transforms in Engineering. 3 Credits.

Signal spaces and approximation. Orthogonal functions. Fourier series and transform. Bandpass signals and modulation. Hilbert transform and analytic signals. Time frequency analysis. Short-time Fourier transform. Linear systems properties. Laplace transform. Sampling and discrete-time signals. Discrete-time Fourier transform and z-transform. Wavelets. (Fall and spring, Every Year).

ECE 6030. Device Electronics. 3 Credits.

Semiconductor device concepts; doping, drift diffusion, recombination. Analysis of Schottky and Ohmic contacts, pn junctions, MOS systems. Modeling and analysis of semiconductor devices such as MOSFET and bipolar transistors. Hot electron and short and narrow channel effects. (Spring, Every Year).

ECE 6035. Introduction to Computer Networks. 3 Credits.

Layered protocol architectures. Digital transmission, fundamental limits. Error detection and ARQ protocols. Data link layer and control. Multiple access protocols. Circuit and packet switching. Multiplexing. Routing. Flow and congestion control, queue management. LAN standards. TCP/IP. Next-generation Internet. (Fall and spring, Every Year).

ECE 6045. Special Topics. 0-3 Credits.

Topics vary by semester. May be repeated provided topic differs. See department for details. (Fall and spring, Every Year).

ECE 6050. Research. 1-12 Credits.

Applied research and experimentation projects, as arranged. May be repeated for credit.

ECE 6060. Electric Power Generation. 3 Credits.

Primary traditional/conventional and alternative/renewable energy sources and energy storage applications. Large generation plants and distributed small generation units and impact on transmission and distribution systems operation and infrastructure. Review of applicable schemes of hybrid generation. Evaluate smart grid objectives on long and short term stability of large power networks. (Fall, Every Year).

ECE 6105. Introduction to High-Performance Computing. 3 Credits.

Taxonomy and classifications of computers and parallel computers. Parallel thinking and parallel algorithms. Domain decomposition and load balancing. Programming parallel computers using the message passing, global address space, and partitioned global address space paradigms. Restricted to graduate students in science or engineering or permission of the instructor. (Fall, Every Year).

ECE 6120. Advanced Microarchitecture. 3 Credits.

Review of computer architecture fundamentals performance and power; pipeline design and hazards; superscalar pipelines, speculation and recovery; fetch logic and instruction caches; branch prediction; decoder logic for CISC and RISC; scheduling and instruction issue; ALUs and register files; memory optimizations; commit logic. Prerequisite: ECE 6005. Recommended background: Students should have taken at least one course in computer architecture, such as ECE 6005 or equivalent, prior to enrollment. (Spring, Every Year).

ECE 6125. Parallel Computer Architecture. 3 Credits.

Architectural classifications and taxonomies of parallel computers; enabling technologies, including advanced processor concepts, interconnection networks, high-speed memory architectures and protocols; parallel performance and scalability; and introduction to parallel algorithms and parallel programming. Prerequisites: ECE 6005 or ECE 6105. (Spring, Every Year).

ECE 6130. Big Data and Cloud Computing. 3 Credits.

This course covers a wide range of research topics related to big data and cloud computing, including data centers, virtualization, hardware and software architecture, as well as system-level issues on performance, energy efficiency, reliability, scalability and security. Prerequisites: ECE 6005 or ECE 6105. (Spring, Every Year).

ECE 6132. Secure Cloud Computing. 3 Credits.

The course provides a comprehensive guide to security concerns and best practices for cloud computing and cloud services. Topics discussed include cloud computing architectures, risk issues and legal topics, data security, internal and external clouds, information security frameworks and operational guidelines. Offered as arranged. Restricted to students in the MEng in cybersecurity policy and compliance program. (Summer, Every Year).

ECE 6140. Embedded Systems. 3 Credits.

Architectural advances and instruction sets for embedded microprocessors. Real-time operating systems and real-time scheduling, use of pre-designed software and hardware cores. Sensors, actuators, and data acquisition. System-on-chip (SoC). Design case studies. Prerequisite: ECE 6005. (Fall, Every Year).

ECE 6150. Design of Interconnection Networks for Parallel Computer Architectures. 3 Credits.

In-depth study and fundamental design principles of interconnection networks for parallel computing architectures including network-on-chips for multicores and chip multiprocessors (CMPs), interconnection networks for multiprocessors, multi-computers, and datacenters; interconnect topologies, routing protocols and algorithms, switching techniques, flow control protocols, router design, modeling and simulation tools, interconnect reliability, scalability, security, emerging technologies for interconnects (optical, wireless, radio frequency), emerging applications (neuromorphic, quantum, and approximate computing), case studies covering modern commercial examples. Restricted to SEAS graduate students. Prerequisites: ECE 6005 or equivalent. Recommended background: Prior completion of a course in computer organization or computer architecture, which may be ECE 3515 or ECE 6005 or an equivalent. (Spring, Every Year).

ECE 6213. Design of VLSI Circuits. 3 Credits.

This class covers top-down ASIC/FPGA design methodology; Modeling of VLSI circuits using HDL; Behavioral, Structural, and RTL modeling techniques; Logic synthesis techniques; Design verification plan and techniques; Students design and verify a final project using state-of-the-art commercial VLSI CAD tools for ASIC and FPGA (Altera). (Fall, Every Year).

ECE 6214. High-Level VLSI Design Methodology. 3 Credits.

This class covers advanced ASIC-FPGA design methodology including: synthesis methodology for both ASIC and FPGA design flow, DSP design for mobile device and implementation to ASIC and FPGA, low-power SOC design, CPF implementation, area/delay/power optimization and trade-offs, DFT, DFM, Low-Power design for mobile device, and Hardware/Software co-design. Advanced low power design for multi-core CPU architecture, LP top-down design flow with CPF implementation/verification. Students design and verify a final project using ASIC CAD tools and FPGA demo board with built-in LA. Prerequisite: ECE 6213. (Spring, Every Year).

ECE 6215. Introduction to MEMS. 3 Credits.

Introduction to microelectromechanical and nanoelectromechanical systems (MEMS/NEMS). Basic principles of simulating, designing, and fabricating MEMS/NEMS. Prerequisite: ECE 6240. Recommended background: Students in this course should have taken at least one prior course in ECE 6240; If unsure, contact the instructor, and discuss the pre-requisite requirements. (Spring, Every Year).

ECE 6216. RF/VLSI Circuit Design. 3 Credits.

Introduction to radio frequency systems: RF design, specifications, S-parameters, gain, noise, stability, matching concepts, small signal amplifiers, low noise amplifiers, power amplifiers, system-level design. In this course students use CAD tools such as ADS and other industrial tools to design class project. Prerequisite: ECE 6240. (Spring, odd years).

ECE 6218. Advanced Analog VLSI Circuit Design. 3 Credits.

CMOS technology, CMOS analog building blocks, current sinks, current sources, current mirrors, voltage references, CMOS amplifier design, feedback circuits, frequency response, compensation. Analysis of circuit variants: cascoding, active replacement elements – non-linear circuits. A/D converter design, examples of CMOS A/Ds. Mixed-signal layout techniques. Students are required to design CMOS Analog Circuit project, and submit final design Layout together with simulation using CAD (CADENCE analog design) simulation tools. Final report is required. Prerequisite: ECE 6240. (Spring, even years).

ECE 6221. Introduction to Physical Electronics. 3 Credits.

Theoretical principles underlying the operation of electronic devices; postulates of quantum mechanics: wave-particle duality, uncertainty relations, electronic band structure; free-carrier statistics; electron-photon interaction; physical principles of semiconductor and optoelectronic devices. (Fall, Every Year).

ECE 6240. VLSI Design and Simulation. 3 Credits.

Study of VLSI circuit design including PMOS and NMOS transistor analysis, switch and gate logic design, understanding of semiconductor fabrication processes and design rules, CAD system, speed and power considerations, scaling of transistors to the nano-scale, and designing with highly variable process parameters. Each student designs a VLSI chip, simulates the design and submits a GDS II file for Chip fabrication. (Same as ECE 4140) (Fall, Every Year).

ECE 6245. Micro- and Nanofabrication Technology. 3 Credits.

Introduction to the basic fabrication principles at the micro- and nanoscale; practical experience and fabrication of simple devices. Restricted to graduate students. Prerequisite: ECE 2150. (Fall, Every Year).

ECE 6250. ASIC Design and Testing of VLSI Circuits. 3 Credits.

ASIC and mixed-signal design methodology, use of ASIC design CAD tools. Logic synthesis, styles of synthesis, power/area/speed constraints. MIPS CPU HDL implementation/verification/testing. VLSI testing, fault models, design for testability techniques, scan path, built-in self-test. Testing of chips designed and fabricated in ECE 4140/6240 or equivalent chips. Prerequisite: ECE 6240. (Spring, Every Year).

ECE 6260. Introduction to Nanoelectronics. 3 Credits.

Nanoscience and technology and nanoelectronics. Basic nanofabrication steps; techniques to build devices such as carbon nanotubes, graphene device, and other 2D nanoelectronic devices. Tools for performing design and characterizations of nanodevices, including scanning electron microscopy (SEM), atomic force microscopy (AFM), and transmission electron microscope (TEM). (Same as ECE 4160) (Fall, Every Year).

ECE 6500. Information Theory. 3 Credits.

Introduction to the mathematical representation of information, including the concepts of entropy, mutual information and information transfer over noisy media; mathematical representation of information sources; entropy and mutual information; noiseless and noisy coding theorems; data compression; communication channels and their capacity to convey information; and rate distortion theory. Prerequisite: ECE 6015. (Spring, odd years).

ECE 6505. Error Control Coding. 3 Credits.

Introduction to the principles governing the mathematical theory of error detecting and correcting errors occurring in the transfer of information over digital communication channels. Prerequisite: ECE 6015. (Spring, Every Year).

ECE 6510. Communication Theory. 3 Credits.

Principles of digital communications. Channels, digital modulation; optimum receivers and algorithms in the AWGN; coherent, non-coherent, and fading channels. Correlation detectors, matched filters; diversity. Bounds on performance of communications, comparison of communications systems and implementation issues. Prerequisite: ECE 6015. (Spring, Every Year).

ECE 6520. Mobile and Wireless Communication Systems. 3 Credits.

Characterization of mobile and wireless channels. Indoor and outdoor path loss models. Multipath propagation. Fading and fading countermeasures: coding, equalization. Power control. Cellular design and frequency reuse. Modulation and coding techniques. Spread Spectrum and OFDM. Random access methods. Code and Space Division Multiple Access, MIMO. Prerequisite: ECE 6510. (Fall, odd years).

ECE 6525. Satellite Communication Systems. 3 Credits.

Low earth orbit and geostationary satellite systems; transmission systems; RF link budgets; modulation and multiplexing; multiple access techniques, including FDMA, TDMA, and CDMA; satellite transponders, antennas, and earth stations. Prerequisite: ECE 6510. (Fall, Every Year).

ECE 6530. Electronic Warfare. 3 Credits.

Electronic attack and protection of information; countermeasures and counter-countermeasures; attacks on ranging and tracking radar systems; jamming and jamming defense; attacks on communications systems; defensive techniques, signal design, spread spectrum; attack and defense of optical and high-energy systems. Offered as arranged. Prerequisite: ECE 6510. (Summer, Every Year).

ECE 6550. Network Architectures and Protocols. 3 Credits.

The course covers network topologies and control structures; Switching and routing of information streams; Internet transmission protocols; Data representations and codes; Application protocols; Mail and file transfer protocols; and Network management systems. Prerequisite: ECE 6035. (Spring, Every Year).

ECE 6560. Network Performance Analysis. 3 Credits.

Telecommunications traffic models: arrival and service time distributions, Poisson and Erlang formulas. Topological design algorithms. Delay and blocking models and probabilities for packet switched networks. Routing, relaying, and flow control algorithms: delay and cost minimization, throughput optimization. Prerequisites: ECE 6015 and ECE 6035. (Fall, Every Year).

ECE 6565. Telecommunications Security. 3 Credits.

Speech and data scrambling. Linear and nonlinear transformations. Cryptographic techniques. Block and stream ciphers. The Data Encryption Standard (DES). Key management, digital signatures, message authentication, hash functions. Public key algorithms. Restricted to Students with graduate standing in science or engineering or with the permission of the instructor. (Fall, Every Year).

ECE 6570. Telecommunications Security Protocols. 3 Credits.

The OSI security architecture: services and mechanisms; risk analysis; Internet protocol security mechanisms; Ipv4 and Ipv6 security; security associations, authentication, MD5; encapsulating security payload (ESP); e-mail security: PGP, S/MIME, PEM, MSP; secure voice communications algorithms; security in Internet commerce: SSL, SET. Offered as arranged. Prerequisites: ECE 6035 and ECE 6565. (Fall and spring, Every Year).

ECE 6575. Optical Communication Networks. 3 Credits.

Wave propagation through fiber, dispersion, polarization. Multiplexing techniques, WDM. Optical networking components. Optical transmission systems design. All-optical networking, broadcast star and wavelength routing networks. Performance analysis, survivability, control and management. Optical access networks. (Fall, Every Year).

ECE 6580. Wireless Networks. 3 Credits.

The course introduces students to the principles governing the design and implementation of various types of wireless networks; mathematical analysis of telecommunications traffic; technology of wireless information transmission systems; first, second and third generation cellular networks based on circuit and packet switching principles; capacity sharing and duplex transmission; Time Division and Code Division Multiplex system; fourth and fifth generation cellular networks; wireless local and personal area networks; performance evaluation of wireless cellular and local area networks. Prerequisite: ECE 6035. (Spring, Every Year).

ECE 6610. Electrical Energy Conversion. 3 Credits.

Three-phase and single-phase AC rotating machines and transformers, DC machines, rotating machines as circuit elements, power semiconductor converters. Renewable generation, utility grid integration, smart grid applications. May be taken for graduate credit by students in fields other than electrical engineering. (Spring, Every Year).

ECE 6620. Electrical Power Systems. 3 Credits.

AC power grids, transmission line parameters, load flow, economic dispatch voltage, frequency, and power flow control. Voltage, current, and power limitations. Fault analysis and stability considerations. Effect of independent power producers and variable energy sources and energy storage. (Same as ECE 4620) (Fall, Every Year).

ECE 6662. Power Electronics. 3 Credits.

The application of electronics to energy conversion. Principles of operation, analysis, and control of circuits including solid-state electronic switches. Methods of solving power electronic circuits and finding the steady-state values of important quantities. Deriving the linear model of the studied power electronic circuits and designing controllers for these devices. A general knowledge of electric circuits and linear control theory is required. (Spring, Every Year).

ECE 6666. Power System Transmission, Control, and Security. 3 Credits.

Analysis of AC networks, load flow, transient stability, economic dispatch, reactive compensation, FACTS, effects of alternative generation, voltage and frequency control, N-1 contingency, restoration techniques. Offered as arranged. Prerequisite: ECE 6620. (Fall and spring, Every Year).

ECE 6667. Nuclear Power Generation. 3 Credits.

Review of nuclear reactor engineering, traditional and developing reactor design, issues regarding the safe operation of nuclear plant, and control and regulatory aspects of nuclear power generation. Prerequisite: ECE 6620. (Fall, even years).

ECE 6668. Power Distribution Grids. 3 Credits.

Equipment for power distribution for industrial, commercial and residential applications. Switching and safety at the distribution voltage level. Bulk Insulation Level and Insulation coordination principles. Applications of 'smart-grid' innovations to short and long-term development of remote metering and customer communications. Selection and Application of Protective Relays, Fuses, Ground-Fault Protection. Prerequisite: ECE 6060. (Fall, odd years).

ECE 6669. Smart Power Grids. 3 Credits.

Overview of probability theory. Overview of basic power market reliability modeling and evaluation. Generation supply reliability techniques, modeling and evaluation. Reliability of transmission system and delivery of supply. Loss of load probability evaluation. Forced and maintenance outages and impact on system reliability. Load forecasting and probability of interconnected systems. Risk evaluation in power system operation. Operating reserve techniques and indices. Distribution system reliability including substations. Composite system reliability modeling. Reliability worth and value. (Spring, odd years).

ECE 6670. Power System Protection. 3 Credits.

Main philosophy for protection of power systems. Protection systems and approaches. Reliability and security of protection systems. Protection of Generators, Transformers, Motors and Transmission Lines. Requirements for Distributed Source Generation (DSG's). Requirements for system protection, to prevent grid blackouts and to enhance power system security. Prerequisite: ECE 6620. (Spring, even years).

ECE 6690. Power Systems Economics. 3 Credits.

Overview of electrical power market economics and market participants. Production pricing and market clearing pricing. Market ancillary service pricing. Location marginal pricing and zonal pricing schemes. New electrical generation entrant impact. Investing in generation and in transmission. Independent power producers and independent transmission owners. Offered as Arranged. (Fall and spring, Every Year).

ECE 6691. Power Systems Reliability. 3 Credits.

Overview of probability theory. Overview of basic power market reliability modeling and evaluation. Generation supply reliability techniques, modeling and evaluation. Reliability of transmission system and delivery of supply. Loss of load probability evaluation. Forced and maintenance outages and impact on system reliability. Load forecasting and probability of interconnected systems. Risk evaluation in power system operation. Operating reserve techniques and indices. Distribution system reliability including substations. Composite system reliability modeling. Reliability worth and value. (Spring, even years).

ECE 6699. Energy and Sustainability. 3 Credits.

Energy sources; consumptions; societal and environmental impacts; energy generation and harvesting technology; thermodynamics and efficiency limits; nanotechnology for sustainability; emission and pollution; growth models; learning curves; life-cycle-analysis; energy in an international perspective. Offered as arranged. Recommended background: A basic understanding of energy and thermodynamics such as material covered in ECE 4620 and MAE 2131. (Fall and spring, Every Year).

ECE 6710. Microwave Engineering. 3 Credits.

Graduate level elective course open to Electrical Engineering graduate students. Topics include transmission line theory, transmission lines and waveguides, waveguide discontinuities, microwave networks, impedance matching and tuning, microwave resonators, power dividers and directional couplers, and microwave filters and active microwave circuits. Prerequisite: ECE 6020. (Fall, even years).

ECE 6715. Antennas. 3 Credits.

Graduate level elective course open to Electrical Engineering graduate students. Topics include antenna circuits, radiation pattern, reciprocity, gain, receiving cross-section, scattering by antennas, mutual coupling, arrays; polarization; radiation from current distributions, equivalent aperture currents, dipoles, patch antennas, large phased arrays. Restricted to graduate students in electrical engineering. Prerequisite: ECE 6020. (Spring, odd years).

ECE 6720. Remote Sensing. 3 Credits.

Active and passive remote-sensing systems: scatterometers, real-aperture imaging, and synthetic-aperture radars. Sensing of surface, subsurface, and atmospheric parameters at microwave, infrared, and optical frequencies. Analysis of radiometric techniques using radiative transport theory, inverse scattering methods, profile inversion. The course is intended to provide graduate students and engineers with an in-depth understanding of the fundamentals of remote sensing at microwave, infrared and optical frequencies with emphasis on recent research innovations in these areas. Prerequisite: ECE 6020. (Spring, even years).

ECE 6725. Electromagnetic Radiation and Scattering. 3 Credits.

Alternative representations of solutions to Maxwell equations, Fourier transforms and spherical mode representations, field equivalence principle, dyadic Green's functions, radiation and scattering by simple shapes, geometrical theory of diffraction, integral equations and the moment method. Offered as arranged. Prerequisite: ECE 6020. (Fall and spring, Every Year).

ECE 6730. Waves in Random Media. 3 Credits.

Propagation and scattering of electromagnetic, optical, and acoustic waves in random media, scattering from rough surfaces and randomly distributed particles, turbulence. Applications to propagation through rain and fog. Laser beam scintillations, remote sensing, and communications channel modeling. Monte Carlo simulation. The course is intended to provide graduate students and engineers with an in-depth understanding of the fundamentals of wave propagation in complex media at microwave, infrared and optical frequencies with emphasis on recent research innovations in these areas. Offered As Arranged. Prerequisite: ECE 6725. (Summer, Every Year).

ECE 6735. Numerical Electromagnetics. 3 Credits.

Systematic discussion of useful numerical methods in computational electromagnetics including integral equation techniques and differential equation techniques, both in the frequency and time domains. Hands-on experience with numerical techniques, including the method of moments, finite element and finite difference time-domain methods, and spectral integral methods. Related numerical issues such as accuracy, stability and dispersion are discussed. Examples are drawn from various electromagnetic applications such as nanowires, waveguides, and antenna radiation. Prerequisites: ECE 6020, ECE 6025, and ECE 6800. (Fall, odd years).

ECE 6745. Analysis of Nonlinear and Multivalued Devices. 3 Credits.

Numerical techniques for modeling semiconductor and magnetic devices; modeling multivalued behavior of memory materials; optimization of geometry. Offered as arranged. Prerequisite: ECE 6020. (Fall and spring, Every Year).

ECE 6750. Modern Radar Systems. 3 Credits.

The radar range equation. Radar cross section of targets, target detection and parameter estimation, detection in clutter. Resolution, ambiguities, and signal design. Moving-target indicators. Pulse Doppler radar. Radar antennas, phased arrays. Synthetic aperture and space-based radar. The course is intended to provide graduate students and engineers with an in-depth understanding of the fundamentals of wave propagation in complex media at microwave, infrared and optical frequencies with emphasis on recent research innovations in these areas. Offered as arranged. Prerequisite: ECE 6015. (Fall and spring, Every Year).

ECE 6760. Propagation Modeling in Wireless Communications. 3 Credits.

Wireless communication channel modeling, propagation mechanisms, terrestrial fixed links, mobile satellite systems, macrocells, fading models, microcells, picocells, diversity, equalizers. Specific applications to 3G, 4G and 5G mobile systems. Prerequisite: ECE 6020. (Spring, odd years).

ECE 6765. Photonics and Fiber Optics. 3 Credits.

Concepts of opto-electronic devices; light-matter-interaction; absorption; device details and applications discussed: laser, photodetector, modulators, optical cavity, waveguides and optical fibers; device and link considerations include: energy-per-bit, modulation speed, and nano fabrication; plasmonics and nanophotonics; industry perspective. Recommended background: Students should have taken at least one prior course in electromagnetism and semiconductors at the undergraduate level. (Spring, even years).

ECE 6770. Applied Magnetism. 3 Credits.

Classification of magnetic materials. Magnetic measurements. Soft and hard magnetic materials. Applications to microwave, magnetic recording, permanent magnets, magneto-optics, magnetic refrigeration, sensors, magnetostrictive devices. Electric power. Superconducting devices. Offered as arranged. Prerequisite: ECE 6020. (Summer, Every Year).

ECE 6800. Computational Techniques in Electrical Engineering. 3 Credits.

Introduction to linear algebra and vector spaces as applied to networks and electrical systems. Orthogonal bases, projections, and least squares. Fast Fourier transforms. Eigenvalues and eigenvectors with applications. Computations with matrices. Constrained optimization in electrical systems. Network models and applications. Special relativity. (Fall, Every Year).

ECE 6810. Speech and Audio Processing by Computer. 3 Credits.

The objective of this course is to introduce computer processing of speech and audio. Topics include: acoustic sensor technologies and characteristics, direction finding, speech analysis and synthesis, audio formats and compression standards, time-varying autoregressive models, speech recognition, automatic target recognition. Restricted to graduate students. (Fall, Every Year).

ECE 6815. Multimedia Processing. 3 Credits.

Introduction to multimedia. Formats, conversion and combinations; delivery and trends; servers and networks; hardware and architecture; enduser devices; digital libraries, video conferencing and collaboration; and educational and health applications. Case studies and trials. Offered as arranged. Restricted to graduate students with programming experience in C, C++ or Java. Prerequisite: ECE 6005. (Fall and spring, Every Year).

ECE 6820. Real-Time Digital Signal Processing. 3 Credits.

Digital signals, binary number representation, fixed-point and floating-point DSP architectures. Q-format for data representation, bit allocation and arithmetic. Portability of arithmetic expressions: floating point vs. fixed point. Development of real-time signal processing software. Applications to signal parameter estimation, signal generation, filtering, signal correlation, spectral estimation (FFT). Offered as arranged. Prerequisite: ECE 6005. Recommended background: Students in this course should have taken at least one prior course in ECE 6005 Computer Architecture and Design and have a basic knowledge of computer architecture and DSP algorithms; Knowledge of C programming language, assembly language and MATLAB is desirable; If unsure, contact the instructor, and discuss the pre-requisite requirements. (Fall and spring, Every Year).

ECE 6825. Computer Control Systems. 3 Credits.

Analysis of automatic control systems in which the control procedure uses on-line digital computation. Topics include single- and multi-rate sampling, z-transforms, responses of discrete systems, stability criteria, and discrete control design. Prerequisite: ECE 6010. (Fall, odd years).

ECE 6830. System Optimization. 3 Credits.

Parameter optimization problems, theory of minima and maxima. Optimization problems for dynamic systems, calculus of variations, the maximum principle and the Hamilton-Jacobi equation. Optimization problems with constraints, optimal feedback systems. Numerical solution of optimal problems. Prerequisite: ECE 6010. (Spring, Every Year).

ECE 6835. Nonlinear Systems. 3 Credits.

Definition of linear and nonlinear systems; introduction to approximate analysis of nonlinear systems: describing functions, Krylov and Bogoliubov asymptotical method, and Tsytkin locus. Forced oscillations: jump resonance. Stability analysis: Liapunov criterion. Lur  problem and Popov's method. Prerequisite: ECE 6010. (Fall, even years).

ECE 6840. Digital Image Processing. 3 Credits.

Properties of images and visual systems; image acquisition, sampling, quantization; one- and two-dimensional image transform techniques; enhancement and restoration; image coding and data compression; segmentation, representation, boundary and shape, texture, matching. Image understanding. Students should have completed at least one prior course in computational methods or signal processing, such as ECE 6800 or equivalent, prior to enrollment. Contact the instructor if uncertain as to whether this requirement has been met. Prerequisite: ECE 6800. (Spring, odd years).

ECE 6842. Image Engineering. 3 Credits.

Solid-state imaging devices and image engineering; basic understanding of the detection and noise processes underlying the sensing of optical radiation and the engineering and physics of image formation; radiometry, optics and image formation, and imaging devices; image quality metrics and system design trades. Students should have completed at least one course in linear systems and stochastic processes prior to enrollment. Contact the instructor if uncertain as to whether this requirement has been met. (Fall, even years).

ECE 6845. Image Synthesis. 3 Credits.

The objective of this course is to introduce techniques for synthesizing images using mathematical models and other reconstruction techniques. The course starts with introduction to image formation process, then other techniques for synthesizing color textures and three-dimensional scenes are covered. Prerequisite: ECE 6015. (Spring, Every Year).

ECE 6850. Pattern Recognition. 3 Credits.

Random vectors, transformations; hypothesis testing, error probability, sequential methods. Bayes, other linear classifiers; discriminant functions, parameter estimation, learning, and dimensionality reduction; nonparametric methods; clustering; feature selection and ordering; computer applications and projects. Students should have completed at least one prior course in probability and statistics, such as ECE 6015 or equivalent, prior to enrollment. Contact the instructor if uncertain as to whether this requirement has been met. Prerequisite: ECE 6015. (Fall, odd years).

ECE 6855. Digital Signal Processing Techniques. 3 Credits.

Signal and system representation, sampling and quantization, transform techniques. Recursive and nonrecursive digital filter design, recursive estimation, linear predictive filtering. Fast algorithms for signal processing. Current topics. Prerequisite: ECE 6015. (Fall, Every Year).

ECE 6860. Compression Techniques for Data, Speech, and Video. 3 Credits.

Lossless and lossy coding theorems, rate distortion bound. Data compression algorithms: Huffman coding, run-length coding. Differential coding. Transform coding. Voice, audio, image and video coding techniques: CELP, JPEG, MPEG, MP3. Data coding standards: G.722, G.726, G.728, H.261, H.323. Offered as arranged. Prerequisites: ECE 6015 and ECE 6025. (Fall and spring, Every Year).

ECE 6865. Statistical Signal Estimation. 3 Credits.

Minimum variance unbiased estimation. Cramer-Rao bound, statistical modeling, sufficient statistics, maximum likelihood estimation, efficient estimators, least squares. Bayesian estimators. Wiener and Kalman filters, complex data and parameters. Applications to radar, speech, image, biomedicine, communications, controls. Prerequisite: ECE 6015. (Fall, odd years).

ECE 6875. Wavelets and Their Applications. 3 Credits.

Time-frequency analysis. Multiresolution analysis. Continuous, discrete, and discrete-time wavelet transform. Multirate filter banks. Multiband wavelets, two-dimensional wavelets. Wavelet packets and matching pursuit. Wavelets in noise filtering, compression, modeling of fractals, communications, detection, adaptive systems, and fast computation. Prerequisites: ECE 6025 and ECE 6855. (Spring, odd years).

ECE 6880. Adaptive Signal Processing. 3 Credits.

Adaptation criteria. Least mean square and recursive least square. Convergence of adaptive algorithms and tracking. Linear and nonlinear Kalman filters. Blind source separation. Iterative (turbo) decoding and equalization. Nonlinear/non-Gaussian models: particle filtering. Machine learning: back propagation, support vector machines. Applications in system identification, adaptive channel equalization, interference cancellation and suppression, and adaptive antenna arrays. Prerequisite: ECE 6865. (Spring, even years).

ECE 6885. Computer Vision. 3 Credits.

Image processing; edge detection, segmentation, local features, shape and region description in 2D and 3D. Insights from human vision studies. Representation for vision: object models, synthetic images, matching, gaps, algorithms. Interference, production system, syntactic networks. Planning spatial reasoning for robot vision. Prerequisites: CSCI 6511; and ECE 6850. Recommended background: Students in this course should have taken at least one prior course in artificial intelligence and/or pattern recognition; Acceptable courses include ECE 6850 (Pattern Recognition), or an equivalent course; If unsure, contact the instructor, and discuss the prerequisite requirements. (Spring, even years).

ECE 6998. Thesis Research. 3 Credits.**ECE 6999. Thesis Research. 3 Credits.****ECE 8150. Advanced Topics in Computer Architecture. 3 Credits.**

Examples of topics are interconnection networks, fault tolerance, load balancing, workload characterization, and performance modeling of advanced computer systems. Prerequisite: ECE 6120, ECE 6125.

ECE 8999. Dissertation Research. 0-12 Credits.

May be repeated for credit. Restricted to doctoral candidates. (Fall and spring, Every Year).

EMERGENCY HEALTH SERVICES (EHS)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

EHS 1002. CPR and First Aid. 1 Credit.

Development of the proper techniques of cardiopulmonary resuscitation and first aid. Nationally recognized certification provided.

EHS 1025. Introduction to Prehospital Care. 2 Credits.

Concepts of prehospital care, including terminology, basic emergency care, communication, and anatomy and physiology for emergency care; first aid and Basic Life Support (BLS) training. Restricted to students in the health sciences program. Prerequisites: HSCI 1101, HSCI 1102 and HSCI 1103.

EHS 1040. Emergency Medical Tech-Basic. 3 Credits.

EMT-Basic knowledge and skills. Includes basic life support, patient assessment, bleeding control, bandaging and splinting. Successful completion makes student eligible to sit for National Registry certification exam.

EHS 1041. EMT - Basic Lab. 1 Credit.

Application and practice of EMT-Basic skills.

EHS 1044. EMT - Basic Recertification. 3 Credits.

Prepares students to recertify as a National Registry EMT-Basic. Includes an "EMT Refresher" class and continuing education program. Laboratory fee.

EHS 1058. EMT Instructor Development. 2 Credits.

Students develop and deliver didactic and skill instruction. Students participate in the day-to-day teaching and management in an EMT-Basic program.

EHS 1101. Introduction to Emergency Health Services I. 2 Credits.

Introduction to concepts of emergency health services; medical emergency management in a prehospital environment and EMS operations. Criminal background check required. Prerequisite: EHS 1025.

EHS 1102. Introduction to Emergency Health Services II. 2 Credits.

Continuation of topics introduced in EHS 1101, including managing medical emergencies, trauma emergencies, and working with special patient populations. Restricted to students in emergency health services program. Prerequisites: EHS 1025 and EHS 1101.

EHS 2104. Legal Aspects in Emergency Management. 3 Credits.

Legal issues in the delivery of emergency medical services, including abandonment, malpractice, negligence, patient consent, the Freedom of Information and Privacy Acts, the Good Samaritan law, protocol deviation, record keeping, patient refusal of services, and medical control. Emergency medicine legislation and recent court decisions. Prerequisite: HSCI 2103.

EHS 2107. Theory and Practice of Research in a Clinical Setting. 4 Credits.

Fundamentals of clinical research methods, design, and analysis related to emergency medicine.

EHS 2108. Emergency Medicine Clinical Scribe. 3 Credits.

Fundamentals of emergency medicine clinical practice through documentation and management of clinical information. Students participate as members of an emergency medicine team and explore topics related to emergency health care, e.g., practical human anatomy, medical terminology, diagnosis, patient care, medical records, and practice management.

EHS 2109. Infectious Diseases and Bioterrorism. 3 Credits.

Examination of the basic principles of epidemiology, the growing problem of emerging infectious diseases, the threat of biological warfare, and emergency preparedness planning and response for large-scale biological events. Restricted to students in the health sciences program or with the instructor's permission. Recommended background: 4 credits in courses in the areas of biology or anatomy and physiology; or HSCI 2102.

EHS 2110. Emergency Department Critical Care Assessment and Procedures. 4 Credits.

Expansion of EMT-Basic knowledge and skills for independent performance as a hospital technician; emphasis on the Emergency Department and Intensive Care Units.

EHS 2131. History Taking and Physical Examination. 2 Credits.

Conducting an assessment of patients' health care needs and providing basic care during the patient intake process. Restricted to students in SMHS. Prerequisites: HSCI 1101, HSCI 1102 and HSCI 1103.

EHS 2160. Disaster Response Planning and Management. 3 Credits.

Planning for and management of mass-casualty incidents in the pre-hospital and hospital environments for all risks (attack, man-made, and natural), including development of response plans, triage, medical evacuation procedures, communications, roles of government and the private sector, terrorism, pandemics and epidemics, and medical care for mass gatherings. Restricted to students in the health sciences program or with the instructor's permission.

EHS 2161. Principles of Hazardous Materials and CBRNE Incident Management. 3 Credits.

Examination of hazardous materials and their risks, including chemical, biological, radiological, nuclear, and explosives (CBRNE). Identification of hazardous materials and related problems, precautions in approaching the contaminated patient, protective clothing, decontamination, and management of selected hazards, and countermeasures. Restricted to students in the health sciences program or with the instructor's permission. Recommended background: 4 credits in courses in biology or anatomy and physiology; or HSCI 2102.

EHS 2162. Introduction to the Principles of Tactical Medicine. 4 Credits.

The basics of tactical emergency medicine, such as acute care in tactical combat situations and medical operations support of tactical teams.

EHS 2166. Current Topics. 1 Credit.

Review of the current literature to identify clinical, operational, educational, and administrative issues important in the leadership of EMS.

EHS 2174. Foundations of Emergency Health Services Systems. 3 Credits.

An overview of the design and operation of Emergency Health Services (EHS) systems, delivery of services, and the echelons of care. The history of Emergency Medical Services (EMS), the interface of public and private organizations and review of the various personnel who comprise these systems is examined in relation to their impact on the health care delivery system.

EHS 2175. Community Risk Management and Safety in EHS. 3 Credits.

This course introduces the EHS professional to the benefits of community information and community relations. Students analyze strategies for introducing risk reduction programs and apply these concepts in the development of such programs.

EHS 2211. Introduction to Telemedicine. 3 Credits.

An introduction to the ethical, legal, and technical aspects of telemedicine, including, but not limited to, emerging technologies, planning and operational considerations. Students complete a number of practical exercises requiring direct application and utilization of Internet, video, audio, and other technologies.

EHS 3101. Leadership Concepts. 3 Credits.

Leadership topics in the context of emergency action and disaster response, including developing leadership skills, team and group dynamics, and contrasting military and civilian leadership structures. Restricted to students in the health sciences program or with the instructor's permission.

EHS 3103. Technology in Critical Incident Response. 3 Credits.

Examination of the role of technology in critical incident response through an assessment of domestic and international cases. Restricted to students in the health sciences program or with the permission of the instructor. Prerequisite: EHS 2160.

EHS 3105. Integrated Response to High Impact Violent Incidents. 3 Credits.

Examination of resources and response strategies needed to mitigate high impact, violent incidents involving an ongoing threat; evaluation of multiagency and multidiscipline integrated operations, mass casualty events, and terrorism. Restricted to students in the health sciences program or with the instructor's permission. Prerequisite: EHS 2160.

EHS 3107. Financial Management for the Disaster Cycle. 3 Credits.

Financial management, budgeting, and grants management in the emergency response and preparedness arenas. Restricted to students in the health sciences program or with the instructor's permission. Prerequisite: EHS 2160.

EHS 4101. Humanitarian Relief Operations. 3 Credits.

An integrative approach to humanitarian relief operations, including factors that can influence relief delivery, field planning considerations, and the roles and limitations of non-governmental organizations, international organizations, local government, and various federal and civilian and military agencies. Emphasis on medical aspects of working with particular populations such as women, children, the elderly, and culturally underrepresented or persecuted population subsets.

EHS 4103. Advanced Topics in Leadership. 3 Credits.

Leadership topics for emergency managers and responders, including leadership in complex systems, change management, interagency collaboration, and leadership in domestic and international responses. Restricted to students in the health sciences program or with the instructor's permission. Prerequisite: EHS 3101. Recommended background: EHS 2160.

EHS 4105. Operations Management in Asymmetric Conditions. 3 Credits.

Application of operations management principles in asymmetric conditions, including multi-dimensional approaches and responses to attack, man-made, and natural disasters. Restricted to students in the health sciences program or with the instructor's permission. Prerequisites: EHS 2160 and EHS 3101.

EHS 4110. Operations Management in Emergency Health Services Systems. 3 Credits.

Applies principles of general management that contribute to the effectiveness of day to day operations within an Emergency Health Services Organization.

EHS 4111. Leadership Concepts in EHS. 3 Credits.

This course is designed to provide a basic introduction to leadership by focusing on what it means to be a good leader. Emphasis in the course is on the practice of leadership in the Emergency Health Services setting. The course examines topics such as: the nature of leadership, recognizing leadership traits, developing leadership skills, creating a vision, setting the tone, listening to out-group members, handling conflict, overcoming obstacles, and addressing ethics in leadership. The course provides a special focus on facilitating students' understanding of their own leadership vision.

EHS 4112. Special Operations and Disaster Management. 3 Credits.

This course is an introduction to Emergency Health Services (EHS) Special Operations. The student develops and applies a general understanding of what constitutes special operations and resources needed to mitigate special operations incidents, both small and large, in the twenty-first century. The student is able to evaluate local special operations incidents, major multi-agency operations, scheduled and unscheduled mass casualty events, terrorism and natural disaster.

EHS 4144. Seminar in EHS Leadership. 3 Credits.

A senior capstone course, integrating the theories and concepts covered in previous work, with a focus on the identification and resolution of problems and opportunities encountered by the health sciences manager. To be taken in the final semester of study or with the program director approval.

EHS 4160. Project Management and Leadership Capstone. 3 Credits.

Capstone course using challenges and opportunities encountered by emergency managers to apply and develop project management and leadership approaches. Restricted to students in the health sciences program or with the instructor's permission. Prerequisites: EHS 2160 and EHS 3101. Recommended background: completion of EHS 3107, EHS 4103, and EHS 4105.

EHS 4197. Clinical Internship. 1-6 Credits.**EHS 4198. Administrative Internship. 1-12 Credits.****EHS 4199. Independent Study. 1-3 Credits.****EHS 6201. Response to High Impact Emergencies. 3 Credits.**

Strategies for an effective response to large-scale and high-impact emergencies examined as the managerial foundation for development of a response policy.

EHS 6203. Legal, Regulatory, and Ethical Issues in Emergency Medical Services Leadership. 3 Credits.

Laws, regulations, and standards pertaining to emergency services. Implications for organizational policy and response requirements for executives, managers, and supervisors.

EHS 6204. Public Information Management for Emergency Medical Services Leadership. 3 Credits.

Public information management for emergency services executives, managers, and supervisors.

EHS 6205. Strategic Emergency Response. 3 Credits.

Strategic analysis of counterterrorism response requirements for the emergency service organization. Determination of vulnerabilities and trends; development of operational doctrine.

EHS 6206. Case Studies in EMS Leadership. 3 Credits.

Integrative case-based approach to the analysis of complex problems in the management and leadership of emergency medical services. Same as CML 6205.

EHS 6210. EMS Systems Design and Analysis. 3 Credits.

System design characteristics of high-performance EMS systems based on excellence in emergency care, response-time reliability, economic efficiency, and customer service from a strategic perspective.

EHS 6211. Innovations in Telemedicine. 3 Credits.

Consideration of telemedicine in a multidisciplinary format toward innovation and entrepreneurship in the fields of medicine, public health, engineering, and business.

EHS 6227. Introduction to Human Health in Space. 3 Credits.

Introduction to aerospace concepts in an interdisciplinary context for those interested in human spaceflight. Elements of physiology, medicine, law, policy, engineering, and history are incorporated.

EHS 6274. Health Economics and Finance. 3 Credits.

Issues of health care economics, financial management, and budgeting that relate to managerial decision making. Applied financial management, management control systems, budgeting, staffing, and cost accounting. (Same as CML 6274).

EHS 6275. Leadership and Change in Emergency Medical Services. 3 Credits.

The concept of leadership within the context of health professions, health systems, and health policy.

ENGINEERING MANAGEMENT AND SYSTEMS ENGINEERING (EMSE)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

EMSE 1001. Introduction to Systems Engineering. 1 Credit.

Core concepts in systems engineering; processes of system decomposition and integration; upfront conceptual design, rapid prototyping, structured testing, balanced work, lean processes, and design for manufacturability. Restricted to undergraduate systems engineering majors or with the permission of the instructor. (Fall, Every Year).

EMSE 2705. Mathematics in Operations Research. 3 Credits.

Linear algebra topics relevant for optimization methods and models; systems of linear equations, Gaussian elimination, matrix algebra, vector spaces, determinants, linear programming, orthogonality and least squares; mathematical foundations of optimization theory; linear algebra, advanced calculus, convexity theory; geometrical interpretations and use of software. Restricted to undergraduate students majoring in systems engineering or with the permission of the instructor. Prerequisite: MATH 2233. (Same as MATH 2184) (Spring, Every Year).

EMSE 2801. Fundamentals of Systems Engineering. 3 Credits.

The systems approach to designing, building, and operating complex engineering systems; requirements, functional decomposition, systems architecting, analysis of alternatives, project life cycle modeling, cost analysis, and technical performance measurement. Restricted to undergraduate students majoring in systems engineering or with the permission of the instructor. Prerequisites: EMSE 1001; and COMM 1040 or COMM 1041 or COMM 1042. (Fall and Spring, Every Year).

EMSE 3701. Operations Research Methods. 3 Credits.

Mathematical properties and solution algorithms of optimization models used in operations research; linear programming: the simplex method, sensitivity analysis and duality theory; optimization models on graphs and networks: shortest path, longest path, network flow models; integer programming and discrete optimization; unconstrained and constrained nonlinear programming. Restricted to undergraduate students majoring in systems engineering or with the permission of the instructor. Prerequisite: EMSE 2705. (Spring, Every Year).

EMSE 3740W. Systems Thinking and Policy Modeling. 3 Credits.

Introduction to systems thinking and system dynamics approach to policy analysis; applications to business management and public policy; key principles of systems; causal-loop and stock and flow models of business growth, technology adoption, and marketing. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to undergraduate students majoring in systems engineering or with the permission of the instructor. Prerequisites: CSCI 1111 or CSCI 1121 or CSCI 1131. (Fall, Every Year).

EMSE 3760. Discrete Systems Simulation. 3 Credits.

Modeling of the operation of service systems using the discrete event simulation paradigm; theoretical topics including random variable sampling, input distribution fitting, model verification and validation, and aleatory and epistemic uncertainty in the simulation output analysis context. Restricted to undergraduate students majoring in systems engineering or with the permission of the instructor. Prerequisite: EMSE 3740W. (Fall, Every Year).

EMSE 3815. Requirements Analysis and Elicitation. 3 Credits.

The process of translating and decomposing systems engineering objectives into measurable and tractable requirements; how requirements analysis supports general processes and standards through elicitation methods, requirements decomposition, traceability matrices, and systems requirements specifications, and case studies that feature contemporary SE problems. Restricted to undergraduate students majoring in systems engineering or with the permission of the instructor. Prerequisite: EMSE 2801. (Spring, Every Year).

EMSE 3820. Project Management for Engineering Systems. 3 Credits.

Introduction to project management concepts, processes, tools, and techniques; activity planning, budgeting, scheduling, analyzing risk, monitoring and controlling, evaluation and terminating; challenges of uncertainty, risk, and behavioral factors. Restricted to undergraduate students majoring in systems engineering or with the permission of the instructor. Prerequisites: APSC 3115 and EMSE 3815. (Spring, Every Year).

EMSE 3850. Quantitative Models in Systems Engineering. 3 Credits.

Introduction to analytical models used in systems engineering to support decision making in business and government; applications to, for example, production planning, workforce scheduling, and network problems; formulating and solving models using spreadsheets. Corequisite: APSC 3115. Restricted to undergraduate students majoring in systems engineering or with the permission of the instructor. Prerequisite: EMSE 2705. (Fall, Every Year).

EMSE 3855W. Critical Infrastructure Systems. 3 Credits.

Topics in engineered infrastructure systems; asset management, environmental impact analysis, input-output life cycle analysis and inoperability modeling, infrastructure risk and reliability analysis, resilience and resistance to natural hazards or service disruptions, and development of infrastructure sustainability metrics. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to undergraduate students majoring in systems engineering or with the permission of the instructor. Prerequisite: UW 1020. (Spring, Every Year).

EMSE 4190. Senior Project in Systems Engineering I. 3 Credits.

First of a two-semester senior project to identify real world problems and assess applicable systems engineering methodologies. Project focus varies, but may include Washington, DC, area problems in public infrastructure or the private sector, including transportation, energy, environment, health care, telecommunications. Restricted to undergraduate students majoring in systems engineering. Prerequisites: EMSE 3820 and EMSE 4765. (Fall, Every Year).

EMSE 4191. Senior Project in Systems Engineering II. 3 Credits.

Second phase of a two-semester senior project. Field experience and systems engineering project completion in a team context. Each small group confronts an actual problem, conducts an analysis and formulates a solution using systems engineering methods and models. Oral and written reports demonstrate project management, effective teamwork, and the mastering of applied systems engineering concepts. Restricted to undergraduate students majoring in systems engineering. Prerequisite: EMSE 4190. (Spring, Every Year).

EMSE 4197. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. Instructor's permission required prior to registration. (Spring and fall, Every Year).

EMSE 4198. Research. 1-3 Credits.

Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status.

EMSE 4410. Engineering Economic Analysis. 3 Credits.

How the concept of time value of money is used to make optimal engineering project investment choices in the face of competing alternatives; life-cycle financial analysis of engineering projects. Provides foundation knowledge for the National Council of Examiners for Engineering and Surveying Fundamentals of Engineering examination. Restricted to undergraduate SEAS students or with permission of the instructor. Prerequisites: ECON 1011 and MATH 1232. (Fall and spring, Every Year).

EMSE 4710. Applied Optimization Modeling. 3 Credits.

Formulation and analysis of linear, integer, and nonlinear optimization models of decision problems that arise in industry, business, and government; modeling techniques and applications; use of optimization software to formulate and solve models. Restricted to undergraduate students majoring in systems engineering or with the permission of the instructor. Prerequisite: EMSE 3850. (Fall, Every Year).

EMSE 4755. Quality Control and Acceptance Sampling. 3 Credits.

Survey of techniques in quality control, including acceptance sampling, capability analysis, control charts, and design of experiments. Restricted to undergraduate students majoring in systems engineering or with the permission of the instructor. Prerequisite: EMSE 4765. (Fall, Every Year).

EMSE 4765. Data Analysis for Engineers and Scientists. 3 Credits.

Inference methods in a single dimension: estimation, confidence intervals, hypothesis testing and goodness-of-fit testing; multivariate data analysis techniques using matrices and vectors: the Hotelling T-squared test, multiple linear regression and principle component analysis. Restricted to undergraduate students majoring in systems engineering or with the permission of the instructor. Prerequisite: APSC 3115. (Spring, Every Year).

EMSE 4770. Techniques of Risk Analysis and Management. 3 Credits.

Topics and models in current risk analysis; use of quantitative and qualitative methods in risk analysis; modern applications of risk-based planning and risk management. Restricted to undergraduate students majoring in systems engineering or with the permission of the instructor. Prerequisite: EMSE 4755. (Spring, Every Year).

EMSE 6001. The Management of Technical Organizations. 3 Credits.

Introduction to management theory and practice for engineers advancing to leadership and engineering management roles; the origins of modern management as both an academic and practical discipline; analytical approaches to affecting change from multiple managerial levels of the organization. (Fall and spring, Every Year).

EMSE 6005. Organizational Behavior for the Engineering Manager. 3 Credits.

The behavior of individuals and groups in the context of technical organizations, focusing on relationships and interactions within the organization's operating activities. Individual and group development and motivation. Organizational structures and cultures. (Fall and spring).

EMSE 6014. Management of Engineering Contracts. 3 Credits.

Study of the total contracting process (including initial budget preparation and justification, execution of a contract, and administration of the contract to completion) considered from the viewpoints of the industrial and government buyer and the seller of technical materials and services. (Fall).

EMSE 6018. Engineering Law. 3 Credits.

Legal principles and procedures of interest to engineers. The American legal system, contracts and specifications, liability of professional engineers, product liability, agency relationships, patent and proprietary rights, special problems in research and development contracts. (As required).

EMSE 6020. Decision Making with Uncertainty. 3 Credits.

Problem formulation. Concepts and techniques used in analyzing complex decision problems. Modeling decision problems using decision trees, probability models, multi-objective models and utility theory. (Fall, spring, and summer).

EMSE 6023. Technology Issue Analysis. 3 Credits.

Contextual background and intellectual basis for addressing technology issues in the public and private sectors. Technology impact assessment, forecasting, and innovation; principles and practices of technology transfer as elements of a systematic approach to making technology decisions. (Fall, odd years).

EMSE 6025. Entrepreneurship and Technology. 3 Credits.

Concepts and methods associated with starting an entrepreneurial venture: organization design, team building, protection of intellectual property, strategies for developing and marketing a technology product; financial, legal, and market valuation issues and methods for a start-up venture. (Fall, Every Year).

EMSE 6026. Technical Enterprises. 3 Credits.

Essential features of technology-based companies from the entrepreneur's point of view. Team preparation of a simulated business plan for a technology-based company. Designed for those working in technical firms and for government personnel who depend on technical firms as suppliers. (Spring, odd years).

EMSE 6030. Technological Forecasting and Management. 3 Credits.

Concepts and methods for understanding the dynamics of technological change. Issues in technology assessment, technology transfer, and strategic management of technology. (Spring, even years).

EMSE 6035. Marketing of Technology. 3 Credits.

Analysis of industrial marketing process and functions, providing concepts and tools for engineering managers to market high technology products and services. (Fall, odd years).

EMSE 6045. International Technology Commercialization. 3 Credits.

The process of moving ideas to commercial reality in an international setting. Interdisciplinary approach that weaves together study of international and organizational cultures and dynamics, with the disciplines of analytics, engineering management, entrepreneurship, marketing, and technology forecasting, to commercialize innovations in technology. (Spring, Every Year).

EMSE 6070. Management of Research and Development. 3 Credits.

Seminar on readings and classic and contemporary case studies in the strategic management of innovation and technology. (Fall and spring).

EMSE 6099. Problems in Engineering Management and Systems Engineering. 3 Credits.

Capstone project providing the opportunity to apply concepts and tools previously studied to the solution of a real-world problem. Students work in small groups, on a problem proposed by students and approved by the instructor. Open only to master's candidates in the department, preferably during the last semester of their program.

EMSE 6115. Uncertainty Analysis for Engineers. 3 Credits.

Basics of probability theory and statistics, with a focus on engineering applications, particularly in the realm of systems. Topics include simulation, uncertainty analysis, central limit theorem, systems examination and analysis, and application to systems design and management. Prerequisite: MATH 1231.

EMSE 6200. Policy Factors in Environmental and Energy Management. 3 Credits.

Exploration of the policy development process from several different but integrated perspectives. Focus on areas of environmental and energy management and use of current case studies to develop a framework of understanding to support decisions in a broad variety of management settings. (Fall, odd years).

EMSE 6220. Environmental Management. 3 Credits.

Technical, economic, political, administrative, and social forces influencing the quality of the environment and the use of resources. Government and industrial programs to combat pollution of the air, soil, and water; existing and pending pertinent legislation; theoretical aspects of specific management problems. (Fall).

EMSE 6225. Air Quality Management. 3 Credits.

The nature of critical local, regional, continental, and global problems associated with air pollution and the historical evolution of such problems. The complex regulatory and institutional framework controlling air quality management in the U.S. Current air quality management concepts and processes. (Spring).

EMSE 6230. Hazardous Waste Management and Cleanup. 3 Credits.

Hazardous waste management and cleanup processes used in the U.S. and around the world. The roles of the relevant federal, state, and local government agencies; major hazardous waste laws and regulations. Planning, assessment, investigation, design, and construction phases of hazardous waste remediation projects. (Spring, even years).

EMSE 6235. Water Quality Management. 3 Credits.

The nature of point and non-point sources of surface and ground water pollution and the statutory, regulatory, and institutional framework controlling water quality management activities in the U.S. Current approaches to water quality protection and enhancement. The role of engineered treatment processes in water quality management. (Fall).

EMSE 6240. Environmental Hazard Management. 3 Credits.

Causes and effects of extreme natural and technological hazards. Organizational responsibilities, management approaches, directed technologies, and social factors related to environmental hazard assessment. Cultural, institutional, and technical capacities bearing on environmental disaster management, national and international risk reduction, and mitigation measures. (Spring, Odd Years).

EMSE 6245. Analytical Tools for Environmental Management. 3 Credits.

A survey course in environmental management, focusing on tools to assess the environment: quantitative risk assessment, environmental valuation methodologies, Congressional activities, and environmental laws. The regulatory process as it relates to environmental management. Risk assessment and modeling approaches to solving environmental problems. (Spring, odd years).

EMSE 6260. Energy Management. 3 Credits.

Examination of the range of available energy resources, trends in their use, the programs and organizations that have developed and evolved to address problems associated with energy resource use. (Spring).

EMSE 6285. Analytical Tools for Energy Management. 3 Credits.

Analytical tools needed to manage energy resources at the facility level. Energy technologies: instrumentation, measurement, and control. Energy auditing; conservation techniques, financial and economic analysis, and maintenance of energy budgets. Functions of an energy management office of a large organization. (Fall, even years).

EMSE 6290. Climate Change: Policy, Impacts, and Response. 3 Credits.

The known and unknown in climate change science; strategies and technologies for mitigation of and adaptation to the impact of climate change; international issues related to avoidance, challenges posed by as yet undefined effects, and responsibilities mandated by existing and proposed laws, executive orders, regulations, and court rulings. (Fall, odd years).

EMSE 6291. Greenhouse Gas Measurement and Reporting. 3 Credits.

Study of existing methodologies and standards for measuring and reporting greenhouse gas (GHG) emissions with particular emphasis on accepted environmental accounting frameworks for the business sector and regulatory schemes. (Fall and spring, Every Year).

EMSE 6292. Greenhouse Gas Mitigation. 3 Credits.

Conducting mitigation analyses, identifying, and analyzing projects to reduce greenhouse gas emissions with a focus on energy efficiency and renewable energy; monitoring and reporting emission reductions using accepted methodologies; use of carbon markets as a tool for cost-effective mitigation. This course is taught online. (Fall and spring, Every Year).

EMSE 6293. Greenhouse Gas Management Assurance and Information Systems Design. 3 Credits.

Design of information systems for management of greenhouse gas emissions. Assurance of greenhouse gas emissions assertions. This course is taught online. (Fall and spring, Every Year).

EMSE 6295. Environmental Security. 3 Credits.

Overview of potential terrorist attack vectors on government-owned and private sector assets most directly tied to environmental health and safety. Homeland security requirements for environmental infrastructure, water supplies, energy sources, nuclear waste, and other programs vulnerable to targeting. Courses of action designed to prevent attacks. (Fall).

EMSE 6300. Homeland Security: The National Challenge. 3 Credits.

The evolution of homeland security as a concept, legal framework, and redirection of national policies and priorities. Issues and problems of implementation. The terrorist threat and U.S. responses. Fundamental policy legislation and documents, such as national security strategies, homeland security decision directives, the NRF, and NIMS. (Spring).

EMSE 6305. Crisis and Emergency Management. 3 Credits.

Defining crises, emergencies, and disasters; developing crisis, business continuity, and incident management plans within robust emergency management programs; National Response Framework and National Incident Management System; organizing for response, managing the response organization, managing in a turbulent environment, and crisis decision making and communication. (Fall, Every Year).

EMSE 6310. Information Technology in Crisis and Emergency Management. 3 Credits.

The role of information in crisis and response management; determining disaster and crisis information requirements; information technologies applied to crisis, disaster, and emergency management; causes and effects of information breakdowns during crises and disasters.

EMSE 6315. Management of Risk and Vulnerability for Hazards and Terrorism. 3 Credits.

Development of concepts required for risk-based planning and risk management. Objectives and methods for vulnerability assessment for natural disaster, technological hazards, and terrorist threats. Risk analysis, risk perception, risk communication, risk mitigation. (Fall).

EMSE 6320. International Disaster Management. 3 Credits.

Guiding principles, key institutions, operational requirements, policy issues, and broad fundamentals associated with international disaster risk reduction and humanitarian response to natural and man-made disasters and complex emergencies. (Fall).

EMSE 6325. Medical and Public Health Emergency Management. 3 Credits.

Medical and public health management issues encountered in crises, emergencies, and disasters for non-medical emergency managers. The spectrum of medical, public health, psychological and behavioral problems; incident management organization and processes that address these concerns and integrate medical and public health assets into the response. (Spring).

EMSE 6330. Management of Terrorism Preparedness and Response. 3 Credits.

Terrorism, terrorist methods, and human/infrastructure vulnerability. Current preparedness and response programs. Mitigation, preparedness, and response requirements to manage mass terrorism incidents within the context of all-hazard emergency management. Case studies. (Fall).

EMSE 6345. Disaster Recovery and Organizational Continuity. 3 Credits.

Disaster recovery planning and business continuity. Recovery of information and communication systems. The role of the private sector in mitigation and recovery. Public/private partnerships in community reconstruction and recovery. (Spring).

EMSE 6350. Hazard Mitigation in Disaster Management. 3 Credits.

Risk reduction through hazard mitigation and its role in an emergency management program; analysis of past and current government and private-sector programs; examination of new approaches with case study examples; structural versus nonstructural actions; mitigation of the terrorism risk. (Fall). (Fall, Every Year).

EMSE 6410. Survey of Finance and Engineering Economics. 3 Credits.

Survey of material relevant to financial decision making for engineering activity. Includes traditional engineering economy topics; fundamentals of accounting; and financial planning, budgeting, and estimating applicable to the management of technical organizations. (Fall, spring, and summer).

EMSE 6420. Uncertainty Analysis in Cost Engineering. 3 Credits.

Basic skills for building probability models to perform meaningful engineering economic studies, financial feasibility assessments, and cost uncertainty analysis in the planning phase of engineering projects; analytical and closed form equations from probability theory; simulation modeling for problems with structures without closed form equations. Prerequisite: EMSE 6410. (Spring, Every Year).

EMSE 6430. Financial Management for Engineers. 3 Credits.

Management of existing resources, including the use of financial statements and ratio analysis to assess a company's financial health, its strengths, weaknesses, recent performance, and future prospects; financial forecasting and planning with particular emphasis on managing growth and decline; financing of company operations, including a review of the principal security types, the markets in which they trade, and the proper choice of security type by the issuing company; the use of discounted cash flow techniques, such as the net present value and the internal rate of return, to evaluate investment opportunities. Prerequisite: EMSE 6410. (Fall, Every Year).

EMSE 6450. Quantitative Methods in Investment Engineering. 3 Credits.

Cash flow streams and the basic theory of interest; bond pricing and immunization of bond portfolios, the term structure of interest rates, mean-variance portfolio theory and the capital asset pricing model; value at risk. Restricted to SEAS Graduate students or permission of instructor. Recommended background: Technical background at the level of a bachelor's degree in engineering, mathematics, or science and working knowledge of Microsoft Excel. (Spring, Every Year).

EMSE 6505. Knowledge Management I. 3 Credits.

The foundations of knowledge management, including cultural issues, technology applications, organizational concepts and processes, management aspects, and decision support systems. Case studies. (Fall).

EMSE 6506. Knowledge Management II. 3 Credits.

A capstone course. Students work in teams, applying principles and processes of systems thinking, systems engineering, and integrative management in the design and implementation of a knowledge management system. Prerequisite: EMSE 6505.

EMSE 6507. Advanced Knowledge Management. 3 Credits.

Advanced study of contemporary knowledge management: cost estimating methods, development of enterprise-level strategies, structure of strategic leadership in managing intellectual capital and competitive intelligence. (Fall, spring, and summer, Every Year).

EMSE 6510. Decision Support Systems and Models. 3 Credits.

Theory of decision making—a cognitive view. Modeling decision maker heuristics and processes. Design, implementation, and evaluation of state-of-the-art DSS (hands-on). Assess impact of behavioral, situational, and organizational variables. (Fall).

EMSE 6537. Information Operations. 3 Credits.

National security concerns of governments and business about attacks across national borders and through physical protective mechanisms. The emergence of information technologies, from casual to full-fledged operational scale, to advance causes. Specific examples (e.g., attacks on Estonia, Palestinian conflict). (On demand).

EMSE 6540. Management of Information and Systems Security. 3 Credits.

Information and information security defense techniques and countermeasures with defense fundamentals; critical infrastructure protection; network defense techniques such as designing firewall systems and IDS, VPNs, cryptographic solutions, Internet security protocols, and cyber security and information assurance tenants such as confidentiality, Integrity, availability, authentication and non-repudiation. (Fall, Every Year).

EMSE 6542. Cybersecurity Risk Management and Compliance. 3 Credits.

Cybersecurity threats and other risks to an organization's core business; risk-based planning and risk management of cybersecurity at the enterprise level; risk assessment and modeling approaches to cybersecurity issues related to security structures, sustaining healthy cybersecurity posture, and satisfying compliance with risk frameworks. Prerequisite: EMSE 6540. (Fall, spring, and summer, Every Year).

EMSE 6543. Managing the Protection of Information Assets and Systems. 3 Credits.

Advanced topics in protection of information assets and systems, including authentication, asset control, security models and kernels, physical security, personnel security, operational security, administrative security, security configuration management, and resource control. Prerequisite: EMSE 6540.

EMSE 6544. Auditing, Monitoring, and Intrusion Detection for Information Security Managers. 3 Credits.

Methods for detecting problems with unauthorized activity in information systems and management challenges associated with those activities. Prerequisite: EMSE 6540.

EMSE 6545. Internet and Online Law for Security Managers. 3 Credits.

Legal issues regarding control of behavior, information security mechanisms, and information systems engineering in connected enterprises. Specific laws and regulations governing Internet and online activity, jurisdictional challenges associated with networked computing, and business law in cyberspace. (Fall and spring, Every Year).

EMSE 6546. Cybercrime for Information Security Managers. 3 Credits.

Information security actions related to and in response to criminal activity, including industrial espionage, back-hacking, cracking, and cyberterrorism. Transnational issues, cybercrime treaties and conventions, and cyberwar issues. (Fall, spring, and summer, Every Year).

EMSE 6547. Cyber Resilience. 3 Credits.

Resilience planning for cybersecurity; assessment and modeling approaches to limit system failure toward creating a cyber-resilient organization; recognition, resistance, recovery, reinstatement from the perspectives of information technologists and engineering managers; existing cybersecurity reliance frameworks; potential policies to sustain a healthy and robust security posture. (Fall, spring, and summer, Every Year).

EMSE 6549. Business and Competitive Intelligence. 3 Credits.

Discovery and analysis of competitive information from open-source intelligence. Sources and methods for data collection; legal issues and constraints; analysis processes; longitudinal aspects; inference. (Spring).

EMSE 6570. Information Management and Information Systems. 3 Credits.

The use of information in organizations, the management of the information resource; the impact of information and communication technology. (Spring).

EMSE 6573. Managing E-Commerce Technologies. 3 Credits.

Principles of good e-business management. Methods of conducting e-commerce—major opportunities, limitations, issues, and risks. Popular technologies for building e-businesses, security authentication, privacy, acceptable use policies, and legal limits. (Fall, odd years).

EMSE 6574. Programming for Analytics. 3 Credits.

Introduction to programming for data analytics using the Python programming language. Prepares students for higher-level courses in data analytics. Prerequisites: CSCI 1011 or CSCI 1111 or CSCI 1112. (Fall and spring, Every Year).

EMSE 6575. Data Mining and Processing. 3 Credits.

Application of commonly used algorithms for data analysis using libraries in the Python programming language such as SciKit-Learn; unsupervised classification techniques, supervised classification techniques, and crowdsourcing for data annotation. Provides preparation for a capstone course in the data analytics sequence. Prerequisites: APSC 3115, EMSE 2705 or MATH 2184, and EMSE 6574. (Spring, Every Year).

EMSE 6577. Data-Driven Policy. 3 Credits.

The application of data mining algorithms and other computational techniques to answer questions related to policy; problem formulation, tool selection, and interpretation of analysis results; volume, velocity, variety, veracity, and value. May serve as a capstone course in the data analytics sequence. Prerequisites: EMSE 6705, EMSE 6575 and EMSE 6765. (Spring, Every Year).

EMSE 6579. Applied Data Mining in Engineering Management. 3 Credits.

Methods and techniques for discovering patterns and relationships in aggregated data, with practical focus on engineering problems. Tools, techniques, and methods explored in the context of their application. Prerequisite: EMSE 6020, EMSE 6586.

EMSE 6580. Information and Software Engineering. 3 Credits.

Introduction to analysis and design of information systems including requirements analysis, project management, and software architectures. Introduction to CASE tools. Prerequisite: EMSE 6570 or permission of instructor.

EMSE 6582. Object-Oriented Analysis and Design. 3 Credits.

The object-relationship model and the object-behavior model. Managing complexity with views and high-level modeling in object-oriented systems analysis. The concepts, the method, and applications, including object-based and object-oriented languages. Prerequisite: EMSE 6580.

EMSE 6584. Fundamentals of Artificial Intelligence. 3 Credits.

History of AI, expert systems, knowledge representation, search and control techniques, natural language processing, computer vision, computer speech, knowledge-based systems, and evidential reasoning. Hands-on experience with a knowledge-based shell. (Spring).

EMSE 6586. Data Management Systems for Data Analytics. 3 Credits.

Study and design of database and data management systems for big data and data analytics; design of relational database systems and the SQL query language; NoSQL databases for unstructured data, including key-value, distributed table, graph databases, parallel processing databases. Prerequisite: EMSE 6574. (Spring, Every Year).

EMSE 6588. Software Project Development with CASE. 3 Credits.

Evaluation and selection of CASE tools, use of CASE tools in software design/project. Graphical user interface and re-engineering tools. Open only to master's candidates in the department during the last semester of their program. Prerequisite: EMSE 6580.

EMSE 6589. Data Communications and Networks. 3 Credits.

Technical and managerial aspects of data communications, with emphasis on communication networks. Methodologies used in data communications, communication networks, and distributed data processing. (On demand).

EMSE 6701. Operations Research Methods. 3 Credits.

Deterministic and stochastic methods. Optimization algorithms: Simplex method, Branch and Bound, combinatorial algorithms, heuristic methods. Optimization theory: convexity, duality, sensitivity analysis. Stochastic optimization: marginal analysis, Markov chains, Markov decision processes. Prerequisite: APSC 3115 or EMSE 6020, MATH 2233, or permission of instructor.

EMSE 6705. Mathematics in Operations Research. 3 Credits.

Mathematical foundations of optimization theory: linear algebra, advanced calculus, convexity theory. Geometrical interpretations and use of software. Prerequisite: MATH 2233.

EMSE 6710. Applied Optimization Modeling. 3 Credits.

Analysis of linear, integer, and nonlinear optimization models of decision problems that arise in industry, business, and government. Modeling techniques and applications; use of optimization software to solve models. Prerequisite: EMSE 6850 or permission of instructor.

EMSE 6715. Theory of Games. 3 Credits.

Mathematical models of conflict and cooperation with applications in economics, business, defense, transportation, and societal issues (voting schemes, fair division, auctions). Concept and computation of equilibrium in n-person games. Prerequisite: MATH 2233 or permission of instructor.

EMSE 6720. Topics in Optimization. 3 Credits.

Selected topics from the fields of linear programming, nonlinear programming, dynamic programming, heuristics, and constraint programming. May be repeated for credit provided the topic differs. Prerequisite: EMSE 6701 or permission of instructor.

EMSE 6730. Integer and Network Programming. 3 Credits.

Combinatorial optimization problems: algorithms and applications. Network problems: minimum spanning tree, shortest path, maximum flows, minimum cost flows, optimal matchings, routing problems. Complexity theory. Enumeration and cutting plane methods for solving integer programs. Prerequisite: EMSE 6701 or permission of instructor.

EMSE 6740. Systems Thinking and Policy Modeling I. 3 Credits.

Introduction to systems thinking and the system dynamics approach to policy analysis, with applications to business management and public policy. Causal-loop and stock and flow models of business growth, technology adoption, and marketing. Use of role-based games to explain key principles of systems. Use of simulation software to model problems and case studies.

EMSE 6745. Systems Thinking and Policy Modeling II. 3 Credits.

Case studies in dynamic policy analysis. Use of microcomputers in simulation. The class collectively models and simulates a social system to explore policy options. Prerequisite: EMSE 6740.

EMSE 6750. Stochastic Foundations of Operations Research. 3 Credits.

Topics in probability theory, stochastic processes, and statistical inference. Foundations of probability, conditional probability and expectation, Poisson processes, Markov chains, and Brownian motion. Prerequisite: APSC 3116 or permission of instructor.

EMSE 6755. Quality Control and Acceptance Sampling. 3 Credits.

Statistical approaches to quality assurance. Single and multivariate control charts, acceptance sampling by attributes and variables, process capability and design of experiments. Prerequisite: APSC 3115 or permission of instructor.

EMSE 6760. Discrete Systems Simulation. 3 Credits.

Analytical methods for the solution of problems in engineering using concepts from probability and statistics: probability modeling, random variables and their distributions, mathematical expectation, sampling, point and confidence interval estimation, hypothesis testing, correlation, regression, and engineering applications. Restricted to SEAS graduate students. Prerequisites: One of the following: CSCI 1121, CSCI 1041, CSCI 1111, or permission of instructor. (Spring, Every Year).

EMSE 6765. Data Analysis for Engineers and Scientists. 3 Credits.

Design of experiments and data collection. Regression, correlation, and prediction. Multivariate analysis, data pooling, data compression. Model validation. Prerequisite: APSC 3115.

EMSE 6767. Applied Data Analytics. 3 Credits.

Applied and practical data analytics. High-level theory, with primary focus on practical application of a broad set of statistical techniques needed to support an empirical foundation for systems engineering and engineering management. A variety of practical visualization and statistical analysis techniques. Leveraging Minitab and Excel to examine raw data to arrive at insightful conclusions. (Fall, spring, and summer, Every Year).

EMSE 6770. Techniques of Risk Analysis and Management. 3 Credits.

Topics and models in current risk analysis; modern applications of risk-based planning and risk management; use of quantitative methods in risk analysis. (Spring).

EMSE 6790. Logistics Planning. 3 Credits.

Quantitative methods in model building for logistics systems, including organization, procurement, transportation, inventory, maintenance, and their interrelationships. Stresses applications. Prerequisite: APSC 3115, MATH 1232.

EMSE 6801. Systems Engineering I. 3 Credits.

Systems approach to the architecting and engineering of large-scale systems; elements of systems engineering; methods and standards; computer tools that support systems and software engineering; trends and directions; the integrative nature of systems engineering. (Fall, spring, and summer).

EMSE 6805. Systems Engineering II. 3 Credits.

Application of systems engineering tools to provide hands-on experience with essential elements of practice. Processes of requirements engineering, functional analysis and allocation, risk management, architecting; architectural heuristics, axiomatic design, analytical assessment of alternative architectures. Prerequisite: EMSE 6801.

EMSE 6807. Advanced Systems Engineering. 3 Credits.

Analysis of advanced systems engineering topics; system lifecycle models, INCOSE Vision 2025, requirements types and processes, architectural design processes and frameworks, DoDAF artifacts, enterprise architecture and enterprise systems engineering, complex adaptive systems (CAS), modeling languages and SysML, and Model Based Systems Engineering (MBSE). Applications of systems engineering tools and techniques. (Spring, Every Year).

EMSE 6810. Systems Analysis and Management. 3 Credits.

The systems or holistic approach as a methodology for making decisions and allocating resources. Analysis by means of objectives, alternatives, models, criteria, and feedback. (fall, spring, summer).

EMSE 6815. Requirements Engineering. 3 Credits.

Requirements in systems engineering, including requirement types, quality factors, elicitation methods, analysis, derivation of implicit requirements, management, traceability, verification, cross-requirement assessments, and validation. Focus on writing and managing quality requirements in complex systems. Prerequisite: EMSE 6801.

EMSE 6817. Model-Based Systems Engineering. 3 Credits.

Model-based systems engineering (MBSE) and its derivative, evidence-based systems engineering (EBSE), are techniques with strong potential for improving the technical integrity of complex systems. The foundation to these model- and research-based techniques for system definition and analysis as applied to life-cycle SE. Practical applications. Prerequisite: EMSE 6805. (Spring, Every Year).

EMSE 6820. Program and Project Management. 3 Credits.

Problems in managing projects; project management as planning, organizing, directing, and monitoring; project and corporate organizations; duties and responsibilities; the project plan; schedule, cost, earned-value and situation analysis; leadership; team building; conflict management; meetings, presentations, and proposals. (Fall).

EMSE 6825. Project Cost and Quality Management. 3 Credits.

Developing project cost and resource estimates during the planning stages. Monitoring, forecasting, and controlling cost throughout the project life cycle. Project quality planning, assurance, and control. Relationships among project scope, time, cost, quality, human resources, communications, procurement, and risk. Preparation for the Project Management Professional examination. Prerequisite: EMSE 6820.

EMSE 6830. Human Factors Engineering. 3 Credits.

Study of the human-machine interface applied to system design, job design, and technology management. Human sensory-motor, perceptual, and cognitive functions; task analysis and allocation; contextual aspects of human factors engineering. Modeling, design, and evaluation methodologies. Applications to user-centered industrial and information systems. (As required).

EMSE 6840. Applied Enterprise Systems Engineering. 3 Credits.

Applications of systems engineering in the U.S. Department of Defense and other federal government entities as well as commercial sectors; architectural frameworks and enterprise architecting concepts and practices, including JCIDS/DODAF, federal enterprise architecture framework, and Zachman Framework; enterprise architecting and advanced modeling tools. Prerequisite: EMSE 6801. (Fall, spring, and summer, Every Year).

EMSE 6845. Lean and Agile Systems Engineering. 3 Credits.

Lean and agile methods as applied to the engineering design and development of systems; review of contemporary implementation frameworks, methodologies, and the tools used to support them. Implications for traditional systems engineering; fundamental changes to the requirements processes; implications for engineering management. Prerequisite: EMSE 6805. (Spring, Every Year).

EMSE 6848. Systems of Systems. 3 Credits.

Complex systems engineering in terms of systems of systems (SoS); theoretical and practical instances of SoS; application of lifecycle systems engineering processes; various types of SoS and the challenges to be faced to ensure their acquisition and technical integrity. Prerequisite: EMSE 6805. (Spring, Every Year).

EMSE 6850. Quantitative Models in Systems Engineering. 3 Credits.

Quantitative modeling techniques and their application to decision making in systems engineering. Linear, integer, and nonlinear optimization models. Stochastic models: inventory control, queuing systems, and regression analysis. Elements of Monte Carlo and discrete event system simulation. Prerequisite: APSC 3115 or EMSE 6020.

EMSE 6855. Reliability Analysis and Infrastructure Systems. 3 Credits.

Modeling basic variables and defining the limit-state surface. Computing the reliability index of an infrastructure system by approximating the limit-state surface—FORM and SORM. Modeling an infrastructure system. Reliability analysis using branch and bound, failure paths and failure modes, identification of dominant failure paths. Case studies. (Fall).

EMSE 6991. Project for Professional Degree. 3 Credits.

Limited to students in the Applied Scientist or Engineer degree program.

EMSE 6992. Special Topics. 3 Credits.

Selected topics in engineering management and systems engineering, as arranged. May be repeated for credit. Permission of the instructor required prior to enrollment. (Fall and spring, Every Year).

EMSE 6995. Research. 1-12 Credits.

Basic or applied research in engineering management or systems engineering. Open to master's degree candidates in the department. May be repeated for credit.

EMSE 6997. Advanced Topics in Operations Research. 3 Credits.

Advanced topics from the literature of operations research for analysis, presentation, and discussion. Reading assignments from professional journals selected by the instructor and the student. May be repeated for credit. Prerequisite: permission of instructor.

EMSE 6998. Thesis Research. 3 Credits.**EMSE 6999. Thesis Research. 3 Credits.****EMSE 8000. Research Formulation in Engineering Management and Systems Engineering. 3 Credits.**

First in a two-course sequence of doctoral seminars designed to give students their first exposure to the process of formulating and executing empirical research. Class format includes discussion, field experiments, data analysis, and theorizing. Study of core concepts in building theory from empirical data and classic works in technically-oriented management theory. Participants design and execute a research project. Restricted to EMSE PhD students. (Spring, Every Year).

EMSE 8001. Research Methods for Engineering Management and Systems Engineering. 3 Credits.

Second in a two-course sequence introducing doctoral students to the fundamentals of research design and methods. Introduction to a range of research methods relevant to the study of engineering management and systems engineering, reading, writing, and critiquing the elements of a research proposal. Restricted to EMSE PhD students. Prerequisite: EMSE 8000. (Fall, Every Year).

EMSE 8010. Advanced Topics in Optimization. 3 Credits.

May be repeated for credit provided the topic differs. Prerequisite: EMSE 6701, EMSE 6705 or permission of instructor.

EMSE 8020. Advanced Stochastic Models in Operations Research. 3 Credits.

Applied probability models, including the Poisson process, continuous-time, denumerable-state Markov processes, renewal theory, semi-Markov regenerative processes. Applications to queues, inventories, and other operations research systems. Prerequisite: permission of instructor.

EMSE 8030. Risk Management Process for the Engineering Manager. 3 Credits.

Risk management process; individual and collaborative responsibilities of program and engineering managers; practical applications of risk-based planning and risk management tools essential to success of any program; communicating the process and its value in avoiding catastrophic outcomes. Case studies. (Fall, spring, and summer, Every Year).

EMSE 8099. Survey of Research Formulation for Engineering Management. 3 Credits.

Researching the praxis paper. Introduces the design of research studies in applied engineering management settings from a practical perspective. Fundamentals of applied research, formulating research questions/hypotheses and research designs from empirical data. Restricted to students in the DEng in the field of engineering management program. (Fall, spring, and summer, Every Year).

EMSE 8100. The Praxis Proposal. 3 Credits.

Overview of research methods; aims and purposes of the praxis; development of praxis research strategies; formulation and defense of a praxis proposal. Praxis proposal defense must be passed before the student is admitted to degree candidacy to undertake praxis work. Restricted to students who have completed all required coursework for the DEng in the field of engineering management degree. (Fall, spring, and summer, Every Year).

EMSE 8199. Praxis Research. 1-12 Credits.

Independent applied research in engineering management culminating in the final praxis report and final examination for the degree of doctor of engineering. May be repeated for credit. Restricted to students in the DEng in the field of engineering management program who have passed the praxis proposal defense. Prerequisite: EMSE 8100. (Fall, spring, and summer, Every Year).

EMSE 8998. Advanced Reading and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates. (Fall and spring, Every Year).

EMSE 8999. Dissertation Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates. (Fall and spring, Every Year).

ENGLISH (ENGL)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ENGL 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details.

ENGL 1050. Introduction to Literary Studies. 3 Credits.

How to read and interpret literature at the college level and beyond. Close readings of poetry, fiction, and drama, emphasizing genre and form.

ENGL 1210. Introduction to Creative Writing. 3 Credits.

An exploration of genres of creative writing (fiction, poetry, and/or playwriting). Basic problems and techniques; examples of modern approaches; weekly writing assignments; workshop and/or conference discussion of student writing.

ENGL 1300. The Bible as Literature. 3 Credits.

The Bible in translation as a literary object; the historical context in which its many parts were composed and its literary themes, styles, and structures.

ENGL 1305. Colonial/Post-Colonial British Literature. 3 Credits.

ENGL 1315. Literature and the Financial Imagination. 3 Credits.

Literary studies focused broadly on representations of business, finance, or commerce; the economics of literary production; and/or theories of economic class as they pertain to literary works. Topic, genre, and time period vary by instructor.

ENGL 1320. Literature of the Americas. 3 Credits.

American literature considered in a global framework as writing that probes and spans the boundaries of the nation, connecting the United States to the rest of the Americas and to other parts of the globe.

ENGL 1320W. Literature of the Americas. 3 Credits.

American literature considered in a global framework as writing that probes and spans the boundaries of the nation, connecting the United States to the rest of the Americas and to other parts of the globe. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 1330. Myths of Britain. 3 Credits.

Why much great English literature turns out not to be so English after all. The literature of the island within a transnational frame. Readings generally range from Beowulf to Arthurian myths to Shakespeare. Topic, genre, and time period vary by instructor.

ENGL 1330W. Myths of Britain. 3 Credits.

Why much great English literature turns out not to be so English after all. The literature of the island within a transnational frame. Readings generally range from Beowulf to Arthurian myths to Shakespeare. Topic, genre, and time period vary by instructor. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 1340. Essential Shakespeare. 3 Credits.

Links between Shakespeare's geographical and theatrical "Globes." How did Shakespeare and his company represent racial, cultural, and linguistic difference in the Globe? What place did they imagine for England and Europe in this newly globalized world?.

ENGL 1340W. Essential Shakespeare. 3 Credits.

Links between Shakespeare's geographical and theatrical "Globes." How did Shakespeare and his company represent racial, cultural, and linguistic difference in the Globe? What place did they imagine for England and Europe in this newly globalized world? Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 1351. Shakespeare Seminar. 3 Credits.

Seminar course for first-year students in the Dean's Scholars in Shakespeare Program. Literary study of Shakespeare's poems and plays along with those of his contemporaries. Topic, genre, and time period vary by instructor.

ENGL 1360. Fantasy and Speculative Fiction. 3 Credits.

General overview of fantasy and speculative fiction. Topics may vary.

ENGL 1365. Literature and the Environment. 3 Credits.

The depiction of the nonhuman world in literature and film; how natural and built environments are translated into narrative; the relationship between literary production and environmental action.

ENGL 1370. Topics in Global Cinema. 3 Credits.

Topics vary by semester. Consult the Schedule of Classes for more details.

ENGL 1712W. Bollywood Cinema. 3 Credits.

ENGL 1830W. Tragedy. 3 Credits.

Modes of tragedy as developed in drama, nondramatic verse, and prose fiction in literature from ancient to modern times—Book of Job to Beckett. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 1840W. Comedy. 3 Credits.

Modes of comedy as developed in drama, nondramatic verse, and prose fiction—Chaucer to Borges. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 2000. Sophomore Colloquium. 3 Credits.

The Sophomore Colloquia are small seminar-style courses limited to second-year students in Columbian College. These courses engage students deeply in a discipline, focus on a narrow issue of high interest and impact, and require independent research projects of the students. Topics vary by semester. Consult the schedule of classes for more details. Instructor's permission is required.

ENGL 2100. Introduction to Asian American Studies through Literature. 3 Credits.

Major issues in Asian American culture and history, including identity, cross-cultural perspectives and gender norms, and racial formation, introduced through literary and cinematic texts by and about Asian Americans with ancestry from East Asia, Southeast Asia, South Asia, and the Philippines. Recommended background: Prior completion of UW 1020 or equivalent is suggested but not required.

ENGL 2210. Techniques in Creative Writing. 3 Credits.

The craft and technique of creative writing and/or theories of creative writing. Topics vary by semester. Consult the Schedule of Classes for more information.

ENGL 2240. Play Analysis. 3 Credits.

Traditional and nontraditional (Aristotelian and non-Aristotelian) approaches to the analysis of dramatic literature; literary and theatrical techniques used by playwrights. Same as TRDA 2240.

ENGL 2250. Dramatic Writing. 3 Credits.

Workshop in playwriting and screenwriting, with emphasis on dramatic structure. (Same as TRDA 2250).

ENGL 2410. Introduction to English Literature I. 3 Credits.

Study of British authors from the Middle Ages to the French Revolution. These may include Chaucer, Shakespeare, Donne, Milton, Swift, Gay, Johnson, and Gray.

ENGL 2410W. Introduction to English Literature I. 3 Credits.

Study of British authors from the Middle Ages to the French Revolution. These may include Chaucer, Shakespeare, Donne, Milton, Swift, Gay, Johnson, and Gray. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 2411. Introduction to English Literature II. 3 Credits.

Surveys literature from two of the traditional period units in British Literature, the Romantic Period (roughly 1785 to 1832), and the Victorian Period (roughly 1832 to 1901), with some additional twentieth century texts.

ENGL 2411W. Introduction to English Literature II. 3 Credits.

Surveys literature from two of the traditional period units in British Literature, the Romantic Period (roughly 1785 to 1832), and the Victorian Period (roughly 1832 to 1901), with some additional twentieth century texts. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 2460. Fiction Writing. 3,4 Credits.

The writing of fiction. Recommended preparation: ENGL 1210 and two semesters of literature courses.

ENGL 2470. Poetry Writing. 3 Credits.

The writing of poetry. Recommended preparation: ENGL 1210 and two semesters of literature courses.

ENGL 2510. Introduction to American Literature I. 3 Credits.

Historical survey of early American writing through Melville, Whitman, and Dickinson.

ENGL 2510W. Introduction to American Literature I. 3 Credits.

Historical survey of early American writing through Melville, Whitman, and Dickinson. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 2511. Introduction to American Literature II. 3 Credits.

Reading of significant works by modern American authors such as Wharton, Chopin, Crane, London, Frost, Morrison. Hughes, and Faulkner.

ENGL 2511W. Introduction to American Literature II. 3 Credits.

Reading of significant works by modern American authors such as Wharton, Chopin, Crane, London, Frost, Morrison. Hughes, and Faulkner. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 2560. Intermediate Fiction Writing. 3 Credits.

The writing of fiction. Prerequisite: ENGL 2460 .

ENGL 2570. Intermediate Poetry Writing. 3 Credits.

The writing of poetry. Recommended preparation: ENGL 1210 and two semesters of literature courses.

ENGL 2610. Introduction to Black Literature of America I. 3 Credits.

Survey of significant works of black American literature from the late eighteenth century to the turn of the twentieth century, with a particular emphasis on the slave narrative.

ENGL 2610W. Introduction to Black Literature of America I. 3 Credits.

Survey of significant works of black American literature from the late eighteenth century to the turn of the twentieth century, with a particular emphasis on the slave narrative. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 2611. Introduction to Black Literature of America II. 3 Credits.

Influential black writers and literary trends of the twentieth century. How the Great Migration altered black American life and how black literature registered the concerns of the Civil Rights, Black Power, feminist, and anti-war movements.

ENGL 2611W. Introduction to Black Literature of America II. 3 Credits.

Influential black writers and literary trends of the twentieth century. How the Great Migration altered black American life and how black literature registered the concerns of the Civil Rights, Black Power, feminist, and anti-war movements. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 2710. Postcolonialism, Race, and Gender in Global Anglophone Literature and Film. 3 Credits.

How race and gender shaped empire and nationalism in international Anglophone literature and cinema from 1857 to 1960. Feminist, postcolonial, and critical race theory, engaged with modern literature, graphic narratives, and film.

ENGL 2710W. Postcolonialism, Race, and Gender in Global Anglophone Literature and Film. 3 Credits.

How race and gender shaped empire and nationalism in international Anglophone literature and cinema from 1857 to 1960. Feminist, postcolonial, and critical race theory, engaged with modern literature, graphic narratives, and film. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 2711. Postcolonialism and Migration in Global Anglophone Literature and Film. 3 Credits.

Migration and politics as represented in world Anglophone literature and film; theories and histories of migration, feminist theory, and ethnic studies engaged in conversation with cultural texts.

ENGL 2711W. Postcolonialism and Migration in Global Anglophone Literature and Film. 3 Credits.

Migration and politics as represented in world Anglophone literature and film; theories and histories of migration, feminist theory, and ethnic studies engaged in conversation with cultural texts. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 2712. Bollywood Cinema. 3 Credits.

Introduction to the history and aesthetics of popular Hindi film known as Bollywood from the 1950s through the present; gender identities, melodrama, nationalism, modernity, religion, family, sexuality, globalization, and diaspora.

ENGL 2712W. Bollywood Cinema. 3 Credits.

Introduction to the history and aesthetics of popular Hindi film known as Bollywood from the 1950s through the present; gender identities, melodrama, nationalism, modernity, religion, family, sexuality, globalization, and diaspora. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 2800. Introduction to Critical Theory. 3 Credits.

Topics and techniques of literary and cultural analysis. Introduction to major schools of critical theory, including psychoanalysis, Marxism, feminism, queer theory, and disability studies.

ENGL 2800W. Introduction to Critical Theory. 3 Credits.

Topics and techniques of literary and cultural analysis. Introduction to major schools of critical theory, including psychoanalysis, Marxism, feminism, queer theory, and disability studies. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 2830. Introduction to Tragedy. 3 Credits.

Tragic works of literature from the Greeks to Beckett.

ENGL 2840. Introduction to Comedy. 3 Credits.

Introduction to comic masterpieces from Chaucer to Tom Stoppard.

ENGL 3210. Readings in Creative Writing. 3 Credits.

Intensive reading of one to three texts selected by the instructor with the goal of learning to read as a writer and developing close reading skills. Authors and texts vary. May be repeated for credit provided course coverage differs.

ENGL 3240. Introduction to Dramaturgy. 3 Credits.

Fundamentals of classical and contemporary dramaturgical practice, including analyzing plays, doing research, supporting directors and actors in rehearsal, writing program notes, and leading post-show discussions. Same as TRDA 3240.

ENGL 3250. Intermediate Dramatic Writing. 3 Credits.

A workshop developing scripts for both theatre and film. Same as TRDA 3250. Prerequisite: ENGL 2250 . May be repeated for credit with departmental approval.

ENGL 3360. Advanced Fiction Writing. 3 Credits.

Further workshop study of the writing of fiction. Prerequisite: ENGL 2560 . May be repeated for credit with departmental approval.

ENGL 3370. Advanced Poetry Writing. 3 Credits.

Further workshop study of the writing of poetry. May be repeated for credit with permission of the department. Prerequisite: ENGL 2570.

ENGL 3380. Creative Writing Workshop. 3 Credits.

Taught by the Jenny McKean Moore Writer in Washington; for undergraduates and graduate students. May be repeated for credit if taught by a different instructor. Prerequisites: One of the following upper-level creative writing courses: ENGL 2210, ENGL 2240, ENGL 2250, ENGL 2460, ENGL 2470, ENGL 2560, ENGL 2570, ENGL 3210, ENGL 3240, ENGL 3250, ENGL 3360, ENGL 3370, or ENGL 3390.

ENGL 3385. American Memoir. 3 Credits.

Contemporary American memoir as a literary construct; the history of the genre, its relationship to other literary models, and recent developments. Prerequisite: None.

ENGL 3390. Topics in Creative Writing. 3 Credits.

Topics announced prior to the registration period; may be repeated for credit provided the topic differs. Topics may include poetry and poetics; forms and methods in fiction; forms and methods in poetry; memoir and personal narratives; creative nonfiction; "Literature, Live"; avant-garde and experimental writing.

ENGL 3400. Topics in Literature and Finance. 3 Credits.

Capstone course for English minors in the School of Business. Analysis of economic theories as they pertain to literary works. Topics may vary. Recommended background: Prior completion of English 1315.

ENGL 3410. Chaucer. 3 Credits.

Chaucer's major works seen as exciting, lively texts from the modern perspective and as products of specific economic, social, and cultural trends of the late fourteenth century. Focus on *The Canterbury Tales*, read in the original Middle English.

ENGL 3410W. Chaucer. 3 Credits.

Chaucer's major works seen as exciting, lively texts from the modern perspective and as products of specific economic, social, and cultural trends of the late fourteenth century. Focus on *The Canterbury Tales*, read in the original Middle English. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3420. Medieval Literature. 3 Credits.

Readings from a wide range of medieval genres, including romances, saints' legends, mystical narratives, lyrics, civic drama, and social satires. How these texts responded to and shaped changing patterns of medieval culture, as the clergy, the aristocracy, and the urban bourgeoisie attempted to define a culture of their own.

ENGL 3420W. Medieval Literature. 3 Credits.

Readings from a wide range of medieval genres, including romances, saints' legends, mystical narratives, lyrics, civic drama, and social satires. How these texts responded to and shaped changing patterns of medieval culture, as the clergy, the aristocracy, and the urban bourgeoisie attempted to define a culture of their own. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3430. The English Renaissance. 3 Credits.

Verse and prose written in the period 1515 to 1625, examined in relation to cultural practices and social institutions that shaped English life. More, Sidney, Spenser, Shakespeare, Donne, Jonson, Bacon, Herbert, many others.

ENGL 3440. Shakespeare I. 3 Credits.

Close study of six or seven plays each semester, with emphasis on the texts in history and ideology. Attention to current critical practices (feminist, materialist, psychoanalytic), modern performance practice, and Shakespeare as a cultural institution.

ENGL 3440W. Shakespeare I. 3 Credits.

Close study of six or seven plays each semester, with emphasis on the texts in history and ideology. Attention to current critical practices (feminist, materialist, psychoanalytic), modern performance practice, and Shakespeare as a cultural institution. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3441. Shakespeare II. 3 Credits.

Continuation of ENGL 3440. Close study of six or seven plays each semester, with emphasis on the texts in history and ideology. Attention to current critical practices (feminist, materialist, psychoanalytic), modern performance practice, and Shakespeare as a cultural institution.

ENGL 3441W. Shakespeare II. 3 Credits.

Continuation of ENGL 3440. Close study of six or seven plays, with emphasis on the texts in history and ideology. Attention to current critical practices (feminist, materialist, psychoanalytic), modern performance practice, and Shakespeare as a cultural institution. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3445. Shakespeare on Film. 3 Credits.

Students learn in detail the history of a small but significant subset of American and European film production: adaptations of Shakespeare's plays using the original language.

ENGL 3446. Shakespearean London. 3 Credits.

Early modern London's emergence as a global capital and its influence on Shakespeare's plays. Instructor permission required.

ENGL 3450. Topics in Shakespeare Studies. 3 Credits.

Critical study of a particular aspect of Shakespeare's work, or of a distinctive approach to the plays. Projected topics: Shakespeare on film, the history plays and Elizabethan England, eighteenth-century rewritings of Shakespeare, Shakespeare as poet, cultural materialist readings of Shakespeare.

ENGL 3460. Milton. 3 Credits.

Study of the major works in verse and prose, following the course of Milton's career.

ENGL 3470. English Drama I. 3 Credits.

Shakespeare's contemporaries.

ENGL 3471. English Drama II. 3 Credits.

Continuation of ENGL 3470. Historical survey, 1660 to present.

ENGL 3480. Eighteenth-Century British Literature. 3 Credits.

Eighteenth-century British literature, including literature that reflects some of the upheavals of a period that produced the Enlightenment, the French Revolution, the United States of America, and the two-party system.

ENGL 3480W. The Eighteenth Century I. 3 Credits.

Readings in significant eighteenth-century English and Continental writers—Dryden, Swift, Pope, Johnson, Montesquieu, Voltaire, and others—with emphasis on tracing the ways in which literary texts contain, perpetuate, and subvert social and political ideologies. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3481. The Eighteenth Century II. 3 Credits.

Continuation of ENGL 3480. Readings in significant eighteenth-century English and Continental writers—Dryden, Swift, Pope, Johnson, Montesquieu, Voltaire, and others—with emphasis on tracing the ways in which literary texts contain, perpetuate, and subvert social and political ideologies.

ENGL 3481W. The Eighteenth Century II. 3 Credits.

Continuation of ENGL 3480. Readings in significant eighteenth-century English and Continental writers—Dryden, Swift, Pope, Johnson, Montesquieu, Voltaire, and others—with emphasis on tracing the ways in which literary texts contain, perpetuate, and subvert social and political ideologies. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3490. Early American Literature and Culture. 3 Credits.

The shaping of America's early literary and cultural traditions as shown by significant writers of the colonial and early national periods: Bradstreet, Cotton Mather, Edwards, Franklin, Crèvecoeur, and others.

ENGL 3490W. Early American Literature and Culture. 3 Credits.

The shaping of America's early literary and cultural traditions as shown by significant writers of the colonial and early national periods: Bradstreet, Cotton Mather, Edwards, Franklin, Crèvecoeur, and others. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3510. Children's Literature. 3 Credits.

Nineteenth- and twentieth-century children's texts that illuminate the several worlds of childhood: the "small world" of childhood perception, the larger world of social and historical forces, and the "secondary world" of fantasy.

ENGL 3520. American Romanticism. 3 Credits.

The shaping of America's literary and cultural traditions as shown by significant writers of the Romantic era: Poe, Emerson, Hawthorne, Melville, Thoreau, Whitman, Dickinson, and others.

ENGL 3520W. American Romanticism. 3 Credits.

The shaping of America's literary and cultural traditions as shown by significant writers of the Romantic era: Poe, Emerson, Hawthorne, Melville, Thoreau, Whitman, Dickinson, and others. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3530. The British Romantic Period. 3 Credits.

Major figures and topics in English and Continental romanticism: Blake, Wordsworth, Coleridge, Lamb, Byron, Shelley, Keats, Hazlitt, DeQuincey, and others.

ENGL 3530W. The British Romantic Period. 3 Credits.

Major figures and topics in English and Continental romanticism: Blake, Wordsworth, Coleridge, Lamb, Byron, Shelley, Keats, Hazlitt, DeQuincey, and others. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3540. Victorian Literature I. 3 Credits.

Major writers between 1830 and 1865: E. Brontë, Dickens; Tennyson, Browning, Arnold; Darwin, Carlyle, Ruskin.

ENGL 3540W. Victorian Literature I. 3 Credits.

Major writers between 1830 and 1865: E. Brontë, Dickens, Tennyson, Browning, Arnold, Darwin, Carlyle, Ruskin. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3541. Victorian Literature II. 3 Credits.

Major writers between 1865 and 1900: Eliot, Hardy, Conrad, Swinburne, the Rossetts, Morris, Pater, and Wilde.

ENGL 3550. The English Novel I. 3 Credits.

The eighteenth century—Defoe, Richardson, Fielding, Sterne, and others.

ENGL 3551. The English Novel II. 3 Credits.

Continuation of ENGL 3550. The nineteenth century—Austen, the Brontës, Dickens, George Eliot, Hardy, and others.

ENGL 3551W. The English Novel II. 3 Credits.

Continuation of ENGL 3550. The nineteenth century—Austen, the Brontës, Dickens, George Eliot, Hardy, and others. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3560. American Realism. 3 Credits.

The shaping of America's literary and cultural traditions as shown by significant writers of the Realist school: Twain, James, Crane, Howells, Wharton, Chopin, Robinson, and others.

ENGL 3560W. American Realism. 3 Credits.

The shaping of America's literary and cultural traditions as shown by significant writers of the Realist school: Twain, James, Crane, Howells, Wharton, Chopin, Robinson, and others. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3570. Nineteenth-Century Black Literature. 3 Credits.

Studies in nineteenth-century black literature of the Americas and the transatlantic. Writing from the United States, Latin America, the Caribbean, Britain, and Africa may be included. Topics and emphasis may vary.

ENGL 3610. Modernism. 3 Credits.

The emergence of modernist experimentation (and the sense of epistemological and moral crisis it expressed) in the poetry and prose of Pound, T.S. Eliot, Woolf, Kafka, and others.

ENGL 3620. American Poetry I. 3 Credits.

Close examination of major American poems from the beginnings to the early twentieth century: Poe, Emerson, Whitman, Dickinson, and others. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3620W. American Poetry I. 3 Credits.

Close examination of major American poems from the beginnings to the early twentieth century: Poe, Emerson, Whitman, Dickinson, and others. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3621. American Poetry II. 3 Credits.

This course examines important books by twelve American poets from throughout the twentieth century who collectively disrupt the continuity and traditions of English-language poetry, starting with the Georgian, even Horatian lyrics of Robert Frost (just before WW I), through the Modernist constructions of Gertrude Stein, T.S. Eliot, William Carlos Williams, Wallace Stevens, and Langston Hughes, and on through the post-WW II socially-conscious, Confessionalist, and Postmodern poetries of Brooks, Ginsberg, Plath, Bishop, Ammons, and Ashbery.

ENGL 3621W. American Poetry II. 3 Credits.

This course examines important books by twelve American poets from throughout the twentieth century who collectively disrupt the continuity and traditions of English-language poetry, starting with the Georgian, even Horatian lyrics of Robert Frost (just before WW I), through the Modernist constructions of Gertrude Stein, T.S. Eliot, William Carlos Williams, Wallace Stevens, and Langston Hughes, and on through the post-WW II socially-conscious, Confessionalist, and Postmodern poetries of Brooks, Ginsberg, Plath, Bishop, Ammons, and Ashbery. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3630. American Drama I. 3 Credits.

Nineteenth-century melodrama and the emergence of realism; works by O'Neill and other dramatists of the early twentieth century.

ENGL 3631. American Drama II. 3 Credits.

Continuation of ENGL 3630. Developments in modern American drama since World War II, including works by Williams, Miller, Albee, Shepard, Rabe, Guare, Mamet, Henley, Wasserstein, Shange, Hwang, Wilson, and others.

ENGL 3640. The American Novel I. 3-4 Credits.

Historical and critical study of major works in the American novelistic tradition. From the beginnings through the nineteenth century: Hawthorne, Melville, James, Twain, Dreiser, and others.

ENGL 3640W. The American Novel I. 4 Credits.

Historical and critical study of major works in the American novelistic tradition. From the beginnings through the nineteenth century: Hawthorne, Melville, James, Twain, Dreiser, and others. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3641. The American Novel II. 3 Credits.

Continuation of ENGL 3640. Historical and critical study of major works in the American novelistic tradition. The twentieth century: Wharton, Cather, Anderson, Hemingway, Fitzgerald, Faulkner, Wright, R.P. Warren, Nabokov, and others.

ENGL 3641W. The American Novel II. 3 Credits.

Continuation of ENGL 3640. Historical and critical study of major works in the American novelistic tradition. The twentieth century: Wharton, Cather, Anderson, Hemingway, Fitzgerald, Faulkner, Wright, R.P. Warren, Nabokov, and others. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3650. The Short Story. 3 Credits.

An extensive survey of short fiction by a wide variety of writers of the 19th and 20th centuries, about half of them American; readings on the art of the short story by writers and literary critics.

ENGL 3660. Twentieth-Century Irish Literature I. 3 Credits.

Irish writers from the time of the literary revival in the late nineteenth century to the present. Yeats and other Irish poets and playwrights of his time and after—Synge, O'Casey, Kavanagh, Heaney, and others.

ENGL 3661. Twentieth-Century Irish Literature II. 3 Credits.

Continuation of ENGL 3660. Irish writers from the time of the literary revival in the late nineteenth century to the present. Joyce through Ulysses and other fiction writers of later generations—O'Brien, Beckett, and others.

ENGL 3661W. Twentieth-Century Irish Literature I. 3 Credits.

Continuation of ENGL 3660. Irish writers from the time of the literary revival in the late nineteenth century to the present. Joyce through Ulysses and other fiction writers of later generations—O'Brien, Beckett, and others. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3710. Contemporary Drama. 3 Credits.

Examines drama written since 1960 in the light of postmodernism as both a literary and a theatrical theory. Explores the ways contemporary playwrights and directors challenge the perceptions and assumptions of today's audience.

ENGL 3710W. Contemporary Drama. 3 Credits.

Examines drama written since 1960 in the light of postmodernism as both a literary and a theatrical theory. Explores the ways contemporary playwrights and directors challenge the perceptions and assumptions of today's audience. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3720. Contemporary American Literature. 3 Credits.

Historical, critical, and theoretical study of American literature since the 1960s. Various authors and genres.

ENGL 3720W. Contemporary American Literature. 3 Credits.

Historical, critical, and theoretical study of American literature since the 1960s. Various authors and genres. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3730. Topics in Global Postcolonial Literature and Film. 3 Credits.

Representations of empire and culture in modern Anglophone literature and cinema from around the world; cross-cultural encounter, migration, identity, orientalism, gender, environment, conflict, and globalization. May be repeated for credit provided the topic differs. See department for more details.

ENGL 3730W. Topics in Global Postcolonial Literature and Film. 3 Credits.

Representations of empire and culture in modern Anglophone literature and cinema from around the world; cross-cultural encounter, migration, identity, orientalism, gender, environment, conflict, and globalization. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. May be repeated for credit provided the topic differs. See department for more details.

ENGL 3800. The Literature of Hawaii. 3 Credits.

The history, culture, and politics of the settlement of the Hawaiian Islands through depictions in literature, poetry, film, journalism, archeological excavation reports, and diaries; the diversity of inhabitants on the islands and hybrid communicative forms they have developed.

ENGL 3810. Selected Topics in Literature. 3-4 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. See department for more details.

ENGL 3810W. Selected Topics in Literature. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. See department for more details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3820. Major Authors. 3 Credits.

In-depth studies of a single figure or two or three authors (of British, American, or other nationality) who have written in English. Topics announced in the Schedule of Classes; may be repeated for credit provided the topic differs.

ENGL 3820W. Major Authors. 3 Credits.

In-depth studies of a single figure or two or three authors (of British, American, or other nationality) who have written in English. Topics announced in the Schedule of Classes; may be repeated for credit provided the topic differs. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3826. Toni Morrison and William Faulkner. 3 Credits.

Commonalities between the fictional and discursive practices of Toni Morrison and William Faulkner; specifically, how their texts reenact and resist racism and patriarchal structures, explore the ways in which memory and the past construct identity, experiment with style.

ENGL 3830. Topics in Literary Theory and Cultural Studies. 3 Credits.

Selected topics in the diverse theoretical methodologies and interdisciplinary studies that characterize contemporary English and American literary studies. May be repeated for credit provided that topic differs.

ENGL 3830W. Topics in Literary Theory and Cultural Studies. 3 Credits.

Selected topics in the diverse theoretical methodologies and interdisciplinary studies that characterize contemporary English and American literary studies. May be repeated for credit provided the topic differs. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3840. Gender and Literature. 3 Credits.

Symbolic representations of culturally defined roles and assumptions in literature. Male and female gender roles as fundamental to culture; the representation of culture, in literature especially and in the arts and humanities generally. May be repeated for credit provided the topic differs.

ENGL 3840W. Gender and Literature. 3 Credits.

Symbolic representations of culturally defined roles and assumptions in literature. Male and female gender roles as fundamental to culture; the representation of culture, in literature especially and in the arts and humanities generally. May be repeated for credit provided the topic differs. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3850. Ethnicity and Place in American Literature. 3 Credits.

The relationships among ethnic identity, authorship, regional setting, and national consciousness. Differences in the literary culture of ethnically, racially, and regionally diverse American populations, and how considerations of ethnicity and place have been reshaping the American literary canon. Texts and emphases vary by instructor.

ENGL 3860. Topics in the History of the English Language. 3 Credits.

The cultural and literary functions of English across time and space. Scope and methodology vary by instructor. Topics may include language and identity, theoretical and linguistic approaches to language, multilingualism, diasporic writing, or history and periodization.

ENGL 3910. Disability Studies. 3 Credits.

Consideration of cultural texts that illustrate or illuminate issues of ability and disability—terms that extend the prism through which human experience may be understood.

ENGL 3912. Disability and the Holocaust. 3 Credits.

Investigating the question of direct links between the medical mass murder of disabled people in German psychiatric institutions to the Holocaust during World War II; studies of contemporary memorialization practices are examined.

ENGL 3915. Literature and Madness. 3 Credits.

A literary history of mental unrest; madness as a condition of culture, as an adaptive cognitive style, and as a cognitive challenge; descriptive, medical, historical, and socio-critical perspectives.

ENGL 3918. Literature and Medicine. 3 Credits.

The experience of illness as determined by historical, social, and psychological contexts; narrative as a mode of both understanding and managing illness, pain, loss, and the injustice of suffering.

ENGL 3920. U.S. Latina/o Literature and Culture. 3 Credits.

Introduction to the basic texts in the Chicana/o, Cuban-American, Dominican-American, and Puerto Rican literary and cultural traditions. Works by U.S. writers of Central American origin are discussed as well.

ENGL 3930. Topics in U.S. Latina/o Literature and Culture. 3 Credits.

In-depth exploration of a critical issue in the field of Latina/o literary and cultural studies. Topics may include ideologies of literary recovery, transnationalism and diaspora, blackness, and *latinidad*.

ENGL 3930W. Topics in U.S. Latina/o Literature and Culture. 3 Credits.

In-depth exploration of a critical issue in the field of Latina/o literary and cultural studies. Topics may include ideologies of literary recovery, transnationalism and diaspora, blackness and *latinidad*. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3940. Topics in African American Literary Studies. 3 Credits.

Intensive study of a single aspect of African American literature: major authors, genre, theme, movement. Substantial attention to the critical tradition.

ENGL 3945. African American Poetry. 3 Credits.

African American poetry from the Black Atlantic through contemporary spoken word and web-based experiments in hypertext composition. Topics vary and may include Langston Hughes, Gwendolyn Brooks, poetry manifestoes, poetry and social justice, or eco-poetics of the black experience.

ENGL 3950. Cultural Theory and Black Studies. 3 Credits.

Selected topics in critical and cultural theories—often interdisciplinary—as used in understanding African American literature and culture. Topics may include genre, medium, period, social change, and leading contemporary African American thinkers/writers.

ENGL 3950W. Cultural Theory and Black Studies. 3 Credits.

Selected topics in critical and cultural theories—often interdisciplinary—as used in understanding African American literature and culture. Topics may include genre, medium, period, social change, and leading contemporary African American thinkers/writers. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3960. Asian American Literature. 3 Credits.

How Asian American writers construct their identities in dialogue with shifting ideas of “America.” Asian American history, gendering subjects, orientalism and postcolonial subjectivity, interracial relations, canonization. Representative writers: Kingston, Hwang, Jen, Chang-rae Lee, Ondaatje, Lahiri, Bulosan, Hagedorn.

ENGL 3960W. Asian American Literature. 3 Credits.

How Asian American writers construct their identities in dialogue with shifting ideas of “America.” Asian American history, gendering subjects, orientalism and postcolonial subjectivity, interracial relations, canonization. Representative writers: Kingston, Hwang, Jen, Chang-rae Lee, Ondaatje, Lahiri, Bulosan, Hagedorn. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3965. Topics in Asian American Cultural Studies. 3 Credits.

Literary and cinematic texts of Asian diasporic writers, with a focus on Asian American authors, history, and culture; the globalization of Asian American literature.

ENGL 3970. Jewish American Literature. 3 Credits.

One hundred years of Jewish American writing including fiction, nonfiction, autobiography, poetry, and drama. The immigrant experience, American philosemitism and antisemitism, the Holocaust and after, the New York intellectuals, Jewish feminism, and the patriarchal tradition.

ENGL 3970W. Jewish American Literature. 3 Credits.

One hundred years of Jewish American writing in fiction, autobiography, poetry, drama, and non-fictional prose. The immigrant experience, American philosemitism and antisemitism, the Holocaust and after, the New York intellectuals, Jewish feminism, and the patriarchal tradition. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3980. Queer Studies. 3 Credits.

Examination of literature and culture in the context of the history and experience of lesbian, gay, bisexual, and transgendered people, with consideration of sexual identity as a core component of human experience. May be repeated once for credit provided the topic differs.

ENGL 3980W. Queer Studies. 3 Credits.

Examination of literature and culture in the context of the history and experience of lesbian, gay, bisexual, and transgendered people, with consideration of sexual identity as a core component of human experience. May be repeated once for credit provided the topic differs. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 3990. Literary Studies Workshop. 1 Credit.

Topics vary by semester. Consult the Schedule of Classes for more details. May be repeated once for credit provided the topic differs.

ENGL 4020. Studies in Contemporary Literature. 1-3 Credits.

Theme-based studies of specific issues or figures in twenty-first-century literature.

ENGL 4030. Service Learning with the Pen/ Faulkner Foundation. 3 Credits.

The role of literature in public life; how nonprofits bridge literary citizenship and civic engagement. This course is offered in collaboration with the PEN/Faulkner Foundation, a nonprofit organization that promotes literary achievement and excellence through various events programs.

ENGL 4040. Honors Seminar. 3 Credits.

Genre and genre theory; literature as cultural artifact and as instrument of cultural criticism; various critical approaches—ideological, historical, and ahistorical. Open only to first-semester senior honors candidates in English.

ENGL 4040W. Honors Seminar. 3 Credits.

Genre and genre theory; literature as cultural artifact and as instrument of cultural criticism; various critical approaches—ideological, historical, and ahistorical. Open only to first-semester senior honors candidates in English. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 4135. Folger Seminar. 3 Credits.

The history of books and early modern culture. Use of the archive at the Folger Shakespeare Library. Students must obtain departmental approval in the preceding semester. Same as HIST 4135/ FREN 4135.

ENGL 4220. Creative Writing Senior Thesis. 3 Credits.

Under the guidance of an instructor, the student composes an original manuscript of poetry or short fiction accompanied by an essay situating the student's work in the contemporary context. Open only to seniors admitted to the English and creative writing major.

ENGL 4220W. Creative Writing Senior Thesis. 3 Credits.

Under the guidance of an instructor, the student composes an original manuscript of poetry or short fiction accompanied by an essay situating the student's work in the contemporary context. Open only to seniors admitted to the English and creative writing major. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 4250. Honors Thesis. 3 Credits.

Under the guidance of an instructor, the student writes a thesis on an approved topic. Open only to senior honors candidates in English.

ENGL 4250W. Honors Thesis. 3 Credits.

Under the guidance of an instructor, the student writes a thesis on an approved topic. Open only to senior honors candidates in English. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ENGL 4360. Independent Study. 1-4 Credits.

For exceptional students, typically majors, whose academic objectives are not accommodated in regular courses. Students must obtain departmental approval and arrange for supervision by an appropriate member of the faculty.

ENGL 4470. Internship. 1-3 Credits.

Position of responsibility with a publication, educational project, firm, or cultural organization offering practical experience in research, writing, editing, etc. May be repeated for credit; a maximum of 3 credits may be counted toward the English major. Permission of the supervising faculty required prior to enrollment. P/NP grading only. Restricted to juniors and seniors in the English program.

ENGL 6100. Introduction to Literary Theory. 3 Credits.

An overview of methodologies for examining texts as linguistic and cultural productions. Methodologies explored may include structuralism, formalism, deconstruction, cultural materialism, postcolonial theory, feminism, gender studies, and queer theory.

ENGL 6120. Advanced Literary Theory. 3 Credits.

The course focuses on a major figure or topic in theory (e.g., Foucault, Lacan, Barthes, Kristeva, Bakhtin, post-Marxist theory, language and power, the canon).

ENGL 6130. Selected Topics in Criticism. 3 Credits.

Topics may include cultural studies, film, gay/lesbian studies, others.

ENGL 6220. Topics in Medieval and Early Modern Studies. 3 Credits.

Topics may include gender and body; postcolonial approaches to the period; surveys of poetry and/or prose with a special thematic coherence.

ENGL 6240. Literature of the British Archipelago. 3 Credits.

The literary and historical texts of early modern and medieval Britain within a pan-insular framework: England in conflict and coexistence with Ireland, Wales, Scotland.

ENGL 6250. Transnational England. 3 Credits.

The early literature of England within a global framework: England, Spain, France, Italy, Turkey, the Levant, the Americas, Africa, India, the Caribbean.

ENGL 6260. Seminar in Medieval and Early Modern Studies. 3 Credits.

Trends and cutting-edge research in medieval and early modern studies.

ENGL 6350. Nineteenth Century I. 3 Credits.

Topics in British and American nineteenth-century writing and culture, exploring national traditions and international movements and issues, such as Romanticism, Realism, and others.

ENGL 6351. Nineteenth Century II. 3 Credits.

Continuation of ENGL 6350. Topics in British and American nineteenth-century writing and culture, exploring national traditions and international movements and issues, such as Romanticism, Realism, and others.

ENGL 6352. Nineteenth Century III. 3 Credits.

Continuation of ENGL 6351. Topics in British and American nineteenth-century writing and culture, exploring national traditions and international movements and issues, such as Romanticism, Realism, and others.

ENGL 6353. Nineteenth Century IV. 3 Credits.

Continuation of ENGL 6352. Topics in British and American nineteenth-century writing and culture, exploring national traditions and international movements and issues, such as Romanticism, Realism, and others.

ENGL 6450. Twentieth Century I. 3 Credits.

Topics in twentieth-century British and American writing and culture, exploring national traditions and international movements and issues, such as literary modernism, anti-modernist and post-modernist currents, others.

ENGL 6451. Twentieth Century II. 3 Credits.

Continuation of ENGL 6450. Topics in twentieth-century British and American writing and culture, exploring national traditions and international movements and issues, such as literary modernism, anti-modernist and post-modernist currents, others.

ENGL 6452. Twentieth Century III. 3 Credits.

Continuation of ENGL 6451. Topics in twentieth-century British and American writing and culture, exploring national traditions and international movements and issues, such as literary modernism, anti-modernist and post-modernist currents, others.

ENGL 6453. Twentieth Century IV. 3 Credits.

Continuation of ENGL 6452. Topics in twentieth-century British and American writing and culture, exploring national traditions and international movements and issues, such as literary modernism, anti-modernist and post-modernist currents, others.

ENGL 6510. Writing, Race, and Nation. 3 Credits.

Literary culture as a basis for exploration of intersections of origins and evolution of racial and ethnic identities and national myths and political objectives.

ENGL 6520. Ethnicity and Identity. 3 Credits.

Literary culture is used to explore how individuals, communities, and societies construct self-awareness and knowledge about others for cultural exchange.

ENGL 6530. Conceptualizing Genders. 3 Credits.

Structures of sex and gender difference considered historically and theoretically, including masculinity/femininity, sexualities, and their textual representations.

ENGL 6540. Women and Writing. 3 Credits.

Selected topics in the traditions, theory, and texts of women's literary production and culture. Same as WGSS 6251.

ENGL 6550. Studies in Genre I. 3 Credits.

Questions of genre, considered theoretically and practically. Content varies.

ENGL 6551. Studies in Genre II. 3 Credits.

Continuation of ENGL 6550. Questions of genre, considered theoretically and practically. Content varies.

ENGL 6560. Postcolonialism. 3 Credits.

Postcolonial theory and texts by representative writers.

ENGL 6620. Medicine and Society. 3 Credits.

The interaction of medicine and society in ways that touch on philosophy, economics, sociology, and public policy, but that cannot be fully understood in terms of any single perspective. Society's effect on medicine and medicine's effect on society.

ENGL 6630. Literature and Medicine. 3 Credits.

Methods of critical theory applied to issues concerning the practice of medicine. The polar constructs of illness and health, life and death, and life's worth or its waste.

ENGL 6720. Independent Research. 3 Credits.

Written permission of the instructor required prior to enrollment. May be repeated for credit to a maximum of 9 credits.

ENGL 6740. Mastering the Canon. 3 Credits.

Independent reading under a faculty member.

ENGL 6810. Folger Institute Seminars I. 3 Credits.

Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Consult the graduate advisor before registration.

ENGL 6811. Folger Institute Seminars II. 3 Credits.

Continuation of ENGL 6810. Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Consult the graduate advisor before registration.

ENGL 6998. Thesis Research. 3 Credits.

ENGL 6999. Thesis Research. 3 Credits.

ENGL 8998. Advanced Reading and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

ENGL 8999. Dissertation Research. 3-12 Credits.

May be repeated for credit. ENGL 8999 must be taken as the final 12 credits of the degree. Restricted to doctoral candidates.

ENGLISH FOR ACADEMIC PURPOSES (EAP)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

EAP 1010. Oral Academic Communication for International Students. 3 Credits.

Development of communication in English and multi-literacy through intercultural, multimedia, and visual communication. Focus on listening and note-taking, leading and participating in class discussions, managing a variety of authentic academic literacy tasks, and delivering presentations. Restricted to international students.

EAP 1015. American Multicultural Perspectives in Washington, DC. 3 Credits.

Designed to prepare international undergraduate students for university-level writing expectations. A structured academic writing course that explores the capital's rich multicultural heritage. Focus on the development of academic literacy skills, drafting and revising, and research-based writing. Upon successful completion of EAP 1015, students take UW 1020.

EAP 1016. Academic Skills Workshop. 1 Credit.

Development of critical academic skills for international students. Workshop topics may include grammar for academic writing, critical reading, listening and note-taking, academic vocabulary development, and discussion and presentation skills. Credit for this course cannot be applied to a degree.

EAP 1046. Independent Study. 1-4 Credits.

Individualized instruction in specific skill areas. Program director approval required. Credit for this course cannot be applied toward a degree.

EAP 3200. Special Topics in English for Academic Purposes. 3 Credits.

This special topics course targets academic communication in specialized or advanced contexts. Class activities and assignments reflect an analysis of student needs in disciplinary or professional fields. Course content draws on authentic materials and tasks to prepare students for success in written and oral communication.

EAP 6000. Academic Communication. 3 Credits.

Acclimation to the oral communication expectations of graduate school through developing listening and note-taking skills, expanding communicative vocabulary, leading and participating in class discussions, and preparing and delivering informal and formal presentations. Classroom activities directed toward scholarly and professional communication in students' fields of study whenever possible. Credit does not apply to any degree or certificate offered by GW.

EAP 6016. Academic Skills Workshop. 1 Credit.

Development of critical academic skills for international students. Workshop topics may include grammar for academic writing, critical reading, listening and note-taking, academic vocabulary development, and discussion and presentation skills. Credit for this course cannot be applied to a degree. (Same as EAP 1016).

EAP 6110. Academic Writing and Research for International Graduate Students I. 3 Credits.

Introduction to research-based academic writing for university-level graduate study; rhetorical awareness, working with academic sources, summary structure, the process of drafting and revising written work, grammatical accuracy, paraphrasing, source citation, and plagiarism prevention; academic skills development tasks target specific writing challenges faced by second language writers. Credit for this course does not apply toward any degree or certificate offered by GW.

EAP 6111. Academic Writing and Research for International Graduate Students II. 3 Credits.

An academic writing and research course for international students who demonstrate high proficiency in English. Focus on research paper writing, reading and analysis of academic discourse, small-group work, and oral presentations on research. Credit for this course does not apply toward any degree or certificate offered by GW.

EAP 6200. Special Topics in English for Academic Purposes. 3 Credits.

Academic communication in specialized or advanced contexts. Class activities and assignments reflect an analysis of student needs in disciplinary or professional fields. Course content draws on authentic materials and tasks to prepare students for success in written and oral communication.

ENVIRONMENTAL RESOURCE POLICY (ENRP)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ENRP 6085. Topics in Environmental Resource Policy. 1-3 Credits.

Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ENRP 6097. Practicum in Environmental Resource Policy. 0 Credits.

International students engage in an unpaid internship. Restricted to students enrolled in the MA in environmental resource policy program.

ENRP 6101. Environmental Sciences I: Physical Sciences. 3 Credits.

Basic physical sciences crucial to environmental issues, including chemistry, geology, hydrology, climate science, and cross-media interactions; land, air, and water pollution, climate change, production and consumption of energy, sea level rise, and anthropogenic changes in the cryosphere. Restricted to students in the MA in environmental resource policy; graduate certificate in contexts of environmental policy; and BA/MA in environmental studies and environmental resource policy programs; permission of the instructor may be substituted.

ENRP 6102. Environmental Sciences II: Life Sciences. 3 Credits.

Basic life sciences crucial to environmental issues, including biology, ecology, environmental health and toxicology, epidemiology, and agriculture; biodiversity, ecosystem services, habitat preservation, deforestation, conservation biology, nutrient cycling, and the impacts of climate change on living systems. Restricted to students in the MA in environmental resource policy; graduate certificate in contexts of environmental policy; and BA/MA in environmental studies and environmental resource policy programs; permission of the instructor may be substituted.

ENRP 6145. Global Environmental Justice and Policy. 3 Credits.

Environmental justice, considered as both a movement and a public policy. Examination of environmental injustices—both perceived and actual—affecting individuals, communities, and populations. Adherence to, and enforcement of, environmental laws and regulations that affect the allocation of environmental benefits and the distribution of sources of toxic pollution and other hazards.

ENRP 6295. Research Topics in Environmental Resource Policy. 1-3 Credits.

May be repeated for credit to a maximum of 6 credits.

EPIDEMIOLOGY (EPID)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

EPID 6295. Reading and Research. 1-12 Credits.

May be repeated for credit.

EPID 6998. Thesis Research. 3 Credits.

EPID 6999. Thesis Research. 3 Credits.

EPID 8998. Advanced Reading and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

EPID 8999. Dissertation Research. 3-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

EXERCISE AND NUTRITION SCIENCES (EXNS)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

EXNS 1103. Professional Foundations in Exercise Science. 1 Credit.

Introduction to the science and practice of exercise and human movement as they relate to public health; sub-disciplines of exercise science, research related to the field, and professional and career development.

EXNS 1109. Professional Foundations in Nutrition Science. 1 Credit.

Overview of nutrition science and current challenges in the field; sub-disciplines of nutrition science and how they work together to answer important research questions for human health.

EXNS 1110. Applied Anatomy and Physiology I. 4 Credits.

Fundamentals of human anatomy and physiology for students preparing for health sciences professions. Emphasis on bones, joints, muscles, innervation, and blood supply. Laboratory fee.

EXNS 1111. Applied Anatomy and Physiology II. 4 Credits.

Continuation of EXNS 1110. Fundamentals of human anatomy and physiology for students preparing for health sciences professions. Emphasis on muscles, sensory and motor integration of the nervous system, function of the special senses, and the autonomic system. Laboratory fee. Prerequisites: EXNS 1110.

EXNS 1112. Current Issues in Coaching. 3 Credits.

Examination of current trends and issues in athletics, sport, and coaching from theoretical and applied perspectives. Study of a variety of timely topics using presentations, readings, videos, internet activities, and discussions.

EXNS 1114. Community Nutrition. 3 Credits.

Introduction to community nutrition and public health programs offered on the local, state, national, and international levels, targeting both individuals and groups. Topics include health policies, nutrition programs, nutrition assessment, and principles of nutrition education.

EXNS 1117. Principles of Coaching. 3 Credits.

Study of coach/athlete behavioral patterns and interactions, coaching methods, and interdisciplinary principles applicable to coaching.

EXNS 1118. Sport and Nutrition. 3 Credits.

Nutritional needs for recreational exercise and sports; skills in assessing nutritional needs; development of individual nutrition programs that are sport/activity-specific; and identification and correction of nutrition problems affecting sports performance. Prerequisites: EXNS 2119 or HLWL 1116.

EXNS 1119W. Children and Sport. 3 Credits.

Psychomotor, psychosocial, and physiological factors of children's participation in sports. The importance of sport to children, readiness to compete, adaptations to training, participation motives, social factors, fundamentals of training, nutrition, stress, and child protection. Theoretical aspects applied in a variety of sports settings. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

EXNS 1199. Topics in Exercise and Nutrition Sciences. 1-3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

EXNS 2110. Injury Prevention and Control. 3 Credits.

Information and practical experience in the prevention, recognition, and/or treatment of injury, illness, and health conditions; anatomy review, injury recognition skills, and prevention, first aid, and treatment techniques. Prerequisites: EXNS 1110 and EXNS 1111.

EXNS 2111. Exercise Physiology I. 4 Credits.

Function of the human body under the influence of physical activity. Nutrition as a foundation for human performance, energy for physical activity, and comprehensive weight management. Laboratory fee. Prerequisites: EXNS 1110 and EXNS 1111.

EXNS 2112. Exercise Physiology II. 4 Credits.

Response of physiological systems of the body to acute and chronic exercise and neuromuscular adaptations to exercise. Exercise training program design, training in extreme environmental conditions, and training considerations for special populations. Laboratory fee. Prerequisites: EXNS 2111.

EXNS 2113. Kinesiology. 4 Credits.

How the human body functions as a mechanical movement generator; the design and function of joints and muscles and principles of mechanics applied to human movement. Common injuries to the musculoskeletal system, how these injuries might occur, and what effect they have on movement patterns. Laboratory methods including techniques for palpation and evaluation of movement. Laboratory Fees. Prerequisites: ANAT 2181 or BISC 2581 or EXNS 1110.

EXNS 2114. Nutrition Sciences I. 3 Credits.

Study of macronutrients (carbohydrate, fat, and protein) and how they are digested, absorbed, and metabolized by the human body; how macronutrients are implicated in disease pathology, prevention, and management. Prerequisites: BISC 1111; or BISC 1115 and BISC 1125.

EXNS 2115. Nutrition Sciences II. 3 Credits.

Advanced study of how micronutrients are digested, absorbed, and metabolized by the human body; unique functions of each essential micronutrient and nutrient-nutrient interactions supporting organ systems and metabolism; hydration, functional ingredients, food additives, dietary supplements, food safety, lifecycle nutrition, and global micronutrient initiatives. Prerequisite: EXNS 2114.

EXNS 2116. Exercise and Health Psychology. 3 Credits.

The psychological, social, and environmental factors that influence the adoption and maintenance of physical activity/exercise and other health behaviors. The role of physical activity/exercise in the prevention of chronic disease. Emphasis on prominent theories used to understand and predict behavior change towards the initiation and maintenance of health behaviors. Issues specific to public health and diversity such as race/ethnicity, socioeconomic status, and gender are also addressed. Restricted to majors only. Prerequisites: PSYC 1001.

EXNS 2117. Sport Psychology. 3 Credits.

Introduction to current research and theoretical perspectives on psychological and psychosocial components of sport participation and competition. Participation motives, motivation, confidence, anxiety, aggression, and other factors that influence individuals and teams or groups. Prerequisites: PSYC 1001.

EXNS 2117W. Sport Psychology. 3 Credits.

Introduction to current research and theoretical perspectives on psychological and psychosocial components of sport participation and competition. Participation motives, motivation, confidence, anxiety, aggression, and other factors that influence individuals and teams or groups. Students complete written assignments to hone writing skills and apply course material. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: PSYC 1001.

EXNS 2119. Introduction to Nutrition Science. 3 Credits.

Nutrition science as it relates to human growth and development; dietary guidelines, digestion and absorption of nutrients, appetite, body weight, and chronic disease; how the body uses vitamins, minerals, and energy provided by fats, carbohydrates, and proteins; assessing nutritional status; nutrition on an individual and population level. Not for nutrition science majors. Prerequisites: BISC 1111; or BISC 1115 and BISC 1125.

EXNS 2120. Assessment of Nutritional Status. 3 Credits.

Methods of assessing dietary intakes, physical activity, anthropometry, body composition, and micronutrient status of individuals; factors affecting selection, reliability, and interpretation of various assessment methods in public health settings. Prerequisites: EXNS 2114 and EXNS 2115; or EXNS 2119.

EXNS 2121. Orthopaedic Taping and Bracing. 1 Credit.

Advanced practical application of skills learned in EXNS 2110, including first aid techniques, injury recognition skills, taping, and treatment of injuries. Concurrent enrollment in EXNS 2110 is required for students in the Pre-athletic Training/Sports Medicine track.

EXNS 2122. Food Systems in Public Health. 3 Credits.

This course explores systems thinking as it pertains to agriculture and food, attempts to define sustainability within the context of the global food system, examines the current state of the global food system from farm to fork, and analyzes its impacts on health. The course also examines several policies, programs, and proposals aimed at creating a healthier, more sustainable global food system.

EXNS 2123. Nutrition and Chronic Disease. 3 Credits.

Address the relationships between nutrition and chronic disease; obesity, diabetes, hypertension, cardiovascular disease, cancer, inflammatory conditions, musculoskeletal disorders, and neurodegenerative diseases. Prerequisites: EXNS 2114 and EXNS 2115; or EXNS 2119.

EXNS 2124. Lifecycle Nutrition. 3 Credits.

Overview of the science of nutrition as it relates to health throughout the major phases of the human life cycle. Prerequisites: EXNS 2114 and EXNS 2115; or EXNS 2119.

EXNS 3101. Independent Study. 3 Credits.

Outline of intended project must be approved prior to course registration. Restricted to For departmental majors only.

EXNS 3102. Applied Sport Psychology. 3 Credits.

Theoretical perspectives and practical aspects of applied sport psychology. Psychological skills and peak mental performance. Development and practical application of mental skills programs for athletes and methods of assessing psychological skills in sports settings. Qualifications and training routes for becoming a sport psychologist and professional and ethical issues. Prerequisites: EXNS 2117.

EXNS 3110. Field Experience - Exercise and Nutrition Sciences. 1-9 Credits.

For undergraduate exercise and nutrition sciences majors. Application of classroom-based knowledge to practical experience within a professional setting. Restricted to undergraduate majors in exercise and nutrition sciences. Prerequisites: EXNS 2112 and permission of the instructor.

EXNS 3111. Nutrition Science Research Methods. 3 Credits.

Approaches and techniques used in nutrition science research, with a focus on human studies; development and critique of study designs, commonly encountered measurement and analysis issues, and human research ethics. Prerequisite: EXNS 2114 AND EXNS 2115; OR EXNS 2119.

EXNS 3111W. Nutrition Science Research Methods. 3 Credits.

Approaches and techniques used in nutrition science research, with a focus on human studies; development and critique of study designs, commonly encountered measurement and analysis issues, and human research ethics. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: EXNS 2114 and EXNS 2115; or EXNS 2119.

EXNS 3117. Injury Assessment. 4 Credits.

Students gain skills and practical experience in the assessment of injuries. Includes anatomy review, evaluation techniques and procedures, referral skills, and appropriate documentation. Prerequisites: EXNS 2110.

EXNS 3118. Therapeutic Modalities in Sports Medicine. 4 Credits.

Explanation and demonstration of the use of therapeutic modalities on the healing process, including discussion of the use of therapeutic modalities to enhance the rehabilitation process after athletic injury. Laboratory fee. Prerequisites: EXNS 3117 or permission of instructor.

EXNS 3119. Therapeutic Exercise in Sports Medicine. 4 Credits.

Explanation and demonstration of the use of therapeutic exercise on the rehabilitation process. Discussion and development of practical skills in techniques of therapeutic exercise and equipment to enhance the exercise routine after athletic injury. Prerequisites: EXNS 3117 or permission of instructor.

EXNS 3121. Medical Issues in Sports Medicine. 3 Credits.

Topics in general medical issues and pharmacology as they relate to the athletic training profession. Prerequisites: EXNS 1110 and EXNS 1111.

EXNS 3123W. Psychology of Injury and Rehabilitation. 3 Credits.

Injury and rehabilitation psychology and its application to working with athletic and general population clients. The psychological, social, and environmental factors that influence injury susceptibility, reaction to injury, and adherence to rehabilitation; basic assessment and intervention techniques to promote and facilitate adherence to rehabilitation in a variety of professional settings. Strong emphasis on writing, writing development, and use of scientific literature obtained through library resources throughout the course. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to Exercise & Nutrition Sciences majors only.

EXNS 3125. Athletic Training Practicum. 3 Credits.

Students gain practical/clinical experience in athletic training and medical skills.

EXNS 3199. Advanced Topics in Exercise and Nutrition Sciences. 3 Credits.

Topics vary by semester. Consult the Schedule of Classes for more information.

EXNS 4110. Current Issues in Exercise Science. 3 Credits.

Capstone course for senior exercise science majors in their final spring semester. Students are required to understand and apply identified competencies from the core exercise science curriculum. Restricted to Senior exercise science majors in their final spring semester.

EXNS 4112. Nutrition Science Senior Capstone Seminar. 1 Credit.

Students are required to understand and apply identified competencies from the core nutrition science curriculum. Students enroll in their final spring semester of the program. Restricted to seniors in the nutrition science program.

EXNS 6202. Advanced Exercise Physiology I. 3 Credits.

Examination of acute and chronic cardiovascular and pulmonary adaptations to exercise training. Focus on mechanisms that affect oxygen delivery and utilization during aerobic exercise. Responses to exercise in extreme environmental conditions.

EXNS 6203. Advanced Exercise Physiology II. 3 Credits.

Metabolic and neuromuscular adaptations that occur in response to acute and chronic exercise. Biochemical pathways responsible for energy production during rest and exercise, and how these pathways adapt with chronic training. Neural, hormonal, and nutritional factors that influence exercise performance. Laboratory fees. Prerequisites: EXNS 6202 or permission of instructor.

EXNS 6204. Biostatistical Methods and Research Design. 3 Credits.

Basic principles, concepts, and procedures of research, sampling, and statistical design. Probability, hypothesis testing, and application of basic statistical techniques using calculators and statistical software packages.

EXNS 6207. Psychological Aspects of Sport and Exercise. 3 Credits.

Psychological, sociological, and environmental factors related to the adoption of exercise behavior and maintenance and achieving peak sport performance. The influence of psychology on exercise and sport behaviors, and techniques for changing and/or optimizing such behaviors using a person-centered, individual approach. Issues specific to public health and diversity including race, socioeconomic status, ethnicity, and gender are emphasized throughout the course.

EXNS 6208. Physical Activity: Physiology and Epidemiology. 2 Credits.

Introduction to health issues resulting from physical inactivity (or disuse). Basic principles of energy metabolism and both basic and leading edge methods for physical activity assessment. Topics include major physiological systems' adaptation to exercise training and to de-training and how this adaptation may vary by age and sex; the relationship between disuse and major chronic diseases across the age spectrum; and individual and community-based intervention strategies to modify behavior and ameliorate the putative effects of a sedentary lifestyle. Study of the role of the built environment as an environmental "toxin" using the basic principles of environmental health risk assessment. Prerequisites: EXNS 2111.

EXNS 6209. Advanced Concepts in Nutrition Science. 3 Credits.

Topics in nutrition and public health. Emerging issues, challenges, and controversies in nutrition science; the role of diet composition and physical activity in the maintenance of health and the development of chronic disease; and effectively communicating scientific findings and identifying key knowledge gaps in nutrition science literature.

EXNS 6210. Cardiac Rehabilitation. 3 Credits.

Overview of a wide range of clinical, public health, and health care topics associated with heart disease with an emphasis on coronary artery disease. Cardiac rehabilitation programming and services, secondary prevention, patient education, and current clinical guidelines, scientific statements, and selected regulations related to cardiac rehabilitation.

EXNS 6211. Assessments, Prescription, and Electrocardiogram. 3 Credits.

Information, techniques, and laboratory experiences related to accurate blood pressure determinations, clinical exercise testing and prescription, and other clinical assessments. Basic medications for cardiovascular disease and fundamentals of the electrocardiogram. Prerequisites: EXNS 6210 or permission.

EXNS 6212. Exercise in Selected Chronic Diseases. 3 Credits.

Basic pathophysiology in select chronic diseases. Application of clinical exercise testing and assessment and effects of acute and chronic exercise and exercise prescription on affected patients. Patient groups include children and the elderly, and individuals with pulmonary diseases, diabetes mellitus, hypertension, peripheral artery disease, stroke, obesity, spinal cord injury, cancer.

EXNS 6213. Clinical Internship I. 3 Credits.

Students work directly with a multidisciplinary health care or research team and patients and apply the knowledge and skills acquired from coursework in a clinical environment. Internships take place at pre-approved clinical sites, usually in the Washington, DC, metropolitan area, and students are supervised by an on-site clinical instructor.

EXNS 6214. Clinical Internship II. 3 Credits.

Students work directly with a multidisciplinary health care or research team and patients and apply the knowledge and skills acquired from coursework in a clinical environment. Internships take place at pre-approved clinical sites, usually in the Washington, DC, metropolitan area, and students are supervised by an on-site clinical instructor.

EXNS 6215. Clinical Exercise Physiology Rotations. 3 Credits.

Supervised clinical experience for students in the Clinical Exercise Physiology program. Working with clinical patient populations in hospitals in the Washington, DC, metropolitan area, students observe and participate in the assessment and treatment of patients with a variety of chronic diseases.

EXNS 6216. Organization and Management of Clinical Programs. 1 Credit.

Administrative organization of programs providing clinical exercise services. Budgeting and staffing; equipment and supplies; policies, protocols, and program forms; Medicare regulations and coding; and safety issues. While cardiac rehabilitation is the program model for the majority of this topic, the information can be used in other types of clinical exercise physiology programs. Combination of classroom and online sessions.

EXNS 6220. Power Training for Sports Performance. 2 Credits.

Effective training programs for sports that require explosive performance. Emphasis on training methods that develop speed and power, such as plyometrics and Olympic weightlifting. Provides information on specific competencies for students interested in pursuing certification as a strength and conditioning specialist. Prerequisites: EXNS 2111 or equivalent.

EXNS 6221. Science and Theory of Training. 3 Credits.

Physiological adaptations to resistance training, with a primary focus given to the neuromuscular system. Functional and structural changes that occur in skeletal muscle following strength and power training. Programmatic concerns when developing a resistance training regimen for an athletic population.

EXNS 6222. Current Topics in Strength and Conditioning. 1-2 Credits.

Current scientific findings related to the field of strength and conditioning. Examination of how resistance training programs affect athletic performance in terms of increased strength, power, endurance, and resistance to injury. The health benefits of resistance training in non-athletic populations. Prerequisites: EXNS 6202 or permission of the instructor.

EXNS 6223. Biomechanical Analysis. 3 Credits.

Application of mechanical analysis techniques to the human body in motion. Statics and dynamics with emphasis on the link segment model, incorporating angular velocity and angular acceleration. Motion analysis systems and computer systems. Prerequisites: (EXNS 1110 or BISC 2581) and EXNS 2113. Recommended background: PHYS 1011.

EXNS 6232. Independent Study. 1-3 Credits.

Students gain or enhance public health knowledge and explore an area of interest related to public health research or the delivery and/or administration of health services. Permission of instructor or advisor required. Restricted to For MS degree candidates enrolled in the department.

EXNS 6233. Graduate Internship. 1-6 Credits.

Fieldwork, internship, and/or instructional practice related to the field of study as pre-approved by the advisor. May be repeated for credit up to a maximum of 6 credits with prior permission of the advisor. Restricted to Master's degree in Exercise Science students only.

EXNS 6242. Nutrition Throughout the Life Cycle. 2 Credits.

The science of nutrition as it relates to health throughout the human life cycle. Changes in human metabolic processes and nutrient needs during the course of the aging process. Nutrition-related disorders. Prerequisites: EXNS 2119 or permission of the instructor.

EXNS 6261. Thesis Seminar. 3 Credits.

Required for students planning to write a thesis. Principles, concepts, and procedures of research design, including interpreting the scientific literature, designing a statistical plan, applying basic statistical techniques, and communicating scientific findings to professional and general audiences. Students develop a research protocol.

EXNS 6299. Topics in Exercise Science. 1-3 Credits.

Topic to be announced in the Schedule of Classes.

EXNS 6998. Thesis Research. 3 Credits.

Students work independently to conduct research under the oversight of a faculty research committee. Restricted to MS in exercise science degree candidates.

FILM STUDIES (FILM)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

FILM 2151. Film Theory. 3 Credits.

A reading-intensive immersion in classical film aesthetics and a survey of the theoretical and critical canon of cinema literature. Laboratory fee.

FILM 2152. Genres of Film. 3 Credits.

An exploration of the relationship between cinematic structure and narrative content in various types of film. Laboratory fee.

FILM 2153. History of World Cinema I. 3 Credits.

A two-semester sequence covering 100 years of international cinematic history from an aesthetic and political point of view. Laboratory fee.

FILM 2154. History of World Cinema II. 3 Credits.

Continuation of FILM 2153. A two-semester sequence covering 100 years of international cinematic history from an aesthetic and political point of view. Laboratory fee.

FILM 2155. Screenwriting. 3 Credits.

Introduction to the art and craft of screenwriting—concept, genre, character, structure, dialogue, scene/sequence construction, and, ultimately, the preparation of scripts and treatments for a variety of screen formats.

FILM 2156. Advanced Screenwriting. 3 Credits.

Advanced phases of screenwriting culminating in the preparation of a full-length screenplay, with contextual study of contemporary, international, and classical films toward a fuller appreciation of movies as a cultural whole.

FILM 3390. Screenwriting. 3 Credits.

.

FINANCE (FINA)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

FINA 3001. Intermediate Finance. 3 Credits.

Theory and practice of acquiring and using funds. Simulations of business decisions by cases and/or models to assess the risk/return interaction of investment, financing, and dividend decisions. Prerequisite: BADM 3501.

FINA 3101. Investment and Portfolio Management. 3 Credits.

Theory and principles of security analysis and portfolio management, including analysis of the national economy, industry, company, and security markets. Risk-reward and computer-aided analysis. Prerequisite: BADM 3501.

FINA 3201. Exploring Finance with Simulation. 3 Credits.

Corporate financial analysis as explored through the FINGAME financial simulation software. Focus on intertemporal decision making for capital budgeting and financing of a simulated firm. Prerequisite: BADM 3501.

FINA 3201W. Exploring Finance with Simulation. 3 Credits.

Corporate financial analysis as explored through the FINGAME financial simulation software. Focus on intertemporal decision making for capital budgeting and financing of a simulated firm. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: BADM 3501.

FINA 3301. Money and Capital Markets. 3 Credits.

The process of capital formation in a free enterprise economy, with special emphasis on factors affecting the level and structure of interest rates. Money market, capital market, and derivative contracts (futures and swaps) are evaluated from both investment and financing perspectives. Prerequisite: BADM 3501.

FINA 3401. A Brief History of Finance. 3 Credits.

History of financial events and practices and how finance has changed over time; how these events have shaped current practices and the impact of ethical issues.

FINA 3401W. A Brief History of Finance. 3 Credits.

History of financial events and practices and how finance has changed over time; how these events have shaped current practices and the impact of ethical issues. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

FINA 4001. Advanced Financial Management. 3 Credits.

Analysis and readings covering applications of theory to financial management. Case studies for decision making involving working capital, capital budgeting, financing, dividend policy, and valuation. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Prerequisite courses may be taken concurrently. Prerequisites: BADM 3501; and FINA 3301 or FINA 3001.

FINA 4001W. Advanced Financial Management. 3 Credits.

Analysis and readings covering applications of theory to financial management. Case studies for decision making involving working capital, capital budgeting, financing, dividend policy, and valuation. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite courses may be taken concurrently. Prerequisites: BADM 3501; and FINA 3301 or FINA 3001.

FINA 4101. Applied Financial Securities Analysis. 3 Credits.

Practical security analysis techniques and investing approaches employed by professional investment managers. Prerequisite: BADM 3501.

FINA 4121W. Exploring Finance with Simulation. 3 Credits.

Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

FINA 4201. Real Estate Investment. 3 Credits.

Principles of real estate investment, including valuation, appraisal, financing, and development, in addition to a discussion of the mortgage market and its institutions. Prerequisite: BADM 3501.

FINA 4301. Financial Derivatives. 3 Credits.

The defining properties of and uses for financial derivatives. Institutional features; forward and futures contracts, option contracts, and swap agreements; and valuation methodologies. The proper use of financial derivatives and the potential for unintended consequences. Prerequisites: BADM 3501. Recommended background: undergraduate students in finance with exposure to another discipline such as mathematics, physics, computer science, economics, or statistics.

FINA 4900. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. Prerequisite: BADM 3501.

FINA 4900W. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

FINA 4995. Independent Study. 1-15 Credits.

Assigned topics. Admission by prior permission of advisor. May be repeated once for credit. Prerequisite: BADM 3501.

FINA 6220. Business Financial Management. 3 Credits.**FINA 6221. Financial Decision Making. 3 Credits.**

Theory and practice of business finance, emphasizing the impacts of long- and short-term uses and sources of funds on the firm's market value. Prerequisite: MBAD 6234 or MBAD 6235.

FINA 6222. Capital Formation. 3 Credits.

Determinants of saving and investment and resultant funds flow are evaluated. Special emphasis on the level and risk structure and term structure of interest rates. The role and management of financial institutions is stressed. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6223. Investment Analysis and Portfolio Management. 3 Credits.

Risk-reward analysis of security investments, including analysis of national economy, industry, company, and market; introduction to portfolio management; emphasis on theory and computer methods. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6224. Financial Management. 3 Credits.

Advanced case studies in domestic and international financial management; working capital policy, capital budgeting, financing with debt and equity, dividend policy, valuation, project finance, venture capital, and mergers and acquisitions. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6230. Urban Development Economics. 3 Credits.**FINA 6231. Seminar: Investment and Portfolio Management. 3 Credits.**

.

FINA 6234. New Venture Financing: Due Diligence and Valuation Issues. 3 Credits.

Fundamentals and practice of due diligence and screening of early-stage investment opportunities. Prerequisites: MBAD 6234 or MBAD 6235. (Same as MGT 6293).

FINA 6235. Futures Markets: Trading and Hedging. 3 Credits.

Organization and regulation of futures markets. Alternative strategies for trading of futures contracts for possible hedging uses. High risk-high return investment alternatives. The use of futures markets to manage risks. Recommended: FINA 6221. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6236. Options. 3 Credits.

Pricing of options on financial instruments. Role of options in risk management, trading strategies, hedging implications for national and international investors, financial engineering, and structure and regulation of option markets. Recommended: FINA 6221. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6237. Private Wealth Management and Personal Financial Advising. 3 Credits.

Income and estate taxation, retirement plans and pensions, life and disability insurance, investment portfolio management, and personal finances. Prerequisites: MBAD 6234 or MBAD 6235. Recommended background: ACCY 6401 and knowledge of Excel.

FINA 6238. Financial Engineering. 3 Credits.

Valuation and risk management theory for bonds, forward contracts, swaps, options, exotic options, and interest rate options. Development of financial software, including Monte Carlo simulation modeling. Case studies of innovative solutions to investment, corporate finance, and financial institution management problems. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6239. Applied Portfolio Management. 3 Credits.

Synthesis of the theoretical concepts of securities analysis and portfolio management with the application of analyzing securities and building an actual portfolio. Prerequisites: (MBAD 6234 or MBAD 6235) and permission of instructor.

FINA 6240. Real Estate Development. 3 Credits.

Examination of the forces that shape real estate development; market analysis methods and techniques to evaluate project feasibility; the institutional and legal framework within which real estate development occurs and that influences controls, land value, and development potential. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6241. Financing Real Estate. 3 Credits.

Principles of real estate finance; evaluating different methods of financing real estate; sources of real estate funding with emphasis on securitization. Incentives provided by governments. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6242. Real Estate Valuation and Investment. 3 Credits.

Understanding the valuation of different types of real estate from different viewpoints. Analysis of the risks and opportunities of investing. Solid theoretical framework is augmented with practical examples and applications. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6243. Strategic Planning for Walkable Urban Real Estate Companies. 3 Credits.

Introduction to the various facets of the real estate industry. Students gain practical training in strategic planning by conducting a consulting assignment for a DC-based real estate company.

FINA 6245. Land Development Law. 3 Credits.**FINA 6247. Urban Development Economics. 3 Credits.****FINA 6248. Real Estate Development Cases. 3 Credits.**

Case study analysis of large-scale commercial real estate developments to gain comprehension of financial, political, legal, and technical complexities and constraints inherent in the real estate development process. Prerequisite: FINA 6221 or permission of instructor.

FINA 6250. Securities Regulation and Financial Scandals. 3 Credits.

Philosophy and framework of laws governing the sale of securities, including stocks, bonds, and investment contracts; financial scandals and the role that changes in securities law and housing policy has played in such events.

FINA 6271. Financial Modeling and Econometrics. 4 Credits.

Applied statistical and econometric analysis and modeling in finance. Methodologies include descriptive and inferential statistics, multivariate regression, and time series analysis. Empirical studies are reviewed, and a series of research projects are undertaken. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6272. Global Financial Markets. 4 Credits.

Theories explaining domestic and international interest rate and exchange rate structures. Roles of financial institutions and markets are investigated and forecasting methodologies are applied. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6273. Cases in Financial Management and Investment Banking. 4 Credits.

Computer modeling for analysis and forecasting of a firm's financial statements to reflect possible future performance. Application and integration of financial accounting and financial analysis, using a different case study each week. Financial issues faced by companies and their commercial and investment bankers as tactical and strategic decisions are made about organic growth, growth through merger and acquisition, and corporate reorganization. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6274. Corporate Financial Management and Modeling. 4 Credits.

Causal connections between decisions made by business firms, their expected performance, and the resulting current valuation of the firm's common stock. Factors affecting the level and structure of interest rates, which are incorporated by many financial models, theories, and decisions. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6275. Investment Analysis and Global Portfolio Management. 4 Credits.

Financial markets and instruments viewed from the investor's perspective. Analysis of the value of equity and fixed-income securities and the construction of efficient portfolios in a global financial market. Issues of market efficiency, tax structures, and investment funds; computer-based models. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6276. Financial Engineering and Derivative Securities. 4 Credits.

Mathematical and theoretical foundations to value-derivative securities, including options, futures, and swaps; hedging and trading applications of these contracts. Arbitrage trading across cash and derivative markets and its role in maintaining equilibrium prices. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6277. Comparative Financial Market Regulation and Development. 4 Credits.

Theory and current status of comparative regulation of domestic and international financial institutions and markets. Effects on country economic development and international trade. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6278. Financial Theory and Research. 4 Credits.

Theoretical constructs of business investment and financing decisions and of financial asset pricing structures in domestic and international environments. Analytical and numerical models are developed, and empirical studies are evaluated. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6279. Real Estate Finance and Fixed-Income Security Valuation. 4 Credits.

Application of financial theory to real estate investment: the housing market, mortgage valuation and securitization, commercial properties, CMBS, and REITs. Fixed-income security valuation with focus on theory and data applications on interest rate movements, fixed-income security and derivative pricing, and credit risk. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6280. Financial Institution Management and Modeling. 4 Credits.

Analysis of the financial performance and condition of a bank, toward understanding of the financial environment in which banks operate and regulation of the banking system. Application of asset/liability management principles and statistical and mathematical models employed in bank risk management. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6281. Cases in Financial Modeling and Engineering. 4 Credits.

Through the use of real-world examples from various aspects of finance, students are exposed to the modeling of complex financial instruments and techniques used in market and credit risk management. Underlying mathematics and theoretical constructs are explored and solidified through modeling exercises that make use of analytical solutions and numerical methods. As a practical course, students are asked to implement models. Examples may be motivated by corporate finance, corporate and investment banking, asset management, or other activities. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6282. Advanced Financial Econometrics and Modeling. 0-4 Credits.

Testing of several types of applied financial econometric models typically used in practice. Advanced quantitative techniques applied to aspects of financial markets, the behavior of agents, and market and credit risk management. Various software packages used to implement and program models. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6290. Special Topics. 0-3 Credits.

Experimental offering; new course topics and teaching methods. May be repeated once for credit.

FINA 6297. International Management Experience. 3 Credits.

Same as IBUS 6297/ MGT 6297/ MKTG 6297/ SMPP 6297. May be repeated for credit.

FINA 6298. Directed Readings and Research. 2-4 Credits.

FINA 6299. Thesis Seminar. 3 Credits.

FINA 6999. Thesis Research. 3 Credits.

FINA 8311. Seminar: Public and Private Sector Institutions and Relationships. 3 Credits.

An analysis and critique of alternative theoretical frameworks for describing, understanding, and predicting the nature, values, and actions of American public and private institutions. Problems, potentials, and alternatives for structuring public and private institutional arrangements to meet the needs of society. Same as SMPP 8311.

FINA 8321. Seminar: Financial Markets Research. 3 Credits.

Market efficiency, utility testing, the capital asset pricing model, the arbitrage pricing theory, the option pricing model, and aggregate market volatility.

FINA 8322. Seminar: Corporate Finance Research. 3 Credits.

Capital budgeting, capital structure issues, dividend policy, microeconomic foundations, mergers, and agency theory.

FINA 8323. Seminar: Continuous-Time Finance. 3 Credits.

Review of the stochastic calculus methods needed for continuous-time pricing models. The most important continuous-time models, including pricing of derivative securities, consumption-portfolio selection models, continuous-time capital asset pricing models, consumption-based capital asset pricing models, continuous-time arbitrage pricing theory, and different yield curve models.

FINA 8324. Seminar: Financial Markets and Institutions. 3 Credits.

Multi-period asset pricing, term structure of interest rates, market imperfections and institutional factors, auctions, manipulation, derivative markets, market microstructure, and financial institutions.

FINA 8397. Doctoral Seminar. 1-3 Credits.

FINA 8998. Advanced Reading and Research. 1-12 Credits.

Doctoral candidates preparing for general examination.

FINA 8999. Dissertation Research. 1-12 Credits.

Doctoral candidates performing research. Restricted to doctoral candidates.

FINE ARTS (FA)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

FA 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details. Laboratory fee.

FA 1014. Handbuilt Ceramics. 3 Credits.

Working with clay as an art form. Pinch, coil, slab, hump and press mold, paddling, and hollowing techniques. Sketch studies, clay and glaze making, reduction and oxidation kiln firings.

FA 1015. Wheelthrown Ceramics. 3 Credits.

Development of cylindrical and open forms. Sketch studies, trimming, clay and glaze making, reduction and oxidation kiln firings.

FA 1075. East Asian Calligraphy. 3 Credits.

Writing of Chinese characters with traditional writing implements. No knowledge of the language required. Covers the history, aesthetics, and philosophy of East Asian scripts and calligraphy and their relationships to paintings, seal carving, and literature. Same as EALL 1075.

FA 1101. Introduction to Handbuilt Ceramics. 3 Credits.

Introduction to working with clay as an art form; fundamental hand-building techniques such as pinch, coil, and slab; basic surface, glaze, and firing techniques. Introductory history of ceramics. Materials fee.

FA 1201. Sculpture: Material Investigations. 3 Credits.

Beginning study of design and fabrication of sculpture. Introduction to sculptural techniques across multiple media, with a focus in hand-built processes including textile, wood, and found object techniques. Materials fee.

FA 1301. Drawing Fundamentals. 3 Credits.

Fundamentals of line, shape, value, contrast, composition, and mark making. Emphasis on working directly from life. Traditional and contemporary strategies and skills for developing technique, process, and meaning. Conceptual issues. Materials fee.

FA 1401. Painting: Visual Thinking. 3 Credits.

Development of technical and perceptual skills that are the foundation of visual expression. Beginning projects start with a simple introduction to the mechanics of paint handling: how to begin a painting, apply paint, and model form. Value, line, color, and abstraction.

FA 1501. Black and White Photography. 3 Credits.

Introduction to the materials and processes of black-and-white photography. Camera operations, film processing, printing, and presentation methods. Technical skills. The visual language of photography. Materials fee.

FA 1502. Color Photography. 3 Credits.

Introduction to the materials and processes of color photography. Color theory, exposure techniques, film scanning, digital color correcting, and printing. The use of color as a means of visual communication and creative expression. Materials fee.

FA 1601. New Media: Digital Art. 3 Credits.

Introduction to the tools and processes of digital, electronic, and time-based arts. Development of technical skills necessary for using the computer as a creative tool. The history and current role of digital representation and distribution in art, ideas, and relationships. Materials fee.

FA 2000. Sophomore Colloquium. 3 Credits.

The Sophomore Colloquia are small, seminar-style courses limited to second-year students in Columbian College. These courses engage students deeply in a discipline, focus on a narrow issue of high interest and impact, and require independent research projects of the students. Topics vary by semester. See the department for more details.

FA 2001. Concept Lab. 3 Credits.

Connecting concept, materials, media, and audience; addressing challenges using materials and media. Cross-disciplinary thinking and individual and collaborative creative practices as well as historical, contemporary, and theoretical context of art works. Materials fee. Restricted to students who have completed a minimum of 6 credits in Fine Arts (FA) courses.

FA 2111. Ceramic Design in Handbuilt Forms. 3 Credits.

Further development of handbuilding techniques in ceramic sculpture; pinching, coiling, paddling, and hollowing; use of slabs and hump and press molds. Students produce clay and glazes and experiment with those materials in various reduction and oxidation firing ranges. Materials fee. Prerequisites: FA 1014 or FA 1101 or permission of the instructor.

FA 2112. Ceramic Design in Wheelthrown Forms. 3 Credits.

Use of the wheel to create intricate elements and practices that accompany advanced functional and non-functional ceramic forms, including sculptural applications. Clay and glazes in various reduction and oxidation firing ranges; relationships between clay, surface, and fire. Materials fee. Prerequisites: FA 1015 or FA 1102 or permission of the instructor.

FA 2113. Ceramic Sculpture. 3 Credits.

Sculptural ceramic forms that integrate quality and creativity; transferring ideas into forms using techniques in hollow and solid construction; varied temperature firings in oxidation and reduction atmospheres. Materials fee. Prerequisites: FA 1101 or FA 1102 or FA 1014 or FA 1015.

FA 2190. Special Topics: Fine Arts. 3 Credits.**FA 2211. Sculpture Fabrication. 3 Credits.**

Intermediate to advanced fabrication techniques including woodworking, metal fabrication, mold-making, and textiles. Focus on developing safe and creative uses of more advanced sculptural techniques and tools in the context of site-specific projects. Materials fee. Prerequisites: FA 1201 or permission of the instructor.

FA 2212. Sculpture: Design in Action. 3 Credits.

The design, fabrication, and implementation of artwork to address real world problems using a variety of materials and techniques. Students put their sculptures into action in site-specific contexts. Materials fee. Prerequisites: FA 1201 or permission of the instructor.

FA 2213. Digital Fabrication. 3 Credits.

Basic principles of digital fabrication; the intersection between digital and physical methods of fabrication; hands-on building projects such as woodworking, simple mold-making, and multi-media solutions. Materials fee. Prerequisites: FA 1071 or FA 1201 or FA 1601 or permission of the instructor.

FA 2311. Drawing: Perception and Mark Making. 3 Credits.

Further study of the fundamentals of drawing; perceptual and conceptual development; observational practice of drawing and exploration of historical and contemporary developments in drawing. Materials fee. Prerequisites: FA 1301 or permission of the instructor.

FA 2312. Advanced Drawing Techniques. 3 Credits.

Investigation of drawing as an organizing tool for thought, analysis, and personal imagery. Drawing as a method to integrate complex ideas and concepts into the visual field. Materials fee. Prerequisites: FA 1301 or permission of the instructor.

FA 2411. Painting: Watercolor. 3 Credits.

Working with basic issues of light, color, and paint quality, students learn a variety of techniques, including working transparently, wet-on-wet, wet-on-dry, lifting, masking, and drybrush. Exploration of the medium's inherent qualities as well as those it shares with other painting media. Laboratory fee. Prerequisites: FA 1401 or permission of the instructor.

FA 2412. Painting a Figure. 3 Credits.

Perceptual painting of the figure with a focus on developing visual analysis skills. Materials, construction processes, and formal language of painting; narrative and symbolic language and political critiques of representation; and the history of figure painting and its critical issues. Materials fee. Prerequisites: FA 1401 or permission of the instructor.

FA 2413. Painting: Process and Materials Lab. 3 Credits.

The traditional and contemporary construction processes and materials used in fine art painting: support material, grounds, paints, application tools, and action by the painter. Materials fee. Prerequisites: FA 1401 or permission of the instructor.

FA 2431. Painting: Contemporary Issues. 3 Credits.

The variety of historical and contemporary painting practices; deepening our understanding of painting construction and its meaning-making; developing our own interests, pleasures, and concerns. A critical look at the history and conventions of painting, asking "painting for whom and to what purpose?" How do painted images circulate and function? By deconstructing the vocabulary of painting, we can repurpose it to our own individual ends. Prerequisites: FA 1026 or FA 1401 or permission of the instructor.

FA 2511. Photography: Abstraction versus Representation. 3 Credits.

Theory and practice of abstract and representational photography in historical and contemporary contexts; chemical and digital photographic processes. Materials fee. Prerequisites: FA 1501 or FA 1041 or FA 1502 or FA 1042, or permission of the instructor.

FA 2512. Photography: Altered Landscapes. 3 Credits.

Theory and practice of abstract and representational photography in historical and contemporary contexts; chemical and digital photographic processes. Materials fee. Prerequisites: FA 1501 or FA 1041 or FA 1502 or FA 1042 or permission of the instructor.

FA 2513. Photography: From Photograms to Scanograms. 3 Credits.

Low-tech methods of producing analogue photographs and generating digital images. Working in both the chemical darkroom and digital lab. Analyzing examples of photography from the earliest practitioners to work being produced by contemporary artists. Laboratory fee. Prerequisites: FA 1501 or FA 1502 or permission of the instructor.

FA 2531. Photography: Contemporary Issues. 3 Credits.

Emphasis on the incorporation of contemporary strategies, trends, and approaches into the student's personal practice; study of the work of contemporary artists who use photography. Laboratory fee. Prerequisites: FA 1501 or FA 1502 or permission of the instructor.

FA 2611. Video Art and Time-based Media. 3 Credits.

Video art production with a focus on the skills needed to be a technically proficient and thoughtful video maker. The history of video art since 1965; avant-garde moving image languages; and theoretical and social contexts that have informed the development and use of the medium. Laboratory fee. Prerequisites: FA 1502 or FA 1601 or permission of the instructor.

FA 2612. Video: Remixing the Archive. 3 Credits.

The appropriation and documentary functions of moving images through direct reuse in edited or live remix or as sources for restaging new versions. Projects introduce students to the substantial archival resources in Washington, DC, as well as the ever-increasing collections of material that can be found online. Prerequisites: FA 1502 or FA 1601 or permission of the instructor.

FA 2613. Site and Sound. 3 Credits.

An overview of contemporary sonic art practice and audio production. Audio storytelling, spatialized sound, and site-based sonic artwork. Critical perspectives on sound and audio practice. Prerequisites: FA 1502 or FA 1601 or permission of the instructor.

FA 3101. Special Topics: Ceramics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Laboratory fee. Prerequisites: One of FA 1014, FA 1015, FA 1101 or FA 1102 or permission of the instructor.

FA 3201. Special Topics: Sculpture. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Laboratory fee. Prerequisites: FA 1201 or permission of the instructor.

FA 3301. Special Topics: Drawing. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. Laboratory fee. Prerequisites: FA 1301 or permission of the instructor.

FA 3401. Special Topics: Painting. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. Laboratory fee. Prerequisites: FA 1401 or permission of the instructor.

FA 3501. Special Topics: Photography. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. Laboratory fee. Prerequisites: FA 1501 or FA 1502 or permission of the instructor.

FA 3601. Special Topics: New Media. 3 Credits.

Issues in contemporary new media practices. Topics vary by semester. May be repeated provided the topic differs. See the schedule of classes for more details. Materials fee. Prerequisites: FA 1601 or permission of the instructor.

FA 3901. Special Topics: Fine Arts. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. Laboratory fee. Prerequisites: FA 1014 or FA 1015 or FA 1021 or FA 1101 or FA 1102 or FA 1201 or FA 1301 or FA 1401 or FA 1501 or FA 1502 or FA 1601 or permission of the instructor.

FA 3911. Collaborative Practices: Social Practices of Art. 3 Credits.

The effects of artists using their work to participate in political, social and/or cultural change. Ethical, cultural, and political implications of using art in the public sphere. Philosophical, theoretical, and historical background of these practices. Students select one of the prerequisite courses. Laboratory fee. Prerequisites: FA 1101, FA 1014, FA 1015, FA 1021, FA 1102, FA 1201, FA 1301, FA 1401, FA 1501, FA 1502, FA 1601, or permission of the instructor.

FA 3912. The Cinematic in Contemporary Art. 3 Credits.

The influence of cinema on contemporary art in historical, conceptual, and aesthetic contexts. Students employ cinematic strategies through projects that explore setting, sequencing, camera angle, point of view, tracking, lighting, performance, narrative, and sound. Materials fee. Prerequisites: FA 1501 or FA 1502 or FA 1601; or permission of the instructor.

FA 3913. Painting Off the Wall. 3 Credits.

Nontraditional approaches to painting, including manipulation of its structural aspects. Painting combined with other creative fields such as architecture, sculpture, social practice, performance, and film/video. Prerequisites: One of the following: FA 2160, FA 2161, FA 2162, FA 2169, FA 2413, FA 2411, FA 2412, FA 2413, FA 2431, FA 3401 or permission of the instructor.

FA 3951. Creative Photovoltaics. 3 Credits.

The fabrication process of solar devices and the parameters of solar cells in design and art applications. Students build a small solar device and conceptualize innovative proposals for new solar technology solutions. Materials fee. Prerequisites: FA 1201 or FA 1601; or permission of the instructor.

FA 4193. Professional Practices. 3 Credits.

A wide overview of the contemporary art world, including how artists promote their work to galleries, public art organizations, and museums; writing successful grant proposals, artist statements, essays, and reviews; and comparing the quality of venues for art and art journalism. (Same as FA 6293).

FA 4195. Critical Practices. 3 Credits.

This structured independent study consists of weekly group critiques that bring together students working in a variety of media. Discussions, which range from practical to aesthetic issues, challenge students to focus and articulate their visual knowledge. Prerequisite: permission of instructor.

FA 4199. Internship. 3 Credits.

Open only to candidates for the BA in fine arts with approval of the advisor in fine arts. May not be repeated for credit toward the degree. May be taken P/NP only.

FA 6101. Special Topics: Ceramics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Materials fee. Restricted to graduate students.

FA 6113. Ceramic Sculpture. 3 Credits.

Developing an understanding of sculptural ceramic forms that integrate quality and creativity. Transfer ideas into forms using techniques in hollow and solid construction. Varied temperature firings in oxidation and reduction atmospheres. Restricted to Graduate students only.

FA 6212. Sculpture/Design in Action. 3 Credits.

This course invites students to design, fabricate and implement artworks to address a real world problem using any available materials and techniques. Students will be encouraged to test their sculpture in a performative action in a site-specific context. Restricted to Graduate students only.

FA 6213. Digital Fabrication. 3 Credits.

Basic principles of digital fabrication and the intersection of digital and physical methods. Building projects may require woodworking, simple mold-making, and multi-media solutions. Materials fee. Restricted to graduate students.

FA 6231. Ceramic Sculpture. 3 Credits.

Developing an understanding of the sculptural ceramic form that integrates both quality and creativity. Techniques in hollow and solid construction. Varied temperature firings in reduction and oxidation atmospheres.

FA 6233. Architectural Ceramics. 3 Credits.

Advanced studies in ceramic murals and sculptures designed for indoor and outdoor architectural concepts. Laboratory tests and activities.

FA 6249. Special Topics: Sculpture. 3 Credits.**FA 6251. Advanced Drawing Techniques. 3 Credits.**

Investigation of the common concerns and creative processes that have dissolved boundaries between drawing and painting in the late twentieth century.

FA 6291. Contemporary Art and Theory for Artists I. 3 Credits.

Part I of a two-semester course that addresses a detailed and thematic history of contemporary art since the late 1960s, along with an introduction to key theoretical ideas shaping contemporary philosophy, art practices, and art history. Restricted to MFA in Fine Arts students or departmental permission only.

FA 6292. Contemporary Art and Theory for Artists II. 3 Credits.

Part II of a two-semester course that addresses a detailed and thematic history of contemporary art since the late 1960s, along with an introduction to key theoretical ideas shaping contemporary philosophy, art practices, and art history. Restricted to MFA in Fine Arts students or departmental permission only. Recommended background: FA 6291.

FA 6293. Professional Practices. 3 Credits.

A critical guide for understanding the infrastructure of the art world through analysis of various sustainable models of contemporary art practice for young artists. Establishing practical modes of criticism, promotion, fundraising and entrepreneurship in relation to exhibiting one's work, seeking venues, conducting studio visits, managing budgets, and writing grants, press releases, and artist statements. Restricted to graduate students.

FA 6294. Writing in Practice. 3 Credits.

Consideration of a wide variety of key artists' writings and the ways in which artists incorporate writing into their overall artistic practices. Issues and methods discussed may include questions of intention, the reciprocity of an artwork, agency and locational identity, defining a public/audience, and perceptions of care and engagement. Writing exercises in observation, concepts, and medium/genre. Restricted to graduate students.

FA 6295. Critical Practices. 3-7 Credits.

This structured independent study consists of weekly group critiques that bring together students working in a variety of media. Discussions, which range from practical to aesthetic issues, challenge students to focus and articulate their visual knowledge.

FA 6296. Studio Visits. 3 Credits.

Ongoing critical discourse about each student's creative work through regular studio visits with the instructor, as well as one-time visits by international, national, and regional artists. This course challenges students to interrogate and more fully articulate their individual practices. Restricted to students in the MFA in fine arts program.

FA 6298. Internship. 3-6 Credits.

Open only to M.F.A. candidates with the approval of the advisor in fine arts. May be repeated to a maximum of credits.

FA 6301. Special Topics: Drawing. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to graduate students.

FA 6312. Advanced Drawing Techniques. 3 Credits.

Drawing as an organizing tool for thought, analysis, and personal imagery. Traditional and contemporary approaches to topics related to perceptual and conceptual concerns. Restricted to graduate students.

FA 6401. Special Topics in Painting. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. Materials fee. Restricted to graduate students.

FA 6412. Painting a Figure. 3 Credits.

Perceptual painting of the figure with a focus on developing skills of visual analysis; materials, construction processes, and formal language of painting; history of figure painting and its critical issues; narrative and symbolic language and political critiques of representation. Materials fee. Restricted to graduate students.

FA 6413. Painting: Process and Materials Lab. 3 Credits.

The traditional components of fine arts paintings, including a support material, a ground, paints, application tools, and action by the painter; traditional and contemporary materials and construction processes. Materials fee. Restricted to graduate students.

FA 6431. Painting: Contemporary Issues. 3 Credits.

Theory and practice of contemporary painting practices and critical investigation of historical precedents; how painted images circulate. Student project. Materials fee. Restricted to graduate students.

FA 6501. Special Topics in Photography. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. Materials fee. Restricted to graduate students.

FA 6511. Photography: Abstraction versus Representation. 3 Credits.

Photography beyond an objective conveyer of visual information; abstract and representational photography from a theoretical perspective; practical approaches to photography within aesthetic traditions of historical and contemporary abstract and representational art. Chemical and digital photographic processes. Materials fee. Restricted to graduate students.

FA 6512. Photography: Landscape/Cityscape. 3 Credits.

Exploration of imagery that conforms to and contradicts the well-established artistic conventions of landscapes; study of artists who take the landscape as their subject matter. Students produce a final portfolio that investigates local landscape in and around the Washington, DC, metropolitan area. Materials fee. Restricted to graduate students.

FA 6513. Photography: From Photograms to Scanograms. 3 Credits.

Low-tech means of producing analogue photographs and generating digital images; moving between the chemical darkroom to the digital lab; review of images captured by the earliest practitioners to work being produced by contemporary artists. Materials fee. Restricted to graduate students.

FA 6531. Photography: Contemporary Issues. 3 Credits.

The incorporation of contemporary strategies, trends, and approaches into the student's personal practice; learning is informed by the work of contemporary artists who use photography. Materials fee. Restricted to graduate students.

FA 6601. Special Topics: New Media. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. Materials fee.

FA 6611. Video Art and Time-Based Media. 3 Credits.

Video art production skills needed for technical and creative proficiency. The history of video art since 1965; avant-garde moving image languages; theoretical and social contexts that have informed the development and use of the medium. Materials fee. Restricted to graduate students.

FA 6612. Video Remix Archive. 3 Credits.

Study of the reuse of moving images in documentary and experimental contexts or as sources for re-staging new versions. Students make use of archival resources in Washington, DC. Materials fee. Restricted to graduate students.

FA 6613. Site and Sound. 3 Credits.

Audio production for multiple uses; contemporary sonic art practice; development of audio storytelling, spatialized sound; and site-based sonic artwork. Materials fee. Restricted to graduate students.

FA 6901. Special Topics in Fine Arts. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. Materials fee. Restricted to graduate students. Prerequisites: FA 1014, FA 1015, FA 1021, FA 1101, FA 1102, FA 1201, FA 1301, FA 1401, FA 1501, FA 1502 or FA 1601.

FA 6911. Collaborative Practices: Social Lives of Art. 3 Credits.

The effects of artists using their work to participate in political, social and/or cultural change; philosophical, theoretical, and historical background of such practices; ethical, cultural, and political implications of using art in the public sphere. Materials fee. Restricted to graduate students.

FA 6912. Cinematic in Contemporary Art. 3 Credits.

Examines how cinema influences contemporary art and considers the historical, conceptual and aesthetic issues that emerged with film. Students exploit cinema's strategies in their own photographic and video work through projects that explore setting, sequencing, camera angle, point of view, tracking, lighting, performance, narrative and sound. Restricted to Graduate students only.

FA 6913. Painting: Off the Wall. 3 Credits.

Non-traditional approaches to painting; painting combined with other creative fields such as architecture, sculpture, social practice, performance, and film/video. Materials fee. Restricted to graduate students. Prerequisites: .

FA 6951. Creative Photovoltaics. 3 Credits.

The fabrication of solar devices and the use of these solar cells in design and art applications; scientific methodology for art and design students as well as material protocols and safety procedures. Materials fee. Restricted to graduate students.

FA 6998. Thesis Research. 3 Credits.**FA 6999. Thesis Research. 3 Credits.**

FORENSIC PSYCHOLOGY (FORP)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

FORP 6101. Psychology and the Legal System I. 3 Credits.

Focuses on the paradigm differences in the mental health and legal systems and the challenges associated with integrating the two. Provides the students with an overview of the American legal system and the American mental health system. Discusses various areas of the intersection of the two systems in criminal, civil, juvenile, and family law settings. The role and ethics of the mental health professional in legal settings is addressed.

FORP 6102. Psychology and the Legal System II. 3 Credits.

Students are introduced to basic legal research with an emphasis on developing an ability to read and understand primary legal materials. Legal concepts of criminal competence and legal insanity are discussed. Constitutional notions of due process and fair treatment as they pertain to the mentally ill, developmentally disabled and children are reviewed with an emphasis on their evolution and current trends. The concept of dangerousness as it applies in both criminal civil commitment and sex offender commitment proceedings is reviewed. Prerequisite: FORP 6101.

FORP 6103. Theories of Criminal Behavior. 3 Credits.

Theories of criminal behavior; psychodynamic, biological, genetic, social learning, behavioral, and cognition; developmental and cultural issues in criminal behavior; sociological theories; violence and aggression; sex offenses and the role of substance abuse in criminal behavior. Restricted to students in the forensic psychology program.

FORP 6104. Psychopathology. 3 Credits.

The etiology and classification of mental disorders; manifestations, symptoms, and basic treatment issues within the framework of the DSM-5 diagnostic manual; disorders and categories that are a primary focus in forensic settings. Restricted to students in the forensic psychology program.

FORP 6105. Basics of Psychological Assessment. 3 Credits.

Introduction to the field of psychological assessment; test design, methodology, psychometrics, and report design; survey of frequently used objective and projective measures in the areas of cognitive, personality, and emotional functioning and their forensic application. Restricted to students in the forensic psychology program.

FORP 6106. Ethics in Forensic Psychology. 3 Credits.

Professional, ethical, and legal issues in forensic psychology practice; professional and ethical behavior as defined by applicable ethical codes; ethical dilemmas or conflicts between psychology and the law. Restricted to students in the forensic psychology program.

FORP 6107. Research and Statistics. 3 Credits.

Research methods, techniques, and implementation; basic descriptive and inferential statistics in psychology; interpreting published studies and normative data in assessments. Restricted to students in the MA in forensic psychology program.

FORP 6108. Consultation and Testimony. 3 Credits.

The role of the forensic practitioner in providing services within the legal system and other related organizations; evidentiary issues with regard to expert testimony; techniques for successfully presenting psychological testimony; effective consultation with other disciplines, including attorneys, mental health providers, and criminal justice personnel. Restricted to students in the forensic psychology program.

FORP 6109. Evaluation and Treatment of Offenders. 3 Credits.

Approaches to classification of offenders; dangerousness and psychopathy; treatment approaches in different settings within the criminal justice system; history of offender treatment and the relative merits of different treatment models. Restricted to students in the forensic psychology program.

FORP 6110. Forensic Psychological Assessment. 3 Credits.

Forensic evaluations, including competency to stand trial, criminal insanity defenses, pre-sentencing, and risk of dangerousness evaluations; communicating assessment results to the courts or other referral sources; selecting and administering specialized forensic assessment instruments; legal and ethical responsibilities. Restricted to students in the forensic psychology program. Prerequisites: FORP 6105.

FORP 6111. Evaluation and Treatment of Sex Offenders. 3 Credits.

Measures used in assessing sex offenders; predicting dangerousness and recidivism; theories concerning interpersonal and intrapsychic presentations in such areas as deviant arousal and cognitive distortions; treatment modalities; legal and ethical difficulties arising from mandatory treatment and long-term commitment. Restricted to students in the forensic psychology program or with departmental permission.

FORP 6112. Substance Abuse Evaluation and Treatment. 3 Credits.

Underlying ideas of the pathology of addiction; psychodynamic, genetic and biological, and environmentally-focused theories; current assessment and intervention techniques; current treatments including psychopharmacological, psychodynamic and cognitive-behavioral approaches. Restricted to students in the forensic psychology program or with departmental permission.

FORP 6113. Victimology. 3 Credits.

The psychology of the victim within social and cultural contexts; violent, sexual, and psychological victimization; relationship between prior victimization as a precursor in criminal behavior; prevention, intervention, and policy issues. Restricted to students in the forensic psychology program or with departmental permission.

FORP 6114. Issues in Family Law. 3 Credits.

Psycho-legal issues concerning divorce, child custody, guardianship, and intrafamily violence and sex offending; dispute resolution methods as an alternative to litigation with a particular emphasis on divorce mediation; child custody evaluation and the evaluation of the elderly; ethical and legal difficulties. Restricted to students in the forensic psychology program or with departmental permission.

FORP 6115. Children and Adolescents in the Legal System. 3 Credits.

The differences between the treatment of juvenile and adults offenders in the legal system; history and role of the juvenile justice system from both legal and mental health perspectives; developmental aspects of the offending juvenile; the role of the psychologist in court proceedings. Restricted to students in the forensic psychology program or with departmental permission.

FORP 6117. Interrogation and Interviewing. 3 Credits.

Techniques of interrogation and interviewing in both criminal- and terrorism-related investigations. Cultural aspects of interviewing, the problem of false confessions, and the use of the polygraph. Legal and ethical issues surrounding interrogations, including the use of coercive techniques. Restricted to students in the MA in forensic psychology program. Prerequisites: FORP 6101, FORP 6103 and FORP 6104.

FORP 6118. Psychological Profiling. 3 Credits.

The strengths and limitations of psychological profiling in criminal investigations. The main psychological principles upon which criminal profiling is based and crime scene analysis and its relationships to both the demographic and psychological characteristics of a pool of unknown offender suspects. Methods to identify potential serial offenses. Legal and ethical issues with regard to the use of profiling. Restricted to students in the MA in forensic psychology program. Prerequisites: FORP 6101, FORP 6103 and FORP 6104.

FORP 6119. Police Psychology. 3 Credits.

Psychological aspects of working within or for police agencies; personality assessment for suitability for police work, the stress involved in the work with attendant adverse psychological consequences, and continuing assessment of police officers after critical incidents; ethical and practical problems for the mental health professional when working within or for a police organization and services available for troubled officers. Restricted to students in the forensic psychology program or with departmental permission.

FORP 6120. Counterintelligence. 3 Credits.

Counterintelligence considered from the perspectives of intelligence agencies, terrorist groups, and industry. The interconnection of psychological factors, motivations, strategic intent, and defense measures. Current and potential threats, including cybersecurity and cognition security. Restricted to Students in the MA in forensic psychology program or with permission of the department.

FORP 6128. Terrorism and Counterterrorism. 3 Credits.

Examination of the history and current status of terrorism and counterterrorism; psychological constructs motivating terrorist activity and countering the terror of terrorism; current scientific studies of the interplay between psychological factors, cultural norms, and religious ideations; and potential and future threats related to internet crime. Restricted to students in the MA in forensic psychology program.

FORP 6129. Investigative Psychology. 3 Credits.

The application of psychological research and principles to the processes for detecting, identifying, locating, apprehending, and bringing offenders to justice; various approaches to the field; relevant legal and ethical issues. Restricted to students in the forensic psychology program or with the permission of the department. Prerequisites: FORP 6101, FORP 6103 and FORP 6104.

FORP 6130. Practicum/Externship. 0-1 Credits.

Students undertake 250 hours of externship training tailored to their professional interests. The course may be completed over multiple semesters; students enroll for 1 credit in the semester in which they complete the required training hours, and for 0 (zero) credits in all other semesters during which they work toward, but do not complete, requirements. Restricted to students in the forensic psychology program. Prerequisites: FORP 6101, FORP 6103 and FORP 6104.

FORP 6131. Individuals with Mental Illness in the Legal System. 3 Credits.

Challenges presented when individuals with mental illness become involved with the criminal justice system; practical and aspirational goals the criminal justice system employs when addressing this population. Restricted to students in the forensic psychology program or with the permission of the department.

FORP 6150. Advanced Topics in Forensic Psychology. 0-12 Credits.

Current topics in forensic psychology. Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. Prerequisites: FORP 6101, FORP 6103, and FORP 6104.

FORENSIC SCIENCES (FORS)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

FORS 2102. Introduction to Forensic Science I. 3 Credits.

The application of science to the criminal justice system; crime scene processing, crime scene reconstruction, investigation of fires and explosions, impression evidence, trace evidence, and computer forensics. Completion of two semesters of a laboratory science other than astronomy and permission of the instructor are required prior to enrollment.

FORS 2104. Introduction to Forensic Sciences II. 3 Credits.

The application of science to the criminal justice system; personal identification, analysis of drugs, forms of trace evidence, identification of biological fluids, forensic pathology, and forensic toxicology. Prerequisites: two semesters of a laboratory science other than astronomy and permission of instructor.

FORS 2104W. Introduction to Forensic Sciences. 3 Credits.

Topics in the application of science to the criminal justice system, including personal identification, analysis of drugs, forms of trace evidence, identification of biological fluids, forensic pathology, and forensic toxicology. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

FORS 2151. Crime Scene Investigation. 4 Credits.

Examination, analysis, and reconstruction of crime scenes; principles from biology, chemistry, and physics applied to identification, documentation, preservation, and collection of physical evidence.

FORS 2190. Topics in Forensic Science. 3 Credits.

. Restricted to juniors. Prerequisites: BISC 1005 or BISC 1006; and CHEM 1003 or CHEM 1004.

FORS 6004. Fundamentals of Forensic Science I. 3 Credits.

This course surveys crime scene investigation techniques, medicolegal death investigation, and patterned evidence examination. This satisfies the 10 hours instruction for a FEPAC accredited MFS degree in the core topics of crime scene investigation, physical evidence concepts, and pattern evidence. This course helps students prepare for the American Board of Criminalistics ("ABC") examination in the disciplines of firearms and toolmarks, fingerprints, and questioned documents. Lectures are given by faculty members and guest lecturers who are subject matter experts on the topic presented. This course includes a four hour laboratory (fingerprints). This is a required course for MFS and CSI students. This course, along with FORS 6005 Fundamentals of Forensic Science II, replaces FORS 6213, Elements of Forensic Science (3 Credits). Prerequisite: None.

FORS 6005. Fundamentals of Forensic Science II. 3 Credits.

This course surveys the traditional crime laboratory (criminalistics) disciplines—specifically forensic drug chemistry, forensic toxicology, trace evidence, fire debris, explosives, and forensic molecular biology. This satisfies the 10 hours instruction for a FEPAC accredited MFS degree in the core topics of analytical chemistry and instrumental methods of analysis, drug chemistry/toxicology, microscopy and materials analysis, and forensic biology. This course helps students prepare for the American Board of Criminalistics ("ABC") examination in the disciplines of forensic biology, trace evidence, fire debris, controlled substances, and toxicology/blood alcohol determinations.

FORS 6010. Bloodstain Pattern Analysis I. 3 Credits.

Human blood in flight and the patterns it makes on target surfaces. Crime scene investigation, crime scene analysis, and crime scene reconstruction. Laboratory fee. Restricted to graduate students. Recommended background: FORS 6251 and FORS 6256.

FORS 6011. Bloodstain Pattern Analysis II. 3 Credits.

Continuation of the concepts learned in FORS 6010. Serving as an expert witness; refining blood pattern analysis and documentation skills; effectively communicating observations, analysis, and conclusions in the courtroom. Laboratory fee. Restricted to graduate students. Prerequisites: FORS 6010. Recommended background: FORS 6251 and FORS 6256.

FORS 6020. Ethics, Professional Responsibility, and Quality Assurance. 2 Credits.

Issues of forensic science laboratory professional responsibility, including ethics, public policy, and quality assurance. Satisfies 10 hours of instruction for a Forensic Science Education Programs Accreditation Commission (FEPAC) accredited MFS degree in the core topics of ethics and professional responsibility and quality assurance; also assists in preparation for the American Board of Criminalistics examination in the area of ethics. Taken online during the summer session.

FORS 6201. Forensic Biology. 3 Credits.

Principles of the forensic analysis of blood and other biological materials. Specific procedures and techniques used in forensic biology and serology. Laboratory fee.

FORS 6203. Examination of Questioned Documents. 3 Credits.

Theory and principles of handwriting and handprinting, duplicating processes, paper manufacture and fiber analysis; studies of paper and methods of examining questioned documents. Laboratory fee.

FORS 6204. Firearms and Toolmark Identification. 3 Credits.

Methods for identifying firearms, bullet cartridge casings, toolmarks, gunshot residue, obliterated serial numbers, tire marks, and footprints. Laboratory fee.

FORS 6206. Trace Evidence Analysis. 3 Credits.

Principles that govern the analysis of trace evidence, including recovery, transference, interpretation, and comparison. Assessment of evidentiary value, reporting, and court testimony. Laboratory fee.

FORS 6207. Photography in the Forensic Sciences. 3 Credits.

Basic use of forensic photography, including selection and use of equipment, photographs as evidence, close-up work, and common misconceptions. Laboratory fee.

FORS 6210. Advanced Instrumental Analysis. 3 Credits.

Theory and practice of modern instrumental methods used in forensic laboratories, including mass spectrometry, optical spectroscopy, microscopy, chromatographic and electrophoretic separations. It is a required course for MFS students with concentration in Forensic Chemistry and Forensic Toxicology. Recommended background: undergraduate analytical methods.

FORS 6213. Elements of Forensic Sciences. 3 Credits.**FORS 6215. Science of Fingerprints. 3 Credits.**

A general overview of the history and biology of and principles underlying the science of fingerprints. Latent print development methods, recording, classification, and methodology of comparison of fingerprints and palm prints to include latent prints. Subject matter is covered at an introductory level; additional study is required to develop expertise as a latent fingerprint examiner.

FORS 6216. Development of Latent Prints. 3 Credits.

This Advanced Fingerprint Science Course provides the students an increased understanding of the main principles of fingerprint identification: uniqueness and persistence. The course is broken down into three main sections, which address the chemistry behind processing fingerprints, the anatomy and physiology of friction ridge skin and the extensive research that has been conducted in the field of fingerprint science. The students are required to complete a skills processing exam to assess their understanding and ability to develop latent prints on items of evidence. In addition, there is a written examination covering the topics of biology and development of friction ridge skin and a final comprehensive exam. Upon conclusion of this course, each student should have a firm grasp of why friction ridge skin can be used as a means of identification. Recommended background: FORS 6215.

FORS 6217. Fingerprint Comparisons. 3 Credits.

In-depth study of analysis, comparison, evaluation, and verification (ACE-V) methodology; assessing the quality and quantity of information and establishing a tolerance for comparison using the effects of distortion; uniqueness and persistence; anatomy and embryology of friction ridge skin. Laboratory fee. Prerequisites: FORS 6215.

FORS 6219. Digital Image Processing. 3 Credits.

Digital images of marginal value can be processed to reveal details which had been in the original, but were difficult to see. These changes must be done in ways to survive court challenges. Best practices for doing so are provided. Prerequisites: FORS 6207 or permission of the instructor. Recommended background: graduate level work in MS/CSI, MFS/FRA, MS/FRA or Grad Cert in Forensic Investigations; graduate-level work in crime scene investigation and/or friction ridge analysis, or in the graduate certificate program in forensics investigations.

FORS 6224. Criminal Law for Forensic Scientists. 3 Credits.

This course provides an overview of criminal law offenses, criminal law procedures, issues of evidence recovery, admissibility of scientific evidence, and expert testimony, with an emphasis on the interaction between the criminal process and forensic science. A moot court experience is integral to this course. (This course combines and replaces Crim Law I and III.).

FORS 6225. Statistics for Forensic Scientists. 3 Credits.

Statistics with a focus on forensic applications. Emphasis on the Bayesian approach. Logical, probabilistic statistical reasoning skills, and R software skills. Course content is the basis for an examination question on the comprehensive examination. Prerequisite: An undergraduate statistics course.

FORS 6231. Principles of Toxicology. 3 Credits.

Concepts of toxicology, including its historical development and modern applications, drug disposition, mechanisms of toxicity; factors that influence toxicity and toxicity evaluation.

FORS 6232. Analytical Toxicology. 3 Credits.

Principles and procedures used in the isolation, identification, and quantitation of drugs of abuse from human samples.

FORS 6234. Medicinal Chemistry I. 3 Credits.

Theory and principles of classification, synthesis, and structure activity relationships of drugs. Discussion of the complex chemical events that take place between administration of a drug and its action on the user, with emphasis on drugs of abuse.

FORS 6235. Medicinal Chemistry II. 3 Credits.

Chemical, pharmacological, toxicological, and pathological characteristics of commonly abused drugs, including ethanol, barbiturates, narcotics, stimulants, and hallucinogens.

FORS 6236. Forensic Toxicology I. 3 Credits.

Biological, chemical, and pharmacological principles that underlie forensic toxicology. Prerequisites: FORS 6235 or permission of the instructor.

FORS 6237. Forensic Toxicology II. 3 Credits.

Lectures, student seminars, and projects dealing with topics of current interest in forensic toxicology. Prerequisites: FORS 6236 or permission of the instructor.

FORS 6238. Forensic Chemistry I. 3 Credits.

Examination of glass and soils. Laboratory exercises include refractive index measurements using immersion methods; polarized light observations of minerals; x-ray diffraction analysis of minerals; and classical chemical and physical methods of analysis. Laboratory fee.

FORS 6239. Forensic Chemistry II. 3 Credits.

Examination of arson accelerants, textile fibers, plastics, and paints. Laboratory exercises include infrared spectrometry and pyrolysis-gas-liquid chromatography of polymeric materials, as well as classical chemical and physical methods of analysis. Laboratory fee. Prerequisites: FORS 6238 or permission of the instructor.

FORS 6240. Forensic Drug Analysis. 3 Credits.

Examination of dosage forms of drugs. Laboratory exercises include color spot tests, crystal tests, infrared spectrometry and gas chromatography-mass spectrometry. Laboratory fee.

FORS 6241. Forensic Molecular Biology I. 3 Credits.

Techniques of molecular biology applied to the collection, examination, analysis, and interpretation of biological evidence.

FORS 6242. Forensic Molecular Biology II. 3 Credits.

Advanced methods of forensic molecular biology. Laboratory examinations and classifications of dried blood and other biological materials through a variety of nuclear and mitochondrial markers. Laboratory fee. Prerequisites: FORS 6241 and permission of the instructor.

FORS 6243. Forensic Molecular Biology III. 3 Credits.**FORS 6246. Human Genetic Variation. 3 Credits.**

The genetic variation in human populations as a framework for measurement and analysis of genetic diversity and evolutionary process. Consideration of the possible roles of cultural change leading to adaptive/selective events. Same as ANTH 6406.

FORS 6247. Population Genetics. 3 Credits.

Origin, maintenance, and possible significance of genetic variation in populations. Selection, genetic drift, and population structure are emphasized. Both theoretical and applied aspects of population genetics are discussed. Same as BISC 6228.

FORS 6250. Crime Scene Investigation for Lab Personnel. 3 Credits.

A condensed offering of the subject matter of FORS 6251-FORS 6252. FORS 6250 cannot be taken for credit toward the crime scene investigation concentration. Laboratory fee.

FORS 6251. Crime Scene Investigation I. 3 Credits.

Examination, analysis, and reconstruction of crime scenes. Principles from biology, chemistry, and physics applied to identification, documentation, preservation, and collection of physical evidence. Laboratory fee.

FORS 6252. Crime Scene Investigation II. 3 Credits.

Continuation of FORS 6251. Examination, analysis, and reconstruction of crime scenes. Principles from biology, chemistry, and physics applied to identification, documentation, preservation, and collection of physical evidence. Laboratory fee.

FORS 6254. Forensic Psychiatry. 3 Credits.

Introduction to the constructs of dynamic psychiatry, psychiatric treatment, and the nomenclature of mental disorders. Consideration of expert testimony, direct examination, and cross-examination in hospitalization and criminal cases.

FORS 6255. Investigation of Child Abuse. 3 Credits.

This course integrates medical, scientific, psychological, sociological and legal information for investigators and professionals involved in the field of child abuse. Special emphasis is placed on the application of research-supported data to situations involving the murder, abuse and exploitation of children.

FORS 6256. Forensic Pathology. 3 Credits.

Terminology and scientific techniques used in medico-legal investigations, sudden or unexpected deaths, homicides, suicides, accidental deaths, and trauma.

FORS 6257. Medicolegal Death Investigation. 3 Credits.

Medical, scientific, sociological, and legal methodologies applied to forensic investigations. Aspects of death scene analysis by a medical examiner, including autopsy procedures, unidentified remains, child death investigations, and mass disaster investigations. Laboratory fee. Prerequisites: FORS 6256 and permission of the instructor.

FORS 6258. The Investigation of Sexual Assault and Other Sex Crimes. 3 Credits.

This course integrates medical, psychological, sociological and legal information for investigators and professionals involved in the field of sex crime investigation. Special emphasis is placed on the application of research-supported data to situations involving the sexual exploitation and victimization of adults.

FORS 6290. Selected Topics. 3 Credits.

Current issues in research, investigation, and law.

FORS 6291. Computer Forensics III: Advanced Techniques. 3 Credits.

Further examination of methods and techniques used to conduct and report high-technology crime investigations. Open only to students enrolled in the department or by approval of the program director. Laboratory fee. Prerequisite: FORS 6278.

FORS 6292. Graduate Seminar. 1 Credit.

Students in designated forensic sciences degree programs must register for this course in their first semester and again after completion of the required independent research project.

FORS 6295. Research. 1-12 Credits.

Research on problems approved by the department, under the supervision of an appropriate member of the program faculty. Admission by permission only.

FORS 6298. Forensic Sciences Practicum. 1-3 Credits.

Internship experience in a forensic science laboratory or criminal justice agency, under the supervision of an appropriate member of the program faculty. Students must preregister for this course. Admission by permission only.

FORS 6998. Thesis Research. 3 Credits.

FORS 6999. Thesis Research. 3 Credits.

FRENCH (FREN)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

FREN 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details.

FREN 1001. Basic French I. 4 Credits.

Handling the immediate context of daily experience in spoken and written French: identifying, describing, and characterizing people, objects, places, and events; giving information and instructions; issuing simple commands and requests. Laboratory fee.

FREN 1002. Basic French II. 4 Credits.

Speaking and writing in French about past and future events: telling a story (narrating and describing in the past), promising, predicting, and proposing simple hypotheses and conjectures. Prerequisite: FREN 1001 . Laboratory fee.

FREN 1003. Intermediate French I. 3 Credits.

Increasing active vocabulary, reinforcing mastery of basic grammar, dealing with more complex structures (verbal phrases, subordinate clauses), and using some patterns of indirect speech (e.g., repeating or relaying messages, giving reports, summarizing). Prerequisite: FREN 1002 . Laboratory fee.

FREN 1004. Intermediate French II. 3 Credits.

Consolidation and further expansion of the ability to understand as well as produce a more complex level of oral and written discourse emphasizing subjective expression: issuing indirect commands and requests; giving opinions; making proposals, building arguments; defending and criticizing ideas. Prerequisite: FREN 1003 . Laboratory fee.

FREN 1006. French Language and Culture I. 3 Credits.

Offered through the GW Paris Business Studies Program.

FREN 1007. French Language and Cultures II. 3 Credits.

Continuation of FREN 1006. Offered through the GW Paris Business Studies Program.

FREN 2005. Language, Culture, and Society I. 3 Credits.

Development of strong conversational skills and the rudiments of expository writing. The vocabulary and structures necessary to move from handling everyday experience and subjective expression to the exposition of more abstract thought and ideas and discussion of political, social, and cultural issues. Laboratory fee. Prerequisite: FREN 1004.

FREN 2006. Language, Culture, and Society II. 3 Credits.

Continued expansion of the range and complexity of conversational skills and further development of the writing of effective expository prose on a broad range of contemporary subjects. Short texts serve as the basis for oral discussion, analytical reading, and writing brief critical essays. Laboratory fee. Prerequisite: FREN 2005.

FREN 2049. French for Graduate Students. 0 Credits.

No academic credit. Tuition is charged at the rate of 3 credits. Restricted to graduate students preparing for reading examinations.

FREN 2500. Cultural Politics of Food in France. 3 Credits.

The construction of French national identity through representations of food in literature and film. Taught in English.

FREN 3010W. Advanced French Grammar and Style. 3 Credits.

Composition, drills, dictations. Translations into French. Study of vocabulary and syntax, with emphasis on stylistic devices. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: FREN 2006.

FREN 3020. Contemporary France. 3 Credits.

Emphasis on advanced oral work. Discussion of French culture and civilization, based on contemporary writings and video documents. Prerequisite: FREN 2006. Laboratory fee.

FREN 3030. Business and Commercial French. 3 Credits.

Structure and language of French economic institutions. Discussion of legal, financial, and administrative documents. Oral and written reports. Preparation for the certificate of the Paris Chamber of Commerce. Prerequisite: FREN 2006.

FREN 3100. Introduction to French Literature. 3 Credits.

Readings, textual analysis, and writing on a broad selection of texts from different genres and periods. French and Francophone literatures in their cultural contexts. Close reading approach and introduction to literary vocabulary. Prerequisite: FREN 2006.

FREN 3100W. Introduction to French Literature. 3 Credits.

Readings, textual analysis, and writing on a broad selection of texts from different genres and periods; close reading approach and introduction to literary vocabulary. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: FREN 2006.

FREN 3210. Medieval and Early Modern French Literature in Context. 3 Credits.

Texts of the Middle Ages to the seventeenth century studied in their historical, social, and cultural contexts. Topics may include feudal society and the literature of courtly love; humanism, Rabelais, and Renaissance poetry; women and salon writing; Versailles, absolutism, and classical theater. Prerequisite: FREN 3100W.

FREN 3220. Modern French Literature. 3 Credits.

Texts of the eighteenth century to the present in historical, social, and cultural contexts. Topics may include philosophes and the rise of social consciousness; the French Revolution and Romanticism; dada and surrealism; existentialism and World War II; decolonization and francophone literature. Prerequisite: FREN 3100W.

FREN 3290. Textual Analysis. 3 Credits.

Methodology and vocabulary of literary criticism. Application of various principles of textual analysis and critical approaches to literature. Prerequisite: FREN 3100W.

FREN 3300. Topics in French and Francophone Literatures and Cultures in Translation. 3 Credits.

Dynamics of French-speaking societies and their cultures studied through literature, art, or film. Topics vary. Readings and lectures in English. The course may be repeated for credit. A laboratory fee may be required.

FREN 3400. Studies in Genre. 3 Credits.

Study in narrative, dramatic, or lyric form. Topics vary by semester. May be repeated for credit provided topic differs. See department for details. Prerequisite: FREN 3100W.

FREN 3500. Race, Religion, and Identity in France. 3 Credits.

The intersection of race, religion, and identity in France from an historical perspective; key concepts of French universalism and secularism in relation to different minority groups. Resources may include literature, film, historical documents, and sociological studies. May be taught in French or English. Recommended background: Prior completion of FREN 3100W.

FREN 3520. The Age of Classicism. 3 Credits.

Drama, philosophy, criticism, poetry, and fiction of the seventeenth century. Topics may include préciosité, baroque, Jansenism, classicism, and rationalism in the context of the major social, political, and religious movements of the period. Prerequisite: FREN 3100W.

FREN 3530. The Age of Enlightenment. 3 Credits.

The major novelists, dramatists, and philosophes of the eighteenth century. The works of Montesquieu, Voltaire, Rousseau, and Diderot and their relationship to the social, political, and philosophical thought of the period. Prerequisite: FREN 3100W.

FREN 3550. Studies in Twentieth-Century French Literature. 3 Credits.

Major literary movements of the twentieth century: avant-garde, surrealism, existentialism, nouveau roman, and nouveau théâtre. Prerequisite: FREN 3100W.

FREN 3560. Topics in Contemporary Francophone Literature and Cinema. 3 Credits.

Analysis of relations between France and its former colonies as manifested in the literature and cinema of France and the Francophone world. Race and gender relations; exile; nationalism; and identity and place as seen through various literary and cinematic responses to the discourses of metropolitan France by its former colonies. Prerequisite: FREN 3100W.

FREN 3600. Special Topics in French Literature. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See department for details. Prerequisite: FREN 3100W.

FREN 3600W. Special Topics in French Literature and Culture. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. See department for more details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: FREN 3100W.

FREN 3700. History of French Cinema. 3 Credits.

French cinema from its inception to the New Wave; the relationship of filmmaking and audience reception to the evolution of French society and political institutions; the language of cinema as it evolves according to periods and genres and as critics and filmmakers create a theoretical discourse specific to film.

FREN 4135. Folger Seminar. 3 Credits.

The history of books and early modern culture. Use of the archive at the Folger Shakespeare Library. Students must obtain departmental approval in the preceding semester. Same as ENGL 4135/ HIST 4135. Prerequisite: FREN 3100W.

FREN 4470. Writing Women. 3 Credits.

Dynamics of gender in French literature and culture with emphasis on women as agents and objects of representation; gender roles in the formation of social biases, norms, and power structures. Texts range from the Middle Ages to the present. Prerequisite: FREN 3100W.

FREN 4500. Studies in Medieval French Literature. 3 Credits.

Readings and analysis of the major literary texts from the 11th through the 15th centuries. Chansons de geste, courtly literature, fabliaux, drama, lyric and didactic poetry. Prerequisite: FREN 3100W.

FREN 4510. French Literature of the Renaissance. 3 Credits.

Sixteenth century prose and poetry in the context of cultural and historical movements. Topics may include humanism; concepts of self and subjectivity; the wars of religion; the discovery of the New World; court and city life; the private and public spheres; religious and secular love. Prerequisite: FREN 3100W.

FREN 4540. Nineteenth-Century French Literature and Culture. 3 Credits.

Key aspects of nineteenth-century French literature in its historical, cultural, and political context. Major authors and literary movements studied through the lens of a particular theme, which varies from year to year. Prerequisite: FREN 3100W.

FREN 4600. Special Topics in French Literature. 3 Credits.

Examination of French and Francophone literature organized around a single theme. Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Prerequisite: FREN 3100W.

FREN 4650. Lustful Women in French Medieval Literature. 3 Credits.

The representation of lustful women in French medieval texts and arts. We read some of the most important novels and short stories of the Middle Ages, such as *La Châtelaine de Vergy*, *Tristan et Yseut*, and *Les Lais de Marie de France*. Prerequisite: FREN 3100W.

FREN 4700. Race Matters: Literature, Culture, and Identity in Contemporary France. 3 Credits.

An interdisciplinary examination of cultural, political, and economic realities for Black populations in France. Prerequisite: FREN 3100W.

FREN 4800. Independent Study. 1-4 Credits.

Admission by permission of department chair and instructor. May be repeated for credit. Prerequisite: French 3100W.

FREN 4910. Proseminar: Readings for the Major. 3 Credits.

Required of all majors as preparation of the senior essay. Specific topic in the history of French literature varies by year. Restricted to French majors in their senior year. Prerequisite: French 3100W.

FREN 4920W. Proseminar II. 3 Credits.

Continuation of FREN 4910. Required of all majors; preparation of the senior essay. The specified topic in the history of French literature varies by year. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

GENOMICS AND BIOINFORMATICS (GENO)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

GENO 6223. Bioinformatics. 2 Credits.

The application of bioinformatics concepts and methods through the use of molecular biology databases and tools, covering molecular evolution, and protein sequence, structural, functional analysis. Recommended background: Prior completion of an undergraduate course in biochemistry.

GENO 6236. Medical Genomics. 2 Credits.

The structure and function of genes and genomes; genomic theories, methods, and data analysis including bioinformatics and database mining.

GENO 6237. Proteomics and Biomarkers. 2 Credits.

Experimental proteomics, protein/proteome analysis, bioinformatics of proteomics, systems biology, and structural genomics. Prerequisite: GENO 6236. Recommended background: Prior completion of a course in bioinformatics or one related to computer science.

GENO 8231. Introduction to Genomics, Proteomics, and Bioinformatics. 3 Credits.

Implementation of genomics, proteomics and bioinformatics approaches to biological systems. Students must have completed a course in biochemistry and molecular biology prior to enrollment. Prerequisites: BMSC 8210 and BMSC 8212.

GENO 8234. Genomics and Precision Medicine Seminar. 1 Credit.

Current and emerging topics with presentations and discussions facilitated by leading experts from GW and outside institutions; student-led journal club and oral presentation opportunities. May be repeated for credit. Prerequisites: BMSC 8210, BMSC 8212 and BMSC 8230.

GENO 8998. Advanced Readings and Research. 3-12 Credits.

Restricted to doctoral candidates preparing for the qualifying examination. May be repeated for credit.

GENO 8999. Dissertation Research. 3-12 Credits.

Restricted to doctoral candidates. May be repeated for credit.

GEOGRAPHY (GEOG)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

GEOG 1000. Dean's Seminar. 3 Credits.

GEOG 1001. Introduction to Human Geography. 3 Credits.

A systematic survey of human geography; spatial perspectives on demographic, social, cultural, economic, and political changes around the world.

GEOG 1002. Introduction to Physical Geography. 4 Credits.

A systematic survey of environmental geography; perspectives on environments and human ecology, including ecosystems and their use, and resource geography. Laboratory fee.

GEOG 1003. Society and Environment. 3 Credits.

An introduction to the dynamic relationship between society and the physical environment, with focus on population, natural resources, environmental degradation, pollution, and conservation.

GEOG 2000. Sophomore Colloquium. 3 Credits.

Sophomore colloquia are small, seminar-type classes that deeply engage CCAS second-year students in a discipline, focus on a narrow issue of high interest and impact, and require independent research projects. May be repeated provided topic differs. Consult the Schedule of Classes for more details. Restricted to CCAS sophomores.

GEOG 2104. Introduction to Cartography and GIS. 3 Credits.

Fundamentals of cartography; geographic data structure and information systems. Laboratory fee.

GEOG 2105. Techniques of Spatial Analysis. 3 Credits.

Nature of geographical inquiry and analytical methods used in the study of spatial processes and patterns. Laboratory fee.

GEOG 2107. Introduction to Remote Sensing. 3 Credits.

Remote-sensing techniques using digital satellite imagery and aerial photography. Application to rural and urban settings, vegetation, and environmental monitoring. Laboratory fee. Prerequisite: GEOG 2105 or permission of instructor.

GEOG 2108. Weather and Climate. 3 Credits.

The elements and controls of weather and climate. Topics include energy and water balances, atmospheric general circulation, and severe weather events. Prerequisite: GEOG 1002.

GEOG 2120. World Regional Geography. 3 Credits.

Practical approach to the themes, concepts, and tools appropriate for in-depth examination of the geography of the world's. Historical and physical regional geographies; contemporary regional issues; and intra- and interregional issues.

GEOG 2124. Urban Transportation. 3 Credits.

The relationship between freight and passenger transportation systems and urban land use patterns and structure.

Prerequisite: GEOG 1001.

GEOG 2125. Transportation Systems and Networks. 3 Credits.

The structure and evolution of transportation networks and their impact on regional development.

GEOG 2127. Population Geography. 3 Credits.

Patterns of world population; factors contributing to population pressures, growth, and migrations.

GEOG 2128. Geomorphology. 3 Credits.

Understanding the nature, origin, and development of landforms in the field and through the use of maps and aerial photos. Prerequisite: GEOG 1002.

GEOG 2129. Biogeography. 3 Credits.

The types of comparative data used to elucidate patterns of distribution, diversity, and dynamics in species, communities, and ecosystems.

GEOG 2133. People, Land, and Food. 3 Credits.

The relationship between humans and their food sources through exploration of nutritional dynamics, food sourcing, agricultural land use, and food markets.

GEOG 2134. Energy Resources. 3 Credits.

Analysis of regional patterns and trends in consumption and production of energy resources. Examination of international energy linkages and energy policies of selected nations. Prerequisite: GEOG 1002.

GEOG 2134W. Energy Resources. 3 Credits.

Analysis of regional patterns and trends in consumption and production of energy resources. Examination of international energy linkages and energy policies of selected nations. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: GEOG 1002.

GEOG 2136. Water Resources. 3 Credits.

Analysis of the global spatial patterns, development, use, and quality of water resources. Prerequisite: GEOG 1002.

GEOG 2137. Environmental Hazards. 3 Credits.

Examination of environmental hazards with an emphasis on physical geography, economics, and the basics of geographic information systems (GIS).

GEOG 2140. Cities and Societies. 3 Credits.

The design and function of cities in the United States; contemporary, economic, political, and social change. Prerequisite: GEOG 1001.

GEOG 2140W. Urban Geography. 3 Credits.

The design and function of cities in the United States; contemporary, economic, political, and social change. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: GEOG 1001.

GEOG 2141. Cities in the Developing World. 3 Credits.

Urbanization processes, problems, and management in the developing world. Focus on urban location, politics, housing, services, employment, and environmental issues. Prerequisite: GEOG 1001.

GEOG 2144. Explorations in Historical Geography. 3 Credits.

Examination of selected themes in the cultural geography of the United States over the course of its history, in relation to an overview of the historical geography of the country. Same as AMST 2144.

GEOG 2145. The Cultural Landscape. 3 Credits.

The distribution and dynamics of cultural patterns around the world; analysis of culture as a process.

GEOG 2145W. Cultural Geography. 3 Credits.

The distribution and dynamics of cultural patterns around the world; analysis of culture as a process. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

GEOG 2146. Political Geography. 3 Credits.

Interrelationships among the human and physical environment and political systems; the organization of political territories.

GEOG 2147. Military Geography. 3 Credits.

An examination of environmental and locational factors and their impact on military planning and operations.

GEOG 2148. Economic Geography. 3 Credits.

Locational influences on and spatial variation of the development of manufacturing, services, trade, and finance. Prerequisite: GEOG 1001.

GEOG 2196. Field Methods in Geography. 3 Credits.

For geography and environmental studies majors in their junior or senior year. Field research in human and physical geography. Students participate in several field exercises and develop their skills of observation, field mapping, repeat photography, and surveys. Laboratory fee.

GEOG 3105. Techniques of Spatial Analysis. 3 Credits.

Quantitative methods, tools, and approaches in spatial analysis to describe and test hypotheses about observations that have a spatial component.

GEOG 3106. Intermediate Geographic Information Systems. 3 Credits.

Principles of geographic information systems and their use in spatial analysis and information management. Laboratory fee. Prerequisite: GEOG 2104 and GEOG 2105.

GEOG 3107. Introduction to Remote Sensing. 3 Credits.

Remote-sensing techniques using digital satellite imagery and aerial photography; application to rural and urban settings, vegetation, and environmental monitoring. Prerequisite: GEOG 2105.

GEOG 3108. Weather and Climate. 3 Credits.

Fundamental physical principles that govern the Earth's climate; the science of global climate change and the impact of anthropogenic and natural phenomenon on the climate. Prerequisite: GEOG 1002.

GEOG 3128. Geomorphology. 3 Credits.

The influence of landforms and landscapes on human activities and the impact of humans on landscapes throughout history. Prerequisites: GEOG 1002 or GEOL 1005.

GEOG 3132. Environmental Quality and Management. 3 Credits.

The evolution of environmental management philosophies and tools. The global distribution, utilization, and degradation of natural resources. Prerequisite: GEOG 1002.

GEOG 3143. Urban Sustainability. 3 Credits.

Relationship between urban spaces and the environment through the lens of sustainability. Prerequisite: GEOG 1001.

GEOG 3143W. Urban Sustainability. 3 Credits.

Relationship between urban spaces and the environment through the lens of sustainability. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: GEOG 1001.

GEOG 3145. Cultural Geography. 3 Credits.

Themes, concepts, and tools appropriate for an in-depth geographic examination of the Earth's cultural landscape and of culture as a process. Prerequisite: GEOG 1001.

GEOG 3145W. Cultural Geography. 3 Credits.

Themes, concepts, and tools appropriate for an in-depth geographic examination of the Earth's cultural landscape and of culture as a process. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: GEOG 1001.

GEOG 3146. Political Geography. 3 Credits.

The uneven distribution and exercise of political power in the world; interrelationships among the human and physical environment and political systems. Prerequisite: GEOG 1001.

GEOG 3154. Geography of the Middle East and North Africa. 3 Credits.

Cultural and physical regional patterns of the Middle East and North Africa. Prerequisites: GEOG 1001 or GEOG 1002.

GEOG 3161. Geography of Latin America. 3 Credits.

Examination of spatial characteristics of physical and cultural phenomena in Latin America.

GEOG 3164. The Geography of Africa. 3 Credits.

Human and environmental geography of Africa south of the Sahara desert, including study of patterns and processes, culture and environment, and development issues. Prerequisites: GEOG 1001 or GEOG 1002.

GEOG 3165. Geography of South Asia. 3 Credits.

An examination of the complex interplay of environmental, economic, sociocultural, and political factors in South Asia and their effects at the local and regional levels.

GEOG 3189. Readings in Geography I. 1-12 Credits.

. Prerequisites: 12 credits of geography and permission of the instructor.

GEOG 3190. Readings in Geography II. 1-12 Credits.

Continuation of GEOG 3189. Prerequisites: 12 credits of geography and permission of the instructor.

GEOG 3193. Environmental Law and Policy. 3 Credits.

An introduction to selected pieces of major environmental legislation. The role of the courts and bureaucracy in implementing and interpreting legislation and their impacts on decision making. Designed for students with no training in law. Prerequisites: None.

GEOG 3194. Special Topics in Physical Geography. 3 Credits.

Topics covering physical principles of the Earth's physical geography and natural environment including the hydrosphere, atmosphere, biosphere, and lithosphere. Enrollment requires permission of the instructor.

GEOG 3195. Special Topics in Human Geography. 3 Credits.

Topics in human geography including population, urban, cultural, political and economic issues amongst others. Enrollment requires permission of the instructor.

GEOG 3196. Special Topics in Techniques. 3 Credits.

Topics covering specific skills in geographic information systems and field methods. Enrollment requires permission of the instructor.

GEOG 3197. Special Topics in Regional Geography. 3 Credits.

Various topics in regional geography, including world regional geography as well studies of specific regions of interest. Enrollment requires permission of the instructor.

GEOG 3198. Special Topics. 3 Credits.

Consideration of geographic aspects of topical and future problems of society. May be repeated for credit provided that the topic differs. Prerequisite: GEOG 1001 or GEOG 1002.

GEOG 3218. Arctic Systems. 3 Credits.

Arctic regions examined from an interdisciplinary perspective, linking different elements of physical and human geography; Arctic climate, oceans, landscapes, and ecosystems; key issues involving interaction between humans and the environment; climate change and its effects in the Arctic. Prerequisite: GEOG 1002.

GEOG 3810. Planning Cities. 3 Credits.

An examination of historical and contemporary trends and dynamics in urban planning in the United States and abroad. Same as AMST 3810. Prerequisite: GEOG 1001.

GEOG 4195. Proseminar in Geographic Thought. 3 Credits.

For students completing the major in geography. Development of geographic thought, theories, and methodologies; geographic curricula. Prerequisite: permission of the advisor.

GEOG 4195W. Proseminar in Geographic Thought. 3 Credits.

For students completing the major in geography. Development of geographic thought, theories, and methodologies; geographic curricula. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Permission of the advisor required prior to enrollment.

GEOG 4199. Internship. 1-3 Credits.

Fieldwork, internship, or other controlled assignment with an agency or organization engaged in work in applied geography. May be repeated for credit to a maximum of 6 credits. Prerequisites: 12 credits of geography courses and permission of the instructor.

GEOG 4307. Digital Image Processing and Analysis. 3 Credits.

Land use/land cover change analysis using satellite and aircraft platforms. Digital image processing techniques, analysis, and applications. Prerequisites: GEOG 2107 and GEOG 3106.

GEOG 4308. Programming for Geospatial Applications. 3 Credits.

Fundamental concepts for creating Python scripts in ArcGIS; guidelines for proper Python syntax, troubleshooting common errors, and using loops to test for conditions and execute different code based on the results. Prerequisites: GEOG 2104, GEOG 2105 and GEOG 3106.

GEOG 4309. GIS for Emergency Management. 3 Credits.

Introduction to the theoretical principles of geographic information systems and examination of its history, current uses, and potential for emergency management through case studies, guest lectures, and hands-on training on various GIS products. Prerequisites: GEOG 3106.

GEOG 4310. Geovisualization and Cartography. 3 Credits.

Introduction to cartographic design from gathering data to the final visualization; specific components involved in mapmaking, including purpose, generalization, and symbolization. Prerequisites: GEOG 2104 and GEOG 3106.

GEOG 4311. Open Source Solutions for Geospatial Project Management. 3 Credits.

Geospatial project management, from design through implementation. Students work exclusively with open source technology for data capture, management, analysis, and communication; open source solutions and the effectiveness and sustainability of project management. Prerequisite: GEOG 3106.

GEOG 6201. Geographic Thought. 3 Credits.

For first-year master's students, a survey of geographic thought and theories. Emphasis on contemporary issues in geography and on the development of research.

GEOG 6207. Urban Planning and Development. 3 Credits.

Selected problems in urban and regional planning: applications of zoning, environmental controls, and other techniques for achieving sustainable urban development.

GEOG 6208. Land Use and Urban Transportation Planning. 3 Credits.

Relationships between land use and the movement of goods and people. Examination of land use and transportation planning principles, issues, and techniques. Roles of public and private interests in land use and transportation planning and management.

GEOG 6218. Arctic Systems. 3 Credits.

Aspects of Arctic regions from an interdisciplinary perspective that links elements of physical and human geography; Arctic climate, oceans, landscapes, and ecosystems; interaction between humans and environment; climate change. Prerequisite: GEOG 1002.

GEOG 6219. Seminar: Climatology. 3 Credits.

Inadvertent climate modification due to urbanization and impacts on environmental and human health.

GEOG 6220. Seminar: Climatic Change. 3 Credits.

Examination of natural and human-induced climatic change, at global, regional, and local scales.

GEOG 6222. Seminar: Resources and the Environment. 3 Credits.

Topics related to the spatial variations and interrelationships of resources and the environment; applications of geographic information systems and remote sensing. Prerequisite: permission of instructor.

GEOG 6223. Seminar: Population and Health. 3 Credits.

Interrelationships between population characteristics and dynamics and impacts on human health.

GEOG 6224. Seminar: Political Geography. 3 Credits.

Examination of political factors in location theory and analysis of the nature of political territories and conflict.

GEOG 6225. Seminar: Transportation and Development. 3 Credits.

Transportation and communication in the organization of space.

GEOG 6226. Water Resources Policy and Management. 3 Credits.

The history and practice of water resources policy and management in an integrated context; the impact of urban and agricultural runoff on water quality; provision of wastewater and water quality services; water supply, water allocation, and scarcity; and modification of waterbodies for the purposes of flood control, hydropower, navigation, and recreation.

GEOG 6230. Seminar: Environmental Issues in Development. 3 Credits.

A consideration of the geographical dimensions of the links between development and the environment.

GEOG 6232. Migration and Development. 3 Credits.

Analysis of migration's impact on development at various scales for both the sending and receiving localities.

GEOG 6243. Seminar: Urban Geography. 3 Credits.

Topics concerning social, political, economic, and environmental issues in U.S. cities.

GEOG 6244. Urban Sustainability. 3 Credits.

Urban sustainability and environmental issues in developed and developing cities.

GEOG 6245. Water Resources Policy and Management. 3 Credits.

This course examines the history and practice of water resources policy and management in the context of integrated water resource management. Thus, the course addresses management issues and policy responses to such topics as the impacts of urban and agricultural runoff on water quality; provision of wastewater and water quality services; water supply, water allocation and scarcity; and modification of waterbodies for the purposes of flood control, hydropower, navigation, and recreation. In addition, non-human water requirements: e.g. for fish and wildlife, as well as the need to preserve the natural ecosystems that provide and sustain water resources are central to each discussion. Management and policy issues in the United States and worldwide at a range of scales (local, state, federal and international) will be examined. In the course of these examinations, students gain an understanding of how current issues such as growing populations, increasing affluence, and climate change may impact water resource policy and management.

GEOG 6250. Geographical Perspectives on Development. 3 Credits.

Theory and debates surrounding economic development in a globalizing world, with case studies.

GEOG 6261. Geographical Perspectives on Latin America. 3 Credits.

Natural resources, the environment, and population dynamics through time.

GEOG 6262. Geographical Perspectives on the Middle East. 3 Credits.

Examination of selected topics related to political, economic, social, cultural, and geographic patterns and processes in the region.

GEOG 6265. Geography of Russia and Its Neighbors. 3 Credits.

A deeper understanding of Post-Soviet geography with a focus on the physical and environmental characteristics of the region, geography of natural and human resources, ethnic, cultural and religious diversity, characteristics of economic and political regions, and recent geopolitical developments.

GEOG 6290. Principles of Demography. 3 Credits.

Introduction to basic demographic perspectives and data; methods for analysis of population size, distribution, and composition; determinants and consequences of population trends. Departmental prerequisite waived. Same as ECON 6290/ SOC 6290/ STAT 6290.

GEOG 6291. Methods of Demographic Analysis. 3 Credits.

Basic methods for analysis of mortality, natality, and migration; population estimates and projections; estimation of demographic measures from incomplete data. Departmental prerequisite waived. Same as ECON 6291/ SOC 6291/ STAT 6291.

GEOG 6292. Qualitative Methods in Geography. 3 Credits.

Qualitative research methods, including questionnaires, focus groups, in-depth interviews, repeat photography, observation, reflective mapping, coding, and map interpretation that help appreciate the human experience and build upon ways to produce knowledge.

GEOG 6293. Special Topics. 3 Credits.

Consideration of geographic aspects of topical social or environmental problems. May be repeated for credit provided the topic differs.

GEOG 6295. Research. 1-12 Credits.

May be repeated for credit.

GEOG 6299. Internship. 1-3 Credits.**GEOG 6300. Geography Capstone Internship. 3 Credits.**

This course provides hands-on experiential learning in a local government agency, NGO, or corporation while allowing the candidate to use his/her geographical skills in a real world setting. Restricted to graduate students in the geography program. Prerequisite: GEOG 6201.

GEOG 6303. Introduction to Remote Sensing. 3 Credits.

Theoretical, technical, and applied aspects of remote sensing as a tool for monitoring and managing Earth's resources.

GEOG 6304. Geographical Information Systems I. 3 Credits.

Fundamentals of cartography; geographic data structure and geographic information systems.

GEOG 6305. Geospatial Statistics. 3 Credits.

Nature of geographical inquiry and the analytical and statistical methods used in the study of spatial processes and patterns.

GEOG 6306. Geographical Information Systems II. 3 Credits.

Advanced principles of geographic information systems and their use in spatial analysis and information management. Prerequisites: GEOG 6304 and GEOG 6305.

GEOG 6307. Digital Image Processing. 3 Credits.

This course introduces students to the theoretical, technical and applied aspects of remote sensing as a tool for monitoring and managing earth resources. This course provides students with the knowledge for analyzing and applying remotely sensed data for problem solving as it applies to land cover. Prerequisite: GEOG 6304.

GEOG 6308. Programming for Geospatial Applications. 3 Credits.

Fundamental concepts for creating Python scripts in ArcGIS; guidelines for proper Python syntax, techniques to troubleshoot common errors, and using loops to test for conditions and execute code based on results. Prerequisites: GEOG 6304 and GEOG 6305.

GEOG 6309. GIS for Emergency Management. 3 Credits.

This course introduces students to the theoretical principles of geographic information systems and examines its history, current uses and potential for emergency management through case studies, guest lectures and hands-on training on various GIS products. Prerequisite: GEOG 6304.

GEOG 6310. Geovisualization and Cartography. 3 Credits.

Introduction to cartographic design; components of mapmaking, including purpose, generalization, and symbolization; spatial thinking and effective audience-specific communication. Prerequisite: GEOG 6304.

GEOG 6311. Open Source Solutions for Geospatial Project Management. 3 Credits.

Geospatial project management, from design through implementation. Students work exclusively with open source technology for data capture, management, analysis, and communication; open source solutions and the effectiveness and sustainability of project management. Prerequisite: GEOG 6304.

GEOG 6998. Thesis Research. 3 Credits.**GEOG 6999. Thesis Research. 3 Credits.**

GEOLOGY (GEOL)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

GEOL 1001. Physical Geology. 3 Credits.

Lecture, laboratory. An introduction to the principal features of the composition and structure of the earth. Topics include the nature of minerals and rocks, surface and deep earth processes, mineral and energy resources, and plate tectonics. Laboratory fee. Credit is not given for both GEOL 1001 and GEOL 1005.

GEOL 1002. Historical Geology. 3 Credits.

Lecture, laboratory. An introduction to the history of the earth. Topics include sedimentary environments, plate tectonics, origin of life, and evolution. Laboratory fee. Prerequisite: GEOL 1001 or GEOL 1005.

GEOL 1005. Environmental Geology. 3 Credits.

Lecture, laboratory. An introduction to the impact of geology on the environment, with emphasis on the relation of people and society to natural environments; population evolution, natural hazards, and mineral resources. Laboratory fee. Credit is not given for both GEOL 1001 and GEOL 1005.

GEOL 2106. Oceanography. 3 Credits.

The ocean with its many environments represents the last largely unexplored frontier on earth. Origin of the ocean systems and plate tectonics, ocean habitats and their biota, marine hydrology and ocean currents; air-sea interaction and climate control; ocean mapping techniques; environmental regulations covering marine resources. Laboratory fee. Prerequisite: GEOL 1001 or GEOL 1005.

GEOL 2111. Mineralogy. 4 Credits.

Lecture and laboratory. Introduction to the crystallography and chemical systematics of rock-forming and ore minerals. Exercises emphasize the analysis of mineralogic data and the paragenesis of mineral assemblages. Laboratory fee. Prerequisites: GEOL 1001 or GEOL 1005; or permission of the instructor.

GEOL 2112. Igneous and Metamorphic Petrology. 4 Credits.

Lecture and laboratory. Introduction to basic light theory and the identification and characterization of minerals through optical properties. Laboratory exercises provide an introduction to petrologic analysis of igneous and metamorphic mineral systems. Prerequisite: GEOL 2111 or permission of the instructor. Laboratory fee.

GEOL 2122. Structural Geology. 3 Credits.

Lecture and laboratory. Study of natural and experimental rock deformation and the relationships between stress and strain as recorded by geologic structures. Prerequisite: GEOL 1001 or GEOL 1005. Laboratory fee.

GEOL 2151. Introduction to Paleontology. 3 Credits.

A review of the origin of life, the geologic record, and the evolutionary history of the major groups of organisms, including the origin of life and evolution of invertebrates, vertebrates, and plants. Laboratory fee. Prerequisite: GEOL 1002.

GEOL 2190. Special Topics in Geology. 1-3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

GEOL 2333. Evolution and Extinction of Dinosaurs. 3 Credits.

The 165-million-year history of dinosaurs; different groups and their evolution, end-Cretaceous extinction event, the origin of birds, and the biology of the group. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125 and BISC 1112 or BISC 1116 and BISC 1126; or GEOL 1001 and GEOL 1002; or GEOL 1002 and GEOL 1005. (Same as BISC 2333).

GEOL 3118. Volcanology. 3 Credits.

Fundamental principles and geologic processes associated with volcanism. Eruptive styles, processes leading to magma production and transport, triggering mechanisms, plate tectonic settings, volcanic hazards, and disaster mitigation. Case histories of selected volcanic eruptions examined in detail. Laboratory fee. Prerequisites: GEOL 2111 or permission of the instructor.

GEOL 3119. Field Experience in Volcanology. 1 Credit.

Weeklong field exercise at a major volcanic center in the western United States; field-based interpretation and analysis of volcanic and related rocks. Classroom discussion focuses on the processes responsible for volcanism. Deposit for expenses is required. Recommended background: Prior completion or concurrent enrollment in GEOL 2112 and GEOL 3118.

GEOL 3123. Crustal Dynamics. 0-3 Credits.

Basic plate tectonic processes and features; the plate tectonic paradigm in historical evolutionary framework. Students present an original research project orally and in writing. Prerequisite: GEOL 2122. Laboratory fee.

GEOL 3128. Sedimentology and Stratigraphy. 3 Credits.

Introduction to sedimentation and stratigraphy; origin and classification of sediments and sedimentary rocks; introduction to clastic and carbonate depositional environments and stratigraphic principles. Prerequisite: GEOL 1001.

GEOL 3129. Sedimentology and Stratigraphy Lab. 1 Credit.

Introduction to sedimentation and stratigraphy; origin and classification of sediments and sedimentary rocks; introduction to clastic and carbonate depositional environments and stratigraphic principles. Prerequisite: GEOL 2112.

GEOL 3131. Global Climate Change. 3 Credits.

Fundamental causes and patterns of climate change. Methods of reconstruction of past climates; modeling and predicting climate change.

GEOL 3138. Hydrogeology. 3 Credits.

Principles and theory of basic and applied hydrology: surface water hydrology, geology of groundwater systems, groundwater flow, surface water-groundwater interactions, contamination and remediation technologies, conservation, management, and regulations. Laboratory fee. Prerequisites: GEOL 2111 and GEOL 2122; and MATH 1221 or MATH 1231; or permission of the instructor.

GEOL 3140. Geochemistry. 3 Credits.

Chemical systems and processes on the planet Earth; origins and interactions among and within the Earth's lithosphere, oceans, and atmosphere; origin, distribution, and behavior of the elements; radioactive and stable isotope systems. Aqueous geochemistry; geochemical cycles. Prerequisites: GEOL 1001 or GEOL 1005; and CHEM 1111 and CHEM 1112. (Same as CHEM 3140).

GEOL 3189. Geophysics. 3 Credits.

Principles of magnetic, gravity, seismic and electrical methods applied to geological problem-solving. Prerequisite: GEOL 2122 or permission of instructor.

GEOL 3191. Geology of Energy Resources. 3 Credits.

Principles of geology applied in energy exploration, exploitation, and production; the geology of energy resources in ocean basins; borehole and surface geophysical applications and reconnaissance mapping techniques; management and regulation of energy resources; sustainability, efficiency, and conservation issues. Laboratory fee. Prerequisites: GEOL 2122 or permission of the instructor.

GEOL 4195. Geological Field Methods. 4 Credits.

Weekend field trips. Methods of outcrop analysis, geologic mapping, and data interpretation. The geological evolution of the central Appalachian mountains and the plate tectonic processes responsible for their formation emphasized. Field trip fee. Prerequisites: GEOL 2111 and GEOL 2122.

GEOL 4195W. Geological Field Methods. 4 Credits.

Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

GEOL 4199. Undergraduate Research or Reading. 1-12 Credits.

Problems approved by the staff. May be repeated for credit.

GERMANIC LANGUAGE AND LITERATURE (GER)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

GER 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details.

GER 1001. First-Year German I. 4 Credits.

Fundamentals of speaking, understanding, reading, and writing German. Laboratory fee.

GER 1002. First-Year German II. 4 Credits.

Continuation of GER 1001. Fundamentals of speaking, understanding, reading, and writing German. Prerequisite: GER 1001. Laboratory fee.

GER 1003. Second-Year German I. 4 Credits.

Fundamentals of speaking, understanding, reading, and writing German. Prerequisite: GER 1002 . Laboratory fee.

GER 1004. Second-Year German II. 4 Credits.

Continuation of GER 1003. Fundamentals of speaking, understanding, reading, and writing German. Prerequisite: GER 1003. Laboratory fee.

GER 1005. Intensive Beginning German I. 8 Credits.

Intensive course in fundamentals of speaking, understanding, reading, and writing German (equivalent to GER 1001- GER 1002). Recommended for majors. Laboratory fee.

GER 1006. Intensive Beginning German II. 8 Credits.

Continuation of GER 1005. Intensive course in fundamentals of speaking, understanding, reading, and writing German (equivalent to GER 1003- GER 1004). Prerequisite: GER 1002 or GER 1005. Recommended for majors. Laboratory fee.

GER 2009. Intermediate German I. 3 Credits.

Practice in speaking, listening, reading, and writing at the intermediate level. Prerequisites: GER 1004 or GER 1006; or permission of the instructor.

GER 2010. Intermediate German II. 3 Credits.

Continuation of GER 2009. Practice in speaking, listening, reading, and writing at the intermediate level. Prerequisites: GER 1004 or GER 1006; or permission of the instructor.

GER 2091. Introduction to German Literature—in English I. 3 Credits.

Survey of German literature 1700 to 1830, including the Enlightenment through Sturm und Drang, classicism, and romanticism.

GER 2092. Introduction to German Literature—in English II. 3 Credits.

Continuation of GER 2091. Survey of German literature 1830 to 1950, including Young Germany through realism, naturalism, expressionism, and the literature of the Third Reich years (exile literature and inner emigration).

GER 2101. Readings in Contemporary German I. 3 Credits.

Analysis of representative readings of expository prose from German newspapers, periodicals, and other publications. Prerequisite: for GER 2101, GER 1004 or GER 1006 .

GER 2102. Readings in Contemporary German II. 3 Credits.

Continuation of GER 2101. Analysis of representative readings of expository prose from German newspapers, periodicals, and other publications. Prerequisite: GER 2101.

GER 2109. Advanced Conversation and Composition. 3 Credits.

Introduction to approaches, concepts, and analytical tools for study in the field, complemented by advanced practice in speaking, listening, reading, and writing. Prerequisites: GER 2010 or permission of the instructor.

GER 2109W. Introduction to German Studies I. 3 Credits.

An introduction to approaches, concepts, and analytical tools for study in the field, complemented by advanced practice in speaking, listening, reading, and writing. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: GER 2010 or permission of the instructor.

GER 2110. Introduction to German Studies II. 3 Credits.

Continuation of GER 2109. An introduction to approaches, concepts, and analytical tools for study in the field, complemented by advanced practice in speaking, listening, reading, and writing. Prerequisites: GER 2010 or permission of the instructor.

GER 2110W. Introduction to German Studies II. 3 Credits.

Continuation of GER 2109. An introduction to approaches, concepts, and analytical tools for study in the field, complemented by advanced practice in speaking, listening, reading, and writing. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: GER 2010 or permission of the instructor.

GER 2111. Business German. 3 Credits.

Introductory course preparing students to function in business-related communicative situations, with an emphasis on language skills necessary for work in areas such as marketing and finance. Prerequisites: GER 2010 or permission of the instructor.

GER 2161. German Culture-in English I. 3 Credits.

The central problems, issues, and events that have shaped the development of German culture from antiquity to the present. Emphasis on products and processes of German culture in social, historical, and political contexts.

GER 2162. German Culture-in English II. 3 Credits.

Continuation of GER 2161. The central problems, issues, and events that have shaped the development of German culture from antiquity to the present. Emphasis on products and processes of German culture in social, historical, and political contexts.

GER 2165. Twentieth-Century German Literature-in English. 3 Credits.

Survey of the major trends in the works by modernist, exile, postwar, and contemporary German writers such as Kafka, Thomas Mann, Duerrenmatt, and Grass.

GER 3181. History of German Cinema-in English. 3 Credits.

A detailed historical and cultural survey of German cinema from the first moving picture devices (1895) to the expressionistic classics of the 1920s and the collapse of the Nazi film industry in 1945. All films are subtitled.

GER 3182. The Fairy Tale from the Grimms to Disney. 3 Credits.

Survey of the changing form, structure, and meaning of the fairy tale in its traditional contexts, modern transformations and critical interpretations, with readings by nineteenth-century European collectors and twentieth-century critics. Taught in English.

GER 3183. Berlin Before and After the Wall. 3 Credits.

The political, social, and cultural developments in Berlin from 1945 to the present through a reading of selected primary documents, historical analyses, and short literary texts.

GER 3184. German Thought-in English. 3 Credits.

An overview of German ideas about culture, religion, society, and politics from the sixteenth century to the present. Readings from such writers as Luther, Leibniz, Kant, Schiller, Hegel, Marx, Nietzsche, Freud, Weber, Heidegger, Adorno, and Habermas.

GER 3185. Literary Voices and the Fascist Experience-in English. 3 Credits.

A survey of writers anticipating as well as reflecting on Germany's plunge into the totalitarian abyss of fascist politics, including H. Mann, Kafka, Juenger, Brecht, Werfel, Thomas Mann, Lenz, Frisch, Duerrenmatt, and various forms of Holocaust poetry.

GER 3186. German Women Writers of the 19th and 20th Centuries. 3 Credits.

The changing literary and social roles of German women of the 19th and 20th centuries, examined through selected readings of women's literary production and culture.

GER 3187. German Cinema after 1945. 3 Credits.

The evolution of German cinema after 1945 in relation to social and political developments in the two German states; the national and international influences on the development of East and West German film and on film since German unification. Taught in English.

GER 3188. The Lives of East Germans. 3 Credits.

Consideration of what it meant to grow up and live in the German Democratic Republic and the changes and challenges to East German identity since unification. The course draws upon historical, political, and sociological studies as well as literary and filmic representations of East German experience.

GER 3189. Dealing with the Communist Past in Germany and Eastern Europe. 3 Credits.**GER 4171. The Age of Goethe-in German. 3 Credits.**

Readings of major works of Weimar classicism in their historical and cultural context.

GER 4172. From Romanticism to Realism. 3,4 Credits.

Readings in German romanticism (Kleist, Hoffmann), literature of the "young Germany" movement (Büchner), and realism (Keller, Storm).

GER 4173. Naturalism to Expressionism. 3 Credits.

Study of various literary movements between 1880 and 1914: naturalism, impressionism, symbolism, and expressionism (Hauptmann, Hesse, Thomas Mann, Kafka).

GER 4174. Inside/Outside the Third Reich. 3 Credits.

Analysis of literary developments inside the Nazi state (propaganda literature, literature of resistance, and inner immigration) and the literature of exile (Seghers, Remarque).

GER 4175. Literature of two Germanies. 3 Credits.

Evolution of East and West German literatures after World War II, their separate developments and ultimate unification.

GER 4176. Contemporary German Literature. 3 Credits.

Analysis of works by former East and West German writers after unification as well as the generation of young German writers, who came of age after or around the time of unification. Emphasis on memoirs, family narratives, essays, and films examining Germany's transition from fascism and socialism to democracy.

GER 4195. Special Topics. 1-3 Credits.

May be repeated for credit provided the topic differs.

GER 4197. Senior Honors Thesis I. 3 Credits.

Senior honors thesis on a topic related to German language, literature, or culture. Required of and open only to honors candidates in the department.

GER 4198. Senior Honors Thesis II. 3 Credits.

Continuation of GER 4197. Senior honors thesis on a topic related to German language, literature, or culture. Required of and open only to honors candidates in the department.

GOVERNMENT CONTRACTS (GCON)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

GCON 6290. Special Topics. 0-3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details. Recommended background: GCON 6502 and GCON 6503.

GCON 6501. Capstone Research and Writing Project. 3 Credits.

Students produce an original project to demonstrate accumulated learning and professional development in the government contracts field. Course requirements are fulfilled through completion of either a research thesis of approximately 6,000 words or alternate projects determined in consultation with the program director. Restricted to For Master of Science in Government Contracts candidates.

GCON 6502. Formation of Government Contracts. 3 Credits.

Survey of the law pertaining to government procurement, including an analysis of the unique features of government contracting and a discussion of the functions of Congress, the executive branch, and the courts in the procurement process. Focus on the contract formation process, including techniques for awarding contracts and litigation and protests involving awards. (Same as LAW 6502).

GCON 6503. Performance of Government Contracts. 3 Credits.

Substantive problems that most frequently arise during the performance of government contracts. Interpretation of specifications and the most generally used contract clauses; analysis of the rights of the parties when performance in accordance with the terms of the contract is not obtained. Analysis of the methods that can be used by the parties to a government contract to obtain legal relief, including detailed coverage of the disputes procedure, actions for breach of contract, and forms of equitable and extraordinary relief. (Same as LAW 6503).

GCON 6504. MSGC Capstone Scholarly Writing. 1 Credit.

A research and writing project completed under the supervision of the law school that integrates students' cumulative learning experiences in and demonstrates their understanding of government contract law and business. The project addresses a current acquisition issue of interest to the student. Students are expected to produce a final paper for submission to a relevant scholarly journal for publication. Restricted to Master of Science in Government Contracts candidates.

GCON 6505. Marketing for the Government Marketplace. 3 Credits.

The key elements of the business environment that affect marketing for the federal government. Important characteristics of government versus consumer and business markets; segmentation, targeting, and positioning; brand equity and the importance of building strong brands. Key issues and decisions associated with the marketing mix (products, pricing, distribution, and promotion). Application of marketing principles and theories to federal government contracting opportunities.

GCON 6506. Pricing Issues in Government Contracts. 3 Credits.

Fundamentals of government contracts cost and pricing. The regulatory, accounting, estimating and financial foundations of cost and pricing, including Federal Acquisition Regulation ("FAR") Part 15, FAR Part 31, and Cost Accounting Standards ("CAS"). Topics examined from both contractor and government perspectives include evaluating cost and pricing of government contract proposals, negotiating fair and reasonable contract prices, evaluating requests for equitable adjustment and claims that arise in government contract performance, and settlement proposals in terminations for convenience. Case studies and class presentations allow students to practice and enhance their skills based on practical issues that arise in the cost and pricing arena.

GCON 6508. Comparative Public Procurement. 2 Credits.

Comparative study of laws, regulations, and procedures dealing with public procurement, with a focus on common issues and challenges facing government procurement systems throughout the world; approaches of the U.S. federal system compared to those of various international organizations. Restricted to students in the MS in government contracts program. Prerequisite: GCON 6515.

GCON 6509. State and Local Procurement. 2 Credits.

Common procurement methods and solutions used in state and local governments and comparison with those used in federal procurement systems; the distinct evolution of state and federal procurement legal systems and whether they should be more closely connected. Restricted to students in the MS in government contracts program. Prerequisite: GCON 6515.

GCON 6510. Foreign Government Contracting. 2 Credits.

Special legal and policy issues resulting from the emergence of a highly globalized public procurement market; export controls, anti-corruption requirements, and unique legal rules for certain types of foreign assistance. Restricted to students in the MS in government contracts program. Prerequisite: GCON 6515.

GCON 6511. Federal Grants Law. 2 Credits.

The federal financial assistance system and specific legal issues arising with respect to management of federal grants and cooperative agreements. Restricted to students in the MS in government contracts program.

GCON 6512. Government Procurement of Intellectual Property Seminar. 2 Credits.

Intellectual property law in terms of its challenges to federal government procurement rules; competing policy demands for innovation, transparency, and sound public investment in the intersection of intellectual property law and federal procurement rules. Restricted to students in the MS in government contracts program.

GCON 6513. Procurement Reform. 2 Credits.

Emerging issues in U.S. public procurement law; reforms regarding integrity, transparency, and competition; European procurement law as a comparative counter-example to U.S. law. Restricted to students in the MS in government contracts program. Prerequisite: GCON 6515.

GCON 6514. Anti-Corruption and Compliance. 2 Credits.

Domestic and international anti-corruption laws; traditional U.S. bribery and gratuity laws and the implementation and enforcement of these laws and programs; international anti-corruption efforts in enforcement and through international instruments. Restricted to students in the MS in government contracts program.

GCON 6515. Advanced Writing for Government Contracts. 2 Credits.

Understanding and analyzing the fundamental parts of the writing process to achieve greater mastery of written communication. Students reflect on their own writing process, identify areas for improvement, and develop advanced practical skills. Restricted to students in the MS in government contracts program. Prerequisites: GCON 6502 and GCON 6503.

GREEK (GREK)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

GREK 1001. Beginning Classical Greek I. 4 Credits.

Study of the grammar, vocabulary, and structure of ancient Greek. Reading of selected ancient authors.

GREK 1002. Beginning Classical Greek II. 4 Credits.

Continuation of GREK 1001. Study of the grammar, vocabulary, and structure of ancient Greek. Reading of Homer and selected ancient authors. Prerequisite: GREK 1001.

GREK 2001. Intermediate Classical Greek I. 3 Credits.

Reading of ancient Greek prose or poetic works (e.g., selections from Homer, Plato, Euripides). Review of grammar. Prerequisite: GREK 1002 .

GREK 2002. Intermediate Classical Greek II. 3 Credits.

Continuation of GREK 2001. Reading of ancient Greek prose or poetic works, such as selections from Homer, Plato, and Euripides. Review of grammar. Topics vary by year. Permission of the instructor may be substituted for the prerequisite. Prerequisite: GREK 2001.

GREK 2002W. Intermediate Classical Greek II. 3 Credits.

Continuation of GREK 2001. Reading of ancient Greek prose or poetic works, such as selections from Homer, Plato, and Euripides. Review of grammar. Topics vary by year. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Permission of the instructor may be substituted for the prerequisite. Prerequisite: GREK 2001.

GREK 3001. Major Greek Authors I. 3 Credits.

Selections from a wide variety of Greek prose, drama, and poetry, suited to the needs of the class. May be repeated for credit with permission of instructor. Prerequisite: GREK 2002 .

GREK 3001W. Major Greek Authors II. 3 Credits.

Selections from a wide variety of Greek prose, drama, and poetry, suited to the needs of the class. May be repeated for credit with permission of instructor. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: GREK 2002 .

GREK 3002. Major Greek Authors II. 3 Credits.

Continuation of GREK 3001. Selections from a wide variety of Greek drama and poetry, suited to the needs of the class. Topics vary by year. May be repeated for credit with permission of instructor. Prerequisite: GREK 2002 or permission of the instructor.

GREK 3002W. Major Greek Authors II. 3 Credits.

Continuation of GREK 3001. Selections from a wide variety of Greek drama and poetry, suited to the needs of the class. Topics vary by year. May be repeated for credit with permission of instructor. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: GREK 2002.

GWTEACH (GTCH)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

GTCH 1001. GWTeach Step 1: Inquiry Approaches to Teaching. 1 Credit.

First recruitment course in the GWTeach professional development sequence. Overview of latest methods in teaching. Elementary school teaching experience using lessons written based on district curricula.

GTCH 1002. GWTeach Step 2: Inquiry-based Lesson Design. 1 Credit.

Second recruitment course in the GWTeach professional development sequence. Overview of latest methods in teaching. Middle school teaching experience using lessons written based on district curricula. Prerequisite: GTCH 1001.

GTCH 1003. Step 1 and 2 Hybrid. 3 Credits.

Students build and practice inquiry-based lesson design skills for elementary and middle school students; classroom management techniques and analysis of performance data.

GTCH 3101. Knowing and Learning in Mathematics and Science. 3 Credits.

Introduction to models of knowing and learning for classroom practice. Focus on secondary mathematics and science. Prerequisites: GTCH 1001 and GTCH 1002.

GTCH 3102. Classroom Interactions. 3 Credits.

Introduction to use of curriculum and technology in the classroom for effective teaching of mathematics, science, and engineering. Interplay between teachers, students, content, and the world beyond schools; design, implementation, and evaluation of outcomes of instructional activities. Co-requisite: GTCH 3101. Restricted to junior and senior students in the GWTeach program. Prerequisites: GTCH 1001; and GTCH 1002 or GTCH 1003.

GTCH 3103. Project-Based Instruction. 3 Credits.

Design of full units of connected lessons. Integration of mathematics and science content. Intensive field-based experiences. Restricted to students in the GWTeach program with junior or senior standing or with permission of the instructor. Prerequisite: GTCH 3102.

GTCH 3201. Perspectives on Math and Science. 3 Credits.

Topics and episodes in the history of science and mathematics. Focus on processes by which math and science evolves. Perspectives include biology, physics, geology, astronomy, and chemistry. Historical perspectives on the content and direction of the sciences. Restricted to GWTeach students and to others with permission of the instructor. Restricted to Sophomore or higher standing. Prerequisites: GWTeach courses GTCH 1001 – Step 1 and GTCH 1002 – Step 2 or permission of the instructor. Recommended background: Most students will be in the GWTeach program. Other students may enroll with permission of the instructor.

GTCH 3201W. Perspectives on Math and Science. 3 Credits.

Topics and episodes in the history of science and mathematics; evolutionary processes of math and science; historical perspectives on the content and direction of the sciences. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

GTCH 3202. Research Methods in Math and Science. 3 Credits.

Design experiments to answer scientific questions and reduce systematic and random errors. Statistics to interpret experimental results. Restricted to Sophomore or higher standing. Restricted to GWTeach students and to others with permission of the instructor. Prerequisites: GWTeach courses GTCH 1001 – Step 1 and GTCH 1002 – Step 2 or permission of the instructor. Recommended background: Most students will be in the GWTeach program. Other students may enroll with permission of the instructor.

GTCH 3203. Functions and Modeling. 3 Credits.

Mathematics addressing unique needs of future teachers of mathematics. Explore models using linear, exponential, polynomial, and trigonometric functions. Restricted to Sophomore or higher standing. Restricted to GWTeach mathematics students and to others with permission of the instructor. Prerequisites: GWTeach courses GTCH 1001 – Step 1 and GTCH 1002 – Step 2 or permission of the instructor. Recommended background: Most students will be in the GWTeach program. Other students may enroll with permission of the instructor.

GTCH 3500. Topics in STEM Teaching. 1 Credit.

Issues in STEM research and education. Topics vary by semester. May be repeated for credit if topic differs. Consult the Schedule of Classes for more details. Restricted to GWTeach and minor in STEM teaching students with permission of the GWTeach Associate Director.

GTCH 3600. Pedagogy for Learning Assistants. 2 Credits.

Integration of educational theory, pedagogy, and practice; classroom discourse, group discussions, disciplinary thinking, questioning, models of cognition, metacognition, formative assessment, classroom presence. For students serving as learning assistants in large-enrollment undergraduate science courses. Restricted to GWTeach and minor in STEM teaching students with permission of the GWTeach Associate Director.

GTCH 4000. Apprentice Teaching. 0-7 Credits.

Culminating experience and tools for first teaching positions. Students who intend to teach mathematics take GTCH 3203 in addition to the listed prerequisites. Restricted to GWTeach apprentice teachers with junior or senior standing. Prerequisites: GTCH 3101, GTCH 3201, and GTCH 3202.

HEALTH AND WELLNESS (HLWL)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

HLWL 1101. Special Topics. 1-3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. See department for more details.

HLWL 1102. Stress Management. 3 Credits.

A holistic view of stress management, including mind, body, spirit, and emotions; dominant stressors and how they affect health and wellness.

HLWL 1103. Issues in Men's Health. 3 Credits.

Issues in men's health ranging from the physical and emotional to the spiritual and occupational.

HLWL 1104. Outdoor and Environmental Education. 3 Credits.

A conceptual and experiential introduction to outdoor education, environmental education, wilderness travel, and outdoor leadership. Materials fee.

HLWL 1105. Yoga and the Meaning of Life. 3 Credits.

The historical teachings that have contributed to the physical, psychological, and spiritual practices of yoga.

HLWL 1106. Drug Awareness. 3 Credits.

Analysis of the complex role that drugs play in contemporary society and the ethical, legal, socioeconomic, and health issues that surround their therapeutic and recreational use.

HLWL 1108. Weight and Society. 3 Credits.

Background and concepts of body dissatisfaction, disordered eating, food preoccupation, and exercise obsession.

HLWL 1108W. Weight and Society. 3 Credits.

Background and concepts of body dissatisfaction, disordered eating, food preoccupation, and exercise obsession. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

HLWL 1109. Human Sexuality. 3 Credits.

Biological and developmental aspects of human sexuality; psychological and emotional aspects of sexual behavior; sexual identity; social forces affecting sexual issues; and research trends in the area of human sexuality.

HLWL 1110. Issues in Alternative Medicine. 3 Credits.

Various modalities of alternative/complementary/integrative therapy; critical analysis and evaluation of the many dimensions of these approaches.

HLWL 1112. Issues in Women's Health. 3 Credits.

An introduction to health promotion and disease prevention pertaining especially to diseases, disorders, and conditions that are more prevalent among or unique to women or for which risk factors or interventions may differ for women and men. Topics are covered from epidemiological, sociocultural, historical, and behavioral perspectives.

HLWL 1114. Personal Health and Wellness. 3 Credits.

Survey of the various components involved in personal health and wellness, such as personal fitness, sexuality, mental health, and environmental health; application of knowledge through the use of decision making and behavior modification skills.

HLWL 1116. Lifestyle Nutrition. 3 Credits.

Introduction to nutrition that enables the student to make healthful food choices to enhance quality of life and prevention of chronic disease. Topics may include label reading, vegetarian diets, eating for exercise, and interpreting nutrient recommendations.

HLWL 1117. Lifetime Fitness. 3 Credits.

Core elements of personal fitness as applied to daily life. Emphasis on the development of functional fitness skills that can be practiced both in and out of the classroom.

HEALTH CARE QUALITY (HCQ)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

HCQ 6200. Introduction to Health Care Quality. 3 Credits.

An overview of the US health care system and the influence of health policy development and implementation on health care quality. Introduction to fundamental concepts of health care quality, patient safety, leadership, and change management.

HCQ 6201. Building a Quality Culture. 3 Credits.
